The title 'gavotte' has appeared in more recent compositions, including Johann Strauss's 'Gavotte der Königin' from *Das Spitzentuch* (1880); Richard Strauss's Suite for 13 wind instruments op.4 (1884); Saint-Saëns's Gavotte for piano solo op.23 (1872), Orchestral Suite op.49 (1877) and Suite op.90 (1892); Prokofiev's Classical Symphony op.25 (1916–17); and Schoenberg's Suite for piano op.25 (1925). While all these share the duple metre of the old dance, none seems to have more than a vague neo-classical association with older music, nor exhibits any of the rhythms characteristic of the Baroque gavotte.

MEREDITH ELLIS LITTLE

Gavoty, Bernard (*b* Paris, 2 April 1908; *d* Paris, 24 Oct 1981). French critic, writer on music and organist. He studied the organ and harmony at the Paris Conservatoire (1934–7) under Marcel Dupré and Georges Caussade, and took a degree in literature at the Sorbonne. He was in charge of the Jeunesses Musicales de France and in 1942 was appointed resident organist at St Louis-des-Invalides in Paris, the great organ of which he inaugurated after its reconstruction in 1957. He was music critic for the *Figaro* under the pseudonym of Clarendon from 1945 until his death. He was also a radio and television producer at the ORTF from 1948.

Many of Gavoty's works are enthusiastic biographies of organists (Vierne, Jehan Alain) and other famous musicians whom he knew personally; he was author of Les Grands Interprètes, a popular series of biographies of contemporary musicians illustrated by the photographer Roger Hauert (Geneva, 1953–62; Ger. trans., 1953–62). He was also known for his critical attitude to the experiments of the avant garde. His writings are characterized by polished language and a style that is lively and vivacious with a frequent use of paradox.

CHRISTIANE SPIETH-WEISSENBACHER

Gavrilin, Valery Aleksandrovich (*b* Vologda, 17 Aug 1939; *d* 28 Jan 1999). Russian composer. He started to study music at a children's home in Vologda with the pianist T.D. Tomashevskaya. He studied at the Leningrad special middle school for music attached to the conservatory in the class of S. Ya. Vol'fenzon (1953–8), and then at the

Conservatory itself (1958–64) with Orest Yevlakhov (composition) and F.A. Rubtsov (folklore). He taught composition at the N.A. Rimsky-Korsakov Music School in Leningrad (1965–73). He became a member of the USSR Union of Composers in 1965, was nominated People's Artist of Russia (1965), and was a laureate of state prizes of the RSFSR (1967), and of the USSR (1985).

The recollection of his childhood in Vologda and the surrounding villages during the war have played a major role in Gavrilin's artistic development. His impressions of life in the north-western Russian backwoods, the tragedy of that time (the composer's father died in 1941 on the Leningrad front) and his contact with the rich and lively traditions of folk singing in many ways defined his future musical language. His years at the conservatory coincided with the epoch of Khrushchev liberalism, and the slight lifting of the Iron Curtain. The young composer became acquainted with not only the classical heritage, but the music of Stravinsky, Prokofiev, Shostakovich, Bartók, Hindemith, Berg and contemporary works of the Polish avant garde.

Gavrilin achieved recognition with his *Russkaya tetrad'* ('Russian Exercise-Book') for voice and piano (1965) which was unanimously welcomed by the patriarchs of Soviet music – Kabalevsky, Khachaturian, Khrennikov, Shostakovich and Sviridov. In this work the composer found a musical image which became characteristic of him – the portrait of a northern Russian peasant girl. The story of her unfulfilled love (the theme of a woman's fate is traditional for Russian peasant lyrics) is the basis of the cycle. The musical material is virtually indistinguishable from its folk source, but nonetheless bears an individual stamp. Feelings of despair, bitterness and solitude dominate the ingenuous transitions from *chastushka* to lament; commentaries take the form of economic but varied piano accompaniment. The harmony is largely tonal but encompasses effects ranging from two-part writing in parallel 4ths to multi-layered, highly dissonant polytonal clusters. Frequently unusual progressions are primarily governed by the modal gravitation of the melodic pitches. These tendencies are further developed in the three *Nemetskiye tetradi* ('German Exercise-Books') which are unique manifestos of the Russian neo-romanticism of the 1960s and 70s, and testify to the spiritual kinship between certain Russian composers and the German Romantics.

The years Gavrilin spent in the theatre and the cinema gave rise to the creation of the genre which the composer called an 'action'. In these 'actions' there are no librettos, stage directions, recitatives, or arias. They usually consist of a succession of songlike solo numbers, alternated with choruses and occasionally linked by short instrumental intermezzos. There is however a strong theatrical element; whatever the symbolic or psychological content of a song, it is easy to guess the identity of the characters and the images. Thus, the *Voyenniye pis'ma* ('Wartime Letters') convey those feelings so well known to the wartime generations: expectations of a letter from the front, the terrible moment of receiving a 'killed in battle notice', the happy recollections of times before the war. The main hero – a soldier who has not returned from the front – is easily recognizable as a native of a northern Russian village. His largest composition in this genre is *Perezvonï* ('Chimes'). It represents a fusion of heterogeneous elements originating from the folk theatre, fairy tales, rituals, superstitions and children's games. Gavrilin compiled the text in the spirit of folk poetry, *priskazki* (story teller's introductions), *pribautki* (humorous catch-phrases) and nonsense rhyme; the subject manner represents the succession of images which appear to a person before death. The musical language is an amalgamation of a folk style and virtuoso choral writing; the score abounds in numerous devices which originate from folk polyphony (such as *chastushka pod yazïk*, in which the voice imitates the sounds of instruments in lines of humorous folk poetry), from Russian polyphonic liturgical singing (especially the '*strochnoye peniye*' (line singing) of the 17th century) in addition to choral recitation, quasi-aleatory devices, imitative techniques and complex polyphonic forms. *Perezvonï* is considered a model work of 20th-century Russian choral music.

WORKS

Ops: Povest' o skripache Vanyushe, ili Utesheniya [The Tale of the Fiddler Vanyusha, or Consolations] (N. Butovsky, after G. Uspensky), 1972; Anyuta (A. Belinsky, after A. Chekhov), 1982; Dom u dorogi [The House near the Road] (Belinsky, after A. Tvardovsky), 1984; Podporuchik Romashov [Lieutenant Romashov] (B. Eyfman, after A. Kuprin), 1985; Zhenit'ba Bal'zaminova [The Marriage of Balzaminov] (Belinsky, after A.N. Ostrovsky), 1990

Choral: Skomorokhi [Folk Entertainers] (B. Korostïlyov), Bar, male chorus, orch, 1967; Voyennïye pis'ma [Wartime Letters] (A. Shul'gina) S, Bar, chorus, orch, 1972; Svad'ba [The Marriage] (V. Gavrilin, Shul'gina, trad.), S, chorus, orch, 1978–81; Perezvonï [Chimes] (Gavrilin, Shul'gina, trad.), soloists, spkr, chorus, ob, perc, 1981–2; Pastukh i pastushka [The Shepherd and Shepherdess] (after V. Astaf'yev, V. Gavrilin, trad.), chorus, inst ens, 1983; cants., choruses

Vocal: Nemetskaya tetrad' [Ger. Exercise-Bk] (H. Heine), B, pf, 3 bks, (1963–76); Russkaya tetrad' [Russ. Exercise-Bk] (trad.), Mez, pf (1965); Vecherok [Evening], S, Mez, pf: Al'bomchik [Little Album] (Gavrilin, Shul'gina, trad.), Tantsï, pis'ma, okonchaniye [Dances, Letters, Conclusion] (A. Akhmatova, I. Bunin, Gavrilin, S. Nadson, Shul'gina), 1973–5; other song cycles

ALEKSANDR SERGEYEVICH BELONENKO

Gavrilov, Andrey (*b* Moscow, 21 Sept 1955). Russian pianist. His early studies with his mother, a great believer in 'emotional richness' were countered by later work with Tat'yana Kestner (a student of Goldenweiser), whom he described as 'very German'. He completed his studies with Lev Naumov who, he claims, curbed his 'ungovernable temperament'. His international career was launched when he won the 1974 Tchaikovsky Competition, and memorable débuts followed in Salzburg, France, Finland,

and, in 1976, the USA and England, where his performances of Prokofiev's First Concerto and Ravel's Concerto for the left hand at the Royal Festival Hall caused a sensation. Appearances with the Berlin PO were followed in 1979 by a tour of Japan. In the same year his career was effectively terminated when, on returning to the USSR, he was accused of anti-Soviet bias and of open criticism of the musical-political establishment. It was not until 1984, after severe privation, that Gavrilov was able to resume his international appearances. However, these were increasingly dogged by controversy. References to undue aggression and an overbearing keyboard manner became frequent, although his recordings of the complete Bach concertos, the Goldberg Variations and the French suites can be as reflective as they are virtuosic. His formidable brio and articulacy in works such as Balakirev's *Islamey*, the complete Chopin études, Ravel's *Gaspard de la nuit* and Rachmaninoff's Third Concerto have justifiably won him many awards. Gavrilov's finest performances are both intensely personal and of true Russian Romantic vintage.

BRYCE MORRISON

Gawriloff, (Siegfried Jordan) Saschko (*b* Leipzig, 20 Oct 1929). German violinist of Bulgarian origin. He studied until 1937 with his father, a violinist in the Gewandhaus Orchestra, then at the Leipzig Conservatory (1942–4) and in Berlin (1945–7). He was leader of the Dresden PO (1947–8), the Berlin PO (1948–9), the Berlin Radio SO (1949–53), the Museum and Opera Orchestra in Frankfurt (1953–7) and the Hamburg Radio SO (1961–6). He taught at the Nuremberg Conservatory (1957–61) and was a professor at the North-west German Music Academy in Detmold (1966–9) and at the Folkwanghochschule in Essen (1969–82); in 1963 he established a violin class at the Darmstadt summer courses. In 1982 he succeeded Max Rostal at the Hochschule für Musik in Cologne. He won the international competitions at Berlin and Munich in 1953 and the Genoa Paganini Competition in 1959, when he was awarded the city of Nuremberg prize.

Gawriloff has toured Europe, the USA, East Asia and Africa. A player of clear tone and clean lines, he is an eloquent interpreter and has made many recordings and broadcasts. He gave the first performance of Maderna's *Widmung* for solo violin (1971, Darmstadt), Hans Jürgen Bose's Sonata for solo violin (1976) and works by Frank Michael Boyer, Werner Heider, Dieter Kaufman, Ligeti, Wolfgang Rihm, Schnittke and Isang Yun, among others. He plays with Aloys Kontarsky and Siegfried Palm and in 1970 formed a trio with Alfons Kontarsky and Klaus Storck. He has also performed and recorded sonatas with Arnulf von Arnim.

RUDOLF LÜCK/TULLY POTTER

Gawroński [Rola-Gawroński], **Wojciech** (*b* Sejmany, Troitsk district, 28 March 1868; *d* Kowanówko, nr Poznań, 5 Aug 1910). Polish pianist, composer and conductor. His dates of birth and death have been given incorrectly in other sources. At the Warsaw Music Institute he studied the piano with Strobl, theory with Roguski and composition with Noskowski. He left in 1891, but also studied composition privately in Warsaw with Minchejmer, later in Berlin with Moszkowski. For a short time he gave music lessons in Kaunas and for several months played in the orchestra at Vilnius Cathedral. After his wife's death he went to Vienna, where he became acquainted with the Leschetizky method of teaching; it is possible that he also studied orchestration with Brahms. As a pianist he gave concerts in various towns in Poland and Russia, being particularly admired for his interpretations of Chopin and Bach. From 1895 to 1902 he was director of the music school in Orel. He taught in Warsaw from 1902, and also became professor of the music school in Łódź. He provided illustrations to Przybyszewski's lectures *Chopin i naród* ('Chopin and the nation') at the Philharmonia in Warsaw.

Gawroński's music is very varied both in nature and in quality. It comprises works for piano and violin, chamber music, choral and orchestral works, operas and songs. A number of his works were published by Gebethner and Wolff in Warsaw, a few by Röder of Leipzig. The music is eclectic, but his successful career included the award of prizes at composers' competitions in Leipzig (first prize for the String Quartet in F major op.16, 1898), Moscow (String Quartet in F minor op.17, 1903), as well as the K. Wołodkowicz competition (the opera *Maria*) and others; these prizes brought him wide renown. His songs, piano pieces and string quartets were often performed. Now they are of historical importance only.

WORKS

Ops: Samuel Zborowski, *c*1896; Maria, 1899, Warsaw, 1911 or 1913–14, orch pts. *PL-Wtm*; Pojata, *c*1900

ZOFIA CHECHLIŃSKA

Gay. *See* GAI.

Gay, Jesús Bal y. *See* BAL Y GAY, JESÚS.

Gay, John (*b* Barnstaple, *c*30 June 1685, bap. 16 Sept 1685; *d* London, 4 Dec 1732). English playwright and poet. As a member of the Scriblerus Club he was a close friend, collaborator and long-time correspondent of Alexander Pope and Jonathan Swift. His importance to the history of opera lies in his invention of the ballad opera, a form that took the London theatre by storm and permanently affected its artistic development. *The Beggar's Opera* had its première at Lincoln's Inn Fields on 29 January 1728 and was performed 62 times during the season – a figure without precedent in the history of the London theatre. Evidence of its success is the appearance of a pirate production at the Little Theatre, Haymarket, as early as June 1728, something that had never happened before in London. The extraordinary success of Gay's opera proved the existence of a large, almost untapped theatre public in London and triggered a boom in new theatres and experimental drama in the following decade.

The Beggar's Opera has often been taken as a harsh attack on both Italian opera and Sir Robert Walpole, but neither seems to be true. Gay had provided the libretto for Handel's *Acis and Galatea* (1718) and, while he mocks the Faustina–Cuzzoni rivalry in Polly and Lucy, he does so without real animus. The Royal Academy of Music was in financial trouble of its own making, and there is no evidence that the success of *The Beggar's Opera* played any significant part in its collapse. The satire on Walpole in Macheath and Peachum is more clever than devastating. Gay's sequel, *Polly*, is by far the more damaging attack on Walpole. It was suppressed before the planned performances in December 1728. In *Polly* he turned Macheath into a West Indian pirate, and the work concludes with his richly deserved execution. *Polly* is rather lifeless, and Gay probably benefited from its suppression. He rushed a huge edition into print (10,500 copies) and reaped a handsome profit. It was eventually performed in 1779. Modern critics have been inclined to see the suppression of *Polly* as vengeance for *The Beggar's Opera*. Gay responded wittily in *The Rehearsal at Goatham* (unperformed), a farce about an innocent puppet show misinterpreted as personal satire by an audience of country bumpkins.

Gay's last venture into ballad opera, *Achilles* (Covent Garden, 10 February 1733), was a posthumous success but has found few subsequent admirers. Achilles in petticoats has possibilities, but the piece is short on action and only intermittently funny. Gay must be viewed as a clever, minor writer with one stupendous and virtually inexplicable success to his credit. How he got the idea for *The Beggar's Opera* no-one has ever been able satisfactorily to explain: it is one of the most genuinely original works in the history of the theatre, and it is still revived regularly with great success.

ROBERT D. HUME

Gay [née Pichot Gironés], **María** (*b* Barcelona, 13 June 1879; *d* New York, 29 July 1943). Spanish mezzo-soprano. She studied with Juan Gay Planella, her first husband, and then in Paris with Ada Adini. She sang in concerts at Brussels, and soon afterwards (in 1902) appeared there at the Théâtre de la Monnaie as Carmen. Until the late 1920s she performed at the world's leading opera houses, including Madrid, Covent Garden, La Scala, the Metropolitan and Chicago, where she sang regularly between 1910 and 1927. She was a mainstay of the Boston Opera Company and its short-lived successor (1909–14, 1915–17), singing such roles as Delilah, Amneris and Santuzza. With her second husband, the tenor Giovanni Zenatello, she featured prominently in the first open-air seasons in the Verona Arena (from 1913) and, after her retirement, directed a school of singing in New York. If her merits as a singer were debatable (though her middle and lower registers were rich and resonant) she owed her fame above all to her realistic Carmen, a portrait inspired by the atmosphere of the notorious Gypsy quarter in Seville.

RODOLFO CELLETTI/VALERIA PREGLIASCO GUALERZI

Gay, Noel [Armitage, Reginald Moxon] (*b* Wakefield, 15 July 1898; *d* London, 4 March 1954). English composer, lyricist and publisher. He became the honorary deputy organist at Wakefield Cathedral at the age of 12, then won a scholarship to the RCM at 15, studying with Sir Frederick Bridge and Sir Walter Parrott. After brief service in World War I he took a degree in music at Christ's College, Cambridge; while there he began to compose popular songs, and subsequently Charlot commissioned him to write for his 1926 revue. Having adopted his now familiar pseudonym, Gay became a leading writer of popular songs, several of which became closely identified with leading British performers. These included *I took my harp to a party* (Gracie Fields), *There's something about a soldier* (Cicely Courtneidge), *Run, rabbit, run* (Bud Flanagan) and *All over the place* (Tommy Trinder). Many of his songs were interpolated into films and became dance-band favourites. Alongside his collaborations with other lyricists, most notably with Frank Eyton in the 1940s, his own lyrics include *Leaning on a Lamp-Post*, made popular by George Formby. He sometimes adopted the pseudonym Stanley Hill for his more sentimental writing.

Gay's most successful work and a perennial of the repertory remains the musical comedy *Me and My Girl*, first given in London in 1937. The show includes possibly the most famous of his songs, 'The Lambeth Walk', which is typical of Gay in its short-phrased melody, rhythmic repetition and simple harmony, and whose stylistic immediacy is to be found in all of his best work, such as *The sun has got his hat on* and *Let the people sing*. *Me and My Girl* was revived with a new book and additional interpolated songs in 1984 under the auspices of Gay's publishing firm (founded in 1938), by then an international entertainment agency headed by his son Richard Armitage (1928–86). It also played on Broadway for some 1500 performances from 1986. A further show, *Radio Times*, was staged in 1992, one of many compilations drawing upon Gay's catalogue.

WORKS
(*selective list*)

Musical comedies: Hold my Hand, 1931; That's a Pretty Thing, 1933, rev. as La-Di-Da-Di-Da, 1943; Jack o'Diamonds, 1935, rev. as Susie, 1942; Love Laughs–!, 1935; Me and My Girl, 1937 [incl. The Lambeth Walk; film, 1939 as The Lambeth Walk]; Wild Oats, 1938; Present Arms, 1940; The Love Racket, 1943; Meet Me Victoria, 1944; Ring Time, 1944; Sweetheart Mine, 1946; Bob's Your Uncle, 1948

Contribs. to revues, incl. The Charlot Show of 1926, 1926; Clowns in Clover, 1927; Folly to be Wise, 1931 [incl. The King's Horses]; Stop Press, 1935; Lights Up, 1940 [incl. Let the people sing, Only

a Glass of Champagne, You've done something to my heart]; Gangway, 1942
Individual songs, incl. The sun has got his hat on, 1932; Round the Marble Arch, 1932; I took my harp to a party, 1933; Leaning on a Lamp-Post, 1937; Love makes the world go round, 1938; [as Stanley Hill] I'll pray for you, 1939; The moon remembered but you forgot, 1939; Run, rabbit, run, 1939; Hey, Little Hen, 1941; My Thanks to You, 1950
Songs for films, incl. Tondeleyo (White Cargo, 1929); There's something about a soldier (Soldiers of the King, 1933); Who's been polishing the sun? (The Camels are Coming, 1934); The fleet's in port again (Okay for Sound, 1937); All Over the Place (Sailors Three, 1940)

JOHN SNELSON

Gay and lesbian music. This article considers the record, in both historical documentation and biographical reclamation, of the struggles and sensibilities of homosexual people of the West that came out in their music, and of the contribution of homosexual men and women to the music profession. In broader terms, it is further concerned with the special perspectives from which Western music of all kinds can be heard and examined.

1. Homosexuality and musicality. 2. The gay and lesbian movement. 3. Musical theatre, jazz and popular music. 4. AIDS and HIV. 5. The 1990s. 6. Divas and disco. 7. Anthropology and history.

1. HOMOSEXUALITY AND MUSICALITY. To think about sexual categories as arbitrary, or contingent on historical or social practice, is still difficult because sexuality, like musicality, has been so thoroughly naturalized during the 20th century and intimately embedded in an individual sense of self (Jagose, 1996, pp.17–18). But, while maintaining the importance for modern society of the categories of heterosexuality and homosexuality and the process of acculturation that surrounds them, thinking historically about that sense of self has, paradoxically, become the basis of much gay and lesbian critical work. It also underwrites 'queer theory', the intellectual phenomenon based on the recuperation of the pejorative term 'queer' and the inflecting of gay and lesbian knowledge with postmodern knowledge and ways of thinking. Arguing along lines proposed by Foucault, Halperin (1990, pp.24–5) pinpoints the historical difficulty: 'Homosexuality presupposes sexuality, and sexuality itself . . . is a modern invention' which 'represents the *appropriation* of the human body and of its erogenous zones by an ideological discourse'. Before the beginning of the 19th century deviant sexual acts such as sodomy were not particularized according to gender or even species, and some ancient modes of same-sex desire, such as Sapphism and pederasty, can be traced through Western culture. By the end of the century, however, the dominant model of heterosexuality was posited upon its binary opposition to an actual (but still incoherent) homosexual identity. A similar process of identity formation can be seen in music, where 'musicality' replaced the earlier and vaguer 'musicalness' as an inherent quality attributed to 'nature' but actually constructed in musical institutions of various kinds, particularly educational ones involved in the development of musical talent (see Kingsbury, 1988).

The connection between musicality and homosexuality, and a strong supposition that the music profession was made up largely of homosexuals, entered public discourse as an indirect result of sexology, the scientific work fundamental to the modern understanding of sexuality, beginning with K.F. Ulrich's pioneering work on Uranism in the 1860s and expanded by Richard von Krafft-Ebing, Magnus Hirschfeld, Albert Moll and other German authorities. English studies around the turn of the century advocating a liberal attitude towards the 'invert' or 'Urning' frequently refer to the German sources. 'As to music . . . this is certainly the art which in its subtlety and tenderness – and perhaps in a certain inclination to *indulge* in emotion – lies nearest to the Urning nature. There are few in fact of this nature who have not some gift in the direction of music' (Carpenter, 1908, p.111). Havelock Ellis addressed the topic even more arrestingly ('it has been extravagantly said that all musicians are inverts') and quoted Oppenheim to the effect that 'the musical disposition is marked by a great emotional instability, and this instability is a disposition to nervousness', concluding that 'the musician has not been rendered nervous by his music, but he owes his nervousness (as also, it may be added, his disposition to homosexuality) to the same disposition to which he owes his musical aptitude' (1915, p.295).

Such beliefs, when juxtaposed with the public scandals in many European countries (most importantly the trials and imprisonment of Oscar Wilde in 1895) created a climate in which neither the presence of homosexuals in music nor their contributions to it could be acknowledged, and in which the experience of social oppression that informs gay and lesbian lives could not be connected to musicality. Discussion of forbidden and illegal sexuality and music was impossible. The art of music, the music profession and musicology in the 20th century were all affected by attitudes to homosexuality that have played a part in forming the widespread belief that music transcends ordinary life and is autonomous of social effects or expression. These attitudes have also contributed to the resistance to critical inquiry into the politics, especially the sexual politics, of music and into issues related to sexual diversity such as gender, class, ethnicity and race, religious belief and power.

Conversely, the non-specificity of musical language and the doctrine of its autonomy from social issues led to a special situation in which music plays an important part as both safety valve and regulator in the mechanism of the 'closet', which is not only a symbol of the hidden nature of many gay and lesbian lives but is arguably the most important attribute of 20th-century homosexuality. In the words of the gay author Wayne Koestenbaum, 'Historically, music has been defined as mystery and miasma, as implicitness rather than explicitness, and so we have hid inside music: in music we can come out without coming out, we can reveal without saying a word' (1993, pp.189–90). The privilege of freely expressing desire and other feelings in music, a lifeline to those whose basic emotions are invalidated, appears also to have led to an unspoken agreement to preserve the *status quo*. Although heavily populated by gays and lesbians, the various branches of music have been slow to exhibit any overt opposition to the heteronormative order of things (Brett, in *Queering the Pitch*, 1994, pp.16–18).

Most homosexuals internalized their oppression. According to Weeks (1981, p.105), Wilde complained that he had been led astray by 'erotomania' and extravagant

sexual appetite; the Irish patriot Roger Casement thought his homosexuality a terrible disease that ought to be cured; and the liberal humanist Goldsworthy Lowes Dickinson saw it as a misfortune ('I am like a man crippled'). Many homosexual musicians combined such internalization of oppression with some manner of protest. The various mechanisms thus employed are sometimes difficult to decipher and musicology has as yet little experience with their cryptography, but they are arguably always there. Ravel's 'conspicuous sublimation' (Kramer, 1995, p.203); Strayhorn's self-effacement; Smyth's guarded codes in her operas and memoirs yet exultant lesbian erotic in her suffrage music (Wood, in Solie, *Musicology and Difference*, 1993, and 1995); the social radicalism of Blitzstein and Tippett; the eccentricity of Vladimir Horowitz; and Ned Rorem's separation of his two roles as gay man and composer; Britten's pacifism and homoerotic discourse under cover of the musical treatment of canonic literature; Poulenc's musical camp juxtaposed with religiosity; the insider allusions in the songs of Cole Porter and Noël Coward; Landowska's fixing on the antediluvian harpsichord as the vehicle for her virtuosity; Henze's flight from serialism, and from Germany; Ferrier's (and many other singers') cultivation of a 'sapphonic' voice (Wood, in Brett, *Queering the Pitch*, 1994); the audacity and despair of blues singers such as Ma Rainey, Bessie Smith and Billie Holiday; Dent's debunking of Beethoven and other received notions; Szymanowski's involvement with the Dionysian (and his two-volume homoerotic novel, *Ephebos*); Copland's early embrace of eroticism (figured through orientalism or 'blackness') and subsequent eradication of corporeal or erotic elements in favour of a 'pure and absolute' style achieved by means of what has been called a 'compositional scorched-earth campaign' (Metzer, 1997); Virgil Thomson's collaboration with Gertrude Stein and the subversiveness of his criticism; Partch's 'hobo' voices; the falsetto-enhanced 'lonesome-cowboy' vocal disguise of Elton John, or his representation in music at the funeral of Princess Diana, the royal outcast; Cage's dual embrace of both noise and silence within music; Harrison's gamelan and championing of Esperanto; Oliveros's cultivation of communal 'deep listening', and her attachment to the accordion; Bernstein's exaggerated showmanship; even the aggressively blank faces of the Pet Shop Boys: all these, or yet other aspects of the art and self-presentation of these men and women, might be read as signs of both an accommodation to as well as subversion of the pervasive fact of the closet.

It will be objected that in many cases a 'straight' equivalent may be found. But a list of this kind, which could easily be expanded, shows not only how very considerable the homosexual presence has been in 20th-century Western music but also prompts questions as to how and why, in the post-Freudian age, a basic element of subjectivity could have been so little examined in relation to music, or why that relation should have been so obsessively denied. The fact that homosexual people represent different, sometimes opposing, stylistic and ideological positions, no matter what part of the music business they are involved in, argues against a unified 'homosexual sensibility' in music, any simple relation between sexual identity and musical expression. It does not support the view that there is no connection between the two.

Enabling the weird dissociation of homosexuality and music, in spite of their being so patently intertwined for an entire century, is the mechanism described as the 'open secret'; its function 'is not to conceal knowledge, so much as to conceal the knowledge of the knowledge' (Miller, 1988, p.206), and its effect is to strengthen the binary oppositions (public/private, inside/outside, hetero/homosexuality) and to consign homosexuality to the private sphere, always on the verge of visibility and therefore always under surveillance as an unthinkable alternative. To the extent that music, as a performance art, must occupy the public sphere, with (as it were) all its secrets on display, then what Miller calls a 'fantasmatic recovery' of enormous proportions has to be mounted to keep those secrets from making any difference. To what degree resistance can be effective in such a situation is a matter of considerable debate in queer theory. Some incline to what has been termed the entrapment model (Sinfield, 1994, pp.21–7: derived from Althusser and various interpretations of Foucault), in which subversion merely contributes to containment or to a general postmodernist notion of the subject as completely determined by ideology and therefore without agency. Theories developed from Gramsci, Raymond Williams and Žižek, on the other hand, offer more possibilities of effective resistance by refusing to accept a totalizing system and by recognizing that any 'dominant ideology' is itself constantly undergoing diverse internal disturbances which dissidence may turn to its advantage in particular historical situations. 'Coming out' has been the most undeniably effective political action in recent years. Earlier times demanded different tactics. One of the most effective of these, retaining a certain power to the present, is 'camp', a disruptive style of humour that defies canons of taste and by its very nature evades any stable definition. Other solutions existed for those who refused this self-marking performative style. Britten, for instance, was arguably better advised in exploiting the open secret and capitalizing on his success to ensure wide circulation of the powerful critiques of the family, heterosexual relations, organized religion, patriarchal authority and militarism contained in his works.

Gender adds layers of complexity to the social situation of homosexuals in almost all musical contexts (as do race and ethnicity and class). The male homosexual has been in a particularly ambiguous position in most Western contexts because, especially if white, he had the option of exerting male privilege and power, providing he was not publicly exposed. Some who adopted that expedient behaved in particularly oppressive or offensive ways towards others, for they often overcompensated in elaborating their disguise. Lesbians, on the other hand, were treated as a minority not only because of their sexuality but also, in most musical contexts, because of a hierarchical gender system that pressed all women into certain roles (diva, harpist, pianist), castigated them for transgressing them and put severe obstacles in their path towards others (composer, conductor, saxophone player, impresario).

This system (by no means extinct) was exacerbated to an unusual degree in the concert hall context by the emphasis in the Romantic era on the enduring artwork of 'absolute music' and therefore on its creator, who became arguably more powerful, in spite of the reaction against Romanticism, as a result of high modernism's war on the

non-subservient virtuoso performer (*see* WOMEN AND MUSIC and FEMINISM). Male and female homosexuals, therefore, have had very different experiences in various music worlds, but the basis for their common interest is the codification and regulation of gender roles with appropriate sexual positions and identities. The assignment of the male homosexual to a feminine position is mirrored, though not exactly, by the mockery aimed at a challenging or creative lesbian whose work is constantly labelled 'virile', 'manly' and 'unnatural', or 'deficient in the feminine charm that might have been expected of a woman composer', as demonstrated in turn-of-the-century critical responses to the music of Ethel Smyth and Rosalind Ellicott (Kertesz, 1995; Fuller, 1994). That similar criticism was directed at that icon of womanly respectability, Mrs H.H.A. Beach, when she wrote a powerful mass or symphony (the composer George Chadwick called her 'one of the boys'), indicates the link and overlap between gynophobia and homophobia, as in the 'masculine protest' of Charles Ives (Solomon, 1987; Tick, in Solie, *Musicology and Difference*, 1993; Kramer, 1995, pp.183–8).

Threatened masculinity tends to see all musicians and their activities as feminine and to value (or devalue) them accordingly. Since people in music all share to some extent the taint of the effeminate or feminized, powerful institutional forces had to be mobilized to counteract that image, especially with the large-scale entry of music into the universities after World War II. The widespread adoption of a neo-serialist technique, the development of arcane forms of music analysis, the separation of a high art from any form of popular cultural expression and the equation of musical scholarship with scientific inquiry are all signs of a dominant masculinist, highly rational, heteronormative discourse in music all too unhappily but accurately characterized by the word 'discipline'.

2. THE GAY AND LESBIAN MOVEMENT. In the wake of the 1950s civil rights movement, which began to change the status of African-Americans in the USA, various New Left counter-discourses arose, including a reinvigorated feminist movement for women's rights. A militant gay and lesbian movement, fomenting in the USA after World War II, was catalysed by the Stonewall riot of 1969, when patrons of a New York gay bar, mostly working-class men and drag queens, fought a pitched battle with police on a routine raid. The movement borrowed from the struggle of oppressed racial minorities, devised its own tactics and linked its theory to both the sexual freedom movement and to the new oppression theories of feminism. Consensus grew among the various counter-discourses that unless a sexual revolution was incorporated into a political revolution there could be no real transformation of society and social relations. Alliances led in some contexts not only to the inclusion of lesbian, gay, bisexual, transgender and transsexual concerns under one umbrella but also, somewhat later, to the involvement of the sexual minorities with the politics of race and class.

The subsequent global spread of the movement was complemented by initiatives in humanistic scholarship, consisting (as with feminism) of both a historical branch designed to uncover those 'hidden from history' and a theoretical branch concerned with the pertinent questions of sexual identity and subjectivity and their relation to capitalist society, although the two often overlapped. This scholarly initiative has given rise to a situation in which modern sexuality is both 'the most meaning intensive of human activities' (Sedgwick, in Stanton, 1992, pp.1–46) and 'a sign, symbol, or reflection of nearly everything in our culture' (Gould, ibid.) as well as 'the name that can be given to a historical construct' (Foucault) of social and sexual relations whose contents and meanings are in constant change and flux.

From the start, homosexual identity was seen as contingent: 'our homosexuality is a crucial part of our identity, not because of anything intrinsic about it but because social oppression made it so' (Altman, 1971, p.230; 1993, p.240). Questions about identity persisted, however, for a variety of reasons: identity categories were perceived by many as instruments of the homophobic and heterosexist order they sought to oppose; they tended to efface 'hyphenations' in identities as white domination of the movement came under fire; and they were thrown into disorder by the onset of the decentred, split subject of postmodern thought.

Accordingly, emphasis moved from identity towards representation. Some sense of this can be gained from Morrissey's self-presentation as 'a prophet for the fourth gender', punning on 19th-century sexology's 'third gender' while refusing to be determined by it (Hubbs, 1996). In an attempt to establish self-determination in the feminist subject, it was suggested that the role playing of working-class lesbian bar culture could be rehabilitated as a 'combo butch-femme subject' that seduces the sign system with artifice and camp rather than internalizing the torments of dominant ideology (Case, in Abelove and others, 1993, pp.294–306; for a musical application, see Peraino, 1992). Music, especially popular music, often seems to respond in its playful, coy or disruptive tactics around the vocal as well as the visual representation of sex and gender (consider Madonna, Prince or Boy George) to Judith Butler's notion of these supposedly natural characteristics as 'performative' utterances (i.e. like speech-acts) to which subjects submit in a constrained repetition as part of entry into language and society. Butler proposes the notable inversion in which 'if a regime of sexuality mandates a compulsory performance of sex, then it may be only through that performance that the binary system of gender and the binary system of sex come to have intelligibility at all', (ibid., 307–20; for a musical explication, see Cusick, in Barkin and Hamessley, *Audible Traces*, 1998).

It might have been expected that the academic investigation of gay and lesbian musics, the critique of heteronormative assumptions in such areas as music theory and an exploration of music and subjectivity, would also have begun in the 1970s. But the hermetic nature of postwar musicological discourse, and the policing of music that led many to acquiesce in the *status quo*, hindered the process. This policing, sometimes overt, as in the imprisonment of Henry Cowell (Hicks, 1991), but more often silent and insidious, also hindered feminist inquiry in musicology and the acceptance of women composers into the concert hall repertory and in opera.

Avenues for protest did of course exist or could be created, as left-wing radicals demonstrated through a revivified folksong movement in the 1960s. During the 1970s gay and lesbian musicians began to find the means to give their sexuality musical expression in various interesting ways, often by a radical reinterpretation of an existing musical genre or institution. Concert music and

its scholarship were virtually impermeable at this stage because of the venues, conventions and institutions governing its performance and the aseptic ideological pressure of high modernism. Even opera, with its enormous gay and lesbian following (and open invitation to ridicule), was less susceptible than ballet to queer subversion: La Gran Scena Opera Company (founded in 1981) never became as successful as its older sister, the virtuoso drag ballet company Les Ballets Trockaderos de Monte Carlo (founded in 1974). On the other hand, the entire opera world (and to some extent that of musical comedy and other music-theatre genres) had long been a stage on which gays and lesbians could perform, or see performed, their presence and humanity. Impresarios, managers, producers, critics, librettists and composers contributed to this atmosphere along with singers, characters and roles. 'Where else can you see two women making love in a public place?' (Reynolds, in Blackmer and Smith, *En Travesti*, 1995, p.133). Such coupling runs the gamut, moreover, from the 'principal boy' of lower-class British pantomime, with her fish-net stockings and full-hipped swagger, to the aristocratic Oktavian playing butch to the Marschallin's femme in a fin-de-siècle Viennese bedroom, which has sometimes been seen as a symbolic performance of lesbian desire (Mary Garden refused to 'out' herself by creating the role); and the potential for such interpretation grew when modern performing practice, putting original tessitura before gender sensibility, assigned full-throated mezzos and sopranos to castrato roles. Historical female couplings without cross-dressing, too, can take on fresh significance as a result of being exposed to a marginal perspective, like Dido and the Sorceress in Judith Peraino's account of Purcell's opera (in Blackmer and Smith, *En Travesti*, 1995, pp.99–131). Closet dramas or parables abound: Szymanowski's *King Roger*, Henze's *The Bassarids*, Britten's *Albert Herring*, *Owen Wingrave* and *Death in Venice*; Britten's *Peter Grimes* is a powerful allegory of homosexual oppression (Brett, 1977, 1983) along lines suggested already by operas, such as Janáček's *Káťa Kabanová* and (more especially) Shostakovich's *Lady Macbeth of the Mtsensk District*, that explore the oppression of women. 'Real' gay or lesbian characters are harder to find. Mel and Dov, the inter-racial couple in Tippett's *The Knot Garden* (1970), appear to be opera's first 'out' gay males; predictably, they break up, one of them returning to heterosexual lifestyle. Countess Geschwitz, the one heroic and truly loving character of Berg's *Lulu*, stands as a shining example of musico-dramaturgy that manages to transcend essentialism and stereotyping (see Morris, in Blackmer and Smith, *En Travesti*, 1995).

A remarkable phenomenon of the period immediately after the Stonewall incident was the emergence of lesbian-feminist or 'women-identified' singer-songwriters, bands, choruses, record labels and production companies (Olivia and Redwood were both founded in 1973). Venues such as women's coffee-houses and women-only music festivals were also established, with largely lesbian audiences. Rarely broadcast, 'women's music' was a grass-roots movement from its beginnings in Maxine Feldman's *Angry Atthis* and Madeline Davis's *Stonewall Nation* (both 45 rpm singles, 1971) and Alix Dobkin's album *Lavender Jane Loves Women* (1973) through its growth and achievement in the work of such artists as Holly Near, Meg Christian and Cris Williamson, whose first album, *The Changer and the Changed* (1975), has been described as 'the best-selling independent album of all time' (Post, *All Music Guide*, 1994, p.1039). With an emphasis on acoustic instruments, the music is grounded in folksong styles, sometimes inflected with blues, rock, jazz, reggae and even classical music. Openly addressing lesbian desire and relationships as well as the feminist critique of patriarchy, misogyny and homophobia, it became important as an arena in which lesbian community could be forged in the USA.

Another phenomenon was the inception of gay and lesbian bands and choruses. Among the earliest was New York's Victoria Woodhull All-Women's Marching Band (1973), named after a 19th-century feminist and presidential candidate (and not exclusively lesbian, although its theme song was 'The dykes go marching in'), and Catherine Roma's Anna Crusis Women's Choir in Philadelphia (1975), a leading organization in the performance of new music by women. The Gotham Male Chorus, founded in 1977, later incorporated women to become the Stonewall Chorale, the first gay and lesbian chorus. In 1978 Jon Sims founded the San Francisco Gay Freedom Day Marching Band and Twirling Corps, which became a noted focus for the political aspirations of the large gay and lesbian community in that city; a Gay Men's Chorus soon followed.

While several of these initiatives began as different expressions of communal pride, they have burgeoned into cultural institutions and lasting, full-scale artistic movements across the world. The choruses in particular have thrived, founding their own international organization, Gay and Lesbian Association of Choruses, at the Gay Games in San Francisco in 1982, and now greatly outnumbering the bands, who also founded a national association, Lesbian and Gay Bands of America, in 1982. In particular, they have contributed to the queer critique of musical institutions and authorized culture by mixing traditional, popular and highbrow musics of all kinds within single concerts; and, by means of a substantial commissioning programme supported by frequent performances and festivals and faithful audiences, have stimulated creativity among gay and lesbian composers and given support to other significant contemporary music seen as sympathetic to the movement. A Society of Gay and Lesbian Composers was founded in San Francisco in the 1980s in response to this and other stimuli.

3. Musical theatre, jazz and popular music. The musical theatre has been a special place for gay identification and expression, arguably exceeding even opera in this regard. Not only have gay men traditionally had great affinity for it, but they have shared in its production at every level. Among them are leaders in the field such as Cole Porter, Ivor Novello, Lorenz Hart, Noël Coward, Arthur Laurents, Leonard Bernstein and Stephen Sondheim. If the dream of every sensitive gay young man was to take Broadway or the West End by storm, the actual thematics of musical theatre were as heterosexist as those of any other representational form of the pre-Stonewall era. Nevertheless, ways were found to introduce coded or not-so-coded messages (like 'You're a queer one, Julie Jordan' in *Carousel*, 1945) for a knowing homosexual audience while staying within conventional narrative boundaries. These might include title (Novello's final work, *Gay's the Word*, 1950), lyrics such as Coward's 'Mad about the boy' (from *Words and Music*, 1933),

with its coded references to A.E. Housman and Greta Garbo, or Porter's *Farming* (Bronski, 1984, p.113), characters and plot, such as the 'tomboy' Maria in *The Sound of Music* (Wolf, 1996), and performers such as Mary Martin as a cross-dressed lesbian in the role of Peter Pan (Wolf, 1997). There has also been a long tradition of appropriation of the material from musicals in every conceivable gay context. With the 1970s articulation of gay and lesbian identity, musicals with gay themes or characters arrived, many of them becoming mainstream commercial successes. If *Cabaret* (Masteroff/Kander/Ebb, 1966) both spectacularized and masked homosexuality, and *Applause* (Comden/Green/Strauss/Adams, 1970) presented it as pathology, Michael Bennett's *A Chorus Line* (Hamlisch/Kirkwood/Dante/Kleban, 1975) sentimentalized it in a characteristically liberal way. *La cage aux folles* (Fierstein/Herman, 1983), affectionately portrays a gay couple, one of whom is a drag queen, and *Kiss of the Spider Woman* (McNally/Kander/Ebb, 1992) adapted Manuel Puig's powerful novel about the growing attachment between two prisoners, one homosexual and the other heterosexual. The musical theatre has even dealt with the HIV/AIDS crisis, most notably in *Falsettoland* (1990), the final part of William Finn's trilogy, and also in Jonathan Larson's *Rent* (1996), based on Puccini's *La bohème*.

Jazz's more limited relation to homosexuality can be delineated through two careers. Billy (Dorothy) Lee Tipton, the jazz pianist, performed gender as undetected drag, but her impeccable improvisations, gift for mimicry, same-sex 'marriages' and adopted sons may have had more to do with success in a male-dominated music and its venues than in a dildo and tuxedo, and serve to show that difference is in the eye of the beholder (Middlebrook, 1998). Billy Strayhorn, composer of one of the most famous titles in the history of jazz, 'Take the A train', and a good deal else many people associate with his mentor, Duke Ellington, seems willingly to have accepted virtual anonymity and the hiding of his abundant talent behind Ellington's benign and affectionate protection in order to be openly gay (Hajdu, 1996, pp.79–80). Queer lore sees jazz itself (like heavy metal) and its audience as fundamentally heterosexual, but John Gill (1995) explores this half-truth and critiques attitudes towards gay or bisexual jazz musicians, such as Sun Ra, Cecil Taylor and Gary Burton, in a manner that has opened up the topic.

The long tradition of male and female impersonators, who always sang as part of their act, unlike the lip-synching drag artists of the technological age, is closely linked with queer presence and representation in popular culture. The famous openly lesbian male impersonator, Gladys Bentley, who attracted the rich and famous to her act in Harlem and introduced scat-singing and lewd extemporary parodies of popular songs as well as explicit lesbian lyrics into her act, represents an extreme of the interwar years. At times her strong, fierce voice ascends into what sounds like a male falsetto, tapping what Emma Calvé called the 'fourth voice' to mark her 'third sex'. In the USA at least, drag and (to a lesser extent) male impersonation carried the stigma of gender liminality that also marked homosexuality, leading to bans in many places (e.g. Los Angeles) in the repressive 1930s. British drag, on the other hand, survived into the television age, usually through impersonators. Impersonation and popular music were not outside the force of the closet and the 'contract' to which highbrow musicians were obliged to subscribe. Even Julian Eltinge, perhaps the most celebrated female impersonator of the earlier part of the century (with a pleasing alto voice), went to great lengths to hide his homosexuality; indeed, many pop stars have shown extraordinary reluctance to disclose their sexual orientation.

On the other hand, Ma Rainey and Bessie Smith could record a number of overtly lesbian songs in the 1920s, and gay and lesbian performers could become popular in the New York Prohibition era 'pansy craze' (Chauncey, 1994). Later, rock and roll included homosexuality among its counter-culture effects, through flamboyant performers like Little Richard and songs like his 1956 hit *Tutti Frutti*, or even Elvis Presley's *Jailhouse Rock* (1957) with its reference to homoerotics behind bars. Later groups such as the Doors (Jim Morrison singing *I'm a Backdoor Man*, 1968) and the Rolling Stones (whose notorious *Cocksucker Blues*, 1970, Decca refused to release) maintained this tradition. 'Raga-rock', almost exclusively associated with George Harrison and the Beatles, was in fact initiated by the lead singer and principal songwriter of the Kinks, Ray Davies, with an Indian-influenced song, *See my Friends* (1965), about his own sexuality; it confirms the often-observed link between exoticism or orientalism and Western homosexual culture (Bellman, 1998). Further steps led to Lou Reed's *Walk on the Wild Side* (1972), with its tribute to Andy Warhol's New York clique, already been reflected in the work of the influential group Velvet Underground, Elton John's popular gay love song, *Daniel* (1972), to Rod Stewart's *The Killing of Georgie* (1976), the first top-40 hit unambiguously about gay people, and to Tom Robinson's celebratory *Glad to be Gay* (1977). The era also saw a number of independent (even rebellious) women singers. Janis Joplin, whose major relationships were with women, and who seemed as unashamed of this as of the rest of her colourful life, possessed an intensity that might have founded an entire movement but for her premature death in 1970. Dusty Springfield, the spirited British soul singer who was a lesbian icon, survived a career slump in the 1970s and cemented her gay following by later recording with The Pet Shop Boys.

In the 1980s the mainstream music industry seemed to respond to the increasing conservatism of Britain and the USA with further closeting of artists and their music. David Bowie, for instance, and others who responded to the swinging-both-ways 1970s, would no longer advertise their sexual ambivalence or pretend to be gay, and gay performers in the mainstream were usually guarded and their songs still coded. A number of British male groups composed largely of gays – Soft Cell, Frankie Goes to Hollywood, Erasure, The Pet Shop Boys – maintained a discreet front. Even gender-bending Boy George and Culture Club kept up evasive talk long after almost anyone had ceased speculating about them (Morrissey theorized this evasiveness). Jimmy Somerville and his group Bronski Beat were a notable exception, performing out songs in an out manner and reaching the charts at the same time. The openly gay duo Romanovsky and Phillips became widely known and developed beyond their San Francisco folk beginnings with *Trouble in Paradise* (1986). Surprisingly, the moody balladeer Johnny Mathis, long an idol for soulful gay youths, came out in 1982 without much fuss.

4. AIDS AND HIV. The growing crisis over AIDS and HIV infection (from about 1981) which, because initially it was at first associated with male homosexuals and intravenous drug users in Western societies, received little governmental attention, eventually spurred activism, particularly as the homosexual artistic communities, which were particularly hard hit by it, felt themselves to be further targeted by repressive governmental measures. The resulting wave of politicization of the arts produced in music a sense of community manifest in the numerous AIDS benefits and memorials of the late 1980s and early 90s: for example, the Live Aid event at Wembley Stadium, north-west London, and many tributes to the casualties in classical and popular music; the 1985 hit (*That's what friends are for*) by Dionne Warwick and Elton John; concerts among classical music organizations; and a string of commemorative works. These included John Corigliano's Symphony no.1 (1989) and a continuing, collectively produced AIDS Quilt Songbook (first performed at Alice Tully Hall, New York, in 1992) that alludes to the great quilt of the NAMES project (a collective, international work of art, numbering over 43,000 panels, to commemorate individually those who have died of AIDS). As much a work of protest as commemoration is Diamanda Galás's three-album project, begun in San Francisco in 1984 with the title *Masque of the Red Death* (after Edgar Allan Poe), eventually becoming the four-movement *Plague Mass* (as recorded in the Cathedral of St John the Divine, New York, in 1990).

A feature of the effect of AIDS and HIV in music was the re-use and reinterpretation of earlier music associated with gay consciousness. Two famous disco hits of the Village People, whose creator, Jacques Morali, died of AIDS in 1991, resurfaced allusively, *Go West* as an AIDS anthem by the Pet Shop Boys and *YMCA* in a lugubrious 'classical-music' version for cello, voice and guitar with clarinet obbligato in the film *Longtime Companion* (1990). This, the opening number in a 'Living with AIDS' concert near the end of the film, both mourns the recent dead (as well as the era of sexual freedom and its music) and encourages survival through gay humour and irony. The first CD of the Chrysalis 'Red Hot' series promoting AIDS awareness and benefiting research and relief consisted of covers of Cole Porter by various artists in a context that gave new and poignant meaning to such songs as 'I've got you under my skin': the record not only literally made 'gay music' of Porter's songs for the first time but also carried a warning to the listener against letting the music 'reinforce an overall sense of social abstraction'. Though gays and lesbians devised more radical forms of social protest during the same period, the adoption by liberal people in general of an issue strongly affecting the queer community marked a distinct change and support was particularly strong in music and other artistic fields.

5. THE 1990S. This second wave of political action coincided with changes within musicology and criticism brought about by the belated impact of post-structural interdisciplinary ways of thinking: this began a process of wresting 'absolute' music from the ideology of universal values, transcendence and autonomy; it also heralded a more inclusive, as well as more firmly located, critical practice that refused to leave the category 'music' unmarked in the traditional manner but embraced all musical phenomena and avoided meaningless comparisons between different genres and cultural practices. There soon emerged a group of gay and lesbian scholars and critics prepared to work on gay and lesbian topics and with a set of procedures, derived from feminist and post-structuralist critiques, with which to accomplish it, work characterized by the same refusal to obey traditional genre separations as had been characteristic of the earlier gay and lesbian musical organizations. In the USA, the founding in 1989 of the Gay and Lesbian Study Group of the American Musicological Society constituted a recognition of this phenomenon.

Among the effects was to throw into greater relief gay and lesbian composers of the post-World War II era. No lesbian in music before or since Ethel Smyth had been as publicly committed to feminist activisim or as candid about same-sex desire as Pauline Oliveros, who strongly represented her own lesbian feminism and community among the American avant garde from the 1960s onwards. The increasingly celebrated Lou Harrison had always been assertive of his gay identity. The death of John Cage in 1992 opened the way for long-delayed discussions of his partnership with Merce Cunningham and the radicalism that stopped short of declaring his sexuality. Important during the mid-90s was the self-identifying of 11 gay male composers on a CD, *Gay American Composers* (1996), followed a year later by a disc devoted largely to an earlier generation of males as well as one celebrating lesbian composers of the present day. Several mainstream recording companies had already issued recordings under such titles as *Out Classics*, *Sensual Classics* and *Classical Erotica*, but what these principally illustrated was the increasing commodification of gay or lesbian desire and its commercial exploitation. Lesbian musicians and composers, in particular, have a tradition of not only remaining outside commercial and institutional networks but also of resisting all musical models, and the work of the composer Sorrel Hays (formerly recorded as the pianist Doris Hays), as well as that of the performance artist and composer Meredith Monk, strongly maintains that tradition at a time when gay and lesbian artists were under increasing pressure to join the mainstream.

The gay presence in music during the 1990s was enhanced by such works as John Corigliano's *Of Rage and Remembrance*, a new version of the third movement of his Symphony no.1 incorporating chorus and soloists, who sing a text by William Hoffman, librettist of *The Ghosts of Versailles*, and, in a startling application of chance technique, the names of personal friends they have lost to AIDS and wish to commemorate. *Harvey Milk*, an opera by Stewart Wallace and Michael Korie on the life and times of a gay activist assassinated in 1978, was not a critical success. But opera companies marketing to their audience, are more frequently producing gay and lesbian operas, for example Matthias Pintscher's *Thomas Chatterton* (Dresden) and Paula M. Kimper's *Patience and Sarah* (New York).

In popular music, the 1990s also saw a reversal of the cautious approach of the 1980s and the emergence of openly lesbian musicians into the mainstream from the alternative space of women's music. The extraordinary singer and songwriter k.d. lang, who had earlier invaded the heterosexist field of country music with strongly woman-identified music and had gained a lesbian following, came out in 1992 (see Mockus in Brett, *Queering the*

Pitch, 1994). So did Melissa Etheridge and Indigo girls, which gave lesbians clear representation in popular culture, consolidating, as it were, the sexually ambiguous representations of Tracy Chapman, Michelle Shocked and Madonna, as well as the out-lesbian images of Phranc and Two Nice Girls. The growth in women's punk bands and the 'riot grrrl' phenomenon of the Pacific Northwest meant that lesbians could also project a more aggressive image in music.

Rob Halford, famous for three decades as front man of the heavy metal group Judas Priest, came out in 1998 and revealed how simple it had been to transfer the sometimes scary accoutrements of the gay leather world on to the metal stage without disturbing the primarily straight male audience. A knowing gay heavy-metal audience invested in super-masculinity had always understood homoerotics in place of straight homosocial bonding (Walser, 1993, pp.108–36). At the close of century, numerous gay and lesbian singers and queercore bands had a crossover popular following, or recorded on mainstream labels. The institution of the Gay/Lesbian Music Awards in 1996 consolidated and encouraged an already prolific field of endeavour.

By the end of the 1990s, then, an art-form, a scholarly discipline and a journalistic medium that had all set their faces rather sternly against the notion that deviant sexualities had anything to do with them, though the evidence to the contrary lay all around, found themselves with a modest inundation of 'queer' material – to use the term which, once a form of abuse, had been reclaimed around 1990 as an umbrella for the alliance of people of all unorthodox sexualities and those willing to associate with them.

6. Divas and disco. The approach so far in this discussion has been along the traditional modernist lines of emphasizing production: the composer and, perhaps less so, the performer. An arguably better way of defining 'gay and lesbian music', is to invert that model and, invoking the 'politics and epistemologies of location, positioning, and situating' (Haraway, 1991, p.196), to consider both the audience and particular venues as creating (if only by contingency and for the moment) a label for the music.

In answer to the question 'What is Gay Music?' posed by *Out* magazine (November 1996, pp.108–14), Peter Rauhofer said: 'It's all about the diva effect, an attitude that gay people immediately identify with'. This statement has a certain appeal as a generalization across 20th-century homosexual cultures in the West, including both gay males and lesbians. Among affluent males the diva effect tends to produce a devotion to sopranos (Joan Sutherland or Maria Callas, most notably, the latter being central to Terrence McNally's play *The Lisbon Traviata*) and a subject position known as the Opera Queen, widely discussed and theorized (Bronski, 1984; Mordden, 1984; Koestenbaum, 1993; Morris in Solie, *Musicology and Difference*, 1993; Robinson, 1994). Lesbian devotion may be equally intense, as instanced by the story of the young woman who committed suicide after being refused admission to Mary Garden's dressing room (Castle, in Blackmer and Smith, *En Travesti*, 1995, pp.25–6). It differs in attaching itself to dramatic sopranos, mezzo-sopranos or contraltos, especially if they are suspected of 'belonging' (like Garden) or if they cross-dress frequently in such roles as Orpheus, Octavian or the Composer in *Ariadne auf Naxos*. The tradition goes back beyond Garden (George Sand was 'mad' about Malibran) and included among its celebrated divas Olive Fremstad, the Wagnerian soprano who is the heroine of Willa Cather's *The Song of the Lark* and Marcia Davenport's *Of Lena Geyer* (Castle, and Wood, in Brett, *Queering the Pitch*, 1994).

In the cult of the queer, Judy Garland is a saint, heaven is 'Somewhere over the rainbow' (from *The Wizard of Oz*) and 'friend of Dorothy' the secret mantra of its votaries. Other such divas might include Marlene Dietrich, Mae West, Edith Piaf, Zarah Leander (the deep-voiced diva of the German scene), Bette Midler (who began her career in a New York bathhouse), Barbra Streisand and Madonna. Any supposed lesbian leanings among these idols are beside the point: more crucial are certain characteristics, portrayed in their singing, such as vulnerability (or actual suffering) mixed with defiance, to which their admirers relate; the quality of their humour is also an important ingredient.

The diva effect may have less strong a hold upon exclusively straight audiences; when it does occur, it is often imbued with camp elements of excess and style associated in straight culture with homosexuals. Liberace, for instance, appealed to a broad (but not gay or lesbian) audience by developing a canny mixture of sentimentalism and transvestism around his candelabra and piano. His repertory included musical as well as sartorial camp, for example his cross-dressing of Porter's 'Night and Day' in the *haute couture* of Beethoven's 'Moonlight' Sonata (for a cultural appraisal see Kopelson, 1996, pp.139–85, and Garber, 1992). His manipulation of the 'open secret' was more extreme than that of many less flamboyant but also closeted gay musicians: the openly flaunted markings of a hidden identity allowed those who adored him to use their adoration (and his and their mother-love) to bolster their own sense of identity and superiority.

Another notable sphere of queer interest and sponsorship has been the dance floor. Disco (not simply a category of music but 'also kinds of dancing, club, fashion, film, etc., in a word, a certain *sensibility*, manifest in music, clubs, etc., historically and culturally specific, ideologically and aesthetically determined – and worth thinking about': Dyer, 1992, p.149) is widely maligned; but dance-club life throughout Europe and the USA was transformed after the 1970s with the advent of Gloria Gaynor, Sister Sledge, Sylvester, the Weather Girls and many others, to whose fast-and-heavy beat, colourfully synthesized sounds and comforting sentiments gay men and sometimes lesbians gyrated and celebrated 'family' in safe queer spaces that were close to realizing what opera and *The Wizard of Oz* could only begin to suggest. More localized and specialized forms, such as the even faster and louder House music of the 1980s, and later Acid and Techno, developed as Disco moved into the straight mainstream. In the 1990s gay dance music was strongly affected by the artistry of RuPaul, possibly the recording industry's most successful drag queen. Like rock and roll before them, Disco and House were heavily derived from black performing styles and sounds, the African-American diva from Grace Jones to RuPaul being as important here as in the opera house. They momentarily displaced racial tensions to create an idealized arena for queer identity to be performed (Currid, 1995); this is as close as can be to gay music, one might think, yet its placing of queer

performativity on the platform of black 'diva-inity' leads to a complicated play of identification.

Focus on a particular audience and its 'situated knowledge' may also undermine traditional critical arguments seeking to eradicate all identity in music save nationality. The *New York Times* review (by Paul Griffiths, 7 July 1998) of Kimper's opera and the CRI recording of the music of lesbian composers mentioned above, concludes that 'sexual preference, as well as sex, is inaudible', and calls that conclusion 'inevitable'. The response immediately suggests itself, 'inaudible to whom'? Modernist criticism, anxious to check the proliferation of meaning and keep forms of authority and canons of taste in place, puts the onus of proof on 'the music itself'. But the notes cannot so easily be separated from their context (of performance, venue, genre and audience, as well as musical allusion): if stripped of all associations – an impossibility – they can yield no meaning.

In some few cases, such as the bizarre juxtapositions in Poulenc's instrumental music, a homosexual sensibility *is* clearly audible, but then only to someone who has some grasp of the aesthetics of that much-discussed but uneasily defined phenomenon known as 'camp'. Further, the orientalism or exoticism of a great range of 19th- and 20th-century music can be heard not simply as decorative acculturation but as an audible manifestation of some dissatisfaction with prevailing Western *mores*. More complicated musical strategies, such as the set of motivic and tonal interactions that signal the tragedy of internalized oppression in *Peter Grimes*, may be revealed as criticism involves itself more deeply and widely with such questions. Such markers, however, are possibly more prevalent in (closeted) homosexual culture in which classical music is so heavily implicated than in openly lesbian or gay music, such as Disco or the kinds of alternative women's music mentioned above. Here, context exerts so powerful an influence as to overthrow conventional associations: even the opening of Beethoven's Fifth Symphony, that quintessential model of heroic masculinity, met its gay destiny when, tricked out with a heavy beat and other accoutrements, it hit the Disco scene in the 1970s as *A Fifth of Beethoven*.

> The identity of music is the sacred issue . . . that women, working-class laborers, gays and lesbians, blacks, religious or ethnic communities, or anyone else should identify music in some other way or imagine music to embody completely different and differentiated cultural spaces, that becomes blasphemy against what MUSIC is. Imagined in this way it may not be MUSIC anymore. (Bohlman, 1993, p.417: after McClary, 1991)

Accordingly, an important strategy among gay and lesbian critics is to insist on the possibility and the importance of different receptions of all kinds of music, an insistence which can undermine any authority or objectivity criticism might claim for itself and of destroying the essentializing or minoritizing drive to confine gay or lesbian music criticism to style analysis. A special lesbian relationship to music itself has been insisted upon and explored (Cusick, in Brett, *Queering the Pitch*, 1994: originally proposed at the first Feminist Theory and Music conference, 1991); this prepared the ground for a good deal of later critical work (not all of it by self-identifying gay, lesbian or bisexual critics) that refuses previous protocols in an effort to reach imaginative and varied views as to what kinds of phenomena might coexist as 'lesbian and gay – or queer – music' and how these might relate to sets of other positions, even the hegemonic one.

7. Anthropology and history. The discussion so far has pertained to the 20th century, to Europe, North America and their outposts, and has largely been confined to recent musical phenomena. 'Gay and Lesbian Music' is arguably confined to these specific times and places. Beyond the West, the dilemma becomes even more apparent. In non-Western musics, gender and sexual ambiguities and inversions, not to mention same-sex sexual practices, found in many cultures with different musics and different sexualities, have drawn the imagination of the West, with its attraction to and cultural fantasies about them. The symbolic inversions around the cross-dressed male 'talèdhèk' in Balinese song and dance; transsexual performance by spirit-guides or 'halaa' among Temiar people; the Hawai'in 'māhū' of indeterminate gender; or the Mapuche of the southern Andes: all these bear witness to the warning that 'gay, lesbian, bisexual, homosexual, heterosexual . . . conjure but a limited glimpse of the variations on gender that are beginning to emerge from cross-cultural research' and 'reduce the complexity of personhood to a handful of oppositions contrived by an ethnocentric discourse' (Robertson, 1992).

Some of the musics of non-Western cultures became source material for homosexual Western composers cruising off-limits but cannot be amalgamated with or subsumed under a Western category. Homosexual or pederastic composers from Saint-Saëns onwards were at one time particularly susceptible to the attractions of orientalism, perhaps because of the projection of illicit sex discerned by Said's critique (1978), perhaps, as Lou Harrison has suggested, because of an identification with the Other or even (as in the case of Cage) because of dissatisfaction with available resources: this topic remains problematic and interesting in relation to gay and lesbian music. But since orientalism in music at the turn of the present century is represented most strongly by non-gay minimalism, no essentialist link ought to be imagined. Interestingly, ethnomusicology has been even more nervous of categories of sexual behaviour manifest in music than has historical musicology.

Given that the study of sexuality is a modern phenomenon, a long history of homosexuality in music is an impossibility. There is room, however, to explore how same-sex sexual or erotic relations have been regarded in different times and places and how the social experience of being involved in them might affect musical utterance: 'it will be history written from the perspective of contemporary gay interests' (Halperin, 1990, p.29) asking questions never posed during musicology's long preoccupation with straight fact. An example might be the placing of Hildegard of Bingen's lyrical effusions in a context of the medieval eroticization of the body focussed (in her case) on same-sex desire: pointing out 'how insistently "queer" medieval Christianity can be', Holsinger (1993, p.120) suggests that 'rather than looking for "actual" lesbians and gay men in the Middle Ages, why not try outing medieval devotion itself?' Turning to organum, he explores the writings that constantly represent polyphonic practice in corporeal terms as 'coupling' (*copula*) and in relational terms as the product of their male singers. Such rhetoric, he suggests, not only explains the link between sodomy and polyphony in the puritan tradition but

uncovers a queerness at the heart of organum that is also represented in some homoerotic verses of its leading composer, Leoninus (Holsinger, 2001, chap.4). Ironically, then, the polyphony and harmony that differentiate Western music most notably from that of other cultures can be seen as from the start connected to same-sex desire and 'art music' originally fell into disrepute through roughly the same association that it has been trying so hard to avoid in the 20th century.

There seem few enough clues at present about how the frequent accusation of sodomy against musicians of the late medieval and early modern periods should play into a notion of the music they produced. It is not known whether composers like Nicolas Gombert, Dominique Phinot, Tiburzio Massaino, Johann Rosenmüller and Jean-Baptiste Lully shared anything but shame for their sexual desires, and whether even that affected their composition. The first four undoubtedly suffered, Gombert serving a three-year stint in the galleys, Phinot being executed (his body was burnt), Massaino going into exile and Rosenmüller being imprisoned together with the schoolboys involved. A canon at Loreto, Luigi Fontino, was beheaded in 1570 for sodomy with a choirboy (Sherr, 1991); and it has been suggested that Gombert's first book of motets (1539) may have been assembled as an apologia with a view to gaining him a pardon (Lewis, 1994, pp.333–67). Lully, on the other hand, made a fortune and founded an operatic tradition, apparently undamaged by attacks on 'les sodomites' at court that culminated for him in the removal from his house of the page whom he was suspected of sodomizing. Moreover, since the librettist Campistron was a member of the sodomitical court circle, Lully's last two stage works, *Acis et Galatée* (1686) and *Achille et Polyxène* (1687) may represent the earliest known gay collaboration.

If Lully's case is well documented, particularly in ribald contemporary comments, recent speculation about Zelenka appears to derive solely from a structural and semantic analysis of his trio sonatas (Reich, 1987); no evidence concerning Zelenka's sexuality or sexual practices survives: he remained unmarried and was a solitary, unassuming figure, seen by some contemporaries as a reserved, even bigoted, Catholic. It is one thing to infer a musician's participation in same-sex culture and to examine ideological traces of homophobia in the literature that result from his status as a 'suspect' (as with Thomas's essay on Handel in Brett, *Queering the Pitch*, 1994), but another for same-sex desire to be discerned internally and then used to make a lesser-known composer of the period appear deviant and exciting and his music therefore more marketable. This new Zelenka image belongs rather to the late 19th century, as exemplified in the decadent movement and such key figures as J.-K. Husymans, Walter Pater and Oscar Wilde (see Hanson, 1997), than to the early 18th.

Very different from this case is the increasing number of examinations of works for cultural traces that are writ large in the surrounding societal context, or identity-based critical interpretations enriched with a sense of the history of culture. Work on communities of nuns and on the many women composers of Italy, for instance, has prompted questions about how early modern religious eroticism might reflect an erotics of these suppressed voices, and has invited lesbian interpretations of the work of the many religious women who exhibit extravagant devotion to the Virgin Mary. Recent work (by Cusick) on Francesca Caccini also shows how a feminist and specifically lesbian approach can enliven and illumine the discussion of historical issues around music and the patriarchy. In view of the various inflections of the Orpheus legend, too, significance has been read into the fact that in the Monteverdi-Striggio *Orfeo* the male singer loses his female lover only to ascend to heaven in the arms of another man. Whether or not Handel had homosexual relationships, the revelations about the circles in which he moved – and exactly how his modern biographers articulate their anxiety about the possibility he might have done so – makes Thomas's essay a salutary contribution to Handel scholarship. The castrated male who is the central figure of every *opera seria* in Handel's time not only complicated questions of gender and sexuality but also embodied the threat represented by the music itself: these 'Italian Syrens' are compared by the anonymous author of *Satan's Harvest Home* (1749) to the 'Chromatic Musick' of ancient Greece and the 'Women Singers and Eunuchs from *Asia*' by whose agency, apparently, the ancient Romans 'quite lost the Spirit of Manhood, and with it their Empire'. Italy was 'the *Mother* and *Nurse* of *Sodomy*' where 'not a Cardinal or Churchman of Note but has his *Ganymede*' (pp.51, 56). In North Germany an Italian castrato was not needed to sound the anti-effeminate alarm: mere minuets in symphonies seemed to J.A. Hiller 'like beauty spots on the face of a man: they give the music a foppish appearance, and weaken the manly impression made by the . . . serious movements' (Head, 1995).

A gay and lesbian discourse about music will undoubtedly wish to do more in the way of exhuming those musicians identified with same-sex desire. But there are equally important issues to be addressed. Attention has been drawn to a vein of homophobia in traditional musical scholarship. Whether it be reaction against the prospect of a great composer's deviance, the invention of an 'artistic persona' (following literary New Criticism) to evacuate the connection between the life of a gay or lesbian artist and his or her work of all meaning, or the recent movement to import from literary criticism Harold Bloom's theory of the 'anxiety of influence', with its assumption that male relations are always fraught with contention rather than love (Whitesell, 1994–5), an opposing or context-providing protest has to be registered. Procedures need to be followed that do not leave homosexuality lying unregistered in the clothes of the open secret as mere decadence or a taste for elaboration. Inevitably part of the focus will be questions of artistic collaboration, sponsorship (for example by the Paris salon and circle of the Princesse de Polignac, including Nadia Boulanger, and in American music around Bernstein, Copland and Barber) and even the effect on heterosexually identified composers of being liberated by a circle consisting largely of homosexuals and their culture, as was Stravinsky by the Mir iskusstva ('World of Art') group around Diaghilev, or of their music becoming the centre of a homosexual cult, as Wagner's appears to have become in Germany.

The greatest challenge for a gay and lesbian approach is undoubtedly the German canon in art music and its satellites. Composers in this tradition are still assumed to be stable entities; and idealization surrounding them includes the default position of exclusive heterosexual

activities. The literature about them, however, frequently reveals an embarrassment or evasion that implies an ingrained homophobia in musical scholarship. Since sexual orthodoxy can never be assumed, especially among musicians, the constant parade of heroism and masculinity in the repertory from Beethoven to Strauss, and its representation in criticism and scholarship, may seem like a ruse to divert attention from an endemic queerness so firmly repressed that even to suggest it is an error of taste and judgment (as in the cases of Handel, Beethoven, Schubert, Schumann and Brahms).

More nuanced studies of the circumstances of such composers may link them to patterns of same-sex love or desire, such as have been discerned among the literary figures of the age of sensibility and of Romanticism (whether or not these patterns included sexual acts). Reception of their music from a gay or lesbian standpoint (e.g. Cusick, 1994; Brett, 1997; Wood, 2000) should broaden the range of criticism across the entire historical spectrum, throw new light on the meanings people attach to the music they identify with and help to open the way towards new discussion of the power of music of various kinds in peoples' lives.

Following the inception of a homosexual identity (see §1), Tchaikovsky became the first musician widely known to fit the role. As early as 1908 he was called the one 'thorough-going Uranian' to attain 'to the highest eminence in this art' (Carpenter, p.111). Tchaikovsky was without peer in reaching a German level of technique and formal command. His manifest deviance enabled critics so minded to keep the German symphonists themselves untainted. It is worth noting, in the light of some of the criticism that has linked Tchaikovsky's supposed sentimentality, morbidity and lack of formal values with his sexuality, that his concert music was initially heard as 'free from the frightful effeminacy of most modern works' (Bernard Shaw) and as 'impersonal' and containing 'glimpses of the strong man's hand' (Ernest Newman; see Brown, 1999).

In novels, plays, films and other representations in dominant culture, the homosexual always dies: and it is significant that a fierce controversy has developed around Tchaikovsky's death. Suicide has been suggested – whether at the direction of Tsar Alexander III, of his own volition, at the behest of his (homosexual) brother Modest to avoid a homosexual scandal or (stranger still) at the direction of former classmates worried about the honour of the old school. Defenders of the 'official' account of cholera in Modest's biography attribute these rumours to an essentialist (and homophobic) image of Tchaikovsky as tragically pathological without perhaps allowing sufficiently for the equally essentialist (and unrealistic) implications of the composer's being fully accepting of his sexuality and its consequences. A gay or lesbian approach to him will in any case wish to redress the balance towards his lively aspects, and the difference he made to the fields of concert music, opera and ballet. For instance, Matthew Bourne's remarkable reinterpretation of *Swan Lake* (1995), in which a tightly feathered male *corps* replaced the swans in tutus and the love music became the occasion for breathtakingly homoerotic spectacle, attained for some an authenticity beyond anything imagined by historically informed performing practice. Tchaikovsky's own life also reveals moments of potential resistance, such as the entire ballet he and Saint-Saëns danced for each other on the story of Pygmalion (Tchaikovsky) and Galatea (Saint-Saëns). That occasion in December 1875 epitomizes the social predicament of homosexual musicians throughout the ensuing century: two composers, celebrated throughout Europe, occupying a central site, the stage of the Moscow Conservatory, to enact a closet drama; private delight cannot have been unmixed on that occasion, as on so many others in so many other lives, with the apprehension of disclosure.

Such tensions of the human spirit brought about by the forces of oppression and the counterforces it also generates are much in need of deciphering in order to make greater sense of social and musical experience, both then and now. By focussing on such matters, a gay and lesbian perspective has the means to expand the entire critical and historical enterprise.

PHILIP BRETT, ELIZABETH WOOD

Gaye [Gay], **Marvin** (*b* Washington DC, 2 April 1939; *d* Los Angeles, 1 April 1984). American soul singer, drummer, songwriter and producer. He started singing professionally as a member of the Rainbows, a Washington-based doo-wop group. He subsequently joined the Marquees, who signed a recording contract with Chess Records and through which Gaye met the producer and vocalist Harvey Fuqua, joining his doo-wop group, the Moonglows. In 1960 Fuqua and Gaye moved to Detroit and were both signed to Motown Records. Gaye adopted the new spelling of his surname at this point and made solo recordings for the Motown subsidiary Tamla Records in the mould of a jazz-pop ballad singer. When these proved commercially unsuccessful, he recorded more youth-oriented rhythm and blues, first entering the charts with *Stubborn Kind of Fellow* in 1962. Most of his hits from this time were gospel-influenced dance tunes written by Gaye and Mickey Stevenson or one of a variety of other Motown songwriters. Beginning with *Can I get a witness* (1963) Gaye recorded several transitional hits written for him by Holland, Dozier and Holland. At the same time he sang a series of duets such as *What's the matter with you baby* (1964, with Mary Wells), *It takes two* (1967, with Kim Weston) and *Ain't no mountain high enough* (1967, with Tammi Terrell). During this period he also played the drums for a number of Motown sessions (including recordings by Smokey Robinson and the Miracles and 'Little' Stevie Wonder) and co-wrote Martha and the Vandellas' 1964 hit *Dancing in the Streets*.

In the late 1960s Gaye made such seminal recordings as *I heard it through the grapevine*, *Too busy thinking about my baby* and *That's the way love is*, but after the death in 1970 of his duet partner, Tammi Terrell, he went into temporary seclusion. When he returned to recording he embarked on a new stage in his career, insisting on total artistic control of every aspect of his recordings. Inspired by Isaac Hayes's *Hot Buttered Soul* (Stax, 1969), he recorded the conceptually unified album *What's going on* (1971) in which he combined the percussive vogue of the early 1970s with a jazz sensibility and touches of classical string writing. His lyrics addressed a variety of social concerns, some specific to African Americans and others of universal relevance. In addition to the title song, *Mercy Mercy Me (The Ecology)* and *Inner City Blues (Makes me wanna holla)* were top ten pop and rhythm and blues hits. He subsequently produced similarly innovatory and complex material, some of which was uneven as he dealt with a number of personal and professional problems and a drug addiction. After signing with Columbia Records in 1982, he had a top ten hit with *Sexual Healing*. Shortly after this comeback he was shot by his father.

ROB BOWMAN

Gayer [Gaier, Geyer], **Johann Christoph (Karl)** (*b* ?1668; *d* Prague-Hradčany, 16 Nov 1734). Bohemian composer and choirmaster. He was an unpaid musician at Prague Cathedral, from about 1690, and from about 1701 to 1726 was choirmaster of the church of the Nativity in the Loreto at Hradčany. On 6 October 1705 he succeeded Wentzeli as *capellae magister seu praefectus chori* to the cathedral and held that post for nearly 30 years until his death (when he was succeeded by Görbig); by a careful choice of members he raised the standard of the ensemble. Besides his musical activities he was German registrar to the Prague court of appeal. His son Vojtěch (Adalbert) was viol player or cellist of the cathedral from 1727, and assisted as choirmaster during his father's final illness. By 1705 Gayer had begun to assemble a library of contemporary Italian sacred music and of his own compositions, and he enlarged it in 1717 with new acquisitions from Naples and Rome (some of these were apparently bought by the cathedral chapter). His music collection was acquired after his death by the Crusaders' monastery in Prague (now partly in *CZ-Pnm*, see Koronthály).

Gayer's style is close to that of late Baroque Venetian church music. In most of his works vocal counterpoint alternates with homophonic sections accompanied by strings, trombones, trumpets and organ; sometimes the instruments merely double the voices. Little use is made of the da capo aria. Gayer's best works, for example his *Regina coeli*, are remarkable for skilful use of fugue and other contrapuntal procedures. Some of his music was in use up to the early 1760s at the Crusaders' monastery.

WORKS

in CZ-Pnm unless otherwise indicated

Requiem, c, ed. in EDM, 2nd ser., *Sudetenland, Böhmen und Mähren*, iv (1943); Requiem, F; Dies irae, Tuba mirum, Lachrymosa, g; 2 TeD, C, both for 2 choirs
Regina coeli, A, ed. in EDM, 2nd ser., *Sudetenland, Böhmen und Mähren*, iv (1943); Laudes de dominica, A; Eja fideles, off, A; Omnes gentes plaudite, recit, b, aria, G, from off; Deus meus, ad te de luce vigilo, ps, G
Lamentatione del giovedi sera, F; Ecce Dominus veniet, advent aria, C; Caeli sydera rorate, aria and chorus, c; Gloria in excelsis, versetto, C
Missa solemnis, *CZ-Bm*; Pleno choro jubilemus, motet, C: both of doubtful authenticity
Other works cited in 18th-century inventories, incl. Cistercian monastery, Osek, 1706, and Crusaders' monastery, Prague, 1737–8: lost

MILAN POŠTOLKA

Gayer, Johann (Andreas) Joseph Georg (Jakob) (*b* Andělská Hora, nr Karlovy Vary, 18 May 1746; *d* ?Homburg, 1811). Bohemian composer and violinist. His relationship to J.C.K. Gayer (?1668–1734), if any, is not known. He acquired his musical education at minor Bohemian towns and became an organist; later he studied the violin with Václav Pichl and composition with K. Loos in Prague. Then he left Bohemia, and in 1774 he was appointed Konzertmeister to the Landgrave of Hesse at Homburg.

Gayer's works, listed in detail by Gerber according to the composer's own specification, included 30 symphonies, 40 violin concertos, 26 concertos for horn and other wind instruments, four piano sonatas and sacred music (a Mass in E♭ ascribed to him in *I-MOe* may not be authentic); all his music is apparently lost.

Gazarossian, Koharik Alis [Łazarosyan, Goharik Alis] (*b* Constantinople [now Istanbul], 21 Dec 1907; *d* Paris, 29 Oct 1967). Armenian composer and pianist. As a child she studied the piano in her native city with a pupil of Liszt, the Hungarian musician Professor H. Hege. In 1926 she entered the Paris Conservatoire, where her teachers were Paul Dukas (composition) and Lazare Lévy (piano). In 1947, during a stay in the United States she worked with Edward Weiss, a student of Busoni. She travelled extensively in Europe, performing in Great Britain, France, Germany, Switzerland, Italy, Austria, as well as in Egypt, Lebanon and Turkey. Gazarossian devised 24 programmes of piano music (by other composers), arranged according to their tonality and named 'bien tempéré', which she performed on occasion in her recitals. Many of her compositions were inspired by Armenian liturgical chants and, in particular, the folksongs collected by Komitas. Her piano music is gracious, immediate and well-balanced, written with a sense of pianistic flair.

Gazkue y Murga, Francisco. *See* GASCUE Y MURGA, FRANCISCO.

Gaztambide (y Garbayo), Joaquín (Romualdo) (*b* Tudela, 7 Feb 1822; *d* Madrid, 18 March 1870). Spanish composer and conductor. Orphaned at an early age, he became a choirboy at Tudela Cathedral in 1830 and studied there with Rubla. In 1834 he was a pupil of Guelbenzu at Pamplona and in 1842 entered the Madrid Conservatory to study the piano with Pedro Albéniz y Basanta and composition with Ramón Carnicer. In 1845 the Italian company at the Teatro de la S Cruz in Madrid made him the director of its chorus. In 1846 he went to Paris as conductor of a ballet company, but in 1848 returned to Madrid as director of the Teatro Español, where his first zarzuela, *La mensajera*, had its première in December 1849. This began a series of successes for Gaztambide as a conductor of opera and zarzuela companies in Madrid. For several seasons he conducted operas at the Teatro Real, and he directed the first performance in Spanish of Meyerbeer's *Le prophète*.

In 1862 he was appointed director of the concert society at the Madrid Conservatory, which was later, under Francisco Barbieri, to become the Madrid Sociedad de Conciertos. In 1868 Barbieri appointed him its director, and in that capacity he brought to the Spanish public the most modern works of the time. He was the first to conduct in Spain a work by Wagner, the overture to *Tannhäuser*, which met with great enthusiasm. In 1869 he formed a large zarzuela company and set off on a tour of South America, beginning in Havana. His own work *Catalina* was the first to be presented, but during the performance a popular uprising took place, which caused the suspension of all theatrical spectacles. Badly shaken economically, the company went on to Mexico, where it achieved success. However, Gaztambide fell ill there; in Veracruz he gave his last concert and in January 1870 he embarked for Spain, reaching Cádiz seriously ill. In Madrid he underwent a liver operation, and died a few days later.

Gaztambide composed 44 zarzuelas, of which *Catalina* (1854) was the best and most successful. Also important were *Los magyares* (1857), *El juramento* (1858) and *La conquista de Madrid* (1863). He composed several works in collaboration with Barbieri and others. Javier Gaztambide was his cousin.

WORKS
all zarzuelas, all first performed in Madrid

La mensajera (2, L. Olona), Español, 24 Dec 1849; A última hora (1, J. Olona), Basilios, 29 May 1850; Las señas del archiduque (2, C. Suarez Bravo), Basilios, 8 June 1850; Escenas en Chamberí (1, J. TOMÁS MARCO/R

Gazzaniga, Giuseppe (*b* Verona, 5 Oct 1743; *d* Crema, 1 Feb 1818). Italian composer. His father intended him for the priesthood, but he studied music secretly and after his father's death devoted himself to it entirely. In 1760 he went to Venice to study with Porpora, who encouraged Gazzaniga to accompany him to Naples. There Porpora obtained a free place for his young pupil at the Conservatorio di S Onofrio in Capuana for six years. During this time Gazzaniga studied composition and counterpoint with his patron. In 1767 he became a composition pupil of Piccinni, with whom he studied for three years; a year later he made his début with his comic intermezzo *Il barone di Trocchia* in Naples. In 1770 he returned to Venice; there he made friends with Sacchini, whose generous advice was of great benefit to him in his compositions. In the 1770s Gazzaniga wrote operas for various Italian theatres. In 1780 he was again in Naples, where he directed the revival of Jommelli's *Armida abbandonata* at the Teatro S Carlo and in the following year revived his own *Antigono*. His *Il finto cieco*, on a libretto by Da Ponte, was performed at the Burgtheater, Vienna, in 1786 and brought Gazzaniga commissions from Italy, Germany and England; but Da Ponte in his memoirs had little to say in his favour.

Gazzaniga achieved widespread acclaim with his one-act *Don Giovanni, o sia Il convitato di pietra* to a libretto by Bertati (1787, Venice), later also known as *Don Giovanni Tenorio*. The work was performed not only in Italy, but also in Paris (1792), Lisbon (1792) and London (1794); Kunze has recorded no fewer than 32 editions of the libretto up to 1821. Though Bertati's text was decisive in Da Ponte's own *Don Giovanni* for Mozart, it is unclear whether Mozart had studied Gazzaniga's score; his letters say nothing of Gazzaniga's opera, and no Viennese performance of the work is known, though he may have encountered Gazzaniga's music through his Ottavio, Antonio Baglioni, who had been Gazzaniga's Giovanni in Venice. Four years after the Venice première Gazzaniga accepted an appointment as *maestro di cappella* at Crema Cathedral, and subsequently composed few dramatic works. Little is known of the composer's final years, though letters and documents mention responsibilities beyond the cathedral and allude to economic hardship. Stefano Pavesi, who was his pupil from 1802, succeeded Gazzaniga as *maestro di cappella* following the latter's death from colic in 1818.

Gazzaniga belongs to the last generation of Italian *buffa* composers whose most brilliant representatives, Paisiello and Cimarosa, provide a link with the comic opera of Rossini. His music typifies the late 18th-century *opera buffa* style. It is less rich in harmony and texture than Paisiello's, but nevertheless closer to the combination of conciseness and judiciously applied sentiment of Paisiello than to the extravagant comic prolixity of Cimarosa. Gazzaniga's style tends to be concise and relatively thin in texture, emphasizing the forward motion of the music as well as the declamation of the text. He seems to have been less tied to symmetrical groups of two and four bars than some of his contemporaries, and interesting rhythmic or melodic details often make up for rather basic harmonies and lean textures. One of the more striking aspects of Gazzaniga's music for his *opere buffe* is its expressive clarity; there is never any doubt about the emotional content or the type of character singing. Though sometimes predictable he often avoided dullness with witty details that enhance the dramatic situation. Gazzaniga was not well educated, but a letter to Simon Mayr shows that he took an interest in older masters as well as in contemporary music, and that he possessed a substantial library.

WORKS

OPERAS

Il barone di Trocchia (int, 2, F. Cerlone), Naples, Nuovo, carn. 1768

La locanda (dg, 3, G. Bertati), Venice, S Moisè, carn. 1771, *D-Dl*, *Rtt*, *DK-Kk*, *F-Pn*, *H-Bn*, *I-MOe*, *Pl*, *Tf*, *US-Bp*, *Wc*

Calandrano (dg, 3, Bertati), Venice, S Samuele, 1771, *A-Wn*, *D-Dl*, *F-Pn*; rev. G. Rust, as L'avaro deluso, Bologna, Formagliari, 1773

Ezio (os, 3, P. Metastasio), Venice, S Benedetto, Feb 1772, *P-La*
La tomba di Merlino (dg, 3, Bertati), Venice, S Moisè, aut. 1772
L'isola di Alcina (dg, 3, Bertati, after L. Ariosto: *Orlando furioso*), Venice, S Moisè, 1772, *A-Wn, D-Dl, DS, F-Pn, H-Bn, I-Fc, Tf, DK-Kk, S-Skma*
Zon-Zon (L'inimico delle donne) (dg, 3, Bertati), Milan, Regio Ducal, aut. 1773, *F-Pn, I-Rmassimo*

Armida (os, 3, after T. Tasso: *Gerusalemme liberata*), Rome, Argentina, 1773, arias *Mc, Nc, Rc*
Il matrimonio per inganno (ob), Pavia, 1773
Il ciarlatano in fiera (dg, 3, P. Chiari), Venice, S Moisè, 1774
Perseo ed Andromeda (os, 3, V.A. Cigna-Santi), Florence, Pergola, 15 Sept 1775; ? as Andromeda, Prague, 1781 (private perf.), Brunswick, 1783
L'isola di Calipso (os, G. Pindemonte), Verona, Filarmonica, 1775
Il re di Mamalucchi (dg), Prague, 1775; as Il Mamalucco, Pesaro, Sole, 1776
Gli errori di Telemaco (os, C.L. Rossi), Pisa, Prini, 1776
Il regno dei pazzi, Ferrara, 27 Dec 1777 (private perf. at Count Pinamonte Boncossa's); as Il re dei pazzi (int), Venice, S Giovanni Grisostomo, aut. 1778
La bizzaria degli umori (dg, 2), Bologna, Zagnoni, 1777, *B-Bc, F-Pn, I-Bc*
Il marchese di Verde Antico (int, 2), Rome, Capranica, Jan 1778; collab. F. Piticchio [early version of La vendemmia], *I-Rdp* (sinfonia only), *US-SFsc*
La vendemmia (opera giocosa, 2, Bertati), Florence, Pergola, 12 May 1778, *A-Wn, D-Dl, Wa, F-Pn, H-Bn, I-Fc, US-LOu*; rev. G. Petrosellini, as La dama incognita (int), Vienna, Burg, 11 Feb 1784
La finta folletto (int, 2), Rome, Capranica, 29 Dec 1778
Il disertore (Il disertor francese) (dg, 2, F. Casorri, after L.S. Mercier), Florence, Pergola, 5 April 1779, *D-Wa, I-Bc*
Antigono (os, 3, Metastasio), Rome, Argentina, 1779, *Nc*
Il ritorno di Ulisse a Penelope (melodramma, 2, G.A. Moniglia), Rome, Argentina, 1779
La viaggiatrice (dg, 2, F.S. Zini), Naples, Fondo, 1780
Antigona (os, G. Roccaforte), Naples, S Carlo, 1781, *Nc* (inc.)
La stravagante (commedia, 2, Zini), Naples, Fondo, 1781
Amor per oro (dg, 3, C. Arcomeno), Venice, S Samuele, 1782, *US-Wc*
La creduta infedele (commedia, 3, Cerlone), Naples, Fiorentini, 1783
L'intrigo delle mogli (commedia, 2, G. Palomba), Naples, Fondo, 1783
La dama contadina (int, 2), Rome, Capranica, carn. 1784
Il serraglio di Osmano (dg, 2, Bertati), Venice, S Moisè, 27 Dec 1784, *D-DO, Wa, F-Pc, I-Fc, Tf* (Act 2 only); as La fedeltà di Rosana, Perugia, Pavone, carn. 1786; as Il palazzo di Osmano, Lisbon, 1795
Tullo Ostilio (os, 3, F. Ballani), Rome, Argentina, 1784, *Tf*
La moglie (donna) capricciosa (dg, 2, F. Livigni), Venice, S Moisè, aut. 1785, *A-Wn, D-Dl, Wa, F-Pn, H-Bn, HR-OMf* (Act 2 Finale only), *I-Fc, Gl*; lib. rev. Giotti (int), Florence, 1791
Il finto cieco (dramma buffo, 2, L. Da Ponte, after M.-A. Legrand: *L'aveugle clairvoyant*), Vienna, Burg, 20 Feb 1786, *F-Pn, I-Fc, US-Bp*
Circe (os, 3, D. Perelli), Venice, S Benedetto, 20 May 1786, *?D-Bsb, P-La*
La contessa di Novaluna (dg, 2, Bertati), Venice, S Moisè, aut. 1786
Le donne fanatiche (dg, 2, Bertati), Venice, S Moisè, aut. 1786
Don Giovanni (Tenorio), o sia Il convitato di pietra (dg, 1, Bertati), Venice, S Moisè, 5 Feb 1787 as pt 2 of G. Valentini and others: Il capriccio drammatico; *A-Wgm, F-Pn, GB-Lbl, I-Bc, Mc, OS, US-Wc*; ed. S. Kunze (Kassel and Basle, 1974)
La Didone (os), Vicenza, Nuovo, sum. 1787
La cameriera di spirito (dg, 2, G. Fiorio), Venice, S Moisè, aut. 1787
L'amore costante (La costanza in amor rende felice) (commedia, 4, Bertati), Venice, S Moisè, 1787, *F-Pn*
Erifile, Venice, S Samuele, aut. 1789, *I-Mc* (scena and duet ony)
Gli Argonaliti in Colco (os, 3, S.A. Sografi), Venice, S Samuele, carn. 1790, *D-Mbs, GB-Lbl, US-Wc*
Idomeneo (os, 3, G. Sertor), Padua, Nuovo, 12 June 1790, *D-Mh, US-Wc*
La disfatta dei Mori (os, 3, G. Boggio), Turin, Regio, 1791, *P-La*
La dama soldato (dg, 2, C. Mazzolà), Venice, S Moisè, 1792, *I-Tf* (Act 1 only)
La pastorella nobile (dg), Fortezza di Palma, aut. 1793
La donna astuta (dg, 2), Venice, S Moisè, 1793 [?rev. version]
Il divorzio senza matrimonio, ossia La donna che non parla (dg, 2, Sertor), Modena, Rangoni, 5 Feb 1794
Fedeltà e amore alla pruova (dramma eroicomico, 1, G. Foppa), Venice, S Moisè, 1798, *A-Wn, F-Pn*
Il marito migliore (dg, 2, T. Menucci di Goro [A. Anelli]), Milan, Scala, 3 Sept 1801; as I due gemelli, Bologna, Comunale, 1807
Martino Carbonaro, o sia Gli sposi fuggitivi (farsa, 1, Foppa), Venice, S Moisè, 1801
Arias in L'ape musicale (commedia, Da Ponte), Vienna, 27 Feb 1789
Scena and aria in L. Brusasco: Il Manescalco, *I-Tf*
Doubtful: La Pallacorda (int), Rome, 1770; Le orfane svizzere (dg, Chiari), Novara, 1774; La fedeltà d'amore, 1776; Il marchese carbonaro (ob), Vienna, 1777; Le gelosie villane (ob, T. Grandi), Novara, 1778; Achille in Sciro (os, Metastasio), Palermo, 1780; L'amante per bisogno (dg, C.G. Lanfranchi Rossi), Venice, 1781; L'Orvietano (ob), Rome, 1781; Demofoonte (os, Metastasio), Palermo, 1782; La vivandiera (ob), Berlin, 1786; L'italiana in Londra (ob, G. Petrosellini), Piacenza, 1789; Giasone e Medea (os, G. Palazzi), Venice, 1790; La schiava della China (ob), Ancona, 1790; I due sposi ridicoli (ob), Rome, 1793; Gl'amori in villa (ob), Piacenza, 1793

OTHER VOCAL

Orats: I profeti al Calvario, 4vv, orch, 1781, *I-CHf, Nc, Pca*; Susanna, 6vv, orch, 1787, *Mc*; Humanae fragilitatis exemplum, Venice, 1792, lib only; San Mauro abate, 4vv, insts, 1793, *Bc*; Sansone, 5vv, orch, *Bc*
Liturgical: Messa breve concertata, C, 4vv, 1791, *I-CRE, Mc*; Messa per li defonti, E♭, 3vv, orch, 1792, *D-MÜs, I-CRE*; Miserere, f, 4vv, orch, 1794, *Mc*; Messa in pastorale, 3vv, org, *US-R**, Missa pro defunctis, 4vv, insts, *D-Mbs*; Mag, D, 4vv, orch, *I-CHf, Mc*; Mag, B♭, 4vv, orch, *CRE*; TeD, 4vv, insts, *D-Dl*, TeD, C, 4vv, org, orch, *MÜs, I-Mc, Sd*; Requiem, Tantum ergo, 4vv, insts, *I-Bc, CRE, Mc*; Ky breve, Gl, Cr, 3vv, insts, *Bc*; Tantum ergo, S, vns, *Bc*; Stabat Mater, c, 4vv, orch, *D-MÜs, I-BGc, CRE*; Stabat Mater, d, *CRE*; other works in *A-Sl, CH-E, D-Hs, MÜs, I-Baf, CRE, Mc, Sd*
Other sacred: Cant. ... per la promozione alla sacra porpora dell' ... Cardinale Mariolini (G. Manfredini) (Bologna, 1777); Cant., Fano, 1777, lib only; Salmi, cantici ed inni cristiani (L. Tadini), 1–3vv, kbd, (Milan, 1817), collab. S. Pavesi; other works in *I-BGc, CHf, CRE, Fa, Mc, S-Smf*
Single arias, duets etc. in *A-Sl; CH-E, Gc, N, Zz; CZ-BER, D-Bsb, Dl, F, GÖs, HR, Hs, LEm, RH, Rtt, ZI; DK-Kk, Sa; GB-Lbl; HR-Dsmb, Sk, Zha; I-AN, BGc, BGi, CHf, MAav, Mc, Rc, Tf; USR-Mk, S-L, Skma, Smf, St; US-BEm, Eu, R, SFsc, Wc*

RUDOLPH ANGERMÜLLER, MARY HUNTER/CARYL L. CLARK

Gazzaniga, Marietta (*b* Voghera, nr Milan, 1824; *d* Milan, 2 Jan 1884). Italian soprano. After her début at Voghera in 1840 as Jane Seymour in *Anna Bolena* and Romeo in *I Capuleti e i Montecchi* she sang in Italian cities, notably in Verdi roles. She created the title role in *Luisa Miller* (1849, Naples) and Lina in *Stiffelio* (1850, Trieste). Verdi claimed in 1852 that he had disliked her in both; he was irritated just then at the failure of *Rigoletto* in Bergamo, which was blamed on her performance as Gilda. She went on nonetheless with such lyric coloratura parts as well as with heroic ones (Norma and Paolina in *Poliuto* at Bologna in 1852). She undertook several North and Central American tours, during the first of which (1857–8) her husband, Count Malaspina, died of smallpox on the voyage to Havana. In New York in 1866–7 an admiring critic reported 'greater purity and less vehement forcing of tone'. She went on singing in the Americas each year until 1870; by then she had exchanged her old part of Leonora in *Il trovatore* for the lower-lying part of Azucena.

JOHN ROSSELLI

Gazzelloni, Severino (*b* Roccasecca, Frosinone, 5 Jan 1919; *d* Camino, 21 Nov 1992). Italian flautist. He studied at the Accademia di S Cecilia in Rome, gaining his diploma in 1942 and making his début there in 1945. He quickly became a teacher at the conservatory in Pesaro and first flautist of the Rome RAI SO. With a catholic musical taste, he showed great affection for Baroque music, particularly Bach's sonatas and Vivaldi's Concertos op.10, which he recorded and which he played with a beautiful full tone, impeccable phrasing and astonishing articulation. He was even more renowned for his performances of avant-garde works, many of which were composed for him. Notable among these are *Interpolation* by Haubenstock-Ramati, *Hi-kyò* by Kazuo Fukushima, Serenata no.2 by Maderna, and *Quanti* by Hans Ulrich Lehmann. These works formed part of his recorded repertory, which also included superb performances in *Le marteau sans maître* by Boulez, Berio's *Serenata I* and Nono's *Y su sangre ya viene cantando*. Because of his great virtuosity in this music and obvious sympathy with its style, he enlightened composers in the possibilities of the new developments in flute techniques with which some leading composers had been experimenting. Gazzelloni, one of the outstanding players of his generation, also gave international masterclasses throughout Europe.

NIALL O'LOUGHLIN

Gdańsk (Ger. Danzig). City in Poland on the Baltic coast. First mentioned in 997 as 'urbs Gyddanyzc', it was originally a Slavonic settlement, and in the 12th century became the seat of Pomeranian princes subordinated to the Polish crown. In 1308 the town was captured by the Teutonic Knights, and between 1454 and 1793 it was subject to the Polish kings. It was part of Prussia until 1807, a free city dependent on France until 1814, and then part of Germany. A free city once more after 1920, it was annexed by Germany in 1939 and finally returned to Poland after 1945.

1. To 1600. 2. 17th and 18th centuries. 3. From 1800.

1. To 1600. Gregorian chant was sung in many churches and monasteries during the Middle Ages, particularly by the Cistercians at Oliwa (1186), at St Mary's and St Catherine's in the city itself, and in the Dominican church of St Nicholas (1227). Sacred music was also cultivated in schools, and in the 14th century lay clerks contributed to ecclesiastical music; in the 15th century organists and Kantors were appointed. The church of St Mary was built between 1343 and 1502, and became the centre of the city's music. Blasius Lehmann of Budziszyn installed a new organ (1509–11), transferring the previous instrument to another part of the building. In 1522 another organ was installed at the high altar and in 1524 Lehmann built yet another instrument (the fifth in the church) over the chapel of St Rajnold. A further organ was built in 1585 by Antonius Friese; this fine 60-rank instrument survived several modifications until it was destroyed in World War II. There were also organs in the churches of St Catherine and St Nicholas by the middle of the 15th century, and at other churches by the end of the 16th. In the first half of the 16th century the Reformation reached Gdańsk; several churches remained Catholic, while both Catholic and Protestant services were held in St Mary's until 1572 when it became wholly Protestant. Church music was instrumentally accompanied in St Mary's as early as the mid-16th century, and the Kantor was also a teacher at the attached choir school.

The earliest records of the city's musicians' guild date from the late 14th century. The guild's apprenticeship lasted seven years, and members enjoyed many privileges; however, itinerant minstrels were permitted to perform in the town for a maximum of two weeks, and were even invited to play at the Dwór Artusa (Ger. Artushof). The municipal trumpeters formed an independent guild; they played from the towers of St Mary's, St Catherine's and St Peter's. In the second half of the 16th century the town council formed a city band (Kapelle), combining its four permanent instrumentalists (who had been employed since the early 15th century) with the singers and instrumentalists of St Mary's. The city Kapelle was conducted by the organist of St Mary's, who became the most influential figure in the city's musical life. Outstanding Kapellmeister in the 16th century who were also

Interior of the Dwór Artusa, Gdańsk, 1476–81: engraving by Johann Carl Schultz, 19th century

composers were the Netherlanders Franziscus de Rivulo (1560–66) and Johannes Wanning (1569–99); Piotr Druziński, organist at the church of St Barbara from 1586 to 1603, was also a fine composer. In 1593 a balcony with a positive organ was constructed at the Dwór Artusa for the Kapelle, which performed there alternately with guild members.

2. 17TH AND 18TH CENTURIES. Musical life remained concentrated at St Mary's, whose many outstanding musicians and composers were also members of the city Kapelle, taking part in performances at the Dwór Artusa; the same man was customarily Kapellmeister of both church and city. Nikolaus Zangius (1599–1602) and Andrzej Hakenberger (1608–27), both used the Venetian polychoral style in their compositions. Gregor Schnitzkius, employed by St Mary's School, had a great interest in didactic music, as is shown by his *Musices praecepta* (1619). Paul Siefert, born in Gdańsk, won a scholarship from the city council to study with Sweelinck in Amsterdam; after short stays in Königsberg and Warsaw he returned to Gdańsk, and became organist of St Mary's from 1623 until his death in 1666. The great antagonist of Siefert was Kaspar Förster the elder, Kapellmeister (1627–52) and bookseller. He engaged in a famous theoretical debate with Siefert and the Polish court *maestro di cappella* Marco Scacchi, a debate which started with the criticism of Siefert's first volume of psalms (Gdańsk, 1640), published by Scacchi in his *Cribrum musicum* (Venice, 1643). His son Kaspar Förster the younger was a pupil of Carissimi in Rome, singer at the Polish court, *maestro di cappella* at the Danish court and composer of sonatas, church concertos and dramatic dialogues in the new style. He was Kapellmeister of St Mary's only from 1655 to 1657, but under him music in the city reached a peak. Afterwards the Kapelle declined, despite the numerous petitions to the council of Förster's successor Balthasar Erben (1658–86), a pupil of Froberger. Johann Valentin Meder was his successor as Kapellmeister (1687–99) and Henry Doebelius, grandson of Siefert, was organist from 1673 to 1693.

In the 17th century most Gdańsk churches had musical establishments which attempted to compete with those of the city and St Mary's. At St John's the post of organist was held from 1643 to 1666 by Ewaldt Hintz, also a pupil of Froberger, and St Catherine's had several outstanding Kantors, including Christoph Werner (1646–50) and Crato Bütner, composers of music in the *seconda pratica*. Thomas Strutz, organist at Holy Trinity (1642–68) and St Mary's (1668–78), composed sonatas, sacred songs and chorale cantatas, as well as passions and oratorios of which only the texts (in German) survive. Vocal music with organ only was cultivated at the Catholic church of St Bartholomew. Testimony to an interest in music in the new Italian style is offered by manuscripts copied by Gdańsk musicians and containing

a lot of fine Italian and German works, and also by the compositions of Gdańsk composers or Polish court musicians. Most such collections, which belonged to the churches of St John, St Catherine (copies prepared by Bütner) and St Bartholomew, were lost during World War II.

Chamber music was also cultivated in the 17th century. The most prominent musicians were related to the city Kapelle and included the English viol player Valentine Flood (1634–6), the Italian violinist Carlo Farina (1636–7), the lutenists Esias Reusner and Paweł Roszkowicz, and the composer and guildmaster Martin Gremboszewski (1626–55). The first opera was staged in 1646, when the city Kapelle assisted the Warsaw court ensemble in *Le nozze d'Amore e di Psiche* for the arrival of Louise Maria Gonzaga, the second wife of the Polish king Władysław IV Vasa. The libretto was by Virgilio Puccitelli, and the music was prepared at the Polish court, probably by Scacchi, possibly with contributions by other royal musicians. In 1695 J.V. Meder performed his *Nero*, the first German opera heard in Gdańsk; the city council was not keen to support him, however, and forbade the performance of his *Die wiederverehligte Coelia* (1698), which he was forced to take to the nearby town of Schottland.

In the 18th century the standards of Gdańsk church music declined, and with worsening economic conditions the city ceased to be an attractive place of work. The organ gradually became the only instrument used in churches. The city Kapelle and the Kapelle of St Mary's were led by Maximilian Dietrich and Johann Balthasar Freisslich (1699–1731 and 1731–64 respectively), Friedrich Christian Möhrheim (1764–1780), Georg Simon Löhlein (1780–1782) and Beniamin Gotthold Siewert (1782–1811), after whose death the post was combined with that of organist at St Mary's under the title Musikdirektor. In 1818 the city Kapelle ceased to exist.

During this period the other church ensembles were dissolved, firstly that of Holy Trinity (1750) and subsequently those of St Catherine (1788), St Bartholomew (1796) and St John (1826). Yet several fine organs were installed during the 18th century; notable composers for the instrument were Daniel Magnus Gronau (at St Mary's 1712–17) and Tobias Volckmar (St Catherine's 1717–30). The musicians' guild ceased its activities during the 18th century; church and civic music was increasingly replaced by public concerts, initiated in 1740 by the organist Jean Du Grain and centred on the city Kapelle. These concerts often featured travelling virtuosos, including Farinelli (1765) and Georg Joseph Vogler (1782 and 1789).

3. FROM 1800. A large number of both secular and ecclesiastical music societies were formed during the 19th century. Oratorios were performed by the Singakademie (founded by T.F. Kniewel in 1818), which was particularly outstanding under F.W. Markull, organist of St Mary's from 1836 to 1858, and Georg Schumann (1890–96). Other choral societies included the Freunde der Singkunst and the Gesangverein zu Danzig (both 1817). Polish choirs were also formed later in the century, including the Jedność society (1884) and the Lutnia choir (1896). The Danziger Theater was built in 1801, and operas, operettas and, less frequently, symphony concerts were given there. Richard Genée was the son of a bass at the theatre, and held the post of Theaterkapellmeister, as did Felix Weingartner from 1885 to 1887. From 1879 Carl Fuchs was an important figure in the city's musical life; he was active as pianist, conductor, organist, writer and critic. Music schools were established early in the 19th century by C.A. Reichel and C.F. Ilgner, and in 1899 a conservatory was founded by Ludwig Heidingsfeld, becoming the Westpreussisches und Riemann-Konservatorium in 1906.

During the insecure interwar period four German music schools and a single Polish academy of music (1929) were active. Many Polish choirs were founded, particularly as a result of the Polish choral festivals held after 1921. Concerts were sponsored by the Polish Society of Music (1925); orchestras included those of the Polish Society of Music (1925–33) and the Polish Catholic Youth Association (1933–9). Music was also taught at all levels in schools. The theatre continued to be run by Germans, and was rebuilt in 1935–6; the theatre orchestra also gave symphony concerts as the Danziger Landesorchester. From 1929 operas were also performed in the open air at the resort of Sopot, including Wagner's *Ring* in 1939.

Although Gdańsk was badly damaged during World War II, concert life and music education revived relatively rapidly after 1945. Polish Radio began broadcasts in that year, and offered support to young musicians, amateur groups and choral societies; organ music was broadcast from Oliwa. The Baltic PO was founded in 1945 under exceptionally unfavourable conditions and was run by the Gdańsk Music Society until 1949, when it was nationalized. However, in the same year an opera studio was founded; this had an adverse effect on the orchestra, reducing the number of its performances to two, and later one, monthly. The situation improved in 1961–2 when attempts to broaden its repertory were made; the orchestra's activities expanded to include chamber concerts and solo recitals, school concerts, jazz and, from 1964, festivals of young musicians. The first postwar opera performance was of Moniuszko's *Halka* (1949), experimentally prepared by Iwo Gall. The first performance by the Philharmonic Opera Studio took place in 1950; at first Romantic works prevailed, but under the directorship of Kazimierz Wiłkomirski (1952–5) Classical and contemporary works were introduced. A particularly outstanding aspect of Gdańsk's musical life has been its ballet (managed by Janina Jarzynówna), which performed its first complete programme in 1952. In 1961 the opera, under Jerzy Katlewicz, resumed the practice of open-air performances at Sopot.

Ensembles active in the city include the Baltic PO (1975) and Baltic State Opera, the Capella Gedanensis and the Schola Cantorum Gedanensis (1978). The Gdańsk Institute of Music was founded in 1945; it was followed by the State High School of Music (1947), renamed the Stanisław Moniuszko Academy of Music, as well as secondary and elementary schools of music. There are periodic music festivals, meetings and competitions, such as the International Festival of Organ Music at Oliwa Cathedral, the Gdańsk Meetings of Young Composers (1987), the Meetings of Guitarists International (1985), the Baltic Opera Meetings (1984) and the International J.P. Sweelinck Organ Competition.

PAWEŁ PODEJKO, BARBARA PRZYBYSZEWSKA-JARMINSKA

Ge, Gangru (*b* Shanghai, 8 July 1954). Chinese-American composer and violinist. He received degrees in violin performance (1978) and composition (1981) from the Shanghai Conservatory, where he later taught composition (1981–3). After emigrating to the USA, he completed the DMA in composition (1991) at Columbia University. His principal teachers included Chen Gang, Alexander Goehr, Chou Wen-chung and Mario Davidovsky. Among his honours are commissions and awards from Lincoln Center and ASCAP; his works have been performed by the New York, Tokyo and Hong Kong Philharmonic Orchestras, the BBC SO and the American Composers Orchestra.

Ge has been called the first Chinese avant-garde composer. *Yi feng* (1982), his controversial work for unaccompanied cello, employed unorthodox methods of sound production and notation at a time when China was largely unfamiliar with 20th-century Western music. The cello strings, tuned in 4ths an octave below normal pitch, are bowed and plucked in unconventional ways and the body of the instrument is struck to produce timbres simulating Chinese percussive instruments. Rhythmic and polyphonic complexity contribute to the difficulty of the work. In *Gu yue* ('Ancient Music', 1986), a piano evokes the sounds of traditional Chinese instruments, the four sections of the work referring successively to the gong, *qin*, *pipa* and drum. The piano concerto *Wu* (1991) explores a wide range of non-traditional piano techniques, while blending piano and orchestral timbres in a panaroma of tone colours. Ge has explained that 'while in Western music, composers are deeply concerned with the relationships between pitches, in Chinese music what is important is the particular pitch and its microtonal and timbral character'. *Chinese Rhapsody* (1993), which uses major and minor modes, fugue and melodic fragments, is more familiar to the Western ear, although its sliding string figures and accelerated rhythms allude to Chinese influence.

WORKS
(*selective list*)

Dramatic: A Great Wall (film score), synth, pf, perc, 1986; Today with Dragon (dance score), fl, cl, tpt, trbn, perc, vn, db, 1986; Who Killed Vincent Chin? WEIHUA ZHANG

Geary, Thomas Augustine [Timothy] (*b* Dublin, 1775; *d* Dublin, Nov 1801). Irish composer and keyboard player. He assumed the names Thomas Augustine for professional purposes, presumably as a tribute to Arne. In Warburton, Whitelaw and Walsh's *History of the City of Dublin* (London, 1818) it is stated that 'labouring under some depression of mind he rushed out of the house, and was found drowned in the canal'. His premature death undoubtedly robbed Irish music of a sensitive and promising talent. There is no evidence for the assertion by Flood that he either entered or graduated at Trinity College.

His precocious talent was publicly recognized by the award of the prize of the Amateur Society to 'Timothy Geary of the choir, aged 14' for the six-part glee *With wine that blissful joy bestows*. While still in his teens he acted as assistant organist to Philip Cogan at St Patrick's Cathedral. In 1793 he performed a piano concerto by Dussek at a concert which also featured his canzonet *Soft is the Zephyr's breezy wing*.

Although Geary was the first Irish composer to exploit systematically the form of sets of variations and rondos for the keyboard based on popular airs, for which there was a great demand at the time, it was as a composer of vocal music that he excelled, showing remarkable sensitivity and maturity in word-painting, and an assured mastery of apt keyboard accompaniments. His best work is to be found in a set of ten canzonets dedicated to Mrs Dean Cradock, published by subscription *c*1795, and some of his delicate pastoral songs, such as *Come, gentle Zephyr*, were in popular demand for some time after his death. His four-part anthem *With humble pleasure, Lord* is included in *Melodia sacra* (Dublin, 1814).

BRIAN BOYDELL

Gebauer (i). French family of musicians, apparently of German or Swiss origin.

(1) Michel Joseph Gebauer (*b* La Fère, Aisne, 1763; *d* Dec 1812). Oboist, bandmaster and composer. The son of a military musician, Christian (Jean Chrétien) Gebauer, he entered the royal wind group of the Swiss Guard at Versailles as an oboist in 1777 or 1779 and remained with it until 1781. (His father was a horn player in the group from at least 1767 to 1786). Between 1788 and 1792 he was a viola player in the royal chapel at Versailles,

but his career as a string player was ended by a finger injury. He became a musician of the National Guard in 1791, and played in the orchestra of the Théâtre Français from that year, and probably in that of the Salle Louvois in 1793. From 1794 he was oboist at the Théâtre des Amis de la Patrie. He was a professor at the Paris Conservatoire from its foundation in 1795 until 1800, when economics dictated reductions in the teaching staff. He then became director of music of the Consular (later Imperial) Guard, and composed for his band many marches and *pas redoublés*, which were recognized as models of their kind. Reichardt reported in 1802–3: 'This excellent band ... during the march past, continued to play varied music, some pieces slow and mournful, against which the cavalry trumpets made a bizarre contrast'. Gebauer, who was also an oboist in Napoleon's private chamber ensemble, participated in the French campaigns of 1805, 1806, 1809 and 1812, and as a result of the first three he is said to have imported into France some German improvements to the mechanism of wind instruments and to the organization of bands. He died in the retreat from Moscow. His other compositions include 12 violin duos op.10 (Paris, *c*1790), clarinet and violin duos op.12 (Paris, *c*1796), six string quartets, two quartets for flute, clarinet, horn and bassoon, and three quartets for clarinet and strings. Presumably he (rather than his brother) was the composer of the *opéra comique Aimée, ou la fausse apparence* (Pépin, Théatre Montansier, 20 May 1790)

(2) François René Gebauer (*b* Versailles, 15 March 1773; *d* Paris, 28 July 1845). Bassoonist and composer, brother of (1) Michel Joseph Gebauer. He studied with his elder brother and Devienne. Before the Revolution (from 1788) he was a member of the band of the Swiss Guard at Versailles, and in 1790 entered the band of the National Guard. He was bassoonist in the Théâtre Français in 1791–2, possibly played in the orchestra of the Salle Louvois in 1793 and was listed in the orchestra of the Théâtre des Amis de la Patrie in 1794. By 1799 or 1800 he had joined the orchestra of the Opéra, where he remained until 1826. He also played in the imperial chapel orchestra, retaining his place under the Bourbon restoration until the chapel's closure in the upheavals of 1830. His playing was particularly noted for its beauty of tone. He was professor of bassoon at the Conservatoire from 1795 until about 1802, and again from 1824 to 1838. According to Pierre (1900) he was made an honorary professor in 1816. His compositions include 13 bassoon concertos, eight symphonies concertantes, wind quintets, quartets for two clarinets, horn and bassoon op.10 (Paris, 1795), for flute, clarinet, horn and bassoon op.20 (Paris, *c*1799), trios for clarinet, bassoon and horn (Paris, *c*1799, *c*1804), trios for clarinet or oboe, flute and bassoon opp.29 and 32 (Milan, *c*1806), six clarinet duos opp.20 (sic) and 21 (Paris, 1794–5), duos for clarinet and bassoon op.8 (Paris, *c*1796), and three duos for clarinet or oboe and bassoon op.22 (Paris, *c*1819), as well as many solos and arrangements for wind instruments, especially the bassoon. He also published a bassoon method (*c*1820).

(3) Pierre Paul Gebauer (*b* Versailles, ?1775; *d* Paris). Horn player, brother of (1) Michel Joseph Gebauer. The parish registers of Versailles mention the baptism of Pierre Philippe Gebauer (*b* Versailles, 1 Jan 1770), brother of Michel Joseph; this may be a reference to Pierre Paul. He was employed for a time at the Théâtre du Vaudeville in Paris, and also played at the Théâtre Français in 1800–01. His playing was noted for its accuracy. Although he died young he published a set of 20 horn duets.

(4) Etienne Jean François Gebauer (*b* Versailles, 7 March 1776; *d* Paris, 1823). Flautist and composer, brother of (1) Michel Joseph Gebauer. He studied with his eldest brother and Hugot. He was attached to the consular Guard and entered the orchestra of the Opéra-Comique in 1801 as second flute. He was first flute from 1813 until his retirement at the end of 1822. He made numerous skilful arrangements of operatic excerpts for instrumental duet, as well as composing more than 100 pieces for solo flute. His son, Michel Joseph Gebauer (*fl* early 19th century), was a noted viola player who published six duos for violin and viola and a viola method (Paris, 1820).

DAVID CHARLTON/HERVÉ AUDÉON

Gebauer (ii). Romanian firm of music publishers. It was founded as a music shop and publishing firm in Bucharest in 1859 by Alexis Gebauer (1815–89), a pupil of Liszt and Sechter, who published mostly Romanian folklore collections, transcriptions and opera librettos. After 1880 the firm was run by his son Constantin Gebauer (*b* Bucharest, 18 Oct 1846; *d* Bucharest, 9 March 1920) and subsequently by N.I. Eliad, Jean Feder and Georg Degen. Under Constantin Gebauer, an enthusiastic supporter of Romanian musical life, it developed considerably, publishing exquisite editions of the standard repertory as well as the central repertory of Romanian music; Gebauer was awarded the Silver Medal at the 1900 Paris Exposition Universelle. After 1886 he became chief editor of the musical magazine *Doina*. In 1899 he transferred the shop, which dealt in instruments and scores, to Jean Feder, licensing him to print new Romanian music in 1905. For almost half a century Feder (1869–1941), himself an editor, supported Romanian art and folk music by his publishing activity, also issuing Romanian teaching manuals and international music literature. He published the *Revista muzicală şi teatrală* (1904–8) and the *Revista instrumentelor muzicale şi a maşinilor vorbitoare* ('Musical instruments and mechanical reproduction review', 1905–8). Feder paid particular attention to classical and contemporary Romanian chamber music, publishing works by Constantin Dimitrescu, Emil Monţia, G.A. Dinicu and others. The firm ceased activity in 1945.

VIOREL COSMA

Gebauer, Franz Xaver (*b* Eckersdorf, nr Glatz [now Kłodzko], Silesia, 1784; *d* Vienna, 13 Dec 1822). German organist, conductor and composer. After studying with his father, he became organist at Frankenstein (1804). In 1810 he went to Vienna, where he made a reputation as a cellist and piano teacher, also becoming known for his reed organ playing. In 1816 he became choirmaster of the Augustinerkirche, an appointment which prompted Franz Oliva's comment to Beethoven, 'Since Gebauer has taken over, the music at the Augustin has improved very much and now the best church music is there'.

Gebauer was one of the earliest members of the Gesellschaft der Musikfreunde as well as founder and first conductor of the Spirituel-Concerte (1819), held at the Hotel Zur Mehlgrabe in the Neue Markt. The idea of these concerts (which lasted until 1848) was to enlarge the choir rehearsals into meetings of music lovers, at which a symphony as well as the choral work for the next feast day was rehearsed. Although inevitably erratic in standard of performance, the meetings were more selective in programme than the Gesellschaft: in the 18 concerts of the first season the works included Beethoven's first four symphonies and Mass in C, in the second, Beethoven's Fifth, Seventh and Eighth Symphonies and *Christus am Ölberge*. Ignaz von Mosel deplored the performance of 'only symphonies and choruses excluding all virtuoso music and bravura singing' (*Allgemeine musikalische Zeitung*, 5 April 1820). Beethoven, who had to write Gebauer a sharp note demanding the return of the *Prometheus* score, referred to him as 'Geh' Bauer' or 'Der Bauer' (the peasant). His compositions include choral works (among them a *Tantum ergo*) and songs.

C.F. POHL/JOHN WARRACK

Gebauer, Johan Christian (*b* Copenhagen, 6 Dec 1808; *d* Copenhagen, 24 Jan 1884). Danish composer and organist. He studied with Kuhlau (1826–8) and later with C.E.F. Weyse, P.C. Krossing and J.P.E. Hartmann. Soon becoming well known as a teacher of piano and of music theory, he was appointed to teach harmony at the Copenhagen Conservatory from its founding in 1868 until September 1883. From 1848 until his death he was also an organist in Copenhagen, first at St Petri, and from 1859 at the Helligåndskirke. He composed about 40 hymn tunes, some of which are still in use; in his essay 'Om menighedssangen' ('Concerning congregational singing', published posthumously in N.K. Madsen-Stensgaard's chorale book, 1891), he criticized the growing use of unsuitable or poor hymn tunes, and his opinions may have influenced the reforming activities of his pupil Thomas Laub.

Gebauer is remembered chiefly as a song composer. His romances seem to have been influenced by those of Weyse and especially Kuhlau; in particular their plain, yet expressive melodic style makes them notable mid-century representatives of the folk music ideals of J.A.P. Schulz. Even more important are his children's songs (published in collections from 1844), of which several are familiar to every Danish child; owing to their graceful and uncomplicated tunes and harmonic style, they hold a unique position in Danish music.

TORBEN SCHOUSBOE

Gebel. German family of organists and composers.

(1) Georg Gebel (i) (*b* Breslau [now Wrocław], 1685; *d* Breslau, *c*1750). His autobiography in Mattheson records most of the known facts about his life. His father (also Georg Gebel), a musketeer in Breslau, apprenticed his son as a tailor at the age of 14. However, at 18 Gebel turned to music as a career, beginning lessons with Franz Tiburtius Winckler, a Viennese organist employed at both the cathedral and the Heilige Kreuz church in Breslau. In 1709 he became organist at the parish church in Brieg (now Brzeg) while continuing his musical studies with the Kapellmeister at Gotha, G.H. Stöltzel, who (Gebel said) gave him valuable instruction in Kuhnau's compositional practice and Johann Theile's rules of counterpoint. In 1713 Gebel returned to Breslau as organist of St Christoph, and a year later also became musical director. He credited himself with a large number of compositions, sacred and secular. Few of his works survive and it is difficult to separate his works from those of his son (2) Georg Gebel (ii). Gebel mentioned in his autobiography that he had constructed a clavichord tuned in quarter tones, an intriguing experiment for his time.

WORKS

Komm mit Jesu, Seel und Sinn (Passion oratorio), chorus, 2 fl, 2 ob, 2 hn, bn, str, b viol, theorbo, vc, bc, *D-Bsb*

Sacred cants., all *Bsb*: Aber der Herr warf unser aller Sünde auf ihn, chorus; Ach dass ich Wasser genug hätte, B, bc; Jesus Christus hat uns geliebet, SATB; Wir gingen alle in der Irre wie die Schafe, SATB, 4 trbn, 2 ob, 2 vn, va, vc, bc; Wir gingen alle in der Irre wie die Schafe, SATB, 3 trbn

Der Herr ist mein Licht, motet, SATB, *LÜh*

1 mass and a ps setting, both for double chorus; 48 chorale variations with interspersed arias; 60 sacred cants.; 24 ps with insts; Passion orat in 7 parts; 24 chorale variations, org/hpd; Grosser musicalischer Schneckenzirkel, kbd; 48 kbd concs., most with wind acc.; 24 large-scale kbd concs.; 24 preludes and fugues, kbd; numerous canons, partitas, chaconnes, arias with variations, all for kbd; numerous secular cants.: cited in Gebel's autobiography (see *MatthesonGEP*), all lost

(2) Georg Gebel (ii) (*b* Brieg [now Brzeg], 25 Oct 1709; *d* Rudolstadt, 24 Sept 1753). Eldest son of (1) Georg Gebel (i) and Anna Barbara (née Opitzin). According to his father, the younger Georg Gebel was a precocious child, learning the harpsichord at the age of three and playing in the homes of Breslau nobility by the age of six. At 11 he went to Oels (now Oleśnica) to play for the aristocracy. While continuing his music studies with his father, Georg entered the Maria Magdalena

Gymnasium, learning French and Italian among other subjects. He began to compose music, including wedding cantatas, and was taught improvisation by the cathedral organist, J.H. Krause. At the age of 16, his father reported, he composed a number of serenades and a German opera. In 1729 he was appointed organist at St Maria Magdalena, wrote music for Catholic monasteries, and directed performances of a visiting Italian opera company. While retaining his position in Breslau he also became Kapellmeister at the court of Oels. At 26 he moved to Warsaw as court composer and harpsichordist to Count Brühl, first minister to the Saxon court. At his employer's request he learnt to play the pantaleon from the inventor of the instrument, Pantaleon Hebenstreit, a popular figure at the Dresden court. After 12 years in the service of Count Brühl at Dresden, Gebel became leader and, in 1750, Kapellmeister at the Rudolstadt court.

WORKS

Partita (G), kbd (Rudolstadt, n.d.)
Jauchzet ihr Himmel (Christmas orat), S, A, T, B, 4vv, 2 tpt, fl, bn, vn, va, bc, *D-SWl*
5 sinfonias (G, G, G, D, D), 2 hn, 2 ob/tpt, 2 vn, va, vc; 4 sonatas (D, b, F, F), 2 vn/fl, bc: all *SWl*
2 sonatas (G, F), 2 fl/vn, bc, 'Georg Gebel', *Bsb*
6 sinfonias, cited in the Breitkopf catalogues; sinfonia, 2 vn, va, b, formerly *DS*: all lost
At least 12 ops incl. Serpillo und Melissa, Dresden, *c*1750, and ops to libs by J.G. Kloss, all perf. in Rudolstadt: Oedipus, 1751; Medea, 1752; Tarquinius Superbus, 1752; Sophonisbe, 1753; Marcus Antonius, 1753: all lost
4 cant. cycles; 2 Passions; more than 100 inst works, incl. sinfonias; ovs.; partitas; kbd, vn, fl, lute, and 6 viol concs.; fl and pantaleon sonatas; trios and duos; kbd works: all lost, see *MatthesonGEP*, Marpurg, Hiller and *BrookB*

(3) Georg Siegmund [Sigmund, Sigismund] **Gebel** (*b* Breslau [now Wrocław], *c*1715; *d* Breslau, 1775). Second son of (1) Georg Gebel (i). He became second organist at St Elisabeth in Breslau in 1736. In 1744 he became second organist at St Maria Magdalena, in 1748 organist at the Dreifaltigkeitskirche, and in 1749 first organist at St Elisabeth, where he remained until 1762. He composed church cantatas and organ pieces, none of them known to survive.

GEORGE J. BUELOW

Gebel [Göbel], **Franz Xaver** (*b* Fürstenau, nr Breslau, 1787; bur. Moscow, 3 May 1843). German composer. A pupil of Vogler and Albrechtsberger, he was also on personal terms with Beethoven. From 1810 he was Kapellmeister at the Leopoldstadt theatre in Vienna, then moved to Pest and Lemberg, and in 1817 to Moscow. There he enjoyed a high reputation as a teacher, composer and pianist (perhaps also as a cellist), and his organization of regular chamber music evenings attracted a wide public. He played a prominent role in the musical life of Moscow in the 1830s through his excellent knowledge of Viennese Classicism, and especially of the works of Beethoven. Glinka became acquainted with Gebel in 1834 and praised the faultless workmanship of his string quartets and quintets, in which Borodin traced Russian influence. The eight quintets show Gebel's melodic gift, able craftsmanship and confident treatment of instruments, as well as a certain preference for the cello, for which he wrote some particularly expressive passages. His output includes four symphonies, an overture, chamber music (eight string quintets, a double quintet, two string quartets and a piano trio), sonatinas, variations and fantasias for piano, a mass, an oratorio and some German songs. His manual on composition was translated into Russian and published in Moscow in 1842.

ERNST STÖCKL

Gebethner & Wolff. Polish bookselling and publishing firm. Gustaw Adolf Gebethner (*b* Warsaw, 3 Jan 1831; *d* Vladikavkaz, 18 Sept 1901) served his apprenticeship at Spiess & Friedlein in Warsaw. There he met Robert Wolff (*b* Zgierz, nr Łódź, 10 Jan 1832; *d* Sopot, 20 Aug 1910), with whom he founded in 1857 a bookshop and publishing house. Initially called Gebethner & Spółka and renamed Gebethner & Wolff in 1860, it became one of the leading bookselling and publishing enterprises in Warsaw. Its first music publication, the piano score of Moniuszko's *Halka*, appeared in 1857; this was followed by other works by Moniuszko and editions of music by many other Polish composers, including an edition of Chopin's collected works, edited by Jan Kleczyński (1882). Gebethner & Wolff also published many educational books, songbooks, manuals and numerous books on music history. They published over 7000 items of music, besides 7010 other titles, in almost 45 million copies. In 1893 they were awarded a gold medal at the World's Columbian Exposition in Chicago. The firm was in the hands of Gebethner's successors until 1939, with numerous branches in Poland and abroad. The firm was nationalized in 1960.

KORNEL MICHAŁOWSKI

Gebhard, Heinrich (*b* Sobernheim, 25 July 1878; *d* North Arlington, NJ, 5 May 1963). American pianist and composer of German birth. He studied the piano with Leschetizky and composition with Heuberger in Vienna (1896–9). After making his début with the Boston SO in 1899, he appeared 35 times with that orchestra in the years 1901–33; he also performed with other leading American orchestras, giving the first performance in the USA of Strauss's *Burleske* and the premières of Frederick Shepherd Converse's *Night and Day*, Loeffler's *A Pagan Poem* and his own Fantasy, a work in two extended movements, with the New York PO (12 November 1925). He was a noted interpreter of Impressionist music. Among his pupils was Bernstein, who wrote an introduction for Gebhard's *The Art of Pedaling* (New York, 1963).

MAURICE GEROW/R. ALLEN LOTT

Gebrauchsmusik (Ger.: 'music for use', 'utility music'). A term adopted in Germany in the early 1920s, first in musicological circles and then in music criticism. Within a decade it had become a slogan with international currency, causing some of those who had initially contributed to its prominence either to distance themselves from it or to abandon it altogether.

The term arose from attempts to challenge, or at least to relativize, its conceptual antonym – musical autonomy. Invariably its use implies, if not actually involves, an opposite term as part of a dualistic system of thought. One of the first writers to employ *Gebrauchsmusik* systematically as one half of a binarism was the musicologist Paul Nettl. In his study of 17th-century dance music he distinguished between *Gebrauchsmusik* and *Vortragsmusik* (1921–2, p.258). By the former term Nettl referred to 'dance pieces that were really danced to', by the latter to 'music without any secondary purpose'. With historical developments in mind, Nettl observed an 'increasing stylization' that attended dance music's emancipation in the cyclical suite of mixed dance forms, a stylization that involved a 'certain removal from popular primordiality [*volkstümliche Ursprünglichkeit*]'. Around the same time Leo Kestenberg, music adviser to the Prussian Ministry of Science, Culture and Education, used *Gebrauchsmusik* to describe 'occasional music' as distinguished from 'concert music'. In making this distinction, Nettl and Kestenberg openly expressed a value judgment soon to be widely shared by musicologists, critics and composers alike. *Gebrauchsmusik*, Kestenberg wrote, 'is artistically as important as, and nowadays materially more promising than, concert music' (1921, p.108). Like other Germans, he was no doubt influenced by parallel developments in France, especially the group of composers known as Les Six.

But it was Heinrich Besseler, in whose work the descriptive and the normative nicely combine, who produced the philosophically most sophisticated account of *Gebrauchsmusik* at the time. An early-music specialist, he had studied philosophy with Martin Heidegger. Beyond a scholarly, historical attempt at understanding earlier musical cultures on their own terms, Besseler also raised general phenomenological questions of the kind posed by Heidegger. In his dissertation on the German suite in the 17th century, Besseler noted that 'the aesthetic access [*Zugangsweise*] to this music is not through listening but through participation, whether through playing, dancing or singing along; in general, through use [*das Gebrauchen*] (*Beiträge zur Stilgeschichte der deutschen Suite im 17. Jahrhundert*, diss., U. of Freiburg, 1923, p.14). Besseler pursued this basic perspective further in his *Habilitationsschrift*, this time focussing on 13th- and 14th-century motets. This music, he stressed, was not 'created for "aesthetic enjoyment"'; nor did it 'concern the "listener" in the usual sense, but rather only believers in prayer and observation' (1925, p.144). In a much-quoted lecture, delivered as part of his dissertation defence, he addressed 'basic questions of musical listening', both from a historical, diachronic perspective and from a systematic one. Acknowledging his debt to Heidegger, he translated his philosophy teacher's fundamental distinction between 'thing' (*Ding*) and 'equipment' (*Zeug*) into specifically musical concepts: 'autonomous music' (*eigenständige Musik*) and 'utility music' (*Gebrauchsmusik*). The first type he associated with concert music, a relatively recent phenomenon, but one which 'for generations has counted as the highest and, as it were, solely legitimate form of performing and listening to music'. With the second type, aesthetic contemplation is secondary or even irrelevant. Invoking Heideggerian terminology, one could say that its mode of existence belongs to the sphere of 'readiness-to-hand' (*Zuhandenheit*), as opposed to 'presentness-at-hand' (*Vorhandenheit*). Besseler defined such music as 'umgangsmässig', something analogous to the vernacular in language (*Umgangssprache*) in the sense of being inseparable from everyday life rather than autonomous. Active participation or involvement is key. The gist of Besseler's theory is encapsulated in this central passage from his lecture (1925, pp.45–6):

> For the individual, *Gebrauchsmusik* constitutes something of equal rank to his other activities, something with which he has dealings in the way he has dealings with things of everyday use, without first having to overcome any distance, that is, without having to adopt an aesthetic attitude. With this in mind we might define the basic characteristic of *Gebrauchsmusik* as something with which we are directly involved [*umgangsmässig*]. All other art . . . in some way stands in contrast to Being as self-sufficient, as autonomous [*eigenständig*].

In later writings Besseler replaced his original binarism with *Darbietungsmusik* ('presentation music') versus *Umgangsmusik* (literally 'ambient music', a term which has unfortunately become synonymous with background music).

Besseler's interest in *Gebrauchsmusik* did not stop with his scholarly work as a music historian; it spilled over into the opinions he held about contemporary trends in composition. Epistemology, aesthetics and cultural politics overlapped. Besseler found himself supporting current efforts to create 'umgangmässige Musik', above all in the work of the German Youth Movement, but also in the cultivation of *Gebrauchsmusik* by composers such as Hindemith, Fortner and Pepping.

Besseler ended the first chapter of his magisterial handbook *Die Musik des Mittelalters und der Renaissance* with an account of the effects of historicism on the present, seeing in the call for 'community music' (*Gemeinschaftsmusik*) the protest of a younger generation against the artistic stance of traditional musical life, against large symphony orchestras and the professional specialization of virtuosos. 'One avoided patriarchal tradition', he wrote in a confessional tone, 'in order to learn from earlier ancestors' (1931, p.21).

Although Hindemith was not responsible for coining the term *Gebrauchsmusik*, as is often asserted, he could maintain in 1930, without too much exaggeration, that he had 'almost completely turned away from concert music in recent years and written, almost without exception, music with pedagogical or social tendencies: for amateurs, for children, for radio, mechanical instruments, etc.' (*Briefe*, ed. D. Rexroth, Frankfurt, 1982,

p.147). One of the principal genres developed to reflect these tendencies was the LEHRSTÜCK. The piece entitled *Lehrstück*, a collaboration between Hindemith and Brecht that established the genre, compromised the composer's autonomy to the extent that the nature of the performing forces was left open. It was thus less a work designed for concert presentation than one which served the learning process of those actively involved. The audience, too, was expected to participate by singing along in the choral sections. Although a secular piece which ironically defamiliarized sacred traditions, it was intended to function in a manner analogous to a sacred cantata in the 18th century.

Recognizing in 1929 that 'the idea of *Gebrauchsmusik* has now established itself in all those camps of modern music that it can reach', Hindemith's contemporary and rival Weill asserted the need for music to be 'useful for society at large'. To this end he and Hindemith collaborated with Brecht on the experimental piece *Der Lindberghflug*, first performed together with *Lehrstück* at the festival of new music in Baden-Baden in 1929. The question of quality, Weill said, was a separate matter, one that determined whether what he was doing could be considered art. 'To have this attitude expressed by a representative of "serious music"', he went on, 'would have been unthinkable a few years ago' ('Die Oper–wohin?', p.68)

The call for socially useful music did not go unchallenged, formulated as it often was in explicitly political terms and as an implicit critique of the Expressionist isolation commonly associated at the time with the Second Viennese School. Schoenberg himself was especially defensive, often construing the reforms proposed by the younger generation of composers as personal attacks (1976).

> One demands New Music for all! *Gebrauchsmusik*! But it transpires that no use can be found for it. . . . And what use? For want of a use, many of the business-like *Gebrauchsmusiker* have become ideal artists. More ideal than those outmoded ones, who may at least hope for success after they die, whereas the involuntary idealists have composed for particular use and have no hope or desire for the future.

No less vitriolic and certainly more extensive were the involved polemics directed against the supporters of *Gebrauchsmusik* by Schoenberg's apologist Theodor W. Adorno. With his characteristic ear for the news of the day, Adorno eagerly took up the term, albeit in a derogatory sense, as early as 1924, and he continued to write critically about *Gebrauchsmusik* for the rest of his life. He began by dismissing the latest music of Hindemith and Stravinsky as 'fiktive Gebrauchsmusik' (1924), music with only apparent utility and little expressive value of the kind he associated with 'absolute music'. By 1932, in his sociological tract 'Zur gesellschaftlichen Lage der Musik', Adorno was using *Gebrauchsmusik* to describe one of four types of contemporary music, the others being 'modern music' (Schoenberg), 'objectivism' (Stravinsky) and 'surrealism' (Weill). He associated *Gebrauchsmusik* above all with Hindemith, whose music he criticized for identifying itself with a fictitious collective. The only use-value of music in capitalist society, he argued, was that of a commodity (in the Marxist sense). Any attempt to restore pre-capitalist immediacy he dismissed as ideology in the sense of 'false consciousness'. As he concluded in *Einleitung in die Musiksoziologie* of 1962, '*Gebrauchsmusik*, is tailor-made for the administered world'.

The idea of *Gebrauchsmusik*, as the work of musicologists such as Besseler illustrates, derives first and foremost from methodological reflection; it does not so much capture the essence of music as reflect a perspective of the scholar or listener. As such, it identifies a philosophical viewpoint, in this case one indebted to phenomenology. The same piece of music can be viewed both in terms of its use-value and in terms of its autonomous features. These two perspectives are not necessarily mutually exclusive. Understood in this way, autonomy must be seen less as an idealistic construct that precludes consideration of social utility than as itself a complex of artistic practices embracing the social, the aesthetic and the theoretical. These three areas overlap. Social autonomy encompasses various aspects of music sociology: the composer's employment status or sources of patronage, the context of musical presentation and the nature of music's social function. Aesthetic autonomy also touches on questions of presentation, on how musical objects are approached, as well as on the status of music as a discrete work, on the kind of criticism and interpretation it attracts, and on matters of musical form. The dimension of theory encompasses questions of formal taxonomy and other structural factors. Historically, it is possible to observe a process of increasing 'autonomization': composers become their own bosses, freed from direct service to institutions and patrons; their musical works are conceived less for specific social occasions, more as discrete works, independent of immediate social function; and the identity of their works, in formal and structural terms, increasingly resists their being subsumed under generic norms. Autonomy and the postulate of originality are closely linked.

One need not subscribe to Adorno's negative dialectics, which posits social relevance in artistic isolation, in order to appreciate one principal point of his critique: namely, that proponents of *Gebrauchsmusik* could not – or rather would not – relinquish certain facets of their autonomy as composers. They remained modern professional composers, with all the aims and aspirations implied by the ultimately irreversible division of labour. The choice, then, was not a simple one between 'autonomy' and 'utility', concepts which insofar as they denote types of music exist merely as abstract constructs. Even 'autonomous' music has its uses. Rather, the call for *Gebrauchsmusik* functioned historically as a corrective to extreme manifestations of autonomy. Composers in the 1920s were rejecting not the hard-won autonomies of Beethoven so much as the extreme isolation of the Schoenberg school.

In different circumstances, on the East Coast of the USA in the early 1950s rather than in 1920s Berlin, Hindemith spoke of his earlier music as though the attendant politics and struggles had never existed. In the preface to his Norton lectures, delivered at Harvard University in 1950, he appeared to take credit for coining the term *Gebrauchsmusik*; at the same time he tried to distance himself from it (1952, p.viii). History has proved him more successful in the former venture than the latter.

> A quarter of a century ago, in a discussion with German choral conductors, I pointed out the danger of an esoteric isolationism in music by using the term *Gebrauchsmusik*. Apart from the ugliness of the word – in German as hideous as its English equivalents workaday music, music for use, utility music, and similar verbal beauties – nobody found anything remarkable in it, since quite obviously music for which no use can be found, that is to say, useless music, is not entitled to public consideration anyway and consequently the *Gebrauch* is taken for granted. . . . [When] I first came to this country, I felt like the sorcerer's apprentice who had become the victim of his

own conjurations: the slogan *Gebrauchsmusik* hit me wherever I went, it had grown to be as abundant, useless, and disturbing as thousands of dandelions in a lawn. Apparently it met perfectly the common desire for a verbal label which classifies objects, persons, and problems, thus exempting anyone from opinions based on knowledge. Up to this day it has been impossible to kill the silly term and the unscrupulous classification that goes with it.

In the period following World War II, not only was the term regarded as 'silly', if not 'useless', but in an age that sought autonomy at all costs, even at the expense of 'public consideration', *Gebrauchsmusik* acquired a pejorative connotation. Thus Stockhausen dismissed his modernist colleague Zimmerman as a 'Gebrauchsmusiker' because he used pre-existing materials rather than generating totally new and original ones. Lack of absolute autonomy became synonymous with a lack of artistic value. The earlier generation in the inter-war years had thought otherwise; it was for them that the term had had its positive, historically significant meaning.

STEPHEN HINTON

Gebrüder Späth. *See* FREIBURGER ORGELBAU.

Gebunden (i) (Ger.: 'fretted'). In a CLAVICHORD said to be fretted (*gebunden*) each string can be struck by more than one tangent. Thus each string produces several different pitches, depending on its point of contact with the tangent.
See also FRET.

Gebunden (ii) (Ger.). *See* LEGATO.

Gebundener Stil (Ger.). A term used to describe 17th- and early 18th-century compositions written in a strict contrapuntal style, such as fugues, ricercares and chorale preludes.
See also STRICT COUNTERPOINT.

Geck, Martin (*b* Witten, Ruhr, 19 March 1936). German musicologist. From 1955 he studied musicology, philosophy and Protestant theology at the universities of Münster and Kiel and the Free University of Berlin, where his teachers included Dräger, Friedrich Blume and Wiora. He took the doctorate at Kiel in 1962 with a dissertation on the vocal music of Buxtehude and the early Pietists. After a period as consultant to Kiel University on Schleswig-Holstein customs (1961–2), he became an editor of the Wagner collected edition in Munich (1966–70).

Since 1970 Geck has been adviser in music education to the publishing house of Ernst Klett in Stuttgart, for whom he edits the Curriculum Musik. In 1975 he completed his *Habilitation* in Dortmund and the following year became professor of musicology at the city's university. He has worked on German music history of the 16th–19th centuries, with particular reference to Buxtehude, Bach, Beethoven, Mendelssohn and Wagner. In his work he seeks to replace traditional methodologies used in historiology with a more modern, critical approach. In 1996 he was appointed director of the Dortmunder Bach-Symposium.

HANS HEINRICH EGGEBRECHT/MATTHIAS BRZOSKA

Gedackt (Ger.). *See under* ORGAN STOP.

Gédalge, André (*b* Paris, 27 Dec 1856; *d* Chessy, 5 Feb 1926). French composer and teacher. He began a career as a bookseller and entered the Paris Conservatoire when he was 28. There he studied composition with Guiraud, won the second Prix de Rome (1885) and remained as an assistant to Guiraud and Massenet. He published a monumental *Traité de la fugue* (Paris, 1901; Eng. trans., 1964), which remains unsurpassed, and in 1905 he was appointed professor of counterpoint and fugue at the Conservatoire. An excellent and highly respected teacher, he taught many of the leading French composers from Schmitt and Ravel to Milhaud and Honegger. His appointment in 1906 as inspector of provincial conservatories brought him into contact with musical education at a lower level, and these experiences produced his *L'enseignement de la musique par l'éducation méthodique de l'oreille* (Paris, 1920). In his music he followed the tradition of Saint-Saëns and Lalo, remaining uninfluenced by the developments of impressionism; his attitude to these is well expressed in the inscription to his Third Symphony (1910): 'sans littérature ni peinture'. His works show, as might be expected, a comprehensive command of counterpoint, but he was also a masterly orchestrator.

ALAIN LOUVIER

Gedda [Ustinoff], **Nicolai (Harry Gustaf)** (*b* Stockholm, 11 July 1925). Swedish tenor. His Russian father was a member of the Kuban Don Cossack Choir and subsequently choirmaster at the Russian Orthodox church in Leipzig; his mother, whose maiden name he adopted professionally, was Swedish. He studied with Carl Martin Oehman, and at the Swedish Royal Academy of Music in Stockholm. In 1951 he made his début at the Swedish Royal Opera in the première of Sutermeister's *Der rote Stiefel*; in the following year he sang there as Chapelou in *Le postillon de Lonjumeau*, to immediate acclaim. He made his début at La Scala as Don Ottavio in 1953 and at the same theatre created the Groom in Orff's *Il trionfo di Afrodite*. In 1954 he sang Huon in *Oberon* at the Paris Opéra, and the next year made his Covent Garden début as the Duke of Mantua in *Rigoletto*. He sang regularly for 22 seasons at the Metropolitan from 1957, the year of his American début (at Pittsburgh as Faust), creating Anatol in Barber's *Vanessa* (1958) and singing Kodana in the first American performance of Menotti's *Le dernier sauvage* (1964). At the 1961 Holland Festival he sang Berlioz's Cellini, a role he repeated at Covent Garden in 1966, 1969 and 1976.

A fine linguist, speaking and singing in seven languages, Gedda commanded the range of vocal and idiomatic style for Cellini, Pfitzner's Palestrina, Tchaikovsky's Hermann, Lohengrin, Faust, Riccardo, Pelléas, Pinkerton and Nemorino (which he sang at Covent Garden in 1981). He continued to sing fluently into his 70s. He was also an accomplished recitalist, his repertory encompassing songs in German, French, Russian and Swedish. His many recordings include his concert repertory and his major roles in both opera and operetta, most notably Dmitry, Lensky, Cellini and Gounod's Faust, which indicate the plaintive yet virile quality of his tone and his sure, instinctive understanding of the style needed for different genres. He published a volume of memoirs, *Gåvan är inte gratis* [The present is not free] (Stockholm, 1978).

HAROLD ROSENTHAL/ALAN BLYTH

Geddes, John Maxwell (*b* Glasgow, 26 May 1941). Scottish composer. He attended the Royal Scottish Academy of Music and Drama (1959–62), and later studied in Copenhagen with Niels Viggo Bentzon (1967). He held various teaching posts in Glasgow and Edinburgh before being appointed lecturer at Notre Dame College, Glasgow (1973–9). He then spent a year as associate professor of music education at Oregon State University (1979–80) before returning to Glasgow to become director of the music diploma at St Andrew's College. He has served on the BBC Scottish Music Advisory panel (1970–75), as chair of the Scottish branch of the Composers' Guild of Great Britain (1976–8) and on the committees of the Scottish Society of Composers (1980–84, 1987–91) and the Scottish Arts Council (1984–6).

Geddes's interest in Scottish traditional music informs a number of his works: *Callanish IV* (1978) for solo cello combines elements derived from Gaelic psalm singing with an individual, thoroughly contemporary musical idiom which replicates in a very different fashion the rhythmic freedom and bold expressivity characteristic of that ancient tradition. His most impressive work, however, has been written for orchestral forces. Clarity of orchestration and tightly-knit musical argument are already hallmarks of his First Symphony (1974–5) and remain evident in three works of the following decade which reflect his abiding interest in astronomy – *Lacuna* (1977), *Ombre* (1984) and *Voyager* (1985). The last of these, with its complex, shifting structures, subtle coloration and densely interwoven textures, was successfully taken up after its Scottish première by orchestras in Poland, Russia and the USA. More recent works include the skilfully crafted *A Caledonian Pageant*, incorporating old Scottish airs, and his Symphony no.3.

KENNY MATHIESON

Gedike [Goedicke], **Aleksandr Fyodorovich** (*b* Moscow, 20 Feb/4 March 1877; *d* Moscow, 9 July 1957). Russian composer and pianist. He studied the piano at the Moscow Conservatory with Galli, Pabst and Safonov. Although he had no formal training in composition, he did benefit from advice on music theory from Konyus, Nikolay M. Ladukhin and Arensky, and was influenced by S.I. Taneyev. He appeared in Russia and abroad as a concert pianist, and in 1909 he was appointed professor of piano at the Moscow Conservatory, where from 1919 he took classes in chamber music and organ. His music is notable for its use of polyphony, and he was regarded as the guardian of strict classical traditions in Russian music.

Geehl, Henry (Ernest) (*b* London, 28 Sept 1881; *d* London, 14 Jan 1961). English composer. After early piano studies in Vienna he was active as a theatre conductor (1902–8). In 1918 he joined the staff of Trinity College of Music, retiring in 1960. Arguably his best known composition was the ballad *For You Alone*, reputedly the first and possibly the only song Caruso ever sang in English: although better than most ballads, his many other songs were less popular.

Geehl's orchestral pieces, suites and individual movements gained some popularity, although they display less individuality than the works of his contemporaries Coates and Haydn Wood. He composed much for brass band and helped Elgar score his *Severn Suite*, which Geehl later arranged as one of his many skilled transcriptions for military band. Of his own original band compositions *Oliver Cromwell* (1923), *On the Cornish Coast* (1924), *Robin Hood* (1936) and *Scena sinfonica* (1952) were all adopted as test pieces at the Open or National brass championships between 1923 and 1952; they are evocative, dramatic and technically demanding. His work is discussed in P.L. Scowcroft: *British Light Music: a Personal Gallery of Twentieth-Century Composers* (London, 1997).

Vocal: The Mountains of Allah (E. Teschmacher), song cycle, 6 songs (1913); many ballads incl. For You Alone (P.J. O'Reilly), 1909

Many partsong arrs., incl. works by Bizet, Brahms, Gounod, Schubert and Tchaikovsky

PHILIP L. SCOWCROFT

Geeres, John (*d* Durham, bur. 4 March 1642). English composer and singer. He was appointed a lay clerk at King's College, Cambridge, in 1623, the same year in which he took the Cambridge MusB degree. He appears to have held this position until 1626, although he is mentioned in the college 'Mundum' books as late as 1628. In that year he moved to Durham Cathedral, where he became a lay clerk. He held this position until his death. Three undistinguished anthems by him are contained in various 17th-century Durham Cathedral manuscripts (now in *GB-DRc* and *Lbl*). One is an eight-part verse

setting of the collect for St John the Evangelist's Day found also in autograph copies in Cambridge (*Cp*). An anonymous five-part setting of the Compline antiphon *In manus tuas* for '3 Tribles' (*Cp*) is in Geeres's hand and is likely to have been composed by him, possibly for his degree. He may have been related to Gabriel Geeres, who was a lay clerk at Christ Church, Oxford, in 1670.

Geerhart. Composer, possibly identifiable with DERRICK GERARDE.

Geerhart [Geerheart], **Jan.** *See* GERARD, JAN.

Geering, Arnold (*b* Basle, 14 May 1902; *d* Vevey, 16 Dec 1982). Swiss musicologist. He studied musicology under Nef, Handschin and Merian at Basle University and received the teaching diploma in singing from the Basle Conservatory in 1925. He took the doctorate with a dissertation on Swiss vocal music during the Reformation and also studied singing with Alfredo Cairati in Zürich, after which he sang professionally. He took a teaching position at the Schola Cantorum Basiliensis (1944–50) and in 1947 he completed his *Habilitation* at Basle University with a study of medieval German polyphony. In 1950 he succeeded Kurth to the chair of musicology at Berne University. He served as secretary to the IMS (1948–51) and director of the Schweizerisches Volksliedarchiv (1949–63). He was made professor emeritus in 1972.

Geering was noted for his studies of the music history and folk music of Switzerland. His dissertation was both a broad survey of the performance of vocal music in 16th-century Switzerland and a detailed study of the three most important Swiss musicians of the period – Bartholomäus Franck, Johannes Wannenmacher and Cosmas Alder. His *Habilitationsschrift* was a significant contribution to the literature of medieval music history, giving for the first time a detailed description of polyphony in the German-speaking countries and correcting the prevailing judgment of it as conservative; at the same time it gave a comprehensive overview of the location of sources. He earned recognition largely through his work on Senfl and his editions for the Gesamtausgabe; Geering was also known for his Calvin studies.

VICTOR RAVIZZA

Geertsom, Jan van (*fl* Rotterdam, mid-17th century). Dutch musician and publisher. He may be related to Géry Ghersem, *maître de chapelle* to Philip II in Spain at the beginning of the 17th century. Archives at Rotterdam show that Geertsom rented a house there from 1665 to 1669; his publications of 1656–7 give his address as 'Rotterdam, in de Meulesteegh'. Four music collections, published between 1656 and 1661, are known. The composers represented are all Italian, including many active in Rome: Abbatini, Carissimi, Stefano Fabri (ii), Gratiani, Marcorelli (= Marco Aurelli) and Tarditi. The volume *Scelta di motetti*, for example, contains (with one exception) motets by composers who held positions at various churches in Rome. Geertsom appears to have had business connections with the firm of PHALÈSE in Antwerp. Not only does his music type bear a distinct resemblance to that of Phalèse, but also 'Mr Jan Gersem' is listed in a 1655 inventory of the Phalèse firm as owing 27 guilders.

PUBLICATIONS

all published in Rotterdam

SUSAN BAIN

Gefors, Hans (Gustaf) (*b* Stockholm, 8 Dec 1952). Swedish composer and teacher. He first wrote rock music in the style of Bob Dylan, before studying composition privately with M. Karkoff. He then abandoned the Royal College of Music in Stockholm and took the diploma in composition with Nørgård in Århus in 1977. Between 1975 and 1981 he lived in Helsingborg and taught at Holstebro Community College in Denmark, after which he worked (1981–8) in Copenhagen as a composer, music critic and the editor of *Dansk Musiktidsskrift*. In 1988 he was appointed professor of composition at the College of Music in Malmö. Since 1993 he has been a member of the Board of the Swedish National Council for Cultural Affairs.

As a composer he has been most successful as a musical dramatist, creating works in a broadly tonal idiom which have melody as the supporting foundation. His made a successful début on a large scale with his opera *Christina*, staged at the Stockholm Opera in 1986; the work was

also broadcast on television and performed at the Mai-Festspiele in Wiesbaden in 1988. His second large opera, *Parken*, for which he wrote the libretto, after Botho Strauss's play *Der Park*, was also a great success at the Mai-Festspiele in 1992. The subject matter, a midsummer celebration in which the rootlessness of the present meets ancient magic, provided an opportunity for refined stylistic allusions.

ROLF HAGLUND

Gegenbewegung (Ger.). Contrary motion. *See* PART-WRITING.

Gegenfuge (Ger.). *See* COUNTER-FUGUE. *See also* INVERSION.

Gehlhaar, Rolf (Rainer) (*b* Breslau [now Wrocław, Poland], 30 Dec 1943). American composer. The son of a German rocket scientist, he emigrated to the USA in 1953, took American citizenship in 1958, and studied philosophy at Yale University (BA 1965) and music at University of California, Berkeley (1965–7). He then moved to Cologne to become Karlheinz Stockhausen's assistant and a member of his ensemble (1967–70). He was a co-founder (in 1969) of the Feedback Studio Verlag, Cologne, a performance centre and later publishing company (1971) devoted to new music. He has lectured at the Ferienkurse für Internationale Neue Musik, Darmstadt (1974, 1976), and at Dartington College of Arts, England (1976–7), and was a founding member of the Electro-Acoustic Music Association of Great Britain (1979). He has also carried out research at IRCAM, which culminated in the first digital reproductions of 'three-dimensional' sounds (1981). He has received several European awards. Gehlhaar's mature works (such as *Tokamak*) reveal an increasing interest in 'structural polyphony'. He has worked equally in acoustic and electro-acoustic music, and since 1979 has used a computer to determine all compositional elements. He employs a wide harmonic spectrum including conventional tonality, microtones, and 'noise'.

Since 1985 he has concentrated on the development and implementation of an interactive computer-controlled music environment called Sound=Space, originally developed as a permanent installation for the National Museum of Science, La Villette, in Paris. This large installation has become a major focus for many different aspects of his work: a resource for the design and development of algorithms for real-time computer-aided composition, as a new instrument for performance of his own live electronic compositions, as a musical environment for dancers and as a musical play/therapy environment for special needs groups. He has established two Sound=Space centres, one in Edinburgh and the other at Musicworks London (Brixton) where workshops in music and movement for special needs groups are carried out on a regular basis.

STEPHEN MONTAGUE

Gehot, Joseph (*b* Brussels, 8 April 1756; *d* USA, after 1795). Flemish violinist, composer and teacher, active in England and the USA. At the age of 11 he was presented to Prince Charles of Lorraine, then staying in Brussels. He was entrusted to the care of Pierre van Maldere, whose early death did not, however, interrupt his apprenticeship; he continued to be supported by Charles of Lorraine until 1780. Gehot seems to have had the job of helping to organize the soirées held at Mariemont, the governor's hunting lodge. According to Fétis, he soon began doing concert tours in Germany and France. The only evidence of his success is the interest taken by publishers in his early works, some of which were printed by more than one publisher. His early tours in England in 1780 were also successful. Gehot seems to have benefited from the protection of the Duke of Pembroke, to whom he dedicated the London edition of his early works. As his reputation grew his works were published in Berlin, as well as London, and his theoretical and practical treatises on the violin, harmony, counterpoint and figured bass were also published.

Gehot played at the Professional Concert and taught the violin at the Opera House, Hanover Square. In the summer of 1792, together with James Hewitt, B. Bergman, William Young and Phillips, Gehot decided to leave London for the United States. The arrival of these musicians caused a great stir in New York, and Gehot scored a veritable triumph at an opening concert on 21 September 1792 with his *Overture in twelve movements, expressive of a voyage from England to America* (now lost), evoking his ocean crossing. With some associates, Gehot launched into a series of concerts but they proved a commercial failure. Taken on by Alexander Reinagle and Thomas Wignell, Gehot left for Philadelphia. There he became a first violinist at the New Theatre from its opening in 1793. After that there is no trace of him and he died, according to John Parker, 'in obscurity and indigent circumstances'.

WORKS

VOCAL

Stage (all perf. London): 2 songs in Shield: The Cobbler of Castlebury (op), CG, 1779; The Maid's Last Shift, or Any Rather than Fail (burletta), Royal Circus, 1787; The Enraged Musician, Royal Grove, 1789; The Marriage by Stratagem, or The Musical Amateur, Royal Grove, 1789; The Royal Naval Review at Plymouth, Royal Grove, 1789; She Would Be a Soldier, Royal Grove, 1789

Other vocal: The Reconsaliation (1v, pf)/fl/vn, in Young's Vocal and Instrumental Musical Miscellany, i (Philadelphia, 1793)

INSTRUMENTAL

all printed works published in London

6 str qts, op.1 (1777); 6 Trios, vn, va, vc, op.2 (?1780); 6 Easy Duettos, vn, vc, op.3 (?1780); 24 Military Pieces, 2 cl, 2 hn, bn, op.4 (?1780); 6 Trios, 2 vn, vc, op.5 (1781); 6 Duettos, 2 vn, op.6 (n.d.); 6 str qts, op.7 (?1788); 6 Duetts, vn, vc, op.9 (?1790); 6 Duetts, vn, tenor (?1790); 5 str qts, *D-Mbs*; Aria, with 30 variations, in A Treatise on the Theory and Practice of Music (1784); others, lost, incl. PHILIPPE VENDRIX

Gehrmans. Swedish firm of music publishers. Carl Gehrman founded the firm in Stockholm in 1893; in 1930 it was sold to Einar Rosenborg, who made it a joint-stock company with himself as main owner and managing director, and in 1950 Inge and Einar Rosenborg's Foundation for Swedish Music took over ownership. Lennart Bagger-Sjöbäck was managing director from 1953 to 1975, when he was succeeded by Kettil Skarby. At first the firm concentrated on popular music, although the standard repertory and Swedish art music were also published. Under Rosenborg's leadership the firm's activities expanded and a comprehensive catalogue of orchestral music was initiated. With the acquisition of Hirsch's Förlag (founded in 1837) in 1943 the art music catalogue was enlarged; it now includes four series of choral music for various voice combinations, chamber and instrumental music. The firm continues to publish popular music, and since the 1950s educational music (e.g. tutors for the recorder, piano, violin, trumpet, clarinet, flute and various ensembles, as well as booklets for compulsory school music education) has been stressed. The main focus of publication during the 1980s and 90s has been on church music, both choral and organ works. Orchestral works, chamber music and solo pieces by composers such as Wilhelm Stenhammar, Hugo Alfvén, Lars-Erik Larsson and Daniel Börtz reflect different epochs of Swedish music published by Gehrmans.

KETTIL SKARBY

Geib. German family of organ builders, piano makers, instrument dealers and music publishers. One branch of the family worked first in England and later in the USA. Johann Georg Geib (i) (*b* Staudernheim an der Nahe, 9 Sept 1739; *d* Frankenthal, 16 April 1818) established his own business around 1760 in St Johann, near Saarbrücken. In 1790 the business was transferred to Frankenthal, and from about 1786 his son Johann Georg (ii) worked in partnership with him. Geib's work was typical of the Middle Rhine school of organ building. Of the 16 instruments that can be attributed to him only six survive: the best-preserved is in the Protestant parish church in Lambrecht.

Johann Georg Geib (ii) (*b* Saarbrücken, 14 June 1772; *d* Frankenthal, 5 March 1849) ran the family business after his father's death, first on his own and then jointly with Josef Littig. Only about nine of his organs can be traced; his work did not attain the same quality as his father's, and the firm ceased after his death.

Ludwig [Louis] Geib (*b* Piestorf, 7 Nov 1759; *d* Schiltigheim, nr Strasbourg, 26 Feb 1827), the nephew of Johann Georg Geib (i), worked in Montbéliard in France

and in Alsace. He is believed to have built about eight organs, as well as some restorations.

John [Johann] Geib (*b* Staudernheim, 27 Feb 1744; *d* Newark, NJ, 30 Oct 1818), the brother of Johann Georg Geib (i), migrated to London, where he claimed to be the first to make 'organized pianos'. His factory finished eight to ten pianos every week, and in all he made about 5400 pianos, as well as church and chamber organs. He is known to have made pianos for the dealers Longman and Broderip. A Geib case (housing a modern organ) survives at St Mary's, Stafford. In 1786 he patented a double action (patent no. 1571) for the square piano (which in a modified form eventually superseded the single action in England and is sometimes described as the grasshopper action), with a buff stop along the treble to facilitate tuning (*see* PIANOFORTE, §1, 4, esp. fig.11). His 1792 patent (no. 1866), on the other hand, enabled players to combine two keyboard instruments by means of two-manual mechanism. On 11 February 1792 he received British denizenship.

On 24 July 1797 Geib sailed with his wife and seven children to New York. In the *Argus: Greenleaf's New Daily Advertiser* for 27 December 1798 he advertised an organ built for the German Lutheran Church in New York. In this work he had been joined by his twin sons, John (1780–1821) and Adam (1780–1849). By 1800 the firm was known as John Geib & Co., and Geib became a leading figure in American organ building of this period. His instruments could be found in New York, Providence, Rhode Island, Salem, Massachusetts, Bethlehem, Pennsylvannia, and Baltimore. In the American *Spectator* for 19 March 1800 the firm advertised their organ for Christ Church, New York, and listed their instruments:

> Church Organs, to any value above a thousand dols.; Chamber Organs, also; Church and Chamber Organs, to play with barrels and fingers, which will be very convenient and can be used by persons who have no knowledge of music; Organized Piano Fortes; Grand and Patent small Piano Fortes; Common Action ditto [i.e. single action]; Pedal Harps, etc.

From *c*1804 until *c*1814 the firm was known as John Geib & Son (this probably refers to the elder of the twins, John Geib jr) and from 1814 their activities included music publishing. The elder John Geib seems to have retired by 1816, and there is no evidence of organ-building activity after this time. Adam Geib joined his twin in the business: they had a piano warehouse at 23 Maiden Lane, New York, where Adam also taught. In 1818, the year of their father's death, a third brother, William (1793–1860), joined the firm, which then became J.A. & W. Geib. Square pianos with this inscription survive, as do instruments marked A. & W. Geib, presumably dating from 1821, when John died. In 1828 William left the business to study medicine, and Adam managed it alone until the following year, when he formed a partnership with his son-in-law Daniel Walker. By this time the firm's activities were devoted largely to publishing, in which they shared engraved plates with the Ditson firm in Boston. In 1843 Walker left the company, and in 1844 Adam's son, William, joined it. Adam retired in 1847. Between 1849 and 1858 the firm's affairs were increasingly supervised by S.T. Gordon, of Hartford, but William Geib remained with the firm and is listed as a piano and music dealer in New York directories until 1872.

MARGARET CRANMER, BARBARA OWEN, W. THOMAS MARROCCO, MARK JACOBS, G. KALESCHKE

Geige (Ger.). Violin or 'fiddle'. In the Middle Ages the term *Geige*, used without qualification, might refer to any bowed string instrument. By about 1500, and perhaps a decade or two before, the term came to be associated with newly emerging types of instruments. By the mid-16th century a distinction was made between the *grosse Geigen* (*viole da gamba*, that is, the viol family), and the *kleine Geigen* (*viole da braccio*, the violin family). In 1619, Praetorius used *Geigen* to mean members of the violin family (he used *Violen* to mean viols); he distinguished the violin as the treble member of the violin family by the term *Discant-Geig* ('treble violin') – or, more exactly, by *rechte Discant-Geig* ('treble violin proper'). The latter term established the meaning precisely in a terminology where *Discant-Geig* might refer not only to the violin proper but also, used loosely, to a small 'violin' (*kleine Discant-Geig*), tuned a 4th higher than the normal violin; it might even be used for a still smaller 'violin' with three strings (rather than four), tuned *g′-d″-a″* – that is, an octave higher than the lower three strings of the regular violin. According to Praetorius, the term *Fiddel* was used as the equivalent of *Geige* among the 'common people'.

DAVID D. BOYDEN

Geigen (Ger.). *See under* ORGAN STOP.

Geigenharz (Ger.). *See* ROSIN.

Geigenwerk. Name (*Geigenwerck*) given by Hans Haiden to an instrument of his own invention, probably the most successful and certainly the most influential of all bowed keyboard instruments. Haiden produced a working example of his instrument by 1575 and an improved version in 1599, for which he received an imperial privilege in 1601. He described this version in a pamphlet, *Musicale instrumentum reformatum* (Nuremberg, n.d., and 1610; Lat. trans. 1605). His account in the latter was quoted in full by Praetorius (1618), who also provided the only surviving picture of the instrument, which resembled a rather bulky harpsichord (see illustration). At various times Haiden used gut or wire strings, with parchment-covered wire strings in the bass. The bowing action was provided by five parchment-covered wheels against which the individual strings (one for each note) could be drawn by the action of the keyboard. These wheels were turned by means of a treadle. Haiden claimed that the instrument was capable of producing all shades

Geigenwerk: woodcut from Praetorius's 'Theatrum instrumentorum' (Wolfenbüttel, 1620)

of loudness, of sustaining notes indefinitely, and of producing vibrato. The principle of a string instrument bowed with a rosined wheel and played with a keyboard is used in the hurdy-gurdy, known throughout Europe since the 12th century. Diaries of Leonardo da Vinci show that he also applied his ingenuity to producing various devices employing bowed strings. Vincenzo Bolcione in Florence produced an instrument in 1608 which played a 'consort of viols' (Davari, 40); this was probably also a Geigenwerk. An instrument made in Spain in the first half of the 17th century, and apparently based on Haiden's writings, is in the Instrument Museum of the Brussels Conservatory. As late as the second decade of the 18th century, there was a *Geigenwerk* in the Medici Collection in Florence, made by David Haiden, Hans's son, and another at Dresden was examined by J.G. Schröter (*see* HAIDEN family, (2) and (4)). Several other inventors also modelled bowed keyboard instruments on Haiden's *Geigenwerk* (*see* SOSTENENTE PIANO, §1).

EDWIN M. RIPIN/DENZIL WRAIGHT

Geijer, Erik Gustaf (*b* Ransäter, 12 Jan 1783; *d* Stockholm, 23 April 1847). Swedish historian, poet and composer. He studied at the University of Uppsala from 1799 to 1806. In 1810 he became a reader in history at the university; he was professor there from 1817 to 1846. One of the most remarkable figures in 19th-century Sweden, he exercised a profound influence on philosophy and theology through his writings; as a member of the Riksdag he was an ardent supporter of liberalism.

Though not a professional musician, he achieved a high standard as a composer of chamber music, vocal quartets and solo songs. He and his friends in Uppsala cultivated a lively interest in old Swedish folksongs, and together with A.A. Afzelius he published the important collection *Svenska folkvisor* (1814–16; Ger. trans., abridged, Leipzig 1857). They also played the music of the Classical composers and discussed the ideas of Romanticism as they applied to music. Geijer's songs, which reveal a rich variety of styles and forms, offer many examples of his work as both a poet and a composer; they were well known in Sweden throughout the 19th century. His instrumental works, undeservedly, received less attention. In many details they reveal not only his intimate knowledge of the music of the Classical composers, above all Mozart and Beethoven, but also the influence of his contemporaries Weber, Mendelssohn and Schumann. They are remarkably modern in their feeling for instrumental and harmonic sonority.

AXEL HELMER/R

Gein, van den. *See* VANDEN GHEYN family.

Geiringer, Karl (Johannes) (*b* Vienna, 26 April 1899; *d* Santa Barbara, CA, 10 Jan 1989). American musicologist. He studied composition with Hans Gál and Richard Stöhr, and musicology with Adler and Wilhelm Fischer in Vienna and with Sachs and Johannes Wolf in Berlin, gaining a PhD at the University of Vienna in 1922 for a dissertation on musical instruments in Renaissance painting. Shortly afterwards he went into music publishing with the Wiener Philharmonischer Verlag. In 1929 he was appointed to the commission of the Denkmäler der Tonkunst in Österreich and added editions of music by Peuerl, Posch and Caldara to the series. He succeeded Mandyczewski as museum curator and librarian of the Gesellschaft der Musikfreunde in 1930. There he was able to devote himself to a wide range of subjects from the 17th, 18th and 19th centuries, the most important outcome being a vivid and still valuable study of Brahms (1935, for which the Gesellschaft's archive was a significant source) and his first study of Haydn (1932).

Following the Nazi invasion of Austria in 1938, Geiringer took his family to London, where he worked for the BBC, wrote numerous articles for the fourth edition of *Grove's Dictionary*, and taught at the RCM. His earlier catalogue of the musical instruments in the Salzburg Museum and his curatorship of the early instruments at the RCM provided the source material for his history of musical instruments, published in 1943.

After one year as visiting professor at Hamilton College, Clinton, New York (1940–41), Geiringer became professor and head of graduate studies in music at Boston University, where he remained for 21 years. This proved to be a very fruitful period: his study of Brahms was revised and enlarged; Haydn was the subject of a full-length study (1946); an extensive study of the Bach family appeared (1954) and was supplemented in the following year by an anthology of the music; and there was a continuous flow of articles, programme notes for the Los Angeles PO (1955–60), editions of music, and committee work for the AMS of which he was elected national president in 1955 and 1956, and an honorary member in 1970. In 1959 he was elected a Fellow of the American Academy of Arts and Sciences, and was subsequently decorated by the Austrian government. In 1962 he moved to Santa Barbara to develop the musicological studies of the University of California's campus. It was in Santa Barbara that he wrote his book on J.S. Bach, and began the university's Series of Early Music with an edition of Isaac Posch's *Harmonia concertans* (1968–72). After retiring in 1972 he was invited to spend a term as visiting professor of humanities at the University of Kentucky at Louisville. He was an honorary member of the American chapter of the Neue Bach-Gesellschaft and of the Österreichische Gesellschaft für Musikwissenschaft.

CECIL HILL/PAULA MORGAN

Geisenhof [Geisenhofer], **Johann** [Hans] (*b* Schongau, *c*1570; *d* probably at Pfullendorf, after 1614). German composer, singer and organist. In about 1585 he was a choirboy in the imperial Hofkapelle in Vienna. After becoming a priest he entered the choir of Konstanz Cathedral as succentor on 25 June 1594 and received a benefice. At the end of 1595 the cathedral chapter threatened to dismiss him on account of his laziness. In order to avert such proceedings he dedicated a motet to the chapter on 27 April 1601 and promised to improve. In 1605 fresh proceedings were apparently brought against him for behaviour not befitting a priest, during the course of which he lost his position and benefice. He then became chaplain and organist of the parish church of the free imperial town of Pfullendorf, where in 1615 he was reprimanded for neglecting his duties. The fact that Bernhard Klingenstein included a composition by him in his *Rosetum Marianum* (RISM 1604[7]) indicates the esteem in which Geisenhof must have been held as a composer; this view is confirmed by the acceptance of an eight-part mass into the repertory of the Bavarian court chapel and its appearance in a choirbook alongside seven masses by Lassus.

WORKS

Missae aliquot sacrae, ad imitationem selectissimarum quarandam cantionum ... adiuncto psalmo Miserere per totum, 6vv (Dillingen, 1610)

Hortus musicus, quem sacris, profanis odis ... instruxit (Munich, 1615), lost
3 motets: 1604[7], 1627[1], 1629[1]
Mass, 8vv, *D-Mbs*; motet, intabulated org, *Mbs*

MANFRED SCHULER

Geiser, Walther (*b* Zofingen, canton of Aargau, 16 May 1897; *d* Oberwil, nr Basle, 6 March 1993). Swiss composer, teacher and string player. He studied the violin with Fritz Hirt and composition with Hermann Suter at the Basle Conservatory. After brief periods of study with Arrigo Serato in Bologna and Bram Eldering in Cologne, Geiser entered Busoni's masterclass in composition at the Akademie der Künste in Berlin (1922–3). In 1924 Geiser was appointed to teach at the Basle Conservatory, where he initially taught violin and ensemble playing and later composition and conducting until his retirement in 1963. For several years he played viola with the Basle String Orchestra and String Quartet and from 1955 to 1972 he was conductor of the Basle Bach Choir. Geiser was also active as a committee member of the Schweizerischer Tonkünstlerverein and as president of the Basle branch of the ISCM. In 1962 he was awarded the composer's prize of the Schweizerischer Tonkünstlerverein.

Geiser's music shows his indebtedness to both the literature and the poetry of the German Romantic tradition and to the classicist teachings of his mentor Busoni. Although influenced early on by the music of the late Romantics (especially Mahler), he quickly took Busoni's lessons to heart, developing a passion for the music of Bach and Mozart which remained undiminished throughout his life. He consequently turned in his own compositions to traditional forms, Baroque elements such as fugue, transparent chamber music textures, simplicity of means and tonal harmony with modal inflections. His chamber works, in particular, develop a classicist *Heiterkeit* that demonstrates Geiser's allegiance to modernist developments in composition between the two world wars. His entire output, however, is marked by the composer's profound ethical stance, sense of responsibility as an artist and belief in classical values.

TAMARA LEVITZ

Geisler, Paul (*b* Stolp [now Słupsk], Pomerania, 10 Aug 1856; *d* Posen [now Poznań], 3 April 1919). German conductor and composer. He studied with his grandfather, conductor at Marienburg (now Malbork), and for a time with Konstantin Decker. He was répétiteur at Leipzig (1881–2), then joined Angelo Neumann's travelling Wagner company (1882–3), before becoming Kapellmeister in Bremen under Anton Seidl (1883–5). He later also worked in Leipzig and Berlin, finally moving to Posen, where he founded a conservatory and conducted symphony and choral concerts. He was made royal Kapellmeister in 1902. Once popular and respected as representative of the New German School, Geisler's music was overshadowed by that of the leading members of the movement and after his death soon fell into neglect. His works include seven operas, *Ingeborg* (1884, Bremen), *Die Ritter von Marienburg* (1891, Hamburg), *Hertha* (1891, Hamburg), *Palm* (1893, Lübeck), *Wir siegen* (1898, Berlin), *Prinzessin Ilse* (1898, Posen) and *Warum?* (1899, Berlin), and a 'dramatic episode with music', *Wikingertod*. He also wrote symphonies, symphonic poems (*Der Rattenfänger von Hameln*, performed with success at Magdeburg in 1880, *Till Eulenspiegel*, *Heinrich von Ofterdingen*), cantatas (*Golgatha*, *Sansara*), songs, and piano music (including *Réminiscences de l'opéra 'Tannhäuser'*). (A. Huch: 'Paul Geisler', *NZM*, Jg.83 (1916), 276–7)

EDWIN EVANS/JOHN WARRACK

Geissenhof, Franz [Franciscus] (*b* Füssen, 15 Sept 1753; *d* Vienna, 2 Jan 1821). Austrian violin maker. Geissenhof holds the same place in the history of Viennese violin making that his contemporary Lupot holds in Paris. Each had comparatively ordinary professional origins, yet raised his art to a very high level, through fine craftsmanship allied to a growing appreciation of the work of Stradivari. Geissenhof went to Vienna to be apprentice and successor to Johann Georg Thir. By about 1790 he had clearly seen the work of Stradivari, but his own instruments remained predominantly Old Viennese, round in the arching, with Germanic scroll and chocolate-brown varnish. By the turn of the century he had progressed a long way, and a few years later was copying Stradivari wholeheartedly. His varnish became less brittle and lighter in colour as the years advanced. Tonally his results were from the first superior to those of his Viennese predecessors. His violas were of small size, and he made very few cellos. Most of his instruments have a brand

'F.G.' on the button at the top of the back. He used the latinized form of his name, Franciscus, on his labels.

CHARLES BEARE/RICHARD BLETSCHACHER

Geissler, Benedict (*fl* 1741–59). German composer. Nothing is known of his life except that he was an Augustinian monk, possibly at the monastery of Trieffenstein, to whose abbot his offertories of 1743 are dedicated.

Geissler's surviving publications show him to have been one of the more versatile composers publishing church music in the 1740s and 50s. By 1740 the simple, tuneful church style suitable for ordinary choirs, which had been popularized by composers such as Rathgeber, was beginning to develop in two directions. Some composers were writing more elaborate music for better equipped town churches, while others were simplifying the style even further for less well equipped village choirs. Geissler was one of the few who managed to use both styles reasonably successfully.

His masses of op.2 are large-scale pieces, typical of the way the former style was developing. The alternation of solo and tutti voices in the same movement, which had been characteristic of the Bavarian church style, had disappeared. The Gloria and Credo are subdivided into several movements, some of which are long and difficult arias, often with elaborate written-out organ accompaniments; much of the choral writing is contrapuntal. The offertory motets which Geissler published in 1743 show a command of both styles. Some are recitatives and arias, with merely a short concluding *alla breve* tutti, but in others the choral writing is more interesting and the solos are shorter and simpler. He was at his best, however, when being most straightforward, in the masses of op.5. These are 'rural' pieces for very small choirs, in which only the soprano, alto, first violin and organ are essential, the other parts being optional. The long sections are through-composed, there are no elaborate solos, and Geissler displays a melodic gift not shown in his more ambitious works.

ELIZABETH ROCHE

Geissler, Fritz (*b* Wurzen, Saxony, 16 Sept 1921; *d* Bad Saarow, 11 Jan 1984). German composer. After playing in dance bands as a young man, he studied at the Musikhochschulen in Leipzig (1948–50) and at the Berlin-Charlottenburg (1951–3). During 1950–51 he played the viola in the Gotha State SO. He went on to teach at Leipzig University, the Musikhochschule Carl Maria von Weber, Dresden (1969–75) and the Leipzig Musikhochschule (from 1974). His numerous awards included the National Prize of the DDR (1970) and membership in the DDR Akademie der Künste (1972).

The most complex and important works in Geissler's substantial output are his symphonies, particularly the third (1965–6) and fifth (1968–9). In these the metamorphosis of a single, central theme effects a dramatic developmental process, in which it is combined with moments of lively, ironic, lyrical and virtuoso music. Elsewhere he made use of dodecaphony, tone clusters, *Klangflächen* and noise. His advocation of such compositional materials during the 1960s and 70s led many in the DDR to consider him a member of the avant garde. His return to tonality in the Ninth Symphony (1979) provoked astonishment and controversy. One of his most successful works is the chamber opera *Der zerbrochene Krug* (1968–9).

FRANK GEISSLER

Geisslerlieder (Ger.: 'flagellant songs'). The name given to a group of sacred songs sung by the flagellants (It. *flagellanti, disciplinati*) of the 13th and 14th centuries during their pilgrimages and acts of penance.

Geisslerlieder are in the vernacular and belong equally to the tradition of the Italian *laude* of the late Middle Ages, and to that of the German pilgrim's song, the one-line invocation and multi-line hymn to a saint. Whereas most of the rest of the popular sacred songs of the Middle Ages are lost because those capable of writing them down did not consider them worth saving for posterity, some at least of the songs of the German flagellants were preserved because the spectacular events connected with them led

several contemporary chroniclers to record them. These events arose in Italy in the middle of the 13th century from the desperate situation in the political, social and moral spheres. Faced with the absence of any power to deal with public suffering or the permanent warfare in town and country (e.g. between the Guelphs and the Ghibellines), hermits and travelling preachers called the world to contemplation and to atonement through penance, so that the individual might be the source of improvement. The movement started in Umbria in 1258; with 'pax et misericordia' as their watchword, organizations of lay brothers (for example, the Disciplinati di Gesù Cristo in Perugia) were formed to perform communal public acts of penance lasting 33½ days in memory of Christ's suffering for the sake of the world, and to spread the movement by making pilgrimages which excited the attention of the masses. At the beginning 'nobiles et mercatores' as well as 'rustici' took part, but as the movement spread further (as far as Poland in 1261) it was increasingly the lower social classes that were involved, although no unified sects were formed, nor was there any overt agitation for social revolution. The personal act of penance, religious in motivation and defined in terms of the Last Judgment, remained at the heart of the manifestations. Every act was subject to a strict ritual and performed in penitential garments, under vows of silence and directed by a 'magister', 'minister' or 'meister'. In Italy 'laudes divinas et incondita carmina' (Bologna, 1260) and 'hymnos in latina vel vulgari lingua' were sung during these acts, but instrumental music and 'amatorie cantilene' were forbidden. The flagellants adopted some of the singing practices of the Laudesi fraternities and enriched the liturgy peculiar to those groups with more sophisticated sacred songs. One of these *laude*, *Chi volo de mondo desprezzare*, has survived with its melody from the 13th century; otherwise the musical settings of these 'canti' or 'buozlieder' from the first eruption of that lay mass movement are lost.

It was the second wave in 1349, spreading over wide areas of Europe like a natural catastrophe in its effect on the entire population, that shocked the priests into noting down the flagellants' penitential songs, linked with events caused by plague and other sufferings, as documents worthy of recording. An immense outbreak, aggravated by the fear that the Last Judgment was imminent, spread on this occasion across the Low Countries as far as Britain and Scandinavia. Large and small processions of penitents formed, chose leaders, confessed their sins and, while singing, with due ritual 'beat themselves most energetically' (Bohemia, 1349). 'Cum canto devoto dulcique melodia' they went from place to place with their message, the singing of the *Leisen* being led by two or three singers (*see* LEISE).

The *Leisen* can be divided into two groups, the songs sung while the flagellants were in procession or on pilgrimage, and those sung during the penances. Some were notated in neumes in the *Chronicon Hugonis sacerdotis de Rutelinga* (1349; *RUS-SPsc* O XIV, 6), a work in hexameters rediscovered in 1880. HUGO SPECHTSHART of Reutlingen was a Swabian priest and teacher, an exceptionally skilled musician and an acutely observant spectator of the processions. His claim to a place in the history of folksong collecting in Germany is that as a conscientious chronicler he was the first to take pains to notate exactly what he heard. He was also the first to notate the variants from strophe to strophe usual in living folksong, so that his record of what was actually sung in the 14th century has a unique documentary value. As he watched the processions, led by banners and crosses, Hugo heard the *cantica Nu ist diu betfart so here* (ex.1),

Maria muoter reiniu meit and *Maria unser vrouwe*. These are old pilgrims' songs, known over a wide area; they survived in the folksong of some Catholic regions until the 17th century. They are characterized by invocations to the Virgin and remembrances of Christ's sufferings, which are linked together by internal and final refrains to form stanzas, like a song.

Such formulae – invocations and recurrent rhyme patterns – are among the traditional components of European folksong that emerge from comparative melodic study of processional and dance-songs, and of songs connected with particular customs collected over a wide area. Like the old pilgrims' songs these too were in general metrically extendable, as the lead singers were allowed latitude to introduce variations within a well-known framework; the recurring refrains sung by the crowd were confined to simple formulae, which seem to have been the nuclei from which longer epic invocations and strophic songs of petition developed in the Middle Ages.

During the flagellation rituals performed in circles outside churches, songs made up on the journeys of flagellation ('in den geiselnfarten') were also sung. The principal song is believed to have been the eight-part 'cancio' *Nu tret her zů der büssen welle*, in which the singing was led by the best singers. During the singing the flagellants walked round and round, flung themselves on the ground, knelt down with raised hands and bemoaned the evil of the world. Parts of this ritual survived in the popular memory after the flagellant processions of 1349 had ceased, and became the object of mockery. In Switzerland in 1350, for instance, people are supposed to have danced to a song of which the original words were:

> Der unserr bůzze welle pflegen,
> Der sol gelten und wider geben.
> Er biht und lass die sunde varn,
> So wil sich got ubr in erbarn.

('Let him who wants to join our penance pay and give again, let him confess and renounce sin, then God will have mercy on him'), substituting the following text:

> Der unser Buss well pflegen
> Der soll Ross und Rinder nehmen,
> Gäns und feiste Swin!
> Damit so gelten wir den Win.

('Let him who wants to join our penance take horse and cattle, geese and fat swine! That's how we shall pay for the wine'). In the Middle Ages the fear of death is often juxtaposed with the lighthearted joy of existence in this manner.

The *Geisslerlieder* are medieval religious folksongs, of which the texts express the particularly urgent needs of the flagellants within a strophic framework characteristic of the genre as a whole, while the melodies are typical of

songs of pilgrimage and petition, which probably formed part of the general repertory of religious songs in the 14th century.

WALTER SALMEN

Geist, Christian (*b* Güstrow, *c*1640; *d* Copenhagen, 27 Sept 1711). German composer and organist, active in Scandinavia. He probably received his early musical education from his father, Joachim Geist, Kantor at the cathedral school in Güstrow. In 1663 he applied for the position of Kantor at Hamburg; although Christoph Bernhard was chosen, Geist's music was commended for its delicate style. He was probably employed by Duke Gustav Adolph of Mecklenburg until 1669, when he first worked temporarily as a bass singer at the Danish court in Copenhagen and then, in June 1670, took a permanent position in Stockholm as a musician at the Swedish court under Gustaf Düben (i). He remained there until June 1679, when he was appointed organist at the German church in Göteborg. Unhappy with the conditions there he moved to Copenhagen in November 1684. There he succeeded J.M. Radeck as organist at the Helligaandskirke and at the Trinitatis Kirke, securing both positions by marrying Radeck's widow Magdalena Sibylla on 1 May 1685. He retained the first of these posts until his death but gave up the second after a few years. From 1689 he was also organist of the Holmens Kirke in succession to Johann Lorentz. He died of the plague along with his third wife and his children.

Virtually all of Geist's surviving works with Latin texts were composed during his years in Stockholm. Most are sacred works intended for court services, but there are some larger works written for royal ceremonies (e.g. *Quis hostis in coelis* and *Domine in virtute*, for the king's accession to the throne in 1672). Geist's Latin works, in the autographs consistently designated *motetto*, are clearly related to contemporary Italian concerted motets. Most of them are in distinct sections, alternating in scoring and texture, including vocal solos in arioso or aria style. Geist's expressive harmonic and melodic style and simple, flowing counterpoint is typically Italian, whereas the occasionally extravagant violin and viol parts bear witness to his German heritage. Geist's Latin pieces are closely related to the music of the Dresden Italians Peranda and Vincenzo Albrici, as well as to the vocal works of Kaspar Förster and Buxtehude. Six of the seven works with German texts stem from Geist's time in Göteborg. In contrast to the Latin works, they belong to typically German Protestant genres, with three chorale settings, three elaborate sacred arias and one concerto with aria (*Die mit Tränen säen*).

KERALA J. SNYDER/LARS BERGLUND

Geistliches Konzert (Ger.: 'sacred concerto'). A term used principally in 17th-century Germany for a sacred vocal work, usually in several sections, setting a biblical text.
See MOTET, §III; CANTATA, §II; CONCERTO, §I, 2(ii).

Gelber, Bruno Leonardo (*b* Buenos Aires, 19 March 1941). Argentine pianist of Austrian and French-Italian origin. He was taught the piano by his mother from the age of three and by Vicente Scaramuzza from the age of five, making his début in Argentina in 1946. At seven he contracted polio and was confined to bed for more than a year, practising on a piano specially mounted over his bed, but the following year was able to give his first radio recital. At 15 he was given a grant to study in Paris, where he became the last pupil of Marguerite Long. A prize at the 1961 Marguerite Long-Jacques Thibaud Piano Competition launched his career, which has taken him to all the world's major music centres. His repertory extends from Bach to Schoenberg, but he is most admired for his interpretations of the great Germanic composers of the 19th century, most notably Beethoven (whose complete piano sonatas he has recorded), Schumann, Brahms and Liszt. He commands a wide tonal palette, which he uses with exemplary discretion, and a powerful sonority untainted by stridency. The finesse of his phrasing and melodic inflection is complemented by an equally impressive grasp of large-scale structures.

JEREMY SIEPMANN

Gelbrun, Artur (*b* Warsaw, 11 July 1913; *d* Tel-Aviv, 23 Dec 1985). Israeli composer and conductor of Polish origin. He graduated with honours in the violin (1935) and conducting (1936) at the Warsaw State Conservatory. Conducting studies continued at the Accademia S Cecilia (with Molinari) and the Accademia Musicale Chigiana, Siena (with Casella); later in Switzerland he studied conducting with Scherchen and composition with Burkhard. Gelbrun played the violin and the viola with the Warsaw PO (1935–7), for Radio Lausanne (1941–4) and with the Zürich Tonhalle Orchestra (1944–8). After emigrating to Israel in 1949 he devoted his time to conducting and composition. He was permanent guest conductor with the Israel RSO (1949–53), chief conductor of the Israel Youth Orchestra (1950–56) and chief conductor of the Inter-Kibbutz SO (1950–55); he was then made professor of composition and conducting at the Academy of Music of the University of Tel-Aviv.

Gelbrun's early output is essentially post-Romantic in style; of his instrumental pieces, his Violin Sonatina (1944) was influenced by Honegger, and the String Trio (1945) by Ravel, while his vocal music contains settings of, among others, Eluard and García Lorca. His *Lieder der Mädchen* (1945), to poetry by Rilke, was given its première in 1947 by the soprano Hilde Richlik and the Vienna SO with Gelbrun conducting. From 1957 on, he adopted, at times, the use of 12-note technique, for example in the Five Caprices (1958), Four Preludes (1959), *Three Prayers* (1959), and in the development sections of Symphony no.2 (1961). He also employed aleatory techniques in the Concerto-Fantasia (1963), and unmetred structures in the oratorio *The Scroll of Fire* (1964) and Symphony no.3 (1973). Of his some 50 Israeli works, 11 are vocal pieces which set biblical texts or Hebrew poetry and are nationalist in sentiment. Other source materials include a Mixolydian ancient hymn in the Woodwind Quintet (1971), a Yemenite folk theme in the Concertino for chamber orchestra (1974) and canticles from *Lamentations* in the Adagio for string orchestra (1974). Among the awards made to him was the Israeli Broadcasting Prize (1973).

YOHANAN BOEHM/NATHAN MISHORI

Gelineau, Joseph (*b* Champs-sur-Layon, Maine et Loire, 31 Oct 1920). French Jesuit liturgical scholar and composer. He studied music at the Ecole César Franck in Paris and theology at Lyon-Fourvière. A member of the Society of Jesus since 1941, he was ordained in 1951 and has been active in liturgical development, both before and after the Second Vatican Council, producing a number of influential books and articles and a stream of liturgical compositions. In Paris he worked with the Centre de Pastorale Liturgique and was professor in liturgical and pastoral music at the Institut Catholique. He co-founded the international church music research group Universa Laus.

At the time of the Second Vatican Council (1962–5) there existed within the Roman Catholic Church two

musical camps, one concerned with the 'pastoral' aspect of liturgical music and the participation of the people, the other focussed on the 'sacred' dimension of traditional chant and polyphony and the idea of 'music-as-art'. Gelineau's writings from this period influenced the pastoral group. From his knowledge of liturgical history and a comparative study of non-Western rites, he argued for a radical review of the place of music in the reformed Catholic liturgy. In *Chant et musique dans le culte chrétien* (1962) he reappropriated the idea of liturgical 'art' music for the purposes of the pastoral camp by speaking of 'functional art', suggesting that the value of liturgical music be judged according to the capacity of such music to fulfil a ritual function. This function, he contended, should determine musical form: for example, when the priest represents God to the people and they respond, the result is dialogue. Thus, if everyone is to participate, only simple, monodic songs, with clear, rational meaning, can be considered strictly liturgical: 'art for art's sake', the esoteric (including wordless 'jubilus', with its sometimes unchristian, even 'magical' resonances) and styles with 'profane' associations are inappropriate within a liturgical context.

Gelineau concluded that the song forms traditionally regarded by the Church as ideally suited to the liturgy had in fact become adulterated over the centuries and that it was necessary to 'restore' their original function as popular chants. He wished, for example, to reintroduce the people's response in the graduals of the Mass. Restricted by the ornate style of Gregorian melodies, however, he developed his own form of responsorial psalmody for the French language that recaptures the poetic structure and imagery of the original Hebrew. This system, with its melodically simple tones designed to express the asymmetrical three- or four-line text structure, has come to be known as 'Gelineau psalmody'; widely adapted for use in other languages (in English as *The Psalms: a New Translation*, London, 1963), it has also been much imitated. In present-day celebrations of the Mass the traditional graduals are usually replaced by a responsorial psalm.

Although the 'pastoral' argument was not accepted *in toto* by the Second Vatican Council, its main principles were overwhelmingly adopted in practice. In Gelineau's later writings, therefore, especially *Demain la liturgie: essai sur l'évolution des assemblées chrétiennes* (1975), a different emphasis is evident. He argued that since the Church's traditional song had been swept away after the Council, new forms must be created, but he recognized that the nature of those forms could be determined only when the Christian Assembly itself had stabilized after a period of flux. From this it may appear that Gelineau was no longer seeking to 'restore' song forms that had been 'altered' in the Middle Ages. However, in 'Liturgical Music: France and Beyond' (1985) he was to question the use of 'everyday' music in worship, and the tendency of each culture to 'homogenize' the rich variety of song forms, which resulted, for example, in a preponderance of responsorial singing in Africa and the use of strophic forms in Europe. He has also expressed regret for such trends as the preference for hymns rather than a restoration of the singing of scriptural and liturgical texts, and the modern division between singing and speaking (see *Demain la liturgie*) that has led to the abandonment of the cantillation of scripture readings and prayers (a matter to which he had earlier devoted considerable attention; see especially *Chant et musique dans le culte chrétien*).

Gelineau's historical theories have found general acceptance among pastoral theologians, but the response of music historians has been mixed. Hucke (1980), following Gelineau, has emphasized the discontinuity of form between early eucharistic psalmody and 'Gregorian' graduals. Jeffery (1992), on the other hand, has rejected the premise that a division exists between 'sacred' and 'pastoral' music: he regards as anachronistic Gelineau's application of the label 'artistic' to 'Gregorian' chant (and draws attention to the links between the chant and 'folk' song); he questions whether responsorial psalmody was in fact the norm in the early Church, whether early singing was necessarily simpler in style than later singing, and whether each chant genre (e.g. introit) was of congregational origin; he is thus sceptical of the view that later chant necessarily represents a radical break from earlier chant.

As a composer, Gelineau is particularly known for his output of psalms and hymns, including *Psaumes* (1953–5, from the Jerusalem Bible) for unison voices and chorus, the well-known *Vingt-quatre psaumes et un cantique* (1953) and *Cinquante-trois psaumes et quatre cantiques* (1954), *Psaumes à quatre voix mixtes I et II* (1958), *Refrains psalmiques* (1963), *Dix hymnes du matin et du soir* (1968) and *Huit cantiques du Nouveau Testament* (1970). He has also written a setting for soloists and four-part choir of the *Cantique des cantiques* (1995), a number of masses, including the Latin *Messe responsoriale* (1953) for choir and congregation and the *Festival Mass* (1974), a liturgy of the Dead, *Qu'ils reposent* (1984–7), for four-part choir and orchestra (1984–7), as well as music in French Mass and Office books (*Missel noté*, 1988; *Le chant des Heures*, 1977–97).

PETER WILTON

Gelinek [Gelineck, Jelínek], **Josef** (*b* Sedlec, nr Sedlčany, 3 Dec 1758; *d* Vienna, 13 April 1825). Czech composer, pianist and piano teacher. He studied music at Sedlec and at the Jesuit college at Svatá Hora, near Příbram. At Prague, where he attended the university, he studied the organ and composition with J.N. Seger, whom he also assisted as organist. In 1783 he entered the Prague general seminary, and in 1786 was ordained priest. According to Dlabač, Gelinek met Mozart during the latter's visit to Prague in 1787, and after successfully improvising on a theme by Mozart in the composer's presence at the house of Count Philipp Kinsky, he was recommended by Mozart to the count. (This episode is not documented in the Mozart literature.) Gelinek went with Kinsky to Vienna (probably as early as 1789 but not later than 1792), where for about 15 years he was a domestic chaplain, piano teacher and tutor for the Kinsky family. He spent the rest of his life as a domestic chaplain to Prince Nikolaus II Esterházy.

After completing his studies in counterpoint with J.G. Albrechtsberger in Vienna, Gelinek became popular as a pianist, composer of variations and music teacher for noble families. In addition to his personal contacts with Mozart and Haydn, he was a friend of the young Beethoven. In about August 1793, after Beethoven's lessons with Haydn proved unsatisfactory, Gelinek introduced him to another teacher, J.B. Schenk. Despite later misunderstandings (see Schenk's memoirs and Tomášek's autobiography), the relationship between Gelinek and Beethoven could not have deteriorated by 1804 (as evidenced by Gelinek's piano reduction of Beethoven's First Symphony) or even as late as 1816 (his variations on the second movement of Beethoven's Seventh Symphony). Mozart's cadenzas K624/626*a* for piano concertos are dedicated to Gelinek, not by the composer but by the publisher Artaria (1801).

Most of Gelinek's works are piano variations based on melodies from stage works (by Gluck, Paisiello, Mozart, Salieri, Méhul, Cherubini, Weigl, Müller, Winter, P. Wranitzky, Gyrowetz, Boieldieu, Rossini, Weber etc.), instrumental compositions (Beethoven's Seventh Symphony, second movement), Viennese folktunes and his own themes. Their execution demands an advanced performer. They show considerable inventiveness and occasionally employ imitative counterpoint. They were appreciated by contemporaries both as agreeable music and for their pedagogical value, but were characterized as being 'without any special inner content' (*AMZ*, iii, 1800–01, col.804). In his variations and original compositions, pre-Romantic emotionalism in the form of chromaticism and a propensity for Beethovenian pathos sometimes occur (e.g. the slow introduction to the first movement of his Piano Trio op.21). Stylistic differences between Beethoven and him are most distinct when both composers wrote variations on the same subject (Beethoven, op.120 and WoO68, 70) or set the same text (WoO133). Gelinek's musicality and pianistic skill are well documented by his excellent transcriptions of Mozart's Quintet in E♭ K614 (1803) and Symphony in G minor K550 (1806), Haydn's String Quartet movement H III:80[1] (1802) and Beethoven's First Symphony (1804).

Most of Gelinek's compositions were printed during his lifetime. Many of the numerous variations, fantasias and potpourris attributed to him are spurious.

WORKS
(*selective list*)

printed works first published in Vienna unless otherwise stated

VARIATIONS

solo piano; thematic catalogue of 120 sets of variations in Proier

[10] on Là ci darem la mano (Mozart: Don Giovanni) (1791); [6] on Seid uns zum zweitenmal willkommen; [8] on Wie stark ist nicht dein Zauberton, [6] on Ein Mädchen oder Weibchen (Mozart: Die Zauberflöte (1792–3); [6] on Nel cor più non mi sento (Paisiello: La molinara) (1796); Andante avec variations (1799); [6] on march (Mozart: Die Zauberflöte) (Offenbach, 1805)
[6] on Ein Mädel und ein Glasel Wein (Müller: Die Schwestern von Prag) (*c*1810); [4] on Ah, perdona (Mozart: La clemenza di Tito) (1810); [8] on pas de deux (Haibel: Le nozze disturbate) (1811); on 2nd movt (Beethoven: Sym. no.7) (1816); on waltz, [6] on hunters' chorus (Weber: Der Freischütz) (1822); [1] on Diabelli's waltz (1824)

OTHER WORKS

Orch: 2 hpd concs., *CZ-KRa*
Over 30 chbr works, incl.: Sonata, hpd/pf (1795); Sonatina, leicht und angenehm, pf, no.2 (1795); Trio, hpd/pf, vn, vc, op.10 (1798), ed. in MVH, vi (1962); Sonate facile, hpd/pf, vn, op.11 (1798); Grand trio, hpd/pf, vn, vc, op.21 (1802); Sonata, pf, vn, vc (1805); Sonata, pf, fl/vn (1810); Rondo, pf (*c*1810); Rondo, avec la pédale nommée la musique turque, pf, no.3 (1812); Rondo, czakan, pf (*c*1813–14); Rondo ou Polonoise favorite, pf (*c*1813–14); Concertante variations, pf, fl/vn (1815); over 30 dances, hpd/pf/(vn, bass); marches, pf; variations, fl solo
Over 40 pf arrs. of works by Beethoven, Giuliani, Hänsel, Haydn, Mayseder, Mozart, Romberg, Viotti etc.
Vocal (1v, pf): Hymne guter Bürger (1799); In questa tomba oscura, arietta (1808); Il passeggio (canzonetta), La partenza, in *XXXIV canzonette o romanzi* (?*c*1808–15); 1 song in *6 deutsche Gedichte* (1815); other songs in collections

MILAN POŠTOLKA

Gellert, Christian Fürchtegott (*b* Hainichen, Saxony, 4 July 1715; *d* Leipzig, 13 Dec 1769). German poet. His studies at Leipzig University were interrupted because of poverty, and not completed until 1743. From 1744 he taught poetry, rhetoric and later moral philosophy at Leipzig. He was the most important figure in the German Enlightenment before Lessing, and his simple, honest fables and songs had a broad appeal. His most important work is probably the novel *Leben der schwedischen Gräfin von G**** (1747–8); he also wrote plays and a quantity of verse, including *Lieder* (1743), *Fabeln und Erzählungen* (1746 and 1748) and the enduringly popular

Geistliche Oden und Lieder (1757), 55 of which were included in C.P.E. Bach's *Herrn Professor Gellerts geistliche Oden und Lieder mit Melodien* (Berlin, 1758; *Anhang*, 1764; WQ194–5). His Singspiel *Das Orakel* (1747) was eventually set by Fleischer and, incompletely, by Hiller. Beethoven's six Gellert songs op.48 (including 'Die Himmel rühmen des Ewigen Ehre'), four Haydn settings of the late 1790s, and songs by Loewe and Tchaikovsky, indicate the wide appeal of his verses to composers.

PETER BRANSCOMBE

Gelmetti, Gianluigi (*b* Rome, 11 Sept 1945). Italian conductor. His first studies were at the Accademia di S Cecilia in Rome, from which he received a diploma in conducting in 1965. Gelmetti also worked with Franco Ferrara (1962–7) and Celibidache, and with Hans Swarowsky in Vienna. In 1980 he was appointed music director at Milan's Orchestra dei Pomeriggi Musicale, and from this period his national reputation developed. It led to his appointment (1982–4) as music director for RAI in Rome, and as music director at the Rome Opera (1984–5). Gelmetti took up the post of principal guest conductor at the Stuttgart RSO in 1987, and was its principal conductor from 1989 to 1995. In 1990 he also assumed the conductorship of the Monte Carlo PO, and held the post for two seasons. Since 1992 he has appeared as a guest conductor at La Scala, La Fenice and other leading European houses, at numerous festivals and with the Berlin PO, Munich PO and Dresden PO, among other orchestras. Gelmetti has developed a reputation as an accomplished Rossinian, as recordings of *Il barbiere di Siviglia* and *La gazza ladra* confirm, and in recent years has been closely associated with Siena's Accademia Musicale Chigiana.

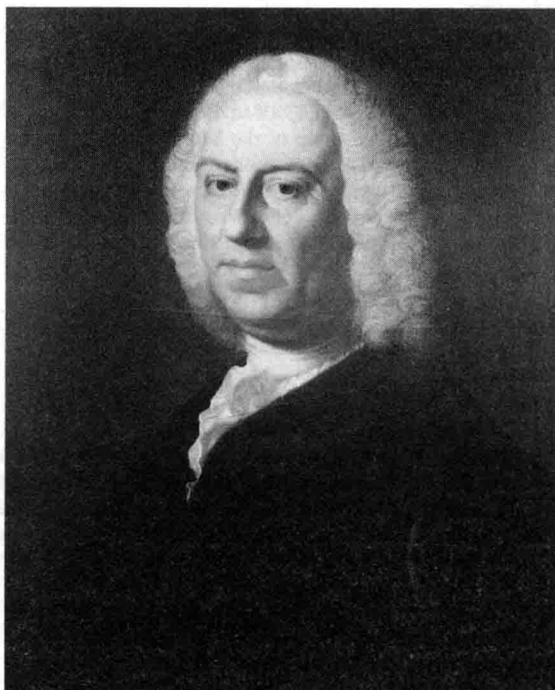
Geminiani, Francesco (Saverio) [Xaviero] (*b* Lucca, bap. 5 Dec 1687; *d* Dublin, 17 Sept 1762). Italian composer, violinist and theorist. His contemporaries in England considered him the equal of Handel and Corelli, but except for the concerti grossi op.3, a few sonatas and the violin treatise, little of his musical and theoretical output is known today. He was, nevertheless, one of the greatest violinists of his time, an original if not a prolific composer and an important theorist.

1. LUCCA, ROME, NAPLES, 1687–1714. Although the exact date is not known, Geminiani was probably born two days before his baptism, on 3 December 1687, the feast day of St Francis Xavier. His father, Giuliano, a violinist in the Cappella Palatina of Lucca, may have been his first violin teacher. Several contemporary sources name Corelli, Alessandro Scarlatti and Carlo Ambrogie Lonati as his teachers. It is still not certain where and when he received his musical training, but we may assume it to have been when he was not in Lucca. His name figures in the register of S Maria Corteorlandini, the parish to which the Geminiani family belonged, between 1691 and 1704. In December 1706, and during the carnival of the following year, he was certainly in Naples: it is evident from a contractual document expiring on 17 March 1707 that he played first violin for a whole season at the Teatro dei Fiorentini. On 27 August 1707 he took over his father's position with the Cappella Palatina and remained there until September 1709.

Thus April 1704 to December 1706 is the period in which Geminiani was most likely a pupil of Corelli and Alessandro Scarlatti in Rome, though his name is not found in archival documents relating to musical activity there. The most plausible explanation for this is that he spent only a short time in Rome; perhaps the presence there of a fair number of highly regarded violinists, such as Giuseppe Valentini, Matteo Fornari, Domenico Ghirladucci, Giuseppe Mellini and Antonio Montanari, persuaded him to try his luck elsewhere. That he was, however, close to Corelli is beyond doubt. In the preface to *A Treatise of Good Taste in the Art of Musick* (1749) Geminiani said that he had the pleasure of discussing with Corelli the latter's 'Follia' (op.5 no.12) 'and heard him acknowledge the Satisfaction he took in composing it, and the Value he set upon it'. We have no knowledge of Geminiani between the end of 1709 and his departure for London, but it is not impossible that he took up his musical studies again, even though the high fees he earned in Lucca suggest that he was already a fully fledged artist. Naples brought humiliation; according to Burney, Geminiani was demoted from first violin to viola because of his inability to play in time, and this was perhaps one of the reasons that prompted the young and promising virtuoso to seek his fortune elsewhere. In 1714 he left Italy, perhaps never to return.

2. FIRST LONDON PERIOD, 1714–32. England was a particularly happy choice. Italian music was familiar all over Europe, but the English devotion to Corelli could not but favour a violinist trained in his school. England offered other advantages too. Violin technique was inferior to that in Italy, and it was not difficult for a pupil of Corelli to make his way as a virtuoso. Nor was there any lack of patrons whose love of Italy, inspired by the

Grand Tour, made them ready to take an Italian artist under their wing. Geminiani dedicated the op.1 sonatas (1716) to Baron Johann Adolf Kielmansegge, his first London patron. According to Hawkins, Kielmansegge favoured the composer by arranging a performance before the king in which Geminiani was accompanied on the harpsichord by Handel. With these sonatas, which clearly stem from Corelli, Geminiani presented himself to the public as Corelli's pupil. To judge by the number of editions and reprintings that followed the Meares edition, they enjoyed considerable success at the time, though Burney maintained that few players were capable of performing them. They must have been in Geminiani's repertory as a virtuoso from the time of his arrival in London, and may have been composed while he was still in Italy. His success was connected also with the performance of some concerti grossi, which were published only some years later as opp.2 and 3 (1732). He was admired principally as a player, even if his public performances were quite rare events. 'Geminiani', wrote Burney, 'was seldom heard in public during his long residence in England. His compositions, scholars, and the presents he received from the great, whenever he could be prevailed upon to play at their houses, were his chief support'.



In 1725 Geminiani was one of the founder-members of the Philo-Musicae et Architecturae Societas, a masonic lodge known as Queen's Head; in confirmation of the distinction he had achieved during his more than ten years in London, he was awarded the office of Perpetual Dictator. The first decision of the lodge was to organize a subscription for printing Geminiani's concerto arrangements of the first six sonatas of Corelli's op.5. We do not know the specific aims of the lodge, but most probably it was a musical society with a masonic rite, rather than a corporate mutual assistance association on the lines of the Congregazione dei Musici di S Cecilia in Rome. The concertos, dedicated to the 'Sacra Maestà di Giorgio, Re della Gran Brettagna, Francia ed Ibernia' and subscribed to by leading members of the English nobility, were published in 1726 and enjoyed considerable success. The Philo-Musicae was not the only society to which Geminiani belonged; his name appears beside those of Giovanni Bononcini and Nicola Haym as one of the first members of the Academy of Vocal Music on 1 March 1726.

In the competition to appoint an organist of St George's Church on 19 November 1725, Geminiani was chosen as an examiner along with the most renowned musicians in London. Thus he was considered an authority in London musical circles even before the publication of the concerti grossi opp.2 and 3. His reputation rested also on his teaching, which, to judge from the number of his pupils alone, must have been one of his principal activities. Many of these achieved fame, including the violinist Matthew Dubourg, the composers Avison, Festing and Carey, the organists and composers Joseph Kelway and John Worgan, the singer Cecilia Young and the publisher Robert Bremner.

In 1728 William Capel, 3rd Earl of Essex, who had been a patron and pupil of Geminiani, offered him the possibility of becoming Master and Composer of the State Music in Ireland, but Geminiani declined since it was incompatible with his Catholic faith. The offer came at a delicate moment in his life. A time of relative stability was coming to an end, a period spent entirely in London, where the composer had enjoyed the highest esteem. He was now about to enter a much more difficult phase, characterized by frequent journeys between London, Paris and Dublin, by often risky commercial and editorial ventures, and by a period of intense musical activity in the wake of his success with the opp.2 and 3 concerti grossi – a success he would never quite match in the future.

At the end of 1731 Geminiani organized a series of 20 concerts in London at Hickford's Room. This was a concert season of the modern kind, lasting five months and run by subscription; the proceeds would help him to publish the concerti grossi the following year. These must have been played there regularly, as must have been the concerto transcriptions of Corelli's op.5, of which the second collection had appeared in 1729. The concerts began on 2 December 1731 and ran until the end of April 1732. On 22 April the *Daily Journal* announced the first Walsh edition of op.3, and on 8 June the *Daily Post* gave notice of the printing of op.2. These two collections of concerti grossi remained in his later years (and are again today) the most commonly performed and highly esteemed of Geminiani's works. Their publication brought his first London period to a close. From this point the composer's fortune went into a gradual and irreversible decline. It is true that his fame remained more or less intact in Europe up to his death, but this rested almost wholly on the fact that his op.3 became a classic, like the op.5 of Corelli and the op.6 of Handel.

3. London, Paris, Dublin, 1732–62. The year 1714 had been decisive in Geminiani's life, for it was then that he left Italy for good. 1732 was even more important, as it represented both the culmination of his fame and the start of his difficulties. Towards the end of this year he went to Paris and stayed there until 20 September 1733.

1. Francesco Geminiani: portrait by an unknown artist, c1735 (Royal College of Music, London)

This can be deduced from letters in the correspondence of William Capel which allow us to follow the composer's movements from Paris to London and then to Ireland. The letters also give us the name of his Irish patron, Charles Moore, Baron of Tullamore. Further, there are hints here for the first time of his activity as an art dealer, which was to become one of his chief occupations. In a letter dated 1 October 1733, sent to Capel from Paris by Thomas Pelham, we read, 'Geminiani went from hence about ten days ago with Ld Tullamore for England. I believe he got just money enough here, with the help of some Pictures, to defray his Expences'.

On 6 December 1733 Geminiani arrived in Dublin to join Moore's retinue, and on 15 December he gave his first public concert there. He opened a concert hall in Dame Street, Spring Gardens, later known as 'Geminiani's Great Room', which he used also for selling pictures. According to Flood, Geminiani gave two concerts in spring 1734 just before returning to London, and in 1737 he again settled in Dublin, where he remained until 1740. It was above all his publishing activities that took him from Dublin to Paris where his presence is documented from November 1740. The first indication is a request for a printing privilege, submitted by the composer in person on 17 November; it was obtained on 31 December. There followed soon afterwards the French editions of the concerti grossi op.3, and in 1743 the *Pièces de clavecin*. Geminiani spent about a year in Paris, time enough for the engraving and printing of his music and perhaps also for acquiring paintings for resale in England.

A letter from G.G. Zamboni in London to Michael Maittaire, dated 31 October 1741, tells us that Geminiani was in the English capital once again. Certainly he was there on 19 March 1742 to give a concert 'by command of their Royal Highnesses the late Prince and Princess of Wales' in the Haymarket Theatre. Shortly afterwards he dedicated to the Prince of Wales the concerto grosso arrangement of his second set of violin sonatas op.4, the original version having been published in 1739. These were years of intense compositional and publishing activity; in addition to the arrangement of op.4, the English edition of the *Pièces de clavecin* and numerous reprintings of earlier works, he had the op.5 cello sonatas in hand and a new collection of concerti grossi, op.7.

On 9 February 1745 Geminiani directed, at the New Theatre in Haymarket, *L'incostanza delusa*, a pasticcio opera which was not a success with the public. Between the acts he performed his new concerti grossi, which were published the following year as op.7. The engraving of the concertos and the op.5 cello sonatas was carried out in the Netherlands, where Geminiani went in 1746. The two new collections did not meet with the success he had hoped for, and from 1748 he devoted himself mainly to theoretical writings. Except for the arrangements of earlier works and the brief digression marked by *The Inchanted Forrest* (see below), his work as a composer was now effectively over.

In April 1750 Geminiani was once again in London to direct a *concerto spirituale* at the Drury Lane Theatre. According to Hawkins, the profits from the concert allowed Geminiani to indulge his passion for travel and to return to Paris. The first indication of this is again a request for a printing privilege, submitted on 7 October 1751. In the same year he was publishing at his own expense his treatise *The Art of Playing on the Violin* (op.9). A third stay in Paris lasted longer than the earlier two. Geminiani was again in the city on 31 March 1754 for the performance at the Théâtre des Tuileries of *La forest enchantée*, a pantomime for which he had written the music. On his return to London he published a concert version, which enjoyed only limited success. In spring 1759 he was back in Ireland, and established himself at Coothill as music master to Charles Coote, later Count of Bellomont. On 3 March 1760 Geminiani appeared in public for the last time at the Great Musick Hall in Fishamble Street. He died two years later, on 17 September 1762, 'at his Lodgings on College-Green', as the *Dublin Gazette* announced the next day. According to Flood, he was buried on 19 September 'in the Churchyard of St. Andrew, near College Green, the Church of the Irish Parliament'.

4. Reception. With few exceptions, contemporary criticism of Geminiani was quite favourable, and not only with regard to his own music. He was credited with having set English musical taste on the right path by encouraging the study and performance of Corelli's music, and with having made an important contribution to the forming of an English school of violinists and composers. The tone is frequently enthusiastic, as for example in the writings of Avison, John Potter and Jean-Adam Serre. Geminiani's name is often placed next to those of Handel and Corelli; even Burney, who was critical of him, wrote in a letter to Thomas Twining on 8 December 1781 that Handel, Geminiani and Corelli had been the only gods of his younger days. It is perhaps in the severe criticisms of Burney, partly anticipated by William Hayes (1753), that we may find the source of the poor esteem in which Geminiani's music is held in our own time. The main points of Burney's criticism were Geminiani's rhythmic and melodic irregularity, the asymmetry of his phrases, and above all 'a confusion in the effect of the whole, from the too great business and dissimilitude of the several parts'. Irregularity, asymmetry and confusion have remained the keywords in a critical tradition that has shown little interest in developing any greater depth of argument. To these has been added the epithet 'conservative', used in Geminiani's case in a pejorative sense. He was a conservative, it was claimed, because he did not contribute to the general renewal of instrumental forms, but remained bound to the Corellian tradition; he did not play any active part in the development of musical language. This charge has often rested on the premise that a work, to be valid, must necessarily be original and contribute something new. In fact, the use of terminology derived from the concept of evolution often tends to simplify what is in essence rather more complex. It would be hard to deny that Geminiani's earliest compositions drew inspiration from Corelli's works, as did those of many other composers of his generation. But Geminiani was also the composer of the cello sonatas op.5, the concerti grossi op.7 and *The Inchanted Forrest*. These works cannot be reduced to any precise model; they are certainly not Corellian.

5. Concertos. Geminiani composed 47 concertos; if we exclude the arrangements of Corelli's opp.1, 3 and 5 and of his own op.4, the number is just 23. In Geminiani's concerti grossi opp.2 and 3 (1732) Corelli is the principal point of reference, but Geminiani also demonstrated a style of his own. The concertos are in four movements on

the model of the Corellian *sonata da chiesa*, which has led critics to dismiss Geminiani as a conservative, as if this structure were itself sufficient grounds for a historical and aesthetic appraisal rather than merely a distinctive aspect of his Roman training. It is true that the concertos contain rhythmic and melodic formulae and harmonic formations that can be clearly linked to his teacher's style. There are, indeed, some genuine quotations: for example, the Adagio that opens op.3 no.3 clearly recalls the Allemande of Corelli's op.5 no.8. But the use of common components of musical language does not necessarily mean that the results are similar. Both in the homophonic movements and in the fugues Geminiani showed little regard for the structural value of themes and subjects. In the former he faithfully adhered to a principle of spontaneous germination, in which the initial phrase has no thematic or 'punctuating' function but is simply the antecedent of the next phrase, which in turn leads to the next, and so on. Similarly, in the fugues the subject rarely returns in full, and is often reduced to its initial notes. There is, however, no lack of unity in the music; the phrases are asymmetrical, but the total effect is far from chaotic. The irregularity of the phrases, and the rhapsodic effect that results from this, are tempered by rhythmic and melodic homogeneity.

Geminiani's concertos are characterized by firm harmonic stability. Modulations are frequent but usually transitory; however, they were perceived as individual and characteristic. 'It is observable', wrote Hawkins, 'upon the works of Geminiani, that his modulations are not only original, but that his harmonies consist of such combinations as were never introduced into music till his time'. It was the variety of transitory modulations that surprised Hawkins, rather than the harmonic organization of the whole movement, which was in itself unoriginal. The perceived novelty was not so much in the choice of new keys as in the way of arriving at them and in preparing the modulations.

Op.7 (1746) resulted from two contrasting tendencies in the composer. On the one hand, Geminiani had in mind a new and original kind of music not tied to the past; on the other hand, he intended to create a model such as Corelli's op.6 had been for half a century. This contradiction is the strongest characteristic of Geminiani's op.7, and was perhaps one cause of its failure. The first tendency may be seen in the third, fourth and sixth concertos, the second in the fugue of the first concerto and in the dedication. A work with claims to classicism could not but be dedicated to the Academy of Ancient Music and presented in terms of the final victory of a tradition firmly rooted in the past. In the sixth concerto 'a 5, 6, 7, 8 Parti reali', the experimental character of op.7 is particularly evident, and it was perhaps the composer's intention to impress the public with novelty. It consists of 14 'movements', varying in length, key, rhythm, form and instrumentation, which for the most part are not separated from each other by double bars.

6. Sonatas. The three principal collections of sonatas shared the same fate as the concerti grossi; they were reworked, transcribed for different instruments, and 'nuovamente ristampate e con diligenza corrette'. Of op.1 alone there were no fewer than five versions: the original one for violin (1716), the trio sonatas (in their turn performable as concertos by adding the ripieno parts provided), the edition of 1739 (fig.2), the transcriptions

2. Beginning of the first sonata from Geminiani's op.1, as revised in 'Le prime sonate' (London, 1739), with added ornaments and fingerings

for harpsichord and those for flute. The op.4 violin sonatas (1739), of which another version exists for concerto grosso, were transcribed almost unchanged for harpsichord. Op.5 (1746) was published at the same time in both its original version for cello and in a transcription for violin. The other sonatas, with few exceptions, are derived from earlier works: the two collections of *Pièces de clavecin* (1743, 1762) from opp.1, 2, 4, 5 and 7 and from the treatises for violin and guitar. Not counting the arrangements and transcriptions, Geminiani's sonatas number just 30: 24 for violin (opp.1 and 4) and six for cello (op.5). The first violin sonatas, or at any rate some of them, were probably composed in Italy and clearly show the strong influence of Corelli's op.5 (1700). With the second collection, published a full 23 years later, Geminiani distanced himself decisively from the Corellian model and appears to have drawn inspiration from contemporary French music. The cello sonatas are entirely original and it would be hard to refer these to any particular style or model.

In op.1, where his master's influence is particularly evident, Geminiani nevertheless reveals a style in some ways diametrically opposed to Corelli's; we need notice only the extreme irregularity of rhythm and melody, the asymmetry of the musical phrases and, above all, the greater complexity and variety of the harmony. The 12 sonatas follow the same ordering as Corelli's op.5: the first six are *da chiesa*, the others *da camera*. But Geminiani seems to have preferred the four-movement scheme of Corelli's *da chiesa* trio sonatas, and in this respect he did not follow the example of op.5. According to Burney, the sonatas were considered 'still more masterly and elaborate than those of Corelli' and few players were able to

perform them. This was not only because of the frequent double stopping, wide intervals and complex ornaments and arpeggios, but also because of the unusually wide compass, *g–a'''*. Despite the fact that they are relatively stable tonally, the sonatas are harmonically more complex than the concertos, and their modulations more frequent, more rapid and sometimes more daring. This is both the cause and the effect of an often irregular and involved melodic articulation.

In the op.4 violin sonatas Geminiani showed more interest in the expressive possibilities of the upper part; the prevalent idiom is decidedly homophonic, and there is not even a single fugue. Greater attention is paid to the internal organization of the movements, and there is a marked tendency towards cyclic forms. The influence of French music is evident in the frequent use of the rondo, of the *air tendre* in slow movements and of trios in parallel tonality, and it can be felt also in the use of particular harmonies. The most striking features of op.4 are the extraordinary abundance of ornamentation and expressive marks and a notable simplification of the bass line, both resulting from the adoption of a predominantly homophonic idiom.

The op.5 cello sonatas continue the lines of development initiated with op.4. But although the first subject has now assumed major importance, the compositional principle has not changed: the phrases succeed each other freely, and their rhythmic and melodic attraction is as between contiguous elements. Their irregularity or asymmetry depends not on the number of bars, but rather on the systematic use of elision, contraction, syncopation and retardation; the whole is further complicated by numerous embellishments and diminutions. This does not mean, as Burney put it, a 'confusion in the effect of the whole', because Geminiani created different points of reference by repeatedly restating the same rhythmic figurations and the same thematic motifs. It is in the cello sonatas, more than in op.7, that his mature style is fully revealed.

7. 'The Inchanted Forrest'. *La forest enchantée* was commissioned from Geminiani by the architect and theatre director Giovanni Niccolò Servandoni, one of the most interesting figures in late Baroque French theatre. He was known for illusionist effects in his spectacles, which he made use of in this pantomime, staged in Paris in the Salle des Machines at the Tuileries. The subject, from Tasso's *Gerusalemme liberata* (xiii, xviii), enabled Servandoni to realize some remarkable scenic effects; in the words of the review in *Annonces, affiches, et avis divers* (10 April 1754), 'Tous ce que l'Art de la Peinture, de la Perspective & des Méchaniques peut fournir de plus noble & de plus surprenant, est déployé dans ce Spectacle'. The show was not a success, however, and after the first performance an anonymous marquis published a letter in strongly ironic tones, apparently attempting to restore the play's fortunes. This made no mention at all of Geminiani's music, but in a review dated 15 April 1754 Friedrich Melchior Grimm stated that the pantomime 'is accompanied by bad music [une mauvaise musique] by M. Geminiani, which is meant to depict the various events'. It is hard to say whether or not the 'mauvaise musique' of Geminiani contributed to the show's failure. The composer was much appreciated in Paris, but his success there, as in London, was tied almost exclusively to the concerti grossi op.3, and his later compositions did not find favour with the public.

The play is in five acts; the first, third and fifth are set in the forest of Saron, the second in a mosque in Jerusalem and the fourth in the Christian encampment. The concert version, of which we have both the autograph score and the printed edition, is differently divided: there are two parts, the first in D minor and the second in D major. In this guise it certainly appears original, or at any rate unusual – a kind of programme music on a considerable scale. But if we examine the programme, the reviews and, above all, the verses of Tasso, we find something rather different. A comparison of the individual movements with the various scenes of the pantomime reveals that the music of the first four acts consists of four distinct concerti grossi. The final act is different: here the music more directly follows the action (Rinaldo's heroic exploit) and cannot be classified in terms of any normal concerto grosso form. What we have in the work as a whole is essentially an adaptation of previously composed music typical of Geminiani, or, if we allow that the music was newly composed for the occasion, evidence of his inability to conceive of compositional processes other than those of the concerto grosso. There is an obvious stylistic unity in *The Inchanted Forrest*, and it is therefore highly improbable that the music was composed at different periods, as were, for instance, the two collections of *Pièces de clavecin*. This is not programme music, but music adapted to a programme (the possibility that the music already existed does not affect the substance of this argument). It does not seek to imitate or describe anything, as Vivaldi did, for example, in the 'Four Seasons', but is simply a background for the pantomime. Many features of Geminiani's earlier compositions, especially the prevalence of contrapuntal writing, have now almost completely disappeared. Although the style of the composer is still recognizable, it has now changed profoundly, and in some respects could be described as *galant*.

8. Reworkings and transcriptions. The music reworked by Geminiani can be divided into three categories: transcriptions of his own compositions for various instruments, those of other composers' music, and works 'newly reprinted and carefully corrected'. To the first category belong the trio sonatas (*c*1742) taken from op.1, the two collections of *Pièces de clavecin* (1743, 1762) from opp.1, 2, 4, 5 and 7 and from the treatises on the guitar and the violin, the concerti grossi (1743) from the violin sonatas op.4, and the violin transcriptions (1746) of the op.5 cello sonatas. In the second category come the concerti grossi from Corelli's op.5 (1726, 1729) and opp.1 and 3 (1735), and the transcriptions reproduced in the treatises. In the third are the violin sonatas op.1 (1739) and the concerti grossi opp.2 and 3 in score (*c*1755). Comparing these with their respective originals, we find one common feature: with only a few exceptions, Geminiani tended to simplify his own music, to make it more easily playable. This is not to say that the original compositions are thereby impoverished; the simplification is often a means by which Geminiani sought to modernize his music. The work of transcription responds to an essentially practical purpose, and there is also the desire to keep music alive which has been otherwise judged to be out of fashion. Geminiani's motives for reworking pieces often overlap; there was the desire to improve a composition *tout court*, to update it for modern taste, to illustrate his own theoretical principles, to make the music enjoyable for a wider public, to keep his own reputation

alive and of course to make money. The emphasis differs from one case to another, but all factors are normally present in some measure.

9. Treatises. During the last 15 years of his life, between 1748 and 1762, Geminiani published no fewer than six treatises. Hawkins tells us that a seventh was stolen from the composer during his final stay in Dublin. A common feature in the treatises is extreme brevity in the non-musical text, limited for the most part to the preface and, in a few cases, some introductory rules. Rather than treatises as such, these are manuals of essentially practical application; and yet they are sources of great interest, not only because they clarify certain matters relating to Geminiani's style but also because they deal with important questions concerning performing practice, such as the use of vibrato, realization of continuo, and dynamic markings.

The aim of the first two treatises was to explain the most appropriate use of trills, mordents, turns, crescendos and diminuendos 'for playing any Composition in a good Taste'. Geminiani considered the correct performance of ornaments to be essential if a composition is to 'move the listener' and communicate 'the highest Degree of Pleasure'. In the *Treatise of Good Taste in the Art of Musick* (1749) he described the meaning of each embellishment and the sentiments it is supposed to express; he also gave a table 'of the elements of playing and singing in a good Taste'. Of particular interest is what he said about vibrato (he advised its use 'as often as possible'), and about dynamic signs and the acciaccatura.

In *The Art of Playing on the Violin* (1751) Geminiani offered a small number of precepts; for true knowledge of the instrument he resorted to notes rather than words. Much space is again devoted to ornaments, which are considered the chief vehicle for expressing the sentiments. Depending on its position and method of execution, a mordent can express 'Fury, Anger, Resolution', or 'Mirth, Satisfaction', or again 'Horror, Fear, Grief, Lamentation'; it is for the violinist to communicate one or another sentiment 'according to the intentions of the composer'.

In the eighth lesson Geminiani advised avoiding 'that wretched Rule of drawing the Bow down at the first Note of every Bar'. The main disadvantage of this rule, codified in France and deriving essentially from the need to keep time in dance music, lay in the inevitable consecutive bowings, whether up or down. Considering the normal brevity of the verbal text, relatively generous space is given to dealing with the still graver error of marking time with the bow. In this connection we must remember Burney's comment on Geminiani, that 'as a player he was always deficient in Time', and that at Naples, where he had been called to conduct, 'he was soon discovered to be so wild and unsteady a timist, that instead of regulating and conducting the band, he threw it into confusion; as none of the performers were able to follow him in his tempo rubato, and other unexpected accelerations and relaxations of measure'. Again, concerning the failure of the *concerto spirituale* that Geminiani directed at Drury Lane in 1750, Burney wrote that 'the unsteady manner in which he led seemed to confirm the Neapolitan account of his being a bad mental arithmetician, or calculator of time'. Thus we have, on the one hand, Geminiani maintaining that not every beat should be strongly marked (as was recommended in other contemporary treatises), and, on the other, his being criticized as 'a bad mental arithmetician' (i.e. not being able to keep time). Since there was also frequent criticism of his music for its rhythmic and melodic irregularity and asymmetry of phrases, we might conclude that Geminiani, as player, composer and theoretician, must have differed from his contemporaries in his ideas on rhythm. His objection to metrical accentuation, his tempo rubato and the rhythmic complexity of his music are three indications of the same concept of rhythm. As against the rigid grammatical scansion of accents, Geminiani advanced what Giulio Caccini called 'sprezzatura di canto' and Nicola Vicentino 'quel certo ordine di procedere nelle composizioni che non si può scrivere'; and for a regular organization of phrases and periods he substituted more involved and irregular rhythmic procedures.

Of the greatest interest, finally, are the indications he gave of the correct method of holding the violin and the bow, for the positions advised by Geminiani are one of the few points of reference for interpreting the post-Corellian string repertory. The treatise is, in fact, the first to be addressed to non-amateur players, and it was followed five years later by that of Leopold Mozart; therefore it is one of the few important sources on violin technique in use in the first half of the 18th century.

The *Guida armonica* (*c*1752) is the most original and least known of Geminiani's treatises. It is a kind of dictionary, designed by the author to offer composers a wider range of harmonies than was normally in use. On each of its 34 pages (except the first and last) there are 66 short passages of figured-bass, none exceeding five notes. The final note is marked with a number referring the reader to a page on which can be found the harmonic passages starting with this note. In this way one can continue 'from Passage to Passage to what Length you please'. The originality of the work lies precisely in the idea that the collage of harmonic passages is theoretically infinite, and is what determines the musical form. The composer has only to choose and combine an unlimited number of fragments from among the 2236 at his disposal, without concerning himself with the upper parts or the rhythm, as if once the bass is complete the composition can be considered effectively finished. Thus Geminiani's musical style and theoretical thought seem to agree; if a composition takes its form from a figured bass, the rhythm and melody will inevitably reflect this, and indeed it is the harmonic richness that is frequently praised in Geminiani's music, while censure has focussed on its formal irregularity and asymmetry.

The Art of Accompaniament (*c*1756) consists of a series of figured-bass patterns, each followed by several possible realizations. The same harmonic progressions are repeated several times, following a variation principle not unlike that of Corelli's 'Follia', with the aim of offering the beginner an ample repertory of scales, arpeggios, broken chords and different figurations that can be employed in harpsichord accompaniment. The basic principle of the treatise is summarized by Arnold as 'economy of the evanescent tone of the Harpsichord'; to prolong the sound of the instrument the player should not neglect the possibilities contained in a chord, but should know how to apply them economically.

The final treatise, *The Art of Playing the Guitar or Cittra* (1760), is devoted to the instrument known in England as the 'lesser guitar' or 'English guitar'. It consists of a short introduction followed by 11 sonatas that are

performable both on this instrument and on the violin. Unlike the compositions included in the violin treatise, these sonatas are of purely didactic value and inferior in quality to all the composer's other sonatas.

10. VOCAL MUSIC. Despite the scant interest Geminiani always showed in vocal music, some compositions attributed to him enjoyed wide circulation, as is shown by the many surviving manuscript and printed copies. But these are parodies or adaptations, in which the composer, notwithstanding his distinct inclination towards transcriptions, probably had no part. It was, in fact, common practice to set texts to successful instrumental compositions and publish them in miscellaneous volumes or in songsheets. The only certain example of Geminiani's vocal writing is a short cantata for soprano, *Nella stagione appunto*, probably composed in Rome or Naples before he left for London. It consists of two arias, each with preceding recitative; stylistically it resembles many Roman cantatas of the early 18th century. Nevertheless, one can recognize in both the vocal line and the lower parts the rhythmic and melodic mobility so characteristic of the composer.

WORKS

published in London unless otherwise stated

SONATAS

op.	
1	[12] Sonate (A, d, e, D, B♭, g, c, b, F, E, a, d), vn, vle, hpd (1716), rev. with added ornaments and fingerings, pubd as Le prime sonate (1739/*R*); ed. R.L. Finney (Northampton, MA, 1935), and ed. W. Kolneder (Mainz, 1961)
—	Six Solos … compos'd by Mr Handel, sigr. Geminiani, sigr. Somis, sigr. Brivio (1730), no.5 (D), vn, bc, by Geminiani
4	[12] Sonate (D, e, C, d, a, D, A, d, c, A, b, A), vn, bc (1739) [not the same as the rev. op.1 (1739), see above]
—	[6] Sonatas of three Parts, 2 vn, bc (*c*1742); pubd as Six Sonatas, 2 vn, vc/hpd (*c*1757) [arrs. of vn sonatas op.1 nos.1–6]
5	[6] Sonates (A, d, C, B♭, F, a), vc, bc (Paris, 1746); ed. W. Kolneder and W. Schulz (Leipzig, 1964)
5	[6] Sonates (A, f♯, C, D, B♭, d), vn, bc (The Hague, 1746), pubd as Le VI sonate (1747); ed. W. Kolneder (Leipzig, 1965) [arrs. of vc sonatas op.5]
—	VI Sonatas, 2 vn, bc (*c*1757) [arrs. of vn sonatas op.1 nos. 7–12, with some addl movts]

CONCERTOS

instrumentation listed in the order concertino; ripieno

op.	
—	[6] Concerti grossi … della prima parte dell'op.5 d'Arcangelo Corelli (D, B♭, C, F, g, A), 2 vn, va, vc; 2 vn, bc (1726) [arrs. of Corelli's op.5 nos. 1–6]
—	[6] Concerti grossi … della seconda parte del op.5 d'Arcangelo Corelli (d, e, A, F, E, d), 2 vn, va, vc; 2 vn, bc (1729) [arrs. of Corelli's op.5 nos. 7–12]
2	[6] Concerti grossi (c, c, d, D, d, A), 2 vn, va, vc; 2 vn, bc (1732; rev. edn in score, *c*1755); ed. H.J. Moser, *Musik-Kränzlein* (Leipzig, n.d.)
3	[6] Concerti grossi (D, g, e, d, B♭, e), 2vn, va, vc; 2 vn, bc (1732; rev. edn in score, *c*1755); ed. R. Hernried (Zürich, 1935)
—	[6] Concerti grossi … del op.3. d'Arcangelo Corelli (F, B♭, b, f, a, G), 2 vn, va, vc; 2vn, bc (1735); ed. M. Lütolf (Laaber, 1987) [arrs. of Corelli's op.3 nos. 1, 3, 4, 9, 10, and op.1 no.9]
—	[6] Concerti grossi … dalle sonate … dell'op.4 (D, B, e, a, A, c), 2 vn, va, vc; 2 vn, bc (1743) [arrs. of Geminiani's op.4 nos.1, 11, 2, 5, 7, 9]
7	[6] Concerti grossi (D, d, C, d, c, B♭), 2 fl, bn, 2 vn, va, vc; 2 vn, va, bc (1746)
—	The Inchanted Forrest, 2 fl, 2 hn, tpt, 2 vn, 2 va, vc; 2 vn, bc (*c*1756); ed. E. Careri (Lucca, 1996); as La selva incantata, *GB-Lcm**
—	Two Concertos (D, G), 2 vn, va, vc, bc (*c*1761)

MISCELLANEOUS

—	Pièces de clavecin tirées des differens ouvrages de Mr F. Geminiani adaptées par luy même, hpd (1743/*R*) [mostly arrs. from opp.1, 4]
—	*The Harmonical Miscellany*, i (1758) [periodical containing 14 pieces 'in the Tone Minor', 4 insts, basso ostinato]; ii (1758) [containing 16 pieces 'in the Tone Major', 4 insts, basso ostinato]
—	The Second Collection of Pieces … Taken from Different Works of F. Geminiani, and adapted by himself, hpd (1762/*R*) [arrs. from opp.1, 2, 4, 5, 7 and treatises for vn and gui]

Corelli's op.5 no.9, vn, bc, 'grac'd' by Geminiani, in *HawkinsH*, 904–7

Nella stagione appunto, cant., S, bc, *I-Bc*

Several minuets, with and without variations [probably incl. the 'favorite' minuet from op.2 no.1] pubd singly; numerous pieces pubd in 18th-century anthologies [complete list in Careri, 1993]

For further works see TREATISES below

TREATISES

op.	
8	*Rules for Playing in a True Taste* (*c*1748) [incl. 4 tunes, each with variations, solo inst, bc]
—	*A Treatise of Good Taste in the Art of Musick* (1749/*R* 1969 with introduction by R. Donington) [incl. 4 songs, solo v, 2 vn, 2 fl, va, bc; 3 'Airs made into Sonatas', 2 vn, bc; 4 'Airs', each with a variation, vn bc]
9	*The Art of Playing on the Violin* (1751, facs. ed. D.D. Boyden, London, 1952) [incl. 12 compositions, vn, bc]
10	*Guida armonica* (*c*1752)
—	*L'art de bien accompagner du clavecin* (Paris, 1754), rev. as op.11
11	*The Art of Accompaniament*, pts1–2 (*c*1756)
—	*A Supplement to the Guida armonica* (*c*1756)
—	*The Art of Playing the Guitar or Cittra* (Edinburgh, 1760) [incl. 11 sonatas]

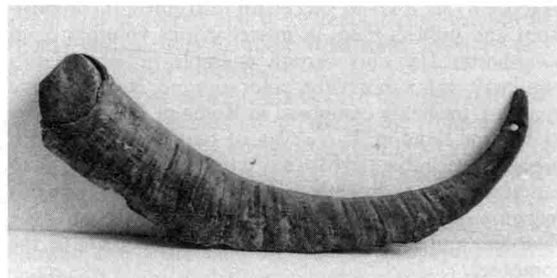
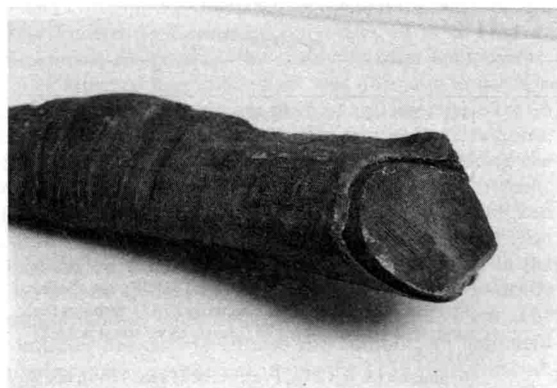
ENRICO CARERI



Gemmel. *See* GYMEL.



Gemshorn (Ger., from *Gemse*: 'chamois'). A medieval folk ocarina made originally from the horn of the chamois, though later from that of any convenient animal (it is classified as an AEROPHONE: DUCT FLUTE). Gemshorns were depicted by Virdung (1511) and Dürer (in a prayer book for Maximilian I, 1515) but seem not to appear thereafter, save in texts deriving from Virdung. From about 1450, organ builders imitated its characteristic ocarina-like quality with the short, wide-scale stop which bears its name; Schlick regarded it as the third most important rank of any organ (*see* ORGAN STOP).

The gemshorn is blown from the wider end of the horn, which is blocked with a plug of wood or other material, leaving a duct to lead the air to the mouth; the point of the horn is left intact. Virdung shows three finger-holes and a thumb-hole which, if correctly sized, would allow a range of about an octave; as with any other ocarina the pitch produced depends on the total area of the open holes. Thus holes of different diameter can be used in different combinations. The only known surviving gemshorn, in the Musikinstrumenten-Museum des Staatlichen Instituts für Musikforschung, Berlin, has six finger-holes and no thumb-hole (see illustration).

The gemshorn has been revived by the early music movement, initially by Horace Fitzpatrick, and is now available in a family of sizes, from descant to bass, usually of cowhorn, and with a fingering which, for the player's

Three views of the only known surviving gemshorn (Staatlichen Instituts für Musikforschung, Berlin)

convenience, has been brought close to that of the tin whistle, though the range is still limited to about an octave. The attractive tone quality and ease of fingering has given it a spurious popularity, far greater than it seems to have had in the 15th and 16th centuries.

JEREMY MONTAGU

Gena, Peter (*b* Buffalo, NY, 27 April 1947). American composer and pianist. He studied composition with Feldman and Lejaren Hiller at SUNY, Buffalo (BA 1969, MA 1972, PhD 1976). His activities as a composer, teacher, performer and concert organizer have centred on Chicago since 1976; he has taught at Northwestern University (1976–83, 1992–6) and in 1982 joined the staff at the school of the Art Institute of Chicago. His position as a composer at a visual arts school speaks of

his long-held interest in cross-disciplinary studies. His compositions reflect also his study of literature and biological phenomena. As a concert organizer he was the motivating force behind the celebrated 1982 New Music America Festival in Chicago. Gena worked with John Cage, on whom he has written several monographs.

Gena's own music tends more towards the repetitive, minimalist style of his contemporaries, as in *Beethoven in SoHo* (1980), a quasi-satirical piece in which two pianists overlap and dovetail fragments from a Beethoven sonata. Although much of Gena's music is composed using computers or digital synthesizers, it is marked by melodic and lyrical concerns. In later works, and in collaboration with a geneticist, he has developed musical interpretations of DNA sequences; *For Yvar Mikhashoff* (1995), in particular, is based on digitally synthesized DNA sequences of the Human Immunodeficiency Virus. As a pianist Gena has performed the works of Cage, Cardew, Julius Eastman and Don Pullen.

INGRAM D. MARSHALL

Gencebay, Orhan (*b* Samsun, Aug 1944). Turkish popular musician. Gencebay is widely credited as the inventor of *arabesk*, a popular genre which has dominated the Turkish recording industry since the mid-1970s and which has been widely condemned by the Turkish nationalist intelligentsia (*see* TURKEY, §V, 3). As a child, he received an early training in the religious repertory and Western art music from his family circle. He studied the reformed rural music genre at local music societies, played guitar in a rock band while at *lycée* and learnt the popular dance band hits of the day as a saxophonist during military service at an officers' club in Istanbul. In 1967 he was recruited to the Istanbul radio station but resigned a year later to continue his work in the popular market as a singer and film star, in 1973 managing his own recording company, Kervan.

Gencebay's early work, characterized by his first Columbia recording of 1968, *Bir teselli ver* ('Console Me'), was an eclectic mix of Western rock, Turkish art and folk music and Egyptian popular dance styles, initially much inspired by his mentor, Ahmet Sezgin. The lyrics of the songs are typical of the *arabesk* repertory as a whole, dealing with the fated love of the virtuous poor man. While his songs follow the broad outlines of urban art music *şarkı* form (*see* TURKEY, §IV, 4), Gencebay composes at the *bağlama* (the rural long-necked plucked lute) and combines modal structures in ways which are incompatible with art music theory, but demonstrate considerable wit and sophistication. (M. Özbek, *Popüler kültür ve Orhan Gencebay arabeski*, Istanbul, 1991)

MARTIN STOKES

Gencer [Ceyrekgil], **(Ayshe)** (*b* Istanbul, 10 Oct 1928). Turkish soprano. A pupil of Giannina Arangi-Lombardi, she made her début at Ankara in 1950 as Santuzza, the role of her Italian début at the Arena Flegrea, Naples, in 1953. She sang at La Scala in 1957 as Madame Lidoine in the world première of Poulenc's *Dialogues des Carmelites*. Subsequently she appeared throughout Europe and America, but until her retirement in 1983 was most often heard in Italy. Although her voice was limited in volume and not very even, she was able, thanks to her technique, strong temperament and theatrical intelligence, to tackle with success such dramatic roles as Gioconda or Aida. Lighter roles such as Gilda and Amina made the best use of her vocal flexibility and impressive soft singing; but her interpretative powers found most scope in the dramatic coloratura repertory, particularly in Donizetti and early Verdi: *Elisabetta, regina d'Inghilterra*, *Anna Bolena*, *Maria Stuarda*, *Lucrezia Borgia*, *Attila*, *I due Foscari* and *La battaglia di Legnano*.

RODOLFO CELLETTI/VALERIA PREGLIASCO GUALERZI

Gendang. (1) A generic Indonesian and Malaysian term for any double-headed laced drum, cylindrical or conical. Other cognate terms are *gandang* (in the Dayak areas of Kalimantan and in west and north coastal Sumatra), *gimar* (among the Tanjung Benua people of east Kalimantan), *gondang*, *gordang*, *gonrang* and *genderang* (Batak languages), *geundrang* (Acehnese), *ganrang* (Makassarese and Buginese) and *gandar* (Flores).

(2) Term used in Sumatra and Malaysia for various instrumental pieces in which the *gendang* (1) is prominent and hence for the ensembles that play them.

□

Gender. The cultural, social and/or historical interpretation of the biological and physiological category of sex. Nearly every experience of music, including its creation, performance and perception, may incorporate assumptions about gender; and music itself can produce ideologies of gender. Uncovering the workings of gender in even the most 'absolute' musical contexts has thus emerged as a basic task of the critical exploration of music.

Gender, like sex, is often taken to be a category ruled by and reducible to a simple binary division, the 'man' and 'woman' of sex translating into the 'masculine' and 'feminine' of gender. But recent thinking, supported by the systems of gender used in different times and cultures, has called this foundational dimorphism into question. This suggests, to critics of ideological aspects of contemporary systems of gender, historical and cross-cultural models that undermine the perceived constraints on identity implicit in modern categories of masculine and feminine.

Scholars have also challenged the chain of reasoning that might lead to the supposition that biological categories of sex 'translate' into cultural categories of gender. This goes beyond the commonsensical observation that

men and women may in equal measure embrace 'feminine' and 'masculine' habits. Critics increasingly doubt that the meanings of gender derive from any kind of core premises, claiming instead that gender signifies in culture by means of 'performative' (Judith Butler) or 'representational' (Teresa de Lauretis) practices that produce gendered identities by means of their persistent repetition. This does not render it any less real or concrete than if the term were grounded in an essential, fixed definition; instead, a performative or representational model draws attention to gender as a learnt phenomenon. This model begins to account for why concepts of gender alter over time and take on different shapes in diverse cultural contexts.

Gender is a relational phenomenon. For any historical moment, the terms within a system of gender are measured against one another in various, sometimes contradictory ways, allowing the analysis of both individual and larger cultural patterns of validation, marginalization and rejection. Certain trends recur, in particular the repeated devaluation, across a wide range of time and societies, of cultural productions and utterances understood to be 'feminine'. Although this has normally led to the devaluation of the work of women, it would be an oversimplification to collapse 'feminine' into the category of 'woman', for men too have had their expressions labelled 'feminine'. Indeed, from as far back as the time of Plato and Aristotle, the entire category of 'music', gauged against such domains as science and the military, has commonly been viewed as a feminine realm of human activity. Critics, particularly feminist critics, have studied the hierarchical implications of gender, not only to expose accounts of exclusion on a gendered basis but also to discover where individuals have escaped the control of the dominant, usually patriarchal tradition.

Exploring concerns related to gender permits fresh critical perspectives on music, ones that complement traditional formal, source-critical, historical and biographical approaches, even as they may partake of and even reinforce these traditional modes of enquiry. Early investigation into the effects of gender in music resulted mostly from the efforts of feminist scholars engaged in the study of the lives and works of marginalized women composers from past eras. Uncovering forgotten biographical narratives and compelling compositions have led critics to reflect on the societal constraints that originally obscured these particular composers and their works. From such reflections followed inquiries into the gendered nature of musical education, the various obstacles, including parental, institutional and financial, that until well into the 20th century have hindered the access of women to the kinds of educational resources routinely granted men and into the roles of gender in both the constitution of core musical repertories and in the conceptions of musical talent and creativity.

What has more substantively transformed thinking about music are studies in which the sounds themselves – considered both from the perspectives of the composer who creates them and the listener or performer who interprets them – have come under scrutiny from the standpoint of gender. Most such inquiries broach the topic of gender through some kind of semantic content attached to or construed in the musical work. The words of texted works provide the most obvious source because they may introduce ideas about gender that the critic or historian may 'read back' into the music. Not surprisingly, then, most critical enquiry into gender in music focusses on texted repertories, especially opera and song from the 17th century to the present, with a smaller but important corpus of work on earlier texted repertories. A signal achievement of gender criticism in music is the demonstration that the music of such works as Schumann's *Frauenliebe und -leben* or Bizet's *Carmen,* both as crafted by their composers and sung and played by their performers, contributes with complexity and force to the signification of gender in culture writ large.

For instrumental music, the search for semantic content can be more difficult. Many critics turn to passages where commentators have invoked gendered language of some kind, and then extrapolate these gendered terms on to an analysis of the formal and technical structure of particular works. For example, several theorists, from the 19th century onwards, have described the relationship between first and second subject material in sonata forms in terms that invoke gender (A.B. Marx and Vincent d'Indy portrayed a contrast of 'masculine' and 'feminine' thematic character; Schoenberg construed the tonic key of the first theme as a 'patriarchal ruler'). Judging such formulations to reflect generally upon beliefs held during the eras from which they emerged, critics have used them to inform otherwise traditional formal analyses that then reveal dialectics of gender at work in particular symphonic movement by such composers as Beethoven, Schubert, Brahms and Tchaikovsky. When such approaches take care to ground the extrapolation of gender on to the formal constructs in solid networks of historical context, they can shed significant light on the way that 'pure' sound can become gendered. The danger remains, however, that filtering gender through the formalistic vocabularies of modern musical analysis could perpetuate anachronistic interpretations for eras in which concerns with form remained secondary to other kinds of musical engagement.

Recognizing this risk, some critics prefer to seek gendered meanings in instrumental music by plumbing musical categories that in the past held a broader currency in society at large. Important insights have followed from investigating such notions as 'character' (the later Enlightenment notion that music could encompass human characteristics) and genre (when properly construed as a communicative rather than classificatory phenomenon), musical categories defined by a convergence of musical and social thought. The study of genre, a notion with broad chronological relevance, can be particularly profitable to students of gender. Evidence of its value has begun to emerge from research on instrumental music from the first half of the 19th century. Learning, for example, that the audience for the nocturne was understood to be primarily female may help explain the kinds of decision composers made when writing such works: when Chopin chose to include sharply contrasting, agitated middle sections in some of his nocturnes, he may have wished to distance the genre from the exclusively feminine sphere. It may also help account for listeners' reactions when hearing nocturnes: its construal as 'feminine' contributed to the aesthetic devaluation of the genre in the 19th century. Similar kinds of evidence help identify a range of possible associations with gender in this period. Hence the battle piece has been upheld as an epitome of 'masculine' music, the symphony as an amalgamation of

feminine and masculine, and 'fairy music' as an evocation of gender ambiguity.

The idea that discourse about music might contain clues about gendered meanings also resonates for present-day musical cultures. Celebrations of and conflicts about gender permeate all manner of musics, from the popular (Madonna) to the symphonic (the reluctance of some orchestras to admit women members); scholarship on these contemporary composers, performers and institutions tends to follow the parameters outlined above for music and musicians of the past. Investigations that interrogate the gendered natures of some of the scholarly disciplines devoted to music offer a somewhat different view of contemporary engagements with gender and music. The study of music theory, for example, has been criticized for the 'masculine' orientation of its scholarly discourse, the tendency to prefer a scientific tone of objectivity over one that explores the passionately experiential nature of music. Conversely, and with a less confrontational goal, ethnomusicologists have been likened to feminine midwives, figures who bring traditions and beliefs from the periphery of awareness to the centre of attention. While both kinds of study derive to some extent from the demographics of the respective professions (more men than women are music theorists, more women than men are ethnomusicologists), both properly separate the purported gendering of discourse from the sexes of actual writers. In effect, such investigations return to a basic set of concerns: how music and discourse on music signify gender, even when the ostensible subject may cloak its relationship to the topic.

JEFFREY KALLBERG

Gendèr. Multi-octave METALLOPHONE of Java and Bali. In the Central Javanese gamelan it usually has 12 to 14 bevel-edged keys suspended over individual tube resonators and is played with two padded disc-shaped mallets, using an elaborate damping technique. In a complete gamelan there are three *gendèr barung* (lower-pitched *gendèr*, approximately 105 cm long) and three *gendèr panerus* (higher-pitched, approximately 90 cm long), one of each type for the *slèndro* tuning and two of each type for the *pèlog* tuning (one for the *pèlog* sub-scale *bem*, featuring pitches 12356, and the other for *barang*, featuring pitches 7̣2356). (For further information on Central Javanese performing practice, *see* INDONESIA, §III and MODE, §V, 4(ii)).

Balinese *gendèr* are metallophones with bevel-edged, bronze keys suspended over tuned, bamboo resonators and played with two disc-headed mallets. The damping technique required is technically demanding since the sound must be stopped by the same hands that are striking

the keys. Tuned to pentatonic *slendro*, a pair or quartet of ten-key *gendèr wayang* (the second pair tuned one octave higher and doubling the lower pair) accompany *wayang kulit* (shadow puppet theatre) and ceremonies for tooth-filing and cremation. Compositions are mostly contrapuntal and intricate, with stratified textures and rapid tempos typical of larger ensembles. Balinese musicians consider this to be one of the most difficult instruments to master. In slow pieces both hands play in parallel octaves or *empat* (the interval spanning four keys, approximately a 5th) with delicate grace notes and rubato. This latter technique is typical of *gendèr* in the larger *gamelan palegongan*, where a pair or quartet of 13-key *gendèr rambat*, tuned to a pentatonic *pèlog*-derived tuning, play a leading melodic role.

In a more general sense, *gendèr* denotes a metallophone family of the same construction common to many ensembles (e.g. *gamelan semar pagulingan*, *gong kebyar*). These instruments vary in size and register from the large *jegogan* through *jublag*, *penyacah*, *ugal*, and *gangsa pemade* to the highest *gangsa kantilan*, with a single or double-octave range. They are struck with a single mallet (*panggul*) held in the right hand and damped with the left-hand thumb and forefinger. All *gendèr* exist in pairs (*see* INDONESIA, §II, 1(ii)(c)).

MARGARET J. KARTOMI/LISA GOLD

Gendre, Jean le. *See* LE GENDRE, JEAN.

Gendron, Maurice (*b* Nice, 26 Dec 1920; *d* Grez-sur-Loing, Seine-et-Marne, 20 Aug 1990). French cellist and conductor. He entered the Nice Conservatoire when he was 12, and went to Paris five years later, where he studied with Gérard Hekking at the Conservatoire and was awarded a *premier prix*. His international career began in the postwar period with a London visit in 1945, when he gave the first performance in western Europe of Prokofiev's Cello Concerto op.58 with the LPO, and two recitals with Britten as the pianist.

Gendron later appeared on several occasions with Britten at the Aldeburgh Festival, and with Menuhin at the Bath Festival; together with Yehudi and Hephzibah Menuhin he formed a distinguished trio that toured widely. He taught at the Menuhin School in England and in 1954 initiated a masterclass at the Hochschule für Musik in Saarbrücken. From 1970 to 1987 he was a professor at the Paris Conservatoire. Gendron also developed a secondary career as a conductor, working particularly with the Saar Chamber Orchestra and the Bournemouth Sinfonietta. He continued to enjoy wide renown as a cellist, both as a soloist of elegant style whose playing was full of life and resonance, and as a responsive partner in chamber ensembles. In 1975 his career was interrupted by a car accident, but he successfully resumed playing in 1984. He played a Stradivari cello, and his outstanding recordings include the Bach suites, concertos by Haydn and Boccherini (directed by Casals) and 20th-century French music.

NOËL GOODWIN

Genée, (Franz Friedrich) Richard (*b* Danzig [Gdańsk], 7 Feb 1823; *d* Baden, nr Vienna, 15 June 1895). German conductor, librettist and composer. He was the son of Friedrich Genée (*b* Königsberg, 1796; d Berlin, 1859), conductor at a theatre in Danzig, and, although first intended for the medical profession, took up music, studying with A. Stahlknecht in Berlin. Between 1847 and 1867 he was successively Kapellmeister at theatres at Reval (now Tallinn), Riga, Cologne, Düsseldorf, Danzig, Mainz, Schwerin and Prague. In 1868 he became conductor at the Theater an der Wien, Vienna, and in the following years was increasingly involved with not just the musical but also the literary side of the works produced there. At first concerned with adapting foreign works for production, he became much in demand as a clever writer of operetta librettos. This side of his activities developed particularly through his association with Johann Strauss (ii) who, being unfamiliar with writing for the theatre, used Genée not just as a lyricist but for the detailed working out of his melodic ideas. Thus Genée's handwriting is to be found extensively in the autograph score of *Die Fledermaus*. Genée's work as librettist reached its height in his collaboration with F. Zell (Camillo Walzel), the latter concerning himself more with the plots and the final elaboration of the librettos of their works while Genée concentrated on the lyrics. They went on to write librettos for Suppé and Millöcker, as well as for Genée's own compositions, often making use of French sources. In 1878 Genée was able to retire from conducting to his villa at Pressbaum, near Vienna. His translations include the librettos of several works by Lecocq, Offenbach and Sullivan.

Genée's own operettas rarely attained more than an ephemeral success, though *Der Seekadett* (1876) and *Nanon, die Wirtin vom goldenen Lamm* (1877) made a considerable hit at the Theater an der Wien and travelled as far afield as America. Both had librettos attributed to Zell, though almost certainly Genée wrote the lyrics, as usual. Genée also wrote many partsongs, among which one for male voices, *Italienischer Salat*, is most amusing in its satire on the older style of Italian operas, being sung to nonsense words. His brother Rudolf (*b* Berlin, 12 Dec 1824; *d* Berlin, 19 Jan 1914) also wrote some librettos.

WORKS
(selective list)

all stage works, in order of first performance; for more detailed list and for list of librettos see GroveO

Polyphem [Ein Abenteuer auf Martinique] (komische Oper), 1856; Der Geiger aus Tirol (komische Oper), 1857; Der Liebesring (romantische Oper), 1860; Ein Trauerspiel (Operette), 1860; Ein Narrentraum (Karnevalsposse), 1861; Der Musikfeind (Operette), 1862; Der Generalprobe (Operette), 1862; Die Herren von der Livree (Posse),1862; Die Talismänner (Karnevalsposse), 1863; Rosita (romantische komische Oper), 1864; Der Zopfabschneider (Operette), 1866; Der schwarze Prinz (komische Oper), 1866; Am Runenstein (romantische Oper), 1868, collab. F.A.F. Flotow; Schwefeles, der Höllenagent (Operette), 1869; Der Hexensabbath (Int), 1870; Cleopatra [Drei Jahrtausende] (Burleske), 1875; Luftschlösser (Posse), 1876; Fliegende Blätter (Quodlibet), 1876

Der Seekadett (komische Operette), 1876; Nanon, die Wirtin vom goldenen Lamm (Operette), 1877; Im Wunderlande der Pyramiden (Singspiel), 1877; Die letzten Mohikaner (Operette), 1878; Nisida (komische Operette), 1880; Rosina (Operette), 1881; Eine gemachte Frau (Posse), 1885; Die Zwillinge (Operette), 1885, collab. L. Roth; Die Piraten (Operette), 1886

Die Dreizehn (Operette), 1887; Signora Vendetta (Vaudeville-Operette), 1892; Rotkäppchen (Vaudeville-Posse), 1892; Die Mädchen-Schule (Vaudeville-Posse), 1892; Die wachsame Schildwache (Zwischenspiel), 1893; Freund Felix (Operette), 1893

ALFRED LOEWENBERG/ANDREW LAMB

Generalbass (Ger.: 'thoroughbass' or CONTINUO). The term itself was taken by Niedt (*Musicalische Handleitung*, i, Hamburg, 1700) to reflect the fact that the continuo bass line contains all or nearly all the other parts *generaliter* or *insgemein* ('in common'). Earlier, in 1611, C. Vincentius had called a bass part he added to Schadaeus's *Promptuarium musicum* the *basin vulgo generalem dictam*. But *generalis* is not German and cannot be a translation of 'continuo'; rather it was one of the optional names for figured or unfigured bass parts, like *basso principale* (Orfeo Vecchi, *Missarum liber secundus*, 1598 and *In septem Regii Prophetae psalmos*, 1601), *basso generale* (Fattorini, 1600; Billi, 1601), *sectione gravium partium ad organistarum usum* (Zucchini, 1602), *basso continuo* (Viadana, 1602) and *basso continuato* (Girolamo Calestani, 1603). That Viadana's so-called continuo bass part was, unlike the others, independent of the vocal bass may or may not be significant in this respect. Praetorius (*Syntagma musicum*, iii, Wolfenbüttel, 2/1619) headed his chapter on this subject 'De basso generali seu continuo', and he may have meant to give the two as optional alternative names; later German theorists such as Johann Staden (*Kurz und einfältig Bericht*, Nuremberg, 1626), Heinrich Albert (prefaces to *Arien*, i–ii, Königsberg, 1638–40) and Wolfgang Ebner (1653) either followed Praetorius in using both terms or kept only *bassis generalis*, in which they were followed by all later writers. The term Generalbass became a kind of synecdoche for the science of harmony in general; to learn Generalbass (or, as in France after Rameau, the *basse fondamentale*) meant to learn the science of tonal harmony, made more direct and clear by figured harmony than by the old German keyboard tablatures. Many writers from 1650 to 1850 scarcely mentioned the art of figured bass accompaniment in their treatises on the terms.

A further instructive use was as the basis for keyboard improvisation, either in the form of PARTIMENTO (as in Mattheson's *Exemplarische Organisten-Probe*, Hamburg, 1719) or as a harmonic framework on which to build a free improvisation (as in Niedt's *Musicalische Handleitung*, ii, Hamburg, 1706 and C.P.E. Bach's *Versuch*, ii, Berlin, 1762). Conversely, a composition could be reduced to its underlying harmonic structure in the form of a FUNDAMENTAL BASS, as demonstrated by Rameau (1722 onwards) and J.A.P. Schulz (1773). Instructive and analytical uses of Generalbass continued throughout the 19th century, as reflected by the large number of Generalbass and thoroughbass tutors published in Germany and England. Many composers also continued to use it as a form of shorthand notation in the process of composition. It gained new impetus in the theory of analysis through the influence that C.P.E. Bach's discussion of improvisation and the *Generalbassregeln* attributed to J.S. Bach had on the development of Heinrich Schenker's system. More recently it has lent itself again to instructive use in educational computer programs. For further analytical uses of figures *see* NOTATION, §III, 4(viii).

PETER WILLIAMS/DAVID LEDBETTER

Generali, Pietro (*b* Masserano, nr Vercelli, 23 Oct 1773; *d* Novara, 3 Nov 1832). Italian composer. His surname was Mercandetti until his father changed it when, bankrupt, the family moved to Rome. There Generali studied counterpoint with Giovanni Masi, interrupted by four months spent at the Conservatorio di S Pietro a Majella at Naples. He graduated from the Congregazione di S Cecilia in Rome and began his career as a composer of sacred music, producing his first opera only in 1800 (*Gli amanti ridicoli*). His first great success was *Pamela nubile*, composed for Venice in 1804 and repeated in Vienna in 1805. This was followed by other comic operas and farces which were widely performed in Italy and abroad (*Le lagrime d'una vedova*, *Adelina*, *La Cecchina*, *La vedova delirante*, *Chi non risica non rosica*, *La contessa di Colle Erboso*). He did not attempt *opere serie* until 1812 with *Attila*, but thereafter produced a considerable number; one of the most successful was *I baccanali di Roma* (1816), which was in demand for many years. In spring 1817, when his popularity began to be obscured by Rossini's successes, he went to Barcelona as director of the opera company at the Teatro de la S Cruz. He held the position for about three years, often travelling in Italy and abroad, and contributed one original work (*Gusmano de Valhor*, 1817) and some revivals. From late 1820 to 1823 he was in Naples, composing several operas and teaching; Luigi Ricci was among his pupils.

With the Naples period his activity as an opera composer came virtually to an end. In 1823 he became music director of the Teatro Carolino in Palermo. In spring 1825 he was replaced by Donizetti; he returned to his post the following season, but in 1826 he was charged with being *maestro venerabile* of a masonic lodge and expelled from the kingdom. In poor health and disappointed by the cold reception of his works, he returned to the north of Italy and in 1827 became *maestro di cappella* at Novara Cathedral, a position he held until his death. In his last years he had a few *opere serie* performed, without much success.

Generali composed at least 55 operas as well as sacred works and cantatas. Contemporaries had conflicting opinions of his work. His early comic operas sounded 'moderne' and even 'stravaganti' in their vigorous and brilliant orchestration and a certain unusual harmonic richness. But at the end of his career, like many composers of the same generation, he appeared a pale imitator of Rossini. In 1828 Tommaso Locatelli wrote of *Francesca da Rimini*: 'There prevails a certain carelessness, a certain triviality of style, as if the maestro had been working almost *per otium*' (*Gazzetta di Venezia*). In fact, in spite of their fine melodic qualities and effective delineation of character, his works sometimes lack substance and structural coherence and do not always escape a certain stylistic standardization, partly the result of completing many operas during rehearsals. His use of dramatic orchestral effects (including the crescendo) anticipates Rossini, but the attribution to Generali of the invention of the orchestral crescendo, as stated on his commemorative tablet in Novara and repeated by Pacini in his memoirs, would seem to be an exaggeration.

WORKS

*c*55 operas, 1800–33, incl. Pamela nubile (farsa, 1, G. Rossi, after C. Goldoni), Venice, S Benedetto, 12 April 1804, as La virtù premiata dall'amore, Vienna, Burg, 20 July 1805; Le lagrime d'una vedova (farsa, 1, G.M. Foppa, after C. Federici), Venice, S Moisè, 26 Dec 1808; Adelina [Luigina; Luisina] (farsa, 1, Rossi, after S. Gessner), Venice, S Moisè, 15/16 Sept 1810; La Cecchina suonatrice di ghironda (farsa, 1, Rossi), Venice, S Moisè, 26 Dec 1810; La vedova delirante (ob, 2, J. Ferretti), Rome, Valle, Jan 1811, as Bernardino, Barcelona, S Cruz, late 1815; Attila (os, Rossi), Bologna, Comunale, sum. 1812; Bajazet (os, 2), Turin, Imperiale, 26 Dec 1813; La contessa di Colle Erboso, ossia Un pazzo ne fa cento [La contessa di Colle Ombroso; Tutti matti; La finta contessa] (dg, 2, Foppa), Genoa, S Agostino, Dec 1814; I baccanali di Roma [I baccanti; Le baccanti di Roma] (os, 2, Rossi), Venice, La Fenice, 14 Jan 1816, vs (Bonn and Cologne, ?1818), rev. as Die Bacchanten, Vienna, An der Wien, 12 June 1820, as I baccanali aboliti, Milan, Re, sum. 1832; Gusmano de Valhor (os, ?Peracchi, after Voltaire: *Alzire*), Barcelona, S Cruz, 1 Dec 1817; Chiara di Rosemberg (op eroicomica, 2, A.L. Tottola), Napes, Nuovo, Dec 1820; Elena e Olfredo [Alfredo], Naples, S Carlo, 9 Aug 1821; Jefte [Il voto di Jefte] (azione tragico-sacra, 2, ?Foppa, ? after F. Gnecco), Florence, Pergola, 11 March 1827; Francesca da Rimini (os, P. Pola, after Dante: *Commedia*), Venice, Fenice, 26 Dec 1828, excerpts (Milan, 1831)

Other works: cants., incl. Roma liberata, 1801, Lo scudo d'Astrea, 1828; La caduta di Gerico (orat), Palermo, 1824; many sacred works, incl. masses, Requiem, Mag, lit, offs, seqs; didactic works, incl. solfeggi

ANDREA LANZA

Generalpause (Ger.). A rest for the whole orchestra, usually unexpected and sometimes marked with the letters 'GP'.

Genesis. English progressive rock band. It was formed when its members were at Charterhouse School, Surrey. Its first recording was in 1967, but the first 'mature' offering was *Trespass*, released in 1970, after PHIL COLLINS (drums) had joined PETER GABRIEL (vocals), Tony Banks (*b* 1950; keyboards) and Mike Rutherford (*b* 1950; bass guitar); Steve Hackett (*b* 1950; guitar) was recruited soon after. Their early style was marked by extended structures frequently shunning verse-refrain patterns, with a heavy reliance on keyboards (particularly the mellotron) and some extended tonal harmonic patterns. They were criticized for dispensing with blues scales and rhythms in favour of showy instrumental virtuosity. Their subject matter was typically progressive, with a general avoidance of love songs and with tales redolent of science fiction (*Return of the Giant Hogweed*, *Watcher of the Skies*), surrealism (*Supper's Ready* and much of the album *Selling England by the Pound*) and allegory (the concept album *The Lamb Lies Down on Broadway*). Their initial stage presence was marked by Gabriel's outrageous costumes, illustrative of the songs. After five studio albums in this style, Gabriel went solo (1975), Hackett followed, and the remaining trio began the move towards middle-of-the-road, soul-influenced stadium rock, and far greater commercial success. Bestselling albums included *Duke* (1980), *Abacab* (1981), *Genesis* (1983), *Invisible Touch* (1986) and *We Can Dance* (1991). These later works retained some stylistic fingerprints, particularly in the realm of harmony, but lyrics have become straightforward, textures thicker and rhythmically anticipatory bass and drum-kit lines the norm. Banks, Collins and Rutherford have all maintained separate recording careers since 1979, with Collins making several film appearances.

ALLAN F. MOORE

Genest, Charles-Claude (*b* Paris, 17 Oct 1639; *d* Paris, 20 Nov 1719). French poet and playwright. He was squire to the Duke of Nevers and tutor to Mlle de Blois, and was accepted into the Académie Française in 1698. He became abbot of St Vilmer Abbey. The regent awarded him a pension of 2000 livres. His *Divertissements de Sceaux* (Paris, 1712) is a primary source for the divertissements composed and performed for the Duchess of Maine prior to her famous 'Grandes nuits de Sceaux' (1714–15). These *fêtes*, 'pure amusement, unrehearsed ... a type of impromptu entertainment', were performed in Châtenay, near Sceaux, at the château of Nicolas de Malézieu. Jean-Baptiste Matho composed three 'petits opéras' (music lost) for these divertissements. Genest's book provided the texts for all the vocal music and describes the theatre, a tent of 'prodigious size' seating 300 spectators.

JAMES R. ANTHONY

Genet, Elzéar. *See* CARPENTRAS.

Geneva (Fr. Genève; Ger. Genf). Swiss city. In the Middle Ages, after the Roman occupation, the practice of church

music there differed slightly from that of Rome, possibly through the influence of the abbey of Solesmes. Calvin organized church music during the Reformation (from 1536): psalm singing took the place of the Mass and he had editions made of psalters such as the one by Clément Marot, which was continued by Théodore de Bèze and set to music by two French refugees, Guillaume Franc and Loys Bourgeois. Calvin railed against musical amusements, including dancing, which had hitherto been a favourite pastime, a sort of round-dance called a virolt being performed in the squares on summer evenings and nights. He had all the organs demolished or sold. The bands of fifes and trumpets disappeared and satirical and frivolous songs were condemned.

A musical renaissance began in the 18th century. In 1738 the theatre was established; in 1756 the organ in the cathedral of St Pierre was reconstructed and Gaspard Fritz, a violinist and composer born in Geneva, of a Hanover family, enlivened local music. He took part in concerts organized by Thomas Pitt, brother of the English statesman, and played before Voltaire. During this period famous musicians visited Geneva; for example, Mozart went there in 1766, and at about the same time Grétry wrote his opera *Isabelle et Gertrude* there. Rousseau wrote a *Lettre sur les spectacles* complaining about abuses in the theatre, which he wanted replaced by collective festivals. There was a considerable expansion of the arts in the 19th century: in 1826 there were 20 music teachers in Geneva; the Société de Chant Sacré was founded in 1827; in 1835 the Conservatoire de Musique was established and in its first winter had the attraction of a free course given by Liszt; an increasing number of concerts was promoted by the Société Musicale de Genève, founded in 1823 by the violinist Christian Haensel. Charles Samuel Bovy-Lysberg, François-Gabriel Gras and Hugo von Senger, instigators of several winegrowers' festivals in Vevey, Otto Barblan and Emile Jaques-Dalcroze, inventor of eurhythmics, also contributed to the increase of music in Geneva.

Spurred by the inauguration of a purpose-built concert hall and the founding of the city's first permanent orchestra, musical activity developed rapidly in the 20th century, matching Geneva's growth and importance as a seat of international organizations. The 1700-seat Victoria Hall, presented to the city in 1894 by a British patron of the arts, Daniel Barton, has an ornate shoebox design and fine acoustics. Most of the world's great orchestras, conductors and soloists have played there, and it has been the home of the internationally renowned music competition, the Concours International d'Exécution Musicale CIEM-Genève, since 1939, when the 19-year-old Arturo Benedetti Michelangeli won first prize. It has also been extensively used for recordings. The hall was devastated by fire in 1984, but such was the affection in which it was held by the Geneva public that it was restored to the original design.

Ernest Ansermet founded the Orchestre de la Suisse Romande in 1918 and remained music director for 50 years. During that period he was the city's presiding musical spirit, introducing much new music, attracting high-calibre soloists and developing the orchestra's international reputation through tours and recordings. He excelled in his interpretations of Debussy, Ravel and Stravinsky, and championed the music of Frank Martin. Ansermet's successors were Paul Kletzki (1967–70), Wolfgang Sawallisch (1970–80), Horst Stein (1980–85), Armin Jordan (1985–97) and Fabio Luisi (from 1997). The orchestra divides its time between concerts (with occasional visits to other French-speaking Swiss towns), opera and studio work for Swiss Radio. Despite Ansermet's pioneering efforts, the Geneva public is conservative in its musical taste.

The opera season has steadily grown in stature. Performances are given in the Grand Théâtre, which opened in 1879 and was severely damaged by fire in 1951, not reopening until 1962. Ansermet conducted there regularly from 1915, and many neglected and unfamiliar works were performed while Herbert Graf was director in the late 1960s. Under Hugues Gall, director from 1980 to 1995, the theatre won international acclaim for its imaginative casting and balanced repertory. Rolf Liebermann's fifth opera, *La forêt*, had its première there in 1987.

Gengenbach, Nikolaus (*b* Colditz, Saxony, *c*1590; *d* Zeitz, 4 Sept 1636). German music theorist and teacher. From 1609 he attended the Thomasschule, Leipzig, under Sethus Calvisius. About 1613 he became Kantor at Rochlitz, near his birthplace, and in 1618 at Zeitz. He is known by a school textbook, *Musica nova, Newe Singekunst, so wol nach der alten Solmisation, als newen Bobisation und Bebisation* (Leipzig, 1626/*R*). It begins with traditional elementary rules, but as early as the first theoretical part, solmization is contrasted with the new seven-step systems of bocedization (described by Calvisius) and bebization (after Hitzler), through which the difficulties of mutation could be avoided. The treatment of organ tabulation is also unusual for a school textbook. As the second, practical part Gengenbach published a self-contained collection of practice examples graded from the simple to the difficult. In the third part, which became a pattern for numerous appendixes in later school treatises, he explained Greek, Latin and Italian musical terms; he relied here on the third volume of Michael Praetorius's *Syntagma musicum* (2/1619) for ideas about the *stile nuovo*. He could justifiably call his book *Musica nova* because he no longer directed his students to Lassus but to Schütz, Schein and Viadana. *Musica nova* is a complete, gradated primer for music instruction which shows Gengenbach to be, along with Calvisius, Hitzler and others, one of the more progressive educators of the early 17th century.

MARTIN RUHNKE/DALE ALLEN SCOTT

Genin, Vladimir Mikhailovich (*b* Moscow, 31 March 1958). Russian composer. He graduated from the Moscow Conservatory (1983) and completed his postgraduate training in 1990 with Ledenyov (composition), Il'ya Klyachko (piano) and Yury Butsko (orchestration). He composes in various genres, showing a predilection for vocal music. He is frequently attracted by historiographical sources, old Russian literature, the Old Russian chronicles, the lives of the saints and the supernatural as the basis for his works.

Combining elements of various techniques of composition (tonal, polytonal and modal), Genin has developed the traditions of Sviridov, particularly in his colourful harmonic treatment of ancient folklore and old Russian motifs; it was to Sviridov that Genin devoted one of his published articles.

The work which brought the composer acclaim and recognition was *Plach po Andreyu Bogolyubskomu, Velikomu knyazyu Vladimirskomu* ('Lament for Andrey Bogolyubsky, Grand Prince of Vladimir'). The work was commissioned by the Vladimir Chamber Choir and composed in 1987 to mark the millennium of Russia's adoption of Christianity; it has been performed extensively and recorded by Melodiya (Moscow). In its use of choral recitative (a recitative based on chords) the work highlights the composer's individualized and expressive inflection. His next opus *Ispoved' blazhennogo Avgustina* ('The Confession of St Augustine') represents an original genre which may be described as musical hagiography. In 1992 Genin orchestrated Musorgsky's cycle *Pesni i plyaski smerti* ('Songs and Dances of Death') for the singer Hvorostovsky; it received its première in St Petersburg in 1993.

WORKS

(selective list)

Stage: Plach po Andreyu Bogolyubskomu, Velikomu knyazyu Vladimirskomu [Lament for Andrey Bogolyubsky, Grand Prince of Vladimir] (play, 7 scenes, Genin after Old Russ. chronicles, trad. text, historiographical sources), vv, chorus, 1987; Detskiy ostrov [Children's Island] (children's music theatre, S. Chorniÿ), 1988; Deystvo o strashnom sude/Apokrificheskie pesnopeniya [Play about the Terrible Judgement/Apocryphal Chants] (mystery play, 7 scenes, Genin after Russ. trad.), vv, nar, chorus, inst ens, 1990; Infernaliya, ili khozhdenie po mïtarstvam [Infernalia, or a Walk through Tribulation] (mystery play, 8 scenes, Genin after F. Dostoyevsky), chorus, 1991

Choral: Ispoved' blazhennogo Avgustina [The Confession of St Augustine] (cant., St Augustine, Bible: Gospels, Orthodox texts in Lat., Eng. and Russ.), vv, nar, chorus, 1990; Posledneye puteshestviye [The Last Journey] (chbr cant., Ye. Boratïnsky), B, chorus, orch, 1994; Song of the Sky Loom [Amerindian text], 1989; And there Shall be Delay no Longer (Russ. and Eng. poetry), 1990; Remember me O Lord (Bible: Gospels), 1990

1v, pf: Svet nezakatnïy [Never-Setting Light] (I.A. Bunin), song cycle, B, pf, 1985; Kitauyskaya pёysazhnaya lirika [Chinese Landscape Lyrics] (classical Chin. poetry), B, pf, 1986; Kak mïshi s kotom voyevali [How the Mice Went to War with the Cat] (N. Zabolotsky), B, pf, 1987

Inst: Intermezzo, vn, gui, pf, db, 1983; Sym. Poem, vn, va, orch, 1986; Sym. Conc., pf, orch, 1988; Sonata Repercussa, pf, 1995

Principal publishers: Muzïka, Sovetskiy kompozitor (Moscow)

Genishta, Iosif Iosifovich (*b* Moscow, 13/24 Nov 1795; *d* Moscow, 25 July/6 Aug 1853). Russian composer, conductor, pianist and cellist. Born into a musical family, he took lessons in keyboard and composition with J.W. Hässler (1747–1822) and by the early 1820s had gained a reputation as a skilful pianist as well as a composer. As a performer he was a renowned exponent of Classical music, and was responsible for bringing much of Beethoven's orchestral and instrumental music to the attention of Russian audiences for the first time. The earliest performances in Russia of Beethoven's piano concertos were the result of his skills as a promoter of large-scale musical events.

Genishta composed in a variety of genres, often in collaboration with other leading Muscovite composers of his day, but his success in his lifetime was principally for short vocal compositions. He composed a number of opera-vaudevilles, including *Bal'donskiye vodï* ('The Baldon Waters'; St Petersburg, 1825), a satire on fashionable health resorts, *Syurpriz* ('The Surprise'), based on a libretto of I. Velikopolsky (1829), and *Starïy gusar, ili Pazhki Fredrikha II* ('The Old Hussar, or Pages of Frederick II'), a collaboration with Alyab'yev, Maurer and Shol'ts. His songs are in a Romantic though generally unsentimental vein and include several to words by Pushkin, a set of five to texts by Victor Hugo (1842), arrangements of two Russian folktunes and Vasily Zhukovsky's *Mladïy Roger svoy ostrïy mech beryot* ('Young Roger seizes his sharp sword') (1824), an early example of the heroic songs which became popular towards the mid-19th century.

Genishta's instrumental music, in contrast to his songs, is based more firmly in a Classical idiom. Among his most noteworthy compositions are three sonatas for cello and piano (op.6, 1834; op.7, 1837; op.13, 1847), the second of which was particularly praised by Schumann, and a set of nocturnes for cello and piano (1841). He composed at least two string quartets, a sextet for piano, two violins, viola, cello and bass, and a piano sonata in F minor (1840), based loosely on Beethoven's 'Appassionata' Sonata op.57 and favourably mentioned by Schumann in one of his surveys of European keyboard music.

Genishta remained a dominant force in Moscow musical life up to his death, apparently becoming noted as a teacher during the 1840s. Berlioz, in his *Mémoires*, relates how, in 1847, Genishta acted as his rehearsal accompanist in the preparations for a concert performance in Moscow of his revised version of *La damnation de Faust*.

GEOFFREY NORRIS/NIGEL YANDELL

Genlis [née Ducrest de Saint-Aubin], **Stéphanie-Félicité**, Countess of (*b* Champcéry, nr Autun, 25 Jan 1746; *d* Paris, 31 Dec 1830). French writer, educationist and harpist. She received a thorough education in singing, dancing and in playing several instruments; her performances on the harp attracted attention in Paris while she was still a child. Her charm, wit and skill enabled her to make her way in salons as well as in public as a performer. At 16 she married the Count of Genlis, to whom she bore three children. In later years she became the mistress of the Duke of Orléans, the 'Philippe-Egalité' of the revolutionary period, whose legitimate children she brought up with her own. Her gifts as a teacher brought her (in the face of much opposition) the post of governess to the family of the Duke of Chartres; for her charges she wrote several comedies, and anticipated modern methods by fieldwork in botany and by the use of lantern slides. A painting by Mauzaisse shows her giving a harp lesson (see illustration); as one of the most intelligent and beautiful women of her day, she was much in demand by painters and sat for Romney as well as many others.

In 1791 she was forced to leave France for Switzerland and Germany, where she earned her living from harp lessons, writing and painting. Napoleon welcomed her back to France in 1802; she brought with her the eight-year-old Casimir Baeker, alleged descendant of a noble Berlin family, and devoted herself to his education as a virtuoso harpist. In 1811 her niece Georgette Ducrest married the harp virtuoso Bochsa; they were later divorced.

Mme de Genlis' voluminous writings, which reflect her sharp intelligence and independence of mind, include essays, novels, popular romances, plays, poetry, her memoirs and a manual of harp instruction (Paris, 1802, 1811/*R*); she also wrote songs with harp accompaniment, and a ballet. Her pedagogical works advocate novel methods of education and original music theories; her harp manual contains instructive practice material and innovatory methods of touch and technique, among which her efforts to accommodate the fifth finger are especially noteworthy. Her theory of harmonics incited La Borde to write his *Lettre à Mme de Genlis* (1806). Wilhelm Raabe mentioned her capacities as an educationist in his novel *Der Schüdderump* (1869).

Stéphanie-Félicité Genlis giving a harp lesson to her daughter and Princess Adélaïde of Orléans: painting by Jean-Baptiste Mauzaisse after ?Jean-Antoine-Théodore Giroust, 1830s (Château de Versailles)

HANS J. ZINGEL

Gennrich, Friedrich (*b* Colmar, 27 March 1883; *d* Langen, nr Frankfurt, 22 Sept 1967). German musicologist and philologist. He studied Romance philology with Gröber and Bédier and musicology with Ludwig in Strasbourg and Paris (1903–10), and took the doctorate at Strasbourg in 1908 with a critical edition of *Le romans de la dame à la lycorne et du beau chevalier*; he subsequently held university posts at Strasbourg (1910–19) and Frankfurt (from 1921). After completing the *Habilitation* in 1927 he taught at Frankfurt University until 1964, occupying a titular chair from 1934. His extensive library and scholarly papers were destroyed during the war, but he continued to work, instituting two privately published series, the Musikwissenschaftliche Studien-Bibliothek (1946–65) and the Summa Musicae Medii Aevi (1957–67). These constitute some 40 volumes in all; he edited and wrote them entirely by himself, showing remarkable tenacity and energy in his 70s and 80s. From 1938 he also edited the series of monographs Literarhistorisch-musikwissenschaftliche Abhandlungen (Würzburg), and contributed over 70 articles to the first edition of *Die Musik in Geschichte und Gegenwart*.

Gennrich's lifelong interest was in the secular poetry and monophonic music of France and Germany in the Middle Ages. His greatness lay in the equally high level of his skills as palaeographer, philologist and musicologist. His bibliographical work on manuscript sources, his classification of poetic and melodic forms, and the extension of rhythmic modal theory in his transcriptions are particularly important; in all these the influence of Ludwig is evident, most clearly in the first, which is much in the tradition of Ludwig's monumental *Repertorium* (1910). Gennrich's *Rondeaux, Virelais und Balladen* (1921–63), his *Bibliographie der ältesten französischen und lateinischen Motetten* (SMM, ii, 1957) and his *Der musikalische Nachlass der Troubadours* (SMM, iii–iv, xv, 1958–65) are representative of his work in this field. His bibliographical scholarship rests on two fundamental and highly influential principles: his belief in the unity of words and music in medieval song, and his 'repertory theory' which accounts for the many variants of these songs by maintaining that the great manuscript chansonniers which now survive were a late codification of an

oral tradition and reflect directly the repertories of medieval musicians.

His *Grundriss einer Formenlehre des mittelalterlichen Liedes* (1932) was the culmination of his early work on structure and form and a serious attempt to apply concrete scientific principles to the phenomenon of melody. In it he classified songs as litany-type, rondel-type, sequence-type and hymn-type, positing strong influence of sacred on secular music. His work on rhythm represents the most uncompromising continuation of Ludwig's, Beck's and Aubry's early rhythmic modal theories applied to secular song. He adhered exclusively to triple metre, but developed a highly sophisticated system of rhythmic 'progressions' to reflect the inner metre of the poem from line to line. This system, which involved three levels of rhythm – 'Distinktion (D-Rhythmik)', 'Einheiten (E-Rhythmik)' and 'Tongruppen (G-Rhythmik)' – is set out in his edition *Übertragungsmaterial zur Rhythmik der Ars Antiqua* (1954), his two books (1951, 1953–6) exemplify its final form.

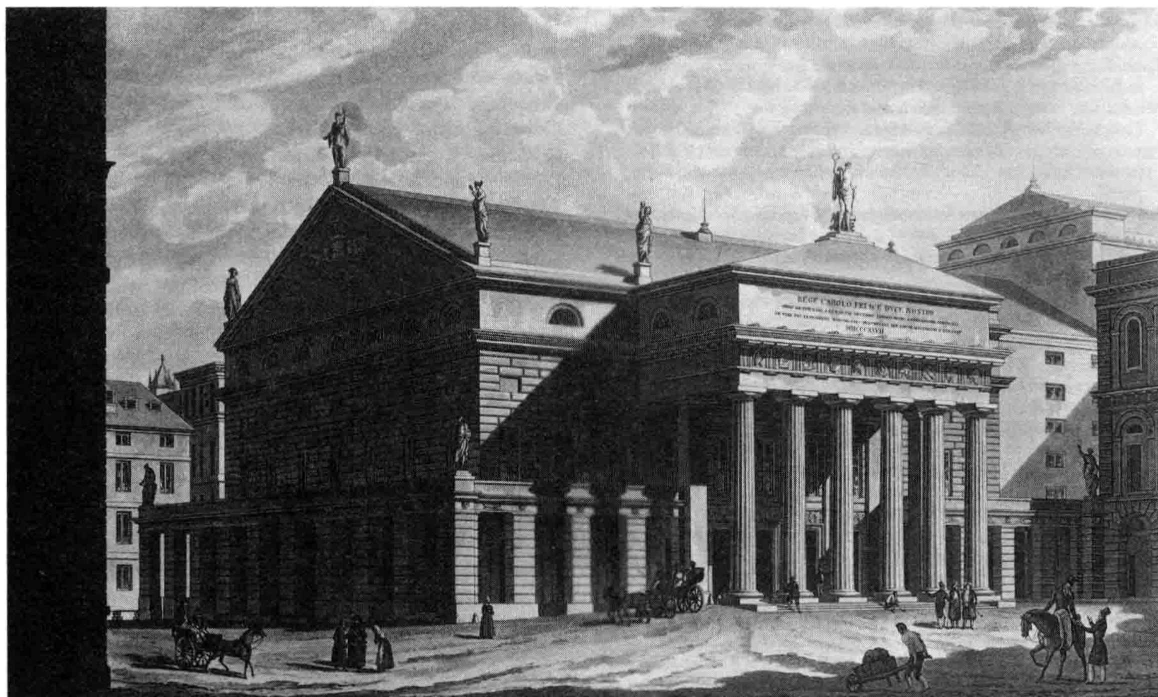
IAN D. BENT/R



Genoa (It. Genova). Italian city, capital of Liguria. The earliest recorded musical activity in Genoa dates from the Middle Ages, with documented references to troubadours (Bonifacio Calvo, Lanfranco Cigala), devotional songs (*cantegore*) and liturgical music. Early evidence for the cultivation of music includes the 12th-century neumatic codex in S Maria delle Vigne, the presence of organs, and the legacy of Bertolino Fieschi (1313), which ensured that singing was taught to clerics and boys in the cathedral of S Lorenzo. The Adorno family brought Franchinus Gaffurius to the city (1478), and Paolo Campofregoso (1494) established a choir in the cathedral where polyphony was taught.

More documents survive from the 16th and 17th centuries. A *cappella* of wind players was established in the Palazzo Ducale in 1540; in the 17th century this was augmented by singers and string instruments. Musicians who worked there include Ferdinando Pagano (1590–92), Francesco Guami (1594), Marco Corrado (1594–1625), Simone Molinaro (1625–36), Giovanni Paolo Costa (1636–8), his brother Giovanni Maria Costa (1640–56) and Giovanni Stefano Scotto (1659–74). The directors of the choir of the cathedral (founded by Lorenzo Fieschi) were Vincenzo Ruffo (1544), Andrea Festa (1552–9), Antonio Dueto (1576–84), Giovanni Battista Dalla Gostena (1584–9), his nephew Molinaro (1601–17), Carlo Abbate (1640–61) and Agostino Guerrieri. Organists at the two organs (built by Giovanni Battista Facchetti, 1554, and Giuseppe Vitani, 1604) were the Parma-born Orazio Briolano and the Genoese Lelio Rossi (de Rubeis), assisted by his nephew Michelangelo, Giovanni Battista Strata and Scotto. Music was important in the various churches, convents and monasteries: Francesco Antonio Costa worked in S Francesco di Castelletto, while Francesco Righi, Pietro Simone Agostini, Giovanni Maria Pagliardi and Matteo Bisso directed the choir (founded 1609) of the Jesuit church, S Ambrogio; Giovanni Battista Rossi and Giovanni Battista Bianchi belonged to the Somasci and Augustinian orders respectively, and in the monasteries of S Leonardo and S Bartolomeo the outstanding figures were Anfione Ferrabosco's daughters Elena and Laura. Willem Hermans from Flanders built organs for the churches of S Ambrogio, S Maria Assunta in Carignano and S Maria Maddalena. Printed editions for the *Dottrina Christiana* and the Piarists testify to the singing of *laude* in the city.

The Genoese publishing trade in the 16th and 17th centuries rivalled that of Venice and Rome; the leading printers included Girolamo Bartoli, Giuseppe Pavoni and the Calenzani family. Molinaro edited Gesualdo's *Partitura delli sei libri de madrigali a cinque voci*, published by Pavoni in 1613, and opened a music-printing business in Loano, whose management he entrusted to Francesco Castello.

The Genoese nobility fostered the cultivation of secular music: the Doria family maintained a choir directed by Ruffo (1545–6); Andrea Bianchi worked for the Cybo family (1611); a group of aristocrats brought Giulio Caccini to Genoa in 1595, while Francesco Rasi was a guest of the Grimaldis (1607) and Francesca Caccini of the Brignole Sale family (1617). Genoese citizens heard many musical events: at the port, in the streets and during processions, particularly of the confraternities (the *casacce*) and the city authorities. Performances were given by the academies, particularly the Accademia degli Addormentati (1587), to which Angelo Grillo (Livio Celiano), Gabriello Chiabrera and Ansaldo Cebà all belonged. The lutenists Marco Corrado, Dalla Gostena and Molinaro were active in Genoa. Many eminent composers, singers and instrumentalists born or educated in Genoa worked elsewhere, including Johannes and Antonius de Janua in the 14th and 15th centuries and, in the 16th and 17th centuries, Giovanni Battista Pinello di Ghirardi, Bernardino Borlasca, Michelangelo Rossi, Claudio Cocchi, Giovanni Battista Fossato, Giovanni Filippo Cavalliere, Giovanni Francesco Tagliavacca and Pietro Reggio.

Around 1640, when public theatres were beginning to develop in Venice, the Teatro del Falcone opened, presenting operas by Righi, Giovanni Maria Costa, Carlo Ambrogio Lonati and Alessandro Stradella. In 1677 the theatre, originally owned by the Adorno family, was acquired by a group of noblemen who opened its doors to a more popular audience. In 1680 it was taken over by the Durazzo family, who ran the theatre until it was acquired by the Savoia family in 1824. In the meantime, more theatres opened: S Agostino in 1702, the Teatro delle Vigne (*c*1730), and theatres in the summer retreats of Albaro, Sampierdarena, Sestri Ponente and Voltri. Featured composers were Pasquale Anfossi, Cimarosa, Isola, Luigi and Giocondo Degola. The opening of the Oratorio di S Filippo Neri (for which Boccherini wrote *Giuseppe riconosciuto*) encouraged the performance of oratorios and vocal and instrumental music, by composers

Teatro Carlo Felice, Genoa: engraving by G. Cattaneo after Orsolini

such as Domenico Balduino, Antonio Maria Tasso, Nicolò Uccelli, Luigi Cerro and Giacomo Costa.

In the 18th century a school of violin playing developed in Genoa; among its leading exponents were Martino Bitti and Giovanni Antonio Guido. Paganini began his career as composer and performer in the city at the end of the 18th century, but in later years appeared in Genoa only sporadically. After Paganini, the violinists Camillo Sivori, Nicola and Domenico De Giovanni, Agostino Dellepiane and Giovanni Battista Pedevilla all gained an international reputation.

Opera in Genoa received a new impetus in 1828, when the Teatro Carlo Felice (see illustration) opened with Bellini's *Bianca e Fernando*. The theatre hosted other important premières by composers including Donizetti (*Alina, regina di Golconda*, 1828), Mascagni (*Le maschere*, 1901) and Malipiero (*Giulio Cesare*, 1936); the Italian première of Strauss's *Arabella* was given at the Carlo Felice in 1936. The theatre was destroyed by bombing in September 1943; it reopened with *Il trovatore* in October 1991. Orchestral and chamber concerts are given by a number of organizations, notably the Giovine Orchestra Genovese, founded in 1912.

In 1829 Antonio Costa founded the Scuola Gratuita di Canto for the training of opera singers; after various transformations it became the present Conservatorio di Musica N. Paganini. The library holds autograph scores by Galuppi and valuable letters, documents and papers of Paganini. Musicological associations in Genoa include the Instituto di Studi Paganiniani (founded in 1972 and run by the city since 1990), and the Associazione Ligure per la Ricerca delle Fonti Musicali (1990). The Premio Paganini international violin competition has been held regularly since 1954, and the Festival Internazionale del Balletto di Nervi was inaugurated in 1955.

MARIA ROSA MORETTI

Genouillère (Fr.). *See* KNEE-LEVER.

Genovés (y Lapetra), Tomás (*b* Zaragoza, 29 Dec ?1806; *d* Burgos, 5 April 1861). Spanish composer. He was a choirboy in Zaragoza and later moved to Madrid, where he gave singing lessons. Under the influence of Rossini, he set Romani's libretto *Enrico e Clotilde, ossia La rosa bianca e la rosa rossa* (previously set by Mayr), from an episode in the Wars of the Roses. In 1832 he wrote numbers for the zarzuela *El rapto*, to a text by the journalist Mariano José de Larra. Awarded a pension by the Spanish government, Genovés went to Italy in 1834, residing first at Bologna, where he wrote religious compositions, operas and programmatic orchestral works, the last with such bellicose titles as *Numancia destruída, Los últimos días del sitio de Roma* and *El sitio de Zaragoza*. Ricordi published his collection of ballads and duets, *Sere d'autunno al Monte Pincio* which were praised for their melodic appeal.

Genovés's first opera performed in Italy was *Zelma* (1835, Bologna); its agreeable melodies are said to have pleased a public that desired easy amusement. Other operas of his Italian years were *La battaglia di Lepanto* (1836, Rome), *Bianca di Belmonte* (1838, Venice) and *Iginia d'Asti* (1840, Naples). He continued to be influenced by Rossini, but employed musical themes reminiscent of the Spanish zarzuela. *Luisa della Vallière* (1845) brought him modest success when it was performed at La Scala. In 1846 he returned to Madrid, where *Luisa della Vallière* had four performances at the Teatro de la Cruz in February and March.

He married the singer Elisa Villó in 1851 and spent his last decade mostly at his retreat in Burgos.

JOHN DOWLING

Genre. A class, type or category, sanctioned by convention. Since conventional definitions derive (inductively) from concrete particulars, such as musical works or musical practices, and are therefore subject to change, a genre is probably closer to an 'ideal type' (in Max Weber's sense) than to a Platonic 'ideal form'.

Genres are based on the principle of repetition. They codify past repetitions, and they invite future repetitions. These are two very different functions, highlighting respectively qualities of artworks and qualities of experience, and they have promoted two complementary approaches to the study of genre. The first is properly a branch of poetics, and its students have ranged from Aristotle to present-day exponents of an analytical aesthetic. The second concerns rather the nature of aesthetic experience, and is best understood as an orientating factor in communication. This perspective has been favoured by many recent scholars of literature and music, and reflects a more general tendency to problematize the relation between artworks and their reception.

1. TYPOLOGIES. Since Aristotle, a central concern of Western poetics has been with the classification of works of art. The principal role of classification is arguably pragmatic – to make knowledge both manageable and persuasive – but its effect can be to shape, and even to condition, our understanding of the world. In this sense the underlying tendency of genre is not just to organize, but also to close or finalize, our experience. This implies a closed, homogeneous concept of the artwork, where it is assumed to be determinate and to represent a conceptual unity. Only then is it readily classifiable.

In literary studies, and in studies of operatic and other vocal music from the Western tradition, typologies have been conditioned in large part by the philological orientation of scholarly inquiry, at least until relatively recently. This has privileged classical genres such as tragedy, comedy, epic and lyric, with the novel a more recent addition. A classical emphasis has likewise shaped ethnological classifications, foregrounding genre titles such as ballad, legend, proverb and lyric folksong, all of which have been used extensively as a focus for the collection and classification of folk poetry and folk music. In the late 18th and early 19th centuries some of these genre titles began to infiltrate art music, where they joined functional titles such as those associated with courtly, rural or (increasingly) 'national' dances. Since these genres, like key characteristics and affective figures, were part of a larger complex of representations with a basis in rhetorical concepts, they had an explicit communicative function. This function was rather less apparent (though it was by no means excluded) when the genre title referred to a work of so-called 'absolute music'. Titles such as sonata, symphony and quartet did, after all, mark a quest for autonomy within instrumental art music.

The repetition units that define a musical genre can be identified on several levels. In the broadest understanding of the concept, they may extend into the social domain, so that a genre will be dependent for its definition on context, function and community validation and not simply on formal and technical regulation. Thus the repetitions would be located in social, behavioural and even ideological domains as well as in musical materials. The lyric piano piece of the early 19th century might be considered an undivided genre in these terms, and so might contemporary rock music. A narrower understanding of genre, and a more common usage, separates musical works from the conditions of their production and reception, and identifies genre as a means of ordering, stabilizing and validating the musical materials themselves (the lyric piano piece has its own constituent genres, as does contemporary rock). This was largely the understanding of *Gattung* promoted by Guido Adler in his influential scheme for *Musikwissenschaft*. Yet even here repetition units would normally reach beyond 'the notes themselves', embracing instrumentarium and performance-site, as well as less tangible qualities such as 'tone' and 'character'. Formal archetypes and stylistic schemata may well be constitutive of a genre, but they are not in any sense equivalent to it. Indeed a genre, working for

stability, control and finality of meaning, might be said to oppose the idiomatic diversity and evolutionary tendencies characteristic of both form and style.

The classification of genres – essentially a systematic activity – begs larger historical questions. How are genres created, and why? Within literary criticism, several evolutionary models have been proposed (see Bovet and Brunetière). Of these, one of the most persuasive was the theory developed by Russian Formalist critics such as Shklovsky, Tïnyanov and Tomashevsky. Here the governing principle is one of 'struggle and succession' (Shklovsky), a process, internal to the art, in which the dominant or canonized line comes into conflict with co-existing minor lines and is eventually overthrown by these minor lines, now duly canonized. New genres emerge, then, as accumulating minor devices acquire a focus (a dominant), and challenge the major line. An alternative view, and one applied more directly to music, emerges from Adorno's *Aesthetic Theory*. Here the dialectic is not between major and minor lines, but between Universal and Particular, where deviations from a schema in turn generate new schemata. Moreover, the deviations are seen as indispensable to the function and value of the schema in the first place. 'Universals such as genres . . . are true to the extent that they are subject to a countervailing dynamic'.

Unlike the Russian Formalists (or for that matter New Critical students of genre such as Northrop Frye), Adorno located artistic genres within a larger social dialectic, and for that reason his analysis is historically contingent. Thus he could refer to 'nominalism and the demise of artistic genres' in the 19th century. Similar arguments were presented by Irving Babbitt and Croce, and they were made specific to music by Carl Dahlhaus, who claimed that from the early 19th century onwards musical genres rapidly lost substance. The suggestion here is that the performance- and genre-orientated musical culture of the 18th and early 19th centuries was increasingly undermined by a swerve towards the musical work. This work-centred perspective (the product of a more general intellectual shift from doctrinal to rational knowledge) was ultimately formalized in the discipline of music analysis, which tended to minimize the power of genre in its discourses. Musical works, in other words, were less concerned to exemplify genres than to make their own statement. It is notable, then, that genre definitions and classification systems have played a subsidiary role in discussions of 20th-century art music, though 'the quest for norms' (Ki Mantle Hood) continues to inform the work of folklorists and ethnologists such as Alan Dundes and Dan Ben-Amos.

2. Genre and social practice. From the mid-1960s a very different approach to the study of genre developed, due in large part to a shift in critical perspective from the nature of artworks to the nature of aesthetic experience. That shift was accompanied by a parallel shift in the understanding of genre from the classification of historically sedimented categories towards a more fluid, flexible concept concerned above all with function, with the rhetoric or 'discourse' of genre within artistic communication and reception. The simplest semiology recognizes the 'sign' as bipartite, with both parts essential to its meaning. Thus a genre title is integral to an artwork and partly conditions our response to its stylistic and formal content, but it does not create a genre. Nor will a taxonomy of shared characteristics of itself define a genre. It is the interaction of title and content that creates generic meaning. Clearly, within this interaction, the content may subvert the expectations created by the title, though it can do so only where a sufficient correspondence of title and content has been established in the first place. In this sense, as Heather Dubrow has noted (in her chapter 'The Function of Genre'), a genre behaves rather like a contract beween author and reader, a contract that may be purposely broken. Genre, in short, is viewed as one of the most powerful codes linking author and reader.

While this approach was developed above all in literary studies, it very soon found applications in ethnology and in art music. A seminal ethnological study was William Hanks's 'Discourse Genres in a Theory of Practice', where a genre is viewed as a pairing of (socially and historically produced) conventions and expectations. This highlights the 'communicative properties' of genre. Genres, according to Hanks, 'consist of orienting frameworks, interpretive procedures, and sets of expectations', and as such they may be manipulated for a wide variety of communicative ends. This more flexible, open-ended conception of genre has also been developed in recent writing by musicologists. One signal of a renewed interest in the subject was a group of papers on genre at the Annual Meeting of the American Musicological Society in 1986, given by Leo Treitler, Anthony Newcomb, Laurence Dreyfus and Jeffrey Kallberg. Kallberg in particular went on to develop the notion of genre as contractual in two influential papers: 'Understanding Genre: a Reinterpretation of the Early Piano Nocturne', and 'The Rhetoric of Genre: Chopin's Nocturne in G minor'. By revealing that Chopin subverted genre titles in ways that created specific historical meanings, he demonstrated that the communicative properties of genre depend not only on a consensual code that enables meaning to be created, but also on the 'reconstruction of contexts' in a historiographical sense.

An attractive aspect of this understanding of the concept has been its capacity to accommodate the mixing or blending of genres, a device that might well confuse the classifier, but which greatly strengthens the communicative and programmatic potential of genre. Since genres possess certain recognizable identifying traits (genre markers), they can be counterpointed within an artwork to generate a 'play' of meanings which may, in some later style systems, extend into irony or parody, or even point beyond the work into the sphere of referential meaning. Thus in the 18th century a sequence of generic 'topics' (Leonard Ratner), closely tied to conventional affective meanings, might well have registered more forcefully with contemporary listeners than any sense of the work as a unified structure. The work, in other words, would have been heard in sequential terms – less a structure than a succession. In the 19th century there was a greater degree of cross-fertilization, as emotionally loaded, popular genres increasingly penetrated the world of the symphony, the sonata, the quartet. In such cases an ironic mode may be introduced. The work is not itself a march, a waltz or a barcarolle but rather refers to a march, a waltz or a barcarolle. The popular genre is part of the content of the work rather than the category exemplified by the work.

By the end of the 19th century this counterpoint of genres could be a powerful agent of expression, strongly suggestive of reference. Robert Samuels has suggested (in his chapter 'Genre and Presupposition in the Mahlerian

Scherzo') that the play of three generic types in the Scherzo of the Sixth Symphony (march, ländler, folkdance) succeeds in 'teasing out' a referential meaning which is neatly embodied in the topos of the Dance of Death, itself a resonant allegorical motif in Western culture. The strength of genre for Samuels's purpose is its double existence as a musical category and a social construct, inviting a journey through musical intertextuality to the world beyond the notes. What the analysis demonstrates is that the 'demise of artistic genres' is real only to the extent that an *auteur*-based model of history is allowed to dominate, and with it a one-sided understanding of genre as a generalized typology of shared materials. The recognition that a social element can participate in both the definition and the function of genre releases its energy and confirms its continuing value for our culture.

JIM SAMSON

Gens, Véronique (*b* Orléans, 19 April 1966). French soprano. Having won prizes in her native city, and in early music at the Paris Conservatoire, Gens made her début with Les Arts Florissants in 1986. Under William Christie's guidance she quickly became a proficient and appealing interpreter of, among others, Purcell, Lully and Rameau, including appearances at the Aix-en-Provence Festival in *The Fairy-Queen* (1989) and *Castor et Pollux* (1991), both recorded. She sang in Lully's *Phaëton* at the reopening of the Lyons Opera in 1993, followed at the same theatre with Countess Almaviva (1994). The same season she took part in a production, jointly staged by the Théâtre du Châtelet and Covent Garden, of Purcell's *King Arthur*. She has since added Idamante, Donna Elvira and Lully's Galatea to her stage repertory. In addition to Christie, Gens has worked with such conductors as Minkowski, Malgoire, Herreweghe, Jacobs and Rousset in the Baroque repertory, and in 1998 recorded an admired Fiordiligi in Jacobs's set of *Così fan tutte*. With Herreweghe, in concert and on disc, she has undertaken Mary in *L'enfance du Christ*. She is also a sympathetic, involving interpreter of French *mélodies* as can be heard on a disc of Fauré, Debussy and Poulenc. Her flexible, finely tuned voice, deployed with an innate sense of style, is used with eloquence and a strong sense of dramatic purpose.

ALAN BLYTH

Gent (Flem.). *See* GHENT.

Gentian [Gentien, Gentiam] (*fl* ?Paris, 1538–59). French composer. 20 of his extant chansons appeared in Attaingnant's publications in Paris between 1538 and 1549. Moderne of Lyons printed one song, *Du fons de ma pensée* (Marot's version of the psalm *De profundis*), in 1544, and Granjon printed four in his first and second *Trophée de musique* (RISM 1559[14], 1559[15]). Most of the texts are anonymous *épigrammes* or *voix de ville* composed in a largely homophonic manner akin to that of Sandrin. O *foible esprit* represents one of the first French settings of a complete sonnet; this one is to a text by Du Bellay. The popularity of three of Gentian's chansons is attested by their intabulations for lute by Alberto da Ripa, Guillaume Morlaye and Julien Belin. Three chansons (*Si quelque fois*, *Toutes les fois* and *Vous qui voulez*) were reprinted by Le Roy & Ballard with attributions to De Bussy.

WORKS

all for four voices

Celle qui a fascheux mari, 1543[8], ed. in Call, ii; C'est trop pensé, 1545[12]; C'est ung grand cas, Onziesme livre contenant xxviii chansons nouvelles, 4vv (Paris, 1541); De ce brandon, 1543[7-8], ed. in Call, ii; De faire bien et servir loyaulement, 1543[8]; Dieu qui conduictz, 1549[24] (intabulation in 1562[27]); Dieu te garde bergiere, 1552[4]; Du fons de ma pensée, 1544[9]

SAMUEL F. POGUE/FRANK DOBBINS

Gentile, Ada (*b* Avezzano, 26 July 1947). Italian composer. She took diplomas in piano playing (1972) and composition (1974) and then took Petrassi's postgraduate composition course at the Accademia di S Cecilia in Rome

(1975–6). She made her name in various international competitions (Gaudeamus 1982, ISCM, Budapest 1986 and Essen 1995), and was honoured 'for cultural services' by the Polish Ministry of Culture in 1988. In parallel with her compositional activities she has been adviser of the Venezia Biennale Festival (1993–7) and artistic director of various musical institutions: Nuovi Spazi Musicali, Rome (since 1979), the Goffredo Petrassi Chamber Orchestra, Rome (1986–8) and the opera house in Ascoli Piceno (1996–9). She was appointed to teach at the Rome Conservatory in 1978. Her music displays an experimental attitude towards timbre and sounds are often presented at the limit of perceptibility. The cornerstone of her expressive idiom is an ethereal soundworld in which the tiniest gestures emerge elegantly from silence while the musical texture is continually fragmented and recomposed. Her work is notable for structural unity and a stylistic security. In her chamber and orchestral pieces, she aims to create a counterpoint of diffused sounds which work against each other in extremely rapid rhythms to produce a kaleidoscopic, continually changing web of sound.

SUSANNA PASTICCI

Gentile, Ortensio (*fl* 1616). Italian composer. He is known only by his *Il primo libro de madrigali a cinque voci* (Venice, 1616), which he dedicated to the Duke of Mantua. It includes one madrigal with continuo ('in modo di sinfonia') and a setting over the romanesca. The first madrigal in the book abounds in syncopation and textural contrasts but includes some unusual harmonic effects suggesting that Gentile found five-part writing difficult.

COLIN TIMMS

Gentili, Giorgio (*b* Venice, ?1669; *d* ?Venice, after 1730). Italian composer and violinist. Appointed as a violinist to the ducal chapel of S Marco on 10 July 1689, he acquired the duty of playing solos for the Elevation in 1693. He remained in the same post until at least 1731, in which year he was one of the signatories to the document attesting Lotti's authorship of the disputed madrigal *In una siepe ombrosa*, styling himself first violinist in the ducal chapel. The few written references to Gentili in the intervening years confirm his continuing attachment to S Marco, though from about 1702 to about 1717 he also held the post of *maestro di istromenti* at the Ospedale dei Mendicanti.

Gentili left six collections of printed instrumental music comprising 72 works. Externally similar (and perhaps not coincidentally so) to works in the same genres by his fellow citizen and contemporary Tomaso Albinoni, they reveal a competent but not very individual creative personality, although the violin technique required is rather more demanding than that in Albinoni's works of the same period. The trio sonatas of Gentili's op.1 (1701) command interest through their absorption of display elements associated with the solo sonata and concerto genres and the presence of 'solo' and 'tutti' cues in three slow movements, which suggests performance with doubled instruments. Both features are exploited more fully in the two sets of concertos, opp.5 and 6, the 'concerti' of op.2 being chamber sonatas. (*MoserGV*; *ScheringGIK*)

MICHAEL TALBOT

Gentilucci, Armando (*b* Lecce, 8 Oct 1939; *d* Milan, 12 Nov 1989). Italian composer and writer on music. He studied composition at the Milan Conservatory with Donatoni and Bettinelli, and received the diploma in 1963. Gentilucci also took diplomas in the piano (1961) and choral music and direction (1962) and courses in conducting with Votto there. He taught at the conservatories in Bolzano and Milan from 1964 to 1969, when he became director of the Instituto Musicale in Reggio nell'Emilia, a post which he held until 1989. During the 1970s he was one of the organizers of Musica/Realtà, and one of the founders of the journal of the same name which he also edited.

His musical and critical output of the 1960s is characterized by the search for a musical idiom beyond both Adorno's idea of the Stravinsky–Schoenberg conflict, and aleatory procedures, maintaining a strain of contemporary music which has its roots in composers such as Bartók, Varèse, Ives and Dallapiccola. From his earliest works Gentilucci's concern is with sound, understood as a synthesis of timbre, harmony and melody; out of this he derived a compositional process which evolves from moment to moment. He was critical of the 'aesthetics of negativism and informality' in music, with a point of reference for his own development lying in the work and ideas of Nono. Following Nono's example, at the beginning of the 1970s he linked his pieces to political and social themes (e.g. *Canti di Majakovskij*, *Cile*). An important aspect of this phase, which came to an end with *Che voi pensiate* in 1975, was an enriched conception of sound, including electronic manipulation (as in *Come qualcosa palpita nel fondo*) and Ives-like quotations in the famous *Studi per un Dies irae*. The large amount of music produced from 1976 to 1978 is a witness to a final maturity, with a wide variety of source material taken as a point of departure. His approach could embrace echoes

from the past (contrapuntal techniques, quotations, quasi-tonal centres) as much as avant-garde procedures and sounds, while retaining a coherent style far from the spirit of collage. The first significant work of this last period was *Il tempo sullo sfondo* for orchestra of 1978, the year he wrote his long essay *Oltre l'avanguardia: un invito al molteplice*, which during the 1980s became a reference point of musical theory for the new generation of Italian composers. Central too in these years were his opera *Moby Dick* (1986–8), his passionate, lyrical works for women's voices and his many pieces for solo instruments.

GIORDANO FERRARI

Gentlemen's Concerts. A concert series given in Manchester from 1770. *See* MANCHESTER, §2.

Genuino, Francesco (*b* ?Naples, *c*1580–85; *d* ?Naples, before 1633). Italian composer. A member of a prominent family in Naples, he may have been identical with, or related to, the abbot Francesco Genoino, imprisoned in 1620 with other relatives of Giulio Genoino, who led an uprising against Cardinal Borgia, the Viceroy of Naples. Girolamo Genuino's book of anagrams of names, *Metamorphoses nominum* (Naples, 1633), contains one for Francesco Genuino in the past tense, praising his musical ability. The first and fourth of Genuino's five books of five-voice madrigals are lost. The remaining books show that the style of his madrigals changed little over his career. They are serious works, with only a few chordal phrases in triple metre and no fast declamation on repeated notes. Their textures, more than those of any other Neapolitan madrigals of the period, avoid the lightness of the canzonetta. Almost two thirds of the phrases are points of imitation, whose rhythmically nervous motifs are often crowded together, when not doubled in 3rds or 10ths. Neither these motifs nor the chordal phrases are as melodically cogent as those of Fontanelli, Gesualdo or Nenna. Genuino's second book (1605), to texts by Guarini and Tasso among others, shows less contrapuntal mastery than the later books; there are several parallel octaves and duplicated contrapuntal lines. *Altri goda al tuo canto* is partly modelled on Fontanelli's setting of the same text of 1595. There is only a little chromaticism of the type Gesualdo used. The third book (1612) has none of the earlier contrapuntal crudities. It is the most imitative of the three extant books and includes less repetition than do other Neapolitan madrigal books of the time. Poets represented include Marino and Rinuccini along with Guarini.

There are more *durezze e ligature* than in the earlier book. The madrigals in the fifth book, to texts by Guarini, Marino and Murtola, are shorter than other Neapolitan madrigals but more complex than most. Incessant rhythmic activity, in which all the lower voices take part, makes the points of imitation quite involved. Dissonances are handled freely, and there are some striking deceptive cadences, original *durezze e ligature* and novel entry effects.

KEITH A. LARSON

Genus (Lat., pl. *genera*; Gk. *genos*, pl. *genē*: 'kind'). A term in the tradition of ancient Greek music theory defining various dispositions of (1) the two movable notes within the tetrachord and (2) patterns of rhythm. The term is also used in its common logical sense to define other distinct groupings that appear from time to time in the theoretical tradition.

There were three basic genera of the tetrachord: diatonic, chromatic and enharmonic; the diatonic and chromatic genera could also exhibit various 'shades' (*chroai*) or 'species' (*eidē*). In the treatise of Aristoxenus, it is clear that these shades are merely abstractions of the possibility for nearly infinite variation in the pitch of the two movable notes, as long as they remained within a certain region and retained a proportionate relationship to each other and to the two outer notes of the tetrachord. Nevertheless, in the later theoretical tradition the six shades assume the status of specific subcategories of the genera (for a chart of the six shades *see* GREECE, §I, 6(iii)(c)). In patterns of rhythm ARISTIDES QUINTILIANUS defined three genera: equal, sesquialteran and duple; but he conceded that some add a fourth, sesquitertian. Dactylic or anapestic rhythms are equal; paeonic, sesquialteran; and iambic and trochaic, duple. (*See also* GREECE, §I, 7(ii).)

THOMAS J. MATHIESEN

Genzmer, Harald (*b* Blumenthal, nr Bremen, 9 Feb 1909). German composer. He studied theory with Hermann Stephani in Marburg (1925–8) and composition with Paul Hindemith at the Berlin Hochschule für Musik, where his teachers also included Rudolph Schmidt (piano), Alfred Richter (clarinet), Curt Sachs and Georg Schünemann (musicology). After completing his studies, he worked as chorus répétiteur and vocal coach at the Breslau Opera (1934–7). From 1938 to 1940 he was on the staff at the Volkmusikschule, Berlin-Neukölln. He later served as professor of composition and acting director at the Musikhochschule, Freiburg (1946–57) and chair of composition at the Hochschule für Musik, Munich (1957–74).

Unlike many of his contemporaries, Genzmer was not interested in composing abstract music; instead, he consistently placed the human being at the centre of his compositional activity. Erich Valentin aptly described Genzmer as a 'humanist among musicians', a title originally given to Paul Hoffhaimer. An interest in amateur music-making, particularly music involving young people, has been an enduring aspect of his huge output (over 300 works). Combining Hindemith's craftsmanship with the emotive aural sensuality of Richard Strauss, the expressive character of his works is as important to his style as harmonic, melodic and rhythmic elements. His technique of motivic development places him among the Classical symphonic composers. In spite of its technical and aesthetic demands, his music is accessible and remains intelligible to a wide range of audiences.

JÖRG RIEDLBAUER

Geoffroy, Jean-Baptiste (*b* diocese of Clermont, 1601; *d* Paris, 30 Oct 1675). French composer. He entered the Jesuit order as a novice in 1621, studied grammar, the humanities, rhetoric and philosophy at Paris, and from 1660 until his death directed the music at the convent of his order in Paris (see A. de Backer and others: *Bibliothèque de la Compagnie de Jésus*, ed. C. Sommervogel, iii, Brussels, 1892). Three volumes of sacred music by him are known to have been published in Paris: *Musicalia varia ad usum ecclesiae* (1650, lost); *Musica sacra ad vesperas aliasque in ecclesia preces* for one, two and four voices with organ (1659); and a companion volume to the latter, *Musica sacra ad varias ecclesiae preces ... pars altera* (1661), for four voices. It is noteworthy that he allowed the works in these last two books to be sung either by a solo voice (accompanied or unaccompanied) or by a group of solo voices contrasted with a full chorus (see D. Launay: *La Musique religieuse en France du Concile de Trente à 1804*, Paris, 1993, p.322). There are a few other sacred works in manuscript.

□

Geoffroy, Jean-Nicolas (*d* Perpignan, 11 March 1694). French composer, organist and writer. He was the author of the largest collection of harpsichord music of 17th-century France. The only reliable information about him is given on the title-page of his harpsichord book and in a few archival documents at Perpignan. There are a number of references to 'Geoffroy' or to 'Nicolas Geoffroy' in Parisian documents between 1658 and 1713, suggesting that at least two musicians of this name were active there, but it is impossible to know how many more there were or how they were related. Jean-Nicolas was organist of St

Nicolas du Chardonnet in Paris, probably until 1690. In that year his name first appears in documents at Perpignan and he was there accused by the cathedral organist, Villeneuve, of having usurped his functions and perhaps his salary. Geoffroy may have been engaged for his technical knowledge, since Jean de Joyeuse, builder of the new organ, had failed despite his best efforts to instruct Villeneuve in the maintenance of the organ, especially the Parisian-style reed stops. At any rate, on 8 April 1691, 'Jean-Nicolas, dit Jofré' took over Villeneuve's post by mutual consent and was formally installed as organist of the cathedral on 15 August 1692. At his death, Villeneuve returned, and the organ no doubt fell into disrepair.

The only music clearly ascribed to Jean-Nicolas is a manuscript copy, *Livre des pieces de clavessin de tous les tons naturels et transposéz* (*F-Pn* Rés. 475; ed. J. Frisch, Bourg-la-Reine, n.d./*R*), made after his death and once owned by the choir school at Rouen, of no fewer than 213 pieces 'drawn from his works', of which 42 exist in a second, transposed version. Most are grouped into 16 harpsichord suites (including four transpositions), but there are also a few pieces for viols, dialogues for viols and harpsichord, and organ pieces.

Although most of his pieces are typical of the period and resemble those of Lebègue as much as anyone's, their style and particularly their harmony reveal Geoffroy as an extraordinarily inventive and even experimental composer. However, he had little ability to control his ideas and many of his startling dissonances and chromatic inflections have an arbitrary effect instead of intensifying the expression of the music. He was fond of mixing the major and minor scales and was prodigal with the resulting false relations; the part-writing is often harmonically out of phase, producing anticipations, retards and clashing 2nds; his textures sometimes generate complete 7th and 9th chords in such a way as to make them sound like chords in their own right. When by chance or by extra care his experiments succeed, the effect is arresting, expressive and forward looking. Another volume that belonged to the choir school at Rouen (*F-Pn* Rés 476) has often been misattributed to Geoffroy but there is no musical connection.

DAVID FULLER (with BRUCE GUSTAFSON)

Geoffroy-Dechaume, Antoine (*b* Paris, 7 Oct 1905). French musicologist, organist and harpsichordist. He studied the organ with Eugène Gigout and composition with Georges Caussade at the Paris Conservatoire (1923–31). He was organist at Notre-Dame de Pontoise (1922–37), professor at the Collège de Normandie (1937–9) and harpsichordist with such societies as Ars Musica before becoming a professor at the Schola Cantorum in Paris (1962–4) as well as professor of interpretation and harpsichord at the university and conservatory in Poitiers (1967). In 1968 he was a visiting fellow at University College, Cambridge, and was awarded the Cambridge MA.

Geoffroy-Dechaume's interest in early music and its interpretation was stimulated by Arnold Dolmetsch, a family friend from the time of his residence in Fontenay-sous-Bois (1912) and one who continued to influence his musical development through personal and scholarly contact. Geoffroy-Dechaume's studies relate in particular to Rameau and Couperin as well as to more general questions of performing techniques (notably for the organ and harpsichord), transcription, realization and interpretation. He has applied the results of his research – with a rigour which sometimes arouses controversy – to the preparation of many concerts of early music given by the BBC, the ORTF, the Orchestre de l'Opéra, and the Orchestre National de Paris (1947–52), by the Société de Musique d'Autrefois (from 1955), and at the Aix-en-Provence (1955), Bath (1965) and English Bach festivals (Oxford, 1965 and 1968).

CHRISTIANE SPIETH-WEISSENBACHER

George, Michael (*b* Thetford, 10 Aug 1950). English bass-baritone. A chorister at King's College, Cambridge, he later studied at the RCM with Gordon Clinton, making his début in 1972 at The Maltings, Snape, in Handel's *Saul*. He has sung regularly with the Academy of Ancient Music, English Baroque Soloists, the Sixteen, the King's Consort and other groups in concerts throughout the world. His repertory, much of which he has recorded, stretches from medieval music to Stravinsky and Pärt (whose *Miserere* he sang at the 1990 Proms), and includes Bach's B minor Mass and the Passions, most of Handel's oratorios and Haydn's *Creation*. He has also performed and recorded many of the odes, anthems and stage works of Purcell. George's operatic recordings include Monteverdi's *Orfeo* and Handel's *Ottone*. An intensely musical singer with a firm, agile voice, he has deep understanding of the varied stylistic demands of composers in different periods.

ELIZABETH FORBES

George, Stefan (Anton) (*b* Rüdesheim, nr Bingen, 12 July 1868; *d* Minusio, nr Locarno, 4 Dec 1933). German poet. He attended the Gymnasium in Darmstadt before matriculating at Berlin University, though he soon abandoned his studies. Possessed of ample means (his father was a prosperous Rhenish wine merchant), he began a life of travel that took him throughout Europe. From 1889 to 1893 (and again in 1896) he resided in Paris, where his intimacy with Mallarmé exerted a long-term influence. Later in life he began to accept the public attention and adulation that he had avoided earlier. The so-called

George-Kreis, a group of younger poets that included Friedrich Gundolf, Karl Wolfskehl and, briefly, Hugo von Hofmannsthal, helped to spread his fame. From 1892 to 1919 he edited the influential *Blätter für die Kunst*. The publication of *Das neue Reich* (Berlin, 1928) led to a perceived association with the emergent Nazi party, though he refused an invitation to become president of the new Academy of Poetry.

George's literary output was almost entirely confined to lyric verse. His earliest collections, *Hymnen* (1890) and *Pilgerfahrten* (1891), were printed privately for distribution to his friends; these already reveal the characteristics of his best-known works: emphasis on art for art's sake, a restricted range of subject matter, formal perfection, beauty of presentation and the avoidance of capital letters except at the start of a line. Many of his poems were set by composers of the Second Viennese School: Schoenberg's Second String Quartet includes settings of *Litanei* and *Entrückung*; Webern's songs opp.3 and 4 are also to George's verse; and Berg's *Der Wein* is a setting of George's translation of Baudelaire. Best known of all of the George settings, however, is Schoenberg's *Das Buch der hängenden Gärten* (1908–9). Other composers who set his verse include Cyril Scott, Clemens von Franckenstein and Gerhard Frommel.

PETER BRANSCOMBE

Georgescu, Corneliu Dan (*b* Craiova, 1 Jan 1938). Romanian composer and ethnomusicologist, active in Germany. After early musical training at the Popular School of Arts in Craiova (1949–55) he studied composition with Andricu, Mendelsohn and Olah at the Bucharest Academy (1955–61). He was a researcher at the Institute of Ethnomusicology and Dialectology (1962–83), editor of the journal *Muzica* (1983–4) and a researcher at the Institute of Art History (1984–7). In 1987 he moved to Germany, becoming naturalized in 1996. His comprehensive knowledge of Romanian folklore and traditional music informs his compositions, which are particularly inventive and rich in fantastical elements. Drawing on such traditions as monody, *ison* and isorhythm, he has also undertaken research into timbre and the harmonic series. Georgescu has developed a personal variety of minimalism, rich in arabesque-like figuration.

OCTAVIAN COSMA

Georgescu, George (*b* Sulina, 12 Sept 1887; *d* Bucharest, 1 Sept 1964). Romanian conductor and cellist. He began violin lessons at the age of five, but turned to the cello (under Constantin Dimitrescu) at the Bucharest Conservatory, continuing under Hugo Becker at the Berlin Hochschule für Musik (1910–14), where he also studied composition and conducting. His first success was as a cellist and member of the Marteau Quartet, 1911–16, but a physical handicap forced him to abandon the cello and, on the advice of Richard Strauss, he sought a career as a conductor, taking further coaching from Nikisch in Leipzig. After a successful début with the Berlin PO in 1918, he returned to Romania and founded the Bucharest PO (1920; now the Enescu PO), of which he remained chief conductor until his death. In addition he was musical director and conductor of the Romanian Opera at various periods between 1922 and 1940, and a professor at the Bucharest Conservatory, 1950–53. He raised the Bucharest PO to international standard, performing with such musicians as Cortot, Rubinstein, Casals, Richter and Menuhin, and toured with the orchestra in the USSR and Europe, making his British début at the Royal Festival Hall in 1963. He was admired for his eloquence and style across a wide repertory, especially in Strauss and Enescu. As a guest conductor Georgescu toured throughout Europe and in the USA. He was made a member of the Légion d'Honneur in 1929, received the Romanian State

Prize in 1949 and 1957, and was made a People's Artist of the Romanian People's Republic in 1954.

VIOREL COSMA

Georgia. Country in Transcaucasia. An independent kingdom for over 2000 years, it adopted Christianity in the 4th century CE while under Byzantine influence. It was invaded by the Mongols in 1234 and thereafter became subject to incursions by Arabs, Turks and Persians. It was annexed by Russia in the 19th century. After a brief period of independence (1918–20), it was renamed the Georgian Soviet Socialist Republic in 1921. With the collapse of the Soviet Union it declared itself an independent republic in April 1991.

I. Art music

The development of Georgian art music followed a course characteristic of many Eastern European schools of composition during the end of the 19th century and the first half of the 20th century. A few decades saw a rapid advance from the first experiments in composition and an amateur musical culture to a thoroughly professional approach to composition in the context of increased musical activity in the concert hall and opera house. The evolution of Georgian music from the 1960s to the 90s had much in common with that of Western music in the late 20th century.

The incorporation of Georgia into the Russian Empire in 1801 created permanent links with European musical culture. In the second half of the 19th century, alongside the continuing oral medieval Orthodox tradition, conditions gradually emerged for a new art music in the European tradition. From 1851 Tbilisi, which had become the musical centre not only of Georgia but of the whole of Transcaucasia, staged productions of operas by Donizetti, Rossini, Bellini and Verdi, adding works by Russian composers from the 1880s onwards. During this period music-making reached beyond the aristocratic salons to other levels of society. A new musical culture sprang up in Tbilisi, a city at the crossroads of Europe and Asia, unique in its mingling of many different national styles. Melodies borrowed from Italian opera and Russian romances and mediated through Georgian traditional music took on exotic colouring from the eastern cultures represented in the city's population. This complex folk amalgam later became a potent source for Georgian art music.

Georgian composers forged an independent style through a synthesis of Western music with national elements. Until the 1960s the latter consisted primarily of traditional music of various kinds. The period from the 1890s to the early 1930s was dominated by the first generation of composers, founders of the new era of professional music in Georgia: prominent among these were Meliton Balanchivadze, Dimitri Arakishvili, Viktor Dolidze and Niko Sulkhanishvili, with the figure of Zakharia Paliashvili occupying a special place.

These composers devoted themselves in particular to vocal music, especially opera, which developed along 19th-century Romantic lines. In 1897 an excerpt from Balanchivadze's opera *Tamar tsbieri* ('Perfidious Tamar') was performed in St Petersburg (the opera was retitled *Darejan tsbieri* in 1937). In 1919, an important year for Georgian music, the first Georgian operas were performed at the Tbilisi Opera Theatre: Arakishvili's lyrical opera *Tkmuleba Shota Rustavelze* ('The Legend of Shota Rustaveli'), Paliashvili's monumental operatic saga *Abesalom da Eteri* ('Abesalom and Etery') and Dolidze's comic opera *Keto da Kote* ('Keto and Kote'). Between these years Sulkhanishvili also composed choral music and Arakishvili and Balanchivadze songs. The first period of Georgian opera culminated in the 1920s with productions of operas by Paliashvili, Arakishvili, Dolidze and others. Among these Paliashvili's *Daisi* ('Twilight') ranks with *Abesalom da Eteri* as one of the peaks of Georgian opera. Paliashvili's operas draw on an international musical language, and their style established the general Western orientation of 20th-century Georgian composers.

In the decades after the establishment of Georgian national opera the symphony became the leading genre in Georgian music. Instrumental art music was developed by the second generation of Georgian composers, in parallel with a rapid growth in opportunities for performance. A symphony orchestra and a string quartet were formed early in the Soviet era (1924), but the first essays in instrumental music in Georgia, especially in the symphony, were modest. The leading representatives of the second generation of composers were Shalva Mshvelidze, who composed his symphonic poem *Zviadauri* in 1940, and Andria Balanchivadze, whose First Symphony (1944) represents a milestone in the history of the Georgian symphony. In their combination of Classical-Romantic symphonic principles with national traditions, Georgia's second-generation composers showed an affinity with 19th-century Russian composers, above all The Five.

During the war years (1941–5) Georgian symphonies became predominantly heroic and epic in tone, a trend that predominated up to the end of the 1950s. In the immediate postwar years a third generation of Georgian composers emerged, continuing in the direction taken by Mshvelidze and Balanchivadze. The aesthetic and technical principles of the Georgian national school held sway in their work in the major genres: symphony, concerto, symphonic poem, chamber music, ballet, opera and oratorio. The shared ideals among composers of the second and third generations makes it natural to view Georgian music composed between the 1930s and the 50s as forming a single stylistic period.

Between the 1930s and the 50s socialist realism dominated every aspect of art in the Soviet Union. Art music was systematically 'democratized', and composers were required to create music that was national in form and socialist in content. The hero of this new art was the Soviet people, and personal feelings were replaced by those of 'the people' as a whole. This principle was profoundly inculcated into all aspects of Georgian music. Most works composed during the period 1930 to 1960 had national and popular foundations, manifested primarily through the extensive use of traditional music. Composers either quoted folktunes directly or composed melodies in the style of folksongs and folkdances. At the same time, Georgian composers drew increasingly on the Romantic symphonic tradition, using its schemes and structural principles with some freedom and variety.

The most notable Georgian compositions from the 1930s, 40s and 50s include Mshvelidze's symphonic poems *Zviadauri* and *Mindiya*, Andria Balanchivadze's first and second symphonies and Third Piano concerto, Alexi Machavariani's Violin Concerto and ballet *Otello*, Otar Taktakishvili's First Piano Concerto and opera *Mindia*, David Toradze's ballet *Gorda* and opera *Chrdiloetis patardzali* ('Bride of the North'), the symphonic piece *Sachidao* by Revaz Lagidze, A. Chimakadze's cantata *Kartlis guli* ('The heart of Kartli') and Sulkhan Tsintsadze's miniatures for quartet and Fourth String Quartet. However, with these few exceptions, the music composed in Georgia during this period has merely local significance.

The 1960s and 70s saw an intensive upsurge in all genres as Georgian art music engaged fully with 20th-century ideas. This development arose directly from the cultural liberalization following the 21st Party Congress of 1959. Increased contacts with other cultures enabled musicians to take part in international festivals of contemporary music. The freer social climate and access to contemporary European music provided a stimulus to Georgian composers. The history of Georgian music during these years shows the speed with which Georgian composers assimilated the major innovations of 20th-century music. New ideas were especially striking in the work of younger composers, Bidzina Kvernadze, Giya Kancheli, Nodar Mamisashvili, Natela Svanidze, Sulkhan Nasidze and Nodar Gabunia, and later Felix Glonti, Vazha Azarashvili, Mikhail Shugliashvili, Teimuraz Bakuradze, Ioseb Bardanashvili and Tengiz Shavlokhashvili. All these composers wrote primarily in instrumental genres, and their works display a new emotional and intellectual complexity, eschewing the neo-Romanticism characteristic of the preceding decades.

The high level of performers graduating from the Tbilisskaya Gosudarstvennaya Konservatoriya (Tbilisi State Conservatory), founded in 1918, significantly contributed to Georgia's musical development. There were several orchestras active in Tbilisi at this time, the foremost of which was the Georgian State SO. A number of Georgian singers, instrumentalists and conductors gained worldwide reputations. Choral music, which had the richest of traditions in Georgia, developed greatly.

From the beginning of the 1960s Georgian composers began to separate into three distinct groupings. The first of these, associated with the work of the composers of the second and third generations, remained within the traditions of the Georgian Romantic school. One of the achievements of this period was the creation of a national style of declamation in both vocal and instrumental music, rooted in the stresses and cadences of folk music. Works that exemplify this development are the oratorios *Rustavelis nakvalevze* ('In the steps of Rustaveli') and *Nikoloz Baratashvili* and the cantata *Guruli simgerebi*) ('Gurian Songs'), by Otar Taktakishvili, works for unaccompanied chorus by Ioseb Kechakmadze, the oratorio *Pirosmani* by Svanidze, the opera *Iko mervesa tselsa* ('And in the Eighth Year . . .') by Kvernadze, and the fifth, sixth and seventh string quartets by Tsintsadze.

Another grouping was represented by the fourth generation of Georgian composers, the so-called 'Shestidesyatniki' ('1960s group'), whose work displayed an assimilation of new influences, most significantly the music of Bartók and Stravinsky. Best known among the works of the 'Shestidesyatniki' are Gabunia's *Igav-araki* ('Fable'), Kancheli's first and second symphonies, Nasidze's first and second string quartets and Chamber Symphony, Tsintsadze's fifth, sixth and seventh string quartets, and Kvernadze's *Koreograpiuli novelebi* ('Choreographic Novellas') and his ballet *Berikaoba*. Works by composers of the older generation, including Revaz Gabichvadze's *Rostock* Symphony, Toradze's Second Symphony *Kebatakeba Nikortsmindas* ('In Praise of Nikortsminda') and Machavariani's Second Symphony, also showed major stylistic advances.

The 1970s saw a spate of symphonic works by the two major figures, Kancheli and Nasidze. With his Third Symphony, Kancheli began to receive general recognition as one of the foremost representatives of Georgian music, while Nasidze won deserved success with a triad of symphonies (nos.5, 6 and 7) and his Double Concerto. Other notable symphonic works were Glonti's Sixth Symphony (*Vita nova*) and Azarashvili's Cello Concerto.

Georgian composers devoted less attention to experimental music, although new musical thinking and the influence of the postwar Western avant garde found a partial reflection in the third grouping of composers who emerged in the 1960s and 70s: Bakuradze, Shugliashvili, Bardanashvili and others, to whom may be added Svanidze and Mamisashvili of the older generation. These composers made adventurous use of a variety of techniques – total serialism, aleatorism, collage, minimalism and electronics. For a long time the experimentalism of these composers baffled listeners, limiting their audience to a small number of intellectuals.

At the end of the 1970s a synthesis began to emerge between various compositional styles and techniques in Georgian music, a process that continues to this day. Indicative of this is the use of the polystylistic method, in allusion, quotation and collage. Baroque and Classical stylistic features have been absorbed organically into the Georgian national style. This has produced many different, sometimes highly original, kinds of stylistic fusion, in the work, for example, of Kancheli, Nasidze, Kvernadze, Mamisashvili, Bakuradze and Bardanashvili, and also of one of the leading figures of the youngest generation, Z. Nadareishvili. In Kancheli's symphonies and chamber music the sense of memory, free association, temporal stasis and effects of time arrested or tightly compressed are akin to developments in contemporary cinema and theatre.

Between the 1960s and the 80s opera was considerably less significant than instrumental music. Two representative operas of this period are Kvernadze's *Iko mervesa tselsa* and Kancheli's *Da ars musika* ('Music for the Living'). Among operas by composers working in a traditional idiom, Lagidze's *Lela*, with its wealth of expressive melody, has proved the most popular.

Georgian composers have also been productive in the fields of ballet (beginning with Andria Balanchivadze's *Mzechabuki* of 1936), operetta, musicals, film and theatre music and popular music. The works of Azarashvili, V. Kakhidze and others reveal an interesting combination of serious and lighter styles.

In the 1990s chamber music became increasingly important, reflecting the broader cultural climate. Several composers of chamber music adopted elements of minimalism. Outstanding works of these years include Kancheli's cycle *Sitsoskle shobis gareshe* ('Life without

Christmas'), Nasidze's Fifth String Quartet and Piano Trio *Antiphonie*, and Bakuradze's *Ori tsigni kvintetisatvis* ('Two Books for a Quintet').

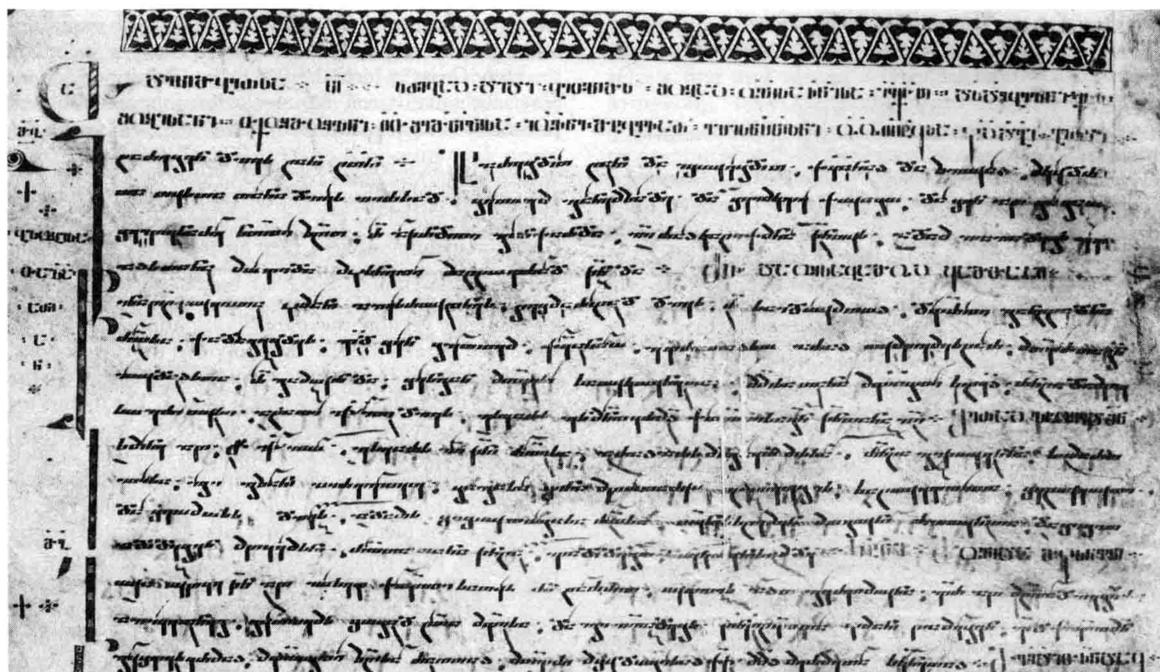
II. Orthodox church music



1. History. 2. Liturgical books. 3. Hymnody. 4. Theory and style. 5. Notation.

1. History. Georgia formally converted to Christianity in 337 as a result of the missionary activity of St Nino. The east and south of the country were influenced by Syria at this time, and Byzantium influenced the west (Colchis). The earliest records of the Georgian language date from the 5th century, and it was during this century that King Vakhtang I (446–99) established the office of 'catholicos' (patriarch). After the Council of Chalcedon (451) Georgia, like Armenia, embraced monophysitism, but in about 600, under Catholicos Kirion I (595–610), the country turned to Chalcedonian Orthodoxy and hence Byzantine influence (*see* Syrian church music, §1). The subsequent development of Georgian church music was strongly influenced by the activity of Georgian monasteries and other religious centres outside Georgia, including the Holy Cross in Jerusalem, St Sabas (Palestine), Mount Sinai, Bithynia, Iviron (Mount Athos; founded 980) and Bachkovo (Bulgaria; founded 1083).

2. Liturgical books. Georgian liturgical books generally correspond to those of the Byzantine rite, but because of the great age of the Georgian liturgy and the activity of Georgian hymnographers, their arrangement and content display certain peculiarities. The Georgian oktōēchos, manuscripts of which survive from the 9th century, and its enlarged version the *paraklitoni*, equivalent to the Byzantine paraklētikē, are each divided into two books: the *khmani* and the *gverdni*, containing respectively the chants in the authentic and plagal modes. The hymns for Lent and Easter were originally collected in a book known as the *khvedrni* ('share'); this collection was later divided into the *markhvani* and *zatiki*, corresponding respectively to the Byzantine triōdion and pentēkostarion. The 12 volumes of the mēnaia were first introduced into Georgia by Georgy Mtatsmideli ('from the Holy Mountain', *d* 1065), under the name *ttueni atormetni*. They have never been published in their entirety, and the excerpts from them contained in the *gamokrebuli ttueni* (corresponding to the anthologion) thus represent an important source of the chant.

The Georgian equivalent of the Byzantine stichērarion is the *iadgari* ('memorial'). A notable example of this collection is a manuscript, with neumes, dating from 978–88 (fig.1), containing many Proper chants composed by one of the greatest hymnographers of the Georgian Church, Mikayel Modrekili, who was probably the brother of St Euthymius (Eqvtime) of Iviron (*d* 1028). The heirmologion may have been translated into Georgian as early as the 8th or 9th century at the monastery of St Sabas near Jerusalem, but the earliest surviving examples date from the 10th century. The Georgian heirmologion is termed the *dzlispirni da gmrtismshoblisani* ('heirmoi and theotokia'), since it contains, unlike the Byzantine heirmologion, both the *heirmoi* and the corresponding *theotokia*. In Greek heirmologia before the 13th century, the *heirmoi* were arranged according to the akolouthiai (in an order often given the symbol *KaO* in modern literature; *see* Heirmologion, §2), but the arrangement of the Georgian heirmologia followed the *ōdai* (symbol *OdO*) as early as the 10th century.

3. Hymnody. According to a Georgian version of the Great Lectionary of the Church of Jerusalem, Georgian hymnography originated between the 5th and 8th centuries. The first compositions were akolouthiai for national saints to be added to the mēnaia. The *iadgari* of Grigol of Khandzta (759–861) was praised by his biographer. In the 10th and 11th centuries Mikayel Modrekili in south Georgia and Ioanne Minchkhi at Mount Sinai supplemented the Georgian mēnaia and oktōēchos with their own compositions. At the same time, many texts were translated into Georgian at the Georgian monastery of Iviron on Mount Athos, by Euthymius and Georgy Mtatsmideli, and on the Black Mountain near Antioch, by Ephrem Moire (*d c*1100). These translations retained the isosyllabic structure and metre of their Greek originals, sometimes at the expense of correct word order; and the oldest manuscripts of the Georgian heirmologion cite the original Greek incipit, in phonetic transliteration, before

1. *Hymns from the Office of Christmas, with neumatic notation, from the Iadgari of Mikayel Modrekili, 978–88* CE *(Tbilisi, Institute of Manuscripts, Georgian Academy of Sciences, S.425, f.78r)*

each *heirmos*. Thus the Georgian hymns must originally have been sung to their Greek melodies. However, these cannot have been the only melodies of the Georgian Church: indigenous Georgian hymns of the same period were composed according to Georgian metrical principles, iambic dodecasyllabic verses being the most common.

4. THEORY AND STYLE. A notable characteristic of Georgian liturgical music, evident since the 12th century at least, is the use of three-voice polyphony. The three voices are known as *mzakhr* (in modern terminology: *tqma*), *zhir* (modern: *mozahili*) and *bami* (modern: *bani*); the *mzakhr* has the main melody and may extend in range to an octave, but the three voices together do not exceed a major 10th. The rhythm of the *mzakhr* and *bami* is virtually the same, but it may differ from that of the *zhir* (ex.1).

Georgian liturgical music has a system of eight modes that corresponds overall to the Byzantine system; diatonic intervals are used in modern practice only. There are similarities between the liturgical melodies and those of traditional music, suggesting that the two genres may share a common origin; in performance, however, the tempo of the church melodies is generally slower.

5. NOTATION. In the 10th century the Georgian Church adopted Byzantine ekphonetic notation for the liturgical recitation of the Bible. Manuscripts of the 11th, 12th and 13th centuries contain tables of ekphonetic signs. The 'Synodikon' for the Sunday of Orthodoxy is an important example of a text marked throughout with such signs. A system of notation was also developed for hymns (fig.1): the neumes, which are written above and below the text, indicate melodic formulae rather than fixed tones, as in

Ex.1 from W. Gwacharija, *BMw*, ix (1967), 296

Byzantine chant of the same period. The occasional use of two or three signs above a single syllable may prove that polyphony was in use as early as the time of Mikayel Modrekili, who was active in the 10th century. With the decline of monasticism, Georgian hymn notation gradually fell into disuse (as was the case in the Armenian and Byzantine systems). (Ingoroqva's interpretation of this notation is now considered unsatisfactory.)

A new system of 24 signs or *chreli*, indicating the intonation formulae of the chants, was introduced in the 17th and 18th centuries, but it is not known how this system relates to the earlier one. The term *chreli* is also used in the sense of PAPADIKĒ. In the 19th century Ioane Bagrationi introduced yet another notational system, although it never became popular. It is based on the first eight letters of the old Georgian alphabet (*a*, *b*, *g*, *d*, *e*, *v*, *z*, *ey*) and uses supplementary dots and other signs; each letter signifies a fixed pitch and the melodic rise and fall is indicated by means of dots above or beneath the letter. Other systems of notation, whose purpose was to remind the cantor of the melodic outline and the intonation formulae of the chants, are found in Georgian manuscripts of the second half of the 18th century and the 19th century.

The transmission of Georgian liturgical music throughout its history depended more on oral tradition than on written notation. When, however, during the 19th century, Old Church Slavonic replaced Georgian as the language of the liturgy, the oral tradition of chanting began to decline. A committee for chant restoration was therefore founded in 1860 to transcribe the entire liturgical repertory into staff notation. The chant collections, organized according to the *oktōēchos* system, consist of music for three voices: the principal melody is assigned to the first voice, with the supporting voices conforming to Georgian theoretical principles. Active attempts have been made during the post-Soviet period to restore the authentic Georgian repertory; the scholarly and practical endeavours of M. Erqvanidze together with his male choir Anchiskhati (founded 1989) have been particularly notable in this respect.

III. Traditional music

The history of Georgian traditional music is primarily that of Georgian folksong: the vocal repertory, with or without instrumental accompaniment, is particularly rich and there are also many types of traditional instruments. Polyphonic singing, complex musical structures and variety of styles distinguish Georgian folksong from the basically monodic styles of states long connected with Georgia economically, politically and culturally. Complex

choral polyphony is characteristic of Georgian folk music. Folksong traditionally accompanies work, hunting, weddings, burials, historic or heroic events, military campaigns, popular entertainments and dancing. Each ethnic group – the Khevsur, Tush, Pshav, Mokhev, Mtiul, Kartlian-Kakhetian and Meskh in eastern and south-western Georgia, and the Rachian, Svan, Imeretian, Guria, Megrel and Acharian in western Georgia – has its own musical style that is different in form, structure and manner of performance.

Traditional polyphonic songs are performed by a chorus in which the higher parts are sung by soloists and the bass part by a group. Unison singing is rare. Solo songs can be divided into three categories: work songs for unaccompanied solo male voice; women's solo songs, mainly lullabies; and lyrical, historical, heroic and humorous songs performed by both men and women accompanied by various instruments. Georgians do not usually sing in mixed ensembles: polyphonic songs are performed by a chorus of one sex, usually male. In families that have preserved and transmitted their own musical traditions, however, all members, irrespective of age or sex, perform the choral songs. Singing (and dancing) in mixed ensembles is usual among the Svan and Rachian. The limited repertory for female chorus includes songs connected with family life and ritual songs. The traditional styles of eastern and western Georgia differ: in eastern Georgia folk music is characterized more by monodic songs and two-and three-part songs as, for example, among the Kartlian-Kakhetian; in western Georgia three- and four-part singing predominates.

1. Regional and ethnic traditions: (i) Eastern Georgia (ii) Western Georgia. 2. Polyphony. 3. Instruments. 4. Urban and contemporary songs: (i) Eastern and Western influences (ii) The Soviet Union. 5. Sources, history, studies.

1. Regional and ethnic traditions.

(i) Eastern Georgia. Ethnic groups in eastern Georgia fall into three groups: the Khevsur, Tush, Pshav, Mokhev and Mtiul in the mountainous north-east, the Kakhetian and Kartlian in the central plains, and the Meskh in the south-west. In Georgian folklore studies, it is customary to classify the Khevsur, Tush and Pshav as one sub-group. The Khevsur, living in the gorges of the Caucasian range, used to be isolated from urban life and have retained old vocal forms, reflecting the difficult conditions of their former life. Khevsur songs are mainly monodic, performed solo or to the accompaniment of the *panduri* (three-string lute). The Russian *balalaika*, played like the *panduri*, appeared recently. Songs are simple in structure and the melodic material, which uses much glissando, often resembles agitated, heightened speech. Many are variants of a single melodic formula, that is, a downward progression from a 7th (or a 6th and sometimes the octave) to the lowest point in the scale. In such two-part singing (ex.2), the basses enter in unison with the top voice only at the end of every line, emphasizing the tonic (which also shows the downward progression of the melodic line).

The Khevsur are gifted poets for whom singing, which is used only for declaiming verse, is of secondary importance. They often sing different texts to the same tune. The number of genres is limited, the main types being work, ritual and heroic song. Women's genres are even more restricted, comprising songs of family and

Ex.2 *Perkhisa* ('Round dance'); rec. Sh. Aslanishvili

everyday life and ritual songs but they are more developed in intonation than men's songs. Lullabies are usually in 6/8 metre and consist of frequent repetition or variation of a basic melodic formula. Ritual laments occupy an important place in the traditional music of the Khevsur. They are performed in a quiet narrative style reminiscent of sing-song speech; the metre depends on the text and phrases end with a descending line. They may also be performed as a 'lament with singing voice', *khmit tirili*, with a professional female mourner, *motirali*, alternating with a unison chorus.

The Tush live close to the Khevsur. They are shepherds who spend much of the year in the northern Caucasus or in Azerbaijan and consequently some of their performance styles show influences from those areas. For example, the *dala* (lament for the dead) which is performed alternately by soloist and unison chorus parallels the song styles of the peoples of the northern Caucasus. Certain Tush melodies also have rhythmic structures, such as 3 + 5 and 5 + 3, not generally used in Georgian traditional music. Themes of the solo songs are ritual, historical, heroic, lyrical or pastoral and some are accompanied by the *panduri* (three-string lute) or the accordion (mostly played by women), which is now well established among the mountain people of eastern Georgia. Songs of different genres have similar melodic characteristics and songs that differ in form and content are sometimes sung to the same tune, as in Khevsur folksong. Descending melodic lines and the variation of a basic melodic phrase are also typical of Tush songs, although the melodies and rhythms are more complex than those of Khevsur songs. Two-part Tush songs have simple structures, consisting basically of a solo voice performing the melody and a drone sung by a group. Such songs are usually in the A mode and the drone is usually on the tonic and seventh degree (A–G–A); cadences are approached from below. The *salamuri* (flute) is played commonly by shepherds.

The Pshav, neighbours of the Khevsur and the Tush, also perform two-part songs. Specific characteristics of these are the use of two-part drone polyphony that changes its pitch in the range of a major 2nd, the alternation of two soloists against a drone bass sung by a chorus, and use of the Frigian mode with a major 6th customarily known as the Pshav scale (ex.3). Together

Ex.3 The Pshav scale

with the Khevsur, the Pshav are the most skilful creators of oral poetry in Georgia. The texts are in couplets and often take the form of a poetic contest, *kapiaoba*, during which the two performers improvise. The *panduri* is popular.

Ex.4 *Mgzavruli* ('Travelling song'); rec. G. Chkhikvadze (excerpt)

The Khev and Mtiul share many characteristics in both music and everyday life. Both have been affected economically and culturally by the mountain road, built more than 200 years ago, that traverses their regions and connects the trans-Caucasus with Russia. Mokhev and Mtiul folksongs are melodically richer and more varied than those found in other mountainous regions of eastern Georgia. Mokhev songs are mostly in two or three parts; solo songs are performed exclusively to the accompaniment of the *panduri*. Unlike the Khevsur and Pshav songs and short two- or three-bar phrases, in Mokhev songs the melody is developed throughout the stanza. The song types of the Mokhev include work, ritual and everyday songs, love songs, historical and heroic songs and dance-songs. Dance-songs are usually performed in two parts in which two soloists alternate or one soloist is accompanied by a bass part which has its own independent melodic and rhythmic structure (an exceptional practice in Georgian folk polyphony). Mtiul polyphony appears primarily in three-part songs which are similar, stylistically, formally and textually, to Kartlian three-part songs. The Mtiul, moreover, have adopted solo songs from the Kartlian repertory. In Mtiul song the tune is often embellished with grace notes; one or two notes only (or one note with an ornament) correspond to a syllable – a rare feature in the songs of the other mountain peoples. Ritual songs are highly regarded by the Mtiul, particularly the widely known *Jvaris tsinasa* ('Before the cross'); this is performed at weddings, in round-dances with the traditional text (and with a different text) before the start of agricultural work.

Kartlian-Kakhetian groups have developed a great variety of folksong styles, forms and genres. Unaccompanied solo songs include women's lullabies and men's agricultural work songs. *Orovela* is the general name for ploughing, threshing and winnowing songs which are all related in name, musical structure and textual content to the *hŏrovel* of Armenia (*see* ARMENIA, §I, 3(i)). They also have parallels (in terms of intonation and terminology) with songs from Azerbaijan and Central Asia. The texts describe the hard conditions of the people, their lack of rights and their dependence on master-landowners. The close relationship between the Armenian and Georgian agricultural songs suggests their age – dating back to the time when the states shared a common agrarian culture. The melody of each stanza of *orovela* songs generally begins in a high register, then quickly descends and ends in a half- or a full cadence. Recitative alternates with richly ornamented melody and the rhythm is free. '*Urmuli*' *orob* ('bull carters') songs comprise a further popular genre similar to *orovela*. Two-part songs that accompany work (mostly reaping and winnowing, and more rarely threshing) are known as *hopuna*, *herio* or *heri ega*, depending on which of these exclamations is used in the song. Such songs are strictly rhythmic, melodies are simple and texts often appear to be improvised. They may be humorous or amatory, but most describe the work. The lower part performs either a drone or an ostinato figure.

Three-part songs may be subdivided according to function and musical characteristics. Ritual, round dance and work songs form a separate group from 'table' songs (Kakheti is the most ancient and important centre of viticulture in Georgia). They are distinguished musically by their energetic character, clean-cut metre and rhythms, and frequent use of a recitative drone and ostinato figures in the bass (ex.4). 'Table' songs are more festive: they develop slowly on a pedal drone without clear-cut metre and rhythm, and melismas are frequently used in the melodic lines (ex.5). The musical conventions of 'table' songs from eastern Georgia, which have colourful modulations, are similar to *orovela* and *urmuli* songs. Among musical instruments, the *panduri* and *salamuri* are popular.

The Meskh are one of the oldest Georgian groups; Meskheti was the economic and cultural centre of Georgia during the 11th and 12th centuries and from the 16th to 19th centuries it was under Turkish rule. Although polyphony was still practised there in the early years of the 20th century, it has since been lost. It is, then, the only region in Georgia without this tradition. Meskh songs are similar to Kartlian songs. The *tulum*, a type of bagpipe from Turkey, is played.

More research is needed on Georgian groups who live beyond the country's borders, such as the Ingilo in Azerbaijan, and the Shavsh and Lazi in Turkey. Shavsh singing traditions are similar to those of the Acharian.

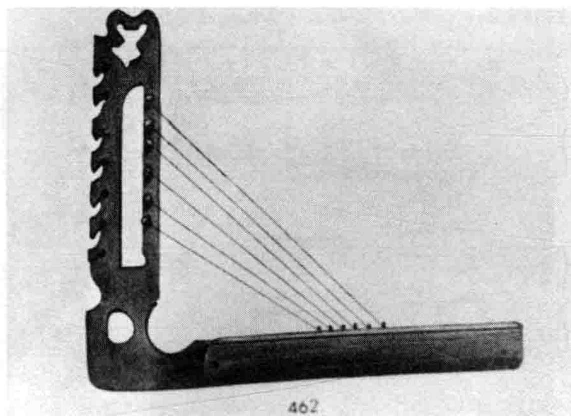
(ii) Western Georgia. The traditional musics of western Georgia fall into two categories: that of groups in the high mountains of Svaneti and Racha, and that of groups in the plains of Imereti, Guria, Samegrelo and Achara.

Racha is situated between Alpine Svanetia and the plain-like terrain of Imeretia, and is divided into lower, upper and mountainous regions. The Rachians in the lower region show musical similarities with neighbouring Imeretians and those in the mountainous region with neighbouring Svans. Rachian musical style shows the closest links with the traditions of eastern Georgia: the restricted use of melismas, elements of the diatonic scale system of fourths, and sometimes a pedal drone. These links are particularly evident in 'table' songs. Ritual songs,

Ex.5 *Mravalzhamier* ('Many centuries'); rec. K. Rosebashvili

2. *Gudastviri (bagpipe) player*

performed antiphonally by two choruses, and round-dances are important. As among other western Georgian groups no two-part choral or unaccompanied solo songs are performed by the Rachin (with the exception of unaccompanied lullabies performed by women). Choral songs are exclusively three-part. Solo songs are sung to the accompaniment of *gudastviri* (bagpipes; fig.2): these are recitative-like songs with free rhythm. *Gudastviri* are played by professional musicians called *mestvire* who enjoy great popularity. Their numbers are gradually decreasing, even though younger people are now learning to play this instrument. The repertory of the *mestvire* is varied. They compose songs in couplet form about historical figures, national heroes and people enslaved by feudal lords; as well as topical and humorous songs, timed to coincide with a specific festival or feast, which demonstrate their wit, resourcefulness and special talent for improvisation. They also have an important function as social commentators. The *chianuri* (two-string bowed lute; see fig.5 below) is used to accompany singing.



The Svans are frequently snowbound and are cut off from the town for more than six months of the year; even in summer they are reluctant to leave the mountains and go down into the valley. Urban musical culture has not penetrated Svanetia and its traditional songs have been preserved. Svan vocal and instrumental music is striking for its disciplined harmonic and tonal structure; melodies are confined in a tight framework. Svan traditional music includes many ritual songs, which also reflect historical events and the struggle with feudal lords.

Three-part songs are the basis of Svan choral singing. The second voice, which starts most of the songs, is usually the leader, followed by the highest voice and a bass. The bass is more mobile than in the songs of the eastern Georgian groups. Although it provides the harmonic basis, both rhythmically and melodically it is more flexible, and its compass sometimes reaches a 5th. Within these limits it moves not only stepwise but also in 3rds, leaping even a 4th or a 5th, usually downwards. The frequent occurrence of 2nds in the two top voices and the parallel movement of all three voices in basic triads are peculiar to Svan folksongs. The outer voices occasionally leap a 7th or an even greater interval. Although the songs are usually short they often vary in metre (as in ex.6), which may change for a few beats, while within the beat syncopation – very characteristic of Svan songs – is frequent. Svan songs have a narrow compass (a 3rd or 4th); all are short and strophic and most are in duple metre. Dance-songs begin in slow tempo and then, accompanied by hand-clapping, grow faster. Round dance-songs are performed standing in two and three circles. Solo songs are rare. They are performed by men or women accompanied by the *chuniri* (a three-string bowed lute) or the *changi* (a six-string harp; fig.3*a*).

The people of Imereti, a large central region, have strong links with the musical traditions of their western neighbours in Samegrelo and especially Guria. Ritual songs and round dances have survived to a limited extent; lyrical and travelling songs are frequently found (ex.7). The Imeretian repertory, like that of Guria, includes

Ex.6 *Bail-Betkil*, a song about a hunter; rec. V. Makharadze

3. *(a) Changi (six-string harp); (b) diplipito (pair of kettledrums)*

Ex.7 'Song of the horsemen'; rec. G. Kokeladze (excerpt)

historical, work and drinking-songs and songs of everyday life. Most Imeretin songs have three parts and are lively and bold. They are mainly composed in couplet form, with the exception of songs for field work such as *khelkhvavi* or *naduri*. The *naduri*, still to be heard during work in the village of Dutskhuni, Van region, begins in a slow tempo with exchanges between the second voices and the basses. As the tempo quickens a third voice enters. The melodic line is broad at the opening of the song, then its melodic phrases are gradually reduced to one bar. The single-bar motif is repeated many times until the song is enthusiastically brought to an end by two groups of workers who compete in turn in their calls for intensifying the work. The song ends with a coda, which is slower, performed by the entire group to mark the completion of the work.

Cradle songs are the only solo Imeretian songs to have been recorded. European songs, Russian church and soldiers' songs and the popular romance are widespread in Imereti as a result of the social relations with other states which were gradually established in Georgia after its unification with Russia. The influx of peasants into the town and the introduction of urban elements into the village strengthened the cultural exchange between town and country. The nature of musical culture changed, and folksongs with new themes and new musical structures entered the tradition. These tunes drew their material mainly from opera and the Russian popular romance, which in the second half of the 19th century were being cultivated in Georgian towns. Kutaisi, the central town of Imereti and western Georgia, was a focal point for dissemination of this Western-influenced music. As a result the complicated polyphonic-harmonic structure of Imeretian songs was simplified, parallel 3rds were introduced into the two top parts, and the creation of songs with a European tonic-dominant harmony was facilitated, particularly in a large number of feasting and toasting songs for chorus (ex.8). The guitar, which in some instances replaced the Georgian national instrument, the *chonguri* (four-string lute), also played a significant part in this process. Widespread too is the Russian seven-string guitar with a different tuning: D–G–c–g–b–d.

Guria and Samegrelo present a completely different picture. Although European and Russian music penetrated these regions (the guitar again playing a large role) the vocal and instrumental music of the Gurian and the Megrelian has preserved its characteristic features. Megrelian song is typically lyrical; Gurian songs are technically rich, complex and varied, and are based on polyphonic structures. The bass part is often the most melodically and rhythmically active; in one group of songs it is performed by a single singer, usually the most experienced and venerated of the group. The bass contributes to the polyphonic and melodic development of the song. It is often the opening voice and then becomes one of the leading voices, a technique not practised by other Georgian groups. The high part may be performed in different ways: *tsvrili* (thin), *gamkivani* ('similar to a cock-a-doodle-doo sound'), and the most complex, extremely high register *krimanchuli* ('distorted falsetto-/jaw'). In this guttural falsetto various ornaments and technically difficult vocal figures are sung, with equal ease whether fast or slow. The *krimanchuli* is always sung on stereotypical glossalalia (e.g. 'i-a-u-a-o, ir-va-ur-va-ho, i-ri-a-ho-u-ru-a-ho'). Moreover, the 'i' and 'u' are articulated on high notes, 'a' on middle notes and 'o' on lower ones. It is considered a high form of musical art in Guria and its exponents are greatly respected. *Krimanchuli* is

Ex.8 *Mravalzhamier* ('Many centuries'); A. Mshvelidze

generally used in marching, wedding, heroic, historical and work songs, but not in lyrical, love and ritual songs as it would distort their quiet, melodic character. In Gurian songs, the text has secondary importance. Much of the text appears exclusively in the middle (second) voice, which sings in recitative, moving from song to semi-speech. Singers often use the same texts for songs from different genres. In one large corpus of songs, there is no text at all. Antiphonal alternation of choruses is also common. There is a distinctive antiphonal form in which the trio and chorus alternate.

The Gurians sing with great enthusiasm; each performer tries to show his virtuosity, creating intricate three-part linear polyphony with almost no harmonic elements (ex.9). Because of their complexity the songs are usually performed by two groups of singers in turn so that each group may rest between sections. In Gurian work songs, *naduri*, four-voice combinations may be heard, usually in the second half of the song (ex.10). In Gurian songs, major scales predominate and, despite some rhythmic variety, most are in quadruple time. The only solo unaccompanied songs performed are lullabies sung by women. Solo Gurian songs, performed only to the accompaniment of the *chonguri*, have much in common with their Megrelian counterparts, also performed with the *chonguri* (both Gurian and Megrelian women play this instrument with great skill). Solo Gurian songs are in couplet form; their melodies depend on the text, which may be lyrical, humorous or topical, and their rhythmic structure is closely connected with the verse metre. The accompaniment played on the *chonguri* may follow the vocal part in unison or provide single chords, harmonic figurations or even an independent part in the songs in recitative form. *Soinari* (panpipes) survived in mountainous regions until the beginning of the 20th century.

Ancient traditions of vocal and instrumental music survive in Samegrelo. Lyrical songs, which couple harsh sound combinations with soft intonation (ex.11), occupy an important place in the repertory. The tradition of the trio is also common here. Sometimes the trio and chorus sing antiphonally. As distinct from Guria, minor scales are used. Songs for one voice have been preserved only as female solos accompanied by the *chonguri*. Two-part songs recorded at the beginning of the 20th century have lively and supple melodies consisting of two figures and a sustained bass. They are generally accompanied on the *chonguri* which doubles both voices in the minutest detail. In solo songs, a similar accompanimental style is used in which the entire melody is reproduced by the *chonguri*.

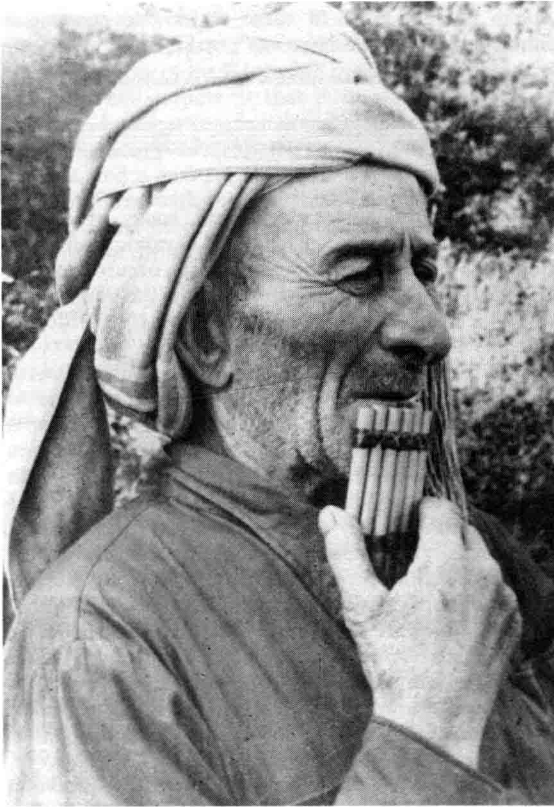
Ex.9 *Khasanbegura;* rec. A. Erkomaishvili (excerpt)

Ex.10 *Naduri* ('work song'); version by V. Simonishvili (excerpt)

Ex.11 *Si Kouli Bata* ('You are going away, father'); version by Noko Khurtsia (excerpt)

Most Megrelian songs are three part. These may be divided into two groups according to musical structure and text. The main group, with light melodic lines, consists of songs of everyday family life and love-songs. The metre and rhythm of these songs is dependent on the metre of the verse and their style is calm and even. The second group comprises bold, dynamic and dramatic songs, including work, marching, wedding and dance-songs, in which all three voices form polyphonic–harmonic combinations. They are sung in full voice and with great expression. Texts do not play a dominant role; they are often interrupted by isolated exclamations such as 'o', 'okho' and 'oida', or the expressions 'orira', 'dela' or 'abadela', which accompany the song for several beats. These exclamations are often substitutes for a text, a characteristic of other Georgian polyphonic work songs. Ritual, round-dances and work songs are dynamic. Round-dance songs are often constructed on ostinato figures (ex.12).

Ex.12 *Kharira;* rec. O. Chidzhavadzhe (excerpt)



The ancient type of panpipe known as *soinari* or *larchemi* ('reed'; fig.4) is played in Guria and Samegrelo (ex.13) (though its use is now dying out).

Ex.13 Shepherd's song played on the *larchemi;* rec. K. Rosebashvili, 1962

Achara was populated from the 11th century by the Megrelian and Laz 'tribes' and then by the Gurians. In the 7th century it came under Georgian rule; from 1627

4. Larchemi (panpipes) player

it was ruled by Turkey, which held it until 1878 when it was annexed by Russia. During this sequence of events the Acharian embraced Islam and absorbed both Georgian musical culture and some Turkish influence. This can also be observed in Acharian folk music. Although Turkish influence is hardly detectable in the vocal style, several Muslim instruments were appropriated and 'table' songs – a common feature of other regions of Georgia – were lost. Acharian choral music has adopted all the elements of Georgian and some of Gurian (the Georgian group in the plains adjacent to the Acharians) folk polyphony. These three- and four-part polyphonic songs are constructed on the same principles as Gurian songs, but in a simpler form; the top register, *krimanchuli*, is not as rich as in Guria; the second voice has a primarily recitative style and the bass maintains its individual role. The most well-developed genre is the *naduri* ('work song'; (ex.14). The mountainous Achara region is the only part of western Georgia where two-part singing is widespread. Distinguishing features are the recitative style of the top voice and the melodically active bass (ex.15). This recitative quality is also peculiar to Acharian solo songs and songs accompanied on the *chiboni* or *chimoni* (a type of bagpipe). Acharian traditional music includes a rich variety of dances and dance music. Dances are accompanied by singing or by the *chiboni*, sometimes accompanied by the *doli* (drum). An ancient war-dance, *khoroni* (or *khorumi*), is performed in 5/8 time.

2. POLYPHONY. Polyphony is characteristic of all regions of Georgia and is still found in most of them. Monodic songs without instrumental accompaniment are rarely encountered, being performed only while working on the land or when travelling alone. Unaccompanied songs for solo male voice are known only in eastern Georgia, and the traditions of unison monophony (and variant heterophony) are not common.

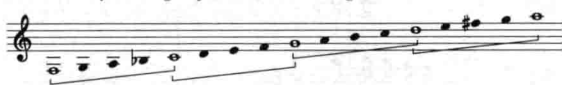
Ex.14 *Naduri* ('work song'); rec. V. Akhobadze (excerpt)

The distinction between performers and listeners is not characteristic. Usually, all the participants of a festival (wedding or feast) take an active part. Polyphonic songs are performed by a chorus in which the high melodic parts are taken by soloists; all others sing the bass part. Antiphonal singing is widespread. In eastern Georgia, usually in 'table' songs, two soloists alternate against the background of a solo (drone) bass. Songs are divided according to gender: the women's repertory consists of lullabies, as well as ritual and lyrical songs; the men's embraces most genres. Round-dances are common, including those with two or three vertical circles, that is, with each dancer standing on the shoulders of another. In certain mountainous regions of western Georgia (Svaneti and Racha), the tradition survives of men and women singing ritual round-dances together. Songs are performed within families by mixed ensembles.

Ex.15 *Khasanbegura*, version from the mountains of Achara; rec. K. Rosebashvili (excerpt)

Three-part singing is widespread. In the mountainous regions of the east, two-part singing is common, and in the west and south-west, examples of four-part singing are found, especially in *naduri*, 'work songs'. There are more than 60 terms for denoting parts and their functions in the chorus. The middle voice (*mtkmeli*, 'story-teller') generally leads and is referred to as the 'first voice'; the upper voice (*modzakhili*, 'echo voice'; *magali bani*, 'high bass') usually follows the middle one. A variant of the upper voice in western Georgia is a falsetto, *krimanchuli*, often compared with the Alpine yodel. The bass (*bani*) is the only voice performed by a group singing in unison. In four-part work songs there are two bass voices: *shemkhmobari*, the 'supporting voice', which sings a pedal drone in the middle of the texture, and *bani*, a sophisticated melody in which the main note lies a 5th below the *shemkhmobari* (exx.10 and 14). Both bass parts are performed by groups of singers.

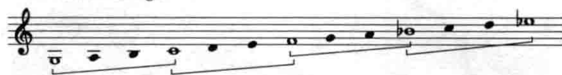
The rich variety of polyphonic types is based on four main principles: drone, ostinato, parallel motion and free polyphony. Drone and ostinato are conveyed by one voice, usually the bass, and parallel motion and free



polyphony are based on various types of voice co-ordination.

The two types of drone are the rhythmic and the pedal. Both alter their pitch and usually move in 2nds, rarely in 3rds or 4ths. The rhythmic (recitative) drone is common in all regions and may be the most ancient; it articulates either the song text, along with the high voices, or stereotyped glossalalia. The pedal drone appears mainly in the 'table' songs of eastern Georgia; it is sung without words, usually to the sound 'o'. In the course of a song the pedal drone changes its pitch several times enabling unusual modulations (ex.5).

Ostinato polyphony is widespread in the round-dance songs of eastern and especially western Georgia (ex.12). Ostinato formulae are usually sung in the bass voice. Parallel polyphony, which appears in fragmentary form (ex.6), is mainly characteristic of the mountainous west. Free polyphony (or free counterpoint) is also encountered only in fragmentary form (ex.9) and is characteristic of the western plains. Imitative polyphony is not used; the voices have contrasting melodic lines and no words are uttered; the voices produce various stereotypical glossalalia formulae. In practice, pure polyphonic types rarely occur; these four principles interact, creating mixed and transitional types. Exx.10 and 14 illustrate this: the pedal drone is in the middle of the texture, recitation in the middle voice, ostinato figures in the upper voice, and free melodic motion in the bass.



Scale systems are rich and varied. Anhemitonic scales occur among groups living in mountainous regions. Another scale system is found in various song types in western Georgia, and in ritual and round-dance songs of eastern Georgia. The system consists of two, three or four identical pentachords joined together. The aim is to preserve the purity of the 5ths, which results in augmented octaves (*b♭–b′*; *f′–f♯″*; ex.16). Scales built on the diatonic

Ex.16 Scale system of groups in mountainous regions

system of 4ths are not encountered in their pure form in polyphonic singing; they appear only in the monophonic (solo) work songs of eastern Georgia and comprise two, three or four identical tetrachords joined together. This diatonic system is very similar to the tetrachordal modes of the Middle East. In these scales one encounters diminished octaves (*b–b♭′*; *e′–e♭″*; ex.17).

Ex.17 Scale built on the diatonic system of 4ths in monophonic work songs of eastern Georgia

In 'table' and sometimes lyrical songs of eastern Georgia, scales contain elements of diatonic systems of 4ths and 5ths. The former predominates, occurring above the tonal centre (the pedal drone) in the melodies of the high voice; the latter appears in the bass voice during cadences and modulation.

'Dissonant' chords comprising various combinations of 2nds, 4ths, 5ths, 7ths and 9ths are characteristic of Georgian polyphony (ex.18). The harmonic system is based on a relationship of 2nds. The most common cadences are: I–VII–I; I–VI–VII–I; I–II–III; II–III–IV–I. In addition to resolutions by movements of seconds, there are also resolutions by movements of fourths. A musical phrase usually concludes on the tonic or the fifth, although they may conclude on the fourth, a 5-8 chord, a 4-5 chord or even a chord consisting of the fifth, octave and ninth.

Modulations are very common in sophisticated songs, both in eastern and western Georgia. In the 'table' songs of eastern Georgia, modulations may be to a major or minor second above or below, or to a major or minor third below. In western Georgia one also encounters modulations to a fourth or fifth below.

Simple duple and triple-time rhythms are common: in western Georgia duple rhythms (4/4, 2/4) predominate, and in eastern Georgia triple rhythms (3/4, 6/8) frequently occur. In the 'table' songs of eastern Georgia the metre is free, and, in Svanetian songs, changes in metre occur. Contrapuntal songs of western Georgia are more rhythmically active, although all are in 4/4 metre.

Musical rhythm prevails over textual rhythm in all regions. 4 + 4 constructions are typical for a line of verse in western Georgia, but in eastern Georgia asymmetrical constructions of 3 + 5 and 5 + 3 are characteristic. The importance of the poetical text ranges from complete domination in the mountainous regions of eastern Georgia to a minor role in Guria, western Georgia. In three-part songs, the text may be delivered by one (middle) voice, by two (middle and high) voices or by the three voices simultaneously.

Southern and eastern parts of Georgia share borders with Turkey, Armenia and Azerbaijan, the peoples of

Ex.18 'Dissonant' chords characteristic of Georgian polyphony in fragments from the songs *Lile* ('Hymn to the sun'), Svanetia; *Shavi Shashvi* ('The Blackbird'), vocal trio tradition, Guria; *Elesa, naduri* (work song), Achara; *Keisruli* ('Song of Caesar'), travelling song, Imeretia; *Mirangula* (name of heroine), Svanetia; *Zari*, ritual lament, Guria

which practise vocal monody. Vocal polyphony, mainly two-part, is widespread among those who populate the northern slopes of the Caucasian range. It is similar to its Georgian counterpart in that it uses various types of drone and ostinato, a functional relationship based on 2nds, 'dissonant' intervals, the singing of melodic lines by soloists, and a bass part provided by a chorus. Parallels are also noted with the polyphonic traditions of groups in the Balkan mountains, and certain other polyphonic traditions of the Mediterranean basin and eastern Europe.

3. INSTRUMENTS. The *salamuri* end-blown flute is one of the older Georgian instruments. An archaic version excavated in a burial ground at Mtskheta, the capital of ancient Georgia, is made from a swan's tibia and has three finger-holes. The type of burial suggests that this small *salamuri* belonged to a young shepherd. Modern *salamuri* generally have seven finger-holes on the front and one on the back; they are sometimes played in classical as well as in folk music and are popular among shepherds in eastern Georgia. The *soinari* or *larchemi* (panpipe; fig.4) is another ancient instrument which survived into the 20th century. It consists of six reed pipes of various lengths, made of cane or the stem of an umbellate plant, fastened in a row. They are tuned in 3rds from the bass pipes, which are positioned in the middle and are a 2nd apart. The tuning varies according to the piece being performed. Sometimes the pieces are performed by two players who can divide the instrument into two, taking three pipes each. It is generally considered a shepherd's instrument, but is also used during the hunt, during the ritual of 'bringing the spirit of the deceased' home from the place of death; and during the *nirzi*, a contest in which the six pipes are divided in two groups, each group being played in turn. Two-part music is also played on the *larchemi*, when the player blows simultaneously into two pipes (ex.13).

The *gudastviri* (bagpipe) is traditionally associated with the *mestvire*, professional musicians who perform heroic, patriotic or satirical songs of social comment as well as *shairis* (popular verses). The *gudastviri* consists of a bellows (*guda*), a small tube (*chreko*) fitted into one hole of the bellows and two pipes (*stviri*), one with six finger-holes and the other with three. The instrument is often decorated with metal, coloured glass, small chains and even gems. It originated among the Kartlian in eastern Georgia but is also occasionally played in Racha in western Georgia. The *chiboni* or *chimoni* (bagpipe) of Achara is similar in construction to the *gudastviri* but has a more penetrating timbre; it is played solo, used to accompany dancing and, less frequently, song. Both *gudastviri* and *chiboni* are two-voice instruments and, as in vocal music, the bass voice is never stationary.

The *changi* (harp; fig.3*a*) of Svaneti in western Georgia, one of the oldest surviving string instruments, is used mainly to accompany song. It is rectangular, often with carved ornaments, and the number of strings varies (usually six to nine). The strings, which are tuned diatonically in 2nds, may be played singly or in groups to produce chords. In performance the *changi* is held upright on the knee. The most popular strummed or plucked string instruments are the *panduri* (three-string fretted lute) of eastern Georgia and the *chonguri* (four-string unfretted lute) of western Georgia. The *panduri* is made in various shapes and sizes; the strings are strummed in both directions or, less frequently, plucked. The *chonguri* has a pear-shaped body and long neck and is also strummed or plucked. The instrument has a short string called *zili* ('thin') which produces a steady high drone. Both *panduri* and *chonguri* are used for accompanying song and for solo performance. The *panduri* is played mainly by men; the *chonguri* predominantly by women. The *chianuri* (two-string bowed lute; fig.5) and the somewhat larger *chuniri* (three-string bowed lute) originated in western Georgia. The *chianuri*, generally used to accompany epics, love-songs or comic popular verses, is often played in unison with the vocal melody. The *chianuri* and *chuniri* repertories also include solo instrumental pieces and dance music.

Percussion instruments include the *daira*, a tambourine made in various sizes and played with both hands, mostly by women. The hoop is sometimes inlaid with mother-of-pearl, and small bells, rings or coins are attached along the inside. The instrument is used to accompany song or dance, and is also played solo. The *doli* (double-headed cylindrical drum of various sizes) is sounded with two sticks or with the hands. The performer may sit or stand and he usually sings while playing. *Doli* are generally used in ensembles together with wind instruments such as the *salamuri*, the *duduki* (flute) and the *zurna* (shawm). Rhythms played on the *doli* are varied. The *diplipito* (fig.3*b*) is a small kettledrum played in pairs or occasionally in groups of threes. The body is made of clay and the membrane is struck with a thin stick. The *buzika* (small accordion) is popular. During recent years, the Russian *balalaika* has also found its way from the north into mountainous regions of eastern Georgia, and is played in the same way as the *panduri*. The guitar is common in western Georgia.

5. Chianuri (two-string bowed lute) player

4. Urban and contemporary songs.

(i) Eastern and Western influences. In the capital city, Tbilisi, and in Kutaisi, the city in the centre of Imeretia, two distinctive urban musical traditions were established long ago. The 'eastern branch', influenced by the music of the Middle East, began to develop in Tbilisi more than a thousand years ago. Monodic melodies with characteristic Middle Eastern modes (incorporating an augmented 2nd) gradually became distinctively Georgian as the original melody became preserved in the middle register of three-part melodies (ex.19).

The 'western branch' was influenced by the European harmonic system which found its way to Georgia in the mid-19th century through Italian opera and the Russian romance. A large group of choral songs based on this system quickly developed (see ex.8), as did a substantial body of songs with guitar accompaniments. The centre of Western urban music is considered to be Kutaisi but, from the 1950s, it began also to acquire dominance in Tbilisi. During the 1970s a new tradition of four-part singing (*chartulit*, 'with included voice') appeared. The popularity of urban music in certain regions (particularly in Imeretia) brought about changes in traditional music. This 'western branch' forms the basis of contemporary music in the main towns. In some village areas, traditional repertories and styles are no longer performed, but in most regions they can still be found. In many areas, ensembles and choirs are organized by experts in traditional music who have not had a European professional musical education.

(ii) The Soviet Union. The period when Georgia was a part of the Soviet Union (1921–91) was marked by political and cultural totalitarianism. All choirs and ensembles that performed in concerts were forced to include in their repertories songs about the Communist Party and the political leaders of the Soviet Union. Such songs were composed very quickly. In the 1930s, under the dictates of both the political leaders of the USSR and the local (regional) administrative bodies, huge choral collectives began to appear. Political administrators of different regions often competed to assemble the largest choirs. Traditional ensembles with established performing traditions that used solo voices for melodic parts were deemed to be 'out of date'. In the huge choral collectives, these were replaced with unison singing in all three registers. Traditional musicians protested because unison singing destroyed one of the fundamentals of Georgian polyphonic song, its improvisatory character.

During the 1930s, as in other republics of the Soviet Union, modified folk instruments were produced (larger instruments with chromatic tuning) and folk-instrument orchestras were established. There was no traditional basis for these in Georgia and therefore they did not become popular. However, small instrumental ensembles gained some popularity, particularly trios comprising *salamuri*, *chonguri* and *panduri*. Usually, the instruments in these ensembles use chromatic tuning, and in addition to a traditional repertory, they often perform works by contemporary Georgian composers as well as the European classics.

Ex.19 Eastern urban musical tradition incorporating Middle-Eastern modes with melody in middle register, *Patara Gogo damekarga* ('I have lost my baby'); rec. M. Mtsuravishvili

In post-Soviet Georgia, there are numerous folksong ensembles playing the traditional songs of various regions, for instance the State Ensemble of Georgian Folksong, the Rustaveli State Ensemble, and the ensembles Pazisi, Kartuli Khmebi, Mtiebi, Mzetamze and Georgika. During the 1980s and 90s ensembles that performed Georgian folksongs began to appear in the USA, UK, France, Norway, Canada and Australia.

5. Sources, history, studies. Archaeological finds from the 2nd and 1st millennia BCE, depicting instruments and dancing figures, provide the oldest evidence of the musical cultures of different Georgian groups. Information about their musical traditions can also be found in ancient Greek literary documents, such as Xenophon's *Anabasis Kirosa*, which describes the events of 401 BC. Georgian written sources existing from the 5th century highlight the development of professional music in the middle ages. Later sources describe the struggle with pagan songs and dances and the development of musical culture during the 'Golden' 10th, 11th and 12th centuries. Much information about musical terms is contained in the first Georgian dictionary compiled by Sulkhan-Saba Orbeliani in the 18th century. At the beginning of the 19th century a descendant of Georgian kings, Ioan Bagrationi, described the musical life of Georgia and particularly the tradition of church singing in his work *Kalmasoba* ('A journey').

From the 1860s the fight to preserve cultural identity began, and from the 1870s the first collections of Georgian folksongs appeared. The first professional Georgian folksong choir, founded by Lado Agniashvili, gave its inaugural performance in 1886. It went on to play an important role in popularizing the folksong tradition. Research into traditional music also began. The composers Zakharia Paliashvili and D. Arakishvili were important in this respect. Arakishvili, who published a large number of folksong collections and many seminal works on Georgian folk music, is considered to be the founder of Georgian ethnomusicology. Russian musicians, for example M. Ippolitov-Ivanov, K. Klenovsky and K. Grozdov, have recorded and published Georgian folksongs. An influential monograph on the *soinari* (or *larchemi*) was published by V. Steshenko-Kuftina and another, by I. Javakhishvili, remains one of the finest source work studies. G. Chkhikvadze compiled the first educational course on the musical folk art of Georgia and founded the Department of the Musical Folk Art of Tbilisi V. Sarajishvili State Conservatoire, and Sh. Aslanishvili laid the foundations of research into the theoretical bases of Georgian folk music. A rich collection of material has been gathered at various times by composers and musicologists, for instance Sh. Mshvelidze, G. Kokeladze, V. Akhobadze and O. Chijavadze. Various aspects of music have been, and are being, studied by scholars: B. Gulisashvili (scales); K. Rosebashvili (musical instruments); M. Jordania (scales and the functions of the voices); M. Iashvili (interrelation between folk and professional polyphony in ancient times); M. Shilakadze

(musical instruments); N. Maisuradze (singing traditions of eastern Georgia); V. Magradze (vestiges of polyphony in Meskhetia); I. Zhgenti (questions of harmony); G. Gvardzhaladze (rhythm); E. Chokhonelidze (scales and intervals); V. Gogotishvili (scales of the diatonic system of pentachords); E. Garakanidze (dialectology and questions of performance); N. Zumbadze (female aspects of folklore); T. Gabisonia (classification of polyphonic types); N. Tsitsishvili (ethnocultural links); N. Makharadze (lullabies); and J. Jordania (an interdisciplinary study of the origins of polyphony).

Materials from field studies undertaken in different regions are held at the laboratory attached to the Department of the Georgian Musical Folklore at the Tbilisi V. Sarajishvili State Conservatoire. Research into the traditional music of Georgia is also carried out at the Institute of History and Ethnography, Centre for Archaeological Studies, and Centre for Mediterranean Studies at the University of Tbilisi (1988–95).

The interest in Georgian music grew in Europe after World War I when G. Schunemann and R. Lach recorded traditional songs from Georgian prisoners of war. These are housed in the Berlin Phonogram Archive. R. Lach, Z. Nadel and M. Schneider studied Georgian polyphony and its possible links with professional polyphony of the Middle Ages. Various aspects of traditional Georgian music have been touched upon in the works of P. Collaer, E. Emsheimer, E. Stockmann, J. Grimaud and Z. Ziegler.

Matters connected with the traditional music of Georgia are discussed at the annual conferences of the Co-ordinating Council for Georgian Folklore attached to the Georgian Academy of Sciences, and also at the conferences of the Music and Choreography Society of Georgia (later called the Music Society of Georgia). In 1984, 1986 and 1988 international conferences on folk polyphony were held in Georgia. In 1990 the first International Festival of the Musical Folklore of Georgia was held.

LEAH DOLIDZE (I), CHRISTIAN HANNICK/DALI DOLIDZE (II), GRIGOL CHKHIKVADZE/JOSEPH JORDANIA (III)

Georgiades, Thrasybulos G(eorgios) (*b* Athens, 4 Jan 1907; *d* Munich, 15 March 1977). German musicologist of Greek origin. He studied engineering at the Athens Technical High School (1923–8) and attended the Athens Conservatory (1921–6), where his principal subject was the piano. He then studied musicology with Rudolf von Ficker at Munich University (1930–35); he was much influenced there by the classical archaeologist Ernst Buschor, the Byzantine specialist Franz Dölger and the philosopher Kurt Huber; he also pursued practical training with Carl Orff. He took the doctorate at Munich in 1935 and the next year was appointed professor of form and analysis at the Athens Conservatory, subsequently (1939–41) becoming director. In 1936 he married the harpsichordist Anna-Barbara Speckner. At this time he was principally engaged in folksong research and Byzantine liturgical music. From 1939 to 1941 he also served on the board of Radio Athens. He completed his *Habilitation* in musicology at Munich in 1947 with a dissertation on Greek rhythm and joined the faculty at Heidelberg University (1948), becoming director of the musicology department in 1949 and professor in 1955. In 1956 he was appointed to a professorship at Munich University, retiring in 1972. In 1974 he was elected to the German Order Pour le Mérite. Georgiades was editor of the *Münchner Veröffentlichungen zur Musikgeschichte* (Tutzing, 1959–) and of *Musikalische Edition im Wandel des historischen Bewusstseins* (Kassel, 1971).

Georgiades was renowned among colleagues for the originality and depth of thought apparent in both his teaching and his writings. Often highly critical of established musicological methods, he was influenced by the *mousikē* of antiquity, which he viewed as the union through rhythm of music, verse and dance. In later music he was particularly fascinated by the relationship between music and language on the one hand and on the other between music as live performance and as written document. This led to a search for historical unity, concentrated around two poles: early polyphony and the beginnings of notation in the Carolingian period, and the works of the mature Viennese Classics. In the former he questioned the traditional methods of modern edition and in the latter those of form and analysis, insisting on an approach that combines historical insight with attention to detail. In some ways Georgiades anticipated the concerns which led in the 1990s to new approaches to criticism. The music itself, however, the 'here and now', always remained the focus of his attention. With his keen insight into music and its history, and his dual German and Greek heritage, Georgiades had a wide influence by no means confined to the many who studied directly under him.

HANS HEINRICH EGGEBRECHT/MARIE LOUISE GÖLLNER

Georgia Tom. *See* DORSEY, THOMAS A.

Georgiceus [Georgiceo, Georgievich, Georgijević, Grgičević, Jurjević], **Athanasius** (*b* Split, *c*1590; *d c*1640). Croatian diplomat, author and composer. He was educated at Split, Ljubljana and at the Jesuit University in Graz. Between 1611 and 1613 he was secretary to the Bishop of Bamberg. His knowledge of several Slavonic languages secured him an important position at the court of Archduke Ferdinand II, who sent him on diplomatic missions to Poland and Bosnia. During the 1630s he lived in Graz, Vienna, Rijeka and Zagreb, where he was in 1637.

He never took holy orders, but much of his activity was closely connected with the affairs of the Jesuits and the Franciscans. In 1629 he published his Croatian translation of Thomas à Kempis's *De imitatione Christi* and followed it with two moralistic treatises of his own. As a musician he is known for his *[12] Pisni za naypoglavitiye, naysvetye i nayveselye dni svega godischia sloxene: i kako se u organe s'yednim glasom mogu spivati* (Songs for the most important, most holy and most joyous feasts of the whole year, which can be sung with the organ and one voice; Vienna, 1635; 6 ed. in Spomenici hrvatske glazbene prošlosti (Monuments of Croatian music), i, ii; Zagreb, 1971), the oldest Croatian songbook with preserved music. The songs are simple and strophic, with melodies often reminiscent of hymn tunes, consisting of repeated motifs and sequential patterns. Georgiceus himself wrote the čakavian-ikavian texts in his native (Dalmatian) dialect. The songs have no great artistic aspirations, but were an attempt to simplify the idiom of sacred monody that he must have known in his youth in Graz, in order to make it acceptable to the large body of worshippers in Croatian churches. The view has been advanced that he borrowed some of the melodies, but their origin cannot be established with certainty.

BOJAN BUJIĆ/STANISLAV TUKSAR

Georgius a Brugis (*d* Bruges, 1438). Composer. He is probably identifiable with the south Netherlandish musician Georgius Martini, a singer at Treviso Cathedral (1427–31) and in the chapel of Pope Eugenius IV (1431–2), who was also a priest of the diocese of Tournai and who in 1431 became a canon of the church of St Donatian, Bruges. His sole surviving composition, a fine Credo setting in *I-TRmp* 87 (ed. in DTÖ, lxi, Jg.xxxi, 1924/*R*, 30), is reminiscent of Ciconia in such features as its disposition of voices, its roving melodic style and its use of brief snatches of imitation.

PETER WRIGHT

Georg Rudolph, Duke of Liegnitz [now Legnica], Brieg [now Brzeg] and Goldberg (*b* Ohlau [now Oława], nr Breslau [now Wrocław], 22 Jan 1595; *d* Breslau, 14 Jan 1653). German patron, bibliophile, composer and poet. The son of Joachim Friedrich, Duke of Brieg-Liegnitz, he became duke in 1613 at the age of 18. He was educated at the university at Frankfurt an der Oder (Słubice). In his early years he was active as composer and poet. He displayed his love of music as early as 1610. The first collection of his music consisted of several partbooks in manuscript, most containing the series of initials GRHZLVB (Georg Rudolph Herzog zu Liegnitz und Brieg), followed by the date 1612. Two of the partbooks, however, conclude thus: '1610. 15. Maij ... Georgius Rudolphus, Dux Lignicencis et Bregnsis Mannupp/ria'.

On assuming power Georg Rudolph continued the Kapelle at his court, but his interest in music mainly assumed a different form. In the course of a journey throughout Europe, he began collecting books for what was to become known as the Bibliotheca Rudolphina. His first wife, Princess Sophie Elisabeth of Anhalt, whom he married in 1614 and who died eight years later, contributed valuable works in French and Italian. By the time the first catalogue was compiled in 1618, five years after the collection was begun, it boasted more than 3000 works; this number later doubled. Housed originally in the Johanneskirche, Liegnitz, the library was moved several times during the 17th and early 18th centuries; it was ultimately housed in the Ritterakademie, Liegnitz, in 1741.

The Thirty Years War diverted the duke's attention from both music and books. Between 1627 and 1635 both Protestant and Catholic armies occupied Liegnitz at various times and confiscated many of the library's holdings, especially works on law, theology and medicine. The duke was most interested in his music collection which apparently survived intact. It consisted of 460 volumes containing works by more than 700 composers of the 16th and 17th centuries. Most of the pieces were Franco-Flemish, but Italian and German works also accounted for a large proportion of the collection. The duke's widespread reputation as a connoisseur of music is clear from the number of works in his library that were dedicated to him by their composers, among them Schütz and Schein. In 1621, on his way to Breslau with his Kapelle, Schütz visited Duke Rudolph in Liegnitz, and on 3 November directed performances of his two motets *Syncharma musicum* and *Tentonium dudum belli* there while Elector Johann Georg of Saxony, representing the Emperor, received the oath of loyalty sworn by the Silesian estates to the house of Habsburg. Nor did he neglect the musicians of his own district as can be seen by the inclusion of pieces by Samuel Besler, Thomas Fritsch, Thomas Stoltzer and other local musicians of his own and earlier times. The collection remained intact until World War II, when Soviet troops removed it from Liegnitz; it is now dispersed among at least four libraries in Poland (*PL-LEtpn*, *Lk*, *Wn*, *WRu*).

CHRISTOPHER WILKINSON

Geraert, Jan. *See* GERARD, JAN.

Gerald de Barri. *See* GIRALDUS CAMBRENSIS.

Geraldo [Bright, Gerald W.] (*b* London, 10 Aug 1903; *d* Vevey, 4 May 1974). English band-leader. He studied the piano at the RAM; after working as a cinema pianist and restaurant organist he led the resident band at the Hotel Majestic, St Anne's-on-Sea, for almost five years during the late 1920s and made frequent broadcasts. He led the Gaucho Tango Band at the Savoy Hotel (1930–37) and in 1933 formed a dance orchestra into which he introduced some good jazz soloists and which gave a short series of Sunday Night Swing Club Concerts at St Martin's Theatre (1939). In 1940 he left the Savoy to tour, became supervisor of the Entertainments National Services Association Band Division and played in the Middle East, North Africa and Italy, strengthening his band throughout the war (unlike most leaders). From then until the mid-1950s he was the leading dance-band leader in Britain, showing an adventurous sense for current idioms. In parallel with his bandleading, Geraldo ran a theatrical booking agency from the late 1940s. Among his contracts was the supply of bands to North Atlantic passenger liners, and his musicians became known as 'Geraldo's Navy'. He gave up bandleading in the late 1950s, but occasionally re-formed his band for concerts and broadcasts. He continued his management activities and for a time was music director of Scottish Television.

ALYN SHIPTON

Gerald of Wales. *See* GIRALDUS CAMBRENSIS.

Gérard, Henri-Philippe (*b* Liège, 9 Nov 1760; *d* Versailles, 11 Sept 1848). Flemish composer and teacher of singing. He began his musical studies as a choirboy at Liège Cathedral and was then sent to Rome; there he studied singing and composition under Grégoire Ballabene, who was in charge of the music at S Pietro and was composer of a celebrated 48-part mass. In about 1788 Gérard, who was also a talented violinist and pianist, went to Paris to devote himself to teaching. With the help of Grétry he joined the staff of the Conservatoire in 1802 and in January 1819 was appointed professor of singing, a post he held until he retired to Versailles early in 1828. His compositions are of little importance but his writings are of much historical interest for the teaching of singing.

WORKS

all published in Paris, n.d.

Musique religieuse écrite dans le style dit à la Palestrina, several works, 2–4vv, inst acc.
Romances et petits airs, several collections, pf/hp acc.
Canons en français et en italien, 2 collections
Couplets chantés par les élèves du Musée d'émulation

Les moulins de Fervacques: fugue imitative suivie d'une pastorale, pf

WRITINGS

Méthode de chant (Paris, 1816–*c*1825)
Considérations sur la musique en général et particulièrement sur tout ce qui a rapport à la vocale, avec des observations sur les différents genres de musique, et sur la possibilité d'une prosodie partielle dans la langue française entremêlées et suivies de quelques réflexions ou observations morales (Paris, 1819)
Traité methodique d'harmonie ... mise à la portée des commençants (Paris, 1833)

JOHN LADE

Gerard [Geraert, Girard, Gerardus, Geerhart, Ghirardo], **Jan** (*fl* 1548–75). Flemish countertenor. He sang in the chapel of Charles V and Philip II in Madrid (1547–75) and was a prebend of Nivelles and of various hospitals in Flanders and Brabant. On 25 February 1575 he was given a pension for his 'long and good services in the chapel'. He is often confused with Derick Gerarde, Gerard Avidius and Geert van Turnhout. Three of his motets were published by Susato (RISM 1553[16]); four chansons by Phalèse (1552[12], 1554[23]); three by Susato (1544[12], 1550[13], 1551[18]); and one by Gardane (1557[18]). (*EitnerQ*; *VannesD*)

P. ANDRIESSEN

Gérard, Yves(-René-Jean) (*b* Châlons-sur-Marne, 6 Jan 1932). French musicologist. He studied philosophy at Nancy University (1949–55) and the piano at Nancy Conservatory (1950–52). He then went to Paris, where he studied under Chailley at the Sorbonne (1955–6) and at the Conservatoire (1953–60) under Dufourcq (music history and musicology) and Roland-Manuel (aesthetics), taking *premiers prix* in all three subjects. From 1965 to 1975 he was a researcher at the CNRS. In 1975 he succeeded Dufourcq as professor of music history and musicology at the Paris Conservatoire, a post which he held until his retirement in 1997. He was president of the Société française de musicologie (1980–83) and the French representative on the IMS Council (1982–92).

Gérard specializes in Boccherini, chamber music of Italy, Spain, Austria and France during the second half of the 18th century, Saint-Saëns and French music of the 19th and early 20th centuries. His most important work, however, is devoted to Berlioz: he co-edited the fourth volume of Berlioz's *Correspondance générale* and *La*

critique musicale, 1823–1863, a collection of Berlioz's writings.

CHRISTIANE SPIETH-WEISSENBACHER/JEAN GRIBENSKI

Gerarde [Gerard, Gerardus, Gerrarde]**, Derrick** [Dethick, Dyricke, Theodoricus] (*fl c*1540–80). Flemish composer, active in England. Nothing is known about his origins, musical upbringing or career outside England. During the third quarter of the 16th century he was associated with Henry Fitzalan, 12th Earl of Arundel (*d* 1580), and Arundel's son-in-law and heir John, Lord Lumley (*d* 1609). Details of the connection are lacking; it is unclear whether music was Gerarde's main interest or occupation, and claims that he served as Arundel's composer-in-residence or choirmaster are unproven. Evidence of Gerarde's residence in England can be gleaned from six sets of manuscript partbooks, most of which are devoted exclusively to his own compositions. All six sets, which can be placed in chronological order on grounds of handwriting and notation, were owned either by Arundel or Lumley, and in 1596 formed part of the celebrated library at Nonsuch Palace. Four of them survive intact (*GB-Lbl* Roy.App.17–22, 26–30, 31–5 and 49–54), the others are incomplete (*Lbl* Roy.App.23–5 and 57). No trace remains of a manuscript described in the 1596 Nonsuch inventory as 'A rolle of Cannons of Dethick Gerrarde'.

Gerarde's Flemish origins are implied not only by his name, but also by the contents of *Lbl* Roy.App.49–54, a collection of motets and chansons by Clemens non Papa, Gombert and their contemporaries, copied largely in Gerarde's hand and containing many unica. However, even those partbooks may have been compiled partly or wholly in England; a chanson by 'Morel', an unidentified composer whose name is linked with Arundel's in other Nonsuch books, occurs on the opening pages, apparently as a late addition. Gerarde's other partbooks also have English connections. Two of them (*Lbl* Roy.App.23–5 and 31–5) include English-texted works by Gerarde. Another (*Lbl* Roy.App.57) is copied on printed music-paper of a design that occurs in English manuscripts of the 1560s. Taken together, these clues suggest that Gerarde had a long-term involvement with England; yet his music appears to have had very limited circulation in English musical circles. Beyond the Nonsuch partbooks, only two other works by Gerarde are known: a six-voice setting of *Sive Vigilem*, copied by John Baldwin (*Och* 979–83, *c*1580), and an untexted piece, *Chera la fontayne* (?Chiara fontana), attributed to 'Gerardus' in *Lbl* Add.31390 (*c*1578). Neither Thomas Whythorne nor Thomas Morley included Gerarde's name in their lists of composers resident in England.

Most attempts to shed further light on Gerarde's life and works have been speculative; some have proved to be misleading. Palaeographical evidence suggests (but does not conclusively prove) that Gerarde copied some of the instrumental music in *Lbl* Roy.App.74–6. If this is the case, then he may have been connected with a violin consort of the kind that was retained by the English court. Two further manuscripts formerly claimed as Gerarde's and used in the construction of his biography are now known not to be in his handwriting; they are *Lbl* Roy.App.59–62 (Italian *villote* etc., *c*1560), and *Lbl* Roy.App.55 (monophonic *airs de cour* and Italian monody, ? *c*1610). Beyond the coincidence of names, nothing obviously connects Derrick Gerarde to the 'Gerrard Derrick', singing-man at York Minster *c*1590–1604, some of whose English service-music survives in 17th-century Cambridge and Durham sources, and who may also have been responsible for 'Mr Dethicks Pavan' in *Lbl* Add. 30826–8.

Gerarde's biographical elusiveness is regrettable, since his partbooks reveal much about his working methods and musical mentality. No other 16th-century composer is more richly provided with surviving autograph materials. A large number of his works exist in two or more states; early versions were often modified through deletion or erasure, and in a few cases substantial passages of music or even whole pieces were obliterated under paste-down cancels. (Microfilms of Gerarde's autograph partbooks made before the paste-down cancels were lifted do not reveal the full extent of his revisions.) Text-placement in particular was subject to alteration, especially when pieces were re-copied from one set of partbooks to another. A few fragmentary sketch-leaves formerly concealed within the Nonsuch partbooks show that Gerarde did not necessarily rely upon exact score alignment in order to devise complex polyphonic textures, but could compose directly into independent voice-parts. In sum, the partbooks document the workings of a competent, sensitive and self-critical composer, whose music negotiates a path between the densely imitative techniques of Gombert's generation and the more text-sensitive manner of Lassus.

Approximately 170 compositions by Gerarde survive, scored for between four and ten voices. With the exception of the tentatively attributed instrumental pieces in *Lbl*

Roy.App.74–6, all are vocal, the majority of them with Latin or French words. There are no masses or *Magnificat* settings, and few motet texts derive from the Roman Catholic liturgy. An exception is *Egrediente Domino*, a responsory constructed around a monorhythmic cantus firmus, which may have been written in emulation of similar works by English composers. The piece evidently caused Gerarde some trouble, since his first version was cancelled by a second, inserted into *Lbl* Roy.App.26–30 on pastedown leaves. Gerarde's early works favour continuously imitative polyphony; pieces found only in his later partbook sets often make greater use of homophonic textures and less rigorously imitative techniques. Gerarde also composed several Italian madrigals, two English-texted pieces (one of which, *Lorde be my Judge*, is a metrical psalm setting), and one work, *Pandalidon*, in an apparently invented language. No collected edition of Gerarde's music has as yet been attempted.

WORKS

In *GB-Lbl* Roy.App.17–22, 23–5, 26–30, 31–5, 49–54, 57, unless otherwise stated.

MOTETS AND LATIN-TEXTED SONGS

Adhesit pavimento, 5vv; Ad te levavi oculos meos, 6vv; Angelus ad pastores, 8vv; Angelus Domini descendit, inc.; Animam meam, 6vv; Ascendens Christus, 5vv; Aspice Domine, 6vv (2 settings); Beati omnes, 5vv; Benedictus Dominus, 5vv; Christus factus est, 5vv; Cognovi Domine, 8vv; Congregati sunt inimici, 5vv; Creator omnium, inc.; Da mihi Domine, 6vv; Da pacem Domine, 5vv; Derelinquat impius, 6vv (2 settings); Derelinquat impius (iii), inc.; Deus in nomine tuo, 4vv; Deus qui superbis, 7vv; Domine clamavi, 6vv; Domine da mihi, 7vv; Domine ne memineris, 6vv; Dulces exuviae, 5vv; Dum transisset sabatum, 6vv

Ego autem cantabo, 7vv; Ego autem cantabo, 5vv; Ego Dominus hoc est, inc.; Ego flos campi, inc.; Egrediente Domino, 5vv (2 settings); Ex animo cuncti, inc.; Fidem refondens, 4vv; Fortem vocemus, 5vv; Fortem vocemus, 4vv; Fremuit spiritus Jesus, inc.; Gloria tibi trinitas, inc.; Gratia vobis et pax a Deo, 9vv; Heu michi Domine, inc.; Hodie Christus natus est, 8vv; Hodie nobis coelorum rex, 8vv; Hodie nobis de celo, 5vv; Honor virtus et potestas, 7vv; Illuminare Jerusalem, 8vv; In Monte Oliveti, 7vv; In patientia vestra, 4vv; In tribulatione mea, 8vv

Lactare Jherusalem, 6vv; Laudate Dominum in sanctis eius, 8vv; Laudate Dominum omnes gentes, 5vv; Laudate Dominum omnes gentes, 4vv; Laudem dicite Deo nostro, 7vv; Laudemus omnes Dominum, 8vv; Laus Deo patri, 10vv; Levavi oculos meos, 5vv; Magi veniunt ab oriente, 6vv; Miserere mei Deus, inc.; Miserere mei Domine, 5vv; Misericordia et veritas, 6vv; Misit me vivens pater, inc.; Multiplicati sunt, 5vv; Murus aeneus, 8vv; Noe noe exultemus, 8vv; Non me vincat, 6vv; Nunquid adheret, inc.; Occurrerunt Maria et Martha, 6vv (2 settings); O Maria vernans rosa, 5vv; Omnibus in rebus, inc.; Omnis caro foenum, 6vv

Parvulus filius, inc.; Peccantem me quotidie, 6vv; Peccata mea Domine, inc.; Proba me Domine, inc.; Puer qui natus est, 6vv; Quare fremuerunt gentes, 5vv; Quare tristis es anima mea, 6vv; Respice in me, 4vv; Si bona suscepimus, inc.; Sic Deus dilexit, 6vv; Sive vigilem, 6vv, *GB-Och* 979–83; Timor et tremor, 8vv (2 settings); Tribulationem nostram, 6vv; Tua est potentia, 5vv; Tu Bethleem, 5vv; Urbs beata Jerusalem, inc.; Versa est in luctum, 6vv; Vias tuas Domine, inc.; Viri Galilei, 6vv; Vivere vis recte, 5vv; Voce mea ad Dominum clamavi, 5vv

CHANSONS

Adieu celle qui j'ay servi, inc.; Adieu l'espoir, 5vv; Adieu mon esperance, 6vv; Adieu mon esperance, 5vv; Aiez pitie de votre amant, 5vv; Amour au coeur, inc.; Amour au coeur, 5vv; Amy soufrez, 5vv; Avecques vous, 8vv; Bon jour m'amye, 5vv; Ce mois de may, 5vv; Ce mois de may, inc.; Ceste belle petite bouche, 6vv; C'est grand plaisir, 6vv; Dictes pour quoy, 5vv; Donez secours, inc.; En attendant d'amour, 8vv, En attendant d'amour, inc.; En attendant secours, 5vv; Est il possible, 5vv

Hatez vous de ma faire grace, 6vv; Hellas quel jour, 6vv; J'attens secours, 6vv; J'ay mis mon cueur, 6vv; J'ay si fort bataillez, 5vv; J'ay tant chasse, 8vv; J'ay veu le temps, 5vv; Je l'aime bien, 5vv; Je ne desire, inc.; Je ne me puis tenir, 5vv; Je ne scay pas coment, 5vv; Je ne scay pas coment, inc.; Je ne suis pas de ces gens, 5vv; Je ne suis pas de ces gens, inc.; Je suis aimez, inc.; Je suis amoureulx, 5vv; Je suis disheritee, 6vv; Joieusement il faict, inc.

Las voules vous, 6vv; Le bergier et la bergiere, 5vv (2 settings); Le rossignol plaisant, 6vv; Le souvenir d'aimer me tient, 5vv; Mon ceur chante joyeusement, 6vv; Mon ceur chante joyeusement, 5vv; Mon coeur chante joieusement, inc.; Oncques amour, 6vv; Oncques amour, inc.; Or est venu le printemps, 6vv; O souverain pasteur et maistre, 5vv; Par vous seule, inc.; Pere eternel, 5vv; Petite fleur, 6vv; Plaisir n'ay plus, 6vv; Pour une las j'endure, 6vv; Pour une seulle, 5vv; Prenez plaisir, inc.; Puisque fortune, 6vv; Puis qu'elle a mis, 5vv

Reiouissons nous, 6vv; Reveillez vous, 6vv; Reviens vers moy, inc.; Se dire ie losoie, 5vv; Si j'ay du mal, inc.; Soions joieulx joieulement, inc.; Soions joyeulx sur la plaisant verdure, 8vv; Ta bonne grace, inc.; Tant ay souffert, 6vv; Tant que en amour, inc.; Tous mes amis, 5vv (2 settings); Vivons joieusement, 5vv; Vivre ne puis, 5vv (2 settings)

MADRIGALS

Amor piangeva, 5vv; Chera la fontayne (?=Chiara fontana), 5vv, *GB-Lbl* Add.31390; Die lume, 5vv; Gia piansi, 5vv; Il foco ch'io sentia, 4vv; La neve i monti intorno, inc.

MISCELLANEOUS VOCAL

Lorde be my Judge, inc.; Pandalidon, inc.; Yf Phebus stormes, 5vv

Gerardis, Giovanni Battista Pinellus de. *See* PINELLO DI GHIRARDI, GIOVANNI BATTISTA.

Gerardo. Name of two 16th-century musicians who may be identifiable with DERRICK GERARDE.

Gerardus. Composer, possibly identifiable with DERRICK GERARDE.

Gerardus, Jan. *See* GERARD, JAN.

Gerber, Christian (*b* Gornitz, nr Borna, 1660; *d* Lockwitz, nr Dresden, 25 May 1731). German clergyman and writer. He studied theology at the universities of Leipzig and Wittenberg, receiving a master's degree from the latter in 1684. In 1685 he became a minister at Rothschönberg and in 1690 at Lockwitz. He wrote the chorale text *Wohl dem, der Gott zum Freunde hat*, but his more significant connection with music developed out of one of his several theological works, *Unerkandte*

Sünden der Welt, nach Gottes heil. Wort, und Anleitung vornehmer Lehrer unserer Kirche, der sichern Welt zu ihrer Bekehrung vor Augen gestellt (Dresden, 1690, 5/1703). In chapter 81, 'Von dem Missbrauch der Kirchen-Music', he denounced, as a true Pietist, the use of music in the Protestant church, citing the scriptures and the words of Luther to prove that the church music of his time was sacrilegious. His overzealous criticisms and his frequently faulty citations from the Bible and Luther engendered an effective and interesting counter-attack in defence of church music by GEORG MOTZ, who in his *Die vertheidigte Kirchen-Music* (1703) provided colourful and instructive arguments in favour of it, using as proof not only the Bible and Luther's works but also relevant passages from many music theorists of the 16th to 18th centuries. Motz continued his arguments in a second work, *Abgenötigte Fortsetzung der vertheidigten Kirchen-Music* (1708), and Gerber responded in turn in the preface to his *Unerkannte Wohlthaten Gottes* (Dresden, 1711). Gerber's well-known denunciation of theatrical Passion music performed in some 'large town', which appeared posthumously in his *Historie der Kirchen-Ceremonien in Sachsen* (Dresden, 1732), has sometimes been understood as an indictment of Bach's Passion services at Leipzig, but there is nothing to show that these were what Gerber had in mind.

GEORGE J. BUELOW

Gerber, Ernst Ludwig (*b* Sondershausen, 29 Sept 1746; *d* Sondershausen, 30 June 1819). German music scholar, organist and composer. He was the son of the composer and Bach pupil HEINRICH NIKOLAUS GERBER, who was also his first teacher of the organ and music theory. In 1765 Gerber began to study law at Leipzig University and then worked as an assistant in a solicitor's office. He also appeared as a cellist at public concerts and at the theatre. Unsatisfactory professional circumstances caused him to return to Sondershausen, where he practised as a lawyer and taught the children of the Prince of Schwarzburg-Sondershausen. In 1775 he succeeded his father as court organist and at the same time acted as accountant to the management of the prince's estate, and later became secretary to the court. He held these posts until his death.

Gerber won some distinction as a composer, but achieved lasting fame as a collector and lexicographer. During his lifetime he amassed one of the greatest private music libraries of the 18th century, in which he incorporated his father's collections and portions of the libraries of J.V. Eckelt and J.G. Walther. The Leipzig firm of Breitkopf also presented him with copies of many of its publications. Gerber's library and music collection, the scope of which is described in a manuscript index of 1791 and in a printed catalogue of musical writings, dated 1804, was sold by him in 1815 to the Gesellschaft der Musikfreunde in Vienna, on condition that he should retain its use during his lifetime. At his death, however, his collection seems not to have passed to the new owners in its entirety, for valuable individual items, such as *Florilegium portense* (Nuremberg, 1713), reached the library of the Institute of Musicology at Vienna University, and Zarlino's *Le istitutioni harmoniche* (Venice, 1558) the library of the Benedictine monastery at Göttweig. Manuscript and printed music from Gerber's property entered the private library of J.A. André. Items from the expanded André library were auctioned in 1845, and were sold by the antiquarian dealer Hans Schneider (Tutzing) as recently as 1956 (catalogue no.54).

Gerber's work as a music lexicographer grew principally from his private collection, beginning with the set of biographical articles for his own collection of musical portraits. In its first state, known as the old Tonkünstler-Lexicon of 1790–92, it was simply a two-volume enlargement of J.G. Walther's *Musicalisches Lexicon* (Leipzig, 1732), and included the innumerable items of supplementary material collected by Walther himself. Several appendixes containing information on musicians' portraits, medallions, busts and statues, and pictures of famous organs, are still valuable aids to musical iconography. After the completion of this work, J.F. Reichardt (1792) and E.F.F. Chladni (1795) contributed substantial additions which Gerber combined with the material he had himself already assembled to form the four-volume new Tonkünstler-Lexikon of 1812–14. This therefore does not constitute a new edition of the old lexicon but, rather, amplifies it. The work continued to hold the interest of the scholarly world: Gerber himself collected further additions, and Carl Mainberger (1816) and F.S. Kandler (1817–20) were among others who published supplementary material. A new edition was announced in 1825 but came to nothing.

Particularly as it has never been fully incorporated into more recent music reference works, Gerber's work is still indispensable, especially concerning personalities of the 18th century. The published supplements to the two lexicons, together with all the corrections entered in Gerber's own copies and his numerous manuscript supplements, amendments and additions, were brought together and published in one volume by Othmar Wessely in 1969. Gerber's lexicons formed the basis (though not acknowledged) of Choron and Fayolle's *Dictionnaire historique des musiciens* (Paris, 1810–11), Bingley's *Musical Biography, or Memoirs of the Lives and Writings of the Most Eminent Musical Composers and Writers* (London, 1814), and Sainsbury's *A Dictionary of Musicians* (London, 1824). His own 'Versuch eines vollständigen Verzeichnisses von Haydns gedruckten Werken', published by H.P. Bossler in 1792 and later expanded in the new lexicon, forms an important contribution to knowledge of the transmission of Haydn's works.

Of Gerber's compositions only three small pieces reached publication, in contemporary music periodicals. Others, including six sonatas and smaller works for keyboard and about 50 organ chorale preludes and postludes, are listed in manuscript collections by Eitner. Among Gerber's lost works are a concertino for wind instruments and orchestra and marches for wind instruments, all featuring the newly invented bass-horn.

OTHMAR WESSELY

Gerber, Heinrich Nikolaus (*b* Wenigenehrich, nr Sondershausen, 6 Sept 1702; *d* Wenigenehrich, 6 Aug 1775). German composer and organist, father of ERNEST LUDWIG GERBER. His father was a farmer, and he received his first tuition in music from the organist Irrgang in Bellstedt. In 1717 he went to Mühlhausen, where he found a stimulating musical environment and met Johann Friedrich Bach. In 1721 he went to Sondershausen to complete his schooling. He studied composition with the town organist J.V. Eckold, and composed his first keyboard works under his direction. In May 1724 Gerber went to Leipzig University to study law, and towards the end of the year became a private pupil of J.S. Bach, who taught him keyboard and figured bass. Gerber made copies of several of Bach's keyboard works (including part 1 of *Das wohltemperirte Clavier*) in 1725–6. In 1727 (or perhaps the previous year) he returned to his home town, and in 1728 became organist in Heringen, but soon had to give up this position after a disastrous fire there. At the end of 1731 he took up the position of court organist in Sondershausen, where he was also harpsichordist in the court Kapelle and taught many pupils keyboard and composition. In Sondershausen he also had the opportunity of meeting J.A. Scheibe (in 1736) and J.P. Kirnberger (in 1740). In 1749 he was obliged, against his will, to take up the position of court secretary. Continually pressed, until the age of 35, by recruiters who wanted to force him into the Prussian Army, he had to turn down many concert and educational trips. He is said to have called again on Bach in Leipzig about 1737.

Gerber wrote numerous keyboard works (harpsichord and organ concertos, preludes and fugues, sonatas, suites, inventions, trios and chorale settings) as well as church music (motets and cantatas). Those that survive are for organ (see McLean): four inventions (*US-NH*), a concerto (*D-Bsb*) and chorales (nine in *US-PRu*; two in *D-Bsb*; two in private hands, formerly in *Gb*; and one in *US-NH*). Gerber also constructed a straw fiddle, or xylophone, and worked on technical improvements to the clavichord and organ.

ANDREAS GLÖCKNER

Gerber, Rudolf (*b* Flehingen, Baden, 15 April 1899; *d* Göttingen, 6 May 1957). German musicologist. He began his musical studies at the Karlsruhe Conservatory, where he concentrated on the violin. Between 1918 and 1922 he studied under Hermann Abert at the universities of Halle and Leipzig, and took the doctorate at Leipzig in 1922 with a dissertation on Hasse's operatic arias. In 1923 he followed Abert to Berlin as assistant lecturer and at the same time pursued his violin studies. In 1928 he submitted his *Habilitationsschrift* at the University of Giessen, where he directed the department of musicology, and was appointed reader in 1937. He also taught at the University of Frankfurt (1933–5) and – while still professor at Giessen – gave lectures on the history of church music at the Frankfurt Musikhochschule (1938–43). Upon Hitler's rise to power, Gerber outlined the tasks of musicology in the Third Reich (1935) and went on to work on several

projects for the Rosenberg Bureau, including the inventory and seizure of library materials in occupied France. From 1943 he was full professor at Göttingen University. He was elected to membership in the Göttingen Akademie der Wissenschaften in 1952.

Gerber's publications reveal a wide variety of interests, including exploring the nature of German art music, aspects of race and genealogy, and German folk music. His dissertation was the first extended study of Hasse's Metastasian operas and is consequently of fundamental importance. He returned to opera in his work on Gluck, which resulted in a completely new picture of the composer and a projected complete works. In addition, he made substantial contributions to research into Brahms's music and that of Schütz and his contemporaries. In his last years his principal interest lay in the polyphonic hymn of the 15th century. Gerber's work was characterized by thoroughness of scholarship and penetrating treatment of material; his writings represent important advances in the areas in which he worked.

ANNA AMALIE ABERT/PAMELA M. POTTER

Gerbert, Martin, Freiherr von Hornau (*b* Horb am Neckar, 11 or 12 Aug 1720; *d* St Blasien, 13 May 1793). German music historian, theologian, abbot and composer. He received training with the Jesuits and entered the Benedictine monastery at St Blasien. After ordination in 1744 he served as instructor in theology and philosophy and as librarian of the chapter. From 1754 to 1764 he published a series of didactic theological works and travelled extensively in France, Italy, Switzerland and Germany. On these journeys he met leading scholars and surveyed the contents of libraries for medieval sources of theology, liturgy and music history. In 1762 he issued a prospectus for a history of sacred music, soliciting information from archivists about the contents and location of medieval music manuscripts.

On 15 October 1764 he was named Prince-Abbot of St Blasien, becoming both a spiritual leader and a princely subject of the imperial court at Vienna. In July 1768 a fire destroyed his monastery, church and library including most of his manuscript collection. Fortunately the first volume of his *De cantu et musica sacra* had already been printed and copies of the materials for the second volume had been sent to Padre Martini in Bologna, with whom Gerbert had intended to collaborate. The complete work was finally published in 1774, and was followed in 1784 by his three-volume *Scriptores ecclesiastici de musica sacra potissimum*, an edition of the texts of more than 40 medieval music treatises. In the years after the fire, with the help of Maria Theresa, he rebuilt the monastery, founded schools and hospitals and defended his ecclesiastical estates from political confiscation.

Gerbert's work places him among the founders of modern historical musicology with Burney, Hawkins and Forkel. Though the texts as rendered in his *Scriptores* are faulty by modern standards, they are one of the most important collections of original documents in medieval music and music theory. Only with extensive scholarly study after 1945 have substantial improvements been made on Gerbert's editions. *De cantu et musica sacra* also anticipates modern music scholarship, dealing chronologically with music for the Mass, Office, psalms, hymns and national traditions in chant. Coussemaker's *Scriptorum* (1864–76) supplements this collection.

Gerbert's compositions include an offertory published in Remigius Klesatl's *XXIV offertoria solennia* (Augsburg, 1747), and an eight-part *Missa in coena Domini* published at the end of the second volume of *De cantu et musica sacra*.

HOWARD SERWER

Gerbert d'Aurillac [Silvester II] (*b* Aquitaine, *c*940; *d* 12 May 1003). Scholar and pope. His influence in the history of thought was such that the 10th century has been called the 'century of Gerbert'. His importance for music lies in his comments on Boethius's *De musica institutione* and his treatise on the division of the monochord and the measurement of organ pipes.

In three letters dating from 986/7 to members of the abbey of Aurillac, Gerbert deals with problems relating to the organ, not as regards chant accompaniment, but the use of the instrument for didactic purposes, as did Hucbald of St Amand in his *Musica*. Gerbert had entered the monastery of Aurillac reformed by Odo of Cluny, *c*925. His primary interests lay in scholarship: he travelled to Catalonia to study under Arab mathematicians and astronomers. Adalbero, archbishop of Reims, summoned him, probably in 972, to teach the subjects of the Quadrivium (geometry, arithmetic, astronomy and music) at the episcopal school at Reims, where he probably wrote his treatise and his letters commenting on Boethius. He was elected Abbot of Bobbio and, in 999, pope, taking the name Silvester II.

In two letters addressed to Constantinus, master of the Fleury monastic school, Gerbert comments on two passages from Boethius's *De musica institutione* (ii, 10; ii, 21), concerning the relationship between mathematics and music. These letters survive in anthologies of treatises, almost all of which originated in Lorraine (*B-BRs*, 531; *Br* 4499–503, f.41*v*; 10162–6, f.85; *D-DS* 1988, f.168*v*, from St Jacques de Liège; *GB-Ob* C.270, from Lorraine).

A treatise on the measurement of organ pipes is attributed to Gerbert in one source (*E-Mn* 9088, f.125*v*; ed. in Sachs, 1970, p.59), and this attribution should be accepted even though the treatise has elsewhere been attributed to Bernelinus, Gerbert's pupil. Richer, Gerbert's biographer, ascribed to Gerbert a treatise on the division of the monochord: this is the same treatise; it deals with both organ pipes and the monochord, and shows that the same method of measurement is not appropriate for both ('De commensuralitate fistularum et monocordi cur non conveniant'). The treatise survives in five early manuscripts (*E-Mn* 9088, ff.125–128*v*; *F-MOf* H.491, f.81; *Pn* lat.7377 C, ff.44*v*–47; *I-Rvat* lat.4539, ff.85–91*v*; *Rvat* Reg.lat.1661, ff.34*v*–39*v*; ed. in *GerbertS*, i, 312–30 and *PL*, cli, 653–74, and attributed to Bernelinus).

MICHEL HUGLO

Gerbič, Fran (*b* Cerknica, 5 Oct 1840; *d* Ljubljana, 29 March 1917). Slovenian composer and singer. He was taught music by C. Mašek in Ljubljana, and from 1865 to 1867 he attended the Prague Conservatory, studying singing with F.A. Vogl and composition with Josef Krejčí. As an operatic tenor he sang in Prague (1867–9), Agram (now Zagreb, 1869–78), Ulm (1880–81) and Lemberg (now L'viv, 1881–2). Ill-health forced him to give up his operatic career and from 1882 to 1886 he taught singing at the Lemberg Conservatory. In 1886 he went to Ljubljana, and was active there until his death, having connections with various institutions as choral director, conductor and teacher; he was also director of the music school of the Glasbena Matica society. His most important compositions are the piano mazurkas, the orchestral *Jugoslovanska balada* (1910) and *Lovska simfonija* ('Hunting Symphony'), and some of his solo songs. He also wrote two operas, *Kres* (not performed) and *Nabor*

(performed in Ljubljana, 1925), two cantatas, works for unaccompanied male choir, lieder, some church music (three masses, hymns), orchestral music (including two symphonies) and piano works. He was a very versatile musician, successfully active as singer and teacher, as publisher (of a collection of hymns, *Lira Sionska*, Prague, 1866), and as the director of the periodical *Glasbena zora*. In 1892 he established the first professional opera ensemble in Slovenia. At the same time he made an important contribution to the organization of the music school in Ljubljana and to the general development of Slovenian music at the end of the 19th century. He also published a singing method (1912).

DRAGOTIN CVETKO/ZORAN KRSTULOVIĆ

Gerbich [Gerbig], **Johann Anton.** *See* GÖRBIG, JOHANN ANTON.

Gerdes, Federico (*b* Tacna, 19 May 1873; *d* Lima, 18 Oct 1953). Peruvian pianist, conductor and composer. He received his training in Wiesbaden with Spangenberg (piano) and from 1893 at the Leipzig Conservatory with Weidenbach and Reinecke (piano), Jadassohn (harmony and counterpoint) and Panzner (orchestration and conducting). Before 1908 he held various conducting positions, including those of orchestra and choral director at theatres in Düsseldorf and Stettin, director of the Schola Cantorum at the Royal Opera in Berlin (1906), and choral conductor in Bayreuth under Hugo Rüdel (1908). He also appeared as a concert pianist in Germany and Russia. In 1908 the Peruvian government made him director of the Philharmonic Society as well as head of the National Academy of Music in Lima, a position he held until 1929 and again from 1932 to 1943. During his tenure of more than 40 years as conductor of the Philharmonic, he presented for the first time in Lima the symphonies of Beethoven and Schubert.

JOHN M. SCHECHTER

Geremia, Giuseppe (*b* Catania, 19 Nov 1732; *d* Catania, Jan 1814). Italian composer. He studied in Naples at the Conservatorio di S Maria di Loreto, where he was a pupil of Francesco Durante, and later taught Giuseppe Sigismondo. Two oratorios (1758 and 1760) and a harpsichord sonata (1769, ed. R. Musumeci; Palermo, 1999) have survived from his Neapolitan period. Together with Logroscino and Insanguine he composed the music for the comic opera *L'innamorato balordo* (1763, Naples), of which only the libretto has survived. In 1773, after declining posts in Rome, and at the courts of Turin, St Petersburg and Spain, he became *maestro di cappella* in Catania at both the cathedral and the Benedictine abbey of S Nicolò l'Arena; he left the cathedral post to his pupil Giacinto Castorina in 1800 but retained the abbey position at least until 1807 if not until his death. Together with V.T. Bellini, Vincenzo Bellini's grandfather, he was the leading figure in musical life in Catania in his day; both men enjoyed a high reputation as teachers, producing a number of skilled musicians, but never collaborated on any compositions.

Geremia's surviving works include about 100 sacred compositions held in manuscript mostly in Catania, with other sources in London, Dresden, Vienna, Naples and Noto (Siracusa). Among these are the *dialogo teatrale La città d'Abella liberata* of 1780 (only the first part of the three-part *festa teatrale* version of 1783 survives), 12 other oratorios including *Mosé trionfante* (1800) and *Il ritorno di Noemi* (1802), two secular and two sacred cantatas and 23 masses (two of which differ only in sections of the music and in instrumentation) including a *Missa pro defunctis* (1809) and *Messa breve* in F of 1810.

ROSALBA MUSUMECI

Gergalov, Aleksandr (*b* 5 July 1955). Russian baritone. A principal with the Kirov Opera, he made his début with the company as Rossini's Figaro in 1982, the year he graduated from the Leningrad Conservatory. He was a prizewinner at Geneva (1985) and in the Chaliapin All-Russian Vocalists Contest (1989). His important roles include Onegin, Di Luna and the Marquis of Posa. He was much admired as Andrey Bolkonsky in *War and Peace* at the Mariinsky Theatre in 1991, televised in Europe and recorded on disc and video. Other parts recorded with the Kirov include Yeletsky (*Queen of Spades*), the Venetian (*Sadko*), Prince Ivan (*Kashchey the Immortal*) and Ferdinand (Prokofiev's *Betrothal in a Monastery*). His focussed voice is distinctive for its dark, eloquent tone.

JOHN ALLISON

Gergely, Jean (*b* Budapest, 23 May 1911; *d* Paris, 9 Sept 1996). French ethnomusicologist of Hungarian birth. In Budapest he studied composition with Siklós at the academy (1929–35), and linguistics with Sauvageot, Hungarian and Finno-Ugrian linguistics with Gombocz and ethnomusicology with Kodály at the university (1930–33). In Paris he attended musicology lectures by Pirro and Masson at the Sorbonne (1938–41), and by Le Guennant and Potiron at the Institut Grégorien (1939–43). He was first a music teacher (Mohács, 1935–6) and then a music critic (Budapest, 1936–8); in Paris (1938) he was initially choirmaster of the Hungarian Catholic Mission (until 1947), and then worked at, and became interim director of, the Institut Hongrois (until 1959). From 1949 he taught Hungarian language and civilization at the Institut National des Langues et Civilisations Orientales. For six years he also worked with Schaeffner at the Musée de l'Homme (1959–65). Although Gergely wrote a number of studies in linguistics (he gained the doctorate from the Sorbonne in 1968 with a dissertation on the Hungarian language), he devoted himself primarily to musicology. His two main fields of interest were ethnomusicology in Central Europe and Hungarian music, notably Kodály and Bartók. Gergely became one of the

leading authorities on Bartók, publishing a significant monograph devoted to him in 1980 (originally submitted as his doctoral dissertation in 1975) and compiling a volume of his documents in 1984.

CHRISTIANE SPIETH-WEISSENBACHER/JEAN GRIBENSKI

Gergiyev, Valery (Abissalovich) (*b* Moscow, 2 May 1953). Russian-Ossetian conductor. Brought up in Ordzhonikidze (now Vladikavkaz), North Ossetia, he studied piano and conducting at the Ordzhonikidze Music College and conducting with Il'ya Musin at the Leningrad Conservatory. While still a student he won second prize (no first prize awarded) in the Herbert von Karajan conducting competition and first prize in the All-Union conducting competition in Moscow. On graduation in 1977 he became assistant conductor to Yuri Temirkanov, then artistic director at the Kirov Theatre, Leningrad (now Mariinsky, St Petersburg). He made his début with the Kirov Opera in 1978, conducting Prokofiev's *War and Peace*. Between 1981 and 1985 Gergiyev was chief conductor of the Armenian State Orchestra and in 1988 he succeeded Temirkanov as chief conductor and artistic director of the Kirov company. In his first season he instigated a festival of five Musorgsky operas and in the following years mounted festivals commemorating Tchaikovsky (1990), Prokofiev (1991) and Rimsky-Korsakov (1994). Gergiyev has also taken the Kirov on numerous international tours. He made his British début in 1990 and appears regularly with the RPO. In 1992 he made his Metropolitan début with a highly successful *Otello*, and in 1995 was appointed principal conductor of the Rotterdam PO. Gergiyev has established a reputation for fervent, highly individual performances, especially of the Russian repertory, and has made notable recordings of *The Queen of Spades*, *Khovanshchina*, *War and Peace* and symphonies by Borodin and Rachmaninoff.

MARTYN BRABBINS

Gerhard. German family of organ builders. They were active in the 18th and 19th centuries. Justinus Ehrenfried Gerhard (*b* 1710 or 1711; *d* Lindig bei Kahla, 16 Jan 1786) probably learnt the art of organ building from the craftsman Tröbs in Weimar. About 1739 he founded a works at Lindig, in which town he married in 1741. He was a great craftsman, whose art is equal to that of Gottfried Silbermann. His instruments are solidly built, with beautiful Baroque façades, good dispositions and fine tone quality. The organ at Ziegenhain (1764; one manual and pedal, nine speaking stops and pedal coupler) is outstanding for its exceptionally powerful, clear sound and excellent voicing.

Christian August Gerhard (*b* Lindig, 1 Sept 1745; *d* Lindig, 15 Dec 1817), son of Justinus Ehrenfried, continued the business in Lindig. A grandson, Johann Christian Adam Gerhard (*b* Lindig, 17 Aug 1780; *d* Dorndorf an der Saale, 6 May 1837), opened a branch at Dorndorf.

Johann Ernst Gottfried Gerhard (*b* Lindig, 21 April 1786; *d* Merseburg, 23 Oct 1823), another grandson, was an organ builder in Merseburg; his firm survives today under the name of Kühn.

An organ builder with the name Gerhard worked in Boppard in the 19th century.

WALTER HÜTTEL

Gerhard, Anselm (*b* Heidelberg, 30 March 1958). German musicologist. After studying musicology with Finscher (Frankfurt, 1977–9) and Dahlhaus (Berlin, 1979–82), he took the doctorate at the Technical University of Berlin in 1985 with a study on the urbanization of 19th-century opera in Paris. He completed his *Habilitationsschrift* on the instrumental music of Muzio Clementi (1991) and was awarded a Heisenberg scholarship from the Deutsche Forschungsgemeinschaft. He was appointed assistant lecturer at the University of Münster (1992–4) and professor at the University of Berne (1994–), and is founding president of the Swiss national office of RISM (1996–). As a noted authority on opera history and music aesthetics of the 18th and 19th century, he combines the history of aesthetics and institutions with aspects of sociology in his work. His dissertation has done much to stimulate research on the *grand opéra* of Paris.

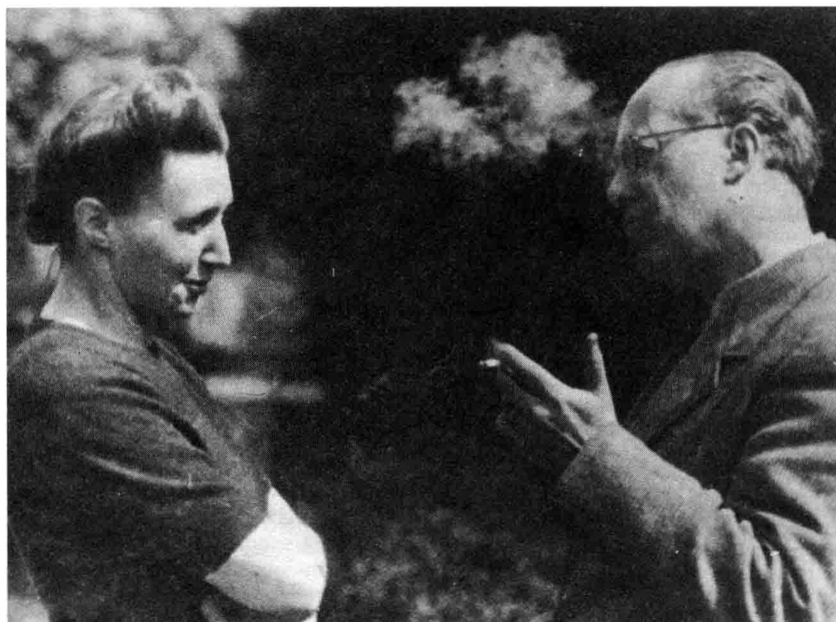
MATTHIAS BRZOSKA

Gerhard, Livia. *See* FREGE, LIVIA.

Gerhard, Roberto [Gerhard Ottenwaelder, Robert] (*b* Valls, 25 Sept 1896; *d* Cambridge, 5 Jan 1970). Catalan composer, active in England. The most significant figure of the generation after Falla, he continued and extended the folkloric vein of his predecessors, while also internationalizing it through his firm commitment to an altogether more broadly based European modernism, and through his relocation to Britain after the civil war. Establishing a wider reputation only in the 1950s, he displayed an increasingly radical and exploratory outlook and until his death contributed energetically to the development of serial and electronic composition, and to timbral and textural innovation.

1. Beginnings. 2. Catalonia and the Spanish Civil War. 3. Exile. 4. Final years.

1. BEGINNINGS. Gerhard's family origins (German-Swiss father, Alsatian mother) produced a polyglot European conversant in several cultural traditions; nevertheless he identified strongly with the region of his birth, considering himself a Catalan. In Catalan as in German his given name was Robert; he assumed the Castilian form 'Roberto' in exile, after the defeat of the republic and Franco's suppression of Catalan autonomy, language and culture. The Spanish Civil War marked the great fissure in Gerhard's life, around which so much of his music resonates with irony, longing and defiance.



Though Gerhard displayed an early aptitude for music his father, a wine exporter, discouraged aspirations in that direction and sent him in 1908 to study commerce at Lausanne, where he contrived to take lessons in harmony and counterpoint with Hugo Strauss. He next enrolled at the Musikhochschule in Munich, but after four months his studies were terminated by the outbreak of world war. Gerhard returned to Catalonia and began to take piano lessons in Barcelona from Granados; after the latter's death in the mid-Atlantic in 1916 lessons continued with Granados's disciple Frank Marshall.

He also became the last composition pupil of Pedrell – mentor to Albeniz, Granados and Falla, and advocate of a Spanish national style which would apply the methods of central European symphonism to a creative blend of the many regional idioms of Iberian folk music. Under Pedrell's patronage Gerhard achieved public performances of his early works and came to assist the distinguished Catalan folklorist Joan Amadés in notating and editing folksongs collected with a phonograph, in the manner of Bartók. He became part of the still vibrant intellectual circle of Catalan *modernisme*, and absorbed Parnassian, symbolist and surrealist influences through associating with the poets Josep Carner (whose *noucentisme* movement was dedicated to combining the arts and sciences), Josep Vincent Foix and J.M. Lopez-Picó. His musical companions included Mompou, Frederic Longas and Adolfo Salazar; he began a lasting friendship with the soprano Concépcio Badia, who was to champion his vocal works.

Nevertheless Gerhard's 'Catalanism' (*Catalanitat*) was always tempered by an international perspective. He concentrated at first on chamber, piano and vocal music. Among the earliest scores the surviving Piano Trio shows a remarkably assured and sophisticated assimilation of French instrumental technique (Ravel's Trio of 1914 seems a specific model) combined with allusion to Spanish folkloric idioms, rather in the Franco-Andalusian manner so successfully developed by Falla. But the intense, if not overheated, chromaticism of the song cycle *L'infantament meravellós de Schahrazada* had few precursors in Spanish music (apart from Pedrell's Wagnerian enthusiasms) and suggests an engagement with contemporary German and Russian trends that required careful development.

Ceasing his apprenticeship with Pedrell in 1920, Gerhard sought to broaden his artistic horizons, visiting Paris (where he considered studying with Koechlin), Berlin and London. After Pedrell's death in 1922 he besought Falla for further tuition, but was rebuffed. His two most recent works – the aphoristic *Dos Apunts* for piano and the *Sept Haïki* for voice and ensemble, which attests knowledge of *Pierrot Lunaire* – signalled a radical reorientation of creative outlook. Their sparse textures and disciplined, almost 'proto-serial' handling of chromatic cells pointed in a direction where the Spanish nationalist tradition offered no guidance. In October 1923 Gerhard wrote to Schoenberg, sending these scores. After an interview he was accepted as a student and remained with Schoenberg as pupil and assistant until 1928, first in Vienna – where Gerhard met his future wife, Leopoldina ('Poldi') Feichtegger, and was befriended by Berg and Webern – and from 1925 in Berlin, where Schoenberg took over Busoni's masterclass at the Preussische Akademie der Künste.

The numerous chamber and vocal works written during these years of strict tutelage have remained virtually unknown, for the only scores Gerhard released for performance were the last two, a Concertino for strings and the Wind Quintet. They show a thorough assimilation of cardinal Schoenbergian precepts: clarity and concision of form, intricate contrapuntal working, textural variety and a unified harmonic idiom. The Quintet, especially, is clearly composed in the context of Schoenberg's own contemporary chamber music, with its neo-classical formal preoccupations and exploration of the potential of the serial method. Gerhard deftly articulates total chromaticism through serial principles – though he bases the work on a row of only seven notes, deployed with increasing freedom and admitting more quasi-diatonic

Roberto Gerhard and his wife Leopoldina

reference than Schoenberg would have allowed himself at this period.

Among such references, significantly, are stylized evocations of Spanish folktunes: even after his Second Viennese 'finishing school', Gerhard had no intention at this stage of putting an unbridgeable gulf between himself and his musical roots. Shortly afterwards he celebrated the end of his Schoenbergian studies, and his return to Barcelona, with works of an almost defiantly nationalistic character: the *14 cançons populars catalanes* and two *sardanas* (in the measure of the Catalan national street dance) scored for the traditional ensemble of folk wind instruments, the *cobla*.

2. CATALONIA AND THE SPANISH CIVIL WAR. Simultaneously a member of the predominantly conservative Associació Compositors Independents de Catalunya (CIC) and a founder – with Miró, Josep Lluis Sert and Dali – of the radical Agrupación d'Amics de l'Art Nou (ADLAN), Gerhard closely identified with the Catalan artistic heritage and his compatriots' cultural aspirations, yet became a propagandist for the best in contemporary European music, both as a writer and as an initiator and conductor of new music concerts in Barcelona. In 1930, the year he married Poldi Feichtegger, he presented an all-Gerhard concert which provoked the now elderly but widely respected Luis Millet, conductor of the Orfeó Català and leading representative of an older generation of folklorists, to severe criticism in the pages of *Revista musical catalana*. Gerhard's retorts to Millet inaugurated a regular column in the weekly arts journal *Mirador*, through which he campaigned tirelessly on a wide range of topics. A perennial theme, naturally, was the need for a wider reception and understanding of Schoenberg, for whose first visit to Barcelona – to conduct *Pierrot Lunaire* in 1925 – Gerhard had been partly responsible. In 1931–2 Schoenberg and his wife spent eight months in the city as guests of the Gerhards: it was during this time that the bulk of *Moses und Aron* was composed, and Gerhard, in association with Casals, arranged for Schoenberg (and later Webern) to conduct concerts with Casals's orchestra. But loyalty to Schoenberg did not blind Gerhard, – as it did some of his fellow pupils – to the importance of Bartók and Stravinsky. His journalism attests a deep admiration for both composers, and the conviction that their handling of the motivic cells of folkloric material was a discipline Spanish composers must acquire.

In 1931 Gerhard became professor of music at the Escola Normal de la Generalitat in Barcelona. When it was merged the next year with the Biblioteca de Catalunya, he headed the music department until 1938, producing editions of 18th-century Catalan composers. With the establishment of an autonomous Catalan Government in 1932, Gerhard also became a member of the advisory council to the Ministry of Fine Arts. Working as a translator, he made available Catalan versions of several (mainly German) theoretical texts. The climax of his internationalist advocacy, however, was the 16th ISCM festival, held in Barcelona in 1936. Gerhard had belonged to the ISCM since its 1932 Vienna Festival, where Concépcio Badia, conducted by Webern, had introduced some of the *Cançons populars catalanes*. He was the principal organizer and moving force behind the Barcelona ISCM festival, in which Berg's Violin Concerto received its world première, as did, in the same concert, Gerhard's ballet *Ariel*.

A short cantata and two ballets (both originally conceived as collaborations with Massine and Miró for Colonel de Basil's Ballets Russes de Monte-Carlo) constitute Gerhard's chief works of the 1930s. All three examine issues of Catalan identity, though from different perspectives. The cantata *L'alta naixença del rei en Jaume*, drawn from a poetic novel of Carner, veils a slightly indelicate national myth in mock-religious form. It deploys the free-tonal harmony of the folksong arrangements in much more complex and sophisticated structures, but despite the 11-note kernel of a 15-note passacaglia ground, concerns itself little with serial procedures or the total chromatic. *Ariel*, a surrealist reinterpretation (scenario by J.V. Foix) of Shakespeare's *The Tempest* in the imagery of the 'Patum de Berga' and other Catalan folk festivals,

was in fact rejected by Massine as 'too symphonic', and remains unstaged. Perhaps uneasily, certainly uncharacteristically, it blends generalized 'Spanish-style' gestures and neo-classical rhythms with a broodingly intense Bergian chromaticism.

Shortly after the concert première of *Ariel* in 1936 Gerhard obtained a commission from de Basil's company for a full-scale ballet based directly on the traditional Catalan dances and festival folklore – with fire, fireworks and masks – surrounding the summer solstice. The scenario was by Gerhard's friend Ventura Gassol, arts minister in the Catalan government. Less than a month later the nationalist insurrection touched off the Spanish Civil War; Catalonia was a principal centre of Republican resistance, and Barcelona, where Gerhard remained throughout, saw street battles and bombings. Though elevated in 1937 to the Central Music Council of the Republican government, he steered clear of direct political involvement; his brother Carles, however, a member of the Catalan parliament, had care of the defence of the great monastery of Monserrat, where Manuel Azaña, president of the Spanish republic, took up residence for the war's duration. Gerhard's creative energies were channelled into the new Catalan ballet; in it he put his Stravinskian-Bartókian precepts into practice by combining the folksongs, patriotic songs and ritual dances of his native region into a monument of the Catalan culture menaced by Franco's forces.

In January 1939 he flew to Perpignan en route to an ISCM meeting in Warsaw; within days Barcelona fell to the nationalist offensive of General Yagüe. Compelled to remain in France, Gerhard continued work on the ballet score, now entitled *Soirées de Barcelone*, but it was definitively abandoned some months later, largely orchestrated but with its final sections only partly scored and in variant drafts. Whether penned in the closing months of the civil war, or from beyond the Spanish border, the 'Dawn' music of the ballet's last tableau, with its heroic-elegiac brass statement of 'Els segadors' ('The Reapers') – Catalonia's national hymn and a communist marching song in the civil war – is clearly a tragic meditation on the region's fate.

3. Exile. In France the Gerhards, with Miró and Sert, resorted to Paris and an artists' colony in Meudon. However, in June Gerhard accepted a one-year fellowship at King's College, Cambridge, arranged by E.J. Dent and J.B. Trend. In Cambridge he was to remain, supporting himself precariously after 1940 as a freelance composer. In England his Catalan and Schoenbergian roots meant equally little, and no audience existed for his principal works. Ironically, his 'Spanish' identity was his most useful passport to remunerative work. He wrote and presented Spanish-language features for the BBC's overseas service, and developed a fruitful association with the BBC Concert Orchestra through copious arrangements of, and fantasias on, Spanish light music and zarzuela melodies, under the pseudonym of 'Juan Serralonga' (who was a 17th-century Catalan fighter against Castilian oppression).

Gerhard (who only assumed British citizenship in 1960) must initially have hoped for the fall of Franco and the restoration of Spanish liberty as the likely outcome of a world war against fascism. From 1940 on he composed much more copiously; the major works of the decade maintain and extend his involvement with Spanish culture even as, by a subtle osmosis, they become ever more deeply infused with a developing view of post-Schoenbergian serial practice. In 1941, Pedrell's centenary year, he produced two commemorations of his former master. Like the orchestral homage which Falla, unknown to Gerhard, was writing in Argentina, the Symphony ('Homenaje a Pedrell') is based on themes from Pedrell's unperformed opera *La celestina*. Only the symphony's finale ('Pedrelliana') was heard in Gerhard's lifetime, but *Cançionero de Pedrell*, songs from different regions of Spain arranged from Pedrell's monumental collection, has become one of his best-known works.

More important was the substantial *Don Quixote* ballet, composed for chamber orchestra to Gerhard's own scenario in 1940–41. Further developed through his score for an extended BBC radio dramatization of Cervantes's novel, the music was reshaped in a 'symphonic suite' before being re-cast, in a new and shorter form, for the Sadler's Wells production which finally took place in 1951 with choreography by Ninette de Valois and décor by Edward Burra. This personal interpretation of the emblematic figure of Spanish literature as 'the knight of the hidden images', the major project of the war years, remains a central achievement. Meanwhile two further ballets had been composed and staged – *Alegrías*, a 'divertissement flamenco' in Andalusian style for the Ballet Rambert, and *Pandora*, an anti-fascist fable for the Ballets Joos, saturated with Catalan musical symbolism.

In *Don Quixote* and the bravura Violin Concerto he composed for the Catalan virtuoso Antonio Brosa (the slow movement, a tribute to Schoenberg on his 70th birthday, includes chorale-like writing on the 12-note row of Schoenberg's Fourth Quartet), Gerhard perfected, as far as was possible in a tonal context, a freely serial handling of Hispanic and diatonic materials. His last major work of the decade, the comic opera *The Duenna* after Sheridan's comedy of money and marriage in old Seville, expands this to recreate elements of the zarzuela and the Spanish Baroque *tonadilla escenica* along with a near-perfect mating of Spanish musical idioms to English speech-rhythms. The result, the summatory masterwork of his first 50 years, remained unstaged in Gerhard's lifetime, though a BBC studio broadcast (1949) led to a concert performance at the 1951 ISCM festival in Wiesbaden – where its idiom was criticized, doubtless predictably, as passé.

In fact Gerhard had already moved into closer engagement with traditional serial technique in the flute Capriccio, the piano Impromptus and above all the Piano Concerto, whose movement titles refer to Renaissance Spanish keyboard music and whose searing slow movement, 'Differéncias', based even yet on a Catalan folk melody, is his darkest elegy for Spain. Having at last embraced strict 12-note writing he began at once to transcend it.

'A composer', Gerhard once wrote, 'needs grace (inspiration), guts, intellect, madness; and systems are a *sine qua non*, because the intellect can only work, only take grip, when confronted by a system'. His lifelong fascination with (and distrust of) systems co-existed with an unusually acute awareness of music as an art of sound, not paper, and a fascination with sound as such. In the music of his last 20 years he sought to extend and develop serialism in new directions – not, though he closely studied the work of his younger contemporaries, those of

Darmstadt – while treating it where necessary with quixotic freedom (the epithet is his). Part of the quixotry, and certainly an intuitive counterbalance to serialism's intellectual structures, was his delight in producing vibrant, almost tactile sonic structures with both conventional and unconventional means. This quest for new sounds and tone-colours made him the first important composer in Britain to embrace electronic techniques, still in their infancy. Working largely with reel tape recorders in a tiny home studio, Gerhard collected raw sounds of all kinds for electronic manipulation, evolving his own brand of *musique concrète*, which he termed 'sound composition'.

Even in Spain his works were rarely played or published before 1939; after that date they were proscribed there, and hardly better accommodated in Britain until the late 1950s. From 1949 (when he began an enduring collaboration with the Shakespeare Memorial Theatre, Stratford-upon-Avon) right up to his death, Gerhard earned his living principally through incidental scores for radio, stage and screen – some of them the test-bed for radical sonic innovations. His music for Bridget Boland's *The Prisoner* was probably the first in Britain involving tape, and Gerhard's electronic music was one notorious aspect of Peter Brook's controversial 1955 Stratford production of *King Lear*.

4. Final years. With the première that year of the Symphony no.1 in Baden-Baden, and a 60th birthday issue of *The Score* devoted to Gerhard in 1956, his major works came to command wider attention. They were more frequently programmed by the BBC, where his friend William Glock became Controller of Music. Gerhard appeared as a teacher, lecturer and broadcaster: his deep humanity and extremely wide general culture, added to his creative interest in the other arts, in science, mathematics, and philosophy, infused an elegant prose style. At Glock's request he taught at several Dartington Summer Schools; in 1960 he was visiting professor of composition at the University of Michigan and in 1961 he taught at the Berkshire Music Center, Tanglewood. The BBC commissioned the Symphony no.2, the cantata *The Plague* after Camus (with whom Gerhard collaborated on an unrealized operatic treatment of *L'étranger*), and the Concerto for Orchestra: the latter, specifically for the BBC SO's American tour, was premièred in Boston. Further commissions came from the Koussevitzky Foundation (Symphony no.3), the New York PO (no.4), the London Sinfonietta (*Libra*) and the Fromm Foundation (Symphony no.5, never completed).

This international recognition coincided with a highly productive and boldly exploratory 'late style'. By the time he wrote the First Symphony, while recuperating from the first onslaught of the heart condition that eventually killed him, he had already seized on what he considered the central paradox of 12-note technique. Schoenberg had sought to make the principle of thematicism all-pervasive; in his 1956 article 'Developments in 12-Tone Technique' Gerhard responded that 'where literally *everything* is thematic, *nothing* is'. The series, he reasoned, should rather 'be understood as a "code", i.e. stripped of any concrete motivic-thematic obligations' (p.68). In the First Symphony's 'athematic' sound-world, texture and recurrent interval groups constitute powerful unifying factors, even though (as in the First Quartet and the Harpsichord Concerto) analogies with traditional forms lurk beneath the surface. Maintaining that 'twelve-tone technique is in fact a new formulation of the principle of tonality', Gerhard developed aspects of Schoenberg's own practice (e.g. in *Von Heute auf Morgen*), tending to divide 12-note series into two hexachords (occasionally three tetrachords) within which the notes could be reordered to form what, when reads upward amounted to scale-like figurations that retained their shapes through all other transpositions and permutations. But the cardinal unifying force was Gerhard's vital and energetic rhythmic sense, linked to his fascination with pulsation and resonance, which carried over from his folkloristic works into the radical utterances of his last decade.

He was always acutely aware of music as drama: a phenomenon 'bound to the *peripetie* of a given temporal cycle or life-span' with 'a beginning, a period of growth and an end', like 'the life-cycle of a blade of grass, the course of an avalanche, the impact of a drop of rain on a sheet of water'. The drama, he would add, was of course in the mind of the beholder; but clearly for Gerhard 'sound' and 'time' constituted the double essence of musical experience. From the early 1950s his aim was to discover forms that articulated the temporal dimension of structure. He began to combine the interaction of the 12-note pitch series, governing intervallic relations, with a 12-step time series determining durations and proportions – from note values and metronome markings, through rhythm, metre and phrasing, to the length of paragraphs, of movements and ultimately of the entire piece. The first work wholly articulated by such a time series was the Symphony no.2, achieved with difficulty; those that followed were polymorphic single-movement structures, no two alike but each fluidly expressive of its very essence in purely musical terms, i.e. as sound. Increasingly unwilling to discuss his methods and intentions in articles or programme notes, Gerhard evolved a credo encapsulated in his remark 'I stand by the *sound* of my music. It is the sound that must make the sense'.

In their violent gestures and vibrant colours, their intricate, virtuoso percussion writing, their alternations of fleet, furious activity with mysterious, almost visionary stasis (which he likened to 'action in very slow motion . . . the magic sense of *uneventfulness*'), the works of Gerhard's final decade justify that stance and reveal a kinship with the music of Varèse, whom he had known in Catalonia in 1933. Like that other lonely pioneer in tape composition, Gerhard found the experience of electronic music enlarged and enriched his approach to conventional instruments. Though he continued to create short tape compositions into the early 1960s, his most significant electronic works came in 1959–60, with the García Lorca setting *Lament on the Death of a Bullfighter* for recitation and taped sound, partly created with the resources of the recently-established BBC Radiophonic Workshop, and in the Symphony no.3 ('Collages') for orchestra and tape. The latter, which reflects the experience of transatlantic flight, may be regarded as the spiritual successor to Varèse's *Déserts*, but whereas Varèse's taped and instrumental sounds are discretely juxtaposed, Gerhard's are polyphonically combined.

Subsequent major works dispensed with any electronic component, yet many of their unusual sonorities – timpani glissandos, cymbal harmonics obtained with a well-resined cello bow, piano clusters, clustered string harmonics and percussive attacks on the body of the instrument,

the shrill exhalations of an accordion – surely evoke sine tones, white noise and other electronic phenomena. Some scores include a carefully calculated aleatory element, such as the improvised percussion-ensemble breaks of *Epithalamion* or the graphically represented string glissandos of the late 'astrological' works.

Even these innovative and forward-looking scores do not deny their composer's national roots. Spanish idioms and points of reference recur with almost surreal effect: a folktune in the Nonet, flamenco allusions and *rasgueado* guitar strummings in *Concert for 8*, Fallaesque fanfare in the Symphony no.4 and, in the coda of that work, a long and deeply nostalgic oboe duet alluding to the Catalan song of a condemned man, *El Cotiló*, which had haunted several of Gerhard's tonal scores as a tragic leitmotif. However, the pentatonic clarinet tune which casts its spell over the ostinato-coda of *Libra* – a coda reprised and enriched at the end of *Leo*, Gerhard's last completed work – seems to symbolize a universal folklore, the essential contact with the earth and land that nourishes the creative imagination.

Gerhard was made a CBE in 1967, and the following year was awarded an honorary DMus by King's College, Cambridge, and a fellowship at University College, London. After 1965, his health was precarious, though he continued to work until the end. He died at his Cambridge home at the age of 73. Not until the end of the century did Gerhard's achievement become more widely understood. Recognition as probably the most important Spanish composer after Falla (and, as a leading Catalan musician wrote in his centenary year, 'Catalonia's most important composer in four centuries') had perforce to await the restoration of democracy in Spain and the reassertion of Catalan regional identity. With the triumphant 1992 stage premières of *The Duenna* at the Teatro Lirico Nacional in Madrid and the Gran Teatre del Liceu in Barcelona, given by the British company Opera North under a Spanish conductor, Antoni Ros Marbà, the two halves of Gerhard's career began to be understood as a creative unity and his long spiritual and cultural exile came to an end.

WORKS

STAGE

Ariel (ballet, Gerhard and J.V. Foix, designed J. Miró), 1934, unperf.; concert perf., cond. Scherchen, Barcelona, ISCM Festival, 19 April 1936

Soirées de Barcelone (ballet, 3 tableaux, V. Gassol), 1936–9, unperf., inc.; perf. edn orchd M. MacDonald, 1995–6

Don Quixote (ballet, 1, Gerhard, after M. Cervantes), 1940–41, unperf.; 2nd version (choreog. Valois, designed E. Burra), 1947–9, cond. R. Irving, London, CG, 20 Feb 1950

Alegrías (ballet, Gerhard, choreog. E. Brunelleschi), 1942, Birmingham, Theatre Royal, 16 July 1943

Pandora (ballet, 1, scenario and choreog. K. Jooss, designed H. Heckroth), 2 pf, perc, 1943–4, Cambridge, Arts, 24 Jan 1944; version with orch, 1944–5, London, 1945

The Duenna (op, Gerhard and C. Hassall, after R. Sheridan), 1945–7, concert perf., London, Camden, 23 Feb 1949; rev. 1950s, inc., perf. edn D. Drew, incorporating arrs. by D. Smirnov, 1991, staged Madrid, Lirico Nacional, 21 Jan 1992

ORCHESTRAL

Concertino, str, 1927–8 [version of Str Qt, ?1927–8]; Albada, interludi i dansa, 1936; Vn Conc., 1940, inc., destroyed; Sym. 'Homenaje a Pedrell', 1940–41, [3rd movt performable separately as 'Pedrelliana (En memoria)']; Don Quixote, suite no.1, small orch, 1941 [based on ballet]; Soirées de Barcelone, suite, 1940s, inc. [based on ballet]; Alegrías, suite, 1942 [based on ballet]; Vn Conc., 1942–3; Pandora, suite, 1944–5 [based on ballet]; Don Quixote, sym. suite, 1947 [based on ballet]; Pf Conc., 1951; Sym. no.1, 1952–3; Hpd Conc., 1955–6; Lamparilla Ov. 1956 [based on themes by F. Barbieri]; Sym. no.2, 1957–9; reworked as Metamorphoses, 1967–8, last movt inc., perf. edn arr. A. Boustead, 1973; Dances from Don Quixote, 1958 [from ballet]; Sym. no.3 'Collages', orch, tape, 1960; Conc. for Orch, 1964–5; Epithalamion, 1965–6, rev. 1968; Sym. no.4 'New York', 1967, rev. 1968; Sym. no.5, 1968–9, inc., unperf.

VOCAL

L'infantament meravellós de Schahrazada (song cycle, J.M. López-Picó), S/T, pf, 1916–17; Verger de les galanies (2 songs, J. Carner), S, pf, 1917–18, unpubd; Lied (Ger., anon.), 1v, pf, ?1918, unpubd; 3 cançons (Catalan, anon.), 1v, pf, ?1918, unpubd; Cante jondo (4 songs, Andalusian folk texts), 1v, pf, ?1918; 7 (J. Junoy), S/T, fl, ob, cl, bn, pf, 1923, rev. 1958; 14 cançons populars catalanes, S/T, pf, 1928, 6 orchd 1931 as 6 cançons populars catalanes Haïki; L'alta naixença del rei en Jaume (cant., Carner), S, Bar, chorus, orch, 1932, rev. 1933; Lassa, mesquina, que faré puix mon amant se'n vol partir (P. Serafi), 1v, pf, *c*1932, unpubd; El ventall (V. Gassol), S, pf, 1930s, unpubd; Madrigal a Sitges (Carner), S, pf, 1930s, unpubd; Cançons i arietes, S, pf, 1936, lost; Cançionero de Pedrell (after folksongs coll. Pedrell), S/T, pf, 1941, arr. S/T, 13 insts, 1941; La fulla i el nuvol, 1v, pf, ?1942; Sevillanas, S/T, pf, 1943; The Akond of Swat (E. Lear), Mez/Bar, 2 perc, 1954; Cantares (Sp. folk texts), 7 songs, S/T, gui, 1956; Interlude and Arias from The Duenna, Mez, orch, 1961 [based on op]; The Plague (cant., Gerhard, after A. Camus), spkr, chorus, orch, 1963–4

CHAMBER AND SOLO INSTRUMENTAL

Sonatine a Carlos, pf, 1914, unpubd; Pf Trio no.1, 1918 or before, lost; Str Qt, 1918, lost; Pf Trio no.2, 1918; 2 apunts, pf, 1921–2; 3 Pf Trios, *c*1923–4, unpubd, one inc.; Divertimento, wind qnt, 1926, 2 versions, unpubd, inc.; Suite, wind, str, pf, 1927, unpubd, lost; El conde sol, tpt, hn, bn, vn, vc, pf, ?1927, unpubd [possibly part of Suite, 1927]; Str Qt, ?1927–8, inc.; Sonata, cl, pf, 1928, unpubd, inc.; Wind Qnt, 1928 [with opt. t sax part, inc.]; Andantino, cl, vn, pf, ?1928, unpubd; Sardana no.1, cobla (12 insts), 1928–9, arr. brass band, 1940, arr. 11 wind, perc, 1956; Sardana no.2, cobla, insts, 1928–9; Sevillana, fiscorn, bn, str trio, ?1936, unpubd; Alegrías, suite, 2 pf, 1942 [from ballet]; Pandora, suite, 2 pf, perc, 1944 [from ballet]; Dances from Don Quixote, pf, 1947 [from ballet]; Sonata, va, pf, 1948, withdrawn, reworked for vc, pf, 1956; Capriccio, fl, 1949; 3 Impromptus, pf, 1950; Str Qt no.1, 1950–55; Sardana no.3, 8 wind, perc, 1951, unpubd [from film score Secret People, 1952]; Sonata, vc, pf, 1956; Nonet, wind qnt, tpt, trbn, tuba, accdn, 1956–7; Fantasia, gui, 1957; Chaconne, vn, 1959; Soirées de Barcelone, suite, pf, 1950s [based on ballet]; Str Qt no.2, 1961–2; Concert for 8, fl, cl, mand, gui, accdn, perc, pf, db, 1962; Hymnody, fl, ob, cl, hn, tpt, trbn, tuba, 2 perc, 2 pf, 1963; Gemini (Duo concertante), vn, pf, 1966; Libra, fl + pic, cl, gui, perc, pf, vn, 1968; Leo, fl + pic, cl, hn, tpt, trbn, 2 perc, pf + cel, vn, vc, 1969

TAPE

Audiomobiles I, II 'DNA', III, IV, *c*1958–9 [II is version of film score DNA in Reflection]; Lament on the Death of a Bullfighter (F. García Lorca), spkr, tape, 1959; 10 Pieces, *c*1961 [extracts from Audiomobile II]: Asyndeton, Bubblecade, Campanalog, Dripsonic, Meteoroids, Speculum, Stridor, Suspension, Telergic, Uncle Ned; Caligula, 1961 [version of radio score]; Sculptures I–V, 1963 [II–V assembled 1963 but probably never edited]

INCIDENTAL MUSIC

Films: Secret People (dir. T. Dickinson), 1952; War in the Air, 5 films for BBC TV, 1952; All Abroad, 1958; Your Skin, 1958; DNA in Reflection, 1963 [version for concert perf. Audiomobile II, tape, *c*1961]; This Sporting Life (dir. L. Anderson), 1963

Theatre (by W. Shakespeare unless otherwise stated): Romeo and Juliet, Stratford, *c*1949; Cymbeline, Stratford, 1949; The Taming of the Shrew, Stratford, 1954; A Midsummer Night's Dream, Stratford, 1954; The Prisoner (B. Boland), London, Globe, 1954; King Lear, Stratford, 1955; Pericles, Prince of Tyre, Stratford, 1958; Coriolanus, Stratford, 1959; The Cherry Orchard (A. Chekov), Stratford, 1961; Macbeth, Stratford, 1962

Radio: The Adventures of Don Quixote (E. Linklater), 1940–41; Cristobal Colón (S. de Madariaga), 1943; Conquistador (A. McLeish), 1953; L'étranger (A. Camus), 1954; A Leak in the Universe (I.A. Richards), 1955; Good Morning Midnight (J. Rhys), 1956; Maria Stuart (F. von Schiller), 1956; The Revenge for

Love (W. Lewis), 1957; The Unexpected Country (Wymark), 1957; Asylum Diary (C. Lavant), 1959; Don Carlos (Schiller), 1959; Caligula (Camus), 1961; The Overcoat (N.V. Gogol), 1961; Woyzeck (G. Büchner), 1961; The Tower (H. von Hofmannsthal), 1962; The World's Great Stage (P. Calderón), 1962; The Philosopher's Den (Z. Herbert), 1963; The Anger of Achilles (R. Graves), 1964; Funnyhouse of a Negro (A. Kennedy), 1964; For whom the Bell Tolls (E. Hemingway), 1965; The Man Born to be King (D.L. Sayers), 1966; Background Patterns I and II, lost

TV: You Know what People are (J.B. Priestley), 1955; The Count of Monte Cristo (A. Dumas), 1964; Macbeth (Shakespeare) 1964

EDITIONS

D. Terradellas: Merope (Barcelona, 1935–6)
A. Soler: Six Quintets, org, str (Barcelona, 1938)
J. Plá: Sonata no.3, 2 ob, vns/fls, continuo, 1930s (Barcelona, 1986)
Numerous unpubd edns (1930s – early 1950s, some lost) Spanish madrigals and theatre music from the 16th – 18th centuries

ARRANGEMENTS

L. de Milán, D. Pisador, E. de Valderrábans, J. Vasquez: 7 Canciones de Vihuela, S/T, pf, 1942
Esteve, Laserna and others: 6 tonadillas, 1v, pf, 1942
Por do pasaré la sierra (folksong), S/T, pf, 1942
F. Schubert: Rondo from Sonata, D.850; Marche militaire, D.733, no.1; Marche characteristique, D.886, no.1, small orch, *c*1943, unpubd [arr. for radio score Cristobal Colón, 1943]
6 chansons populaires françaises, S/T, pf, 1944
Anon.: Jacara a solo, 1v, mixed chorus, pf, 1940s
Boleras, S, orch, 1940s, lost
El trebole, S, chorus, orch, 1940s, lost
F. Barbieri: El barberillo de Lavapiés, orch, 1954 [Lamparilla (operetta, P. Knepler and F. Tisch, after L.M. de Larra], 1955–6 [based on arr. of El barberillo de Lavapiés with additional arrs. of music by Barbieri and ov. by Gerhard]
6 French Folksongs, S/T, pf, 1956
Several other titles, lost

PSEUDONYMOUS WORKS
written under the name of Juan Serrallonga

Engheno novo, S/Mez/T/Bar, orch, *c*1943
Gigantes y cabezudos, orch, *c*1943 [free fantasia after Caballero]
3 canciones toreras, Mez/Bar, pf/orch, *c*1943
La viejecita, orch, *c*1943 [free adaptation after Caballero]
Cadíz, orch, 1943 [free fantasia after F. Chucca and J.F. Valverde]
Arr. F. Barbieri: Segiduillas and Tirana from El barberillo de Lavapies, orch, 1943
Arr. R. Milán: Cancion y Fado from El Pajaro Azul, orch, *c*1943
MSS in *GB-Cu*, *GB-Cfm* (Vn Conc.), *GB-Lbl* (Conc. for Orch), *US-Wc* (Sym. no.3), Institute for Valls Studies, Valls

Principal publishers: Belwin-Mills, OUP, Prowse

MALCOLM MACDONALD

Gerhardt, Elena (*b* Leipzig, 11 Nov 1883; *d* London, 11 Jan 1961). German soprano and mezzo-soprano, active in England. She studied at the Leipzig Conservatory (1900–04), whose director, Nikisch, having heard her sing as a student, took the unprecedented step of accompanying her himself at her first public recital on her 20th birthday. At that time she made several pioneering records of lieder with Nikisch, with whom she was romatically involved. After a few stage appearances at the Leipzig Opera in 1905–6 (as Mignon and Charlotte), she devoted herself wholly to concert work, and soon became a notable interpreter of German song. She sang for the first time in England in 1906, and in the USA in 1912. After World War I she soon resumed her international career, but continued to live in Leipzig. In 1932 she married Fritz Kohl, the director of the Leipzig radio, who was arrested in the following year under the Nazi regime. Although he was eventually acquitted, he and his wife left Germany in 1934 and settled in England, where Gerhardt had always been very popular. Her fame increased during World War II when she took part in several of the National Gallery Concerts organized by Myra Hess. She continued to sing for some years after the war, both in public and for the BBC, but devoted herself increasingly to teaching.

Gerhardt's voice deepened to mezzo-soprano during her maturity, and became an ideal instrument for the lieder repertory, enabling her to sing many nominally masculine songs without any sense of strain or incongruity. For instance, her numerous performances of *Winterreise* had a memorably exalted and tragic character. Her recitals and records contributed notably to the then growing fame of Hugo Wolf. In her best vocal period, the sensuous beauty of her floating tones in Brahms's *Feldeinsamkeit* or in the *da lontano* final verse of Schubert's *Der Lindenbaum* could hold an audience enthralled. In later years minor technical faults intruded, but seemed unimportant beside her penetrating interpretations, her mastery of light and shade, her humour, rhythmic energy and wide variety of tone-colour. Although her style was very much of its period (especially in her liberal use of portamento), she made every song she sang a part of her own warm and rich personality.

DESMOND SHAWE-TAYLOR/ALAN BLYTH

Gerhardt, Paul [Paulus] (*b* Gräfenhainichen, nr Wittenberg, 12 March 1607; *d* Lübben, Lower Lusatia, 27 May 1676). German poet. He attended the Fürstenschule at Grimma, a school of Orthodox Lutheran direction, from 1622 to 1627, then studied theology at the Lutheran Orthodox University of Wittenberg from 1628 to 1634. He went to Berlin as a private tutor in 1643. His first 15 chorales appeared in the second edition of Johannes Crüger's *Praxis pietatis melica* (1647); the fifth edition (1653) contains 81 of his hymns. He assumed his first ministry as late as 1651. In 1657 he became deacon at the church of St Nicolai, Berlin; Crüger was the Kantor there until 1662, followed by J.G. Ebeling. Both musicians were responsible not only for setting Gerhardt's texts but also for their publication: Ebeling in fact published a complete edition (1666–7). Because of his Orthodox convictions Gerhardt refused to sign a declaration of tolerance towards the Calvinists imposed by his Calvinist sovereign Friedrich Wilhelm, the Great Elector. He was dismissed from his post in 1666 and did not find a new position until 1669, when he was appointed minister at Lübben, where he remained until his death.

Gerhardt, like many of his contemporaries, regarded hymn writing as part of a larger spiritual restoration in the wake of the Thirty Years War. Although his verses reverberate with the horrors of war, pestilence and personal tragedy, Gerhardt summons the listener to contemplate God's might, to experience it as a living force and to deliver himself into his care. This meditative trait and the emphasis on personal commitment and experience point to one of Gerhardt's sources, the personal, subjective devotional books of the early 17th century, in particular Johann Arndt's *Paradiesgärtlein* (1612). Gerhardt's other sources include the Bible (particularly the Psalms) and some literary models, such as the seven *Salve* hymns ascribed to St Bernard but more likely by Arnulph of Leuven; the seventh of these, *Salve caput cruentatum*, became the famous *O Haupt voll Blut und Wunden*, immortalized by Bach in the *St Matthew Passion*. However, almost half of Gerhardt's hymns are original. They fuse formal elements of folksong and sermon into

chorales that have the directness and intimacy of prayer (and are in fact often used as spoken prayers).

Gerhardt's entire output consists of 134 hymns, only seven of them in new strophe forms demanding newly composed melodies. But the relatively fixed canon of hymns used in the service did not easily incorporate new ones, and his hymns were used – and probably intended – mainly for private devotional practice. Only with the rise of Pietism in the last quarter of the 17th century did they become part of the regular church service. The pietistic *Geistreiches Gesangbuch*, edited by J.A. Freylinghausen, contained 52 hymns by Gerhardt in its first edition of 1704, increased to 82 in the complete edition of 1741. In the 19th and 20th centuries his hymns attained a prominent place in the Protestant service, equalled only by Luther's.

Crüger must be regarded as Gerhardt's most congenial and popular composer, but many others – Ebeling, Nikolaus Hasse, Hintze, Graupner, J.F. Doles (i) and possibly Bach – were attracted to his texts: Zahn listed 14 different melodies for *Gib dich zufrieden und sei stille*. This seems to have been a favourite of Bach too, for there are three settings (of two melodies) in the *Notenbüchlein für Anna Magdalena Bach* (BWV510–12) as well as the setting in the Schemelli-Gesangbuch (BWV460) and an isolated chorale setting (BWV510). The incorporation of individual stanzas by Gerhardt into Erdmann Neumeister's cantata cycle, into Heinrich Brockes's text of the *St John Passion* (set to music by Handel, Mattheson and Telemann among others) and into Picander's text for Bach's *St Matthew Passion* brought them to the attention of ever larger audiences.

TRAUTE MAASS MARSHALL

Gericke, Wilhelm (*b* Schwanberg, Styria, 18 April 1845; *d* Vienna, 27 Oct 1925). Austrian conductor and composer. He studied at the Vienna Conservatory under F.O. Dessoff (1862–5) before conducting operas in small towns and subsequently becoming conductor of the municipal theatre in Linz. In 1874 he was appointed assistant conductor of the Vienna Hofoper, where he conducted the first performance of Goldmark's *Die Königin von Saba* (1875) and the first Vienna performance of Wagner's *Tannhäuser* (Paris version). From 1880 he conducted the concerts of the Gesellschaft der Musikfreunde (formerly conducted by Brahms, 1872–5) and also directed the Singverein. After hearing Gericke conduct *Aida* in autumn 1883 Henry Lee Higginson invited him to become conductor of the Boston SO beginning in 1884; he held this post for five years before returning to Vienna in 1889 because of poor health. He again conducted the Gesellschaft der Musikfreunde (1890–95), then moved to Dresden for a year before resuming residence in Vienna. He returned to Boston in 1898 for a second term as conductor of the Symphony Concerts, but went back to Vienna in 1906 as a freelance conductor and composer.

Gericke's compositions, which include chamber music, two piano sonatas, an operetta *Schön Hannchen* (1865), a Requiem, choruses (including *Chorus of Homage*) and songs, are largely forgotten. As a conductor in Vienna, Gericke was known for his performances of French, Italian and Wagnerian opera. But his most important contribution was as conductor of the Boston Symphony Concerts. It was Gericke who, in Higginson's words, 'made the orchestra' by enforcing strict discipline at rehearsals, discouraging the former casual attitude of players and replacing 20 members in his first season with young Europeans (including a new leader, Franz Kneisel). Through his energy and expertise he raised the performing standards; he always advocated precision and abhorred excesses. He extended the season through the establishment of the summer Popular Concerts, which provided the musicians with longer contracts. His programmes were considered heavy at first; but if in 1887 and 1888 Brahms, Bruckner and Richard Strauss were unpopular, by Gericke's second term they had become staple fare and new works were introduced, including Debussy's *L'après-midi d'un faune* in 1904, as well as compositions by American composers such as George Chadwick, Amy Beach and Arthur Foote. He also gave the American première of César Franck's Symphony. His concert tours, especially the New York début in 1887, helped to spread the orchestra's reputation. Boston's Symphony Hall was constructed during Gericke's tenure and became the orchestra's permanent home.

GAYNOR G. JONES/CHRISTOPHER FIFIELD

Gerig. German firm of music publishers. Its founder Hans Gerig (*b* Freiburg, 16 July 1910; *d* Cologne, 15 March 1978) took the doctorate in 1935 and represented the German authors' association at the Bureau International de l'Edition Mécanique in Paris, where he was also manager of Editions Continental. In 1946 he founded the Bühnen- und Musikverlag Hans Gerig in Cologne. The Gerig group gradually expanded to 36 separate publishing houses, including Sidemton, Mondial, Rialto, Excelsior and Volk, covering a wide range of music publishing activities. Increasing internationalization resulted in an

emphasis on dance and entertainment music, of which the Gerig group is one of the leading German publishers; chamber music and stage works are also published. An educational branch was started in 1955 with the publication of the Neue Reihe, a series of over 100 titles comprising works for choir and orchestra and chamber music. In 1956 *Die Garbe*, a school music publication in several volumes, was taken over from the Tonger publishing house. Tutors and orchestral studies have been published for a variety of instruments. From 1964 the side of the business dealing with serious music was reorganized and a new emphasis given to contemporary music; anthologies of contemporary piano music from various countries (including Brazil, Greece, Israel and several in eastern Europe) have been published, as well as the series Pro Musica Nova (studies for playing avant-garde music). Gerig also publishes the series Instrumentalmusik des 16.–18. Jahrhunderts (Urtext editions) and series of books on music. The Gerig group represents Eaton Music (London), B. Liechti & Cie (Geneva) and Curci (Milan).

RUDOLF LÜCK

Gerigk, Herbert (*b* Mannheim, 2 March 1905). German musicologist. He studied musicology with Müller-Blattau in Königsberg and received the doctorate in 1928 with a dissertation on the history of music in Elbing. Thereafter he served as a music adviser for the *Rheinisch-Westfälische Zeitung*, director of the regional chamber of culture in Dresden and head of an entertainment division of radio programming. In 1935 he joined Nazi ideologue, Alfred Rosenberg, serving as head of Rosenberg's music division and personnel archive and editor of *Die Musik* once it came under Rosenberg's control. Gerigk also oversaw the ideological evaluations of musicological literature, approval of engagements in Nazi 'Strength through Joy' subscription programmes, and the plundering of musical treasures in territories invaded by German troops. Under Rosenberg's sponsorship he edited a series of music biographies (Unsterbliche Tonkunst, 1936–44), a series on musicians' writings and letters (Klassiker der Tonkunst in ihren Schriften und Briefen, 1937–45), and an unfinished music encyclopaedia, and co-authored a directory of Jews in music, co-sponsored by the Nazi institute for Jewish research; he also contributed regularly on music and politics to *Die Musik*, *Nationalsozialistische Monatshefte*, and *Musik im Kriege* from 1933 to 1945. After the war, Gerigk was music reviewer for the *Ruhrnachrichten* in Dortmund.

PAMELA M. POTTER

Gerl [Görl]. Austrian family of singers and composers.

(1) Franz Xaver Gerl (*b* Andorf, Upper Austria, 30 Nov 1764; *d* Mannheim, 9 March 1827). Bass and composer. The son of a village schoolmaster and organist, Gerl by 1777 was an alto chorister at Salzburg, where he must have been a pupil of Leopold Mozart. He was at the Salzburg Gymnasium from 1778 until 1782 and he then went on to study logic and physics at the university. In the autumn of 1785 he went to Erlangen as a bass, joining the theatrical company of Ludwig Schmidt, who had been at Salzburg earlier that year. In the autumn of 1786 he joined G.F.W. Grossmann's company, performing in the Rhineland, and specialized in 'comic roles in comedies and Singspiele'. By 1787 Franz Xaver was a member of Schikaneder's company at Regensburg, making his début in Sarti's *Wenn zwei sich streiten* (*Fra i due litiganti*) and appearing as Osmin in *Die Entführung*. From the summer of 1789 Gerl was a member of Schikaneder's company at the Freihaus-Theater auf der Wieden, Vienna. On 2 September 1789 he married the soprano Barbara Reisinger (see (2) below). His name first appears as one of the composers of *Der dumme Gärtner aus dem Gebirge* (*Die zween Anton*), Schikaneder's first new production at his new theatre, on 12 July 1789; it is unlikely that this was Gerl's first theatre score, since Schikaneder would hardly have entrusted such an important task to someone without experience. *Der dumme Gärtner* proved so successful that it had no fewer than five sequels; Gerl certainly performed in two of these, though it is uncertain whether he and Schack wrote the scores for all of them. Between 1789 and 1793 Gerl wrote music for several more plays and Singspiele, and even after he left the company one or two further scores by him were heard there.

Gerl played a wide variety of parts in plays and operas (including Don Giovanni and Figaro in German) during his Vienna years, though he is most often associated with the role of Sarastro in *Die Zauberflöte*, which he created on 30 September 1791 and continued to sing at least until November 1792 (the 83rd performance, announced by Schikaneder as the 100th). The Gerls appear to have left the Freihaus-Theater in 1793; they were at Brünn (Brno) from 1794 until 1801, and from the beginning of 1802 Gerl was a member (with good salary and reasonable pension arrangements) of the Mannheim Nationaltheater. Apart from operatic roles he also appeared frequently in plays (including at least five Schiller parts). After his wife's death in 1806 he continued to appear at the Mannheim theatre until his retirement in 1826; on 12 April that year he remarried. His second wife was Magdalena Dengler (née Reisinger – his first wife's elder sister), the widow of Georg Dengler, director of the Mainz theatre.

Although the paucity of the surviving material and the difficulty of identifying Gerl's contribution to joint scores make it impossible to evaluate him as a composer, the works he wrote were popular in their day. His career as a singer is better documented. When Schröder, the greatest actor-manager of his age, went to Vienna in 1791 he was told not to miss hearing Schack and Gerl at Schikaneder's theatre. At the end of May he heard Wranitzky's *Oberon*, in which both were singing. Schröder thought Gerl's singing of the Oracle 'very good'; and Mozart's high

regard for his qualities is evident in the aria 'Per questa bella mano' (K612), written for Gerl in March 1791, and above all in Sarastro's music. It was on the song 'Ein Weib ist das herrlichste Ding' from the first *Anton* sequel (music by Schack and/or Gerl) that Mozart wrote the piano variations K613. Mozart's friendly relationship with Gerl is attested by the fact that Gerl was one of the three singers who is said, on the last afternoon of Mozart's life, to have joined the dying composer in an impromptu sing-through of the Requiem (the others were Schack and Mozart's brother-in-law Franz Hofer).

WORKS

Singspiele, performed Vienna, Freihaus, unless otherwise stated

Der dumme Gärtner aus dem Gebirge, oder Die zween Anton (2, E. Schikaneder), 12 July 1789, vs (Bonn, n.d.), collab. B. Schack [1st 'Anton' Spl]

Jakob und Nannerl, oder Der angenehme Traum (Oper, 3, Schikaneder), 25 July 1789; also attrib. Pecháček, Schack

Die verdeckten Sachen (2, Schikaneder), 26 Sept 1789, vs *I-Fc*, songs *A-Wgm*, collab. J.G. Lickl and Schack [2nd 'Anton' Spl]

Was macht der Anton im Winter? (2, Schikaneder), 6 Jan 1790, vs *I-Fc*, songs *A-Wgm*, collab. Schack and others [3rd 'Anton' Spl]

Don Quixotte und Sancho Pansa (3, K.L. Gieseke), 17 April 1790

Der Frühling, oder Der Anton ist noch nicht tot (2, Schikaneder), 18 June 1790, songs *Wgm*, collab. Schack and others [4th 'Anton' Spl]

Der Stein der Weisen, oder Die Zauberinsel (heroische-komische Oper, 2, Schikaneder), 11 Sept 1790, *D-Bsb*, vs *I-Fc*, collab. Mozart and Schack

Die Wiener Zeitung (3, Gieseke), collab. Schack, 12 Jan 1791

Anton bei Hofe, oder Das Namensfest (2, Schikaneder), 4 June 1791, collab. Schack and others [5th 'Anton' Spl]

Das Schlaraffenland (2, Gieseke), collab. Schack, 23 June 1792

Der Renegat, oder Anton in der Türkei (2, Schikaneder), 15 Sept 1792, collab. Schack and others [6th 'Anton' Spl]

Der wohltätige Derwisch, oder Die Schellenkappe (3, Schikaneder), collab. Henneberg, ?W. Müller and Schack, 10 Sept 1793; as Die Zaubertrommel, *D-MH*

Graf Balbarone (3, Franzky), Brünn; as Die Maskerade, oder Liebe macht alle Stände gleich, 9 Dec 1797

Dirge, for [Die Spanier in Peru, oder] Rollas Tod (A. von Kotzebue), Brünn, 1796

(2) **Barbara Gerl** [née Reisinger] (*b* Vienna or ?Pressburg [now Bratislava], 1770; *d* Mannheim, 25 May 1806). Singer and actress, wife of (1) Franz Xaver Gerl. By 1780 she was a member of Georg Wilhelm's troupe, playing in Moravia and Silesia; she is listed in the Gotha *Theater-Kalender* for 1781: 'children's roles, and sings in operettas'. Later numbers of the *Theater-Kalender* trace her rise from soubrette roles to 'first dancer' and player of queens etc. During these years Wilhelm's company performed at Olmütz (Olomouc), Troppau (Opava), Brünn (Brno) and Vienna (the 'Fasantheater auf dem Neustift', and in 1783 also in the Kärntnertortheater), and in many provincial Austrian towns. Early in 1789 she joined Schikaneder's company at Regensburg, making her début as Kalliste in a German version of Guglielmi's *La sposa fedele* (*Robert und Kalliste*). That summer she, Franz Gerl and Benedikt Schack joined Schikaneder in Vienna when he began his directorship at the Freihaus-Theater auf der Wieden. Barbara Gerl took the principal female roles in Schikaneder's sequel to Martín y Soler's *Una cosa rara, Der Fall ist noch weit seltner*, in May 1790, and in *Robert und Kalliste* and Schikaneder's *Der Stein der Weisen* (in which she and Schikaneder sang the duet 'Nun, liebes Weibchen' K625/592*a*, written or orchestrated by Mozart), both in September. She also performed in a number of spoken plays. On 30 September 1791 she achieved her one link with immortality by creating the part of Papagena in *Die Zauberflöte*. She and her husband appear to have left Schikaneder's company in 1793; they were at Brünn from 1794 until 1801 and from 1802 in Mannheim, where she died shortly after the birth of her second child.

(3) **(Judas) Thaddäus Gerl** (*b* Andorf, Upper Austria, 28 Oct 1774; *d* ?Bayreuth, 13 April 1844). Bass, brother of (1) Franz Xaver Gerl. From 1785 until 1792 he was a chorister at Salzburg Cathedral and then studied logic and physics at Salzburg University until 1795. He sang bass with the choirs of the university church and St Peter's as a student, and from November 1796 until 1805 he was second bass in the court music establishment, from 1801 also appearing at the municipal theatre. He was granted two years' leave of absence from 1 February 1804 in the interest of 'perfecting his knowledge of singing and the theatre'; he was a member of the Lemberg (L′viv) company during his leave of absence (which was extended), but on his return to Salzburg he found that the court music establishment had been dismissed. The remainder of his life (after the birth in Salzburg of a son, Johannes Thaddäus, on 28 September 1807) is shrouded in mystery; he may be identical with the Gerl who died at Bayreuth in 1844 as bailiff of the castle.

Another brother, Johannes Nepomuk Gerl (*b* Andorf, 12 May 1769), was a chorister at Salzburg from 1783 to 1785.

PETER BRANSCOMBE

Gerlach [Gerlacz, Gerlatz]. German family of printers. Katherina Gerlach (*b* ?Nuremberg, *c*?1515–20; *d* Nuremberg, bur. 12 Aug 1592), born Katherina Bischoff, was married to Niclas Schmidt on 17 May 1536, and bore a daughter, also named Katherina (bap. 8 May 1539), who later became a printer and bookseller in her own right. After Schmidt's death in 1540, Katherina married JOHANN VOM BERG on 1 February 1540/41; the couple, along with ULRICH NEUBER, set up a printing and publishing company on Katherine's property 'bei dem Kalckhütten', an address given in the colophon of the Berg and Neuber prints for many years. Katherine remained in partnership with Ulrich Neuber after Berg died in 1563; she is listed as a printer and the owner of the firm from 1564, and the firm's colophon changed to 'Ulrich Neuber und die Bergsche Erben' for a short while.

Katherina married again in 1565. Her third husband was Dietrich (Theodor, Theodoricus) Gerlach, who may have been one of her employees. The firm continued briefly as 'Gerlach and Neuber', but Neuber soon left the

partnership to found his own firm, and after 1566 the Gerlachs continued printing as 'Gerlach and Berg's heirs'. They continued publishing many of the Berg and Neuber titles, and further works by the same writers, including especially those of Johannes Mathesius. The firm stopped printing the enormous motet anthologies favoured by Berg, and focussed instead on single-composer prints, especially of Lassus's motets. Some 150 editions of music and music treatises were published in the years 1565–75, with an increasing emphasis on works in the vernacular.

After Dietrich Gerlach's death (bur. 17 August 1575), Katherina carried on the firm for 17 years, using the colophon 'Katherina Gerlachin und die Bergsche Erben', and it became one of the two official printers to the Nuremberg city council. One of the most prolific music printers of the 16th century, she printed at least 200 editions of music and at least as many books on other subjects, primarily theology and science. During her tenure as head of the firm, the emphasis in music publishing continued to move towards collections of motets by single composers each containing about 25–30 pieces, and she issued volumes by Lassus, Lechner, Lindner, Orazio Vecchi and Uttendal among others. Katherine also printed many books of German secular music, as had Berg and Neuber, but also started printing editions of Italian madrigals, including collections by Lassus, Regnart, Scandello and Zanotti. She printed at least 37 editions of Kirchenlieder, and also at least a dozen music treatises. The amount of music published by the firm continued to increase through the 1570s and 80s.

Katherina bequeathed the firm proper to her younger daughter Veronica (bap. Oct 1545), by now the wife of the preacher Johannes Kauffmann, and left some property and titles to her elder daughter, Katherina. The firm was however managed by Veronica's son PAUL KAUFFMANN, who had apparently been working with his grandmother for many years; it formally became Paul Kauffmann's in 1595.

SUSAN JACKSON

Gerlach, Carl Gotthelf (*b* Calbitz, nr Oschatz, Saxony, 31 Dec 1704; *d* Leipzig, 9 July 1761). German organist and composer. He was a pupil at the Thomasschule in Leipzig, and from 1716 until about 1723 received his musical training from Johann Kuhnau; he was probably also taught by J.S. Bach in 1723. As an alto singer, violinist and harpsichordist, he became a valuable assistant to Bach when he left school, helping to provide figural music for the two principal churches in Leipzig, and he sometimes accompanied Bach on concert tours. In April 1727 he enrolled to study law at Leipzig University, and on 10 May 1729, on Bach's recommendation, he was appointed organist and music director at the Leipzig Neukirche, succeeding Georg Balthasar Schott. He acted as deputy when Bach was ill or away, and between spring 1737 and autumn 1739 he took over temporarily from Bach as director of the student collegium musicum, becoming permanent director in 1741 or at the latest, 1744. He was also involved as violinist and orchestral leader in the new Grosse Konzert, a forerunner of the Leipzig Gewandhaus concerts, founded in 1743 by businessmen of the city. He died after a long illness, unmarried and without heirs.

Gerlach's extensive library of manuscripts came into the possession of the Leipzig publisher J.G.I. Breitkopf, who included the music in his catalogues for the Michaelmas fair in 1761 and the years that followed. Only two of Gerlach's own works survive, one of which is of doubtful authenticity. He obviously occupied a prominent position in Leipzig's musical life from 1729 onwards, and comparison with the grants made to Bach shows that Gerlach received a disproportionate amount of financial support from the city council. The musical practices he introduced at the Neukirche were seen in many respects as a modern alternative to the more traditional music favoured by Bach at the Thomaskirche and the Nikolaikirche.

WORKS

music lost unless otherwise stated

3 cants. for bicentenary of the Augsburg Confession, 1730 (texts pubd): Auf, ihr gottergebnen Seelen; Jauchzet ihr Himmel, frohlocke du Erde; Lasset uns den Herrn loben
Other cants.: Der Fortgang unsrer Osterfreuden, 1729 (text pubd); Easter cant., listed in Breitkopf catalogue, 1836; Friede sei mit euch, *D-Dl*; Jubelkantate, listed in Breitkopf catalogue, 1836
Org: Fugue, g, doubtful, *US-Wc*; Chorale, Ich dank dir schon durch deinen Sohn, extract in F.W. Marpurg: *Abhandlung von der Fuge*, i (Berlin, 1753/*R*)
Orch: Sinfonia, F, 2 ob, 2 hn, str, listed in Breitkopf catalogue, 1766, suppl.

ANDREAS GLÖCKNER

Gerlandus. 12th-century theorist. Gerbert identified Gerlandus with the 12th-century canon regular and scholastic of St Paul's, Besançon, noted for his writings, including a work on the liberal arts. His very brief tract on the mathematics of organ pipes and bells, in *A-Wn* Cpv 2503 (*GerbertS*, ii, 277f; RISM, B/III/1, 35, 44), resembles in its wording many tracts from contemporary manuscripts. Beginning *Item de fistulis Gerlandus. Si fistule equalis. . .*, and ending *Eodem modo per acutam invenies*, it first describes the length of pipes needed to produce the diatonic scale, including B♭. The final section considers more precise adjustments of length depending on the diameter. Bells, and their relative weights, are described in the middle section. See also M. Gerbert: *De cantu et musica sacra a prima ecclesiae aetate usque ad praesens tempus*, St Blasien, 1774/*R*, i, 285.)

ANDREW HUGHES

Gerlatz. *See* GERLACH.

Gerle, Conrad (*d* Nuremberg, 4 Dec 1521). German lute maker. He was active at Nuremberg in 1465 and became well known for his instruments in France as well as in Germany. In 1469 Charles the Bold of Burgundy bought three of his lutes for players at his court. Gerle lived at one time in the Kotgasse in Nuremberg, and moved from there to the Breitengasse in 1516. He was buried in the Rochuskapelle, Nuremberg, leaving a widow and several young children, one of whom was probably the instrumentalist and lute maker Hans Gerle.

LYNDA SAYCE

Gerle, Georg (*d* Innsbruck, *c*1589). German instrument maker. According to Vannes he came from Immenthal (near St Gall), and in 1548 was made a citizen of Füssen. In 1569 he was employed as organ blower and instrument maker by the Archduke Ferdinand at Innsbruck, and since reference was made in 1572 to his long service it may be supposed that he was previously in the same employ at Prague. An ivory lute by Gerle, made about 1580, is in the Kunsthistorisches Museum, Vienna. It is probably the only surviving six-course lute in apparently original condition and bears the label, 'Georg Gerle, Fürstlicher Durchleuchtig-/kait Chalkandt zu Ynnsprugg'. A 'cembalo del Gherla' is mentioned in the 1598 catalogue of the Este collection at Modena.

Three of Gerle's sons are known. Melchior succeeded to his father's post at Innsbruck in 1589; after 1596, when the Archduke Ferdinand died and the court was dissolved, he remained at Innsbruck where he had married in 1591 and had a son, Anton, in 1605. Another of Georg Gerle's sons, also called Georg, became organ blower to the Innsbruck court in 1583; at the beginning of the 17th century he was living at Füssen and in 1615 at Immenstadt. A third son, Jacob, his father's pupil and assistant, is known to have been active at Graz in 1585.

LYNDA SAYCE

Gerle, Hans (*b* Nuremberg, *c*1500; *d* Nuremberg, 1570). German instrumentalist, lute maker and compiler and arranger of several volumes of instrumental music. He was probably the son of Conrad Gerle (*d* 1521), a well-known lute maker in Nuremberg. He may be presumed to have spent his life in his native city. He may have been related to Georg Gerle who worked as an instrument maker in Innsbruck during the second half of the 16th century.

Hieronymus Formschneider of Nuremberg published three volumes of music by Hans Gerle: *Musica teusch, auf die Instrument der grossen unnd kleinen Geygen, auch Lautten* (1532), *Tabulatur auff die Laudten* (1533) and *Eyn newes sehr künstlichs Lautenbuch* (1552). On the title-page of the last volume the author called himself 'Hans Gerle den Eltern' (the elder), implying the existence of a younger relative with the same forename.

The first volume, *Musica teusch*, includes introductory essays on playing 'Grossgeigen' (violas da gamba), 'Kleingeigen' (rebecs or violins) and lutes, and on musical notation. The collection contains music for solo lute and for ensembles of Gross- and Kleingeigen. Most of the compositions are intabulations of lieder and psalm settings by German composers – Stoltzer, Senfl, Hofhaimer, Johann Walter (i), Heinrich Isaac and so on – but there are as well two preludes ('Priambeln') for solo lute, reprinted from Hans Judenkünig's lutebook of 1523.

Gerle's second volume, *Tabulatur auff die Laudten*, is restricted to music for solo lute: preludes and intabulations of chorales, popular and courtly lieder, chansons and motets. Quite unusually, Gerle included works by older composers such as Hayne van Ghizeghem, Josquin des Prez, Isaac and Obrecht, as well as music by his own contemporaries, Claudin de Sermisy, Willaert, Jean Mouton and Senfl. His third volume, *Eyn newes sehr künstlichs Lautenbuch*, likewise for solo lute, is entirely devoted to fantasias and dances taken from earlier lutebooks and transcribed from Italian into German tablature. In so doing Gerle made the works of the following lutenists available to German musicians: Giovanni Maria da Crema, Domenico Bianchini, Simon Gintzler, Antonio Rotta, Francesco Canova da Milano, Pietro Paolo Borrono and Alberto da Ripa.

Gerle's volumes with their preponderance of intabulations and their brief introductory remarks on performing techniques are a valuable source of information about standard practices of the time and the general level of achievement expected of a professional performer, even though the books themselves are not of great artistic significance. His tuning and fretting instructions have received considerable attention from modern scholars and performers. Some of his music for lute also appears in 16th-century manuscrsipt sources (in *D-Bsb*, *Mbs*, *F-Pn*, *NL-Au*, *PL-WRu*, *S-Sk*).

For illustrations *see* NOTATION, fig.116; SOURCES OF INSTRUMENTAL ENSEMBLE MUSIC TO 1630, fig.3.

WORKS

HOWARD MAYER BROWN/LYNDA SAYCE

Gerle, Melchior. German instrument maker, son of GEORG GERLE.

Gerlin, Ruggero (*b* Venice, 1 May 1899; *d* Paris, 17 June 1983). Italian harpsichordist. After a classical education he gained the master diploma in piano playing at the Milan Conservatory. In 1920 he began to study the harpsichord with Landowska in Paris, and he continued working with her until 1940, often as her partner in concerts of music for two keyboard instruments. He then returned to Italy, becoming harpsichord professor at the S Pietro a Majella Conservatory in Naples (1941), and inaugurating annual summer masterclasses at the Accademia Musicale Chigiana in Siena (1947). Gerlin toured throughout Europe as a soloist and chamber musician, and made many recordings. He also edited works by Grazioli, Alessandro Scarlatti and Benedetto Marcello in I Classici Musicali Italiani.

HOWARD SCHOTT

Germain. *See* GOERMANS.

German, Sir **Edward** [Jones, German Edward] (*b* Whitchurch, Shropshire, 17 Feb 1862; *d* London, 11 Nov 1936). English composer. He grew up in a musical household but a career in music was not encouraged until serious illness had disrupted his education and plans for an apprenticeship in marine engineering. After private study with Walter Hay of Shrewsbury he entered the RAM in 1880, there adopting his professional name. The organ soon gave way to the violin as his principal study, but although he won the Tubbs Bow and other prizes for performance he was increasingly drawn towards composition, which he studied under Ebenezer Prout. Several of German's student works were played at RAM concerts and in 1885 his Te Deum won the Lucas Medal. Prophetic in relation to German's future career were the operetta *The Two Poets*, produced at the RAM in 1886 and taken on tour by the students, and the Symphony in E Minor, performed by the RAM Orchestra under Joseph Barnby in 1887. Appointed a sub-professor of violin at the RAM in 1884, he combined teaching with playing in theatre orchestras at the Savoy and elsewhere, finally leaving the RAM in 1887. He visited Germany in 1886 and 1888/9 and was impressed by its opera, particularly at Bayreuth.

In 1888 he became Musical Director at the Globe Theatre. The resulting composition of music for Shakespeare's *Richard III* (1889) brought his name before a wider public and the music written subsequently for Henry Irving's production of Shakespeare's *Henry VIII* (1892) firmly established his reputation. German's career in both theatre and concert hall, to where his theatre music was successfully transferred, burgeoned with commissions from leading impresarios and festivals. A second symphony, written for the 1893 Norwich Festival, was generally well received but an element of negative reaction rankled: Bernard Shaw thought that both symphonies by German were marred by inappropriate theatricality. Thereafter German cautiously cast his large-scale four-movement works, *The Leeds Suite* (1895) and *The Seasons* (1899), as symphonic suites. Much of his theatre music became enormously popular, particularly the *Three Dances from Henry VIII* and the *Nell Gwyn Dances* (1900) which exploit a distinctive, if limited, 'olde English' manner, a species of musical mock Tudor with which German came to be particularly associated. Of his many songs, mostly aimed at the drawing-room market, some achieved considerable popularity, including *Rolling Down to Rio* (from his clever settings of Kipling, *The Just So Song Book*, 1903) and *Glorious Devon* (*c*1905). German's instrumental works include a number written for his friend and RAM contemporary, the leading British flautist Frederic Griffith. In addition to solo piano music, German composed an attractive *Suite for Four Hands* (*c*1890) and also arranged many of his orchestral scores for piano duet.

In 1901 German completed *The Emerald Isle*, the operetta left unfinished on Sullivan's death, abandoning a violin concerto commissioned for the Leeds Festival in order to do so. Following its success, operetta became his main focus as a composer during the Edwardian decade. His most celebrated pieces, *Merrie England* (1902) and the even finer *Tom Jones* (1907), were designed as vehicles for his popular 'olde English' style. Neither achieved the success of the greatest Gilbert and Sullivan works. In truth, by continuing the Savoy tradition German had allied himself to a type of theatre piece for which public taste was dwindling. Nevertheless, as reinforcements of the myth of England's merriness in days of yore (a once potent element in English self-perception) *Merrie England* and, to a lesser extent, *Tom Jones* retained a special place in the affections of native audiences, and are still occasionally performed. For his last operetta, *Fallen Fairies* (1909), German collaborated with W.S. Gilbert. No more than a succès d'estime, the production was not entirely happy and this may have influenced him to withdraw from composition: certainly he wrote relatively little thereafter. His two last orchestral works, *Theme and Six Diversions* and *The Willow Song*, were completed in 1919 and 1922 respectively.

German remained active as a conductor of his own music until poor health and eyesight forced his retirement in the late 1920s. Having been, in 1897, the first in a distinguished line of British composers invited by Dan Godfrey to conduct their music at Bournemouth, he had become much in demand for personal appearances at concerts and festivals. He was meticulous in rehearsal, and testimony to his standards of precision can be heard in his gramophone recordings, including a 'complete' *Merrie England* and *Theme and Six Diversions*. Another aspect of German's perfectionism is revealed in his fondness for revising and rearranging his works, even after publication, an activity he continued to the end of his life. Knighted in 1928 and awarded the Royal Philharmonic Society's Gold Medal in 1934, German lived to become a doyen of British music, the respected founder of the flourishing school of native light orchestral music whose leadership had passed to such younger composers as Eric Coates and Haydn Wood. A constant champion of composers' rights to fair financial rewards, he was a leading supporter during the early years of the Performing Rights Society.

In his lifetime German's music earned both general popularity and the high regard of leading British musicians (Elgar was a great admirer). After his death the serious orchestral works fell into neglect and the 'olde English' style was often dismissed as spurious and mannered. Nevertheless, his best-known works in that style, the

Henry VIII and *Nell Gwyn* dances, retained a place in the repertory, but with the result that they were often thought to represent German's entire range as an orchestral composer. Through recordings and broadcasts his more ambitious works are being heard again and reveal his much broader talent. The *Romeo and Juliet* (1895) music shows considerable dramatic gifts and, of his large-scale works, the *Norwich Symphony* (1893) and *The Seasons* (1899) are especially strong. *Theme and Six Diversions* (1899) cogently combines German's lighter and more serious styles and is regarded by some as his masterpiece, but the brilliantly scored *Welsh Rhapsody* (1904), a miniature symphony based on Welsh traditional melodies, is probably his most frequently performed extended orchestral work.

French influences are clearly apparent in German's music and there are even occasional reminders of Tchaikovsky but paradoxically he was, like Elgar, a stylistic cosmopolitan who wrote music that is quintessentially English. Indeed, German's serious orchestral music reveals striking affinities with the language of Elgar's earlier works. However, it is with Sullivan that he is most often compared. Although he is widely regarded as Sullivan's heir in operetta and light music, it is notable how dissimilar they are in style. German's lyrical ballads, in particular, reveal a romantic warmth that struck a new note in British operetta. His elegant, beautifully crafted music has its own distinctive voice and secures his place among the finest British composers for the genre.

WORKS

many MSS in private collection: the Edward German Archive, D.R. Hulme, Aberystwyth

All pubd in London in year of composition or first performance, unless otherwise stated

OPERETTAS

pubd in vs only; many songs, duets, ensembles, dances and selections pubd separately

The Two Poets (2, W.H. Scott), RAM, July 1886; revised as The Rival Poets, St George's Hall, 1901 (1901)
The Emerald Isle or The Caves of Carrig-Cleena (2, B. Hood), Savoy, 27 April 1901; completion by German of work begun by A. Sullivan; concert arr. (*c*1910)
Merrie England (2, Hood), Savoy, 2 April 1902; concert version (1908)
A Princess of Kensington (2, Hood), Savoy, 22 Jan 1903; concert selection (1909)
Tom Jones (3, R. Courtneidge, A.M. Thompson, C.H. Taylor after H. Fielding), Manchester, Prince's, 30 March 1907; concert version (1913)
Fallen Fairies or The Wicked World (2, W.S. Gilbert), Savoy, 15 Dec 1909 [vs also pubd under temporary title of Moon Fairies]

SONGS

for 1v, pf, unless otherwise stated

A Serenade (W.H. Pollock), 1v, pf, fl, ob, cl, bn, hn (?1890) [text reset in Lady mine (1913)]
3 Spring Songs (H. Boulton) (1898): All the world awakes today, The Dew upon the Lily, My song is of the sturdy North
4 Lyrics (Boulton) (1900): Sea Lullaby, Birds on wing, Fair flowers, In Summer Time
The Just So Song Book (R. Kipling) (1903): When the cabin portholes, The camel's hump, arr. S, A, pf (1926), SATB pf (1927), This uninhabited island, I keep six honest serving-men, I am the most wise Baviaan, Kangaroo and Dingo, Merrow Down, Of all the tribe of Tegumai, The Riddle, The First Friend, There was never a Queen like Balkis, Rolling Down to Rio, arr. TTBB, pf (1916), SATB, pf (1925), SA, pf (1925)
6 Lyrics (Boulton) (1903): Wake up my nestling, White Snowdrops, Over the Heather, A Wild Rose, Meadows Green, From Wave to Wave
2 Lyrics (H.H. Spencer) (1904): A Fancy, Heigh-Ho!
3 Baritone Songs (1905): Come to the woods (S. Waddington), My Lady (F.E. Weatherly), Glorious Devon (Boulton)
3 Songs of Childhood (M. Lawrence) (1914): Wondering, The Chinese Mandarin, Bye-Low Land
Other songs (1881–5): Twilight, 1881, unpubd; Ode to the Woodlark (R. Burns), *c*1884, unpubd; A Midsummer Ghost, unpubd, lost; Molly Malony, unpubd, lost; Nevermore, unpubd; A Summer Idyll, unpubd, lost; Three Heavens, unpubd, lost; 3 leider, unpubd, lost
(1886–1900): Fine Feathers (J.E. Carpenter), (?1886); Fancy Free (A. Chapman), (?1887); Little Sweethearts (R.S. Hichens), (?1888); His Lady (Hichens), (?1889); Story of a Monk (*c*1889) untraced; A Wayside Story (*c*1889) untraced; The Banks of the Bann (S. Lennox), (?1890), rev. as The Land of the Past (1904); Little Boy Blue (Weatherly), (?1891); Little Lovers (Hichens), (1891); Ever Waiting (G.H. Newcombe), (1893); In a Northern Land (Weatherly), (1893); In the Merry Maytime (M. Blackett), (1894); Springtime (?R. Jones), *c*1894 unpubd; Who'll buy my lavender? (C. Battersby), (1896), arr. lv, orch, unpubd; Love, the pedlar (Battersby), (1899); Sweet Rose (Bingham), (1899); Woo me not (Battersby), (1899); Early one morning (trad. old English), (1900); Roses in June (Bingham), (1900)
(1901–25): Daffodils A-Blowing (Battersby), (1901); Love's Awakening (B. Hood), *c*1901, unpubd; Restless river (Bingham), (1901); Cupid at the ferry (Battersby), (1904); The Land of the Past (Bingham), (1904) [rev. of The Banks of the Bann (?1890)]; When Maidens go A-Maying (Boulton), (1906); This England of ours (Boulton), (1907); The Drummer-Boy (Boulton), (1908); Little girl in red (A. Wilkins), (1908); Love's Barcarolle (Hood), (1908); To Katherine Unkind (Hood), (1908); Memories (Boulton), (1909); Bird of Blue (Chrystabel), (1910); Love in all Seasons (Hood), (1910); Moorish Lullaby (M. Byron), (1910); Big Steamers (Kipling), (1911); An Old English Valentine (M. Farrah), (1911); What 'Dane-Geld' Means (Kipling), (1911); When we grow old (Spencer), (1911); Alistair (S. Grant), (1912); Court Favour (Hood), (1912)
Lady mine (Pollock), (1913) [see also: A Serenade (?1890)]; To Phyllis (?1914); The Arrow That Went Wrong, parody (?E. German), 1916, unpubd; Be well assured (Kipling), (1916); Countryman's Chorus (H. Taylor), (1916); All Friends round the Wrekin (W.H. Scott), (1917); Charming Chloe (Burns), (1917); Have you news of my boy Jack? (Kipling), also with SSC (1917), orch. acc., unpubd; The Irish Guards (Kipling), (1918), also arr. quick-step, pf duet, mil. band, 1918, unpubd; Sails, ?*c*1920–25, unpubd; The Lordling's Daughter (anon. Elizabethan), (1925)
Songs for plays: Lady Hilda's Song (W.S. Gilbert: *Broken Hearts*), Savoy, 4 June 1888, 1v, orch, arr. 1v, pf; It was a lover and his lass, S, C, orch, arr. S, C, pf (1897), 1v, pf (1919) [see INCIDENTAL MUSIC: As You Like It]; 3 Songs: Evadne's Song, O Love that knew the morning, Cupid, Fickle Cupid, 1v, orch, arr. 1v, pf (1905) [see INCIDENTAL MUSIC: The Conqueror]
Also separately pub. songs, duets and ensembles from operettas

DAVID RUSSELL HULME

German Dance (Ger. *Deutsche*, *Deutscher Tanz*, *Teutsche*; Fr. *allemande*; It. *tedesco*). A term used generically during the late 18th and early 19th centuries for couple-dances in triple metre; it was eventually replaced in general usage by the names of the two most common types, the LÄNDLER (in which couples turned with arms interlaced) and the WALTZ (in which they took swift turns while in a close embrace). It is difficult to say just when the term 'German Dance' was first used, or when the French word ALLEMANDE began to refer to the relatively new couple-dance rather than to the Renaissance-Baroque processional dance that so often appeared in Baroque suites. French dancing-masters were apparently familiar with the German couple-dance early in the 18th century, for they included some ländler-like movements in the CONTREDANSE (see Feuillet's *Recueil de dances*, 1705), although these were modified to suit French taste (omitting, for example, the seemingly vulgar and inelegant

Ex.1 G.B. Gherardi: *14 Cotillons ... and Allemandes* (1767–70)

embrace). After about 1760, however, the independent German Dance became popular; it was included in published dance manuals, such as Guillaume's *L'almanach dansant* (1771; see illustration), and it was mentioned in plays in both France and England. The new, socially accepted German Dance of the late 18th century consisted of a series of ländler-like passes, ending with a tentative (not too close) embrace. Tunes were at first in 2/4 or 3/8, the former being particularly characteristic of the ländler type of German Dance. Guillaume described a duple-metre German Dance that resembled the waltz, danced with a springing movement, and a triple-metre version, sometimes called the *boiteuse* ('limping'), that consisted of a 'step and hop'. The author failed to show exactly how the steps fit with accompanying music but the movements he described fall most happily on the first and third beats of a bar, as shown in ex.1.

The musical style of the German Dance is quite simple: usually each dance consists of two repeated phrases eight bars long (occasionally the first phrase is to be repeated da capo, as in Beethoven's *Allemande für Clavier* WoO81). Virtually all are written in major keys, with some tendency, especially in the dances of Schubert, to suggest the relative minor at the beginning of the second phrase; most are in 3/8 or 3/4, and most have a slow harmonic rhythm, usually one harmony per bar. A number of stereotyped rhythmic motifs seem to have been characteristic of the German Dance, as shown in ex.2, as were

Ex.2 Rhythmic motifs characteristic of the German Dance

'oom-pah-pah' and block-chord accompaniment patterns and simple folklike melodies.

Haydn, Mozart, Beethoven and Schubert each wrote many sets of *Deutsche*, for keyboard, orchestra and chamber groups, apparently intended both for use at balls in Vienna's Redoutensaal and to satisfy amateurs' desires for new and fairly undemanding music. Often these works were published abroad under the titles 'waltzes' or 'allemandes' (Mozart's *Sechs deutsche Tänze* K571 appeared under both titles), and eventually it was the title 'waltz' that became the common designation for the form. Normally a set of *Deutsche* included three, six or 12 dances in related keys, some of which had trio sections (e.g. the third and sixth dances of Beethoven's *Sechs Deutsche für Clavier und Violin* WoO42), although other national dances such as the ECOSSAISE and POLONAISE and independent pieces called 'trio' could also be included. While the longer sets usually have a certain amount of tonal coherence (the last dances return to the key of the first), some of Schubert's shorter *Deutsche* sets have strikingly unbalanced key schemes; his *Drei Deutsche für Clavier* D972, for example, are in D♭, A♭ and A respectively.

Other composers who contributed German Dances for ballroom use (many of them entitled 'waltz' after 1810) include J.N. Hummel, Daniel Steibelt, E.A. Förster and Ignaz Moscheles. Under its several possible names, the German Dance appeared in much music not intended for dancing during the late 18th and early 19th centuries, often in stylized form. The first movement of Beethoven's Sonata op.79 for piano, marked 'Presto alla tedesca', and the last movement of Haydn's Piano Trio in E♭ (HXV:29), marked 'allemande', are two such examples, as is, perhaps, the *Bauerntanz* in the third movement of Beethoven's Pastoral Symphony. In the last scene of Act 1 of Mozart's *Don Giovanni*, Leporello and Masetto perform the German Dance (called 'la Taitsch') while Donna Anna and Don Ottavio dance a minuet and Don Giovanni and Zerlina a contredanse, a scene that carries a clear implication of the social status of the German Dance. Weber's *Tedesco* for orchestra (1816) may mark the last appearance of the generic usage, for after about 1815 the more specific titles 'ländler' and 'waltz' were increasingly common, as in Schumann's title 'Valse allemande' for a German Dance in *Carnaval* op.9.

CLIFF EISEN

German flute. An older name for the transverse flute, used to distinguish it from the RECORDER, also called 'English flute'. *See* FLUTE, §II.

Germani, Fernando (*b* Rome, 5 April 1906; *d* Rome, 10 June 1998). Italian organist. At the age of eight he entered the Rome Conservatory as a pupil of Bossi and then Bajardi (piano), Dobici (theory) and Respighi (composition). His only organ teacher was Raffaele Manari. In 1921 he became organist of the Augusteo Orchestra and began a career as a virtuoso organist, and at the age of 21 played for the first time in the USA. He was appointed

German Dance: engraving from S. Guillaume's 'L'almanach dansant, ou Positions et attitudes de l'allemande' (Paris, 1771)

professor at the Accademia Musicale Chigiana in 1932 and at the Rome Conservatory in 1934, and became head of the organ department of the Curtis Institute, Philadelphia, in 1936 for two years. From 1932 he was, except during the war years, a frequent visitor to England, and like Vierne formed a productive relationship with Henry Willis (iii). Germani's technique and prodigious musical memory soon established him at the forefront of touring organ recitalists, and drew distinguished pupils from all over the world. In 1945, at S Ignazio in Rome, he gave the first performance in Italy of Bach's complete organ works, for many years repeating them there or at the Basilica of S Maria in Aracoeli. In 1949 he published in book form (*Guida illustrativa alle composizioni per organo di J.S. Bach*) the notes written for this series. For 11 years from 1948 he was first organist at S Pietro, Rome.

In the postwar years Germani extended his already considerable repertory to encompass much Reger, including the large-scale compositions, and also occasionally performed the complete works of Franck. He started recording in the 1930s, and after the war recorded prolifically, playing much early repertory as well as Bach, Franck and Reger; a number of his recordings have been reissued on CD. He published a Toccata for organ (1937) and an influential organ method in four volumes (1939–52), and also produced an important edition of Frescobaldi's *Fiori musicali* and *Toccate*; a Concerto in C♯ minor was lost after Germani lent the manuscript to a stranger. Germani received many honours during his lifetime, including the Special Cultural Prize of the Italian State in 1997. His papers are held by the Fernando Germani Society in Reykjavík.

FELIX APRAHAMIAN/PAUL HALE

Germania Musical Society. *See* NEW YORK, §5.

Germanos of New Patras [Germanos Neōn Patrōn] (*b* Tyrnavo, Thessaly, ?1625; *d* ?Wallachia, 1685). Romaic (Greek) composer, cantor and hymnographer. He studied Byzantine chant in Constantinople under the patriarchal *prōtopsaltēs* PANAGIOTES THE NEW CHRYSAPHES. Some time before 1665 he was elevated to the episcopacy, possibly at the instigation of Patriarch Dionysios III (a fellow native of Thessaly), becoming Metropolitan of New Patras (now Ipati). He appears to have resigned from the see before 1683 and subsequently travelled to Wallachia.

Musically active from at least the early 1660s, Germanos is known to have produced five autographs: two copies of his edition of the Stichērarion, a Mathēmatarion in two volumes and an anthology of the Papadikē. An abundance of grammatical and spelling errors in these manuscripts suggest that he had received little more than a rudimentary general education, but he was neverthless highly respected as a musican, teaching the composers BALASIOS and Kosmas Makedonos as well as the Wallachian *prōtopsaltēs* Giovaskos Vlachos. He continued the work begun by Panagiotes of enriching the received repertory through the introduction of new melodic formulae (*theseis*). Devoting most of his energies towards the creation of a florid style suitable for major solemnities, Germanos produced an influential Stichērarion for the Divine Office, containing both original compositions and 'beautified' versions of works by older masters; this collection of stichēra for the liturgical year mostly displaced not only its medieval predecessor but also the more recent Stichērarion of Panagiotes. He also composed for the Divine Office a Heirmologion of the *katabasiai* of great feasts and Holy Week, as well as various chants for Orthros, and made important contributions to the post-Byzantine genre of paraliturgical kalophonic *heirmoi*.

Despite the transcription by Chourmouzios the Archivist of Germanos's complete Stichērarion (*GR-An* MPT 747-50), relatively few of his works have appeared in modern printed editions. They include a number of hymns, transcribed into Chrysanthine notation by Gregorios the Protopsaltes (ed. Phōkaeus, 1835); the troparion for Holy Saturday *Ton hēlion krypsanta tas idias aktinas* ('As the sun hid its rays', ed. Phōkaeus, 1834); and a kalophonic hymn for 15 August, transcribed by Gregorios (ed. Lampadarios and Stephanos the First Domestikos). (For a fuller list of works see Stathēs, 1995.)

ALEXANDER LINGAS

German Reed, Thomas. *See* REED, THOMAS GERMAN.

German sixth chord. The common name for the AUGMENTED SIXTH CHORD that has both a major 3rd and a doubly augmented 4th or perfect 5th in addition to an augmented 6th above the flattened submediant.

German String Trio. German ensemble. It was established in Stuttgart in 1972 by the violinist Hans Kalafusz (*b* The Hague, 3 Sept 1940), the viola player Christian Hedrich and the cellist Reiner Ginzel. Soon after its foundation the group won the prize for the best string trio at the International Chamber Music Competition in France. In 1981 Hedrich was replaced by Jürgen Weber. The ensemble has toured widely and has recorded much of the string trio repertory, including works by Haydn, Mozart, Beethoven, Schubert, Dohnányi, Wolf-Ferrari, Reger, Hindemith and David; and many composers have dedicated works to it, among them Nikolaus Brass, Arthur Dangel, Adriana Hölszky, Milko Kelemen, Joachim Krebs, Hans Peter Jahn, Anton Ruppert, Ernst Sauter, Carlos Veerhoff, Roland Leister-Mayer, Alessandro Solbiati and Krzysztof Penderecki. All three members hold major orchestral and teaching positions, the leader in Stuttgart, the viola player in Munich and the cellist in Baden-Baden and Munich. As an ensemble they play with beautiful tone, immaculate intonation and impressive stylistic sense. The trio's instruments are a 1699 Pietro Giovanni Guarneri of Mantua, a 1780 Lorenzo Storioni of Cremona and a 1690 Giovanni Grancino of Milan.

TULLY POTTER

Germany, Federal Republic of (Ger. Deutschland). Country in Northern Europe. It extends from the Baltic Sea and the North German Plain to Lake Constance and the Bavarian Alps and Plateau, and from the North Sea and the French border to the Oder and Neisse rivers and the mountainous eastern regions of the Erzgebirge and the Fichtelgebirge. It is bordered by Denmark, Poland, the Czech Republic, Austria, Switzerland, France, Luxembourg, Belgium and the Netherlands. After World War II, from 1949 to 1990, Germany was divided, with Bonn as the capital of West Germany; the historic capital Berlin was restored after reunification in 1990 (East Berlin

having served as the capital of East Germany from 1949 to 1990).

I. Art music. II. Folk music.

I. Art music

1. To 1648. 2. 1648–1700. 3. 1700–1806. 4. 1806–1918. 5. Since 1918.

1. To 1648. Exactly when German history began has been a matter of debate ever since Goethe and Schiller felt obliged to ask the question 'Germany? But where is it?'. Some modern historians start with the anointing of the first Carolingian king, Pippin the Short, in 751; or the re-foundation of the 'Roman' Empire in the West by his son Charlemagne (768–814) when he was crowned Emperor of the Romans by Pope Leo III in 800. Other scholars have suggested the division of the Carolingian Empire in 843 by the Treaty of Verdun, or 911, the year that Conrad I, Duke of Franconia, was elected as the first king of the East Franks; and still others look to the coronation of Otto I, king of the East Franks, in 936, or to his imperial coronation in Rome in 962 as the country's birthdate. It is clear, however, that by the end of the 10th century the four East Frankish peoples – the Franks, Swabians, Bavarians and Saxons – formed what was known as the land of the Germans (*terra teutonica*). From the 11th century such terms as *regnum Alamannae*, *regnum Germaniae*, *Teutonicae* or *Romanorum* were encountered frequently enough in contemporary historical accounts to conclude that a German land did exist. However, any account of German history must commence with Charlemagne, whose reign marked the beginnings of what was later to become known as the First Reich; by 800 Charlemagne's empire included much of present-day Germany and Austria, Switzerland, France, the Netherlands, Belgium and Luxembourg, as well as a narrow strip of northern Spain and most of northern Italy.

During the reign of Pippin the Short (751–68) attempts were made to introduce the Roman liturgy and its chant into the Frankish Church, a policy that was continued with particular vigour by Charlemagne and his successor, Louis the Pious (814–40). Through the efforts of several leading churchmen the various native Gallican traditions were gradually replaced and a single rite and chant repertory established throughout the Empire. Although this repertory was intended to be identical to that sung in the Church of Rome, it is clear from contemporary accounts that by 840 the 'Roman' music taught in the Carolingian Empire had significantly diverged from its origin. This Frankish version of the Roman repertory is known as Gregorian chant (*see* PLAINCHANT, §II). During the late 8th century and the 9th a systematic method of classifying liturgical melodies was developed in Francia based on the eight psalm tones and a means of recording the music evolved in the form of neumatic notation. Many of the earliest surviving sources of notation originate from monastic houses in the Germanic areas of the Empire; the oldest known example (*D-Mbs* clm 9543) is thought to have been written at the monastery of St Emmeram, Regensburg, by the scribe Engyldeo between 817 and 834. Other ecclesiastical centres in the German-speaking lands that are known to have been important in the cultivation of liturgical chant are Aachen (where Charlemagne established his court), Augsburg, Cologne, Einsiedeln, Reichenau and St Gallen. German monasteries also played a significant role in the expansion of the Gregorian repertory and in the development of new plainchant forms (*see* TROPE (i) and SEQUENCE (i)). As early as the 9th century the practice of appending or interpolating long, untexted melismas into pre-existing chants, which seems to have originated in centres in present-day France, made its way to the German-speaking lands in East Francia, especially St Gallen. Here, in the hands of the monk Notker Balbulus (*c*840–912), the sequence repertory was refined. By assigning a syllable of text to each tone of a melisma, Notker produced *sequentiae cum prosae* that were fully syllabic, a style that continued to flourish in Germany and elsewhere throughout the Middle Ages.

German monastic houses also contributed significantly to the development of music theory and pedagogy. The earliest known treatises dealing with polyphony and containing examples of parallel organum are the *Musica enchiriadis* and the *Scolica enchiriadis*, both dating from the late 9th century. Although it is now reasonably clear that these sources originate from a northern part of West Francia (i.e. northern France and the Netherlands), and not from a southern part of East Francia (i.e. German-speaking Switzerland), there is no question that they were produced in the wake of the intense cultural and musical activities fostered earlier under Charlemagne's reign. Many important works on medieval music theory, however, were composed by writers from the Germanic areas of the Empire; they include the treatise and tonary of the Benedictine monk Regino of Prüm (*c*842–915). Written in about 900, this tonary is one of the largest that is still extant. Other theorists of the 10th and 11th centuries, many of whom lived in the Rhineland, were Hucbald, abbot of St Amand (*c*850–930), Berno, abbot of Reichenau (*d* 1048), Hermannus Contractus, also of Reichenau (1012–54) and Wilhelm of Hirsau, a monk of St Emmeram (*d* 1091), who, like his contemporaries, wrote on the species of intervals and their relationship to octave scales and the eight church modes. Although these theorists all wrote in Latin, several works dating from this period were written in German. The earliest treatises on music in German have been attributed to the monk of St Gallen, Notker Labeo (*c*950–1022). Among Labeo's five essays in Old High German, his treatise on the measurement of organ pipes is especially noteworthy in that it represents one of the first in a long line of works on this subject written by German speakers.

Aside from the many medieval German writings on plainchant, mode, the monochord and organ building, one of the most important theoretical discussions of polyphony and of mensural notation can be attributed to the German-speaker Franco of Cologne (*fl* mid- to late-13th century), who, while working in Paris, established a system of musical notation in his *Ars cantus mensurabilis* that formed the foundation upon which mensural notation emerged. Franconian notation, however, had little influence on the musical scene of medieval Germany. Only one of the eight extant copies of Franco's treatise is of German origin (*F-SDI* 42, ff.43–53*v*), and this one is late, dating from the 14th century. Indeed, there is little evidence of Franco's writings having any influence in Germany or, for that matter, that Germans had any interest in composing polyphony until the second half of the 14th century. The Engelberg Codex 314, written predominantly by the monks Walter Mirer and Bartholomaeus Fridower between about 1360 and 1400, contains examples of polyphony, as does the Mondsee-Weiner

Liederhandschrift (*A-Wn* 2856), which dates from around 1460 but contains polyphonic songs written at least a half a century earlier by the Monk of Salzburg (*fl* late 14th century). However, these examples of German polyphonic writing were isolated and, compared to their French counterparts, primitive. That polyphony was slow to develop in Germany could be attributed to the fact that Germany, unlike France, was slow to develop as a unified nation. By the 13th century France had a centre of commerce and of culture, wherein the so-called Parisian organum of Notre Dame and the motets of the Ars Antiqua flourished. Germany, on the other hand, had at this time no commercial or cultural centre, nor a musical genre that it could call its own. It is true that the earliest vernacular hymns developed from Gregorian chant (e.g. *Christ ist erstanden* and *Nun bitten wir den heiligen Geist*), as well as some important liturgical dramas with music (e.g. Hildegard of Bingen's *Ordo virtutum*), are of German origin. Yet when one compares these musical accomplishments with those produced in France at this time, they are neither progressive nor particularly original. Ironically, under the Ottonian (919–1024), Salian (1024–1125) and Hohenstaufen (1138–1254) dynasties, it was Germany, not France, that was the pre-eminent power in Europe in the Middle Ages. But the German empire was inherently weak, because it was too large to be effectively ruled. Rivalry between the Welf and the Hohenstaufen dynasties further abraded the empire and, from the beginning of the 13th century when France grew predominant in Europe, Germany became a power vacuum controlled by territorial princes, several of whom looked to France for their cultural inspiration. However, despite the political chaos of the Hohenstaufen period, the population of Germany grew from an estimated eight million in 1200 to around 14 million in 1300, and the number of towns increased tenfold. Indeed, it was at this time that German cities like Augsburg, Cologne and Nuremberg began to develop, and a prosperous merchant class began to emerge. Within the walls of these urban centres civic bands were formed, a class of professional singers developed, dance halls were built and penitential processions of flagellants heard who, in the wake of the Black Death of 1349, sang *Geisslerlieder* for their salvation. A number of German universities that are still renowned centres of scholarship were also founded at this time. They included not only Prague (1348), but also the universities of Vienna (1365), Heidelberg (1386) and Leipzig (1409). Here music was taught in the context of the Quadrivium to a new class of professional bureaucrats, lawyers and secular scholars, including Johannes Klein, whose extant books document the musical interests and abilities of this 15th-century Leipzig professor.

As universities began to replace monasteries as centres of learning in the 14th century, we also see castles and secular courts replacing ecclesiastical communities as centres of culture. Growing out of this courtly life, German medieval literature reached its peak in the narrative epic poems of Tristan, Parzivâl and the Nibelungenlied as well as in the lyrical love poetry of the Minnesinger. These German poet-musicians of noble birth produced a monophonic song repertory that unquestionably represents the primary manifestation of German music during the high Middle Ages, though they were inspired by French troubadours. Yet the MINNESANG differs considerably from its French counterpart. While

1. Papal chapel divided into two groups at the consecration of Oddone Colonna as Pope Martin V, 1417: miniature from Ulrich Richental's 'Chronik des Konstanzer Konzils' (Rosgartenmuseum, Konstanz)

both the French and German texts are amorous or idyllic, the German texts tend to be more narrative and devotional, with many in praise of the Virgin. The German melodies are demonstrably more modal and, given their narrative style, often take on extensive proportions which, in turn, make the rhythms of the trouvères difficult to apply. The French refrain forms are replaced in the German repertory by both the *Leich*, derived from the French lai, and the bar form, derived from the French ballade, the latter of which, with its Stollen (section a) and Abgesang (section b), became the dominant form for the Meistersinger and Tenorlied composers of the 15th and 16th centuries. Among the more prominent Minnesinger were Walther von der Vogelweide (*c*1170–*c*1230), Neidhart von Reuental (*c*1180 – after 1237) and Heinrich von Meissen (*d*1318), whose many poems in praise of courtly women and of the Virgin earned him the nickname 'Frauenlob' ('Praiser of women'). Manuscript transmission of the poetry dates from the 13th century, the primary source being the Manesse Codex (*D-HEu*), whose illuminations demonstrate that the Minnesang was

accompanied by instruments. Manuscript transmission of the music, however, dates from the 14th and 15th centuries, with the sources preserved in Jena (*D-Ju* El.f.101, Jenaer Liederhandschrift), Munich (*Mbs* Cgm 4997, Colmar Liederhandschrift) and Vienna (*A-Wn* 2701, Frauenlob Codex or Wiener Leichhandschrift) being the chief witnesses. Since polyphony was slow to develop within the German-speaking realm, it is not surprising that a monophonic song repertory continued to flourish in Germany far longer than elsewhere in Europe. By the beginning of the 15th century Hugo von Montfort (1357–1423) was still writing monophonic songs in the Minnesang tradition. By the end of the century, a middle-class version of this noble art emerged in the hands of the Meistersinger. These conservative songwriters, whose activities could be heard especially in the civic singing schools of Augsburg and Nuremberg, organized themselves into GUILDS. Its most famous practitioner was the Nuremberg craftsman Hans Sachs (1494–1576; fig.2).

As the Minnesang tradition died out and the MEISTERGESANG tradition began to take root in the first half of the 15th century, we see for the first time German musicians like the Monk of Salzburg taking an active interest in polyphonic composition, as evidenced by the contents of the Mondsee-Wiener Liederhandschrift (*A-Wn* 2856) and by the earlier Strasbourg manuscript (*F-Sm* C.22) copied around 1410, but destroyed by fire in 1870. Indeed, it seems to be no coincidence that around the same time German speakers began composing polyphony, foreign composers who wrote polyphony began appearing in large numbers at German courts and chapels. In the 1440s, for example, we find Johannes Brassart and Johannes de Sarto on the payroll of the Habsburg Emperor Friedrich III, the father of the famous Weisskönig Maximilian I. These two Netherlandish composers are important because they represent the first in a long line of foreign musicians who served Habsburg rulers of the Holy Roman Empire. It is also at this time that we begin to see large amounts of Burgundian and English music, both sacred and secular, appearing in German sources. The Aosta manuscript, the St Emmeram Codex, the Trent Codices and the Buxheim Organ Book, as well as the songbooks of Schedel, Glogau and Lochamer demonstrate that Germans had good musical taste. These sources also show that German-speakers were not yet able to compose music of their own that was of the quality of the music they were collecting. The German songs preserved in the Liederhandschriften contain all the distinctive signs of the emerging German Tenorlied, with its bar form and Hofweise sung by the tenor voice. Yet a song like the anonymous *In feurs hitz* from the Glogauer Liederbuch clearly lacks the refined handling of melody, rhythm and texture brought later to the genre by the Netherlands composer Henricus Isaac and his Swiss-born student Ludwig Senfl. Together, these composers transformed the Tenorlied from its woodcut-like texture into a sophisticated hybrid combining German and Franco-Flemish techniques. As Franco-Flemish and Burgundian songs began to appear in 15th-century German sources, we also see the Tyrolean knight Oswald von Wolkenstein creating German translations and contrafacta of this foreign song repertory, a tradition that continued in German-speaking lands well into the 17th century. At the same time, and with the same repertory, we also see Conrad Paumann transcribing the music of Du Fay and his contemporaries into German organ tablature, and later see Hans Judenkünig transcribing the next generation of foreign music into tablature for the lute. The interest in having foreign songs sung in German or performed on instruments that

2. Poster announcing a Singschule meeting at St Katharina, Nuremberg, with a portrait of the Meistersinger Hans Sachs, the competition rules and the poem to be sung by everyone

were plucked, blown, touched or bowed softly was related to the needs of a burgeoning merchant class, whose influence on German music history would prove decisive from the beginning of the 16th century onwards.

By the late Middle Ages, a macroeconomic change was clearly underway in central Europe. It entailed a steady shift from ecclesiastical goods to worldly goods, from a feudal system to a mercantile system, from an agrarian economy to a sophisticated urban society that promoted international trade and fostered investment in emerging technologies. In short, it signified the beginning of the capitalist world. This macroeconomic shift had a profound effect on the business of making, performing and transmitting music in early modern Germany. However, it must be emphasized that, with little more than 1% of the population musically literate, it was a business that at best could be categorized as microeconomic.

Between 1450 and 1550 musical culture in the German-speaking lands entered a new phase. During this period the region cultivated a polyphonic soundscape that could be classified for the first time as not only truly 'Germanic' but also musically sophisticated. By the middle of the 15th century, for example, the region witnessed the birth of its first important 'school' of polyphonic composers, represented by Adam von Fulda, Heinrich Finck and Paul Hofhaimer. Together, these three played a significant role in establishing the German Tenorlied as a viable genre, which finally secured Germany a respectable place among the musical nations of Europe. They also adapted the Franco-Flemish style of composition to secular and sacred music alike, and in so doing brought this 'new art' to the German courts, universities and cities where they were employed. At the court of Frederick the Wise of Saxony and at the newly founded University of Wittenberg (1502), Adam von Fulda took the lead. At the court of Duke Ulrich of Württemberg, it was Heinrich Finck. Finally, and perhaps most importantly, it was the internationally renowned keyboard virtuoso Paul Hofhaimer, working together with the Flemish master Henricus Isaac, who raised the level of music making to new heights in Germany at the court of Maximilian I. In the hands of Hofhaimer's many students, including Hans Buchner, Dionisio Memo and Wolfgang Grefinger, Hofhaimer's legacy and Germany's position as a land endowed with some of the best instrumentalists began to emerge. Aside from Hofhaimer and his school of 'Paulomines', Arnolt Schlick, Sebastian Virdung and Hans Neusidler set new standards in instrumental music. German instrumentalists like the Schubingers and German-made instruments produced by the Neuschel family were in demand outside Germany in much the same way that Franco-Flemish composers of vocal music were sought after in Germany and throughout Europe.

German speakers were also integral to the development of music printing as a viable commercial industry. In addition to the immense impact they had on the printing of chant from woodblock during the second half of the 15th century, they played an important role in the development of printing mensural music from type in the first half of the 16th century. Very soon after the Venetian printer Petrucci released his alphabet series of polyphonic songs between 1501 and 1503, the Augsburg printer Erhard Oeglin issued polyphonic settings of Horace's odes (1507) and the Basle printer Georg Mewes published four masses of Jacob Obrecht (*c*1510). Likewise, as volumes of frottolas and *strambotti* rolled off Italian presses during the second decade of the century, the publishing houses of Oeglin, Schoeffer and Arnt von Aich were also releasing large and important collections of German Tenorlieder. There were not only for courtly consumption but also for the educated *nouveaux riches* of German society, among whom were such dynastic houses of 'corporate' finance as the Fuggers, Welsers and Herwarts of Augsburg. By the third and fourth decades, when such printers as Attaingnant and Gardano were busy marketing the new style of chanson and madrigal by Sermisy and Arcadelt, the Nuremberg publishing houses of Petreius, Berg and Neuber, and Formschneider were busy printing the new style of German Tenorlied by Ludwig Senfl and his contemporaries, together with other music by a wide range of composers. In the case of the Nuremberg printer Johann Petreius, this included, in addition to the Tenorlied, chansons, madrigals, psalms, masses, motets, hymns, sequences, antiphones, odes, instrumental dances and intabulations, as well as numerous excerpts from these and other genres printed as examples in theoretical discussions.

The diversity of music printed by Petreius is matched by the diversity of the composers. Of the 172 represented, only 60 were German-speaking. While their reputations ran the gamut from important figures of the imperial court orbit (e.g. Hofhaimer and Senfl) to Kleinmeister attached to local parish churches (e.g. Rupert Unterholtzer), the remaining 112 international composers were mostly seasoned professionals whose talents were appreciated throughout Europe's emerging international economy. They hailed from France, Italy and the Low Countries and included such celebrated figures as Ockeghem, Obrecht, Josquin, Sermisy, Arcadelt, Verdelot, Gombert and Willaert. Indeed, if one compares the output of German music printers with that of contemporary French, Italian and Flemish printers, three aspects emerge which generally set German music printers apart. They published a repertory that was far more international in scope; they printed the works of composers whose careers spanned collectively nearly a century of Western music history; and they issued more pedagogical volumes intended to teach the art of singing to students at local Latin schools or, indeed, to anyone who could read Latin. Nikolaus Listenius's *Musica*, Georg Rhau's *Enchiridion* and Sebald Heyden's *De arte canendi* were the first in a long line of practical music texts which appeared in the wake of the German Reformation.

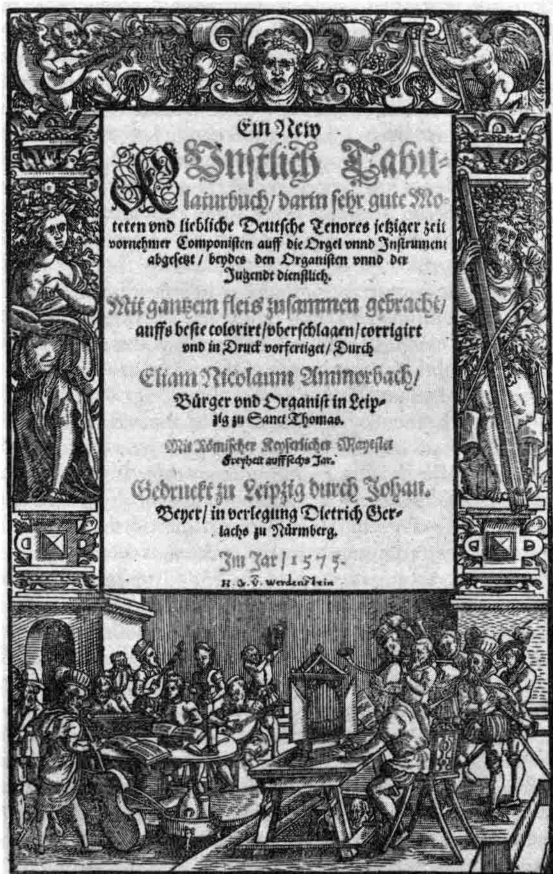
Few people, and even fewer events, had such an impact on Germany as Martin Luther and his Reformation. Aside from causing religious, political and socio-economic upheaval, it was of musical significance in that the role of music was redefined both in terms of the Lutheran service and the Christian way of life in general. Unlike the Swiss reformers Zwingli and Calvin, who either banished music altogether or restricted its use in their reformed services, Luther saw music and theology as inextricably woven together. In keeping with his principle of congregational participation, his main vehicle for the delivery of the Word of God was the Protestant hymn, which was to be sung in the vernacular to simple, tuneful melodies. For his texts Luther resorted chiefly to Roman Catholic hymns, which he (or his collaborators) translated into German. These included *Nun Komm der Heiden Heiland*, a reworking of the *Veni Redemptor gentium*, and *Komm*

Heiliger Geist, a translation of *Veni sancte spiritus*. Aside from capitalizing on a well-known Latin repertory, Luther relied heavily on the German folk tradition. *Gelobet seist du, Jesu Christ* and *Nun bitten wir den Heiligen Geist* were either altered or considerably extended by Luther, whilst the famous 11th-century hymn *Christ ist erstanden* was completely rewritten to form *Christ lag in Todesbanden*. Luther also created newly composed hymns such as *Nun freut euch, lieben Christen g'mein* and *Ein' feste Burg ist unser Gott* (*see* LUTHERAN CHURCH MUSIC). By 1523 broadsheets containing German hymns complete with melodies were printed in Wittenberg. In 1524 the 'Achtliederbuch', a collection of 40 monophonic hymns, over half of which were written by Luther himself, was issued in Nuremberg. This important publication was soon followed by numerous others which appeared not only in Nuremberg and Wittenberg, but also in Leipzig, Strasbourg, Worms and Erfurt. Although the Protestant chorale was conceived as a monophonic tune, it was quickly reworked into polyphonic settings by Johann Walter (i) who, working closely with Luther and the Wittenberg printer Georg Rhau, published the first polyphonic collection of Luther's hymn repertory (*Geystliches gesangk Buchleyn*, 1524).

Walter's partbooks, as well as others issued later by Rhau, were clearly intended for choral use in school and in church. Yet the complex polyphonic textures one finds in these collections would certainly have alienated most of Luther's musically illiterate congregation. Indeed, it was not until 1586, when Lucas Osiander published his *Fünffzig geistliche Lieder und Psalmen*, that Luther's dream of congregational singing began to be fully realized. Here Osiander took the melody and placed it in the descant voice and then adopted a simple homophonic style in the accompanying lower parts to support it. Osiander's more user-friendly 'cantional' style was embraced by Sethus Calvisius (*Harmonia cantionum ecclesiasticarum*, 1597), Hans Leo Hassler (*Kirchengesäng: Psalmen und geistliche Lieder*, 1608) and Samuel Scheidt (*Tabulatur-Buch hundert geistlicher Lieder und Psalmen*, 1650) and later reached its zenith in the chorale harmonizations of Bach (*see* CHORALE).

There is no question that Luther played an important role in shaping the curricula of musical education in the modern age and in establishing congregational singing in church. Yet his reformed music still remained heavily dependent on the traditional style of polyphony cultivated by Roman Catholic composers. For example, much of the so-called 'Protestant' music of Martin Agricola, Sixt Dietrich and Balthasar Resinarius is not remarkably different from music written by such Catholic composers as Arnold von Bruck, Lupus Hellinck, Ludwig Senfl and Thomas Stoltzer. Indeed, soon after the Peace of Augsburg was signed in 1555 (a treaty that granted equal rights to Lutherans and Roman Catholics alike), one begins to detect a reaction against congregational singing among some Protestant German strongholds. Latin again asserted itself. More complex polyphony began to be written by such composers as Jobst vom Brandt, Gallus Dressler and Matthaeus Le Maistre, who in 1554 succeeded Johann Walter as Kapellmeister to the Elector of Saxony in Dresden.

In fact, throughout the second half of the 16th century the lines of demarcation between Protestant and Catholic music often become blurred, as Protestant composers wrote music in Latin, and Catholic composers set Protestant German texts. This duplicity is perhaps best illustrated by the career of the Protestant organist Hassler who, while employed by the Catholic banker Octavian Fugger, wrote in all sacred genres, Protestant as well as Catholic, in German as well as in Latin. Indeed, Hassler's collected works, when taken together with those of the Bavarian court composer Lassus, demonstrate how 16th-century musicians were able to adapt to 'free market forces' by diversifying their portfolio of musical assets.



From the Peace of Augsburg in 1555 to the outbreak of the Thirty Years War in 1618, Germany enjoyed a period of relative peace. At the same time, it witnessed the beginning of an economic decline compounded by rampant inflation. As the European economy shifted westward to the Atlantic states of Spain, France, England and the Low Countries, in search of such precious commodities as gold, silver and sugar from the New World, Germany was no longer at the centre of European commerce. Consequently, the thriving economies of many German towns in the late Middle Ages and in the first half of the 16th century gradually dried up. Germany as a whole entered a long period of economic recession that continued well into the 19th century.

Although Germany's musical culture continued to flourish, its main practitioners were no longer composers like Senfl, writing in a style demonstrably German. Rather they were foreigners or native Germans who, like the Minnesinger before them, drew heavily on foreign influence. From the Netherlands came Lassus, who settled in Munich; Le Maistre, who moved to Dresden; Phillipe de Monte, who resided in Prague; and Jan Pieterszoon Sweelinck who, while never leaving the Low Countries, had an immense impact on several generations of German organists. From England came John Dowland, William Brade and Thomas Simpson, each of whom resided at German courts.

The most important influence, however, came from Italy, first with instrumental music and then the introduction of the madrigal and villanella. From the mid-1560s to the end of the century, expatriates and native Germans alike published collections of German songs which were so heavily influenced by the style of the villanella and madrigal that, but for the language of their texts, they were virtually indistinguishable from their Italian originals. The popularity of this new Italian style, which ultimately resulted in the collapse of the German Tenorlied, is evidenced not only by the makers of this music but also by its consumers. As early as 1566, the catalogue of Raimund Fugger's music library in Augsburg recorded about 70 prints of Italian madrigals and villanellas. By 1586, when virtually the whole musical establishment of the Munich court hailed from Italy, Johann Heinrich Herwart, another Augsburg patrician and merchant, had 200 printed volumes of this Italian secular song repertory in his collection. These madrigalian songs were enjoyed not only at the courts and private homes of Germany's élite, but also by its middle-class citizens. This is evident from the activities of the Musicalische Krentzleins-Gesellschaft of Nuremberg founded in 1568; from the collection of Italian music amassed by the Danzig merchant and bibliophile Georg Knoff; and from the German keyboard music belonging to the lawyer Christoph Leibfried, who singlehandedly created hundreds of intabulations of this Italian vocal repertory for his own

enjoyment while living in Würzburg, Tübingen and Basle between 1585 and 1600.

Apart from the madrigal and villanella craze, German enthusiasm for foreign music, especially Italian, is evident in the reception of monody, of the concertato principle and *stile rappresentativo*, and of instrumental music. 'The result of this assimilation of foreign influences', as Christoph Wolff noted, 'was a plurality of styles in German Baroque music not found in any other European country.' That such Italian innovations as monody, figured bass and concertato were adopted in Germany more quickly than anywhere else and continued unabated well into the 17th century can be attributed to the strong trade routes that developed between the two countries, and especially between the cities of Venice and Nuremberg, the so-called 'German Venice'. By 1620 the new style of Italian music could not only be heard throughout most of Germany, but read in theory as well. In the monumental treatise *Syntagma musicum* (1614–19), Michael Praetorius analysed the implications of the new style in remarkable detail. What one read in his treatise could be heard in his *Musae Sioniae* (1605–11), a veritable encyclopedia of chorale arrangements ranging from simple harmonizations to sensational polychoral settings in the Venetian style.

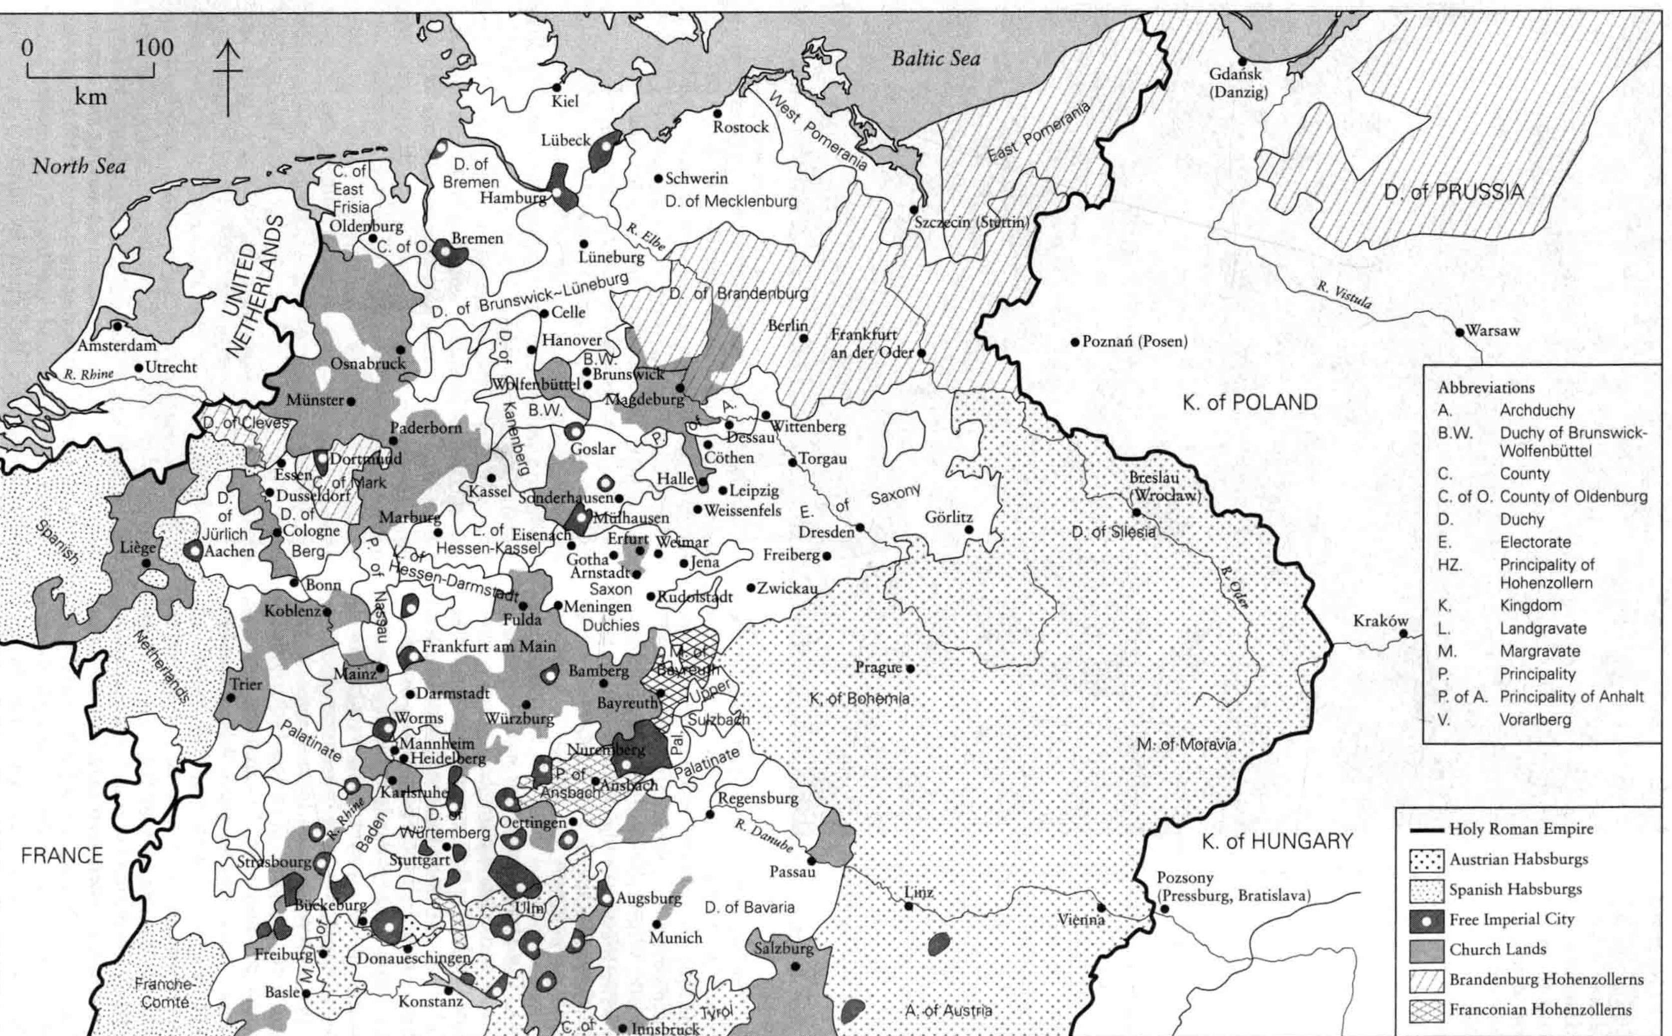
3. *Title-page of Ammerbach's 'Ein new künstlich Tabulaturbuch', printed by Johannes Beyer (Nuremberg, 1575); the volume contains instrumental transcriptions of vocal pieces, and the title-page engraving suggests that wind and string instruments were used with the organ in ensembles of the period*

However, the most important German practitioner of the Italian style was the Venetian-trained composer Heinrich Schütz, one of Giovanni Gabrieli's favourite students. In his first great work of German church music, the *Psalmen Davids* (1619), Schütz adopted the polyphonic concertato style of Gabrieli in compositions for two, three and four choruses with instruments. In his *Kleine geistliche Concerte* (1636–9) he demonstrated his ability to handle modern monody. In the *Geistliche Chor-Music* (1648), a retrospective collection of polyphony, Schütz succeeded in doing the apparently impossible by combining *stile antico* with *stile moderno*. And in the three instalments of his *Symphoniae sacrae* (1629, 1647 and 1650), he proved that each one of these different styles and approaches to composition could co-exist. That German music soared to unprecedented heights in the works of Schütz could also be attributed in part to the delight that he derived from setting German speech rhythm within the musical-rhetorical context of the *musica poetica*. The relationship between text and music found in his vocal works represents as perfect a union of words and music in the German language as was ever achieved.

The first half of the 17th century also witnessed important developments in the history of German keyboard music, especially as the already highly developed German organ came to assume a leading position within the church. At this time, three regional schools of organ playing emerged: a southern school conditioned by the Italian influence of Gabrieli and Merulo; a northern school influenced by the unique English-Dutch style of Sweelinck; and a central school around Samuel Scheidt, Sweelinck's student in Halle.

It was with Scheidt that the central style of German organ music came into its own. In his epoch-making *Tabulatura nova* (1624), Scheidt abandoned traditional German organ tablature and the colourist style of Leipzig's Elias Nikolaus Ammerbach (*Ein new künstlich Tabulaturbuch*, 1575), and in its place adopted a fresh new approach to composition which he transcribed into Italian keyboard *partitura*. Within this modern notational framework employing a separate staff for each voice, Scheidt composed variations on chorales, secular songs and dances, produced chorale fantasies and wrote elaborate fugues. His music marked the beginning of a new age in German organ composition that was to continue up to the death of Bach. In harpsichord music, German keyboard composers also looked to Italy and France for examples on which to base their works, as is evident in the music of Johann Jacob Froberger, who combined the bold harmonic language of his teacher Frescobaldi with the delicate *agréments* of French dance music.

The musical accomplishments of such dominating figures of the early German Baroque as Schütz, Scheidt and Schein are unquestionable. Yet to appreciate their achievements fully and to place them within a context, account must be taken of the Thirty Years War (1618–48) through which they lived. Schütz wrote only vocal music. Yet in the case of this vocal music, as in that of Scheidt and Schein, sacred music far outnumbers secular works. This to some extent underscores the differences between German and Italian musical life and the circumstances that produced these differences. As Italy staged spectacles of music, dance and drama in a peaceful political climate, Germany was devastated by three



4. Music-making in a Nuremberg garden: painting from the family album of Hans Ludwig Pfintzing, gouache, 1600 (D-BAs Msc.Hist.176, f.15v)

decades of war. The courts were often impoverished and had to improvise. Citizens were almost always afraid for their lives. Consequently, it seems to be no coincidence that German composers, like Schütz, frequently sought refuge in the south. When they returned, they felt more compelled to write music of religious observation and solace than to write opera. Ironically, *Dafne* (1627), the only opera composed by Schütz, is now lost.

2. 1648–1700. The Thirty Years War was the greatest political, economic and cultural watershed in the German territories before World War II. Pomerania, Mecklenburg, Thuringia and parts of Saxony, the Palatinate and Württemberg lost about half their population; Brandenburg, Hesse, Franconia and Swabia lost a third, while the Catholic south-east and Protestant north-west remained largely spared. However, the speedy recovery of most urban areas after the war, assisted by very swift demographic growth in the second half of the 17th century, created favourable conditions for the rapid regeneration of cultural life in towns, cities and courts. A large number of cultural centres emerged within a wide variety of political structures which remained fundamentally stable until 1803. Some of these centres were free imperial cities or trading centres such as Hamburg, Lübeck, Frankfurt, Leipzig and Nuremberg, others were small principalities under ecclesiastical or secular rule, others again were territorial states. The variety of the cultural structures themselves and the rivalry between them encouraged mobility, stylistic diversity and a receptiveness to outside influences. These factors are all evident in German music of the time, with its eclecticism and readiness to adopt foreign styles, forms and techniques, a process which was to lead to J.J. Quantz's famous discussion of the 'mixed' or 'German' style in his *Versuch einer Anweisung die Flöte traversière zu spielen* (1752); according to Quantz, this 'German' style derived from a combination of the best elements of the music of other nations.

The wide variety of German musical culture in the 17th and 18th centuries, which had no counterpart in other countries, was further increased by two specific phenomena: the schism between the mainly Protestant north and the mainly Catholic south, and the co-existence until well into the 18th century of the most up-to-date music from outside Germany (especially Italy) with the continuing traditions of the 16th century. In short, the varied development of music in Germany during the 17th and 18th centuries arose from religious, political and economic conditions: differences between Catholic and Protestant regions on the one hand, and between rural, urban and court musical cultures on the other.

We have very little direct information about the music of the lower classes, although a certain amount can be inferred from literature, the visual arts and (in the 19th century) folksong collections. We can be sure, however, that there was much singing, music-making and dancing in towns and villages during the 17th and 18th centuries, both in daily life and on festive occasions. Many performances were also given by itinerant musicians, often war veterans, who played the dulcimer, bagpipes

5. Map of central Europe, c1648, at the end of the Thirty Years War

and fiddle. The novels of Grimmelshausen, in particular *Simplicissimus* (1669), present a vivid picture of such musicians. There was some blurring of the distinctions between traditional music, expecially folksong, and melodies composed by professional musicians, particularly for hymns in which the whole community could join. Akin to the simple hymns were numerous sacred songs in which poets deplored the troubles of the times and expressed their hopes for modest happiness on earth and bliss in the life to come. The 17th century was a century of song in Germany; some 10,000 sacred poems were written and about 3000 of them set to music. Notable Catholic poets included Friedrich von Spee and Angelus Silesius; their Protestant equivalents were Johann Rist and Paul Gerhardt. Silesius collaborated with the musician Georg Joseph, who was in the service of the Prince-Bishop of Breslau and wrote melodies for most of Silesius's poems. The poems of Rist and Gerhardt were sung to both new and traditional hymn tunes, and sometimes had more elaborate settings with basso continuo. The most important composers of such songs included Johannes Crüger, S.T. Staden, Andreas Hammerschmidt, Johann Schop (i), Thomas Selle and Heinrich Scheidemann.

The extraordinary flowering of sacred song in the 17th century reflected the need of many people, particularly in the towns, for spiritual consolation, while the dissemination of more musically demanding songs attested to the new culture of middle-class music-making, combining the tradition of the strophic song with such Italian innovations as the basso continuo. The same is true of secular song, which also flourished in the second half of the century; its principal exponents included Heinrich Albert and Johann Sebastiani of Königsberg, the court Kantor J.P. Krieger of Weissenfels and the organist Andreas Hammerschmidt of Zittau.

Hymn-singing was not the only link between the musical cultures of town and country in the 17th century. Lay choirs were formed to sing sacred music on the model of the urban Kantorei (and encouraged by the progressive spread of literacy), and lay musicians made up instrumental ensembles to play at festivals and ceremonies for a fee. Resentment of these lay musicians by professional town musicians led to a number of decrees towards the end of the century stating that only performers of sacred music might 'serve' within a parish.

In urban musical culture the traditions and organizations of the 16th century persisted independently of all stylistic change, especially in Protestant areas. (17th-century urban musical life was richer and more varied in Lutheran than in Catholic regions, and the role of music was naturally even smaller in Reformed Church areas.) The town musicians, who regarded themselves as a kind of guild, played for ceremonial occasions such as festivals and civic receptions and signalled the hours from church towers. They also performed in church and at private ceremonies. Their 'official' instruments were cornetts and trombones, with some string instruments, although initially these were not highly regarded. Oboes were added at the end of the century. Sacred music was provided by the Kantor and the organist, and the Kantor would very often teach at local schools. At the bottom of the musical hierarchy in Protestant towns was the choir of *Kurrende*, schoolboys who walked the streets singing for alms, a custom not abolished until the middle of the 18th century.

The development of urban musical life organized in this way depended directly on the economic power of the town or city concerned. It found its clearest expression in the creation of collegia musica, which incorporated the scholarly and humanistic ideals of the Italian academies and frequently concerned themselves with language and poetry as well as music. The first collegia musica had been founded in the 16th century, particularly in Nuremberg, the leading commercial metropolis of its time. After (and in some cases during) the Thirty Years War they were concentrated in trading cities that had been spared in the hostilities (Nuremberg, Elbing, Königsberg) or had made a swift recovery (Sagan, Görlitz, Memmingen, Leipzig). Königsberg was a special case because of the literary and musical talents in the circle around Simon Dach and Heinrich Albert. The musical societies of Frankfurt and Hamburg were notable for their swift acceptance of the latest music from Italy. They were financed by merchant patricians, and in Hamburg the musical society was a joint stock company. Nuremberg was almost the only place where the 16th-century tradition of music printing continued, although on a small scale. Music was generally transmitted in manuscript form, in marked contrast to the situation in Italy; and musicians, working in near-isolation, tended to produce music for specific local conditions. These circumstances hardly favoured stylistic uniformity, as did the different conditions prevailing in the 18th and especially the 19th centuries. On the other hand, the small scale and the diversity of these musical 'urban landscapes' meant that a composer had considerable scope to develop his individuality.

The reception accorded to foreign music, particularly from Italy, differed from genre to genre and from region to region, as did the nature of its adaptation to native German forms. Adaptation was most successful where older German traditions could be fused with the new, for instance in motets in the style of Palestrina and in the sacred madrigal, sung predominantly in Latin in the Catholic south and in German in the Protestant north (examples include Schütz's *Geistliche Chor-Music* of 1648 and works by Hammerschmidt, W.C. Briegel and others). Out of these genres grew the polychoral motet designed for special occasions, a tradition leading from Sebastian Knüpfer and Johann Schelle through Johann Michael and Johann Christoph Bach to its culmination in the examples of J.S. Bach. The transformation of Italian traditions into the chorale concerto and choral cantata of northern and central Germany derived entirely from the role of sacred song in Protestant divine service, a development that had begun with Praetorius and was continued by Schein, Scheidt, Knüpfer and Buxtehude right through to J.S. Bach; the extension of the form by adding free textual commentary between the chorale verses shows that the sacred song had a central position in the Protestant church.

At the same time the cantata not based on a chorale was developing, with texts in German or Latin in the work of such composers as J.C. Kerll in Munich and Christoph Bernhard in Dresden and Hamburg (both of them pupils of Carissimi), the Dresden Kapellmeister Vincenzo Albrici and M.G. Peranda, and Matthias Weckmann, David Pohle, Dieterich Buxtehude and F.W. Zachow, the teacher of Handel. The cultivation of sacred concertos and *symphoniae sacrae* (a term first used by Schütz) for small forces originally reflected the needs of

6. Collegium musicum: frontispiece from Johann Martin Rubert's 'Musicalische Arien erster theil' (Stralsund, 1647) for voices and instruments

musical ensembles in and directly after the war (as in Schütz's works of 1629, 1647 and 1650), just as the development of large-scale works, chiefly in the Carissimi tradition and including *historiae* (the Christmas and Easter stories) and Passions, is symptomatic of the recovery of some of the large Protestant courts, such as Dresden, and the relative prosperity of cities such as Breslau that had been little affected by the war. The composition of *historiae* seems to have been concentrated in central Germany (Schütz in Dresden) and eastern Germany (Tobias Zeutschner and others in Breslau). The Passion, a specifically Protestant genre and far more ambitious musically than the unassuming Catholic Passion music of the period, was widespread throughout central and northern Germany in the 17th and early 18th centuries. The genre included works by Schütz, Selle, Sebastiani, Johann Theile and J.V. Meder, reaching its culmination in the Passions of J.S. Bach. In the early 18th century the Passion oratorio developed in the progressive musical atmosphere of Hamburg. Keiser set the Passion poems of C.F. Hunold in 1704 and of B.H. Brockes in 1712; further settings of the Brockes text were composed by Telemann in 1716, Handel in 1716–17, Mattheson in 1718, G.H. Stölzel in 1720 and J.F. Fasch in 1723. Oratorios on subjects other than the Passion scarcely spread beyond the imperial court in Vienna; *Das jüngste Gericht* (*c*1680), attributed to Buxtehude, was a special case and had no perceptible influence. Sacred opera seems to have provided a substitute, but today its merits can be assessed only from the librettos of C.C. Dedekind and from accounts of performances.

Although it is difficult to draw strict distinctions between the history of musical composition in towns or cities and at court, some genres were clearly associated with the development of court culture. Those German courts that had emerged relatively unscathed from the Thirty Years War, like the electoral court of the Palatinate at Heidelberg, took advantage of a new start to look towards the French court of Louis XIV, which had become a paradigm for all Europe. However, the influence of French court music proved limited, probably because Italian influence on court music in Germany had become too deeply ingrained since the last third of the 16th century, and perhaps, too, because Italy, with its many small states and cities, provided an inexhaustible supply of musicians who were willing to travel, while the centralized court culture of France attracted all talents to Versailles. The few German courts that followed the French musical model included Celle and, at various times, Hanover, Schwerin, the court of the Palatinate at its alternative residence of Düsseldorf, and the court of the Margrave of Baden in Schlackenwerth and later in Rastatt. The types of music cultivated at a particular court were largely dictated by the taste and the economic circumstances of the ruler himself.

Hardly any musical genres were exclusively confined to courts in 17th-century Germany. An exception was the Italian chamber duet, whose principal exponent was Steffani. Concertante canzonets and concertante madrigals were written and performed at court, but the Kantor of the Thomaskirche, Sebastian Knüpfer, also composed such works; the chamber cantata was not cultivated in Germany until the end of the 17th century, and then by urban composers such as Keiser in Hamburg (1698 and 1717).

The situation is particularly complex in opera, ballet and *Singballett*, where French and Italian influences coincided with various attempts to create a German-language opera. These genres were chiefly performed at courts, in line with the widespread taste for French court culture, in which ballet, *opéra-ballet* and opera played a prominent part. Stylistically, however, only the ballet obviously imitated French models. Municipal opera on the Venetian model developed only in a few large commercial cities; those with opera houses of their own were Hamburg (from 1678 to 1738), Nuremberg (from 1668) and Leipzig (from 1693). In 1690 Duke Anton Ulrich of Brunswick tried to make opera both a highly subsidized form of court theatre and an economic enterprise in the form of a joint stock company (as in Hamburg), but without lasting success. Indeed, success eventually eluded Hamburg too. In the second half of the 17th century many halls were fitted out as theatres in the princely castles, *Komödienhäuser* were built for both spoken and music drama, and magnificent opera houses were constructed at the great courts (Munich, 1654, Dresden, 1667, Stuttgart, 1674, and Hanover, 1689).

The spread of the *Singballett* in Germany preceded that of opera, and as in opera (with his *Dafne*, 1627, Torgau), Schütz created the prototype: *Orpheo und Euridice* (1638, Dresden). The original programme indicates the work's stylistic syncretism, typical of opera in 17th-century

Germany: it was 'written in German verse . . . composed in the Italian manner . . . performed in ten ballet dances' (i.e. probably with French choreography). The Dresden court had given the lead and was followed – in each case with occasional works written for specific events at court – by Wolfenbüttel in 1646, Gotha in 1649, Gottorf in 1650, Altenburg in 1652, Celle in 1653 and Stuttgart and Brunswick in 1660.

Operatic style was shaped by the individual tastes of the princes who paid for opera, by the taste of the middle-class public in the cities and by the Kapellmeister themselves, who probably wielded greater influence here than in other genres of court music. This, combined with the large number of opera houses and competition between courts and cities which often entailed enticing famous Kapellmeister from one appointment to another, resulted in a plurality of styles. The style of J.S. Kusser, who had studied with Lully in France, left its mark on the repertory successively in Ansbach, Brunswick, Hamburg and Stuttgart; and at courts with a French-orientated musical culture, composers were encouraged to introduce French elements into their operatic style (as Steffani did in his works for Hanover and Düsseldorf). However, the repertory at most courts was predominantly Italian. The mixed forms produced for commercial reasons in Leipzig and Hamburg contained arias in the Italian style sung in Italian interspersed with recitatives in German.

In the last third of the 17th century efforts were made to develop an independent type of German opera sung in German. Musically, it was based on the Italian model, but it also included French elements. The first German operas were isolated works such as Schütz's *Dafne* and S.T. Staden's *Seelewig* (1644, Nuremberg). In most places the German and Italian and/or French repertories existed side by side; in many (for instance, in Darmstadt early in the 18th century) there were performances of German and Italian operas and French plays. In addition there were translations of French and Italian librettos, and Italian operas were performed in German translation (the six three-act works by Steffani, performed in Hamburg in 1695–9). The main centres of attempts to develop German opera were Altenburg (until 1738), Ansbach (from 1665), Bayreuth (1662–1726), Brunswick (1690–1730), Dresden (from 1671), Darmstadt (from 1673), Durlach (from 1712), Gotha (1681–1744), Hamburg (1678–1738), Leipzig (from 1693), Meiningen (1702–7), Nuremberg (from 1679 to *c*1685), Neuburg an der Donau (from 1678), Weissenfels (from 1680), Wolfenbüttel (from 1655) and Zeitz (from 1711). The final flowering of this type of German opera was in Rudolstadt in 1729–54. Elsewhere it was superseded around 1740 by the international system of Italian opera.

The development of instrumental music after the Thirty Years War was characterized by the gradual reduction of the variety of forms and ensembles of the 16th and early 17th centuries, and by the influence of Netherlands, French and Italian models, from which independent forms and genres emerged towards the end of the century. Instrumental music was performed at court (solos and ensembles), in church (organ music) and to a lesser extent in towns and cities (ceremonial music, especially for wind instruments, and domestic chamber music). Lute music on the French model was primarily a courtly genre, although it was also written for domestic performance (Esaias Reusner (ii) in Brieg and Berlin; S.L. Weiss in

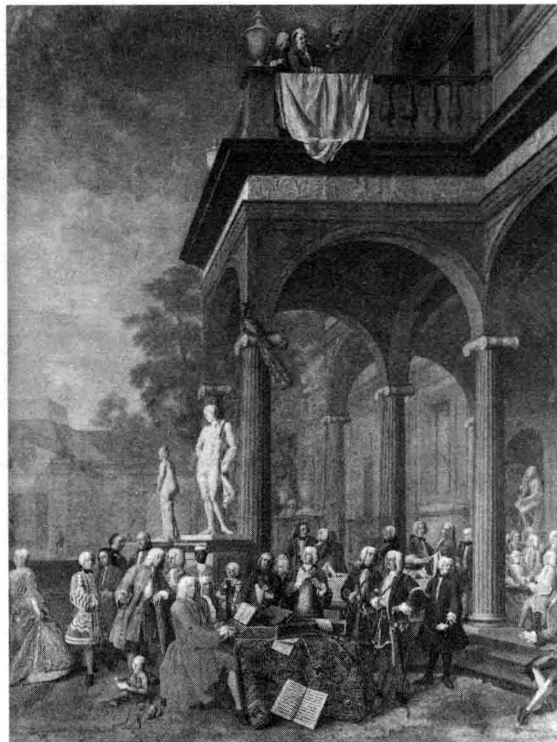
Dresden). Italian influence dominated ensemble music. It was produced in large quantities, some of it for courts, some for the urban middle class (for instance, for the collegia musica and student musical societies). There was no strict line of demarcation between the sonata and the suite based on French dances in the work of such composers as Johann Rosenmüller and J.R. Ahle. The trio sonata did not become fashionable until the 18th century, in the wake of general European enthusiasm for Corelli; in the late 17th century, however, a number of trio sonatas were written by Reincken, Krieger, P.H. Erlebach and Buxtehude.

Not surprisingly, French influence was most pronounced in the ensemble or suite for several instrumentalists or solo performer, and in dance collections for ensembles, primarily intended for court performance but also written for the urban middle class. Keyboard music, also on the French model, saw the development of the keyboard suite and of an idiomatic harpsichord style (J.J. Froberger, Matthias Weckmann and Fischer). Gottlieb Muffat, with his ensemble suites and concerti grossi synthesizing the models of Lully and Corelli, stands alone, an epoch-making figure comparable to Buxtehude in the north. Muffat's work marks the beginning of the great period when French and Italian music merged to create the characteristics of a 'German' mixed style, as defined by Quantz (see above), which reached a peak in Telemann and J.S. Bach.



In the 17th century organ building and organ composition developed particularly in northern Germany, an area little affected by the Thirty Years War. The prime influence here was the work of Sweelinck, with whom Scheidt, Jacob Praetorius (ii) and Heinrich Scheidemann studied in Amsterdam. Organ composers of the next generation included Reincken and Matthias Weckmann.

17th-century German organ music reached its peak in the works of Buxtehude and Johann Pachelbel, with their wealth of forms and techniques, their independent and virtuoso treatment of the pedal, and their exploitation of the uniquely wide range of stops in the organs of north German organ builders such as Gottfried Frizsche, Friedrich Stellwagen, Jonas Weigel and, in particular, the internationally renowned Arp Schnitker.

3. 1700–1806. The musical history of the German-speaking territories in the 18th century – leaving aside Austria and Switzerland, which followed paths of their own in line with local conditions – can be best understood by examining a number of significant aspects. Courtly musical culture centred on a few large courts, generally absolutist and influenced by the Enlightenment, while the many smaller courts were historically less important. Urban middle-class musical culture developed above all in the wealthy cities; new forms of communication evolved, and there were rapid developments in music written for domestic performance. Protestant church music declined after the middle of the century (which by chance coincided with the death of Bach), while Catholic church music continued to flourish.

These developments went hand in hand with what Quantz saw as the stylistic synthesis achieved in the first half of the century and the emergence of new forms and genres in the second half. The courts concentrated on Italian *opera seria*, which became the established norm in the first half of the century, while the German Singspiel developed after 1750. Instrumental music came to the fore with the genres of the concerto, symphony and sonata, composed on Italian models but with ever-increasing independence. Above all, there was a general stylistic change after the 1720s, when German music became a productive rather than a merely receptive force for the first time in its history. This development was fostered by the fact that outstanding individual artists could make their influence more widely felt through new, improved forms of communication (music journalism, music publishing and concert tours). Such musicians included Telemann, Johann Stamitz and C.P.E. Bach. In terms of musical history J.S. Bach, for 27 years Kantor at the Leipzig Thomaskirche, seems to stand alone, and his work influenced no major composer before Mozart and Beethoven. The vigour of German musical culture and the outstanding achievements of individual composers should not, however, disguise the fact that late 18th-century developments that would have a far-reaching effect on the future of music took place on the periphery of the German-speaking lands. Indeed, Viennese Classicism should be regarded as neither a German, nor even an Austrian, but as a purely Viennese phenomenon.

Most of the courts that were musically active in the 17th century continued to cultivate music, depending on their finances and the taste of the prince. New courts emerged with important musical establishments, notably the court of the princes of Thurn and Taxis in Regensburg and the court of Oettingen-Wallerstein. However, they were all outshone by the three royal residences at Dresden, Berlin and Mannheim. From the 1720s Dresden became a major centre for new Italian instrumental music (especially that of Vivaldi) and its assimilation by such composers as Bach and J.G. Pisendel. With the opening of Daniel Pöppelmann's opera house in 1719 until 1763, *opera seria* and the music of the court church flourished

8. 'Concert at Schloss Ismaning' by Peter Jacob Horemans, 1731 (Bayerisches Nationalmuseum, Munich)

in Dresden, especially in the Hasse-Bordoni era (1731–63). Even after this date Italian opera and italianate church music remained important and exerted an influence far beyond Dresden itself. The Italian court opera of Dresden survived as an institution until 1832. In the late 18th century the music of the Dresden court church developed an established repertory which included earlier works such as those of Hasse. Elector Friedrich August was a practising musician himself, and the Dresden court was one of the first places where the new Viennese repertory of Haydn and Mozart found an appreciative audience.

Matters were quite different in Berlin, which had very quickly become a great metropolis, its population growing from about 20,000 in 1688 to 172,000 around 1800. Court and civic culture were closely linked in the city, and music flourished at court, principally under Frederick the Great (1740–86) and to a lesser extent under Friedrich Wilhelm II (1786–97). Frederick the Great, himself a talented and prolific composer and librettist, promoted both *opera seria* and modern Italian instrumental music; his encouragement of opera was also politically motivated, since he sought to outshine the absolutist magnificence of the Dresden court opera. For similar reasons, the king took a close and detailed interest in the productions staged at the opera house built by his court architect G.W. von Knobelsdorff and opened in 1742. The court musicians of Berlin included a number of major talents, although none of Hasse's significance and international reputation: C.H. Graun, J.F. Agricola and J.F. Reichardt in opera, Quantz, Franz and Georg Benda and J.G. Graun in instrumental music. Aside from Reichardt, the leading

musician to write for Friedrich Wilhelm II was Boccherini, who became his court composer.

The situation in Mannheim was different again. The city was unique in that musical activity was overwhelmingly centred on the court and depended entirely on a single ruler, Elector Carl Theodor of the Palatinate, who had little in common with Frederick the Great save a liking for playing the flute. Mannheim had been almost entirely destroyed in the Thirty Years War, and after a brief period of recovery was then devastated in the War of the Palatine Succession in 1689. The court of the Palatinate did not move back to the city until 1720. In 1742 the opera house built in the castle by Alessandro Galli-Bibiena was inaugurated, ushering in a period when opera and instrumental music flourished at court. There were more major virtuosos and composers working for the Hofkapelle than for any other musical ensemble in Europe, with Carlo Grua and Ignaz Holzbauer at the opera, and works commissioned from J.C. Bach, Jommelli, Traetta and Giuseppe de Majo. The members of the orchestra, besides Holzbauer from Vienna, included Johann Stamitz from Bohemia and his pupil Christian Cannabich, who was a brilliant orchestral trainer, C.J. Toeschi, F.X. Richter from Bohemia, Anton Fils from Bavaria, Ignaz Beck, Ignaz Fränzl, and Anton and Carl Stamitz. Other names that deserve mention are those of Franz Danzi and Peter Winter, who both studied composition with the Abbé Vogler. The fame of the Hofkapelle was spread by musical visitors to Mannheim, not least Charles Burney. The fact that its composers drew on varied European traditions probably contributed to the creation of a new style in Mannheim which made full use of the opportunities offered by a virtuoso orchestra. Mannheim musicians made a crucial contribution to the development of the symphony, in particular; and the treatment of the orchestra in Mannheim influenced many composers, including Mozart and Weber. The performances given from 1754 onwards by Mannheim virtuoso instrumentalists in Paris caused a sensation; subsequently the Mannheim School had a decisive influence on concert life there, notably with the new genre of the symphonie concertante which Carl Stamitz introduced to the French capital. This was the first time the influence of German music had extended beyond the German-speaking countries. Finally, there was a significant movement towards German opera in Mannheim, connected with the founding of an Academy of Sciences, and of the Nationaltheater in 1779, in emulation of similar efforts in Vienna. The great period of Mannheim court music came to an end early in 1778, when Carl Theodor succeeded as ruler of Bavaria and moved his court to Munich.

In terms of musical history, the three major German cities of the 18th century were Hamburg and Leipzig, with their commercial prosperity, and Berlin, a royal residence, an administrative seat and a middle-class metropolis. Hamburg, as a trading seaport, was much influenced by London; Leipzig was an international trade fair centre; and Berlin profited from the enlightened climate of the court and its role as the capital of a rapidly expanding power. Forms of public music-making tried and tested in London were further developed in Hamburg: civic ceremonies were repeated for a paying public, public concerts featured appearances by touring virtuosos, charity concerts were given, journalism flourished in Mattheson's and Scheibe's musical periodicals, and works were published by subscription. Musical enthusiasm was widespread among a relatively large class of wealthy patricians and merchants, and was at the root of the shift away from scholarly works of musical theory written for professionals, towards well-informed musical writings for the *galant homme*. Two of the greatest German composers of their day, Telemann and C.P.E. Bach, also lived and worked in Hamburg for several decades.

Leipzig came to rival Hamburg in musical importance in the second half of the century. In the first half of the century musical life in Leipzig was dominated by vocal and instrumental church music, in particular the music of J.S. Bach and by student and middle-class collegia musica. In line with the spirit of the Enlightenment, L.C. Mizler von Kolof tried to establish music (including musical history) as a department of study at the university, and founded the *Neu eröffnete musikalische Bibliothek* (1736), the journal of the Societät der Musicalischen Wissenschaften, in direct competition with Mattheson in Hamburg. The importance of church music declined after the death of Bach, but in 1743 a group of merchants founded a public concert organization to supersede the collegia musica. This organization in turn was replaced by the concerts of J.A. Hiller in 1778, and these were followed in 1781 by concerts organized by the city and given in the newly reconstructed Gewandhaus. At the end of the century Leipzig had 14 concert societies and was unequalled for its flourishing concert life.

The internationalism of Leipzig was particularly evident in the development of opera in the city. After the closure of the German opera in 1720, travelling theatrical companies such as those of Mingotti, Locatelli and Nicolini gave guest performances of the Italian repertory during the Leipzig fairs. An adaptation of the English ballad opera *The Devil to Pay* was performed in 1743 in Berlin and 1750 in Leipzig; the local poet C.F. Weisse then retranslated the work which, with new music by J.C. Standfuss, became the prototype of a new vernacular genre: the Singspiel. Leipzig was the major centre of Singspiel up to the foundation of the Stadttheater in 1817 and was visited by the theatrical troupes of Koch, Bondini and Seconda, as well as Domenico Guardasoni's company, which brought the Italian repertory to the city between 1782 and 1794.

But the most important development of all was in music publishing. A city famous for its trade fairs was the ideal location, and the leading figure in this field was J.G.I. Breitkopf, with his new system of printing notation (1755) and his music trade which collected and sold works from all over Europe. The firm became Breitkopf & Härtel in 1795, and in 1798 founded the influential *Allgemeine musikalische Zeitung*. In 1800 the rival firm of Hoffmeister & Kühnel was founded, publishing as *Bureau de musique* simultaneously in Leipzig and Vienna. The scene was set for Leipzig to become Europe's most important centre of music publishing.

After the accession of Frederick the Great in 1740 and the flowering of musical culture in Berlin, there was a fruitful interrelationship, sometimes with a competitive edge, between court and civic musical life. The music of the court remained strongly orientated towards Italy and Italian opera. Private and public concerts of sacred and secular music were held from the 1720s, organized by court and cathedral musicians, and the influence of the Sing-Akademie, founded in 1791, extended far beyond

Berlin itself. From about 1750 men of letters (K.W. Ramler, C.G. Krause), theorists (F.W. Marpurg) and composers developed the ideal of the simple, sensitive quasi-folksong with keyboard accompaniment, a genre further developed by the group of composers known as the Berlin Lieder School. The combination of theory and practice and a rationalistic character typified the vigorous musical journalism of Marpurg, Krause, Quantz and C.P.E. Bach, which culminated in J.G. Sulzer's encyclopedic *Allgemeine Theorie der schönen Künste* (1771–4). Notable musical figures in Berlin were Princess Anna Amalia, Frederick the Great's youngest sister, and J.P. Kirnberger, who became her Hofkapellmeister in 1758. A fervent champion of the contrapuntal tradition against the *galant* style, he collected an extensive music library for the princess, including autograph manuscripts by J.S. Bach and works by Handel and Palestrina. Musical attitudes, and musical journalism, in Berlin were markedly conservative in any case, and these tendencies were further reinforced by Kirnberger and his circle. While the conservative attitudes that prevailed in Berlin were regarded (not least by Haydn in his autobiographical sketch of 1776) as inimical to the development of the new language of instrumental music that reached its peak in Viennese Classicism, the music-making that reflected those attitudes helped to create a historically based public concert repertory, exemplified in the programmes of the Sing-Akademie that culminated in the rediscovery of the *St Matthew Passion* in 1829.

After the 1720s there was an increasing distinction between styles in line with the functions of different musical genres. The new style developed most obviously in the *galant* keyboard piece and the undemanding song for social and private entertainment, especially in middle-class circles. More demanding chamber music for private or public performance by accomplished amateurs and professionals either imitated widely accepted models or combined Italian and French styles and genres, as in Telemann's *Musique de table* (1733). Similarly, the French suite and the Italian concerto were sometimes kept strictly separate (in works by Bach, Telemann and many others), or sometimes combined into hybrid forms, as, again, in many works by Telemann. The trio sonata, a 'learned' genre *par excellence*, and the quartet sonata deriving from it, both of them north German specialities, remained the 'touchstone of a true contrapuntalist' (Quantz) even when their contrapuntal idiom was infused by *galant* elements.

Sacred vocal music and organ music also adhered to the Baroque tradition, but became less important in Protestant areas in the second half of the 18th century; Bach's cantatas and organ works were anachronisms even in their own time, although the type of cantata pioneered by the poet and theologian Erdmann Neumeister was a relatively modern form. The tradition of ceremonial Catholic church music for Mass and Vespers survived unbroken into the 19th century, following the Habsburg and Italian examples. In Protestant Germany, music for divine service was replaced by edifying devotional music influenced by Rationalism and the aesthetic of *Empfindsamkeit*; the prototype for such works was Graun's *Der Tod Jesu*, and later examples include the oratorios of Telemann and C.P.E. Bach. Handel's oratorios, revived in Hamburg in the 1770s and subsequently elsewhere, were also regarded as sacred music to edify the Christian not as the member of a community but as an individual.

In instrumental music two genres dominated the second half of the century: the symphony and, to a lesser extent, chamber music with keyboard obbligato. The string quartet played a surprisingly small part, although the quartets of Haydn, in particular, were performed to enthusiastic audiences everywhere. As was true in Italy, the symphony initially grew out of the opera sinfonia; but the genre soon became independent as symphonies were written specifically for chamber or concert performance. Italian influence quickly dwindled as the symphonies of Austrian composers, especially Haydn, became

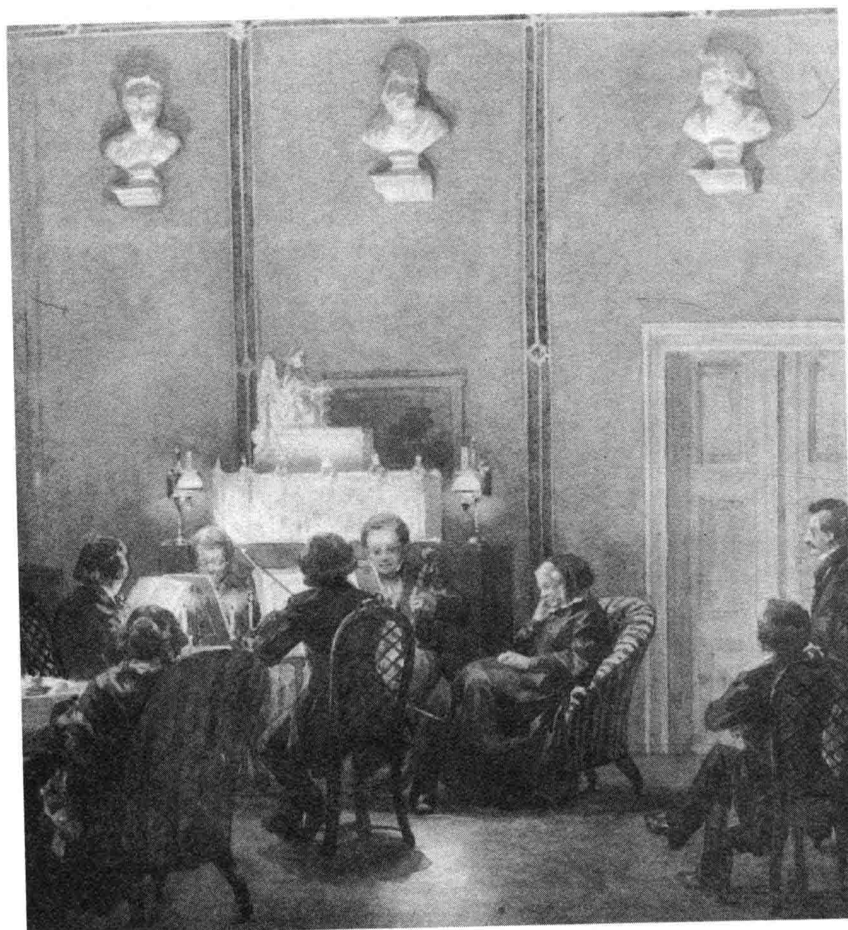
9. Munich court musician with instruments of the Classical orchestra: painting by Peter Jacob Horemans, 1762 (Bayerisches Nationalmuseum, Munich)

increasingly popular. Until the end of the century the symphony in Germany (unlike in France and England) was primarily a court phenomenon, although many symphonies were played in the growing number of concerts for the urban middle classes. The most important symphonists, all of them court musicians, included C.P.E. Bach, J.G. Graun and Franz Benda in Potsdam, J.M. Molter in Durlach, Antonio Rosetti in Oettingen-Wallerstein and Schwerin, Christian Cannabich in Mannheim and Munich and Georg Benda in Gotha. Of these the outstanding figure was undoubtedly C.P.E. Bach, although his style, original to the point of eccentricity and highly rhetorical, does not fit into any general pattern of development. The 'Hamburg Bach' was also idiosyncratic in his chamber and keyboard music, which far surpassed anything produced by his contemporaries.

In a country as enamoured of theory as Germany, it was inevitable that the body of instrumental music composed after the stylistic changes around 1720 should be defined within a theoretical system. Elements of traditional rhetoric were used at first, relating an apparently autonomous form back to the rhetorical arts (Mattheson, Joseph Riepel and H.C. Koch). The rhetorical theory of form was abandoned in the early 19th century in favour of ideas from English musical aesthetics and formal theory going back to Shaftesbury (as formulated by Charles Avison, Adam Smith and A.F.C. Kollmann). These ideas, deriving from theories of architecture and the visual arts, were concerned with the analytical understanding of instrumental forms of music, and were developed by C.G. Krause (*Von der musikalischen Poesie*, 1752), Moses Mendelssohn (*Über die Empfindungen*, 1755), Leonhard Euler (*Lettres à une princesse d'Allemagne*, 1768), in various writings by J.C. Forkel, and above all by C.F. Michaelis (*Über den Geist der Tonkunst*, 1795; *Zweyter Versuch* . . ., 1800; *Über die wichtigsten Erfordernisse und Bedingungen der Tonkunst*, 1805). In the writings of E.T.A. Hoffmann these theoretical ideas were combined with the Romantic aesthetic of feeling.

4. 1806–1918. The official end of the Holy Roman Empire in 1806 was a less significant date in musical history than the Edict of the Deputation of the German Estates of 1803. The dissolution of many small courts and the closure of most monasteries, with their wealth of musical culture, set in train a process of cultural standardization that continued until the founding of the German Reich in 1871. Culturally, Austria became further and further removed from Germany, although Austrian, or rather Viennese, influence on German music (as opposed to the other arts) increased enormously, through Haydn, Mozart, Beethoven and Schubert, and later Brahms, Bruckner, Mahler and Strauss. These developments were fostered by industrialization, the accumulation of wealth in the big cities, the German Customs Union of 1834 and greatly improved communications. The musical landscape changed rapidly in the first half of the 19th century, although the Napoleonic Wars and the failed revolution of 1848–9 had remarkably little influence on the structures of musical life. The second half of the century was an era of consolidation, and the end of World War I in 1918 brought no essential change to musical institutions and public musical life.

Important social developments included the spread of musical culture among the urban middle classes, the increasing numbers of cities where music played an important role, and the standardization of musical culture, together with its separation from mass culture. As music at the princely courts diminished, music-making in the cities became increasingly dominant. After the Wars of Liberation in the second decade of the century, political conflicts between court and bourgeois society could still manifest themselves through opera, as in the confrontation between Spontini and Weber at the première of *Der Freischütz* in Berlin in 1821. Kaiser Wilhelm II's attempts to mould the opera and theatre of Berlin to suit his own tastes were strongly criticized by the public and particularly the press, a force to be reckoned with by 1900. The musical interests of rulers now held sway at only a few, usually minor, courts such as Weimar, which became a musical centre principally through Liszt and his circle and retained that status until the abdication of the grand dukes in 1918, and Meiningen, particularly under Duke Georg II (ruled 1866–1914), who made the Hofkapelle a model institution with an up-to-date repertory and retained the court theatre for the performance of classical German drama.



Court opera aside, musical life in the major German cities during the 19th century was much as it is today. Opera, ballet and drama, and later operetta, were performed in municipal theatres that were usually subsidized by the civic authorities. The repertory was international and the large music publishing houses (particularly Schott in Mainz) published translations of foreign-language works, both Italian and French (*opéra comique* and the grand operas of Meyerbeer). German opera did not feature significantly until the time of Wagner, when there was an increase of national feeling in music generally, especially after 1860. Opera featured far more prominently in musical life than in the 18th century because it now reached large sections of the population, and its significance was reflected in the building of many municipal opera houses and some magnificent court opera houses (notably in Dresden). This development reached its peak in the economic boom after the founding of the Reich in 1871.

Rivalling opera in popularity were the public concerts given by the orchestras of opera houses, by independent orchestras, by local or touring ensembles (especially string quartets), by visiting virtuosos and sometimes by touring ensembles such as the Meiningen Hofkapelle. Concerts were often performed in handsome buildings containing a large concert hall and a more intimate hall for chamber music (as in the new Leipzig Gewandhaus, opened in 1884).

Growing prosperity also brought a rise in domestic music-making, which stimulated the composition of lieder, piano music and chamber music (fig.11). Domestic music-making also encouraged the industrial manufacture of pianos on the American model, and piano factories were opened by Bechstein in 1860, Blüthner in 1864, Grotrian in 1865 and Steinway in 1880. The rapidly growing popularity of the piano, however, meant that the needs of amateur pianists (and singers) had to be met with the mass production of technically and aesthetically undemanding music. In reaction to all of this, attempts were made towards the end of the century to introduce reforms, through a higher standard of private music-teaching, through popular music libraries intended to supersede the purely commercial lending institutions,

through educational writings and through public campaigns against 'cheap trashy music'. Public music libraries to which anyone could have free access were founded in many cities after 1894. Conservatories, organized privately or by the civic authorities, had been providing professional musical training since the founding of the Academisches Musikinstitut in Würzburg in 1804. Until 1871 there were only a few foundations in the major musical centres (in Berlin in 1822 and 1833, in Leipzig in 1843, in Munich in 1846, Cologne in 1850 and Dresden and Stuttgart in 1856).

After 1871, however, there was a boom in the creation of conservatories, as there was in the building of theatres. By far the most influential conservatory was in Leipzig, which, under the directorship of Mendelssohn and his successors, attracted composition pupils from all over Europe, particularly Scandinavia and Russia, and from the United States. In general, the high standards of institutionalized musical education did as much as the great composers, conductors and interpreters to ensure the worldwide reputation of 19th-century German music.

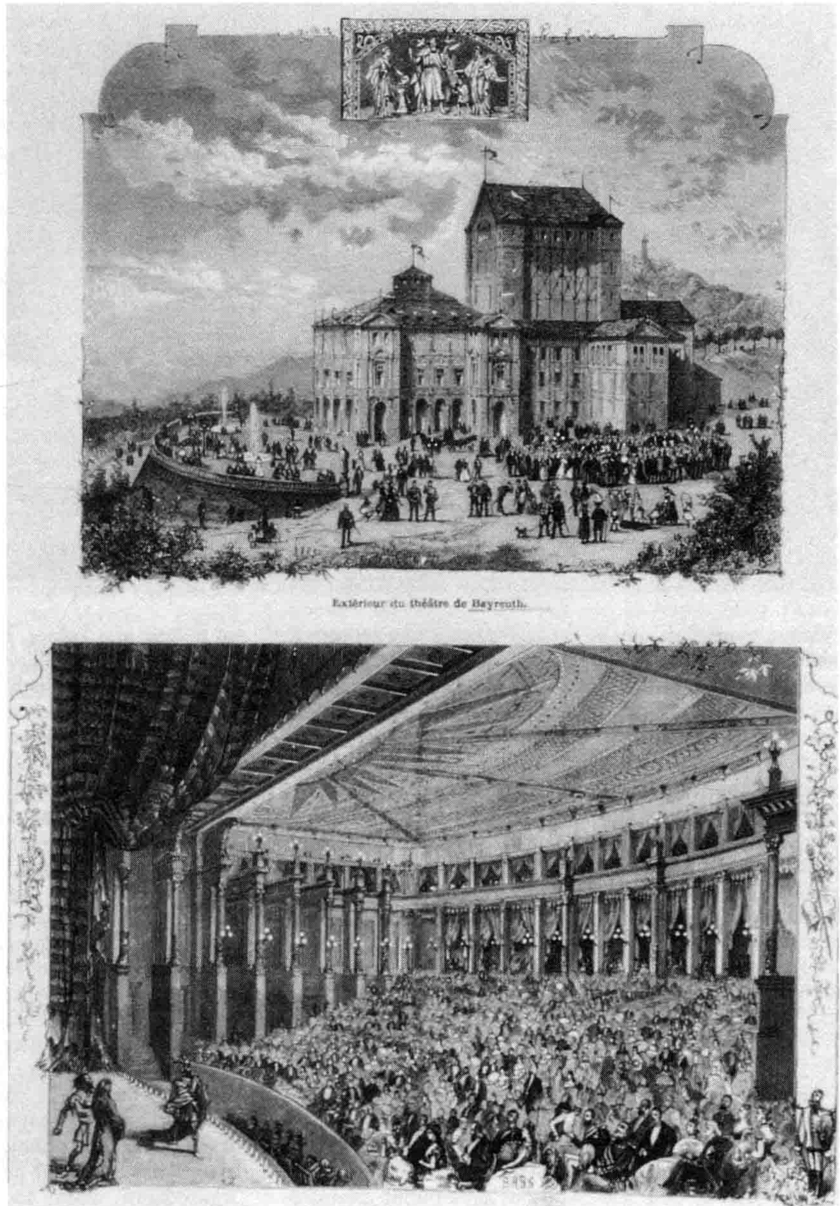
The musical and intellectual climate of 19th-century Germany was also shaped by the growth of music publishing, music journalism, music theory and aesthetics, and the acceptance of musicology as an academic discipline. German music publishing firms dominated large sections of the market in Europe and in the USA; they played an important role in the dissemination of mass-produced music and in the spread of musical education through the cheap editions published from 1864 by Litolff, Peters and Breitkopf & Härtel, and the miniature scores published by Payne and later Eulenburg. One far-sighted music publisher, Oskar von Hase, was also active in promoting musical copyright. The major musical periodicals, mostly belonging to the large publishing firms, greatly influenced public opinion and taste, often employing a partisan approach deplored by many composers, including Brahms and Bruckner.

The 19th century, a period of progress and belief in science, saw the construction of the last comprehensive systems of music theory, from A.B. Marx to Hugo Riemann and Heinrich Schenker. Musical aesthetics and the philosophy of history were shaped by philosophical aesthetics. Franz Brendel, who made Schumann's *Neue Zeitschrift für Musik* the mouthpiece of modern German music, was influenced by Hegel; Wagner and Nietzsche by Schopenhauer; the hermeneutics of Hermann Kretzschmar and Arnold Schering by Dilthey. Musicology also developed independent concepts of the aesthetics of autonomy (Eduard Hanslick, 1854) and the aesthetics of heteronomy (Friedrich von Hausegger, A.W. Ambros and Otakar Hostinský). The profound changes of attitude to composition that occurred in the years before World War I were accompanied by the pioneering writings of Busoni and A.O. Halm. All these developments were of great significance to the German-speaking countries, in particular Germany itself, ever ready to indulge in speculation and theory. However, they had little effect elsewhere in Europe or in the USA. The growth of musicology, deriving from a historical view of the repertory, had been prepared by the first major works of musical history (Kiesewetter and Ambros) and biography (Otto Jahn, Friedrich Chrysander, J.G. Gervinus and Philipp Spitta), and by memorial publications and scholarly critical complete editions of Bach, Handel, Palestrina, Mozart, Schubert, Beethoven, Schütz and Lassus.

The establishment of musicology in universities began with the appointment of musical directors who could lecture on the history of music as well as carrying out their more practical musical duties; they included J.N. Forkel in Göttingen and D.G. Türk in Halle, both appointed to their posts in 1779. The first professorship was the appointment of Carl Breidenstein to Bonn in 1826; Berlin followed suit in 1830 with A.B. Marx, Munich in 1865 with K.F.L. Nohl, Leipzig in 1872 with Oscar Paul and Strasbourg in 1875 with Gustav Jacobsthal. The first full university lectureships were awarded in Vienna in 1856 (Eduard Hanslick) and in Heidelberg in 1860 (Nohl). However, the subject was not fully recognized until professorial chairs and institutes were founded: in Vienna in 1898 (Guido Adler), in Bonn in 1915 (Ludwig Schiedermair) and in Halle in 1918 (Hermann Abert). German musicology attracted foreign students for many decades, and was a model for the development of the subject in other European countries and the USA. Only with the Nazis did Germany lose its pre-eminence in the field of musicology.

During the 19th century traditional folksong continued to decline, though this decline was partly counteracted by the efforts to renew folksong in the wake of Herder's writings (see §II, 4 below). In urban areas folksong was replaced by such genres as the street ballad, which saw its heyday in the 19th century, stimulated by the production and distribution of broadsheets. Offshoots of the street ballad were the political song and the worker's song, the latter reaching a peak under the Weimar Republic. The male-voice choir movement was also political in origin, and it was in a spirit of patriotism that Zelter founded the Berlin Liedertafel. The new democratic impetus was especially strong in student choral societies; Metternich described the male-voice choir as the 'plague from Germany', and had it suppressed in Austria. After the failure of the 1848–9 revolution, the middle-class male-voice choir adapted more and more to the prevailing circumstances and became a merely social institution.

The rapid standardization of an increasingly commercialized middle-class musical culture after the 1830s encouraged the dissociation of the more challenging genres of art music from any functional purpose, placing them in a realm of quasi-autonomous art, as postulated by the aesthetics of Romanticism. Such functional genres as church music became less important, despite such attempts at historically inspired reform as Cecilianism in the Catholic church and its Protestant counterpart in Prussia. The standardization of musical culture also brought with it the increasing importance of generic norms and the growing influence of the works of the acknowledged masters. Schumann's Piano Quintet had its counterpart in the Piano Quintet of Brahms, and together they inspired an explosion in the genre during the second half of the century, including the Piano Quintet of César Franck, written partly in protest against the hegemony of German music.



That hegemony, against which opposition had been developing in neighbouring countries since around the middle of the century, was dominated by instrumental music. German operas hardly travelled abroad at all during the first part of the century; the success of *Der Freischütz* in Paris was an exception. The situation

12. Procession at the National German Choir Festival held in Nuremberg in 1861: lithograph; the placards mark the individual choral societies, or 'singing associations', from all parts of Germany, particularly Bavaria

changed only with the European influence of Wagner, whose early works are a perfect example of the way German operatic composers adapted foreign models: *Die Feen* can be viewed as a German Romantic opera and *Das Liebesverbot* as an *opéra comique* (Wagner himself thought it an Italian *melodramma*), while *Rienzi* draws on the models of French and Italian grand opera. *Der Freischütz* itself owes much to *opéra comique* and attained the status of a national opera for political reasons as much as for its Romantic forest setting. However, it was through its stylistic syncretism that Romantic opera became a specifically German genre in the works of Weber, Spohr, Marschner, Lindpaintner and other composers, with an offshoot in the *Spielopern* of Lortzing and Flotow, a form of comic opera derived partly from German Singspiel and from *opéra comique*. Romantic opera remained a central part of the repertory even when few new Romantic operas were being composed.

If the works of Wagner's middle period, for all their originality, remained within the genre of German Romantic opera, his works after *Das Rheingold* changed the course of the history not only of opera but of music in general. The Wagner phenomenon, however, extended far beyond music. It was European in nature and encompassed the arts, intellectual thought and even politics. In operatic history, the indirect effects of Wagnerian music drama were greater than any direct imitation. The symphonic leitmotif technique could be transferred to very different genres, including the fairy-tale operas of Humperdinck and Siegfried Wagner, the *verismo* operas of Max von Schillings and Eugen d'Albert, and the fantastic operas of Franz Schreker. The intellectual ambitions of Wagner's librettos from the *Ring* onwards encouraged both the emergence of 'literary opera', culminating in Richard Strauss's *Salome* (1905) and *Elektra* (1909), and the tendency to use opera as a means of examining issues such as the role of the artist in society, beginning with *Die Meistersinger* (1868) and continued in Pfitzner's *Palestrina* (1917) and Strauss's *Ariadne auf Naxos* (second version, 1916). On the other hand, the works of Wagner's direct successors were usually epigonal and in the long term unsuccessful, as in such monumental works as August Bungert's *Homerische Welt* (of which only the tetralogy *Die Odyssee* (1896–1903) was completed), and in operas where ambitious débutant composers declared their adherence to Wagnerism, such as Strauss's *Guntram* (1894) and Pfitzner's *Der arme Heinrich* (1895). Wagner's influence was naturally easier to escape in comic opera, for instance in Cornelius's *Der Barbier von Bagdad* (1858) and Goetz's *Der Widerspenstigen Zähmung* (1874). It was no coincidence that Hugo von Hofmannsthal and Strauss began their stylistic change of direction with a comedy, *Der Rosenkavalier* (1911), although they returned to a Wagnerian type of mythology in *Die Frau ohne Schatten* (1919). The material expense of staging the large-scale works of Wagner's successors

13. Interior and exterior of Wagner's Festspielhaus, Bayreuth, begun in 1872: lithograph by M. Scott from 'Le monde illustré' (1876)

had risen constantly, sustained on a wave of optimism engendered by the apparently stable political and social order of the Reich and the economic boom that had continued unbroken since about 1890. A radical change began before World War I, when German variants of the international movement towards classicism renounced such extravagance; examples of this were Busoni's *Die Brautwahl* (1912), *Arlecchino* and *Turandot* (both 1917), and the *opere buffe* of Wolf-Ferrari, which had their first success on German stages.

In the first half of the century, especially, the decline of church music went hand in hand with the growing popularity of the non-ecclesiastical sacred oratorio, whose finest examples were Mendelssohn's *St Paul* (1836) and *Elijah* (1846). Oratorio was promoted by the choral societies popular at the time, and by festivals such as the Niederrheinisches Musikfest which, in addition to new works, also encouraged the performance of Handel's oratorios, continuing the process of reclaiming Handel as a 'German' composer that had begun in the 18th century. The most important composers of sacred oratorio in the first half of the century, after Mendelssohn, were Spohr, Friedrich Schneider, Bernhard Klein and Carl Loewe. Secular oratorios were much rarer, but included Schumann's *Das Paradies und die Peri* (1841–3) and *Der Rose Pilgerfahrt* (1851). The second half of the century saw a marked decline in the composition of oratorio and such smaller related forms as the choral cantata and choral ballad; the only works of lasting influence were Liszt's *Heilige Elisabeth* (1857–62) and *Christus* (1862–7).

The decline in native German comic opera in the later 19th century, together with the emergence of a mass audience seeking lavishly staged musical entertainment, led to the growing popularity of Parisian and, especially,

14. Design by Alfred Roller for the closing scene of Richard Strauss's 'Die Frau ohne Schatten', Staatsoper, Vienna, 1919

Viennese operetta, and in the final years of the century to the creation of an independent Berlin operetta, incorporating elements of farce, burlesque and even cabaret. The works of the first generation of Berlin operetta composers, who included Paul Lincke, Victor Hollaender, Rudolf Nelson, Walter Kollo, Jean Gilbert and Leon Jessel, remained popular even during the Weimar Republic.

The 19th century was the century of the symphony in Germany *par excellence*, and German symphonic influence extended throughout Europe and to the USA. Romantic musical aesthetics (J.H. Wackenroder, Ludwig Tieck) made the symphony the paradigm of 'pure' instrumental music; E.T.A. Hoffmann, a fervent admirer of Beethoven, postulated on the one hand the autonomy of instrumental music, and on the other the 'transcendental language' of the symphony. This divergence in the aesthetics of the symphony lasted into the 20th century; it is reflected in concepts of the symphony as an instrumental choir (H.C. Koch); as an 'opera of instruments' (Hoffmann) or an instrumental drama; in Wagner's pronouncement that the symphony ended with Beethoven's Ninth; in discussion of the symphony, from Wagner to Paul Bekker and T.W. Adorno, as 'a public discourse to mankind'; and not least in attempts in the second half of the century to reformulate the symphony by incorporating programmatic elements and verbal texts.

The 19th-century symphony grew from the examples of Haydn, Mozart and Beethoven, with the influence of Haydn swiftly declining, the influence of Beethoven shifting from the practical to the aesthetic sphere (except in a few undistinguished imitators), and that of Mozart becoming scarcely perceptible except in the works of Spohr; at the same time, however, Mozart's late symphonies and the symphonies of Beethoven formed the core of an established concert repertory. The German contemporaries of Beethoven, such as Friedrich Witt and J.F.X. Sterkel, modelled themselves on Haydn; Beethoven's direct influence is to be found in the symphonies of Ferdinand Ries and Friedrich Schneider, and the C major Symphony of Wagner (1832). Most composers of symphonies, however, sought to avoid confronting the mighty example of Beethoven, declining a pathetic or heroic tone in favour of a lighter, Biedermeier style, as in the works of Nicolai, J.W. Kalliwoda, C.G. Müller and A.F. Hesse. Other composers, such as Spohr and Lachner, composed symphonies based on a poetic idea, often expanded into an explicit programme. The development of the 'poetic' symphony culminated in the works of Schumann and Mendelssohn. Mendelssohn's Reformation Symphony (1832) commemorated the Augsburg Confession in programmatic terms, while his *Lobgesang* (1840) created in effect a new genre, the symphonic cantata.

Drawing on the examples of Beethoven and Berlioz, Mendelssohn also introduced the concert overture into Germany. It was immediately recognized as a potentially fruitful genre, somewhere between the overture and the symphony, and was cultivated by many composers. The symphonic poems of Liszt (12 works, 1848–57), based on great works of literature, took programme music a stage further and were immensely influential, not only in Germany but also in France, the Czech lands and Russia. Most programmatic symphonies followed Liszt's aesthetic lead in his symphonic poems and *Faust* and *Dante* symphonies, but did not adopt his technical and formal innovations; works such as Anton Rubinstein's Second Symphony, *Ocean* (1857), J.J. Abert's *Columbus* (1865), Carl Reinecke's Second Symphony, *Hakon Jarl* (1875), and, in particular, the 11 symphonies by Joachim Raff (1859–76) expressed their programmes in relatively traditional forms. The claim that a unique form was being developed from programme music, using the most advanced techniques, was fulfilled in the symphonic poems of Strauss who, like Liszt, eventually returned to the concept of the symphony in the *Symphonia domestica* (1902–3) and *Eine Alpensinfonie* (1911–15).

Carl Dahlhaus coined the term 'second age of the symphony' to denote the age of Brahms and Bruckner, beginning with Brahms's First Symphony (1855–76) and Bruckner's Third Symphony (1873–7); but contemporary listeners would have been just as likely to speak of the age of Bruch (three works, 1867–82) or Felix Draesecke (five works, 1868–1912). On the other hand, it was already clear to some perceptive critics that Brahms's First Symphony was something fundamentally new: a direct

confrontation with Beethoven's Ninth Symphony from which Brahms developed a new symphonic style in his second, third and fourth symphonies (1877, 1883 and 1884–5). His younger contemporaries, influenced by the later works rather than the First Symphony, included Heinrich von Herzogenberg, the young Richard Strauss (his Symphony in F minor of 1884), Wilhelm Berger, Felix Woyrsch and Waldemar von Baussnern. The symphonies of Bruckner had very little influence on other composers, an exception in Germany being the three symphonies of Richard Wetz (the first written in 1914–17).

The paradigm 'from darkness to light', developed from Beethoven's Fifth Symphony, determined most of the 'great' symphonies of the 19th and early 20th centuries. It was adopted by most symphonic composers in the tradition of Liszt and Wagner, who included Hugo Kaun, Siegmund von Hausegger, Paul Graener, Paul Juon, Max Trapp, Ernest Bloch and Heinz Tiessen. A change in approach came with the radical subjectivity of the so-called *Weltanschauungs-Symphonie*, where the distinctions between symphony and cantata are blurred (in Mahler's Viennese works and in Germany in J.L. Nicodé's *Gloria!* (1900–04). A reaction to the gargantuan scale and forces of Nicodé's work and Mahler's Eighth Symphony produced works such as the sinfoniettas of Reger (1904–5), Korngold (1912) and Hindemith (1916) and the chamber symphonies of Schoenberg (1906) and Schreker (1917).

Compared with the symphony, chamber music played a relatively small role in the 19th century. Many works for various ensembles were produced for domestic music-making, together with a small group of more demanding works, notably the chamber music of Schumann and Mendelssohn, for performance in the concert hall. As with the Viennese Classical composers, the string quartet was the pre-eminent chamber genre in the first part of the 19th century, giving rise to professional quartets such as that led by Karl Möser in Berlin (from 1813). However, as chamber music moved into the concert hall, the string quartet lost its pre-eminence to chamber works with piano.

Brahms dominated chamber music in the second half of the century to such an extent that chamber music became synonymous with conservatism in music. The works of Brahms and his followers exerted a profound influence throughout Europe; and it was in reaction to this influence that Franck and his circle founded a new French school of instrumental music.

As the importance of the string quartet declined, so did that of the piano sonata, which after the sonatas of Beethoven was regarded as an essentially German genre. The few major 19th-century sonatas, including those by Schumann, Brahms, Liszt and Julius Reubke, are clearly related to Beethoven's late sonatas in their intellectual demands, if not their keyboard techniques. Piano music was dominated quantitatively by virtuoso concert music and light salon pieces, and qualitatively by the poetic piano pieces of Schumann, Mendelssohn and Brahms. Outside Germany, Schumann's works exerted the strongest influence; in the 20th century the late piano works of Brahms were to prove influential through their use of techniques which Schoenberg and his school regarded as avant-garde. Conversely, no area of German music in the 19th century was as open to external influence, above all that of Chopin.

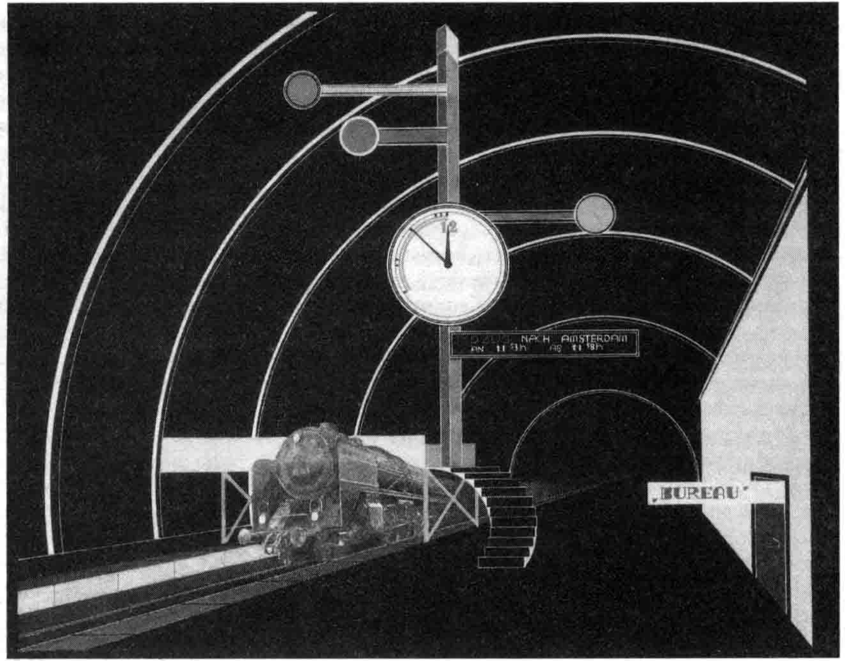
Diametrically opposite was the situation with the lied, so clearly identified as a German genre that the word 'lied' itself was adopted in English and French for this type of German art song. The unique flowering of the genre and the impossibility in principle of transferring it to other national cultures are explained by the way in which German Classical and Romantic lyric poetry came together with a later, poetically sensitive group of composers anxious to make music more lyrical, and by the cultural prominence of Classical and Romantic poetry in the minds of the educated middle classes. In the background, particularly with Brahms, stood the great example of Schubert; Beethoven had inspired the idea of the song cycle itself (*An die ferne Geliebte*, 1815–16). The dependence of the genre on poetry found its clearest expression in the many new settings of the same major lyrics. Its generic development followed the emergence of the lieder recital as a concert form and the lieder singer as a specialist interpreter (for instance Julius Stockhausen).

The linking of the genre to the Classical and Romantic canon of great poetry, however, was at first restricted; in Reichardt and Zelter the connection is evident, especially in setting Goethe, but it is considerably less in Zumsteeg, Loewe, Marschner, Mendelssohn and his sister Fanny Hensel. A consciously literary approach to lied composition began with Schumann, who was also the greatest master of the song cycle after Schubert, and, to a lesser degree, with Robert Franz and Cornelius. As the genre developed, two distinct types of lieder composers emerged: on the one hand those who set great poems by great poets and accepted the principle of textual primacy (Pfitzner and, supremely, Wolf), on the other hand composers such as Brahms, Strauss and Reger who avoided great poetry (notably Goethe) and laid the prime emphasis on broad-spanned melody. It is arguable that lieder represent the finest and most characteristic achievement of 19th-century German music.

5. Since 1918. The defeat of Germany in 1918 plunged the country into a crisis that brought far-reaching changes to political, social and cultural life. There was a general feeling that, as Karl Mannheim put it, 'all ideas were discredited, all utopias subverted'. In music the Expressionism of the Schoenberg school, in particular, rapidly lost its influence, although major Expressionist works such as Schoenberg's one-act opera *Erwartung*, his *Die glückliche Hand* and Berg's opera *Wozzeck* had not yet been performed. The revolutionary sense of liberation from tradition that had accompanied Expressionism in the years around 1910, leading to the disintegration of tonality, yielded after 1918 to feelings of perplexity and disillusionment, which in turn led to a partial renaissance of traditional compositional techniques.

After 1924, when political stability was established under the Weimar Republic, musical life split into various mutually hostile tendencies. Older composers like Richard Strauss and Hans Pfitzner sought an aesthetic revival in a return to Romantic and pre-Romantic ideals, or in the evocation of a traditional, specifically German culture (as in Pfitzner's cantata *Von deutscher Seele*), a tendency that was to develop increasingly aggressive nationalist features. On the other hand Schoenberg, who had been teaching at the Preussische Akademie der Künste in Berlin since 1925, had codified certain technical aspects of Expressionist music (total chromaticism, atonality and the emancipation of dissonance) in developing dodecaphony as a principle

which he believed would ensure the supremacy of German music for the next 100 years.



Younger composers who emerged in Germany after 1921, notably Paul Hindemith, Philipp Jarnach, Ernst Krenek, Kurt Weill and Hanns Eisler, developed a fundamentally new concept of how music was to be composed under the radically changed social conditions of the time. The term Neue Sachlichkeit ('new objectivity') was borrowed from the visual arts of the period to describe their stance. In the words of Hindemith: 'A composer today should write only if he knows for what purpose he is writing; the days of composing for oneself alone may be gone for ever'. These young composers supported the new democratic order of society – although by no means uncritically – and sought to make themselves 'useful' in their profession. They developed a functional concept of music, often defined by the term *Gebrauchsmusik* ('music for use'), and wrote for well-defined purposes: for the new media of cinema and radio, for amateurs, for children, politically committed music for the working class, and music for such traditional institutions as the opera house and the concert hall. They chose their technical and stylistic methods according to functionalist criteria, extending (sometimes even within a single work) from Expressionism to the neo-Baroque (Hindemith's song cycle *Das Marienleben*), from street ballads to cabaret chansons and jazz (Weill's *Dreigroschenoper*), from parody to light music ('Zeitopern' by Krenek, Hindemith and Weill). They preferred to use small, soloistic ensembles and harsh, stark sonorities (Hindemith in his series of *Kammermusiken*). The *Jugendmusikbewegung* was also influential in the musical culture of the time. Its adherents sought to create a new genre that was neither serious art music nor light music, had a particular sympathy for early music and folk music, and emphasized the importance of amateur musical performance. The movement recruited an increasing number of young composers.

With its new political and social stability and the flourishing diversity of its musical life, Germany quickly emerged from its isolated position of the immediate postwar years. Works by such composers as Bartók, Stravinsky, Prokofiev, Milhaud and Honegger received important premières in Germany. Due to Leo Kestenberg's progressive musical policy, Berlin gained a reputation as one of the major musical centres of the time. Between 1927 and 1932 Schoenberg, Schreker, Zemlinsky, Furtwängler, Erich Kleiber, Klemperer, Bruno Walter, Artur Schnabel, Hindemith, Weill and Eisler were all in the city. Yet thanks to the federal structure of the Reich, many other centres, notably Dresden, Leipzig, Hamburg, Cologne, Frankfurt and Munich, had a flourishing and progressive musical life. There was great international acclaim for the festival of chamber music (*Kammermusikaufführungen zur Förderung Zeitgenössischer Tonkunst*) held first in Donaueschingen (1921–6) and then in Baden-Baden (1927–9); the content of the festivals was largely determined by Hindemith, and their programmes centred on the study and performance of specific musical genres. Schoenberg, Bartók, Stravinsky and Webern performed their own works at the festivals, while composers such as Berg, Hauer, Toch, Schulhoff, Hindemith, Martinů, Milhaud, Weill, Eisler, Antheil and Krenek first attracted international attention here.

The splintering of musical developments led to irreconcilable controversies, which Schoenberg even protrayed in one of his works (*Drei Satiren* op.28). Traditionalists attacked the late Expressionism of the Schoenberg school and the Neue Sachlichkeit movement as the betrayal of a specifically German tradition; the Expressionists condemned the traditionalists and the adherents of Neue Sachlichkeit as conformists whose compositional techniques were anachronistic; the practitioners of Neue Sachlichkeit accused the traditionalists and Expressionists of aesthetic conservatism, criticizing them for failing to sense the needs of the time; and the *Jugendmusikbewegung* could hear nothing but 'decadent' sounds 'alien to the people' in all recently composed music. Thus the opposing musical tendencies of the 1920s inadvertently developed the arguments that the National Socialists would deploy after 1933 in attacking all the music of this period.

The Wall Street crash of October 1929 plunged the pluralistic and cosmopolitan musical life of Germany into a crisis that led to a significantly changed intellectual climate and paved the way for many of the musical developments of the 1930s. The composers of the Neue Sachlichkeit movement, in particular, feeling less and less in sympathy with a time of radical political change, reacted by excluding anything contemporary from their music. In 1930 Hindemith could still write: 'In recent years I have almost entirely turned away from concert music, writing instead music for educational or social purposes: for amateurs, for children, for the radio, for mechanical instruments, etc. I believe this kind of composition is more important than writing for concert performance, since the latter is little but a technical exercise for the musicians and does hardly anything for the further development of music'. But in 1931 he wrote: 'It seems as if the tide is gradually turning towards serious music on a large scale again'. The reversion to serious, large-scale music after 1930–31 quickly made itself felt, as composers turned to traditional genres such as the symphony (Weill's Second Symphony) and the oratorio (Hindemith's *Das Unaufhörliche*).

While the totalitarian Nazi regime established in January 1933 appeared from the outside to have a strict, hermetically sealed hierarchy, chaos prevailed among the party authorities, with rival institutions obstructing each other and proclaiming allegiance to Hitler alone. The system did in fact offer a certain latitude, but it was hardly ever exploited. Instead, a climate of suspicion, denunciation and intrigue prevailed. All Nazi musical policies had a common aim: the suppression and exclusion of Jews from public musical life and the banning of those composers who had been influential during the Weimar Republic. The exclusion of Jews from Germany's musical life was smoothly accomplished, with minimal resistance, by the setting up of a REICHSMUSIKKAMMER to which all musicians were obliged to belong, and which decreed who was allowed to practise a musical profession in Germany. Innumerable Jewish musicians were forced to emigrate, and those unable to escape abroad could practise only within the Kulturbund Deutscher Juden, which became the Reichsverband Jüdischer Kulturbünde in 1935, coming to a violent end in 1941 with the so-called 'final solution'. Those musicians who were not Jewish but were identified with the Weimar Republic usually had a chance of 'probation', which with few exceptions they took; among leading figures only Fritz Busch, Erich

15. Bauhaus-style stage design by Roman Clemens for Krenek's 'Jonny spielt auf', Act 2 scene v, for the Dessau production, 1928

16. Still from G.W. Pabst's film of Weill's 'Die Dreigroschenoper' (1931) with Ernst Busch as the ballad singer

Kleiber and Hindemith preferred to emigrate. The depths of this state-sanctioned process of humiliation and denunciation were reached in 1938 with the Düsseldorf exhibition of *Entartete Musik* ('degenerate music'). Some of the major works of the time were banned in Germany, among them Berg's *Lulu* and Hindemith's *Mathis der Maler*, which had their premières in Zürich in 1937 and 1938 respectively.

Those composers who did not participate in the obligatory composition of marches, choruses and songs and cantatas propounding Nazi ideology, were either forced into isolation, like Heinrich Kaminsky, Berg and Webern, or withdrew into a kind of internal exile, like Karl Amadeus Hartmann. The Church offered some scope and many composers, including J.N. David, Günter Raphael, Ernst Pepping, Hugo Distler and Kurt Thomas, turned almost exclusively to sacred music. No composer emerged whose works epitomized the spirit of Nazi Germany; and those composers who did achieve recognition were strongly influenced by music that was now taboo: Wolfgang Fortner and Ottmar Gerster were of the school of Hindemith; Rudolf Wagner-Régeny was influenced by both Weill and Hindemith; Werner Egk wrote works that synthesized Bavarian folk music with rhythms and bitonal harmonies deriving from Stravinsky; and Blacher's music also betrayed his admiration of Stravinsky. Only one composer achieved lasting international fame at this period: Carl Orff with his *Carmina burana*, to medieval texts on which even the Nazis could hardly claim an ideological monopoly. While older composers such as Strauss and Pfitzner merely continued to write in the same style as before, most of these younger composers embraced Neue Sachlichkeit, making it both more accessible and more monumental in style.

After the defeat and collapse of Germany in 1945 and the division of the country into two German states – the democratic, western Federal Republic of Germany (BRD) and the communist German Democratic Republic (DDR) – musical life in West Germany revived with astonishing speed in parallel with the economic recovery. In Strauss and Pfitzner, who both died in 1949, Germany still had two living composers whose musical styles had been formed before the turn of the century, and they both wrote significant late works after 1945. In an urgent need to make up for lost time, there were numerous performances of the works composed from the 1920s onwards by Stravinsky and, especially, Hindemith, who had been driven into exile. After about 1948 the music composed around 1910 (described by Theodor W. Adorno as the first great 'heroic age' of new music) was rediscovered, and the 12-tone works of Schoenberg and, even more so, Webern, attracted particular attention. Serial music developed not least through the theoretical ideas propounded by Messiaen and Boulez in France.

The development of serial music around 1950 also highlights a fundamental change in aesthetic thinking, which was largely the work of Adorno. It was proposed that analytical thought about music is more influential than the experience of hearing it, that judgments of musical value are bound up with a work's innovatory aspects, and that a work is more valuable as a record of a particular development or trend than as an entity in itself. Serial music, the mainstream music of West Germany in the 1950s, developed as a narrative of compositional problems in which works derived their techniques from each other. This development was encouraged by many institutions, music festivals and organizations devoted to new music, with public assistance and, in particular, with the support of the radio stations. Notable among them were the Darmstadt Ferienkurse für Neue Musik (from 1946), the revived Donaueschingen Festival (from 1950), the concert series of the broadcasting stations in Cologne (Musik der Zeit), Hamburg (Das Neue Werk), Bremen (Pro Musica Nova) and the Musica Viva series in Munich. As an expression of the re-establishment of freedom, new music became almost institutionalized in West Germany, which consequently attracted many foreign musicians, including Mauricio Kagel, Boulez and Ligeti.

Musical trends, however, diverged once more. While serial composers such as Karlheinz Stockhausen soon became increasingly significant, composers such as Hartmann, Bernd Alois Zimmermann and Wilhelm Killmayer, who approached the serial mainstream only cautiously or not at all, were condemned as 'outsiders'. Hans Werner Henze even left West Germany and settled in Italy in 1953. Furthermore, none of the famous composers who had emigrated from Nazi Germany returned to live permanently in the German Federal Republic, and only since the 1990s has there been a revival of their music in the reunified Germany (as with the works of Berthold Goldschmidt).

East Germany remained entirely untouched by the musical developments of West Germany. After a period of severe repression under the imposition of 'socialist realism', which ended with Stalin's death in 1953, influential positions were filled by composers such as Ottmar Gerster, Rudolf Wagner-Régeny, Max Butting and Fidelio F. Finke, who had begun their careers in the 1920s and had won recognition in Nazi Germany. In addition, composers such as Hanns Eisler, Paul Dessau and E.H. Meyer returned to the DDR from exile. The functionalist musical concepts of the 1920s, in particular, were developed and given a new ideological slant in East Germany. In this way music in West and East Germany developed in antithetical directions: in the Federal Republic it was predominantly hermetic, radical and avant-garde, an emblem of social freedom and progress, while in the German Democratic Republic composers who felt a responsibility to society developed and adapted their 'bourgeois' musical inheritance.

During the 1960s musical developments in the German Democratic Republic more closely approached those of the Federal Republic. The building of the Berlin Wall in 1961 by the East German regime led to internal political stability and introduced a period of cultural liberalization, enabling the composers of the Democratic Republic to study Western avant-garde techniques that had been condemned as decadent. The younger generation of composers, including Paul-Heinz Dittrich, Siegfried Matthus and Georg Katzer, may also have been aware of the risk of stagnation by comparison with other, more liberal Eastern bloc countries, particularly Poland. But what seemed to these composers a third way, a compromise between reactionary conservatism and the extravagant, socially 'irrelevant' avant garde, attracted little attention in West Germany. Instead, developments in the German Democratic Republic seemed to West Germans like a hesitant approach to methods of composition that had already been superseded in the Federal Republic, where serial music had entered a post-serial phase in the 1960s.

John Cage exerted a decisive influence when he came to Darmstadt in 1958; his concept of aleatory music led serial composers to relax their strict procedures. With melodic, rhythmic and harmonic processes restored, their works acquired recognizable form again. At the beginning of the 1950s, serial technique had been seen as a means of emancipation from tradition, the conquest of sound worlds never before experienced; at the beginning of the 1960s, conversely, traditional musical dimensions were restored in order to break with the demands of number and series in serial music. In West Germany itself, forms of politically committed music emerged in the mid-60s, with composers such as Henze, Helmut Lachenmann, Mathias Spahlinger and Nicolaus A. Huber employing various stylistic methods in the cause of political and social engagement. While Henze, for instance, intensified and radicalized his methods of composition, using avant-garde techniques, Huber simplified his style, adopting elements of light music.

It was not until the mid-1970s that serial and post-serial musical thinking in West Germany was superseded by a younger generation of composers, forming a relatively homogeneous group and holding comparable aesthetic ideas; their compositions attracted wide attention and the support of the media. Among these composers were Manfred Trojahn, Detlev Müller-Siemens, Wolfgang von Schweinitz, Ulrich Stranz, Hans-Jürgen von Bose and, in particular, Wolfgang Rihm, the outstanding talent of his generation. It was a feature of this group that they turned away from certain aesthetic and technical assumptions about composition that had gone unchallenged since the early 1950s. Their techniques were eclectic and included traditional harmonic and tonal procedures. They rejected all forms of experimentation such as aleatory music, improvisation, graphic notation, *Geräuschmusik* and electronic music. In contrast to Adorno's ideas of linear and teleological musical progress, a pluralism of techniques and procedures now prevailed. Rihm devised the term 'inclusive composition' for this new musical paradigm, which is open to all technical methods governed by the necessity of musical expression and is the opposite of 'exclusive composition', which excludes, rejects and withdraws into itself.

The attitude towards the musical tradition also changed. Webern's music, the epitome of 'exclusive composition', became less influential, while the music of the turn of the century, particularly that of Mahler, increasingly served as a point of reference. Those composers who had become 'outsiders' since the 1950s were now reassessed, among them the oldest, Günter Bialas, who was also an influential teacher of composition, Henze, Killmayer and B.A. Zimmermann, with his notion of time as *Kugelgestalt* ('globe structure') in which all historical styles are present.

Against the background of these developments in the Federal Republic, differences in musical styles between West and East Germany became ever more insignificant. Young East German composers such as Friedrich Goldmann, Friedrich Schenker and Udo Zimmermann were part of the same developments as their West German contemporaries; and Tilo Medek, exiled from the Democratic Republic in 1977 on political grounds, continued to work in the Federal Republic without making any stylistic adaptations. The reunification of Germany in 1989 set the seal on a process that had already been completed in the mid-1970s.

Expectations fostered by the new 'inclusive' paradigm of the mid-70s, however, remained largely unfulfilled: pluralism in musical composition acquired arbitrary features wherever there was a lack of solid technical ability. Reference to the styles and techniques of the turn of the 20th century provoked unfavourable comparisons: the aim of composers to express themselves in a musical language as comprehensible as possible had been better achieved by music of the past in more authentic forms. In the late 1990s a new radical approach to composition was beginning to emerge in Germany, albeit without any immediately identifiable overall tendencies. Habermaas has termed the aesthetic uncertainties facing composers as the 'neue Unversichtlichkeit' ('the new inability to ensure'). Modern disavowal of musical traditions and fragmentation of styles forces every composition to justify its existence independently, unmediated by commentary on its aesthetics or techniques.

II. Folk music

1. The subject area: (i) Background (ii) Normative definitions (iii) Subject-orientated definitions (iv) Definitional categories involving action. 2. Musical issues: (i) Genre (ii) Melody and classification (iii) Form (iv) Folk musicians. 3. History of 'folk music'. 4. Modern and postmodern contexts: (i) *Volkstümliche Musik* (ii) Regionalism and nationalism (iii) Ideology and politics (iv) Historicism (v) Other folk musics and the folk musics of others.

1. The subject area.

(i) Background. Historical and ontological concerns are fundamental to understanding what German folk music is and how it relates to and interacts with other types of German music. German scholars were among the earliest to identify and then to develop theories of folk music, beginning with JOHANN GOTTFRIED HERDER's coining of the term 'Volkslied' ('folksong') in the late 18th century (Herder, 1778–9). The historical concerns of German scholars address both the ways in which folk music persists across time and the processes of change that occur from performance to performance. The ontological concerns arise because of conflicting views about the fundamental nature of folk music, whether it is an object with its own identity – a folksong or dance – or whether it is a set of social, performative practices with identifiable functions. German scholars have debated extensively the ways in which it is possible to delimit and define folk music, and it is therefore necessary to survey the field of German folk music scholarship by first distinguishing the predominant definitions and approaches that constitute its subject area (cf. Levy, 1911; Pulikowski, 1933).

The history of German music has unfolded along two parallel paths, which, in sociological terms, produce two larger cultural domains (Wiora, 1971). The 'first' musical culture, though historically later, contains secular and sacred 'art music'; the 'second' contains the broad range of musical practices now called 'musical folk culture' (Schepping, 1988). Scholars examine the subject matter of the second musical culture under the rubric 'folk music', further dividing it into four subcategories of music: 'folksong', 'instrumental folk music', 'folkdance' and 'folk-like music' (*volkstümliche Musik*). The categories subsumed under 'folk music' also have social and cultural significance, therefore making it possible to study them and the phenomena surrounding them from sociological and anthropological perspectives (Bausinger, 1968).

Although there have been recent attempts to reconceive and rename folk music by employing a variety of neutral terms, notably 'traditional music', they have not succeeded in capturing the long history of folk music or its sustained relevance in modern Germany. The term 'traditional' relegates the second musical culture to the past, while implicitly suggesting that it is no longer being created in the modern era. Attempts to replace 'folk music' with 'traditional music' also ignore the original meanings

intended by Herder in the 18th century. Herder had already used the term to embrace more than folksong alone, broadening it to include folk dance and folk-like and popular musics in literate tradition. Herder's approach was subject- rather than object-based and gave birth to a field of study that was concerned with sociological issues as well as musical pieces and style histories. It is only when distorted as an object-orientated field that folk-music scholarship became primarily concerned with normative rather than empirical definitions, thus treating folksong as 'invention' rather than real practices of music-making (Klusen, 1969).

(ii) Normative definitions. The 'normative definitions' of folk music – the characteristics that music should demonstrate in order to qualify as folk music – fall into six categories. No definition has been more historically tenacious than that of *oral transmission*, the process of learning songs by hearing them sung by others; instrumental folk music and folkdance are transmitted in an equivalent way through direct interaction between musicians. In German scholarship, it is the transmission rather than composition of music that is crucial to orality. Written and printed manuscripts provided the basis for orally transmitted songs prior to recorded sound, which in the 20th century through technologies, such as the Walkman cassette recorder, provided a further basis for the oral transmission of music. Concert sing-alongs and karaoke, too, contributed to the persistence of orally-transmitted musics at the end of the 20th century, indicating the need to qualify 'oral transmission' with concepts such as 'primarily aural' or 'directly or indirectly personal' or 'by imitation'.

The second normative condition of folk music, also regarded as a 'historical' criterion, is *popularity*, whereby German scholars meant to identify music that was widely distributed. 20th-century scholars have more often dismissed widespread popularity as a condition, turning instead to the smaller groups that tend to create and cultivate folk music. In one important theory, Ernst Klusen (1986) has suggested even that the term 'group song' replace 'folksong'. Other scholars have noted that the type of popularity growing from mass-mediated music does not adequately describe the more local and vernacular uses of popular music.

One of the most empirically relevant criteria of folk music is *variability*, the condition allowing music created for one function to undergo changes that permit its adaptation to others. John Meier was the first folk music scholar to postulate a theory of variability, in which he argued for the virtual autonomy of a work of folk music; however fixed a piece might be in its initial version (e.g. in a printed medium), it was nonetheless sufficiently malleable for personal and other uses, ranging from new settings for different ensembles to more complete alteration through harmonization and the alteration of text. With much folk music transmitted by electronic media in the 20th century, the condition of variability lost much of its significance.

The fourth characteristic, *anonymity of authorship*, though an important criterion of folk music throughout the 19th century, underwent substantial revision in the 20th. Beginning with John Meier's influential formulation of folksong as 'art music in the mouths of the folk', scholars introduced various notions and processes of creativity (Meier, 1906). A major split between Austrian and German theories of authorship characterized the first decades of the 20th century, with the Austrian Josef Pommer holding more steadfastly to the 'production theory' of Herder. In the second half of the 20th century, concepts of reception replaced those of production, with scholars such as Walter Wiora identifying the ways in which the reception and transmission were themselves the true sites of creativity, thus making 'fidelity' to an 'original' authorial act irrelevant (Wiora, 1950).

One of the very first aesthetic conditions applied by Herder to folk music, *dignity*, became virtually inapplicable in the course of the 20th century, as the value of folk music was more closely related to its practicability in culture. Because earlier claims about aesthetic value had led to the exclusion of many pieces from research and collecting, 20th-century scholars replaced aesthetic restrictions made on a piece's dignity with neutral claims about folk music as 'value-free'.

A final normative criterion for folk music, *antiquity*, has never lent itself to empirical proof. Much of the earliest scholarship treated folksongs as if they were relics from the distant past. Accordingly, theories that stressed the decline of folk music, based on the relative abundance of newer songs gathered in the field, were tautological in their unwillingness to consider as folk music any work that was not demonstrably antique. Nonetheless, German folk music repertories at the end of the 20th century contained an extensive mixture of songs that were centuries old and the recent and modern.

(iii) Subject-orientated definitions. Because the normative criteria for defining folk music are biassed and problematical, it has become necessary to shift attention from 'objects' to 'subjects' in order to rethink folk music as primarily a constituent of musical folk culture. An *empirically statistical approach* provided one of the most basic ways of making this transition. It did so by accepting as folk music all musical phenomena at any historical moment that fulfilled the most general functions of folk music. Statistical approaches have revealed that a given repertory might contain a mixture of old and new songs, orally transmitted songs with mediated examples, songs derived from art-music repertories and popular music of all kinds. The music itself (i.e. questions about its origin, genre, form etc.) is therefore secondary or incidental to musical performance (Schepping, 1988).

Sociological approaches have traditionally focussed on the individuals, groups and classes that have performed folk music. In the 19th century such approaches defined the performers of folk music as a lower class, a 'basic stratum' or even a 'mother stratum' of society (Danckert, 1966). In the 20th century sociological approaches recognized that the performers of folk music could belong to any class, and that for the transmission of folk music to be most extensively realized, all 'strata' of society must participate in the processes of transmission in some way.

Claims that a musical folk culture is only possible when performers have *direct and personal contact* were largely debunked by approaches that accounted for the existence of mediated repertories and practices. Whereas the exponents of theories espousing face-to-face contact, such as Ernst Klusen, continued to look for folk music in small communities or groups with social affinities, the fact that music can gain popularity when disseminated over vast distances, thus creating a large community whose members may know nothing of each other, has generated

approaches that look at contact between the producers and consumers of music in quite complex ways.

Approaches predicated on *amateur or lay performance*, though once common, had few advocates at the end of the 20th century. Performers of folk music may range from the entirely untrained to those with extensive training in art music.

(iv) Definitional categories involving action. The approaches to understanding the ontology of folk music at the end of the 20th century generally shared a concern for action, in other words the actual situation involved in singing, the process of singing and the sound production in action. As a form of social action, *folk music retains its functional characteristics*. It never exists simply to be performed in formal contexts, separated from the performance capabilities of its audiences. Dancing and making music are never ends in themselves, but rather components of social exchange between people, be that in music for the enactment of customs, in political song or the music of sport.

Concepts of exchange have further led scholars to recognize the essential significance of *interaction*. When performance encompasses folk music, it does so because a large number of people in a group or performance are involved in music-making. Theories of interaction account for all aspects of a performance, determining the ways in which they are integrated into the music. Logically, then, everything 'musical' produced at moments of extensive interaction should be considered part of modern folk music.

One of the most extensive qualities of action is the *operational* quality of folk music, the complete autonomy that any performance of folk music possesses (Baumann, 1976). From performance to performance the object of folk music – a folksong or dance – can and does change, lending performance a quality of improvisation. Folk music therefore expresses the personalities of individual performers, who have social licence to make folk music their own by introducing change. Insofar as certain electronic media arrest rather than enhance the operational quality of performance, they limit rather than enhance the functional conditions of folk music.

2. Musical issues.

(i) Genre. German concepts of folk music are inseparable from the extensive and complex divisions of folksong and dance into genre. The musical structure, social function and cultural identity of each piece or repertory are bounded by the ascription of genre. Interpretation of genre, therefore, reveals not only how a given piece reflects musical form, but also who performs it, why and under what circumstances (Wiora, 1977). More than any other interpretative or analytical method, knowledge of genre is crucial to understanding the basic ontology of German folk music (see Brednich, Röhrich and Suppan, 1973–5).

Genre is determined primarily by four different factors: text and language; dance; instruments and ensemble; and social function. Text and language form genres that locate folksong on various social levels, though primarily on a socially high level when texts are in High German or derived from printed sources, or on a socially lower level when texts are in a vernacular or dialect reflecting oral transmission (Laufhütte, 1991, and Petzoldt, 1982). The classical genre with texts in High German is the ballad, a narrative genre with strophic forms. German folksong scholars have historically focussed on the ballad and its literate counterpart, the *Flugblattlied* ('broadside'), because of its potential to illuminate historical questions and the spread of German culture and settlement beyond Germany (Braungart, 1985, and J. Meier and others, 1935–96). Dialect song, in contrast, consists of genres with local forms of the German language. Dialect songs undergo rapid change, even within relatively small linguistic and cultural regions. They become fixed as stereotyped genres only when they enter a written tradition, such as the *Wienerlied* ('Viennese song') (Schepping, 1991).

Genre also connects folk dance to place and time. The transition from rural to urban occurs when one genre develops from another during periods of migration to the city and urbanization. The waltz, for example, evolved from the Ländler and the march from the polka during the 19th century. Dance genres may be local, as in the case of the *Zwiefach*, a genre with alternating meters and characteristic of only a few areas in Bavaria. Dance genre also forms according to social function; rural genres may retain the use of dance figures for courting or during calendric rituals, whereas urban genres may rely on more generalized form that different groups appropriate as they cross social and class boundaries. Instrumental musicians absorb the genres of dance music, further transforming them into new genres with both musical and social meaning. Instrumental ensembles accompany secular dance and entertainment but in some areas also ritual and religious activities. Therefore instrumental music often translates genre from one social setting to another.

Social function remains one of the fundamental frameworks for the division of folk music into genre. At one level, genre accrues to the different uses of music within the private sphere of the family, for example by creating genres connected to rites of passage or local occupations. In contrast, genre also ascribes functions that reflect the use of music in a more public social sphere. *Heimatlieder* ('songs of the homeland') and *Arbeiterlieder* ('workers' songs') are among the most notable cases of genres that have characterized political folk music in German society (I. Lammel and others, 1975; Lammel, 1970). Genre has persisted as a trait of postmodern contexts for folk music, underscoring the processes of negotiation between the local and the national, as well as between the private and the public (Mossmann, 1980).

(ii) Melody and classification. Theories of German folk music rely extensively on convictions that melody demonstrates order and coherence. Melodies relate to prototypes, and despite variation across geography and time, melody in German folk music bears witness to German identity and history (Tappert, 1868; Wiora, 1952; Wittrock, 1969). The distinctive forms and functions of melody provide the foundation for the order and the stability in processes of change in German folk music (Koller, 1902–3, and Krohn, 1906). Attempts to identify what does or does not make folk music German at any given historical moment usually begin with descriptions of melody itself.

The relation of melody to form depends on theories asserting that the overall shape, or *Gestalt*, of melody is the product of the dominance of strophic forms, which in turn rely on underlying harmony. Melodic movement, therefore, moves largely stepwise, though also in 3rds,

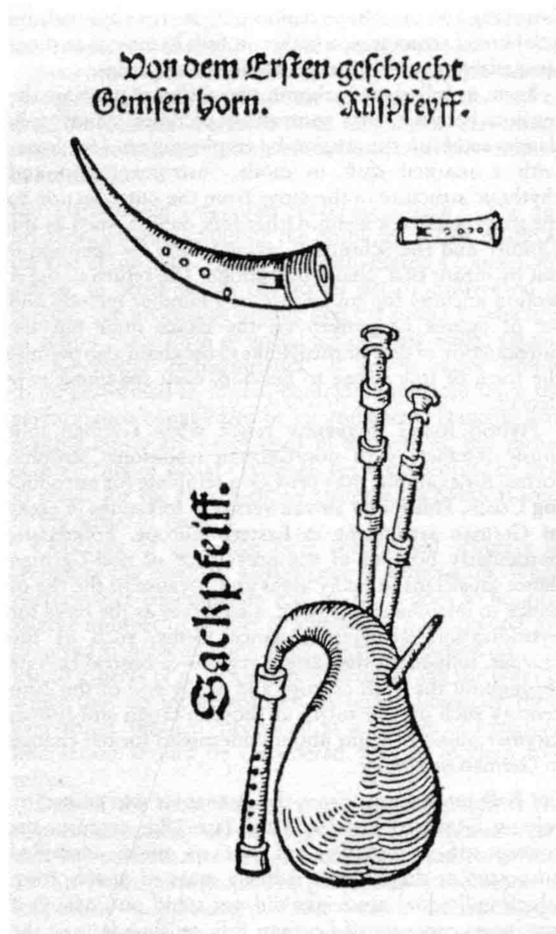
with stress engendered by the pitches of triads that mark strategic points in the strophic form. Two larger classificatory principles provide frameworks for the ways melody expresses age and relative stability over time. Firstly, relatively old melodies are marked by limited range, whereas more recent songs demonstrate complex forms; secondly, melody becomes internally more complex, expanding the length of individual lines but, more importantly, of the number of lines constituting a strophe (Suppan, Stief and Braun, 1976–83).

Melodic form, however complex, maintains the stable underpinnings of harmonic movement, with analytical approaches (e.g. Schenkerian analysis) adapted to the interpretation of melody accordingly (*Bratislava 1965*). Concepts of form, therefore, postulate that stereotypic melodic gestures, such as the rise from stable to unstable pitches, especially from tonic to dominant and beyond to secondary dominants, create melodic tension that must be resolved by returning to stable pitches. Further stereotypic gestures, such as a propensity for arched melodies, permit an extension of basic forms (*Rodziejów 1967*).

The potential of melody to yield patterns of order provides the basis for both traditional and modern analytical approaches. Computer analysis of melodic patterns became relatively widespread in the 1980s and 90s, with most programs designed to identify coherent patterns and their variants, and then to re-examine traditional concepts of genre (e.g. Jesser, 1991) and harmonic architecture embedded in melody (e.g. Steinbeck, 1982). Computer-assisted analysis confirmed the traditional belief in the primacy of melody as a structural core capable of withstanding change.

(iii) Form. It is a measure of the relation of German folk music to the cultural history of modernity that form has been relatively fixed since the 18th-century Enlightenment. The form of individual pieces depends on origins and functions in song, either secular or sacred, or in dance. Hybrid forms, too, have been present in German folk music throughout modern history, bearing witness to the contact and exchange with ethnic groups within Central Europe and with the many non-German cultures at the peripheries.

Form in German folksong emphasizes the textual and musical functions of the verse or strophe. Genres with forms based on single lines, such as the epic, are quite rare in central European repertories, whereas genres that depend on strophic form, such as the ballad, are quite common. Ballads in oral tradition employ strophic forms to provide a narrative and dramatic framework, with each strophe setting the stage for a scene in the narrative. This capacity of the strophe to provide form for the telling of a story was exploited by composers of the 19th century (e.g. Franz Schubert and Johannes Brahms), who composed works based on ballads and other narrative forms. Popular song in the 20th century, for example semi-staged traditions such as *Couplettlieder* ('couplet songs') or cabaret, also relied on strophic form for narrative and dramatic structure.



Strophic forms also pervade the many genres of religious folk music (*volksfromme Musik*). In Protestant areas, primarily in northern Germany, the formal properties of Lutheran chorales, especially *Bar-Form* (*AAB*), are evident in many religious folk repertories. The strophic structures of Catholic folk repertories found in southern Germany and the Alpine regions rely more extensively on antiphonal structures, whether in folk hymns or in more specialized repertories, such as pilgrimage songs.

Form in folk dance relies in two different ways on the tension between two contrastive sections. Many folk dances establish the tension by employing an *ABA* form, with a marked shift in mode, instrumentation and rhythmic structure in the move from the outer section to the inner and back again. Other folk dances, such as the Ländler and the Schottisch, extend form by spinning it out by means of a 'chain' of sections. The return to the *A* section anchors the folk dance in a familiar melody and set of figures or pattern on the dance floor but the introduction of new musical links to the chain also permits the form of folk dance to develop, even spawning new dances.

Hybrid forms frequently result when German folk music interacts with non-German traditions. Strophic forms, for example, may provide a template for introducing Czech, Polish and Slovak verses to folksongs in areas of German settlement in Eastern Europe. Folkdance, particularly because of the prevalence of non-German dance musicians in many areas and because of the use of dance to introduce the exotic, also serves as the basis for hybridization. Hungarian dance forms, such as the *czardás*, influenced the eastern regions of central Europe throughout the 19th century and at the end of the 20th century such diverse forms as those in tango and Jewish *klezmer* music brought about widespread formal change in German folkdance.

(iv) Folk musicians. From the moment it was coined by Johann Gottfried Herder in the late 18th century, the concept of *Volkslieder* has not so much identified musicians as the *Volk* as it has a mass of people from which individual musicians did not stand out. Many, if not most, concepts of German folk music admit to the possibility that individuals were creative (e.g. in the composition, production and dissemination of broadsides), but concern for equating folk music with historical meaning and durability necessitated removing and repressing the individual musician, thereby perpetuating the paradox that the *Volk* did not comprise music-making individuals (Bohlman, 1996).

As greater attention has been paid to the musical aspects of folk music and to performing practice in the second half of the 20th century, German folk music scholarship has mapped musicians across a spectrum with seven general categories. In the first category, the *Volk* as an undistinguished music-making population remains at one extreme, albeit with emphasis on widespread involvement in musical activity. In the second, folk musicians remain widespread in society, but the folk musician possesses an unusual degree of talent and is therefore valued in his or her community. In the third, folk music is increasingly the domain of special institutions, such as local choruses or wind bands, transforming the members of such institutions into folk musicians, albeit without extensive formal training. In the fourth, folk musicians are specialists responsible for accompanying folk dance or for the performance of religious folk music. In the fifth, folk musicians are creative musicians, therefore bringing about musical change and standing out in their communities as specialists and extraordinary musicians. In the sixth, musicians from outside local, regional and national culture (for example, ethnic minorities, foreigners or

17. Bagpipe, gemshorn and pipe: woodcut from Martin Agricola's 'Musica instrumentalis deudsch' (Wittenberg, 1529), p.12

social outsiders) have become the folk musicians most responsible for maintaining folk music (James, 1981), and, in the final category, folk music no longer resides in the culture of the *Volk* but has rather become entirely the purview of professional folk musicians who earn some part of their livelihood from the performance of folk music.

At the end of the 20th century the anxiety about who was or was not a folk musician, and about the folk musician as an insider or outsider in German society, mirrored the broader anxiety about how German society could include diversity in a culture historically linked to shared notions of Germanness. The changing model of the folk musician became linked to the problem of extending a concept of the *Volk* beyond the self to include multiple 'others'. In the second half of the 20th century the German folk musician had come to play not one kind of German folk music, but many kinds.

3. History of 'folk music'. Although little written evidence for traditional musics in the German-speaking regions of central Europe appears until after CE 100, the presence of melodies with probable vernacular origins in medieval manuscripts (e.g. the *Carmina Burana*, *c*1300, and the Jenaer Liederhandschrift, from *c*1350) reveals a long history of melodic predilection toward a Mediterranean melos, such as that in Gregorian chant, with its rich melismas and multitude of diatonic modes. Children's repertories and songs associated with Christian holidays, such as Christmas and Easter, and religious traditions, such as local rituals and European pilgrimage, together constitute the earliest stage in a history of German folk music.

By the high Middle Ages various forms of secular music also appeared in the records of fairs, of city marketplaces and of guilds (Schwab, 1982). Both itinerant and town musicians contributed to the musical life of medieval Germany, and we have some sense of the repertories from which they played because these are preserved in manuscript collections such as the Lochamer Liederbuch from Nuremberg, from about 1460, and the Glogauer Liederbuch from about 1480 (Liliencron, 1865–9).

In the Renaissance the presence of vernacular songs and dances proliferated in both secular and religious domains. The rise of an educated merchant class led to new possibilities for performance in the home, which was often depicted in the visual art of the time. The rise of print culture, moreover, created further opportunities for the dissemination of traditional music, and there is ample evidence that Renaissance concepts of music recognized

18. 'Wan morgen röth sich zieret' from Friedrich von Spee's 'Trutznachtigall' (Cologne: Friessem, 1649); musical setting attributed to Jacob Grippenbusch

the ways in which local musics that were 'German' were distinct from other repertories that were not marked by a distinct sense of place, either in their texts or in the ensembles used to perform them. This evidence appears first in printed works such as Sebastian Virdung's *Musica getutscht* (Basle, 1511) and Martin Agricola's *Musica instrumentalis deudsch* (Wittenberg, 1529; fig.17), from which some pieces entered oral tradition and survived until the end of the 20th century in traditional practice. The German Reformation and Counter-Reformation provided occasions for the composition of new sacred songs, which in turn entered traditional and folk practice very rapidly (e.g. *Catholisch Gesangbuechlein*, 1613).

Throughout the Baroque era there was extensive exchange between folk and art music and as the distinction between the two increased, so too did the criteria that led to the growth of folk music practices. Dances that formed the basis for composed dance suites, for example, appeared in growing numbers and variations in folkdances of the time. The growth of print technology, moreover, expanded the possibilities for the rapid composition and dissemination of vernacular songs, especially broadsides and 'moral songs' (*Moritaten*) (Harms, 1985). Both Catholics and Protestants adapted composed works from oral tradition into folk practices, for example, in the uses of Marian songs, such as those by the Cologne Jesuit, Friedrich von Spee (fig.18). During the Baroque, folksongs and dances appear in the works of many German art music composers.

Organological works published during the Baroque suggest that an instrumentarium for German folk music was relatively standardized. The second volume of Michael Praetorius's *Syntagma musicum* (*De organographia*, Wolfenbüttel, 1618), as well as Weigel's engravings in *Musicalisches Theatrum* from a century later, depicted folk musicians playing the barrel organ, dulcimer, cowhorn and alphorn, shawm and various bagpipes (fig.19), pipe and tabor, jew's harp and hurdy-gurdy. Many of these instruments survived to the 20th century, and the early engravings have provided sources for their revival in folk music at the end of the 20th century.

Both religious and secular traditions underwent a radical popularization in the late 18th century, effecting a profound change in the forms and styles of German-language folksong traditions throughout the 19th century (Objartel, 1988). Enlightenment reforms in Catholic regions led to the composition of 'German masses', many of which had vernacular texts. In Protestant areas, a parallel movement of religious awakening stimulated the creation and increased availability of folk hymns (ex.1). Because all of these songs were largely strophic and relied on the harmonic structure of choral performance, they spilled beyond religious practices alone, influencing almost all forms of secular song: couplets and ballads, school songs, soldiers' songs, patriotic songs, student songs, waltzes and urban dance forms, and even operetta and music for the popular stage (Erk and Böhme, 1893–4).

The second half of the 19th-century witnessed extensive institutionalization of folk music through folk music movements (Gansberg, 1986), influenced by the publications of folksong collections and arrangements of songs for choral ensembles. First as men's choruses and then as mixed choruses, the German choral movement spread to all parts of central Europe and was fundamental to the music cultures of German emigrant groups throughout the world, whether they responded to the political events of the aborted 1848 revolution or the flood of emigration unleashed by economic difficulties from the 1880s until World War I. Within Germany, the

'Wandervogel' ('wandering bird') movement took shape in 1896, employing folk music as a symbolic means of returning to nature. As an institutionalized form of folk music, the Wandervogel movement was immensely popular, reaching a membership of some seven million by 1933, when the Nazi dictatorship assumed power and liquidated the youth movement. The repertory of the Wandervogel included a vast array of songs, in various styles and from various historical periods, which were published by Hans Breuer as a songbook, *Der Zupfgeigenhansl* (Breuer, 1908). The folksongs of the Wandervogel were absorbed by other youth groups in the early 20th century, for example by the German Zionist 'Blau-Weiss', whose songbook contained many common German folksongs, as well as songs in Yiddish and Hebrew (Bohlman, 1989).

In the course of the 20th century, youth movements in Germany adapted to, altered and even resisted the hegemony of a common canon of German folksongs. Socialist and communist groups drew upon French and Russian folksong repertories, building and expanding repertories that would serve as the basis for the central youth movement of the German Democratic Republic (Moritz, 1991). The youth group of the Nazi Period, the 'Hitler Youth', made extensive use of folksong in quite different ways, using it to consolidate a common cultural vocabulary of Germanness. To resist the ideological uses of folk music by fascist groups, smaller groups incorporated jazz into their activities, transforming it from an entertainment music imported from the US into a symbol of resistance.

Popular musics from within and outside Germany extensively shaped the music of youth movements after World War II, a period in which the Germanness of folksong was used to consolidate fascism in German youth organizations. These popular musics stimulated a radical change in both repertories and functions. The influence of popular music led to an increasing number of styles, stimulating the absorption of the blues, spirituals, gospel, rock and roll, pop, techno, rap and hip hop. Musical folk culture at the end of the 20th century was able to preserve its character and vitality, despite the loss of some traditions and of national and regional distinctiveness, and sometimes being pronounced dead. It compensated for the loss of some repertories and practices by reviving other repertories and expanding the variability of musical style and forms of expression fulfilling the functions of 'folk music' in modern Germany.

4. MODERN AND POSTMODERN CONTEXTS.

(i) 'Volkstümliche Musik'. During the course of the 20th century Germany followed a path of rapid modernization, industrialization and military–political expansionism, all conditions that were anathema to the traditional world of folksong. Whereas the model of folk music in the 19th century had been authenticity, with function connected closely to the common production and consumption by the *Volk*, the alienation of an industrialized society produced cultural displacement, stimulating the mass production of culture but driving producer and consumer apart. However folk music did not disappear from German society in the 20th century but rather underwent extensive transformation into new genres, repertories and functions that accommodated the spread of modernity and, by the second half of the 20th century, the onset of postmodernity.

Folk music that responds to the displacement of consumption from production generally falls under the rubric, *volkstümliche Musik* ('folk-like music'). Folk-like music may reflect specifically musical meanings, that is as a music consciously conceived and composed as if it were folk music. Music may be given folk-like functions in order to emulate the cultural identity and political agency of folk music. In folk-like music it is the representation of Germanness as rooted in the *Volk*, real or imaginary, that is important, and therefore *volkstümliche Musik* enjoyed its greatest popularity at times when anxiety about the loss of Germanness was at its most extreme.

The history of folklike music predates the 20th century. Broadside ballads and *Moritaten*, printed and hawked narrative folksongs, were among the first folk-like genres, and their history parallels that of the expansion of music publishing and literacy. Folk-religious genres of music, such as pilgrimage songs and workers' songs, have also depended extensively on the mass dissemination of printed sources. They bore witness to folk-like musical repertories throughout the 20th century, influencing singer-songwriters and religious revivalism even in the 1990s.

Folklike music has benefited from the diversification of modern sources, which in turn has encouraged the professionalization of vernacular traditions. The use of folklike music for entertainment (*Gelegenheitsmusik*) connected urban and rural settings, creating contexts for an urban cosmopolitanism that depended on rural genres. Two other sources for folklike music at the turn of the 20th century were military music and operetta.

At the end of the 20th century folklike music was heavily mediated. German hit songs, or *Schlager*, utilized the electrified instrumentarium of rock music, but retained many of the sonic markers of folk music, thereby making the *Schlager* unmistakably modern and popular but nostalgically traditional and German (Bausinger, 1973). The producers of folklike music used the mass media to fabricate the authenticity of a German folk culture that had disappeared. One of the most popular of all television programmes in the German-speaking countries of central Europe was 'Musikantenstadl' ('Musicians' Stable'), in which ensembles aspiring to professional success played electrified versions of their own folklike compositions on a stage made to look like a farmyard, filled with audience members in local costumes (*Trachten*). Immensely popular mediated performances such as Musikantenstadl increasingly recombined the producers and consumers of folk music under postmodern conditions at the end of the 20th century.

(ii) Regionalism and nationalism. Folk music has responded in complex ways to the devastating tragedy of German nationalism in the 20th century. At various historical moments folksong has provided the vocabulary and language for nationalism's claims to power and military expansion, as well as prejudice and racism. Folk music has also voiced opposition to nationalism and served to counterbalance the hegemony of the nation-state, particularly by expressing regionalism and local identities. At the end of the 20th century, as a reunified Germany sought to reintegrate regions into a single national whole, folk music no less expressed the tensions between local culture and the political power of the nation-state than in the 19th century, when the rise of German nationalism had signalled widespread consolidation of German folk music.

The tension between nationalism and regionalism has traditionally manifested itself in the texts, functions and genres of folksong. The ballad, a narrative genre whose texts are by definition in High German, represents the nation, not only because of its dependence on a shared literary language but also because of the implication that its narrative texts were constituents of a larger historical tradition. Dialect songs, in contrast, were the folksongs unique to the region. By definition their texts resisted the centripetal pull of national historical narratives (Stockmann, 1962; Röhrich, 1990).

Before and during the two world wars regional folk music was mustered for nationalist agendas, thereby defusing the tension between the regional and the national, and elevating the political potential of folk music to nationalist ends. The struggle between the regional and the national is evident in folksong collections from the Lorraine region of north-east France, where Louis Pinck gathered five volumes of songs, almost entirely ballads, historical songs and religious folksongs in High German, thus canonizing the German presence in a region contested by Germany and France for centuries (Pinck and Merkelbach-Pinck, 1926–62). Even more explicitly expansionist in the overt integration of regional folk music into a national tradition was the 43-volume anthology, *Landschaftliche Volkslieder* ('Folksongs of Landscape'), a publishing endeavour fostered by the German Folksong Archive in Freiburg im Breisgau in 1924 but completed only in 1971. The volumes of this series figuratively mapped the German regions of central and eastern Europe through the Weimar and Nazi periods, with additional volumes added after World War II under the conditions of the Cold War (*Landschaftliche Volkslieder*, 1924–71; see Bohlman, forthcoming).

The tension between regionalism and nationalism plays out in *volkstümliche Musik*, especially in the annual 'Grand Prix der Volksmusik'. Beginning with local and regional competitions throughout German-speaking central Europe – not only Germany, Austria and Switzerland but also in neighbouring nations that use folk music to claim Germanness (e.g. South Tyrol in northern Italy) – regional folk music groups compete on radio and television to determine the best German folk music ensemble of the year, with the national stage of competition broadcast to millions throughout central Europe.

Through expanded ethnographic techniques in the second half of the 20th century, German ethnomusicology and musical folklore (*musikalische Volkskunde*) redefined the ways in which local folk music traditions related to regional and national repertories and practices (e.g. Kiehl, 1987–92; Holzapfel, 1993). Caution informed research projects that attempted to open up smaller regions and urban areas as the sites at which folk music narrated modern German history after World War II, accordingly eliminating the pervasive presence of nationalism in folk music (e.g. Brandl, Bröcker and Erier, 1989). However the debates about nationalism in music did not subside, manifesting themselves particularly in the ways any music could represent the German nation-state at the end of the century (Kurzke, 1990). The German national anthem, the so-called *Deutschlandlied*, with music by Joseph Haydn and text by Heinrich Hoffmann von Fallersleben, was officially stripped of those verses that represented the expansionist history of German nationalism (Knopp and Kuhn, 1988).

(iii) Ideology and politics. Two general ideological trajectories have influenced the political uses of German folk music in the 20th century. The first trajectory, generally conservative in character, shifted folksong repertories and folk music practices toward the nationalist centre, where they could shore up the nation-state. Historically, conservative ideologies emphasized the centripetal pull of German history, and they did so by exaggerating the presence of a German folk music presumably shared by all Germans. In contrast, the second trajectory, referred to as both liberal and democratic, mobilized folk music so that it would serve the peasant, the worker, the student or simply the 'common' German (Steinitz, 1954–62; Buhmann and Haeseler, 1983). Liberal ideologies were therefore centrifugal, generating both greater variety and more extensive utility in folk music as it modernized and responded to the hegemony at the nationalist centre.

Throughout the course of the 20th century the institutions of German political power utilized folk music to implement a common ideology of 'Germanness'. Within the first year of World War I, a two-volume anthology of 604 folksongs appeared, which was to be shared by soldiers at the war front and Germans at the home front (see M. Friedländer, 1915). During the rise of fascism and the intensification of racism between the world wars, the editors and publishers of folk music collections consolidated repertories that nationalized some repertories while racializing others. Folk music, in fact, lent itself particularly well to the racial ideologies of the Nazis during both the Weimar and Nazi periods (Potter, 1998). Nationalist youth movements, for example, the Hitler Youth, relied on the potential of folk music to provide a shared vocabulary for the nation in order to create a common rhetoric; this potential was not lost upon the DDR, which also mobilized its youth movement with folk music (Freitag, 1993). For groups at both the ideological fringe and the politicized centre, folk and folk-like musics retained an intensely racialized significance. The racialization of music by the Nazis, for example, was reworked by German neo-Nazis in the 1980s and then intensified by disenfranchised youths from the former east Germany in the 1990s, particularly in 'Oi-Musik' (Funk-Hennigs, 1995; Schwarz, 1997).

The liberal and democratic uses of folk music in the 20th century stood in sharp contrast with nationalist uses. At all moments when ideological power shifted to the right, folk music traditions and repertories arose on the left to counter and resist the abuses of nationalism. During the 1930s, for example, Jewish communities throughout Germany included folk music among new musical practices that overtly and covertly resisted the growing exclusion and repression of Jews (Bohlman, 1995). Folksong provided a sense of common purpose and a vehicle for survival in concentration camps, such as Sachsenhausen, a primary collection of which survived the Holocaust in manuscript (fig.20). After World War II, 'democratic folk music' provided groundwork in east Germany for a re-imagined history of workers' struggle and resistance against fascism in Germany (Steinitz, 1954–62). It is therefore hardly surprising that Germany's best known singer-songwriters, such as Wolf Biermann, were east Germans and that the folksong repertories used by left-wing student movements after 1968 drew heavily upon the socialist canon of the DDR (Buhmann and

Den Spaten geschultert....

Den Spaten geschultert,
maschieren wir,
im langen Zuge am Morgen,
ein Lied auf den Lippen,
mit frohen Mut
und trotzen Kummer und Sorgen,
denn wir wissen, daß nach dieser Not
uns leuchtet hell das Morgenrot.

Ob über die Heide
der Sturmwind braust,
ob uns auch peitschet der Regen,
wir schippen und karren
stets unverzagt,
der Zukunft mutig entgegen;
den wir wissen..............

Und ziehen wir des Abends
ins Lager ein,
erklingen dann wieder die Lieder,
und Scherzworte fliegen von Ohr zu Ohr,
obgleich auch müde die Glieder,
denn wir wissen..............

Wir harren der Freiheit
voll Zuversicht
hier im verlassenen Moore,
Gefangene sind wir nicht ewiglich,
uns öffnen sich wieder die Tore,
denn wir wissen..............

20. 'Den Spaten geschultert' ('Shouldering the Spade'): opening page of the Sachsenhausen Lagerliederbuch, c1940

Haeseler, 1983). It is similarly not surprising that these same singer-songwriters and student movements used folk music to break radically with the increasingly centralized politics of the DDR in the late 1970s and the 1980s.

(iv) Historicism. One of the most significant and widespread uses of German folk music at the end of the 20th century was to re-imagine the past in the present, that is, to historicize German culture from previous times and places. Folk-like music, for example, which traditionally relied on nostalgic stereotypes, undergirded the memory of German histories in which the nation was re-imagined through displaced traditions, such as folk music traditions from former German-speaking settlements in eastern Europe. In contrast, the folk music revival of the 1960s and 70s postmodernized the struggle of peasants and workers in order to create a culture that deliberately abnegated the resurgence of nationalist ideologies, while at the same time historicizing folk music practices common to both Germanys.

As different as the ideological and political motivations were that characterized late 20th-century historicism, folk music was a critical component because of the shared history it signified (Schünemann, 1923). In the first decade after World War II, when the residents of former German *Sprachinseln* ('speech islands') were resettled in Germany or as immigrants in North and South America, their folk musics were gathered and elevated to symbolic narratives

of the past (cf. Brednich, Kumer and Suppan, 1969–84; Scheierling, 1987). The Germanness of these repertories was therefore magnified, enlarging their common history (Teutsch, 1997). Post-colonial criticism of the historicist theories of shared Germanness was more common in the final decades of the 20th century, when historical patterns of cultural exchange (Schenk, 1992) and 'interethnicity' (Weber-Kellermann, 1978) in the German speech islands were emphasized.

Historicism has also stimulated the re-imagination and reintegration of folk music in German emigrant and diaspora cultures into a larger German history. Both literate and folk-religious traditions provide scholars with evidence for investigating the historical *longue durée*, particularly ways of tracing emigrant movements that responded to periods of prejudice against religious and ideological sects, from the 17th to 20th centuries (e.g. Bachmann-Geiser and Bachmann, 1988; Bohlman, 1985; Holzach, 1980). In the formation of immigrant and ethnic musics in such communities, folk-like music has played a particularly crucial role, enabling German traditions, especially 'Dutchman' polka music from the American Midwest and the ubiquitous 'piano accordion' (Wagner, 1993), to participate in the mediation of multicultural popular musics in North America (Bohlman and Holzapfel, 2000). Though the historicization of German folk music lends these musics an old, even anachronistic 'sound' – at times, they bear the label 'old-time' music – historicism signifies ethnic mixing and integration into the North American mainstream (Pietsch, 1994).

(v) Other folk musics and the folk musics of others. The folk music of ethnic groups and religious minorities was almost entirely absent in German folk music scholarship until the final decades of the 20th century. Neither the groups themselves nor their musical practices were considered sufficiently 'German' to warrant opening up canonic repertories to make space for them or to alter theoretical approaches equating German traditions with demonstrable authenticity and long history. Two historical factors stimulated new studies of ethnic and minority musics at the end of the 20th century. First, there was growing pressure to account for groups devastated by racism in the Holocaust, especially Jews but also Roma and Sinti, the two largest Gypsy groups in Germany (Djurić, 1997; Renner, 1997). Second, the presence of non-German guest workers, especially Turks, had become so widespread that their folk music in many cases had a greater presence in German popular culture than did historical German traditions.

By the end of the 20th century, non-German traditions were inseparably woven into the folk music of a unified Germany. It became much more accurate to speak of 'folk music in Germany' rather than German folk music, for the modern and postmodern turns in history had created new contexts for a multicultural mix. The street music dominating the public sphere was overwhelmingly non-German, and it attracted musicians from eastern Europe, Africa and Latin America (Bohlman, 1994). Minority and ethnic groups, moreover, controlled radio and television stations, several of which, such as Turkish television in Berlin, predominantly broadcast music (Baumann, 1985).

Ethnic and religious minorities in Germany have traditionally been 'people without history', and it was not until the end of the 19th century that many ethnic minorities were extended the full rights of citizens. In the 1980s and 90s, folk music provided one of the most important means for restoring history to minorities. Jewish music, for example, enjoyed an upsurge in popularity as the small Jewish communities in post-Holocaust Germany sought ways to assert their presence, and, more importantly, revival groups turned to Yiddish song and *klezmer* repertories to historicize musics that had disappeared during the Holocaust (H. and T. Frankl, 1981).

The full integration of ethnic and minority musics into German folk music proceeded slowly, with both ideological and political impediments. Folk music regarded as non-German, for example, drew attention from the extreme right, thereby also endangering neighbourhoods with large foreign populations. Despite reunification of Germany in 1990, the extension of citizenship to non-Germans hardly expanded at all, making it impossible for most minorities to enter German society fully, even when born in Germany. The process of integrating German society with folk and popular musics is therefore notable (Adamek, 1989). Turkish singing groups, such as Kartell, constantly exchanged music between Germany and Turkey, while several Turkish singers, such as Tarkan, enjoyed success in the German mainstream; the 1999 German national entry in the Eurovision Song Contest was for the first time a non-German, Sürpriz, whose repertory included both German songs and Turkish songs with traditional Muslim themes.

At the end of the 20th century, folk music in Germany was undergoing a sea change, with new and multicultural genres, repertories and histories transforming those that had provided the prototypes for Herder's 18th-century concept of *Volkslieder* and the 19th- and 20th-century musical and national histories which that concept was rallied and constructed to justify.

Gern, August Friedrich Hermann (*b* Berlin, 1837; *d* London, 7 Nov 1907). German organ builder, active in England. Gern initially trained with provincial Bavarian

organ builders. He worked for Cavaillé-Coll from 2 April 1860 to 31 July 1866 rising to the position of *contremaître*. Gern erected the Cavaillé-Coll organ in Our Lady of Mount Carmel, Kensington, London, in 1866. He established his own business at Orleans House, 2 Holland Street, Kensington, in 1866; subsequent addresses were at Queens Buildings, Pancras Street, Tottenham Court Road; 3 Boundary Road, Notting Hill (1872–1906); and Turnham Green Terrace, Chiswick (1906–7). Gern cast metal pipework in the Notting Hill premises. His early instruments (1868–79) were in the style of Cavaillé-Coll with reverse consoles and pipework from Zimmermann, Paris. Early pneumatic actions used a slider-chest design by Georg Sander of Brunswick. In 1883 Gern patented a pneumatic sliderless soundboard, and in 1885 a coupling action which was awarded a gold medal at the Inventions Exhibition, London. This action design was used by Walcker of Ludwigsburg. Gern made casework in oak, walnut or mahogany, with burnished front tin pipes for important contracts. His son August Albert Gern (*b* London, 1870; *d* London, 1938) continued the business from 1907 to 1915, selling the Chiswick premises to John Compton (of Nottingham) in 1919. He continued from 1923 to 1938 at 519a Harrow Road, London, using pipework from Fonseca, Kentish Town, for new work.

PAUL JOSLIN

Gernsheim, Friedrich (*b* Worms, 17 July 1839; *d* Berlin, 11 Sept 1916). German composer, conductor and pianist. After piano lessons from his mother, he studied the piano and theory with Louis Liebe before moving to Mainz (1848–9) to study with Ernst Pauer. In 1849 he moved to Frankfurt for further instruction; at the age of ten he appeared as pianist and violinist in a programme that also included a performance of an overture of his at the Frankfurt Stadttheater (4 May 1850). After a successful concert tour that took him to Karlsruhe (1850–51), he studied for two years at the Leipzig Conservatory with Moscheles (piano), Hauptmann (theory) and Ferdinand David (violin). He then spent several years in Paris (1855–61), where he studied the piano with Marmontel and met Lalo, Saint-Saëns, Rossini, Heller, Rubinstein and Liszt. On his return to Germany, he conducted two choirs and an orchestra in Saarbrücken before taking a post at the Cologne Conservatory (1865). He was active as a conductor in Cologne until 1874, when he moved to Rotterdam to direct the Maatschappij tot Bevordering van Toonkunst. Though he declined an invitation to conduct the Stern Choral Society in Berlin in 1880, he accepted a second offer and a teaching post at the Stern Conservatory in 1890, taught there until 1897 and conducted the choir until 1904. He also gave a masterclass in composition at the Akademie der Künste and continued to perform as pianist and conductor; the town of Dortmund celebrated his 75th birthday with a festival in his honour.

As a young conductor Gernsheim favoured the works of Brahms; later, at Berlin, he included the music of Bruch, Humperdinck (who was his pupil at Cologne) and Verdi in his programmes. A conservative composer, he was strongly influenced by Brahms's harmony and orchestration. He wrote neither operas nor oratorios and seems to have been at his best in chamber music (e.g. the String Quartet in E minor and the Piano Quintet in B minor; the latter occupies a central place in his output). His main venture as a composer of programme music was the Symphony no.3 in C minor, subtitled 'Mirjam' (1888). In his composition, Gernsheim aimed above all for unity, believing that each bar should be both essential and inevitable in its place in the conception of the whole. His music shows technical mastery and a command of form, although only some of the last works, such as the symphonic poem *Zu einem Drama* (1910) and the String Quartet no.5 (1911), show greater innovation.

WORKS

Published unless stated otherwise; principal collection of MSS and papers in IL-J

Orch: Waldmeisters Brautfahrt, ov., op.13; Pf Conc., c, op.16; 4 syms., g, op.32, E♭, op.46, c 'Mirjam', op.54, B♭, op.62; 2 vn concs., D, op.42, F, op.86; Phantasiestück, vn, orch, op.33; Vc Conc., e, op.78, Elohenu, vc, orch (Leipzig, 1882); Zu einem Drama, sym. poem, op.82; In memoriam, ein Klagegesang, str orch, org, op.91

GAYNOR G. JONES

Gero [Ghero, Giero], **Jhan** [Ihan, Jehan, Jan, Giovan] (*fl* 1540–55). Composer of northern, perhaps Walloon extraction, active in Italy. He had close connections with the Venetian publishers Antonio Gardane and Girolamo Scotto. He may even have been in their employ, as is suggested by the preface to a collection of Gero's madrigals and chansons *a* 2 (1541) which, Scotto said, were

composed at his instigation. Gardane also published a collection of three-voice madrigals, reprinted in 1541 under the curious title *Di Constantio Festa il primo libro de madrigali a tre voci, con la gionta de quaranta madrigali di Ihan Gero*; all but one of the madrigals in this collection are attributed to Gero in later prints. The chansons in the book of duos are chiefly arrangements of well-known four-part chansons; this may be true of some of the two- and three-voice madrigals as well. Thus Gero apparently began his career as a composer-arranger for Gardane and perhaps for Scotto as well. There may be proof for this: a sonnet by Girolamo Fenaruolo (printed in 1546) addressed to 'Jan' describes its subject as a timid unknown whose fame and fortune were made through the presses of the 'grande Antonio [Gardane]'.

Gero's duos enjoyed an extraordinarily long life (being reprinted about 20 times, the last in 1687) probably because they served a useful pedagogical purpose. His three-voice madrigals were also popular, both in Italy and in Germany. He wrote a number of four-voice *note nere* madrigals during the 1540s, publishing two books of his own and contributing to anthologies.

In the dedication to Gero's first book of motets, one Pietro d'Arezzo, 'cantor di S Marco', calling himself a pupil of Gero, said that the composer had been *maestro di cappella* for Pietro Antonio Sanseverino, Prince of Bisignano. Just where Gero may have served in this capacity is unclear and the motet texts do not help a great deal; one, *O Deus qui beatum Marcum*, suggests Venice; another, *O decus ecclesie*, is addressed to the dying or dead King of France (?François I).

WORKS

SACRED

Motetti, 5vv, libro primo (Venice, 1555), inc.
Motetti, 5vv, libro secondo (Venice, 1555), inc.
Motets in 1546[9], 1549[9] (1 ed. in AMI, i, 1897/*R*), 1549[12], 1554[10], 1556[9]

JAMES HAAR

Gérold, (Jean) Théodore (*b* Strasbourg, 26 Oct 1866; *d* Allenwiller, 15 Feb 1956). French musicologist. He studied singing, the violin and music theory at Strasbourg Conservatory, and music history (with Jacobsthal) and theology at the University of Strasbourg; later singing teachers included Julius Stockhausen in Frankfurt (from 1890) and Romaine Bussine and Charles Bordes in Paris (from 1892). After serving as assistant professor to Stockhausen (1895) he was appointed his successor. He sang bass solos in important performances of the choir of St Guillaume, Strasbourg (1888–1906), and drew on this practical experience in his singing method *Kleine Sängerfibel*. He took the doctorate at the German University of Strasbourg in 1910 with a dissertation on the French art of singing in the 17th century.

Throughout this period Gérold continued his studies in composition, music history and Romance philology. He lectured on music at the University of Basle (1914–18) before joining the staff of the French University of Strasbourg, where he held appointments in the faculties of philosophy (from 1919) and Protestant theology (from 1922). *L'art du chant en France au XVIIe siècle* gained him the doctorat ès lettres and the Prix de l'Académie des Beaux-Arts et de l'Académie Française in 1921; he submitted a second thesis, *Les pères de l'église et la musique*, for the doctorat d'Etat in theology in 1931. Having been made *maître de conférences* in 1927, he was honorary professor from 1931 until his retirement in 1936; he taught for another year after the sudden death of his successor Yvonne Rokseth (1948). From 1922 to his death he was pastor of the Lutheran parish of Allenwiller.

Gérold was a scholar of unusually wide interests. *Les pères* is a standard work on the attitude of the church fathers to music, tracing ideas from Philo and Plotinus, through the early Christian era to the theorists of the 12th century, with discussions of the execution of chant and the role of instruments in church. His two general history books, *La musique au Moyen Âge* and *Histoire de la musique des origines à la fin du XIVe siècle*, are particularly notable for their extended and richly illustrated chapters on medieval minstrel song and instruments; though he generally transcribed the songs in modal rhythm, he was not a rigid modalist. His collections of references to instruments indicate an extensive knowledge of French medieval literature. His last published work appropriately drew on both his theological and his musicological experience to trace the early musical history of Protestantism.

DAVID HILEY/JEAN GRIBENSKI

Gerrish-Jones, Abbie (*b* Vallejo, CA, 10 Sept 1863; *d* Seattle, 5 Feb 1929). American composer, librettist and music critic. Her paternal grandfather was a bandmaster; her father, Samuel Howard Gerrish, a flautist; and her mother, Sarah Jones Rogers, a singer. Abbie Gerrish began serious music study at the age of seven, was composing for voice and piano at 12 and became a church organist at 14. Her first published works appeared when she was 18. Her teachers included Humphrey J. Stewart and Wallace Sabine. She married a naval officer, A. Widmore Jones.

Active chiefly as a composer of operas, Gerrish-Jones wrote eight (five to her own librettos): *Priscilla*, *Abon Hassan*, *The Milkmaid's Fair*, *The Snow Queen* (G.W. Hoffmann), *The Andalusians* (Percy Friars), *Two Roses*, *Sakura-San* (Hoffmann) and *Aztec Princess*. Only four published songs are extant. She also wrote five song cycles, 100 songs, piano works and teaching pieces. In 1906 she won a prize for her Prelude for piano in a competition sponsored by Josef Hofmann. She was a music critic for *Pacific Town Talk* and *Pacific Coast Musical Review*, and the West Coast representative for *Musical Courier*.

CAROL NEULS-BATES

Gerschefski, Edwin (*b* Meriden, CT, 19 June 1909; *d* Chattanooga, TN, 18 Dec 1992). American composer, pianist and teacher. He studied composition at Yale University (1926–31), winning the Frances E. Osborne Kellogg Prize in fugue and the first Charles Ditson Fellowship for study abroad. This took him to the Tobias Matthay Pianoforte School in London (1931–3), where he received the Jeffrey Reynolds Scholarship and became the first American to receive a diploma. He continued piano studies with Schnabel in Como (1935) and composition studies with Schillinger in New York (1936–8). He spent the summers of 1936 and 1937 at the Yaddo Foundation. In 1940 he began teaching at Converse College, Spartanburg, South Carolina, where he was dean of the music school (1945–59) and director of an annual music festival. He was also head of the music departments at the universities of New Mexico (1959–60) and Georgia (1960–80). His awards include a Carnegie grant for composition (1947) and the gold medal of the Arnold Bax Society (1963). He was a featured composer on the American Music Festival series of radio station WNYC, New York, during the years 1969–73.

Gerschefski's early compositions, such as the Piano Preludes and the *Classic Symphony*, both from 1931, have a conservative, academic flavour. A decisive turning-point came with his studies with Schillinger, whose system he employed in the Second Sonatine, the *'Schillinger' Nocturne* and some later works. Several of his choral works are word-for-word settings of newspaper articles or material from other informal sources, for example *Letter from BMI* (1981). In general his music is marked by strong rhythmic propulsion, a clear lyrical strain and frequent ostinato passages.

DAVID E. CAMPBELL/MICHAEL MECKNA

Gersem, Géry. *See* GHERSEM, GÉRY.

Gershwin, George [Gershvin, Jacob] (*b* Brooklyn, NY, 26 Sept 1898; *d* Hollywood, CA, 11 July 1937). American composer, pianist, and conductor. He began his career as a song plugger in New York's Tin Pan Alley; by the time he was 20 he had established himself as a composer of Broadway shows, and by the age of 30 he was America's most famous and widely accepted composer of concert music.

1. Boyhood. 2. From Broadway to *Rhapsody in Blue*. 3. Years of celebrity and expansion. 4. Gershwin as a songwriter. 5. Concert works and *Porgy and Bess*.

1. BOYHOOD. Gershwin's parents, Moshe Gershovitz and Rose Bruskin, emigrated from Russia to the USA in the 1890s and settled in New York, where they met and married in 1895. The family lived under one roof until

long after the four children were grown. George found an artistic collaborator in the person of his older brother Ira, who wrote the lyrics for most of his songs.

Gershwin's boyhood was marked by an interest in athletics and an indifference to school. Music was seldom heard at home until 1910, when the Gershwins bought their first piano. Though it had been intended for Ira, George quickly took it over; he progressed rapidly in lessons with neighbourhood teachers and about 1912 was accepted as a pupil of Charles Hambitzer. Recognizing 'genius' in Gershwin, Hambitzer took him to concerts and assigned him pieces by composers such as Chopin, Liszt and Debussy. In 1914, however, Gershwin turned to a musical world closer to home when he dropped out of high school and went to work for Jerome H. Remick & Co., a music publishing firm on Tin Pan Alley, for $15 per week.

Remick hired the 15-year-old Gershwin as a song plugger – a salesman who promoted the firm's songs by playing and singing them for performers. Endless hours at the keyboard improved his playing: he cut his first piano rolls in 1915 (by 1926 he had made more than 100), and he became a skilled vocal accompanist. He also began to compose songs and piano pieces of his own, though with no encouragement from his employers. Finally, he aspired to move from Tin Pan Alley, with its emphasis on songs written to commercial formulas, to the Broadway musical stage, where men like Jerome Kern were applying a more highly developed musical artistry to writing scores for entire shows.

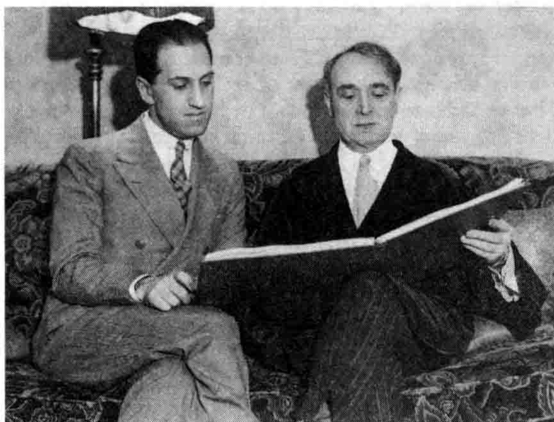
2. From Broadway to 'Rhapsody in Blue'. Gershwin left Remick & Co. in March 1917 and by July was working as the rehearsal pianist for *Miss 1917*, a show by Kern and Victor Herbert. After the show opened in November at the Century Theater, he stayed on as the organizer of and accompanist for popular concerts held there on Sunday evenings. His talent as a composer was also noticed. Although he had previously published little, in early 1918 Max Dreyfus, the head of Harms publishing company, offered him $35 per week for the rights to any songs he might compose in the future. Before the year was out, three Broadway shows carried songs by Gershwin. Soon thereafter he composed his first full Broadway score, for *La La Lucille* which opened on 26 May 1919. Well before his 21st birthday, Gershwin, known as an outstanding pianist, could also claim a Broadway show on the boards, several songs in print, and a prestigious publisher awaiting more.

The 1920s saw Gershwin realize his early promise. *Swanee*, recorded in 1920 by the popular singer Al Jolson, was his first hit song, yielding some $10,000 in composer's royalties in that year alone. Under contract to the producer George White, he composed the music for five annual Broadway reviews (1920–24). For other producers he wrote scores for three Broadway shows and two London ones. *Primrose* (1924), his second London show, was a success, followed in the same year by *Lady be Good!*, starring Fred and Adele Astaire and the first of his shows for which Ira wrote all the lyrics. The latter included the songs *Fascinating Rhythm* and *Oh, lady, be good!*, both of which became standards of the American song repertory.

In 1924 Gershwin became famous for composing and then performing, in a well publicized concert organized by the dance band leader Paul Whiteman, the *Rhapsody in Blue* for piano and orchestra. The work was first performed in New York's Aeolian Hall on 12 February in a concert billed as 'An Experiment in Modern Music'. It purported to demonstrate that the new, rhythmically vivacious dance music called jazz, which most concert musicians and critics considered beneath them, was elevated by the 'symphonic' arrangements in which Whiteman's band specialized. Gershwin's *Rhapsody* won both the audience's approval and the critics' attention. Performed repeatedly, and also recorded, the work also won renown for its composer, as a historical figure – the man who had brought 'jazz' into the concert hall.

Although most observers saw *Rhapsody in Blue* as a new departure for the young songwriter, in fact it reaffirmed Gershwin's continuing involvement with classical music. In 1915 he had begun to study harmony, counterpoint, orchestration and musical form with Kilenyi, continuing at least to 1921. His first classical piece, the *Lullaby* for string quartet (*c*1919), was apparently composed as a harmony exercise for Kilenyi. His second, a brief opera called *Blue Monday*, opened the second act of *George White's Scandals for 1922* but was withdrawn after its first performance. On 1 November 1923 Gershwin performed in an Aeolian Hall recital by the Canadian mezzo soprano Eva Gauthier that helped to set the stage for Whiteman's concert less than three months later. In a programme that ranged from songs by Purcell and Bellini to works by Schoenberg, Hindemith and Bartók, Gauthier included compositions by Gershwin, Kern, Irving Berlin and Walter Donaldson, the latter group accompanied by Gershwin. The musical juxtapositions of *Rhapsody in Blue* had roots in a sensibility that never fully accepted a separation between popular and classical genres.

3. Years of celebrity and expansion. Growing fame and affluence (between 1924 and 1934 Gershwin received more than a quarter of a million dollars from performances, recordings and rental fees of the *Rhapsody in Blue* alone) brought about changes in Gershwin's life. In 1925 he moved his family from an apartment to a town house in a fashionable neighbourhood on New York's upper west side. About the same time he began to develop his interest in the visual arts, collecting paintings, sculptures, prints and drawings, and taking up painting himself. He also became known as a figure in New York theatrical and literary circles, enlivening and often dominating parties with his piano playing.



After the success of the *Rhapsody*, new patterns emerged in Gershwin's composing life. He continued to write scores for the musical theatre, though at a somewhat slower rate. He gave more and more attention to concert music, studying with a succession of teachers including Rubin Goldmark, Riegger and Cowell. He devoted much of the summer of 1925 to composing the Concerto in F for piano and orchestra, commissioned by Walter Damrosch and the New York SO. The Preludes for Piano were introduced in December 1926 as part of a recital in which he accompanied the contralto Marguerite d'Alvarez. During much of 1928 Gershwin was occupied with the composition of the tone poem *An American in Paris*, written in part during a trip to Europe from mid-March to June. Travelling with family members, Gershwin was welcomed as a musical celebrity; he met many composers, including Prokofiev, Milhaud, Poulenc, Ravel, Walton and Berg, and heard both *Rhapsody in Blue* and the Concerto in F played in his honour by French musicians.

In the summer of 1929 he made his début as a conductor in an open-air concert at Lewisohn Stadium in New York where before an audience of more than 15,000 he conducted the New York PO in *An American in Paris* and *Rhapsody in Blue*, playing the piano part of the latter himself. In October of that year, he signed a contract to compose a 'Jewish opera', to be called *The Dybbuk*, for the Metropolitan Opera, but he never fulfilled that commission. Even during his first stay in Hollywood (from November 1930 to February 1931), Gershwin maintained his commitment to concert music; while he and Ira wrote the score for the film *Delicious* (for which they were paid $100,000) and began the Broadway musical *Of Thee I Sing*, he also composed most of his Second Rhapsody for Piano and Orchestra.

Remarkably, Gershwin broadened his musical scope without sacrificing his popularity. Free of false modesty, he reveled in success, which he accepted as no more than his due. By the early 1930s his fame, earning power, and the range of his works made Gershwin unique among American composers.

Established as a composer of talent and ambition, Gershwin maintained his place on Broadway by writing some of his most successful musicals, including *Strike up the Band* (1927; rev. 1930), *Girl Crazy* (1930) and *Of Thee I Sing* (1931), which won a Pulitzer Prize for drama. Apparently never happier than when performing his own music, he played *Rhapsody in Blue* with the Whiteman band during New York showings of *The King of Jazz* (1930), a revue-style film featuring Whiteman. He also continued his concerts and tours, and in 1934–5 he hosted and played on 'Music by Gershwin', a radio programme broadcast by CBS. Nor did he lose his touch as a songwriter. He and Ira signed a contract in June 1936 with RKO film studios, and by August they had moved to Hollywood. The songs they supplied for *Shall we Dance?* (1937), *A Damsel in Distress* (1937) and *The Goldwyn Follies* (1938) were among their best. In addition, Gershwin maintained his study and composition of concert music. While taking lessons with Joseph Schillinger (1932–6) he wrote the *Cuban Overture* (1932), a set of variations for piano and orchestra on the song *I got rhythm* (1914) and his magnum opus, *Porgy and Bess* (1935).

The idea of composing a full-length opera based on DuBose Heyward's novel *Porgy* about life among the black inhabitants of 'Catfish Row' in Charleston, South Carolina, first occurred to Gershwin when he read the book in 1926. After many delays, Heyward and the Gershwin brothers signed a contract in October 1933 with the Theatre Guild in New York, and the collaboration was under way. Gershwin began the score in February 1934; during most of the next summer he stayed in South Carolina, composing and absorbing local colour. By early 1935 the composition was finished, and Gershwin spent the next several months orchestrating the work. Billed as 'an American folk opera', *Porgy and Bess* opened in New York in October 1935 – in a Broadway theatre and not an opera house. It ran for 124 performances, not enough to recover the original investment.

1. George Gershwin (left) with Sergey Koussevitzky

Few events in the history of American music were more shocking than Gershwin's death, seemingly on the threshold of new musical achievements. During the first half of 1937, although he complained of intermittent dizzy spells and feelings of emotional despondency, he continued to perform in public and to compose. On 9 July he fell suddenly into a coma. A brain tumour was diagnosed and emergency surgery performed, but on the morning of 11 July 1937 Gershwin died at the age of 38. Four days later, after memorial services in New York and Hollywood, he was buried in Mount Hope Cemetery, Hastings-on-Hudson, New York.

4. Gershwin as a songwriter. Throughout his professional life Gershwin was first and foremost a songwriter, composing hundreds of songs for Tin Pan Alley, the Broadway stage and Hollywood films, and submitting his work to the judgement of a mass audience. When Gershwin reached maturity around the end of World War I, American popular song was entering an era, the conventions of which, including verse-chorus form and an emphasis on romantic love, would remain standard for decades to come. In the interest of heightening emotional intensity, he and his contemporaries enriched the diatonic idiom they inherited with modulations, melodic chromaticism and unexpected plunges into remote harmonic territory, excursions quickly followed by returns to more familiar terrain, for phrases seldom exceeded eight bars in length. As Gershwin himself told an interviewer around 1929, 'ordinary harmonies, rhythms, sequences, intervals and so on failed to satisfy my ear'. Composing at the piano, 'I would spend hour upon hour trying to change them around so they would satisfy me'. He was also a leader among Broadway songwriters in exploring the possibilities of a rhythm that was at once relaxed, flexible and driving, showing the influence of black American dance.

Two favourites from Gershwin's early years show his mastery of song types introduced by others: *Swanee* is in the square-cut, striding, declamatory style of George M. Cohan; and *The Man I Love*, in which the pervasiveness of one melodic motif is offset by shifting harmonies, employs a tonal idiom and a flexible beat similar to Jerome Kern's earlier songs and to operetta. *The Man I Love*, a slow, romantic song of a type often called a ballad, was followed by others the choruses of which, dominated by melodic figures beginning on an offbeat, invite rubato: *Someone to Watch Over Me* (1926), *But Not for Me* (1930) and *Embraceable You* (1930). In each of these songs the title phrase or a variant of it appears as both a verbal refrain and as the chorus's last words. All three, and all of the songs mentioned below, carry deft lyrics by Ira Gershwin, who once wrote wryly of his craft:

2. *Gershwin's 'Porgy and Bess': Act 1 scene i from the first production, Alvin Theatre, New York, 1935*

'Since most of [my] lyrics ... were arrived at by fitting words mosaically to music already composed, any resemblance to actual poetry, living or dead, is highly improbable'.

Although in songs like *Strike up the band* (1927), *Of thee I sing* (1931) and *Love is sweeping the country* (1931) Gershwin continued to write in the march-like style of *Swanee*, he is remembered more for songs like *Fascinating Rhythm* (1924) and *I got rhythm* (1930), both dominated by syncopation. *I got rhythm* was introduced by Ethel Merman in the musical *Girl Crazy*. Its pattern of circulation shows that once a popular song enters the public marketplace, there is no predicting how it will be used. From the early 1930s into the 1950s *I got rhythm* was widely performed and recorded by popular singers and pianists, by swing bands and 'pops' orchestra leaders, and by jazz performers. Moreover, its harmonic framework, separated from Gershwin's melody and supplied with new ones under such titles as *Cotton Tail*, *Little Benny*, and *Rhythm-a-ning*, served as the most common 32-bar structure in the jazz tradition: the so-called 'rhythm changes'.

In addition to rhythm songs and ballads, the Gershwin brothers also mastered a medium-tempo song style with a relaxed, swinging beat and a jazz-tinged idiom. *Nice Work if You can Get It* (1937) exemplifies this kind of song. The chorus's *A* section features a strong contrast as the smooth, stepwise descent of the first four bars is followed by a sharp, syncopated upturn (ex.1*a*). After a bridge in the relative minor, climaxing on 'Who could ask for anything more?' (a quotation from *I got rhythm*), the last phrase of the *AABA* form brings an added twist: the singer, until now posing as an authority on successful romance, reveals in a two-bar phrase extension that he has been speaking more from imagination than experience. Here the music, after preparing for a cadence identical to those of the first and second sections, delivers one that is different, yet so offhandedly satisfying that it seems inevitable (ex.1*b*). The words keep emotion at an arm's length, treating love as a rational game, and the song wears its craftsmanship as lightly as its narrator does his disappointment. Its general tone of civility and its inventive details of musical construction, absorbed by the relaxed insistence of its rhythm, combine to create one more sensibility in the Gershwin brothers' exploration of romantic love.

5. Concert works and 'Porgy and Bess'. Gershwin approached the concert world with assets that no other American composer of his generation enjoyed. A proven master of melody, he was also accustomed to having his works judged by audiences. Because his music consistently gained approval, he wrote with confidence that his talents outweighed his deficiencies of technique or experience. That confidence was borne out by his composing – in less than 12 years, while maintaining separate careers as a songwriter, pianist and conductor – four large-scale works of enduring appeal: the *Rhapsody in Blue*, the Concerto in F, *An American in Paris* and *Porgy and Bess*.

The melodies of Gershwin's concert works are surely the chief reason for their appeal. They share with many of his popular songs a trait that helps to imprint them firmly on the listener's memory: the opening material is consistently restated before contrasting material is heard. This is most conspicuous in the soaring, lyric, if somewhat square themes of *Rhapsody in Blue*, in the first movement of the Concerto and in *An American in Paris*; however it can also be found in more fragmentary material. The

(b)

Nice work if you can get it. And if you get it Won't you tell me how?

Rhapsody, for example, begins with two distinctive melodies, each of which first stands on its own, yet within a short time becomes the first phrase of a longer melody with an *AABA* design.

Some thematic phrases that Gershwin restates are themselves built from repetitions of smaller motifs. The Rachmaninov-like opening of the Concerto's third movement, which is repeated four times in the first 38 bars, begins with a statement and restatement of a two-bar figure. The first 20 bars of *An American in Paris* contain a full statement and restatement of an eight-bar theme that presents the same one-bar motif six times. This technique is found not only in Gershwin's themes but in introductory, transition and development sections as well. The Concerto starts with a 50-bar introduction in which all but six bars state or restate one of three figures; the transition out of the first thematic section of *An American in Paris* (rehearsal nos.20–23) is similarly structured. Although in these and other such passages phrase units may occasionally be three or five bars long, four-bar units are by far the most common, and their absence, as at the start of the Concerto's third movement, creates a sense of disruption. Tending towards symmetry both in the pairing of opening phrases and in the reliance on parallel units of two, four and eight bars, Gershwin's melodic materials seem designed to impose regularity and coherence even in the ear of an inexperienced listener.

If Gershwin's melodic structures seem old-fashioned for a composer writing concert music in the 1920s and 30s, his tonal vocabulary sounds more up-to-date. Perhaps the most striking characteristic of Gershwin's melodies is their reliance on blue notes. Sometimes these notes function as dissonances, as in one theme of the *Rhapsody*, where on strong beats they clash with the bass (ex.2). At other times they soften the melodic contour. In the *Rhapsody's* opening theme, the presence of both major and minor 7ths in the second chord, and of both major and minor 3rds in the melody (bars 2–3) manifests in sound the aptness of the work's title (ex.3). In the Concerto, blues-tinged tonality appears more subtly in the opening theme, which avoids the tonic chord until its tenth bar and then touches it only briefly, and on a weak beat, before moving on from the raised to the lowered 3rd of the tonic triad (ex.4). Occasionally the blues idiom provides a harmonic structure for Gershwin, as in the second of his three piano preludes on the 12-bar blues progression. That progression also serves as a reference in the Concerto's second movement and in *An American in Paris*.

Because Gershwin's concert works draw heavily on black American elements, it seems fitting that his largest composition, *Porgy and Bess*, should be a drama about black Americans. Nor is it surprising that the work's melodic idiom – from Porgy's identifying motif, to the opera's main love duet, to the satirical songs of the drug peddler Sportin' Life, to the choral numbers – is saturated with the inflected 3rds, 5ths and 7ths of black American popular music, and sometimes infused with its syncopated, driving rhythm. Although both opera critics and black American commentators have criticized *Porgy and Bess* for hybrid features, the work is full of moments that show Gershwin at his most convincing. Act 1 scene ii, for example, opens with a scene of mourning based on call and response. A soloist and chorus alternate, one impassioned solo call being answered by darkening series of chords, supporting a whole-tone descent through an octave, like the tolling of a bell. The harmonies are generated by unusual voice-leading: against five descending upper voices the bass line ascends. Parallel octaves between soprano and tenor, alto and baritone, lend an artless quality to the passage; yet only a sophisticated ear could have calculated the progression's freshness (ex.5).

Gershwin's approach to form in his concert works shows him as a practical composer who took care that technique did not overshadow expression. *Rhapsody in Blue*, reportedly written in three weeks, draws vitality from its juxtapositions of the piano and orchestra, and of jazz-like and classical materials. Its essence lies more in these contrasts, and in the strength of Gershwin's melodies, than in its overall shape. The Concerto, a more ambitious undertaking, filled several months of Gershwin's time and even received a trial performance before its delivery to Damrosch and the New York SO. Like the *Rhapsody*, it also uses sharp juxtapositions, but its integration through cyclic form and thematic transformation, both standard 19th-century techniques, reflects Gershwin's study. More than the earlier *Rhapsody*, the Concerto forms a convincing whole, the impact of which derives as much from its entire structure as from its separate parts. In that way too the Concerto outdoes the tone poem *An American in Paris*, whose form was apparently inspired by a programme. For all of its élan, *An American in Paris* is more or less a medley of excellent tunes, varied and extended, and clad in attractive orchestral garb. Gershwin's treatment of the main lyric theme recalls his own piano playing and the arrangements he published in his *Song-Book*. In each restatement of the melody, he varies the orchestration and the harmony, or the 'responses' to the theme's opening 'call', but the melody itself remains intact.

The presence of Gershwin's music at the end of the 20th century ensures him a place in American music history. Yet it is not quite the place claimed for him by some of his contemporaries. For them, his great achievement lay in bringing together musical spheres that had been considered separate: popular and classical traditions in his concert pieces, black American folk music and opera in *Porgy and Bess*. At the beginning of the 21st century such matters of taxonomy no longer seem as important; rather it is the sheer musical satisfaction that his compositions – songs and concert works alike – still provide for listeners, thanks in large part to the skill and commitment and artistry of the many musicians who perform them, that is his legacy.

WORKS

Only published songs listed for stage and film scores; for fuller details see W. Rimler: *A Gershwin Companion: a Critical Inventory and Discography, 1916–1984* (Ann Arbor, 1991) and E. Jablonski: *Gershwin: a Biography* (New York, 1987). Songs marked with an asterisk were completed by Kay Swift from Gershwin's tune notebooks with lyrics provided by Ira Gershwin. Unless otherwise stated lyrics for all songs are by Ira Gershwin. Most of Gershwin's music for the theatre was not orchestrated by the composer although he may have scored some works from the mid-1920s on. Most extant MSS are in *DLC*.

RICHARD CRAWFORD (text), WAYNE J. SCHNEIDER (work-list), NORBERT CARNOVALE (bibliography)

Gershwin, Ira [Gershvin, Israel] (*b* New York, 6 Dec 1896; *d* Beverly Hills, CA, 17 Aug 1983). American lyricist. He submitted light verse to newspapers and periodicals as a student and while working at various jobs before joining his brother George Gershwin to write songs. Their first song to receive a public hearing was *The Real American Folk Song*, a salute to ragtime, which was introduced by Nora Bayes in *Ladies First* (1918). Although Gershwin collaborated with other composers (at first under the pseudonym Arthur Francis to avoid being judged by George's reputation), his close partnership with his brother extended from 1924, when they wrote their first musical comedy, *Lady be Good!*, until George's death in 1937. In addition to more than a dozen Broadway shows, including the first musical comedy to be awarded a Pulitzer Prize for drama, *Of Thee I Sing* (1931), they also contributed songs to a number of films. After George's death Ira worked with a succession of composers, including Weill (*Lady in the Dark*, 1941), Kern (*Cover Girl*, 1944), Schwartz (*Park Avenue*, 1946), and Arlen (*A Star is Born*, 1954).

During his lifetime, Ira Gershwin was considered by many to be the less talented of the brothers and they rarely accorded his lyrics the same attention as that of his contemporaries such as Hart or Porter. Subsequently, however, Gershwin's lyrics have come to be considered among the finest in popular American culture and recent revivals and new recordings of his works have earned him a prominence he rarely enjoyed during his long career.

Unlike some of his contemporaries, Gershwin presented no consistent view of life in his lyrics. His verses are generally humorous and sunny, and make frequent recourse to such slang shortcuts as 'gloom can jump in the riv''. He had a deep understanding of his brother's music, and established at the Library of Congress a Gershwin Archive consisting of carefully annotated documents mostly associated with George. He published a collection of his lyrics, with discursive annotations, as *Lyrics on Several Occasions* (New York, 1959, 2/1997).

WORKS
(*selective list*)

music by George Gershwin unless otherwise stated

STAGE

Dates are those of the first New York performance

Two Little Girls in Blue (P. Lannin, V. Youmans), 3 May 1921 [incl. Oh, Me! Oh, My!]

GERALD BORDMAN/THOMAS S. HISCHAK

Gerson, George (*b* Copenhagen, 10 Oct 1790; *d* Copenhagen, 16 Feb 1825). Danish composer and violinist. As a child he was taught the violin, and in 1805 he was sent for a commercial education to Hamburg. There he learnt to play the piano, and he soon became an active member of private musical circles, for which he composed songs and chamber music. Of his 219 compositions, 60 were composed during his years in Hamburg, some (e.g. the string quartets nos.2–4, 1808) under the supervision of the violinist Andreas Romberg. On his return to Copenhagen in 1812 he was employed by the merchant Joseph Hambro, who made him his partner in 1816. Both as a violinist and as an organizer Gerson played a leading role in the musical life of Copenhagen, which was then largely based on private clubs and societies.

Only a few of Gerson's many piano pieces and songs have been printed (notably 6 songs published in Copenhagen, 1842); their musical style shows the influence of his models, Haydn, Romberg and especially Mozart. His best songs reveal an original melodic gift and a refined sense of declamation, and though his instrumental works, including a symphony (1813–17) and a violin concerto (1821), are more impressive for his assured handling of form and texture than for musical invention, they are important as they illustrate an interesting chapter of Danish music history. His collected works in five autograph volumes and an autograph thematic catalogue are in the Royal Library, Copenhagen. (N.M. Jensen: *Den danske romance 1800–1850 og dens musikalske forudsaetninger* (Copenhagen, 1964) [with Ger. summary])

TORBEN SCHOUSBOE

Gerson, Jean Charlier de [Doctor Christianissimus] (*b* Gerson-lès-Barby, diocese of Reims, 13 December 1363; *d* Lyons, 12 July 1429). French theologian, reformer, educator, poet and mystic. At the age of 14 he entered the Collège de Navarre, where he studied under Egide Deschamps and Pierre d'Ailly. In 1381 he obtained the licence ès lettres and began his study of theology. His first course of lectures on biblical exegesis in 1387–8 marked the beginning of a lifelong career of university teaching. He took the degree of Master of Theology in 1392 and three years later succeeded Pierre d'Ailly as chancellor of the University of Paris. In this capacity he was responsible for bringing France back to the obedience of the Antipope Benedict XIII (Pedro de Luna) in 1402, and of restoring the Dominicans (1403) after their expulsion from the university because of their views on the Immaculate Conception. Apart from the chancellorship, Gerson's ecclesiastical appointments included the deanery of St Donatian in Bruges (1394), a benefice offered him by his patron, Philip the Bold, Duke of Burgundy, a canonry of Notre Dame de Paris (1403) which brought him the responsibility (1404) for the choir school of Notre Dame, and the incumbency of St Jean-en-Grève (1408). He attended the Council of Konstanz (1414–18) where his influence was far-reaching and decisive. For political reasons he never returned to Paris. He died in retirement, having completed his last work three days before his death.

Besides his teaching and pastoral duties Gerson was deeply involved in wider issues, both religious and political. He strove to promote reform of the Church, and worked actively to heal the breach between East and West that was dividing Christendom.

Gerson's writings include studies on the constitution and authority of the Church, sermons, university lectures, spiritual and pastoral writings in Latin and French, other doctrinal works, poetical works and some 87 letters that are of historical and personal interest. As an early promoter of the cult of St Joseph (1413–14), he also wrote the text of a mass and an Office in honour of the saint. A number of the writings deal with music viewed from a philosophical or mystical angle. He developed an all-encompassing view of music in which Christ is the heavenly precentor in the total harmony of creation. The *Tres tractatus de canticis* contain the *De canticorum originali ratione* (before 1426), the *De canticordo* (before 1423) and the *De canticis* (between 1424 and 1426). The point of departure in these writings is the definition of the term 'canticum'. Many traditional and contemporary musical instruments are listed. His exposition of musical theory is traditionally orthodox, firmly rooted in Boethius and Isidore of Seville. The second part of *De canticis* is a poem in praise of music, *Carmen de laude musice*. The *Collectorium super Magnificat* published in Esslingen in 1473 contains one of the earliest examples of music printing (only five notes); it is a series of 12 tracts collected and edited by the author himself, and in it he attributed moral significance to the musical notes *sol*, *fa*, *mi*, *re* and *ut* and the five vowels A E I O U.

But Gerson's interest in music was not merely speculative and mystical. His very practical instructions to those in charge of the choir school of Notre Dame show the

author of the *Doctrina pro pueris ecclesie parisiensis* (written to complete the new rules prescribed by the chapter on 15 April 1411) to have had a profound understanding of the problems of education, in particular that of medieval choristers. The master of song was to teach the boys plainchant, principally, and counterpoint, and a few well-chosen discants, but no frivolous or lewd airs. Discant was banned by statute until the boys' voices had changed, and even then choristers were not to spend too long in the study of it.

MARY BERRY

Gersonides [Levi ben Gershom (Gershon, Gerson); Leo Hebraeus; Magister Leon de Bagnols; RaLBaG] (*b* Bagnols, 1288; *d* Provence, 1344). French mathematician. He lived in Provence, primarily in Orange, north of Avignon, an area that offered protection to Jews and a haven from King Philip the Fair's expulsion of Jews in 1306. His works were known in both Jewish and Christian circles. He wrote in Hebrew, and his writings were translated into Latin; as a result he is known by several different names. He is referred to as Levi ben Gershom or RaLBaG (an acronym of Rabbi Levi ben Gershom) in Hebrew texts, and as Gersonides, Gerson and several other variants in Latin sources. His mathematical works include a commentary on Euclid and a treatise on trigonometry. He was also an astronomer, biblical exegete and neo-Aristotelian philosopher. In addition to commentaries on Aristotle and Ibn Rushd, his major work was *Sefer milhamot Adonai* ('The Wars of the Lord', 1317–29), which treats the central philosophical debates of his time, such as the immortality of the soul and the creation of the world.

At the request of Philippe de Vitry, Gersonides wrote *De numeris harmonicis* in 1343. Based on a postulate given by Vitry, it includes the following:

omnium numerorum armonicorum quilibet 2 numero distinguntur praeter istos 1 et 2, 2 et 3, 3 et 4, 8 et 9. Armonicum autem numerum sic describit: armonicus numerus est, qui et quelibet ejus pars praeter unitatem per equa 2 vel 3 continuo vel vice versa usque ad ipsam unitatem findi potest. Sunt igitur continui, 1, 2, 4, 8 ... et 1, 3, 9, 27 ... et vice versa 6, 12, 1[8], et 24 ... (Carlebach, 129)

(The difference between any of the harmonic numbers is 2 except between 1 and 2, 2 and 3, 3 and 4, and 8 and 9. He [Vitry] defines harmonic numbers as follows: a harmonic number is divisible (except for 1) either by 2 or 3 in succession or alternately one with the other continuously down to one. They are, therefore, in succession: 1, 2, 4, 8 ... and 1, 3, 9, 27 ... and alternately 6, 12, 18 and 24 ...)

Gersonides and Vitry defined a harmonic number as one that is a power of 2 or 3 and is therefore divisible by 2 or 3. Except for the smallest numbers (1, 2, 3, 4, 6, 8 and 9), the difference between any two harmonic numbers will be 2 or more; consequently, no number is repeated.

Nineteenth-century musicologists, such as Riemann, believed that *De numeris harmonicis* concerned the calculation of musical intervals. In the 1940s Werner and Sonne proposed that *De numeris harmonicis* was a mathematical proof of Vitry's mensural system (as explained in the collection of writings formerly thought to be a treatise known as *Ars nova*) and was intended to demonstrate that any combination of perfect and imperfect mensural divisions would produce only one, unique number of *minime* (even allowing for differences due to dots of alteration or dots of perfection). The numerical patterns in *De numeris harmonicis*, however, are similar to those in a passage in Plato's *Timaeus* (35ff) in which the Creator marks off divisions of the soul by doubling and tripling a given unit to produce the series 1, 2, 4, 8 and the series 1, 3, 9, 27. The ratios between the two series produce the basic musical intervals (3:2, 4:3 and 9:8). The term 'harmonic number' was later used by Aristotle (*De anima* [*On the Soul*] 406b.25ff) and was then passed on to medieval writers through commentaries on Plato's and Aristotle's works. Gersonides' *De numeris harmonicis*, therefore, is not an effort to generate a mathematical proof of the *Ars nova* mensural system, but a development within the commentaries on the '*Timaeus*-scale' to extend the sequence of harmonic numbers. Whereas Plato limited the harmonic numbers to eight, Gersonides' treatise expands each series indefinitely and uses the two series as factors to create new 'harmonic numbers' (i.e. 2 x 3 = 6; 3 x 4 = 12; 2 x 9 = 18; 3 x 8 = 24 ...). Gersonides probably transmitted this concept to the theorist Johannes Boen (*Musica*) and to the Parisian scholastic philosopher NICOLE ORESME (*Le livre du ciel et du monde* and *Tractatus de configurationibus qualitatum et motuum*). A reliable critical text of Gersonides' *De numeris harmonicis* has yet to be undertaken (Carlebach's 1910 edition is generally regarded as seriously flawed). Although no Hebrew sources of the works are known to have survived, there are at least two extant Latin sources: *CH-Bu* F.II.33 (used by Carlebach) and *F-Pn* lat.7378A.

C. MATTHEW BALENSUELA

Gerson-Kiwi, (Esther) Edith (*b* Berlin, 13 May 1908; *d* Jerusalem, 16 July 1992). Israeli musicologist and ethnomusicologist of German origin. She studied at the Stern Conservatory (1918–25) and in 1930 she obtained a diploma in piano from the Leipzig Musikhochchule, working principally under Ramin. In 1931 she studied the harpsichord with Wanda Landowska at the Ecole de Musique Ancienne; she then returned to Germany to study musicology with Gurlitt at the University of Freiburg and Kroyer at the University of Leipzig; she completed the doctorate in 1933 under Besseler at the University of Heidelberg with a dissertation on the 16th-century Italian canzonetta. In 1934 she taught at the Liceo Musicale, Bologna, while studying palaeography and earning a diploma in library studies at Bologna University (1934).

The nascent Nazi regime prompted her and her parents to emigrate in 1935 to Palestine where they settled in Jerusalem. From 1937 she taught the piano and music history at the music academies in Jerusalem and Tel-Aviv. Her interest in ethnomusicology began with her association with Robert Lachmann at the Jerusalem Archive for Oriental Music. As his assistant, she became, by extension, a student of the Berlin school of comparative musicology whose concepts and methods she incorporated in her subsequent ethnomusicological researches. In 1947 she took charge of the archive, which was then linked with the Palestine Institute of Folklore and Ethnology (in 1953 both the institute and the archive were incorporated into the School of Oriental Studies at the Hebrew University) and in 1949 she joined the faculty at the Music Teacher's College. Soon after the establishment of the musicology departments at the Hebrew University (1965) and Tel-Aviv University (1966) she became a senior lecturer at both and was appointed professor at Tel-Aviv in 1969. In 1963 she founded the Museum of Musical Instruments of the Rubin Academy of Music, Jerusalem. She served on the executive boards of the IFMC (1970–82), the International Institute of Comparative Studies of Music and Documentation and as a council member of the IMS and the Society for Ethnomusicology. In 1974 she was elected chairman of the Israeli Musicological Society and served later as its vice-chairman and treasurer (1978–9); she was also on the editorial board of *Orbis musicae*.

As an indefatigable collector of traditional music, she took advantage of the multi-ethnic communities residing in and around Jersualem whose sacred and secular music she recorded, transcribed and studied. Her publications testify to a wide spectrum of interests, the core of which centres on Jewish (primarily Oriental and Sephardi), Arabic and Persian traditions, on which she became an outstanding authority. Gerson-Kiwi laid the foundation for ethnomusicological studies in Israel, but unlike A.Z. Idelsohn whose fieldwork in Jersusalem preceded hers by one generation, she was able to train numerous scholars. She left a vast legacy of precious archival material (including recordings, documentary films, manuscripts), which still awaits investigation.

ISRAEL J. KATZ

Gerstenberg, Heinrich Wilhelm von (*b* Tondern, 3 Jan 1727; *d* Altona, 1 Nov 1823). German poet, critic and musician. From 1757 he studied law at Jena, where inspired by such literary associates as Claudius, Münter and J.L. Schlosser he began his own poetic creations. In 1759, after the considerable success of his dramatic poem *Tändeleyen* (part of which was later set as a cantata by C.P.E. Bach), he abandoned law in favour of Danish military service, participating in the Russian campaign of 1762 and eventually settling in Copenhagen for about 12 years. There he became the close friend of Klopstock, studied music with J.A. Scheibe, and instituted a series of musical evenings at his home, attended equally by poets and musicians, in which he himself sometimes performed and sang. This custom was continued after he moved to Lübeck as 'Danish Resident' in 1775. Financial considerations forced him to sell this position in 1783, and from 1785 he was a lottery official in Altona.

Gerstenberg was a major figure of the *Sturm und Drang* movement, in which his tragedy *Ugolino* (1768) and his critical series *Briefe über Merkwürdigkeiten der Literatur* (1766–70) were important early landmarks. Interested in the new possibilities of relating words to music, like many other north European poets of his time, he established correspondence with C.P.E. Bach, J.C.F. Bach and other musicians on the problem of expressing poetic meaning through purely instrumental music. His addition of two separate texts to C.P.E. Bach's Fantasy in C minor (the last of the *Probestücke* which accompanied his *Versuch*) was an attempt not merely to rise above the dry piety of contemporary lied texts, but also to produce a new synthesis of word and note, combining pure instrumental music, pure song and programme music. His *Ariadne auf Naxos* (1767), one of the most important cantata texts of its time, was set by Scheibe, J.C.F. Bach and J.F. Reichardt, and was adapted by Brandes as the text of Benda's melodrama. Gerstenberg also wrote a melodrama *Minona oder Die Angelsachsen* (1786), and *Das Mohrenmädchen* (set as the solo cantata *Die Amerikanerin* by J.C.F. Bach, 1776), and published articles on recitative and figured bass.

E. EUGENE HELM

Gerstenberg, Johann Daniel (*b* Frankenhausen, 26 March 1758; *d* Hildesheim, 7 Dec 1841). German music publisher and composer. From 1778 to 1786 he attended the Gymnasium Andreanum in Hildesheim as a singer, and then studied law in Leipzig until 1788. On 26 March 1792 he opened a music and book shop in St Petersburg after spending a short period as a private tutor in Kiev; in 1793 he made his schoolfriend Friedrich August Dittmar a partner in the business, which had come to the fore with many musical and literary publications. He opened his own music engraving works in 1795, and in 1796 went to Gotha, where he founded a branch of the St Petersburg firm, but moved to Hildesheim in the same year. Connections with the parent firm in St Petersburg steadily weakened, and Dittmar carried on the business alone under many different trade names until 1808. Between 1792 and 1799 the firm published more than 200 musical works. Known as both a composer and an author, Gerstenberg wrote six piano sonatas and two collections of lieder as well as many contributions for various journals and yearbooks that he published in St Petersburg.

WALTER GERSTENBERG

Gerstenberg, Walter (*b* Hildesheim, 26 Dec 1904; *d* Tübingen, 26 Oct 1988). German musicologist. He studied musicology from 1924 at Berlin University and from 1926 at Leipzig University (especially with Kroyer and Zenck); in 1929 he took the doctorate at Leipzig with a dissertation on Scarlatti's keyboard works. From 1929 to 1932 he was assistant lecturer at the musicological institute and research assistant at the instrument museum of Leipzig University. From 1932 to 1938 he was assistant lecturer at the musicological institute of Cologne University, where in 1935 he completed the *Habilitation* with a

historical study of Protestant church music. He was then professor of musicology at Rostock University (1941–8), the Free University, Berlin (1948–52), Tübingen University (1952–8), Heidelberg University (1958) and from 1959 until his retirement in 1970 again at Tübingen University. In 1974 he was made honorary professor of musicology at Salzburg University.

Gerstenberg's research centred on music history from the 16th century to the beginning of the 19th, particularly Bach, Mozart and Schubert. He wrote a series of studies on music performance and was editor of Senfl's motets for the complete edition of that composer's works. He succeeded Zenck as director of the complete edition of the works of Willaert, to which he contributed four volumes. He was editor of the Tübinger Bach-Studien and co-editor of the *Archiv für Musikwissenschaft*. His main importance for German musicology lay in the field of organization. He played an important role in founding the new collected editions of Bach, Mozart and Schubert; he was also president of the Internationale Schubert-Gesellschaft.

HANS HEINRICH EGGEBRECHT/WOLFGANG HORN

Gerstenbüttel, Joachim (*b* Wismar, 27 June 1647; *d* Hamburg, 10 April 1721). German composer and instrumentalist. He attended school in Wismar and studied theology at the universities of Rostock (1662–7) and Wittenberg (1667–72). He had learnt music as a boy, but applied himself to it more seriously when he suffered an attack of melancholia hypochondriaca in 1669. Since he never enjoyed good health, he broke off his theological studies in spite of his success in them and settled in Hamburg in 1672 as a music teacher and domestic tutor. He played keyboard instruments and the violin and became a 'good bassist' (*Walther ML*). In 1674 he was appointed Christoph Bernhard's successor as Kantor at the Johanneum Lateinschule and *director musices* of the city's main churches, but he did not take up his post until 10 February 1675 because of a complaint of unconstitutionality. Meanwhile, the Convictorium founded by Thomas Selle had been dissolved, and Gerstenbüttel attempted to reorganize and strengthen the church music and the Kantorei, but with only limited success because of strong competition from opera and oratorio. Gerstenbüttel laboured for years on a translation of the *Cantica sacra* (1588) of Franz Eler. Since (unlike his successor Telemann) he regarded his position as being exclusively dedicated to the praise of God, he rejected opera out of hand – an attitude consistent with the position of some Orthodox theologians and Pietistic pastors.

The structure of Gerstenbüttel's cantatas was also designed to put music to the service of God. He employed various types of text and musical settings, but not solo cantatas or exclusively free texts. His works are not strongly expressive, but the declamation is suited to the meaning of the text, which is presented rather than interpreted. However, his compositions do contain some complex contrapuntal movements (*Wo soll ich fliehen hin*) and expressive constructions (*Ich schreie zu dem Herrn*). An exception to Gerstenbüttel's usual preference for string instruments is *Lobet den Herrn, ihr seine Engel*, for which he indicates the use of wind instruments (see Webber, 113). In respect of their technical requirements, as well as their structures, Gerstenbüttel's compositions differ considerably from the sacred works of organists, opera composers and Kapellmeisters trained in Italian music. They reflect not only the influence of central German traditions in north Germany, but his own endeavours to write church music that would serve the liturgy and make the text easily comprehensible.

WORKS

all extant works in D-Bsb Bokemeyer Collection, dated before 1695

Ach Herr lass deine lieben Engelein, SAB, 2 clarino, timp, 2vn, bn, bc (anon., see Krummacher, 1965, p.170); Ach Herr wie ist meiner Feinde, SSATB, 2 vn, 2 va, bn, bc, 1686; Da die Zeit erfüllet war, SAB, 2 vn, bn, bc; Dazu ist erschienen der Sohn Gottes, SSATB, 2 vn, 2 va, bn, bc; Der Gerechte wird grünen, SATB, 2 vn, bn, bc; Der Herr ist mein Hirte, SSB, 2 vn, bn, bc; Der Herr sprach zu meinem Herren, SSATTB, 2 vn, 3 va, bn, bc; Die Güte des Herrn ists, ATB, 2 vn, 2 va, bn, bc; Erhalt uns Herr bey deinem Wort, SSATB, 2 vn, 2 va, bn, bc; Gelobet sey der Herr täglich, SAT, 2 vn, bc; Gelobet sey Gott, SATB, 2 vn, bn, bc; Habe deine Lust an den Herrn, SATB, 2 vn, 2 va, bn, bc; Herr erhöre mein Gebeth, SSATB, 2 vn, 2 va, bn, bc; Heut triumphieret Gottes Sohn, STB, 2 clarino, timp, bc (anon., see Krummacher, 1965, p.170)

JOACHIM KREMER

Gerster, Etelka (*b* Kassa [now Košice, Slovakia], 25 June 1855; *d* Pontecchio di Bologna, 20 Aug 1920). Hungarian soprano. She studied with Mathilde Marchesi in Vienna, and made her début in 1876 as Gilda (*Rigoletto*) at La Fenice, Venice, where she also sang Ophelia (*Hamlet*). She made her London début at Her Majesty's Theatre in 1877 as Amina (*La sonnambula*) and also sang Lucia, Elvira (*I puritani*), Gilda and the Queen of Night. The following year she made her New York début as Amina at the Academy of Music, where she appeared in the first American performance of Balfe's *Il talismano* (1878) and also sang Elsa (1881). Her rivalry with Patti was aggravated when they sang together on tour in *Les Huguenots* (Gerster as Marguerite de Valois, Patti as Valentine). Although she had a voice of great brilliance and flexibility, as well as complete security of technique, Gerster was unable to match the elder diva in personality or experience. In 1890 she gave one performance of Amina at Covent Garden, then retired. From 1896 to 1917 she taught singing in Berlin.

ELIZABETH FORBES

Gerster, Ottmar (*b* Braunfels, Hesse, 29 June 1897; *d* Borsdorf, nr Leipzig, 31 Aug 1969). German composer. After studying the violin with Adolf Rebner and composition with Sekles at the Hoch Conservatory in Frankfurt (1918–20), he worked as a performer, playing viola with the Frankfurt SO and in the Lenzewski Quartet. In 1926 he won the Schott composition prize for his Divertimento for violin and viola. The following year he was appointed to teach violin, viola, harmony and counterpoint at the Folkwang-Schule in Essen, where he remained for 20 years. Gerster's early association with workers' choirs and his commitment to the German socialist movement during the 1920s and early 30s did not seem to hinder his success as an operatic composer during the Third Reich. His opera, *Madame Liselotte*, heard in Essen only eight months after Hitler came to power, attracted favourable reviews on account of its quasi-nationalist plot. *Enoch Arden*, first performed three years later (1936), proved even more successful and was given over 500 times in Germany between 1936 and 1944. The directness of musical language in this and his next opera *Die Hexe von Passau* (1941) was harnessed after 1945 to make Gerster one of the leading figures in the musical life of the DDR. From 1947 to 1951 he taught harmony, counterpoint and composition at the Weimar Musikhochschule, of which he was also the director from 1948. In 1951 he became a professor of composition at Leipzig Musikhochschule, a position he held until 1962. He was actively involved in arts policies in the DDR and also played a part in the restructuring of higher education. He was a founding member of both the Akademie der Künste (1950) and the Verband Deutscher Komponisten (1951), an organization of which he was chairman until 1960. His desire to write accessible music is clearly demonstrated in his works of the 1950s and 60s, such as *Eisenhüttenkombinat Ost* (1951), the Second Symphony (1953) and the Symphonic Variations (1963). His awards include the Düsseldorf Schumann Prize (1941), the Leipzig Arts Prize (1965) and the National Prize of the DDR (1951, 1967).

WORKS
(*selective list*)

STAGE

Ops: Frau Potiphar (Der Rock des Joseph) (M. Goldschmidt), 1927; Madame Liselotte (F. Clemens, P. Ginthum), Essen, 1933; Enoch Arden (K.M. von Levetzow, after A. Tennyson), Düsseldorf, 1936; Die Hexe von Passau (R. Billinger), Düsseldorf, 1941; Das verzauberte Ich (P. Koch, after F. Raimund), Wuppertal, 1949; Der fröhliche Sünder (O. Gerster, after L. Solowjow, V. Witkowitsch), Weimar, 1963

Ballet: Der ewige Kreis (Clemens), 1934, Duisburg, 1938

VERA GRÜTZNER (with ERIK LEVI)

Gertler, André [Endre] (*b* Budapest, 26 July 1907). Belgian violinist of Hungarian birth. He studied the violin with Hubay and composition with Kodály at the Franz Liszt Academy in Budapest (1914–25). His international career began in 1920 and in 1928 he settled in Brussels. With his impeccable intonation, commitment and strong, forthright yet lyrical style, he was an authoritative interpreter of 20th-century music, and gave first performances of works by Bentzon, Larsson, Seiber, Tansman and Voss. From 1925 to 1938 he played in duo concerts of Classical and contemporary music with Bartók, a close friend, and in 1945 gave the first European performance of Bartók's Solo Sonata in London. His recordings of all Bartók's violin compositions were awarded the Grand Prix du Disque in Paris in 1967; other recordings include Berg's Violin Concerto (of which he gave some 150 public performances) and the concertos of Milhaud, Hartmann and Hindemith.

In 1931 in Brussels Gertler founded a string quartet bearing his name (it disbanded in 1951). In recital he was often heard with his wife, the pianist Diane Andersen. He was appointed a professor at the Brussels Conservatory in 1940; from 1954 to 1959 he taught at the Staatliche Hochschule für Musik in Cologne and from 1964 at the Hochschule für Musik und Theater, Hanover. He regularly held masterclasses and served on international competition juries. Gertler transcribed Bartók's Piano Sonatina for violin and piano, and composed cadenzas to the violin concertos of Beethoven and Mozart (G major).

Gervais, Charles-Hubert (*b* Paris, 19 Feb 1671; *d* Paris, 15 Jan 1744). French composer. The son of Jeanne Mercier and Hubert Gervais, who was *garçon de la chambre* to the Duke of Orléans (brother of Louis XIV), he grew up in the Palais Royal, where he probably studied music with the duke's musicians. He may also have been a page in the choir school of his parish of St Eustache. From 1697 he was *ordinaire de la musique* to Philippe de Bourbon, Duke of Chartres (who became Duke of Orléans in 1701 and Regent of France in 1715), and succeeded Sieur de Sablières in the position of *maître de musique de la chambre* in 1700. He was subsequently made *intendant* (perhaps in 1701) and then *surintendant* (perhaps in 1722). In this capacity he taught music to the Duke of Chartres, who had a great love of Italian music, and helped him to compose two operas, *Penthée* (*c*1703) and *Suite d'Armide, ou Jérusalem délivrée* (*c*1704). On 18 October 1701 Gervais married Françoise du Vivier (*d* 1732), who bore him three children. He succeeded his father as *garçon de la chambre* on 24 April 1702 and retained that appointment until his death (he seems to have lost his post as *surintendant* when the regent died). Gervais had his first public successes with his opera *Hypermnestre* (1716) and his ballet *Les amours de Protée* (1720). In January 1723, at the regent's request, Michel-Richard de Lalande officially relinquished three of his four three-month terms of duty as *sous-maître* of the Chapelle Royale. The three posts were then redistributed, on a non-competitive basis, to André Campra, Nicolas Bernier and Gervais. In 1726 Lalande's position fell vacant on his death, and his duties were shared between the remaining *sous-maîtres*. When Bernier died in 1734 Campra and Gervais carried out this work on their own until 1738, when Henri Madin and Antoine Blanchard were appointed to help them. Several of Gervais's motets were enthusiastically received at the Concert Spirituel between 1736 and 1738, and five continued to be sung at Versailles until 1792.

Gervais's style, which is sometimes conservative, reflects the quest of the musicians of the Palais Royal for a *goûts réunis*. *Méduse*, his first *tragédie en musique*, failed to achieve the success expected because of a cabal against its librettist, Claude Boyer. The music, which owes much to the example of Lully, already shows a real feeling for instrumentation which was to flower in *Hypermnestre*, the best opera of the Regency period. *Hypermnestre* and *Les amours de Protée* also contain passages written in concertante style which anticipate Rameau. The six cantatas published in 1712 are in the same italianate vein. The *grands motets* follow established models; the clarity of their style is reminiscent of Lalande, their melodic and harmonic freshness of Campra and their contrapuntal density of Bernier. Some movements also call Carissimi and Corelli to mind. The *récits* oscillate between the declamatory French style and Italian concertante writing; the choruses usually begin with imitation, but frequently continue in homophonic style, with the exception of some fugues, as in one of the *Lauda Jerusalem* settings; the orchestral texture is often in five parts. While Gervais does not always manage to avoid grandiloquence (notably in his use of many dissonances), his motets are among the best written for the Chapelle.

WORKS

OPERAS

Méduse (tragédie en musique, prol., 5, C. Boyer), Paris, Opéra, 19 May 1697, *F-Pn*, *Pa*, *Po*

Penthée (tragédie en musique, prol., 5, C.A. de la Fare), Paris, Palais Royal, *c*1703, *Pa**, collab. Philippe de Bourbon

Suite d'Armide, ou Jerusalem délivrée (tragédie en musique, prol., 5, Baron de Longepierre), Fontainebleau, *c*1704, *F-Pa**, collab. Philippe de Bourbon

Hypermnestre (tragédie en musique, prol., 5, J. de La Font), Paris, Opéra, 3 Nov 1716 (Paris, 1716) [Act 5 rev. S.-J. Pellegrin 1717]

JEAN-PAUL MONTAGNIER

Gervais, Laurent [de Rouen] (*fl* 1683–1747). French composer and harpsichordist. He was born in Rouen in the second half of the 17th century and is thought to have been *maître de musique* at Senlis Cathedral in about 1683, at which time he applied for a post at the Chapelle Royale and met Henry Desmarets. He may have succeeded Nicolas Bernier at St Germain-l'Auxerrois in 1704. According to the title-page of his first book of cantatas (1727), he was *maître de musique* at the academy in Rouen, and then, according to his *Méthode pour l'accompagnement du clavecin* (1733), at the academy in Lille. He is thought also to have been a music dealer in Paris.

Gervais's pedagogic output does not stand out among contemporary teaching methods, but his cantatas and *cantatilles* are well written, if without a strongly personal style. Their harmonic progressions, virtuoso vocal writing and frequent use of da capo form reveal Italian influence, while their elegant and graceful melodies, declamatory features and dance rhythms evoke the French style. *Ragotin, ou Sérénade burlesque* (written before about 1726 but published *c*1732), to a text by a certain Van-Essen (inspired by Scarron's *Le roman comique*), is one of the few comic cantatas in the French repertory. It opens with a prelude which parodies Italian chromatic writing, a fine example of musical humour intended to depict 'les accords les mieux choisis'.

WORKS

all published in Paris

Cantatas: bk 1, La ruse d'amour, Les sirènes, Le jour, Les forges de Lemnos (1727); bk 2, La rose, L'hiver, Didon aux Champs-Elysées, Le triomphe de Bacchus (?1732); Andromède et Persée (?1732); Ragotin, ou Sérénade burlesque (*c*1732/*R*1991 in ECFC, xvii)
Cantatilles: Le printems (*c*1732–42); L'aurore (*c*1740); Ixion (1741); Le musicien (1744); La rose (*c*1747)
Airs in Ballard's Recueils (1712–20) and Recueil de nouveaux airs . . . année 1750 (*F-Pn*)
3 bks of airs sérieux et à boire (*c*1732–44)

THEORETICAL WORKS

Méthode pour l'accompagnement du clavecin qui peut servir d'introduction à la composition et apprendre à bien chiffrer les basses (Paris, 1733/*R*1974 in BMB, section 2, cxlii)

JEAN-PAUL MONTAGNIER

Gervais, Pierre-Noël (*b* Mannheim, *c*1746; *d* ? Bordeaux, *c*1805). French violinist and composer. The son of a French musician in the service of the Elector of Mannheim, and the brother of a dancer (the future Mme Pérignon), he studied with Ignaz Fränzl and Franz Beck. He went to Paris, where he played some 20 times at the Concert Spirituel between 1 April 1784 and 25 December 1786, notably performing symphonies concertantes by Davaux and concertos by Fränzl and Viotti. He also played at the Société Académique des Enfants d'Apollon and the Wauxhall d'hiver concerts in 1784. His talents were much admired: in April 1784 the *Mercure de France* praised his 'superb sound, fine manner, great accuracy and precision'. Gervais settled in Bordeaux in 1791 as first violin at the Grand Théâtre. According to Fétis, he returned to Paris in 1801, and he seems to have ended his days in Bordeaux.

His three-movement violin concertos (all published in Paris, *c*1798–1800) call for considerable virtuosity, and have the melodic qualities peculiar to the French school; their idiomatic writing employs all the instrument's resources and exploits the principal technical demands of the period (with varied bowing, high positions, passages on the fourth string, double stopping, etc.). Gaviniés set them for his students to study.

MICHELLE GARNIER-BUTEL

Gervaise, Claude (*fl* Paris, 1540–60). French editor, composer and arranger. He was employed as an editor by PIERRE ATTAINGNANT in Paris, where he was known as a 'musicien compositeur'. The title-pages of books 3, 4 and 5 of Attaingnant's *Danceries* state that the music was 'looked over' or 'looked over and corrected' by Claude Gervaise, sçavant musicien'. After Attaingnant's death Gervaise continued to give editorial assistance to Marie Lescallopier Attaingnant, who maintained the printing establishment, bringing out volumes of music sporadically until 1558. His circle of friends is known to have included at least one other Parisian musician, Julien Le Maître, court oboist and violinist.

Gervaise is remembered principally for his instrumental music. In addition to editing three books of *Danceries*, he composed the music of the sixth volume. It contains numerous ensemble dances, almost all of them four-part, and closely resembles the other volumes of the series. The dance forms employed are the *pavane* and *gaillarde*, as well as various types of branle: *courant*, *gay* and *simple*.

The books of ensemble dances edited by Gervaise include other dance types, among them the allemande and such local varieties of the branle as those of Poitiers and

Burgundy. They also contain dances modelled on polyphonic chansons by well-known composers, such as Certon, Gentian, Janequin and Moulu. Perhaps Gervaise also served as the arranger of the chanson dances, for his work as an arranger of vocal polyphony is amply evident. He is known, moreover, to have intabulated ten chansons for viol in his now lost tutor (published before 1548); this book, the first printed example of viol tablature in France, is known only from a citation of the 1554 edition in the manuscript catalogue of the Brossard collection (*F-Pn* Rés.Vm^{8}21).

Gervaise's oeuvre also includes 49 polyphonic chansons. Of these, 20 are for four voices and appear in various anthologies of Attaingnant, Veuve Attaingnant and Du Chemin printed between 1541 and 1553. They are freely composed and reflect the tendency of chanson composers in the 1540s to select poems of significant length (generally *huitains*) and set them to music that is both concise and directional. The 26 chansons for three voices (printed in Attaingnant's last music book) are arrangements of earlier four-part chansons. Invariably, the model's superius is taken over intact as one of the two upper voices in a tightly knit three-voice texture.

Gervasius de Anglia. *See* GERVAYS.

Gervasoni, Carlo (*b* Milan, 4 Nov 1762; *d* Borgotaro, nr Parma, 4 June 1819). Italian theorist, music historian, teacher and organist. Although he had studied music as a child (playing such instruments as the harpsichord, psaltery, archlute, violin and organ), he prepared for a career as an engineer. These studies ended in 1781 with the death of his father. After the failure of his commercial business in 1789 he became *maestro di cappella* at the Chiesa Matrice in Borgotaro, where he remained until his death. In this post he composed vocal and instrumental sacred music, directed the amateur orchestra, organized music for the salons of noble families (who provided him with pupils), was active as a teacher and gave public performances on the organ. Among his more successful students were Pietro Giovanni Parolini, from Pontremoli, and Francesco Canetti, formerly *maestro di cappella* at Brescia Cathedral. The high regard in which he was held in contemporary musical circles can be taken from his correspondence or from reports of his travels in northern Italy. There is no doubt that it is largely due to him that the town of Borgotaro saw the construction of a powerful and original organ (described in detail in *La scuola della musica*, pp.270–74) in the Chiesa Matrice di S Antonino. Constructed in 1795, it reflects Italian organ building of the day, but is also the product of Gervasoni's own interest in developing technology and tone-colour.

Gervasoni's most significant publication is *La scuola della musica* (Piacenza, 1800), a basic instructional manual containing much informative material on theory and performing practice. This book, together with its accompanying volume of music examples, *Esempj della Scuola della musica* (Piacenza, 1801) attracted the attention of many Italian and foreign musicians. Choron took the first two parts, which deal with the theory and practice of music, and made them the basis of the first part of his *Manuel complet de musique vocale et instrumentale* (Paris, 1836–9). Gervasoni himself published a work which publicized *La scuola della musica* by reprinting some of the correspondence he had had with Italian musicians and theorists about it, *Carteggio musicale di Carlo Gervasoni … in cui dimostra l'utilità della Scuola della musica e si sciolgono alcuni dubbi alla medesima Scuola relativa* (Parma, 1804, 2/1804): the final letter contains a lengthy, autobiographical note. Gervasoni's other major publication, the *Nuova teoria di musica* (Parma, 1812), provides an interesting picture of the musical scene in Italy during the late 18th and early 19th centuries, as well as a useful biographical dictionary of musicians, mostly Italian, of the same period, including less well-known figures and women musicians (especially singers). His *Dissertazione* on the state of music in Italy, inserted as a preface, gained him entrance to the competition for membership of the Società Italiana di Scienze, Lettere ed Arti in 1810. These works were used in several Italian music schools during the early 19th century, including the Liceo Musicale in Bologna, and are of interest today because of their inclusion of one of the first theoretical descriptions of sonata form and important

aspects of organ performing practice of the day, particularly with reference to instruments with several keyboards. His surviving compositions include some organ sonatas (in *I-Gl*) and a *Te Deum* (in *I-Baf*).

MILTON SUTTER/PATRIZIA RADICCHI

Gervasoni, Stefano (*b* Bergamo, 26 July 1962). Italian composer. He studied composition with Lombardi, Castiglioni and Corghi at the Milan Conservatory. He also attended Ligeti's courses at the International Bartók Seminar in Szombathely, Hungary (1990) and studied computer music at IRCAM (1992–3). Other composers who have influenced Gervasoni include Ferneyhough, Eötvös, Lachenmann and Nono, from whom he developed his ideas on the infinite possibilities of listening implicit in a single sound and silence. Gervasoni has commented upon the importance of observing daily objects with a 'suspended and diverging glance, lowering your voice so as to activate perception, looking through things and from different viewpoints in order to discover the inherent complexity in apparent simplicity' (Gervasoni, 1992). His work consists not of development, but of repetition transformed by formal and timbral elaboration. Thus, for example, the two thematic cells in *Descdesesasf* (1995), derived from a motif from Schumann's third *Fantasiestück*, are repeated with variations of colour and combination, in order to obtain multiplicity and constant mobility from a single element. The same process is used in *Lilolela* (1994) and the Viola Concerto (1994–5); and, in an anti-utopian, postmodern fashion, applied to subjects which would ordinarily be considered insignificant, such as a tale of a toad which falls from a platform (*Concertino per voce e fischietti* 1989–93, *Dialogo del fischio nell'orecchio e di un rospo*, 1989–90) or the plant and animal descriptions in Ponge's *Parti pris des choses*, which are the basis for *Animato* (1992). In his use of the poetry of Ungaretti, Beckett and Rilke, Gervasoni has also applied his technique of varied combination to textual fragements, thus representing the manifold meanings contained therein. In another work involving text, *L'ingenuo* (1992–4), electro-acoustic sounds and procedures are used to explore the invisible and imperceptible. Gervasoni has received numerous awards, including the Petrassi Prize (1987–9) and the Mozart Prize (1991).

MARINELLA RAMAZZOTTI

Gervays [Gervasius de Anglia] (*fl c*1400). English composer. The name suggests a possible connection with the Yorkshire Cistercian abbey of Jervaulx. A Roger Gerveys was a junior clerk of the Royal Household Chapel in 1376–7. Gervays's sole surviving composition is a three-part Gloria which is preserved both in the Old Hall Manuscript (ed. in CMM, xlvi, 1969–73; no.31) and in *I-Bc* Q15. It is an unpretentious but competent piece, with much of the fresh charm found in Ciconia's music. The upper part is texted, and there is some evidence of deliberate declamation. There is no particular reason to identify him with the G. de Auglier who copied the theory manuscript *US-Cn* 54.l, at Pavia in 1391.

Gesellschaft der Musikfreunde. Viennese music society. Founded officially in 1814 (succeeding the Gesellschaft Adeliger Frauen, founded in 1812), it organized the foundation of a conservatory in 1817. Originally it had an amateur orchestra; now it organizes concerts at the Musikverein with local or visiting orchestras, as well as recitals. It has an important music collection. *See* VIENNA, §§5 and 6(ii); and LIBRARIES, §II, 1(i).

Gesellschaft für Musikalische Aufführungs- und Mechanische Vervielfältigungsrechte [GEMA]. *See* COPYRIGHT, §VI (under Germany).

Gesellschaft für Musikforschung [Society for Music Research]. An organization founded in 1946 in Germany to bring together musicologists, church musicians, music teachers, performers and amateur musicians, to promote musical research, to publish information, and to support the cultivation of associated studies and international musicological cooperation.

The organization's aim is achieved by three means: international congresses, which have been held in 1949 (Rothenburg), 1950 (Lüneburg), 1953 (Bamberg), 1956 (Hamburg), 1962 (Kassel), 1966 (Leipzig), 1970 (Bonn), 1974 (Berlin), 1981 (Bayreuth), 1985 (Stuttgart), 1993 (Freiburg) and 1998 (Halle); the formation of special groups within the society to study specific topics; and the publication of the periodical *Die Musikforschung* (1948–) and the monograph series Musikwissenschaftliche Arbeiten. The latter covers a wide variety of topics and includes Richard Schaal's *Verzeichnis deutschsprachiger musikwissenschaftlicher Dissertationen 1861–1960* (Kassel, 1963; suppl. 1974). Friedrich Blume was the first president; he was succeeded by K.G. Fellerer, Martin Ruhnke, Ludwig Finscher, Carl Dahlhaus, Rudolf Stephan, Klaus W. Niemöller and Christoph Mahling.

□

Gesellschaftslied (Ger.). A term for a German polyphonic song that evolved in the 15th to 17th centuries and was derived from the courtly Minnelied. Often in four parts, *Gesellschaftslieder* were intended for the educated classes, are distinguishable by their texts from the *Hofweise* (court song) and the *Volkslied* (folksong), and typically are love songs. *Gesellschaftslieder* are based on a pre-existing melody, usually in the tenor or the discantus, but occasionally in one of the middle voices. A characteristic of 16th-century *Gesellschaftslieder* is the melodic quality of all the voices. There is a frequent use of imitation, revealing the influence of the French chanson, although some songs are set in a seemingly chordal manner. The under-third ('Landini') cadence appears quite often and sections are generally of uneven length. The songs are usually in bar form, though some are through-composed.

Examples of *Gesellschaftslieder*, dating from the early to mid-15th century, can be found in the Lochamer, Schedel and Glogau songbooks. Among important composers of the genre in the early 16th century, Ludwig Senfl was the most prolific. Publisher-arrangers of 16th-century *Gesellschaftslieder* include Georg Forster and Hans Ott. The term is occasionally applied to choral songs of the 18th to 20th centuries or as a synonym for 'geselliges Lied' ('sociable song'), which refers to the 19th-century custom of guests performing music at social gatherings.

ANGELA MIGLIORINI

Geses (Ger.). G𝄫. *See* PITCH NOMENCLATURE.

Gesius [Gese, Göse, Göss], **Bartholomäus** [Barthel] (*b* Müncheberg, Brandenburg Marches, ?1555–62; *d* Frankfurt an der Oder, 1613). German composer. In 1575 he went to the University at Frankfurt an der Oder where, with some interruptions, he studied until about 1580. It is possible that he also studied briefly at Wittenberg in 1580. In 1582 he was for a short time Kantor at Müncheberg, and then probably returned to Frankfurt. Before 1588 he was a domestic tutor to Freiherr Hans George von Schönaich of Carolath in Muskau and Sprottau (now Szprotawa, Upper Lusatia), a prominent poet. Gesius set some of his poems to music (none of the settings survive). In 1588 Gesius was again in Wittenberg, probably to prepare for the printing of his *St John Passion* which was published there. At the end of 1592 while in Muskau, he was offered the post of Kantor at the Marienkirche in Frankfurt; this he took up in the following year and held for the rest of his life.

Gesius presumably acquired his musical training either from Christoph Zacharias, the organist of the Marienkirche, or the Kantor, Gregor Lange. He represents the tradition of humanist Lutheran theology that flourished during the late 16th and early 17th centuries. His compositions are exclusively for church and school, and comprise settings of pre-Reformation Latin songs and Protestant hymns. The *Psalmodia choralis* of 1600, containing 631 hymn melodies, shows to what extent he embraced and developed the inherited Latin and German liturgical repertory. In his cantus-firmus arrangements there is a wealth of different styles ranging from four-part note-against-note counterpoint in the manner of Lucas Osiander, to fully developed, polychoral textures. Gesius's works show a preoccupation with cantus-firmus techniques and an interest in *alternatim* methods of word-setting, which he recommended in his *Geistliche deutsche Lieder* of 1601. He took no part in the change of styles around 1600, particularly in the move towards the Baroque style.

Gesius is important for his role in the history of the Protestant Passion. With his *St John Passion* of 1588, he made a significant contribution to the small group of Passions of a type brought to Germany from Italy by Antonio Scandello – a mixed type between the German

dramatic Passion and the motet Passion. In such works, only the words of the Evangelist are sung in plainsong, whereas the rest of the dialogue is set in two to three parts, the words of Jesus in four, and the turbae and the opening and closing choruses in five. The *St Matthew Passion* of 1613 in three to six parts is a motet Passion: but it nevertheless shows the influence of Scandello. The part of the Evangelist and the turbae are here in six parts, as are the first and last choruses; the words of Jesus are in four parts and those of the remaining dialogue in three. Also of note are the *Magnificat* settings of 1607 in which there are a number of Christmas songs; these reveal Gesius's contribution to a particularly popular Christmas tradition extending from the late Middle Ages to the time of J.S. Bach.

Synopsis musicae practicae variis exemplis illustrata ... in usum scholasticae iuventutis Francofurtensis cis Viadrum conscripta (1606)

10 tröstliche schöne Psalmen des königliches Propheten Davids, ... Luca Osiander, 4vv (?1610), lost

Cantiones sacrae chorales: Introitus, ut vocantur, Kyrie, sequentia et plures aliae de praecipuis diebus festis aniversariis, 4–6vv (1610)

Missae ad imitationem cantionum Orlandi, et aliorum, 5vv (1611) [also pubd with Cantiones sacrae chorales as: Opus plane novum cantionum ecclesiasticarum in 2 partes divisum. Prior continet missas ad imitationem cantionum Orlandi, Marentii et aliorum ... 5–8 et plurium vocum: posterior continens introitus, Kyrie, sequenti, etc, 4–6vv ... quibus praemissa est historia Passionis Domini nostri Jesu Christi ex Evangelista Matthaeo, 6vv (1613)]

Motetae selectissimae latinae germanicae (1615), lost; cited in Draudius (1625)

17 individual or small collections of occasional pieces, 5, 6, 8, 10vv, pubd in Frankfurt, survive; *c*30, now lost, incl. in list in *MGG1*

Works in 1607^{12}, 1607^{26}, 1610^{12}, 1613^{6a}, 1617^{1}, 1641^{6}, 1646^{3}; Gothaer Cantional sacrum (1646–8); Vopelius's Leipziger Gesangbuch (1682), *PL-GD*, Liegnitz, Kgl.Ritter Akademie, *WRu*

The following prints are listed in *GerberNL*:

Deutsche geistliche Lieder, 4vv (1594)

Melodiae, 5vv (1598)

Hymni patrum cum cantu (1603)

Christliche Choral- und Figural-Gesänge deutsch und lat. bei Leichenbegängnissen zu gebrauchen (1611)

Fasciculus etlicher deutscher und lateinischer Motetten auf Hochzeiten, 4–8vv (1616)

WALTER BLANKENBURG/CLYTUS GOTTWALD

Gesner, Conrad [Gessner, Konrad] (*b* Zürich, 16 March 1516; *d* Zürich, 13 Dec 1565). Swiss humanist scholar, physician and bibliographer. He was among the most important members of the great circle of humanists who flourished in Basle and Zürich during the first half of the 16th century. Trained in classical philology and medicine, Gesner held professorial posts at the academy of Lausanne, the Collegium Carolinum in Basle and the Stiftsschule of Zürich. He was the author of pioneering works in the fields of balneology, botany, linguistics, medicine, philology and zoology. It is for his contributions as a bibliographer, however, that he is remembered by music historians.

In 1545 Gesner published the *Bibliotheca universalis* (facs. with introduction by H. Widmann, Osnabrück, 1966), a comprehensive bibliography of all works in Greek, Hebrew and Latin known to him. Three years later he continued this massive project with the publication of the *Pandectarum sive partitionum universalium libri XIX*. Book seven of this work is devoted to music and represents one of the central bibliographical documents in the history of Renaissance music. In almost 300 entries, he listed some 140 volumes of printed music, mainly of polyphony, together with writings about music by nearly 100 authors. About half of these are Renaissance writers and the rest, in nearly equal proportion, are medieval theorists and Greek and Roman authors. Gesner's music

list identifies numerous items that are no longer extant, including missing publications of Attaingnant, Petrucci, Petreius, Schöffer and Varnier, as well as many lost theoretical works.

Gestewitz, Friedrich Christoph (*b* Preischka, nr Meissen, 3 Nov 1753; *d* Dresden, 1 Aug 1805). German composer, pupil and brother-in-law (not son-in-law) of Johann Adam Hiller. In the early 1780s he wrote two German operas, *Der Meyerhof* and *Die Liebe ist sinnreich*, and what may be either a third German opera, or incidental music to Gozzi's play, *Das öffentliche Geheimnis*. (*Pamela nubile* is by Generali, not Gestewitz as Eitner suggested.) Later he became conductor of Bondini's Italian opera company, for which he wrote *L'orfanella americana* (1791) and added a finale to Portugal's *Le donne cambiate* (1799). He also wrote a few sacred and keyboard works.

WORKS

OPERAS

Der Meyerhof, Leipzig, 20 Sept 1780; 1 song in Hiller's Sammlung der vorzüglichsten Arien, vi (Leipzig, 1780)
Die Liebe ist sinnreich, Dresden, 27 Nov 1781; *B-Bc*, 2 arias in Hiller's Arien und Duetten des deutschen Theaters (Leipzig, 1781)
Das öffentliche Geheimnis (F.W. Gotter, after Gozzi), *c*1780–81; 2 songs in Hiller's Arien und Duetten (Leipzig, 1781)
L'orfanella americana, Dresden, Jan 1791; *D-Dl*, ov. and ?1 song (Dresden, *c*1791)
Finale to Portugal's Le donne cambiate, Dresden, 2 Oct 1799

Gesualdo, Carlo, Prince of Venosa, Count of Conza (*b* ?Naples, *c*1561; *d* Gesualdo, Avellino, 8 Sept 1613). Italian nobleman and composer.

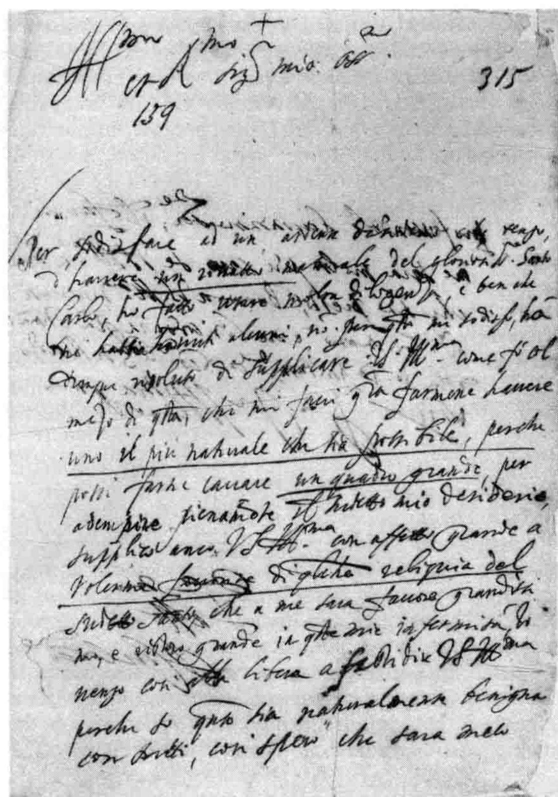
1. Life. 2. Literary and stylistic sources. 3. Secular works. 4. Sacred works. 5. Posthumous reputation.

1. LIFE. The Gesualdo family was invested with the principality of Venosa by Philip II in 1560, when Carlo's father Fabrizio (*d* 1591) married Girolama Borromeo, niece of Pope Pius IV and sister of Cardinal Carlo Borromeo. About the same time (1561) Carlo's uncle, Alfonso (Archbishop of Naples, 1596–1603), was elected cardinal. At Naples in 1586, after the death of Fabrizio and Girolama's eldest son, Carlo Gesualdo, heir to the title, married his cousin Maria d'Avalos, daughter of the Marquis of Pescara. The outcry and rumour excited by the assassination on 16 October 1590 of Maria, surprised by her husband 'in flagrante delicto di fragrante peccato', and Fabrizio Carafa, the Duke of Andria, notorious for two years as her lover, reached a level commensurate with the noble rank attained by the Gesualdo family in Naples. The double aristocratic murder was given suitable publicity in the widely disseminated Corona Manuscript chronicle (see A. Borzelli: *Successi tragici et amorosi*, Naples, 1908), and in a collection of verses commemorating the tragic lovers composed by Tasso and the best-known Neapolitan poets including G.B. Marino, Pignatelli, G.C. Capaccio and Cortese (see A. Quondam in *Storia di Napoli*, v/1, Naples, 1972, pp.405ff). This event, romanticized by novelists from Brantôme to Anatole France, still results in accounts of Gesualdo with such titles as *Carlo Gesualdo, Prince of Venosa: Musician and Murderer* (C. Gray and P. Heseltine) or *Assassinio a cinque voci* (A. Consiglio, Naples, 1967); they show how effective has been his act of retribution in spreading his fame. Nevertheless, Gesualdo prudently retired to his estate at Gesualdo, which became his permanent residence. Because of the notoriety generated by the incident, his passionate dedication to music, which until then had been cultivated in semi-secrecy (his first book of madrigals was originally published under the name of Gioseppe Pilonij), also became renowned.

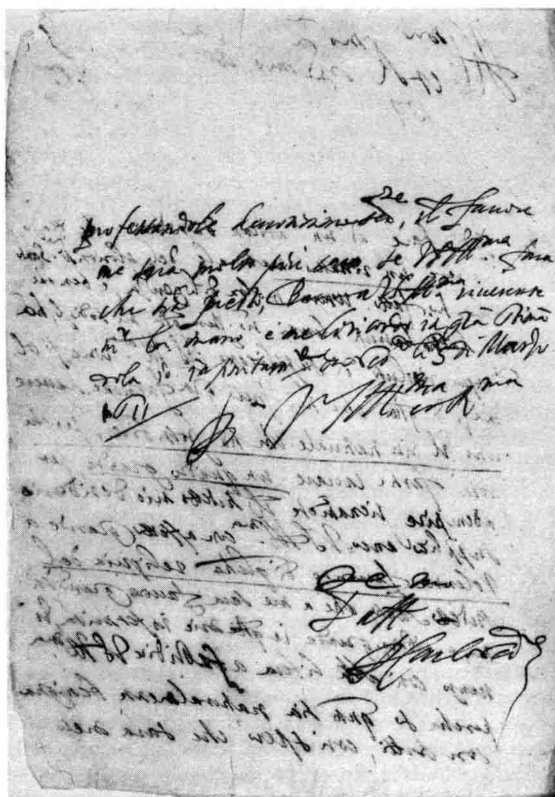
Music provided the chief interest of Gesualdo's visit to Ferrara in 1594, as may be seen in the letters of Count Alfonso Fontanelli (see Newcomb, 1968 and Pirrotta, 1971), who was appointed the prince's equerry by Duke Alfonso II. Gesualdo's marriage to Leonora d'Este, the duke's niece, contracted in 1593, offered Gesualdo not only the rehabilitative value of an illustrious marriage outside the kingdom of Naples, but also the attraction of a brilliant musical centre. In accordance with Ferrarese custom, music played a large part in the marriage celebrations on 21 February 1594. Bottrigari described the festivities in *La mascara* (in *I-Bc*), the organist Ercole Pasquini composed a *favola boscareccia* for the occasion, *I fidi amanti* (Verona, 1593), Vincenzo Rondinelli dedicated his treatise on acoustics *De soni, e voci* (in *I-FEc*) to the prince, and the local poets wrote special verses. Above all, Gesualdo was chiefly occupied with music-making throughout the time he spent at Ferrara, until early 1596, interrupted by at least two visits to Gesualdo, from 15 May to 29 December 1594, and from late summer to 4 December 1595.

Cavalieri, whom Gesualdo met at Rome on his way to Ferrara on 19 December 1593, commented ironically in a letter on the prince's mad passion for music, and Fontanelli, after his first meeting with Gesualdo on 18 February 1594, related that the prince was exhibiting the scores of his first two books of madrigals, that he praised Luzzaschi, that he took with him on his travels musicians such as Scipione Stella and (it seems) Francesco Rasi, and that he played the guitar and the lute. Alessandro Piccinini later recounted (*Intavolatura di liuto … libro primo*, Bologna, 1623) that in the same year (1594) he gave two of his archlutes to Gesualdo, who afterwards presented one of them to the 'Cavalier del Liuto'. At Ferrara Gesualdo heard the famous nuns of S Vito. At Venice, according to Fontanelli's letters of 21 and 23 May 1594,

he chose to remain incognito in order to avoid official ceremonies, but continued to discuss music, praising the musicians of Ferrara and scorning those of Venice, including Giovanni Gabrieli. He also composed madrigals, and presumably arranged the printing rights of his madrigals with Gardane. At Padua he visited Costanzo Porta. In Gesualdo, between June and October 1594, he wrote some music for performance by the Ferrarese Concerto di donne, and during the Christmas period he was the guest of Jacopo Corsi at Florence. By the end of 1594 he had returned to Ferrara with the lutenist Fabrizio Filomarino and the singer and viol player Ettore Gesualdo.



Gesualdo's presence in Ferrara, and his obsessive melomania, sustained with an 'affetto napoletanissimo' (Fontanelli), seem to have provoked the ducal printer Baldini to start publishing again the most important local madrigalists, the earliest deliberate manifestation of the *seconda pratica*. After the publication between May and June 1594 of his first two books, signed by Stella, Gesualdo himself, having discarded 'quel primo stile', composed and published his third and fourth books in March 1595 and 1596 respectively. Ettore Gesualdo, who signed them, admired their 'invention, artifice, imitation and observance of the words', in contrast to the 'lightness' of the first two books. During the same period Fontanelli published his own *Primo libro*, and Luzzaschi three more books of madrigals of which the fourth, dated 10 September 1594, is dedicated to Gesualdo. These publications of 1594–6 consolidated the professional reputation of Gesualdo, who had previously been considered merely an accomplished amateur. Before 1594 there is only an unspecific mention of Gesualdo's artistic merit, in canto xx of Tasso's *Gerusalemme conquistata*, but in February 1595 Raval, a professional musician, described Gesualdo as a madrigal composer in his *Madrigali a 3, 5, 8 voci* (Rome, 1595). During his months at Ferrara, Gesualdo profited from the unique opportunity offered to him by the duke's musical establishment, where he could meet Luzzaschi and virtuoso court musicians on a professional basis without departing from the aristocratic reserve that was a feature of avant-garde musical circles at Ferrara, where reserve, competence and esotericism were shared by composers, performers and listeners alike.



Gesualdo's attempt, from about 1595, to establish a group of court musicians at the castle of Gesualdo, outside the influence of the Neapolitan academies, was probably inspired by Ferrarese example. Micheli related in the preface to his *Musica vaga et artificiosa* (Venice, 1615) that he worked for Gesualdo before 1599, together with Stella, G.B. di Paola, Nenna and Effrem, only the last of whom is known to have served Gesualdo until 1613. From that time Gesualdo spent almost his entire time on his estate; his visits to Naples became infrequent, and music-making seems to have constituted his refuge from the world. In 1603 G.P. Capuccio, one of his courtiers, had Gesualdo's two books of *Sacrae cantiones* published by Costantino Vitale at Naples, but in 1611, for his last works (the fifth and sixth books of madrigals, still signed by Capuccio, and the *Responsoria*), Gesualdo acquired his own palace printer, G.G. Carlino from Naples, perhaps in imitation of the court printer at Ferrara.

The prince's melancholy, already known before 1594, grew deeper. A secret and therefore reliable political document draws an eloquent portrait of Gesualdo in 1600: 'he has an income of more than 40,000 ducats-worth of grain. His ancestors were very French [i.e. anti-Spanish] in outlook, but he is opposed to innovation, attends to money-making and does not delight in anything but music. He keeps a company of men-at-arms'. There are also reports on the ill-treatment of his wife, and of divorce proceedings begun by the Este family. Leonora frequently complained of the boredom she suffered on the estate, where in fact she did not arrive until the end of 1597, after the inevitable transfer of the duchy of Ferrara to the papacy; even then she spent long periods at Modena with her brother Duke Cesare, thus provoking urgent messages from Gesualdo, who disapproved of her absences. A letter written in September 1609 confirms that, contrary to the general state of the Neapolitan nobility, the prince's financial position was good, and that he was willing to purchase the domain of Castellammare di Stabia from the Farnese family, so that Leonora, who disliked the climate at Gesualdo, could enjoy more salubrious air. The letter also illustrates the prince's social intolerance; he proposed that Leonora should spend the winter at one of his villas in the outskirts of Naples, where he would not be able to join her, because his own ill-health would not allow him to attend the vice-regal court. The prince's psychopathic deterioration during his last years is amply documented; and Gesualdo's morbid, bigoted veneration for his uncle, Carlo Borromeo, canonized in 1610, as seen in his obstinate correspondence with Cardinal Federico Borromeo to obtain relics and a portrait (see illustration and Piccardi), completes the clinical picture of the prince's melancholy. After the death in October 1600 of Alfonsino, his son by Leonora, he commissioned the famous altarpiece in the church of the Capuchins at Gesualdo; beneath a *sacra conversazione*, it depicts Carlo Borromeo, Leonora, Gesualdo himself and the purified soul of their dead son. Gesualdo's preoccupation with the extinction of his line proved justified: his death came three weeks after that of his only surviving child, Emanuele, his son by his first marriage, who had been entrusted with the entire management of the family estates.

Gesualdo's complete retirement from city life was part of a general return to feudalism in the kingdom of Naples during a period of grave economic, social and political crises which resulted in direct control by the nobility over its own lands. Nevertheless, his renunciation even of the exercise of this power, despite his relatively flourishing financial position, and his refuge in music, imply an anguished knowledge of his loss of real power, exclusion from the world and the absence of any future.

2. Literary and stylistic sources. Gesualdo's output can be divided neatly into two sections; the works he formally acknowledged (his six books of five-voice madrigals, the two books of *Sacrarum cantionum* and the *Responsoria*) but had published, as was the custom of the nobility, by a courtier; and those not originally intended for publication. To the latter category belong the few works printed after his death: the madrigals for six voices published by Effrem in 1626, three canzonettas for five voices (in RISM 1616^{15} and 1618^{11}), a psalm in the *Salmi delle compiete* (Naples, 1620), and some works known only in manuscript. This latter group comprises two canzonettas in a book of spiritual parodies, mostly Neapolitan in origin, a chromatic galliard for four voices entitled 'Principe di Venosa' in a keyboard manuscript,

Autograph letter (5 March 1611) from Gesualdo to his cousin, Cardinal Federico Borromeo, requesting relics and a portrait of his uncle Carlo Borromeo (I-Ma G.206.Inf., ff.315r–v)

and an extensive and complex 'Canzon francese del Principe' in the extravagant and fantastic style of Macque (ed. in CEKM, xxiv). The works that Fontanelli mentioned in his letter of 25 June 1594, 'a motet, an aria' and 'a dialogue for three soprano lines' as well as five or six 'madrigals full of artifice', can also be placed in this category. This list not only demonstrates Gesualdo's versatility in every kind of musical style, including monody, but also clearly underlines his intentional discrimination between the lighter sorts of composition and the deliberate contrapuntal complexity of the works destined for publication. A. Bossarelli Mondolfi, with some justification, suggested the attribution to Gesualdo of an unsigned piece in Verovio's *Lodi* (RISM 1595[6]) and it is possible to suspect Gesualdo as the composer of much other anonymous music, such as the responses for Holy Week, 'written by a composer who wishes to conceal his name', included in Fabrizio Dentice's *Lamentationi*(Milan, 1593); but this is to ignore the essential fact that with his nine official publications Gesualdo purposely gave a specific image of himself. This image is itself problematic enough, as an examination of his choice of poetry for the madrigals shows.

The first two books, disguised under a false name until their unexpected publication at Ferrara in 1594, set epigrammatic texts by Guarini, Gatti, Alberti, Celiano, Grillo and particularly Tasso, which had frequently been set to music before. Tasso was acquainted with Gesualdo, and during November and December 1592 sent him from Rome 36 madrigals to set, of which Gesualdo published only one, *Se così dolce e il duolo*. The textual parody *Sento che nel partire* of d'Avalos's famous *Ancor che col partire* is also the most chromatic of the madrigals in the first two books. It is particularly remarkable that Gesualdo, then and later, invariably used the madrigal form alone, renouncing the sonnet (with the exception of *Mentre madonna il lasso fianco posa*) and therefore all Petrarchism, and the sestina and ottava and therefore all epic texts. Of authors of the verses in books three to six, issued after his first experience of Ferrara, only three (all Ferrarese and including Guarini) are identifiable. Many texts of the later madrigals are in the style of Guarini, and one by Guarini himself, *T'amo mia vita*, appears at the end of the fifth book – a madrigal that had already been issued in a collection of previously unpublished works by Neapolitan composers (RISM 1609[16]). It shows Gesualdo's most 'public' vein, characterized by an exceptionally sparing use of dissonance, chromaticism and widely ranging note values, in contrast to the other madrigals in the fifth book. Guarini, Pocaterra and Marino figure among the authors of the posthumous madrigals. It is worth noting that, despite Gesualdo's preference for epigrammatic, conceptual texts, Marino, the paragon among writers of such poetry, does not appear in the six five-voice madrigal books, possibly because Gesualdo did not wish to borrow from his *Rime*, which had been too extensively plundered by composers since their first publication in 1602.

It is important to realize that the selections made in the last two books are from musical rather than poetic models, made by the rejection of certain possibilities rather than by adherence to them. The madrigals in the

first two books include those set to music during the 1580s by many other composers (e.g. Marenzio, Monte, Macque and Monteverdi), and it is impossible to pick out any definite stylistic influences from this broad and unspecific relationship, apart from those in the *Libro secondo* written 'all'imitazione del Luzzasco'. The 1595 and 1596 books, on the other hand, consist mainly of compositions with few previous connections. The last two books (and the madrigals for six voices) contain, as well as numerous texts set only by Gesualdo, many shared with Luzzaschi's sixth and seventh books (11), and with the madrigals of Nenna (six) and Fontanelli (two). The debt to Luzzaschi and Nenna is immediately evident since most of these texts had not been set by any other composer. It is known from Leonora d'Este's letter of 7 April 1600 that Nenna was no longer among Gesualdo's courtiers at that date, so it may be presumed that the madrigals in Gesualdo's fifth and sixth books that reveal a considerable adherence to Nenna, not merely textually, but particularly musically, were all composed before 1600, and that they were written in rivalry or in imitation of each other. The textual borrowings from Luzzaschi's sixth book (1596) also probably date from the period immediately after Gesualdo's stay at Ferrara, or perhaps from a time when he was still in personal touch with Luzzaschi. The retrospective dating inferred by G.P. Capuccio when in 1611 he published the fifth and sixth books, 'after the world had been waiting avidly for 15 years since they were composed', does not sound totally fictitious. Nor is it impossible that Nenna, who published his Gesualdian madrigals only after he left the prince's service, should figure among those unnamed imitators and plagiarists of the prince's madrigals, intended solely for 'domestic consumption', who were denounced by Capuccio.

But it is more likely that this was a conscious if limited concession to a fundamental principle of madrigal composition, the imitation of other composers' works. An obvious example is *Itene, o miei sospiri*, a parody of Luzzaschi's *Itene mie querele*, which uses not only the verbal imagery, but also, one by one, the musical metaphors of its model. An even more striking case, if it is not a plagiarism, is *Mercè grido piangendo*; the motifs and their treatment by Nenna and Gesualdo are practically the same, and at the words 'morrò dunque tacendo', both use a simultaneous chromatic alteration for all the voices ('quae omnibus chordis signum ♯ usurpat', as Doni noted in 1647, *Lyra Barberina*, i, 243). It is not possible in such circumstances to establish the order of priority between model and imitation, nor is it very important; Gesualdo's compositions are always the more audacious and complex. That he purposely reserved his imitations to a court musician (Luzzaschi) and to a 'cavalier di Cesare' (Nenna) confirms that membership of the avant garde of the *seconda pratica* was then the prerogative of nobility, and in this respect it is noteworthy that Monteverdi's examples of *seconda pratica* composers are all noblemen: Gesualdo, Cavalieri, Fontanelli, Branciforte, Del Turco and Pecci (preface to C. Monteverdi: *Scherzi musicali*, Venice, 1607).

Gesualdo's admitted admiration for Luzzaschi, shared by the entire Neapolitan circle of musicians, had several causes. The prince wholeheartedly followed Luzzaschi's habit of clothing even the least pretentious madrigal in serious, expressive, richly worked music. In practice this 'nuova maniera', outlined in the preface to Luzzaschi's *Sesto libro*, justified any compositional or stylistic licence in the interests of musical effect or affect. In *Farnetico savio* (Ferrara, 1610), Alessandro Guarini compared Luzzaschi and Gesualdo with Dante, because, 'in imitation of the words ... they do not avoid harshness, nor shun dissonance itself, artistic against the rules of the art' and 'do not fear to employ hard, unusual and strange sounds' (see F. Degrada, *Chigiana*, xxii, 1965, p.268). But while the eccentric style of a madrigal such as *Itene mie querele* represents an extreme case in Luzzaschi's works, Gesualdo, 'with his nobility and fanciful talent', used the style constantly. In the same way, the striking similarity between the expressive music of Nenna and Gesualdo does not extend to Nenna's sacred music, which, unlike Gesualdo's, conforms to the stylistic limits prescribed by liturgical rules.

Gesualdo shared Luzzaschi's interest in the chromatic *arcicembalo* made by Vicentino and kept at the court of Ferrara. The chronicler Sardi related that Luzzaschi played this instrument during the Este–Venosa wedding celebrations, and it is known that Stella and Gesualdo later tried, in vain, to construct a similar chromatic instrument in Naples. The practice and theory of such an instrument had an undoubted influence on Gesualdo's stylistic evolution; his writing encompassed an almost complete chromatic scale (the only chromatic change which never appears is F♭), and frequently used variations on the ancient chromatic tetrachord (ex.1 and ex.3, bars 5–7

Ex.1 *Velum, templi scissum* cantus part

below). Had the *arcicembalo* been less impractical, it would have constituted the one possible link between chromatic counterpoint and the newer forms of mixed vocal and instrumental music; thus Gesualdo's coherent choice of the madrigal style based on artifice rather than any kind of 'nuova musica' should be seen in the light of the inability of contemporary keyboard instruments to cope with extreme chromaticism. It also destroys the myth, believed by Ambros among others, of an empirical, irrational Gesualdo, trying out his chromaticism 'auf dem Klavier oder der Orgel'.

Gesualdo's artistic 'models' are not confined to Luzzaschi and Nenna. His formation probably took place through an interchange of experiences with the musicians frequenting Fabrizio Gesualdo's house about 1585, and the early madrigals are not unlike those dedicated to Michele and Scipione Gesualdo by Marien. But Carlo Gesualdo's first published composition was a motet in the *Liber secundus motectorum* by Felis (RISM 1585²), so he was presumably a disciple of the latter, and also of Macque, who included three of Gesualdo's ricercares in his *Ricercate et canzone francesi*, dedicated on 1 October 1586 to Gesualdo himself. Felis's membership of Fabrizio Gesualdo's academy is conjectural; Macque's is verified. Moreover, Gesualdo adopted a number of devices typical of Macque's later madrigals, such as the deliberately archaic use of the *falsobordone*for the three upper voices (cf Macque, *Tu segui, o bella Clori* and Gesualdo, exx.2 and 4); chromatic tetrachords (Macque, *Io piango* and Gesualdo, ex.1); a falling sequence of chromatic semitones (cf Macque, *Poi che'l cammin*, and Gesualdo, *Or, che in*

gioia credea, and see Doni, ii, 73); *relationes non harmonicae* (Macque, *La mia doglia*, and Gesualdo, *Resta di darmi noia*, penultimate bar); and sudden rests and emphatic repetitions, or unexpected changes of rhythm. More generally, a madrigal such as Macque's cheerful *Cantan gli augelli* (RISM 1609[16]) shows that harmonic progressions by 3rds, far from representing any kind of 'triadic atonality', are rather a neutral extension of modality as commonly practised by Neapolitan musicians, and not only by Gesualdo. But while Macque freely scattered such devices through his works, Gesualdo used similar methods and irregularities continuously, sometimes simultaneously and inevitably ostentatiously.

3. Secular works. The ostentatious display of cleverness, irregularity and complexity that particularly distinguishes Gesualdo's last three books of madrigals develops from the essential rules of the madrigal form without breaking them. The basic principle that every verbal image is matched by a separate musical formulation remains valid, and the madrigal is a series of clearly differentiated, even disparate musical sections.

The significance of the musical images is provided by conventional melodic, rhythmic, contrapuntal and other figures, musical unity is guaranteed by the mode (and thus by a conventional sequence of cadences) and by an unchanging distribution of voices, and formal unity is obtained solely by poetic conceit, which binds together verbal-musical images. Musical correspondences are found within a madrigal only when justified by the repetition of words or poetic lines, as in *Donna, se m'ancidete*, or by the obvious conceptual relationship in a strophic form, as in the *odicina Luci serene e chiare*. Gesualdo frequently repeated for emphatic purposes a single musical-verbal phrase or a complete final section, and these repetitions are often not literal but more complex. It is symptomatic of Gesualdo's respect for the individuality of the word that he hardly ever superimposed two verbal phrases and thus two different musical motifs, a method commonly used by Wert and by Monteverdi in his early works. But from his earliest works he used double imitation, two subjects for each phrase announced together and then interchanged; as this usually happens with rhythmically identical motifs, they coincide with the more homophonic passages and are thus perceived as chords and inversions rather than as imitative episodes. Such ambiguity is probably intentional; in the last books melodic interchange is used primarily to ensure that the most dissonant and chromatic passages are contrapuntally orthodox.

Gesualdo usually avoided pastoral and narrative poetry, preferring madrigals that offer greater scope to musical imagination. His texts abound in metaphors of the 'mali d'amore' that substitute concrete symbols such as 'fire', 'death' and 'ardour' for the abstraction of 'love', use expressive strings of adjectives such as 'obscure, interrupted, sweet, tormented', and employ opposites and oxymorons (e.g. 'O dolorosa gioia'). One of his few

Ex.2 *Beltà, poi che t'assenti*

Ex.2 continued

sacred madrigals is the embodiment of this last usage:

> Pietà, Signor, pietade,
> io peccator mi pento
> e della gioia mia mi fo tormento ...

The persistent recurrence of antithetical images such as 'death' and 'life', 'joy' and 'sorrow' in Gesualdo's madrigals has often been wrongly interpreted as the product of the composer's neurotic obsession with confession, but in fact some texts which are perhaps personally truly relevant can be found, significantly, only among the posthumous six-voice madrigals. In reality such images are simply rhetorical correlatives of the enormous differentiation of his musical representation, the three chief means of which are dissonance, chromaticism and rhythm. Although Gesualdo's use of individual dissonance can usually be set against the accepted practices of late 16th-century counterpoint, his music also readily adopts pre-Palestrinian contrapuntal methods, adapting them to serve as expressive agents (see Dahlhaus, 1967 and 1974). The consecutive or simultaneous accumulation of dissonances, each individually correct, has the effect of blurring the intervallic relationships that justify them. Thus one line may be correctly dissonant in respect of a second, which is itself dissonant in respect of a third

(ex.2), and at the cadence this practice is often combined with one or more pedal points. The melodic counterpart is an angularity and elasticity of thematic materials, and a wide range of intervals. Chromatic alteration of the harmonic interval is an expressive ornament of the melody and does not alter the nominal contrapuntal value of the interval, and so although augmented 5ths and diminished 4ths have a dissonant effect, they are treated as consonances (ex.2, 'tormenti'). This heterogeneity of melodic and contrapuntal terms of reference is fundamental to Gesualdo's use of chromaticism. Burney considered the beginning of *Moro, lasso* 'extremely shocking and disgusting' because it moves 'from one chord to another in which there is no relation, real or imaginary', but in the chordal succession of C♯ major to A minor in first inversion, the interval *c–e′* is common to both chords, independent of the alteration; the same is true of the first two chords of ex.2, also criticized by Burney. Chromatic alteration can involve the whole extent of a chord, or of several consecutive chords. In ex.2 the syllables '-tà poi che t'assen-' can be interpreted as altered by a semitone from the imaginary 'normal' chordal sequence g–E♭–D♭–G♭–D♭^{6}–G♭ (= F♯), this last chord being one of many examples of enharmonics, explicit or implicit, in Gesualdo's music. Transposition, as well as chromatic alteration of the entire chord, can also be found: in ex.3 below the cadence on 'morte' can be interpreted as ideally transposed up a tone; the effect, extended to all the voices, is the same as the transitory chromatic 'eclipses' in Avella's theory (*Regole di musica*, Rome, 1657), or the 'metabolism' of the three genera, as documented by Kircher (*Musurgia universalis*, Rome, 1650/*R*). Similar explanations, legitimized also by the analyses and remarks of such contemporaries as Doni, rationalize Gesualdo's pervasive chromaticism but do not solve its deliberate ambivalence; while the dissociation of intervallic and chromatic structures is firmly based on the validity of contrapuntal rules, it also allows, as a legitimate collateral effect, 'vertical' apperceptions.

While his predecessors and contemporaries used chromaticism only occasionally and briefly, Gesualdo used it extensively and as a normal device, thereby increasing the representational powers of the madrigal. Thus *Beltà, poi che t'assenti* can be subdivided into six sections, each quite different in character and structure.

Beltà, poi che t'assenti/come ne porti il cor: homophony–chromaticism–consonance
porta i tormenti: imitation–chromaticism–(consonance)
che tormentato cor può ben sentire: pseudo-polyphony (*falsobordone*)–diatonicism–(consonance)
la doglia del morire: imitation–(diatonicism)–dissonance
e un'alma senza core: homophony–diatonicism–consonance
non può sentir dolore: imitation–diatonicism > chromaticism–dissonance

Although Gesualdo did not usually alter the modal framework of a madrigal, he often weakened the cohesion and viscosity of the 16th-century *tactus*. The scattering of dissonances on its every beat conceals its profile. The rhythm of Gesualdo's madrigals is subject to excessive variation, leading not only to further individualization but also to musical fragmentation of each line or half-line. His frequent use of the emphatic pause is a part of this practice. The slow contortions of chromatic or dissonant episodes alternate abruptly with fast declamations in quavers, or with interwoven diatonic melismas in quavers or semiquavers. The individual episodes of *Deh, coprite* (ex.3) are based on rhythmically unified declamation ranging from the quaver to the semibreve, and the latter is also subdivided on the word 'vita' into melismatic semiquavers. The sixth book of madrigals contains several delirious examples of melismas figuring 'joy' (one is quoted by Kircher as 'Paradigma affectus gaudiosi'), and metrical polarity allied to the chromatic–diatonic polarity is a constant characteristic. In such cases, to delegate a formal function to the poetic conceit, binding the various verbal-musical images by antiphrasis or by analogy, no longer represents madrigalian normality, but rather an extreme and challenging extension of the *stylus phantasticus*.

4. Sacred works. The musical characteristics of Gesualdo's sacred works are, in diluted form, those of his madrigals, with the exception of the rhythmic scheme and of the graphic appearance; while the madrigals are always written with the C mensuration sign, the motets and responses are in ¢ (ex.4). In the *Sacrarum cantionum* contrapuntally through-composed motets are the norm, sometimes with canonic artifice and cantus firmus (*Da pacem, Domine* and *Assumpta est Maria*: their missing parts and those of *Illumina nos misericordiarum*were imaginatively fabricated by Stravinsky in 1957–9). Some of the motets make discreet but manifest expressive use of harmony and dissonance; the five-voice setting of *O vos omnes* almost literally anticipates the more complex and grief-ridden six-voice version in the *Responsoria* (1611). The latter are treated, in disturbing contravention of all rules of post-Tridentine liturgical practice, in a free style enriched with the *molles flexiones* of the madrigals. In ex.4 there is a concentration of dissonance, chromaticism and melodic extravagance, especially in the sextus part, which is nearly as affecting as the elaboration of the erotic madrigals; despite the textual clarity of the setting, it contravenes the liturgical decree that ordains a complete renunciation of all ornament during Holy Week. Throughout the *Responsoria* Gesualdo used the emotive style that his contemporaries reserved for rare single motets (Wert's *Vox in Rama* or Lassus's *Timor et tremor*) and for their sacred madrigals. It must be admitted that like the madrigals, the *Responsoria* were meant for private performance at Gesualdo's castle, and, moreover, were intended for one listener, the composer himself. His paradoxical identification with the religious theme is also evident in the 1603 motets, settings of antiphonal, responsorial or para-liturgical texts, which dwell on contrition, self-deprecation and a sinner's supplications to the Virgin Mary and to St Francis. Following a practice that is again characteristic of the madrigal, Gesualdo borrowed no fewer than 14 of the motet texts from Scipione Stella's motet publication at Ferrara in 1595.

5. Posthumous reputation. The extremism and individuality of Gesualdo's music, confirmed by the arbitrariness of his sacred works, are provocations, just as his personal notoriety must have been, and in these circumstances it is impossible to make a calm judgment on his output. Interpretation of his music is compromised, more than that of any other 16th-century composer's work, by a change of harmonic perspective that has brought about a mistaken overemphasis on his chromatic style. Stravinsky, whether consciously or not, exploited just this misunderstanding when he orchestrated the madrigal *Beltà, poi che t'assenti* (in *Monumentum pro*

Ex.3 *Deh, coprite il bel seno*

Gesualdo, 1960). In the opening phrase, played by the strings, the horns are given only the chromatic chords, corresponding to the syllables '-tà, -ti, -me, por-, cor', and thus by accentuating the implicitly vertical nature of modern chromaticism, Stravinsky obliterated the contrapuntal relationship which justified those chords in the original madrigal. Stravinsky's poetics of the arbitrary, a quasi-elective affinity, alienates Gesualdo's music without seeming to change it. Critical evaluation of it can properly be practised only in the light of the contradictory reactions provoked by its conscious exceptionality.

The historical influence of Gesualdo's madrigal style was slight, and the chromaticism in the works of other Neapolitan composers is more the basis than the consequence of his own use of it. His influence on G.B. Bartoli and d'India (in monody too) seems clearer, lying in the ostentatious dissociation of the musical images. The only serious attempt at an imitation of Gesualdo's style was made by Cifra, who set 18 of Gesualdo's texts to music in his *Madrigali concertati libro quinto* (Venice, 1621), imitating his melodic and rhythmic excesses; but this was more a scholastic exorcism than a stylistic adherence to the 'affetto pietoso e compassionevole' admired by Pietro della Valle (*Della musica dell'età nostra*, 1640). By that time Gesualdo's music, no longer fashionable in avant-garde circles, was reduced to a paradigm of 'exquisite counterpoint, with difficult but pleasing fugues in each part', sometimes 'harsh and rugged', to use Vincenzo Giustiniani's words.

Simone Molinaro made the major contribution towards the use of Gesualdo's music as an instructional model for free counterpoint by republishing the five-voice madrigals

Ex.3 continued

in score at Genoa (1613). Banchieri quoted Gesualdo as an example in *Moderna pratica*, and Domenico Mazzocchi also praised him; G.B. Martini, in his contrapuntal wisdom, appraised the *figurae* and licences of two of his madrigals. Burney measured their harmonic audacity with reference to tonal harmony, without keeping in mind that they result from the extension rather than the negation of modality. Through the incommensurability of such terms of reference his verdict against Gesualdo is that of arrogant dilettantism: he 'seldom succeeded to the satisfaction of posterity'. Even in the 20th century some scholars still appeal against Burney's verdict, taking it as implicitly valid, and try to decipher Gesualdo by means of a functional harmonic system (Keiner), by Hindemith's theory of root progression (Marshall) or by a presumptive 'triadic atonality' (Lowinsky), which, paradoxically, is now meant to be much more understandable than it could have been in 1600, and assigns Gesualdo to an imaginary, heroic history of visionary prophets. Stravinsky's irreverent and arbitrary approach came nearer to the now fossilized Gesualdian reality. The problematic nature of Gesualdo's music lies in its complex relationship of dialectic mediation with the tradition of counterpoint (Dahlhaus, 1974), and cannot easily be accounted for by the stylistic category 'mannerism' (Finscher and Watkins), which by analogy is perhaps legitimate for the madrigal

Ex.4 *Tristis est anima mea*

in general, but is at the same time too generic and sweeping to grasp the essential extraordinariness of Gesualdo and of his artifice-laden style. His exhibitionist and at the same time secretive individualism is socially and historically conditioned by his melancholy evasion of history and society (Pirrotta, 1961).

LORENZO BIANCONI

Geteilt (Ger.; abbreviated 'get.'). *See* DIVISI.

Getragen (Ger.: 'solemn', 'ceremonious'). A mark of tempo (and mood) found either by itself or as a qualification to some other tempo marks: *langsam getragen* ('slow and solemn').

Gétreau, Florence (*b* Boulogne-Billancourt, nr Paris, 16 May 1951). French musicologist. After studying literature and the history of art at the University of Aix Marseille I (1969–72), she was appointed assistant curator of the instrumental museum of the Paris Conservatoire in 1973, becoming curator in 1979. She was head of projects for the Paris Musée de la Musique (1986–92), and later curator there (1993–4), and in 1994 was appointed both curator of the Musée national des arts et traditions populaires and also head of its music department. Concurrently she was a researcher at the CNRS, where from 1992 to 1996 she was head of the research group on her two main fields of study, organology and musical iconography. In 1993 she began teaching these subjects at the Paris Conservatoire and in 1996 became responsible for them at the CNRS Institut de Recherche sur le Patrimoine Musical en France. Within the field of organology Gétreau specializes in the history of French instrument making in the 17th and 18th centuries, the history of collections of musical instruments in France and the history and ethics of the restoration of musical instruments. In musical iconography her work is centred on the painters Watteau and Veronese, and on the French harpsichord and French bow. In addition to her publications she has organized several exhibitions and is editor of the journal *Musique-images-instruments*, which she founded in 1995.

JEAN GRIBENSKI

Getty, Gordon (Peter) (*b* Los Angeles, 20 Dec 1933). American composer. An heir to the Getty oil fortune, he studied the piano as a child and, after terms of duty in the army and the family businesses, enrolled at the San Francisco Conservatory of Music (1961–2), where he studied theory with Sol Joseph. He holds honorary doctorates from the University of Maryland, Pepperdine University, the University of California at San Francisco, the San Francisco Conservatory of Music and the Mannes College of Music. Through the Gordon and Ann Getty Foundation he has been a generous supporter of the performing arts in the San Francisco region and elsewhere. Getty's music, much of it vocal, is written in a smoothly tonal idiom, with careful attention to the demands of a poetic text. His most frequently performed work is *The White Election* (1981), a cycle of 32 Emily Dickinson settings that has been performed by and recorded by Kaaren Erickson. His *Plump Jack* (1987) is an operatic treatment of Shakespeare's *Falstaff* to an original libretto.

WORKS

JOSHUA KOSMAN

Getz, Stan(ley) (*b* Philadelphia, 2 Feb 1927; *d* Malibu, CA, 6 June 1991). American jazz tenor saxophonist and bandleader. At the age of 12 he started on the harmonica and within a year switched to the string bass and then to the alto saxophone. He also played the bassoon in his high school orchestra. He was playing professionally at the age of 15 in New York and a year later made his first recording, having left school to tour as a sideman with Jack Teagarden. He joined several important big bands, including those of Stan Kenton (1944–5) Jimmy Dorsey (1945) and Benny Goodman (1945–6, 1947); while with Kenton he became addicted to heroin. In 1947 he joined Woody Herman's Second Herd, where with his fellow saxophonists Zoot Sims, Serge Chaloff and Ray Steward (soon replaced by Al Cohn) he formed the famous reed section known as the Four Brothers. In 1948 Getz's improvisation on Ralph Burns's *Early Autumn* (Cap.) established him instantly as a major soloist. After leaving Herman in 1949 Getz began to lead his own small groups and immediately started to dominate jazz popularity polls for his instrument, as he did for many years. From the 1950s he made a succession of outstanding recordings for Norman Granz's labels, despite his career being interrupted by difficulties associated with his addiction to drugs. He went to Europe with Granz's Jazz at the

Stan Getz

Philharmonic in 1958 and remained there working freelance, until 1960.

After returning to the USA in 1961 he recorded the album *Focus*(Verve), which included outstanding arrangements by Eddie Sauter, providing one of the first convincing amalgamations of jazz and European art music. In the following year with Charlie Byrd, Getz initiated a fusion of cool jazz and Brazilian bossa nova which captured the public's fancy and brought Getz much popular acclaim. Getz became cynical in the face of widespread, tasteless appropriations of bossa nova, even though he had proved himself to be the consummate improviser in this style in his solos on *Desafinado* from the album *Jazz Samba* (1962, Verve) and *The Girl from Ipanema* (on *Getz/Gilberto*, 1963, Verve). Getz continued to lead small groups in which he helped to launch the careers of Gary Burton, Steve Swallow and Chick Corea, but he found himself out of touch with the free-jazz and jazz-rock movements and spent the years 1969 to 1971 in semi-retirement in Europe. He resumed performing in the USA in 1972 and thereafter led small groups with many important young musicians, moving into the realm of synthesized jazz in the late 1970s, but in 1981 he rejected that path and returned to his traditional approach, based in bop and swing. From 1985 to 1988 he worked regularly in the San Francisco Bay area and served as the artist-in-residence at Stanford University. Although suffering from cancer, he continued to play as well as ever, most notably in a duo recorded live at the Jazzhus Montmartre in Copenhagen with the pianist Kenny Barron (1991, Verve).

Getz was one of the supremely melodious improvisers in modern jazz. His style was deeply rooted in the swing period. Drawing his light, vibrato-less tone and basic approach from Lester Young, he developed a highly personal manner which, in its elegance and easy virtuosity, stood apart from the aggressive bop style of the late 1940s and 50s. His justly celebrated performance on *Early Autumn* (1948), with its characteristically languorous melody and delayed rhythm, captured the imagination of many young white jazz musicians of the time and helped to precipitate the 'cool' reaction to bop in the years that followed. Although ballad renditions of this sort were the basis of Getz's popularity, he was also among the few jazz musicians who could remain lyrical even at very fast tempos, thanks to a secure technical command of his instrument; performances such as *Crazy Chords* (1949, New Jazz), a breakneck rendering of the blues in all 12 keys, set new standards of virtuosity for jazz improvisation on the tenor saxophone.

For many years Getz lacked the near-universal critical acclaim accorded his contemporaries John Coltrane and Sonny Rollins and his predecessors, the great tenors of the swing era. Reservations about his place in the jazz pantheon arose from Getz's obvious and substantial early borrowings from Young (and the broader implications of such appropriation to questions of audience and racism in jazz), from a feeling that his delicate style was perhaps too precious, lacking soul (that is to say, cold rather than cool), and also from critical concerns about a repetitive, mechanical approach heard in a number of fast-tempoed improvisations which he made during his first decade of recordings. But gradually, perhaps more so than that of any other jazz musician, the criticisms largely evaporated. One reason for this was that his playing became more varied at fast tempos, and heavier throughout; and he routinely modified his already beautiful, inimitable, instantly recognizable tone by incorporating soulful, individualized cries. Later, as the bop revival of the 1980s onwards gathered steam, Getz's approach came back in fashion; with most of the giants of this instrument having died, and Rollins exploring fusion styles, it was Getz (and Joe Henderson) who defined the *lingua franca* of jazz tenor saxophone playing, notably in his recordings with Abbey Lincoln and Barron. Finally, and perhaps most significantly, as the Brazilian component of Latin jazz became integrated into all sorts of jazz styles, including the very fusion and free-jazz movements from which he had distanced himself, it became apparent that Getz had had a substantial impact upon the development of jazz; his playing in this realm remains, with seeming permanence, unsurpassed. A collection of transcriptions of Getz's solos, *Stan Getz: Improvised Saxophone Solos*, has been published by T. Kynaston (Hialeah, FL, 1982).

J. BRADFORD ROBINSON/BARRY KERNFELD

Getzelev, Boris Semyonovich (*b* Kuybïshev, 27 Dec 1940). Russian composer. He received his musical education at the Glinka Conservatory in Gor′kiy (1961–6), studying with A.A. Nesterov (composition) and B.S. Marants (piano). He completed his studies as a probationary assistant lecturer at the Moscow Conservatory under Shchedrin (1968–72). In 1965 he began teaching at the Gor′kiy conservatory, first in the department of musical theory and composition, and from 1988 as head of the department of composition and instrumentation. He became an Honoured Artist of Russia in 1993 and was appointed to a chair in 1994.

Getselev is the foremost composer of Gor′kiy (now known again as Nizhniy Novgorod) which is considered the third city of Russia. He is intimately connected with the musical life of the city (many of his compositions have sprung from his contacts with its performing groups and soloists); he has written music for a number of productions at the Theatre for Young Audiences and for television films. Almost all his choral works have been written for the Nizhniy Novgorod Boys' Choir and Chamber Choir. During the mid-1960s the greatest influence on his work was that of his teacher Shchedrin; the rationalism of his style which lends his work an anti-Romantic flavour, is traceable to Shchedrin, as are the chromatic melodics, prevailing timbre and his fondness for dynamic ostinato figures. Getselev, however, was dissatisfied with the general level of the teaching of composition, and after graduating he set about re-equipping himself technically. He learnt 12-tone and aleatory technique and experimented with timbre, his chief model being Polish music and Lutosławski in particular. But these and other avant-garde techniques are not found in Getselev's work; his mature style explores new compositional approaches in more traditional ways. Although his reputation is based primarily on his choral, theatre and children's music, he

himself considers the instrumental genres central to his work. The influences of Shostakovich, Prokofiev, Stravinsky and Bartók are evident in his symphonies and concertos. However, neither in structure nor in surface features are these works in any sense copies of the models mentioned.

SVETLANA SAVENKO

Getzen Co. American firm of brass instrument manufacturers. It was first established in Elkhorn, WI, as a band instrument repair shop in 1939 by T.J. (Anthony James) Getzen (*b* Grand Rapids, MI, 25 Sept 1894; *d* Harvard, IL, 10 March 1968), who had formerly worked for York, Wurlitzer and Holton. Manufacturing of student-quality cornets, trumpets, trombones and piston bugles began in 1946. In June 1960 Getzen absorbed the Hoosier Band Instrument Co. of Elkhart, IN. Under the presidency of Harold M. Knowlton (October 1960 to December 1985) the firm gained world prominence, importing Meinl-Weston tubas from 1967 and introducing the popular 'Eterna' model trumpet and E.L. DeFord flutes in 1972, in the latter year also expanding their space by 75% through the purchase of a second factory in Marango, IL. The trumpeter Carl ('Doc') Severinsen was vice-president for research and development from 1969 to 1980. The firm went bankrupt in 1991.

In the meantime, Getzen's son (James) Robert had founded Allied Music Corp. (AMC) in 1959 and Allied Music Supply Co. (AMSC) in 1967. Robert's sons Edward (Michael) (*b* Elkhorn, 17 June 1950) and Thomas (Robert) (*b* Elkhorn, 10 June 1948) took over AMSC in 1974 and AMC in 1985. In 1988 they founded the Edwards Band Instrument Co. in Elkhorn, and began to manufacture high-quality trombones and trumpets with interchangeable parts. They rescued the ex-family firm from bankruptcy in 1991 and Getzen Company, Inc. became the parent company, with AMC the repair division. In 1998 Getzen was making instruments with the Getzen, Edwards and Canadian Brass trade names and manufacturing component parts for Monette.

In 1965 Donald E(arl) Getzen (*b* Elkhorn, 15 May 1928), another son of T.J. Getzen, founded DEG Music Products in Lake Geneva, WI, selling a full line of band instruments. Until 1991 his instruments were made by AMC, after that by Weril in Brazil.

EDWARD H. TARR

Getzmann [Geltzmann, Gelzmann, Gatzmann], **Wolfgang** (*fl* Frankfurt, 1605–13). German composer and organist. He was a pupil of Alexius Neander, probably at Würzburg, and he saw through the press four posthumous volumes of Neander's motets (1605–10). From 1610 at the latest he was organist of St Bartholomäus, Frankfurt. He published *Phantasiae sive cantiones mutae, ad duodecim modos figurales tam autenticos quam plagales, naturales non transpositos et transpositos, variis instrumentis musicis accomodatae, ex diversis demum musicae coryphaeis collectae, jamque primo in lucem editae* (RISM 1613[15]); according to Georg Draudius (*Biblioteca classica*, 1611), this volume appeared in 1610, so the print of 1613 may be a second edition. It is a collection of some of his vocal works and instrumental fantasias and canzonas. Getzmann dedicated the volume to Nicolaus Gereon of Mainz, a member of the Archbishop-Elector's council, for whose marriage in 1609 he composed the eight-part motet *Veni de Libano*, which is included in the collection and may well be identical with the lost *Epithalamium musicum*, composed for the same occasion and his only other recorded publication. The only composers whom he names in his collection are Thomas Bodenstein and Konrad Hagius, who are represented by one piece each. The fantasias show some influence of polyphonic English fantasias as well as of a new German instrumental style, which is evident particularly in the sequential writing that replaces polyphony derived from vocal music.

FRIEDRICH BASER

Geuck, Valentin (*b* Kassel, 1570–72; *d* Kassel, 3 Nov 1596). German composer and writer on music. He grew up at Kassel, attended the local school and sang descant in the choir of the Martinskirche. He had private tuition to prepare him for service as a musician at the court of Wilhelm IV, Landgrave of Hesse, and by 1585 he was a treble in the Hofkapelle. There he was strongly influenced by Georg Otto, who was Kapellmeister from 1586. In 1588 he became a tenor, and in 1592, on the accession of the 20-year-old Landgrave Moritz, he was also appointed a court official: he first worked as a clerk in the excise office, and then, in 1594, the landgrave made him his valet. The landgrave, a highly educated man and a proficient musician, held him in high esteem and not only encouraged him to compose but after his untimely death completed some unfinished works and was instrumental in getting some of his music printed. The texts of the *Novum et insigne opus* are paraphrases in tetrastichs by Landgrave Moritz of the Gospels for the Sundays and festivals of the church's year. Some 60 motets by Geuck survive and bear witness to his great promise. They are closely related in style to those of Georg Otto: they are in a smooth, predominantly harmonic idiom, with natural word-setting and expressive declamation. His *Musica* is a school manual written according to the method of Petrus Ramus; he was encouraged to write it by Landgrave Moritz, who partly edited it after his death. It shows that he was familiar with all the most important writings of the time on theory of music and that he possessed an intimate knowledge of the latest music and instruments from Italy. Its second part, 'De harmonia', which covers all aspects of polyphonic music – including text-setting, tempo, dynamics and musical genres – is particularly well conceived.

WORKS

Liber secundus: continens motetas dominicales, 6vv (Kassel, 1603[3])

Liber tertius: continens motetas dierum feriarum, 5vv (Kassel, 1603[4])

Tricinia, das ist dreystimmige weltliche Lieder, beydes zu singen und sonst auff Instrumenten zu spielen, 3vv (Kassel, 1603); lost, see *MGG1*

Novum et insigne opus continens textus metricos sacros ... liber primus motetarum festalium, 5, 6, 8vv (Kassel, 1604[5]); [? 2nd edn, see list in *MGG1*]; 3 ed. F. Blume, *Geistliche Musik am Hofe des Landgrafen Moritz von Hessen* (Kassel, 1931)

Cantio in solennitatem nuptiarum illustrissimi principis ac domini Mauritij ... et ... dominae Agnetis ... Qualis est dilectus tuus, 6vv, *D-MGs*

WILFRIED BRENNECKE

Gevaert, François-Auguste (*b* Huysse, nr Oudenaarde, 31 July 1828; *d* Brussels, 24 Dec 1908). Belgian musicologist, teacher and composer. He first studied music with the organist J.-B. Christiaens, a relative, and gave early evidence of an exceptional gift. At the age of 13 he entered the Ghent Conservatory to study the piano with De Somere and harmony with Mengal. Two years later he became a piano teacher himself; subsequently he was the organist at the Jesuit college in Ghent. In 1847 his Flemish cantata *België* won first prize in a competition organized by the Société des Beaux-Arts de Gand, and in the same year his cantata *Le roi Lear* won him the Belgian Prix de Rome. Because of his age he was permitted to postpone his foreign tour for two years, during which time he composed the operas *Hugues de Zomerghem* and *La comédie à la ville*. They were both published by the Gevaert family, who ran a music printing shop first in Huysse and later in Ghent. From 1849 to 1852 he travelled in France, Spain, Italy and Germany. In Madrid he composed the orchestral *Fantasia sobre motivos españoles*, a work which favourably impressed Queen Isabel II. He also wrote a *Rapport sur l'état de la musique en Espagne*, published in the bulletin of the Belgian Royal Academy in 1851; later he published a similar report on the state of music in Italy.

After a brief return to Ghent, Gevaert established himself in Paris, where his comic opera *Georgette, ou Le moulin de Fontenoy* was given with great success at the Théâtre Lyrique on 27 November 1853. He followed this with a series of operas over the next ten years, most of which were first performed at the Opéra-Comique. In 1867 he was appointed music director at the Opéra, a position he held until the outbreak of the Franco-Prussian War. He then returned to Belgium and succeeded Fétis as director of the Brussels Conservatory; under his energetic leadership, which covered a 37-year period, the conservatory grew to be one of the most important centres of musical learning in the world. He initiated fundamental reforms in teaching and organization, setting up new courses and expanding the teaching staff to include outstanding musicians such as Ysaÿe, De Greef, Tinel and Gilson.

Although not an important composer, Gevaert cultivated a number of genres with success; he wrote chiefly operas and cantatas, but also sacred music, secular songs and partsongs, and orchestral and organ music. His pedagogical works, however, are of greater significance: the *Nouveau traité d'instrumentation* (1885), a reworking of the 1863 *Traité général d'instrumentation*, was translated into German (by Riemann), Russian (by Tchaikovsky), English and Portuguese, and declared 'a monument of universal knowledge'. His *Vade-mecum de l'organiste* and *Traité d'harmonie théorique et pratique* were also much praised.

Most of Gevaert's historical writings deal with ancient and early medieval music. His exhaustive *Histoire et théorie de la musique de l'antiquité* regards the history of music as a part of cultural history. In *Les origines du*

chant liturgique de l'église latine and *La mélopée antique* he made a thorough study of the Greek modes and reached the conclusion that it was not Gregory but one of his predecessors who was responsible for reorganizing the hymnology of the Roman Church; at the time this theory was strongly disputed, especially by the Benedictine monks. He also published numerous editions of early music, including a collection of *Chansons du XVe siècle* (Paris, 1875/*R*) in collaboration with Gaston Paris.

Under Gevaert's influence, music schools throughout Belgium underwent significant reform and new schools were established. He was held in great respect by his contemporaries, being composer to the King of Belgium, a member of the Belgian Royal Academy, the Institut de France and the Royal Academy in Berlin, and a holder of the Leopoldsorde and the Order of the Queen of Spain. At the end of his long and fruitful life he was made a baronet for composing the national anthem of the Belgian Congo.

WORKS

OPERAS

first performed, and printed works published, in Paris unless otherwise stated

Hugues de Zomerghem (grand opéra, 3, V. Prilleux), Ghent, Grand théâtre, 23 March 1848, vs (Ghent, 1848)
La comédie lá ville (opéra bouffon, 1, Prilleux), Ghent, Grand, 5 Jan 1849, vs (Ghent, Paris 1853)
Les empiriques (oc, 1, G. Vaëz), 1851, unperf., *B-Bc*
Georgette, ou Le moulin de Fontenoy (opéra bouffe, 1, Vaëz and A. Royer), Lyrique, 27 Nov 1853, vs (Brussels, 1854)
Le billet de Marguerite (oc, 3, A. De Leuwen and Brunswick), Lyrique, 7 Oct 1854, vs (*c*1854)
Les lavandières de Santarem (oc, 3, A.-P. Dennery and Grangé), Lyrique, 25 Oct 1855, vs (*c*1855)
Quentin Durward (oc, 3, E. Cormon and M. Carré, after W. Scott), OC (Favart), 25 March 1858 (*c*1858)
Le diable au moulin (oc, 1, Cormon and Carré), OC (Favart), 13 May 1859, vs (1859)
Le Château Trompette (oc, 3, Cormon and Carré), OC (Favart), 23 April 1860, vs (1864)
La poularde de Caux (opérette, 1, De Leuwen and Prilleux), Lyrique, 17 May 1861, vs (1861) [collab. Clapisson, E. Gauthier, Poise, A. Bazille and S. Mangeant]
Les deux amours (oc, 2, Cormon and A. Achard), Baden-Baden, Maison de la Conversation, 31 July 1861, *B-Bc*
Le capitaine Henriot (oc, 3, after V. Sardou and Vaëz), OC (Favart), 29 Dec 1864, vs (1864)

SACRED CHORAL

Jérusalem, ou Le départ des Croisés (Ghent, 1847); Super flumina Babylonis, chorus, orch (Ghent, n.d.)
Te Deum, 1843, *B-Bc*; Requiem, male vv, orch (Ghent, 1853); Litanies du Très-Saint Nom de Jésus (Ghent, 1864); Christmas Mass, 3 children's/female vv, org (Paris, Brussels, 1908); 9 motets; other shorter works

SECULAR VOCAL

Cants.: Le départ (Ghent, 1846); België, 1847, *B-Bc*; Le roi Lear, 1847, *Bc*; Evocation patriotique, 1856, *Bc*; De nationale verjaerdag, *c*1856 (Ghent, 1856); Lyderic, premier forestier de Flandre (Ghent, 1859); Le retour de l'armée, 1859; Jacob van Artevelde (Ghent, 1864)
Other choral works; Les cloches de Noël, 1v, orch, *Bc*; many songs, 1v, pf, incl. Verzameling van [8] oude Vlaemsche liederen (Ghent, 1854)

INSTRUMENTAL

Orch: Fantasia sobre motivos españoles, 1851; Flandre au Lion, ov., 1848, *B-Bc*; La feria andaluza, 1851, *Bc*
Chbr and pf: Quatuor, cl, hn, bn, pf, Collège Melle-Lez-Gand, Ghent; Grande fantaisie, pf 4 hands/pf solo

Geyer, Johann Christoph. *See* GAYER, JOHANN CHRISTOPH.

Geyer, Stefi (*b* Budapest, 23 June 1888; *d* Zürich, 11 Dec 1956). Swiss violinist of Hungarian origin. A pupil of Hubay at the Budapest Academy, she travelled in Europe and to the USA as a child prodigy. From 1911 to 1919 she lived in Vienna; she then settled in Zürich, where in 1920 she married the composer and pianist Walter Schulthess. She made numerous concert tours and held a master class at the Zürich Conservatory from 1923 to 1953. In 1927 she played the solo violin part in the première of Berg's Chamber Concerto in Berlin. From 1941 she was leader and soloist of the Collegium Musicum Zürich, conducted by Paul Sacher. In 1907 Bartók conceived a passion for Stefi Geyer which she was unable to return. For her he wrote the First Violin Concerto (1907–8) with 'her' motif, C♯–E–G♯–B♯, but she never played it in public (the autograph copy, with Bartók's letters to her, are in the possession of Paul Sacher). The first movement appeared as 'The Ideal' in the *Two Portraits for Orchestra* op.5. Further works for Geyer were written by Othmar Schoeck, who was in love with her (Violin Sonata op.16, 1908–9, and Violin Concerto op.21, 1911–12), by Willy Burkhard (Second Violin Concerto op.69, 1943), and by Schulthess (Concertino op.7, 1921).

JÜRG STENZL

Geysen, Frans (*b* Oostham, 29 July 1936). Belgian composer. He studied at the Lemmens Institute in Mechelen and the Antwerp and Ghent conservatories. He was appointed professor of harmony and analysis at the Lemmens Institute (1962), moved to Leuven in 1968 and from 1975 taught at the Brussels Conservatory. He won several composition prizes, including some for carillon composition in Mechelen and Bruges.

He started composing in 1958 and studied serialism from 1962 to 1965. From 1967 he reacted against the aperiodicity and discontinuity of serialism, developing a technique of evolutionary repetition which was free of the influence of American minimalism, maintained the constructivism of serial thinking and referred to Netherlandish Renaissance polyphony. His repetitive processes emphasize evolution and transformation, excluding pure repetition. Geysen writes abstract music, in which construction of sound is the only principle, sensory experience is possible and in which emotion as expression or goal is excluded. He is interested in the plastic arts, especially their abstract and minimalist tendencies. This has resulted in many collaborations with artists such as Ado Hamelrijck, Luc Peire and Piet Stockmans. Geysen has written several articles on modern music for *Adem*, *Arsis*, *Muziek & woord*, *Orgelkunst* and *Restant*.

WORKS

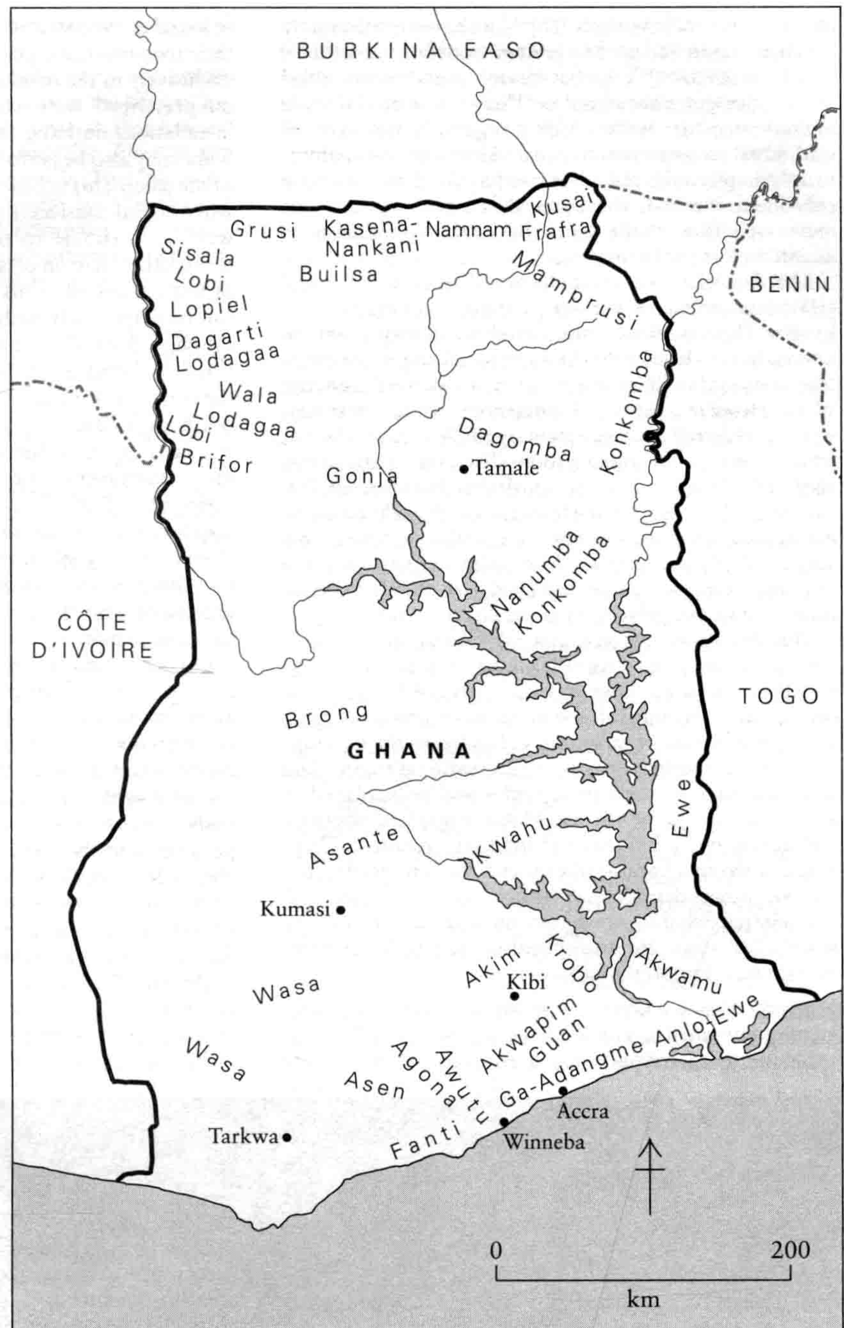
YVES KNOCKAERT

Ghana, Republic of [formerly Gold Coast]. Coastal West African country. It has 19·93 million people (2000 estimate) and an area of 238,540 km². Its musical traditions reflect the variety of musical styles found in West Africa, for, although Ghana is a comparatively small country, it is made up of several ethnic groups that have historical, cultural or linguistic affinities with societies beyond its borders (fig.1). The Northern and Upper regions of the country, which are occupied by about two and a quarter million people, form part of the savanna belt of West Africa and belong to the Sudanic cultural area. The rest of the country, consisting of the rain-forest belt and the coastal plains, belongs to the so-called Guinea Coast area.



About 36 different languages are spoken in Ghana, although only six of these are cultivated officially as written languages. Of these, Akan, in the form of its Twi and Fante dialects, is the most widely spoken. It is also the language whose cultural expressions, including music, have had the greatest impact on other Ghanaian societies.

1. MUSIC OF THE MAIN ETHNIC GROUPS. The most outstanding characteristic of traditional music, which distinguishes it from the new music, is the great diversity of its forms and the usages to which it is put. Ethnic groups show considerable flexibility in their choice of contexts of performance, musical types, musical items, instruments and vocal styles, as well as in details of form and structure. The choices that each society makes, however, are not always unique to it and may overlap with those made by others. Some societies use similar instruments but not the same scales; others cultivate similar types of music but develop them out of different resources; and similar ceremonies and rites are performed with different selections of music.

Certain patterns of distribution emerge, therefore, when traditional music and musical practice are viewed on a regional or country-wide basis. Some resources and usages are concentrated in the north – a major culture area – while others are based in the south. For example, varieties of the *jongo* musical type are performed in Frafra (Gurunsi), Kusasi (Kusaal), Kasena–Nankani (Naani), Builsa (Buli) and Sisala (Sisaala) areas in northern Ghana, but not in the south. *Damba* music and dance are performed at festivals of Islamic origin in Dagomba, Gonja and Wa (Wala or Wali) areas, but hardly anywhere else found. On the other hand, a few musical types and instruments are found throughout Ghana.

These patterns of distribution reflect the continuing social, cultural and linguistic affinities of Ghanaian societies, which have in the past developed their own political identities. The Dagbon (Dagbani), Mamprusi and Nanumba (Nanuni) peoples, for example, speak closely related languages and share cultural usages, for they are related historically to the Mossi and Gurma of BURKINA FASO. A similar situation exists among other societies such as the Lowiili, comprising the Lobrifor, Lopiel, Lodagaa (Dagaaba) and Sisala, in north-west Ghana, the Ga and Adangme of southern Ghana, or the many groups that make up the Akan cluster – the Asante (Ashanti), Brong (Abron), Akim (Akyem), Kwahu (Kwawu), Akwapim (Akuapem), Agona, Asen, Wasa, Fante (Fanti) and Akwamu. It is thus possible to group traditional societies in Ghana together into large clusters on the basis of the similarity of their musical cultures or areas of emphasis.

The Mamprusi-Dagomba cultural group of north-eastern Ghana includes the Dagomba, Mamprusi, Kusasi, Frafra, Namnam and some of the Gonja societies. This is the culture of the one-string fiddle, of two-string lutes and of hourglass drum ensembles. There is a tradition of professionalism, with a strong emphasis on praise-chanting, performed by specialists. The scales used are of the pentatonic varieties, the anhemitonic predominating. Slight ornamentation characterizes the vocal and instrumental styles, particularly those of the one-string fiddle.

1. Map of Ghana showing the distribution of the principal ethnic groups

Islamic influence is particularly marked in the customs and festivals of the Dagomba, Mamprusi and Gonja, but is less evident in their music.

The Grusi group of north-central Ghana includes the Kasena-Nankani, the Builsa and the Konkomba (the last being included in this group solely on stylistic grounds). The Grusi chiefly use aerophone and drum ensembles. Three to six flutes or horns, or a mixed ensemble of both, accompanied by drums, play in a hocket style, which allows for the use of definite polyphonic structures. Grusi music is heptatonic and polyphony is based on the 3rd as a consonant interval. At final cadences, parts moving in parallel 3rds resolve into unison.

The Lobi, Brifor, Lopiel, Dagarti, Sisala and some of the societies in the Wa district constitute the Lowiili group of the north-western region. Their main instrument is the xylophone, played alone or with the support of a small drum ensemble. Finger bells and ankle bells are often used in the dances of this area. The scales are largely pentatonic, both hemitonic and anhemitonic. Xylophones tuned to a tetratonic scale are found in the Lobi area.

The south-central Akan group includes the Asante, Brong, Akim, Kwahu, Akwapim, Akwamu, Wasa, Asen, Agona, Fante and societies with a predominantly Akan singing style: the Awutu, Guan (Gua or Guang) and Ewe of the Ho administrative district and some of the speakers

of Togo remnant languages. The Akan have an elaborately organized court and use a large number of drum ensembles (*see* ASANTE MUSIC). Trumpet ensembles and instrumental speech surrogates are common. There is also an elaborate military structure with a highly organized repertory of traditional songs and drum music. Akan music is predominantly heptatonic; polyphony is based on the 3rd as a consonant interval, the main difference between this music and that of the Grusi being that parallelism is maintained at final cadences.

The Ga-Adangme of south-east Ghana are a small group composed of the Ga, Dangme (Adangme) and Krobo. Their traditions are mixed because of intensive interaction with their neighbours: for example the court traditions and military organization are derived from the Akan. However, there are indigenous musical features, which are shared to some extent by the Awutu and Guan, who belong to the Akan group. The chief instruments used in the indigenous music are drums, but there are few varieties. The most notable features are the cultivation of *klama* songs (accompanied by an ensemble of three drums and a bell), *kple* (music for *kple* gods) and various types of religious music. Indigenous songs are mainly anhemitonic pentatonic; polyphony is used in vocal refrains.

The Anlo-Ewe of east coastal Ghana are a fairly homogeneous group musically closer to societies in Togo and Benin than to those in other parts of Ghana. The organization of musical associations or dance clubs, a distinctive feature of musical life, has led to the development of many different types of recreational music. The main instruments are drums, rattles and bells, played in ensembles (fig.2), which use highly organized rhythms and distinctive techniques and internal structures. There is also a strong choral tradition and the song leader, the *hasino*, often develops a reputation as a poet and composer. Melodies are based on complex pentatonic scales that allow for transposition; singing in parallel octaves is an important feature.

2. MUSIC AND SOCIETY. In traditional societies music-making tends to be confined within the boundaries of social life. Specific types of music are customarily assigned to social occasions, and social groups create and maintain their own musical types. Some categories of music belong exclusively to the royal court and may be performed only on prescribed state occasions, such as ceremonies of installation, durbars, state festivals and royal funerals. Some may also be performed simply for the entertainment of the chief. This practice is customary in northern Ghana where royal musicians perform at court at least once a week as a tribute to the chief. Performances of court music other than on prescribed formal occasions are more or less controlled. Thus in southern Ghana, court drums can be played only with the permission or knowledge of the chief. A royal drum ensemble may be sent to a funeral if the deceased or one of his relatives is connected with the court, or if the chief wants to convey his sympathy. In northern Ghana, on the other hand, musicians who regularly perform for chiefs may also perform on the same instruments for the general public, although a different repertory is selected for such performances. The court nevertheless has priority: the musicians may perform elsewhere only when they are not needed. Instruments that have sounds with symbolic connotations or are connected with the chief's rituals may not be played for the general public.

Certain musical types are identified with esoteric groups such as religious cult groups, others with the traditional associations, for example warriors, heroes and different occupations. Such music is played only when the group meets to perform a ritual or ceremony or for a celebration.

Other types of music belong to the public domain. Some are for entertainment or recreation and may be performed in the evening or on any social occasion that allows for spontaneous musical expression by members of the community. In northern Ghana, the performance of such music is intense in the dry season, which may last for six or seven months. During this time, crops planted in the rainy season are harvested and work on the farms is not as heavy, so time can be given to the performance of music and the celebration of funerals held in abeyance during the sowing season. There is no seasonal fluctuation

2. Anlo-Ewe drum ensemble with (left to right) axatse (rattles), gankogui (double bell) and three barrel drums: atsimewu (master drum), sogo and kidi

in the frequency and intensity of recreational musical activity in southern Ghana.

Music in the public sphere includes types for rituals and ceremonies connected with events in the life-cycle – birth, puberty, marriage and death rites – or that honour particular individuals. Ghanaian societies differ in the kind of events they celebrate with music. The Dagomba perform naming ceremonies with music, but the Akan of southern Ghana do not. Puberty ceremonies are musical events in the south, but are not as important in the north. Marriages in the north are celebrated with music, but rarely among the Asante.

The ceremony celebrated everywhere with much music is the funeral. Special songs or musical types are set aside for particular events of the funeral and for particular individuals and groups of individuals. However, the ceremonial and ritual details vary in their degree of elaboration or intensity. In many places in northern Ghana, funerals are community events, organized in a very elaborate manner within a dramatic framework that allows the mourners to express themselves individually and collectively in special songs and dances at various stages of the ceremony. In the south, only the funerals of royals and other special categories of people reach a similar level of dramatic intensity. Another very important occasion celebrated in all Ghanaian societies with music is the festival designed for re-enacting the history and traditions of a society, for marking agricultural activities, for bringing together divinities and their community of worshippers, and for stating or affirming those values on which the solidarity of the group depends. There is hardly any area in Ghana that has no festival, for the festival brings together all sections of the community.

In addition to music for entertainment and celebration, certain types of music and repertories of songs are performed during domestic activities and during organized labour by cooperative work groups and other social groups. Apart from fishermen's songs, this kind of music is now apparently far less common in the south than in the north, where groups of musicians still perform for those clearing the farm or harvesting crops and where grinding songs, pounding songs, floor-beating songs, boat-launching songs and the music of boys herding cattle can still be heard.

3. Musical instruments. The instruments used by Ghanaian societies include a variety of idiophones. Rattles are the most common, although they are used in many different contexts. Among the Akan, they are used in only a few types of music such as the *kete* court drum music, the Fante *adzewa* drum music and the music of the gods (such as *akom* and *apo*); among the Anlo-Ewe (Anglo-Ewe), nearly all musical types include rattles and the number may range from two to 20, depending on the particular type of music performed.

There are container rattles made from a gourd or of wicker, and rattles consisting of gourds strung with nets of beads, cowries, pieces of bamboo shoot, metal or coins. The latter type is found in the south among the Anlo–Ewe, the Fante and Ga, and in the north among the Dagomba, who use it to accompany *dimbu* (songs for rattle accompaniment). In some parts of northern Ghana, stick or rod rattles, seed shell rattles made out of the fruit of the baobab, and the sistrum are also used.

Secondary rattles (i.e. rattles attached to the bodies of performers – dancers or instrumentalists – or to musical instruments) are also common, especially in northern Ghana. Many dances in the north require the wearing of ankle buzzers, or occasionally belts of cowries, and players of xylophones in the Sisala area sometimes wear the *bulo*, a metal buzzer on their wrists.

Bells of different types and sizes are played in Ghana: these include both clapper bells, which in the south are used mainly in ritual contexts, and clapperless bells, which are of two types. The single clapperless bell is either conical and held at the apex or boat-shaped and held loosely in the palm of the hand (the former is struck with a piece of stick, the latter played with an iron rod). The double clapperless bell consists of two conical bells of different pitches flanged together (in southern Ghana) or held together by an arch (in northern Ghana, particularly among the Dagomba and the Mamprusi). There are also globular or conical finger bells worn on the middle finger and struck by a ring worn on the thumb.

Other idiophones include the forged iron hoe played in northern Ghana in certain types of music, in which double discs in the form of two hoe blades, joined together at the base, are struck with a metal ring. Pellet bells (generally strapped to the wrist of an instrumentalist) and the *buguloo* (large pellet bells of cast brass, strung on a wire or sewn to a band of hide, and attached to a single clapper bell) are used in Sisala areas. In some types of music, animal horns are used as struck idiophones instead of bells. Two pieces of flat stick or bamboo may be struck together to provide an accompanying rhythm, either as a substitute for or in addition to hand-clapping or bells. Percussion logs are used occasionally among the Asante (in *asonko* recreational music), while percussion vessels consisting of a hemispherical inverted gourd are found in a few places. In the north they are placed on the ground and struck with the fingers; in the south they are placed in a bowl of water and struck with the hands (by the Akan) or with two pieces of stick (by the Anlo-Ewe).

In addition to struck idiophones, scrapers are used in some types of music in the south: they consist of single notched sticks scraped with a hard shell. Stamping sticks and stamping tubes made out of gourd or bamboo are also found in the south.

These idiophones are used principally as rhythm instruments and cannot be used for playing melodies. Two types of tuned idiophone occur in Ghana: the *mbila* (sansa) or thumb piano, called *prempensua* in Akan and *gidirigo* in Gonja, and the *gyilli* xylophone. Lamellophones are of two types: the *ahyewa adaka*, consisting of a large box on which three to five metal lamellae are fixed, and a smaller instrument used for playing tunes or for accompanying solo singing. Ghanaian xylophones may have 12, 14 or 17 keys mounted on wooden frames, underneath which are suspended gourd resonators graduated in size, one for each key; children sometimes practise on xylophone keys laid across a pit or trench.

A variety of open and closed drums are found throughout Ghana. Societies in northern Ghana favour closed and double-headed drums, as well as frame drums consisting of potsherd over which a membrane has been stretched, whereas societies in the south prefer single-headed open drums; but as a result of historical interaction some drums of the north have been adopted in the south for use in specific types of music, while in the north some southern drums are used at the royal court. Thus the *atumpan*, an Akan talking drum (fig.3), is found through-

3. *Atumpan (left) and fontomfrom (right), Akan talking drums carried in a procession at Kibi, Eastern region, Ghana*

4. *Ntahera ensemble of ivory horns, played by Asante musicians*

out Ghana and the *apentemma* (*operenten*) hand drum is similarly widespread. The *donno* hourglass drum (for illustration, *see* DRUM, fig.1*f*) and the gourd drum (*bentere*, *pentre*), two northern drums, are used in the south.

The drums of the Anlo-Ewe of the south-eastern coast are distinct from other Ghanaian drums, for they are made of strips of wood joined together by iron hoops and are always painted red and blue or green. No other Ghanaian society has so far adopted the drum technology of Anlo-Ewe.

Of the aerophones, horns are the most widespread, although they tend to be restricted to royal courts and also, in the north, to special types of music. They vary in size and may be made of animal horns or the tusks of elephants. They are played singly, in pairs or in larger ensembles. One such ensemble is the *ntahera*, a set of five or seven ivory trumpets played at the court of paramount chiefs of southern Ghana (fig.4). Flutes are more common in the north than in the south. The *yua*, a small flute carved out of solid wood with a notch or round embouchure, is found throughout northern Ghana, but is

particularly common among the Builsa and the Kasena-Nankani. In the south the *atenteben* bamboo flute is played in the Kwawu area both as a solo instrument and in ensembles. The *odurugya*, a long notched flute made out of the husk of cane, is played at the court of the Asantehene, head of the traditional Asante political union. The *taletenga*, an idioglot reed pipe, is made from a stalk of millet or maize. A small flap is cut towards one end of the millet stalk to serve as the reed, but is not completely severed.

Like flutes, chordophones are less common in the south than in the north of the country. The *benta* mouth bow and the *seperewa*, a six-string bridge-harp, are still found in isolated places in Asante but are fast dying out. The chordophones found in the north are the *gonje* (a one-string fiddle, fig.5, *see* GOGE), varieties of lutes (*kologo*, *kono*, *mogolo*), the *jinjeram* musical bow with gourd resonator and the *cheeng* raft zither made of 11 single and double courses of split reeds tuned and tied together in the form of a raft.

4. VOCAL STYLES. Although there is some variety of instrumental types in Ghana, the apparent function of many instruments is to provide support for the voice as a rhythm section or an accompanying ostinato, or to substitute for the speaking or singing voice. The Ghanaian vocal style is varied: some societies (e.g. the Akan and the Ga) use an open throat quality, while the Frafra and the Kusasi use a more tense quality. The use of a high tessitura is quite widespread in the north and is sometimes closely related to the range of melodic instruments such as flutes, xylophones and lutes that accompany singing.

Divergences in vocal style are partly attributable to linguistic factors, for the melodies of traditional music reflect very closely the intonation and rhythms of speech. Melodies generally have a downward trend, the rise and fall within phrases reflecting linguistic intonation patterns within phrases as well as at phrase junctures. This trend is accompanied by a variation in dynamic range that in some societies, such as the Kusasi and the Frafra, is very marked and is cultivated as an aspect of musical communication: in a praise-song the singer will begin with a loud outburst intended to draw attention, and then drop to a softer level.

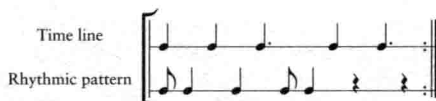
5. MELODY, POLYPHONY AND RHYTHM. The music of different Ghanaian societies does not all conform to the same set of scales: some are heptatonic varieties, others hexatonic and pentatonic. Of these, the heptatonic appear to be the least variable. Variants of specific scale steps may occur as alternants within the same song, for instance perfect or augmented 4ths, minor or major 7ths. Societies that use this scale are the Kasena-Nankani, the Builsa and the Konkomba in northern Ghana and, in the south, the Akan, the Ga, the Ewe of the hinterland of the Volta region and some of the speakers of Togo remnant languages.

The hexatonic scale appears in two main forms: as a simple hexachord, that is, as a conjunct sequence of two trichords, and as a combination of a trichord and a three-note sequence, either a 3rd followed by a 2nd or a 2nd followed by a 3rd. Hexatonic music is performed by the Kusasi and the Frafra of northern Ghana and also by societies whose music is mainly in the pentatonic scale.

The pentatonic scale is found in a large number of different ethnic groups, but with slight differences in intonation. It occurs in both anhemitonic and hemitonic varieties. Some societies (e.g. the Anlo-Ewe, the Dagbani and the Frafra) have both, others only one (the Lobi, Dagarti and Sisala). Songs based on these scales also differ in their melodic organization. In many societies they are confined to one series of notes in the scale, while in others, such as the Frafra and the Anlo-Ewe, they are extended by the use of simple transposition techniques. Whatever the scale commonly found in a given society, the range of songs need not always include all the notes in the series. Thus in many children's songs, action songs, processional songs and games, the range may be a trichord, a tetrachord or a pentachord.

Polyphonic practices are generally related to scale types and forms of melodic organization. Most societies that have pentatonic traditions sing in unison, but among the Adangme a form of polyphony is used in vocal refrains in which two voices move in contrary motion against a held or repeated note. Societies in which the heptatonic scale is found sing in parallel 3rds throughout, as in Akan tradition, or end in unison at final cadences, as in the music of the Builsa, Kasena-Nankani and the Konkomba of northern Ghana. Even in traditions in which unison

5. Ensemble of gonje (one-string fiddles) and kologo (plucked lutes), northern Ghana



singing is usual, polyphonic forms of instrumental music may occur. In the xylophone traditions of the Lobi and the Sisala a fixed accompanying pattern played by the left hand is set against a melody played by the right.

In traditional music the treatment of rhythm is much more uniform than that of pitch. Music may have a linear organization in free or in strict time, and in the latter case the metre is either predominantly duple or based on a combination of duple and triple motifs. However, it may have a multi-linear organization. This is particularly notable in the polyrhythms of some drum music. The structure of the rhythmic patterns may be simple, with all the parts following simple divisions of a single regular beat, or complex, with the various parts using different divisions of a common time span. The latter practice is typical of the xylophone music of the Sisala and the Dagarti.

An important element in the organization of rhythm is the ordering of patterns into phrases and the control of the length of phrases. In some types of music this is very clearcut: short phrases or phrases equivalent to the span of a bell pattern are used. In others there are longer phrases or phrases of a more fluid structure, as in the drumming of the Kasena-Nankani and the Builsa. The most complex type of rhythmic organization occurs in the royal music performed by *fontomfrom* drum ensembles in the Akan area and by the *obonu* and *vuga* ensembles of the Ga and Ewe. In this music clearcut short phrases, phrases of the standard time span and longer fluid patterns are all used in various sections of a piece.

The use of an accompanying bell pattern which functions as a time line (or underlying metre; ex.1) is

Ex.1 Time line with rhythmic pattern (Nketia, 1974)

widespread, although in northern Ghana it is generally restricted to certain types of music. For example in the Dagomba area a bell pattern is used in the music of the *nyindogu* and *kanbonwaa* dances, but not in the music of the *damba* (hourglass drum music played at *damba* festivals), the *takai* (a stick dance) and the *bamaya* dance. The Kasena flute and drum music has no bell pattern, but *sinye* (rattles) may be played as time markers and *denkenkelen* (iron bells) may be played at funerals. Instead of a bell a soda bottle may be used, as in the *agoro* (drum ensemble and chorus music) of the Gonja or the music of the Dagomba *jinjeram* (musical bow) and the *moglo* (a three-string lute).

6. Performance. Ghanaian music allows for both individual and collective performance in specific contexts. Firstly, there are items that may be performed as solos, including cradle songs and songs performed during domestic work; ceremonial songs such as individual dirges or laments forming part of funeral ceremonies; praise-songs; flute, xylophone, trumpet or horn solos; ritual songs sung by a diviner or other individual in a ritual context; and music performed in seclusion by a person establishing ritual contact with the gods.

Secondly, music may be performed by an individual supported by one or two people or by a small group which performs a subsidiary musical role, for example music for the Frafra-Kusasi *durunga* or the Dagomba *gonje* (both one-string fiddles) in which the fiddle player is accompanied by one or two rattle players. Similarly, in the xylophone music of north-western Ghana, the principal instrumentalist is supported by a second player, who taps an accompanying rhythm on one of the keys of the instrument while duplicating the main melody. There are solo songs with chorus accompaniment, such as the Asante *kurunku*, and duets such as the Kasena *Le sena*, in which one singer plays a leading role.

The third type of performance, an extension of the second, is by instrumental ensembles cultivated at royal courts. They may consist of three to nine drums, such as the *kete*, *apirede* and *fontomfrom* ensembles of the Akan, or the *lunsi* hourglass drum ensemble of the Dagomba. Such ensembles are also common in other contexts in northern Ghana, where they provide the music for household and community ceremonies and rituals, and also play for formation dances by small teams.

The fourth type of performance is choral. The chorus may be composed of men or women, or it may be mixed and led by one or more soloists who sing the call, while the rest sing the response. The response may simply follow the solo, or the two parts may overlap, so that the soloist begins to sing before the choral response ends. He may sing with the chorus in the overlapping section, or he may use different material. Sometimes a pair of soloists sing simultaneously, the second entering after the first; sometimes they may sing the call sections alternately. A traditional chorus either sings unaccompanied or is accompanied by hand-clapping or rhythms played on an idiophone (ex.2) or by a drum or xylophone ensemble.

7. Modern developments. Until the latter part of the 19th century, when active British colonization of Ghana (then known as the Gold Coast) began, many Ghanaian societies were culturally homogeneous. In the 20th century two distinct types of cultural expression became evident, one embodying the heritage of the past and reflecting the life of traditional societies, the other arising from Ghana's contact with Western culture and technology. This duality is reflected in the contrast between the well-established traditions of indigenous music and the evolving intercultural musical traditions that began to serve the new urban institutions such as the ballroom, the café, the night club, the concert hall and the theatre, as well as educational institutions and the church.

Musicians who practise this new music use both African and non-African resources. While they sometimes use traditional African instruments, they more commonly use Western instruments to play tunes that are basically

Ex.2 Chorus accompanied by bell pattern (Nketia, 1962)

African in rhythm and melody. They may organize multi-part structures on traditional lines or base them on models from Western music. Thus, although traditional forms of polyphony in parallel 3rds can be found in their music, the trend is towards the selective use of Western harmonic techniques rather than the consolidation of traditional African practice.

The new Ghanaian music is developing in two particular areas. The first is HIGHLIFE, a form of popular music that originated in the early 20th century and is cultivated by a large number of touring bands based in the principal cities. The second is the new Ghanaian art music, which owes its development to the search for an African idiom to replace the Western hymn and anthem and which is now identified both with the church and with the concert hall and educational institutions. A new generation of literate composers and performers has consequently appeared, and music education is no longer an aspect of socialization in the community only but is also part of the school curriculum.

The recognition and support of contemporary developments in music have not minimized the historical and cultural importance of traditional music. This has continued to occupy a dominant position not only in the musical life of traditional societies but also, through the mass media and educational programmes, at arts festivals and on certain national occasions, as it is regarded as a medium for the expression of identity and the new generation of musicians, inspired by the new cultural awareness, are turning to it increasingly for material and ideas.

J.H. KWABENA NKETIA

Ghaṇṭā [ghaṇṭ, ghaṇṭī, ghaṇṭikā, ghaṇṭo]. A South Asian term found in Sanskrit and the derived North Indian languages; it is often translated 'bell' but it also denotes, both historically and in different regions, other percussion or shaken metallophones.

In many of the modern North Indian languages the masculine form *ghaṇṭā* denotes the large suspended bell of the temple, and the feminine *ghaṇṭī* a handbell, either the medium-sized variety rung by the priests at certain points of temple ritual or the small bell of domestic worship. The Tamil term for a bell is *maṇi*, in Andhra Pradesh the bell is called *ghaṇṭā* and in Karnataka *gaṇṭe*; the *hāth ghaṇṭī* ('handbell') is the equivalent in Orissa. The suspended temple bell with interior clapper is an essential element of the Hindu shrine: hung at the gateway of small open shrines or, in the large temples, in the foyer leading to the inner sanctum, it is rung by each approaching worshipper to invoke the deity. In the larger temples they can be very large. They are generally cast in bell-metal (*kāṃsya*, or *ksā*). However, sometimes a special alloy known as *saptadhātu* ('the sevenfold metal') is used.

Pellet bells (muyang, above) and clapper bells (irna) worn for dancing by the Maria Gond people, Bastar district, Madhya Pradesh

Another use of the term is for round percussion plaques. These relatively thick bell-metal plates of various sizes are suspended from the hand by a cord and beaten with a wooden stick; they are also called *ghaṭī* in Sanskrit. Of this type is the *ghaṇṭ* of Orissa. These are used in the traditional context of temples and other religious places but can also appear in drum ensembles for dancing; above all, they are the traditional Indian clock on which the hours are beaten.

The term *ghaṇṭā* (and variants) may also denote gongs but not percussion trays with which they may be confused. The latter (the common Indian eating-tray used as a metallophone) are known by the generic term *thālī*. The Orissan *ghaṇṭo* is a gong made of bell-metal, about 22 cm in diameter, with a rear flange, inward-sloping and about 5 cm deep and half a cm thick. The front plate, almost imperceptibly convex, is thicker in the centre; this is emphasized by filing or scoring, creating a round, thicker central area about 12 cm in diameter, cross-scored in ellipse, and a thinner outer ring, scored circularly, parallel to the edge of the gong and about 5 cm wide. The outer half of the flange (but not the edge) and the corner are coated with dry black resin; a cord passes through two holes near the edge. The central and outer sections of the plate have different tones, but the *ghaṇṭo*, when properly struck in the centre, also produces a deep, slowly rising note. The *ksar* of Bengal is of similar construction. Bossed gongs are not typical of South Asia, except in the North-East, where they are used by Tibeto-Burman- and Thai-speaking peoples. The *ghaṇṭā* of the Santals of Orissa is a gong about 19 cm wide with a slightly outward-sloping rim 4 cm high. It is struck with a stick.

The Sanskrit term *ghaṇṭī*, or the diminutive *ghaṇṭikā*, can also denote small metal pellet bells, worn cosmetically or on various parts of the body for dancing (female dancers traditionally wear 101 bells and male dancers 151 around the lower legs). The spheres, of bell-metal, with a slit on one side and interior pellets of *ṭīkṣṇa* (probably cast-iron), are threaded on to strings by an integral ring at the top. Bells of this type are common throughout South Asia, known in North India as *ghuṅgrū*. Another common type, consisting of hollow rings with multiple pellets, is the *nūpur*.

ALASTAIR DICK/R

Gharānā (Hindi: 'household, lineage'). In North Indian art-music, a community of musicians, linked by ties of family and discipleship and identified by a distinctive musical style (*see* INDIA, §II, 3(iii). In general use the term may be applied to a tightly-knit family (*khāndān*) of Muslim hereditary musicians, together with their disciples (often Hindu); or to a larger network of interrelated families, Muslim or Hindu, with a common place of origin; or more casually, to any group of musicians tracing their tradition from a common teacher or place of origin. To be recognized as an established and significant *gharānā* the community must have a distinct vocal or instrumental style (*gāyakī*, *bāj*), attributed to a respected founder and maintained by at least two further generations after him. Many *gharānā* cultivate a particular musical specialization: either one of the classical vocal styles (*dhrupad*, *khyāl*, *ṭhumrī*), or an instrument, melodic (*sitār*, *sarod*, *bīn* etc.) or percussion (*tablā*, *pakhāvaj*). Other *gharānā* may combine a variety of vocal and instrumental specializations. The musical repertory of a *gharānā* often includes special techniques, compositions or *rāg* known only to its members.

RICHARD WIDDESS

Ghaṭa [ghaṭam, ghaṛā]. Terms used in South Asia for a waterpot; the Sanskrit *ghaṭa*, the South Indian form *ghaṭam* and the modern North Indian derivative *ghaṛā* signify a pot, usually of terracotta, spherical, with a wide belly and narrow mouth. They occur widely in various musical contexts. The modern northern and southern terms denote primarily struck pots (percussion vessels or idiophones), but the historical usage (in addition to other names) may also apply to skin-covered pots, pot-drums or membranophones.

1. Percussion vessels or pots. 2. Pot-drums or membranophones.

1. PERCUSSION VESSELS OR POTS. These, sometimes made of a special sonorous clay, are widely used in various musical contexts. They are struck with the fingers on belly, neck and mouth and are sometimes played with drums.

In modern times the northern *ghaṛā* is common, though it is sometimes known by other names such as *māṭki* (Rajasthan), *nūt* (Kashmir) and *dilo* (Sind). The *gagrī* (*gagrā*) is similar, but is made of metal.

The *ghaṭam* of South India is used in several contexts, including the Karnatak music, for which special pots are made at Panruti and Manamadura. The pot is placed on the seated player's lap and its mouth is sometimes pressed against the abdomen to vary the resonance. It is played at the mouth, belly and bottom with hands, wrists, fingertips and nails. It is said that the *ghaṭam* was sometimes thrown in the air to shatter on the ground on the last beat.

2. POT-DRUMS OR MEMBRANOPHONES. The waterpot also provides a natural resonator on which to stretch a skin. Although the term *ghaṭa* and its modern derivatives usually denote percussion vessels, the *ghaṭa* briefly described in the 13th-century *Saṅgītaratnākara* is a pot-drum. Pot-drums have a persistent history in the subcontinent, perhaps reflecting their easy availability at every level.

Pot-drums may be grouped in several classes: whole-pot drums, half-pot or goblet drums and bowl-drums. The skin of a whole-pot drum may cover a wide or narrow mouth, with either a short neck as in the Tamil *milāvu* with its strong tradition in temple and dramatic music, the southern *kuḍamula* and the very large, five-necked *pañcamukhavādyam*) or a long neck, like the *ghumera* or *gumra* of Orissa. They may have an opening at the bottom of the pot. The long-necked pot-drums occur more often in reversed form as goblet or half-pot drums, with the skin covering the base of the pot's wide belly, which is partly cut away (or moulded in that form). The open mouth at the neck can be covered or partly covered by the hand to manipulate resonance. Long-necked pot drums include the *ghumaṭ* of Goa and Maharashtra, the *gummaṭi* and the *burra* of Andhra and the *tumbaknārī* of Kashmir (related directly to the Persian *tombak* or *zarb*). The *ghumaṭ* is interesting for its

Pot-drums (māṭā) played by two bhopā (religious singers) of the god Pabuji, Phalodi region, west Rajasthan

construction: the upper side has the thick rim of the short-necked pot, round which the skin is tied, and at the lower side is an open neck or stem of the long-necked type. In the bowl-type pot-drum (such as the *pābūjī ke māṭe* of Rajasthan) the mouth is appreciably wide relative to the overall width (see illustration).

ALASTAIR DICK/R

Ghazal. Poetic form widely used in West, Central and South Asia and in other Muslim cultures, particularly associated with Persian and Urdu, but applied in other languages. It is composed of several independent couplets with a unified rhyme scheme: *aa*, *ba*, *ca*, etc. *See* INDIA, §IV, 2.

Ghazālī, Abū Ḥāmid Muḥammad al- (*b* Tus, Persia, 1058; *d* Tus, 1111). Muslim theologian, jurist and religious reformer, brother of MAJD AL-DĪN AḤMAD AL-GHAZĀLĪ. After studying in Persia, he taught at the Niẓāmiyya University in Baghdad from 1091 to 1095, and from 1106 in Neyshābur. Although of Persian descent, he wrote mostly in Arabic. Between his teaching duties he retired to Damascus and Tus, lived as a Sufi, and wrote his principal work, *Iḥyā' 'ulūm al-dīn* ('Revival of the religious sciences') in which he attempted to reconcile Islamic orthodox tradition and Sufi experience. The four parts of the book cover all aspects of the religious life of a devout Muslim. In the first part, on the practice of worship, al-Ghazālī deals with Qur'anic recitation (*tilāwa*) and the call to prayer (*adhān*). The second part, on morals and customs, includes a detailed chapter on the extent to which performing and listening to music (*samā'*) should be permitted. Noting that nowhere in the Qur'an is music expressly forbidden, al-Ghazālī demonstrates with numerous examples that the issue is not one of condemning specific musical forms or instruments, but depends on whether the intention is to arouse or strengthen good or bad qualities through music. He quotes many dogmatic and legal works, and refutes too strict interpretations of verdicts by recognized authorities that were against the practice of music. His views culminate in the remarkable statement that 'singing (*ghinā'*) is more powerful than the Qur'an in arousing to ecstasy (*wajd*)'. This is substantiated by seven reasons (trans. D.B. Macdonald, adapted and abridged):

(1) All verses of the Qur'an do not suit the state of the listener. (2) The Qur'an is known too well. Whatever is heard from a song text for the first time makes a greater impression on the heart. The singer has at his disposal new verses of poetry for each occasion, but he has not at his disposal for each occasion a new verse of the Qur'an. (3) A pleasant voice with metre (*wazn*) is not like a pleasant voice without metre; and metre is found in poetry as opposed to verses of the Qur'an. (4) Metrically measured poetry varies as to making impression on the soul with the kind of melodies (*alḥān*) called *ṭarīqa* or *dastān*. This is allowable in poetry, but in the case of the Qur'an it is only allowable to recite as it was revealed. (5) Measured melodies are strengthened by metre and rhythm (*īqā'*), and by the use of instruments to underline the metre such as the wand (*qaḍīb*) and the framed drum (*duff*). But it is necessary that the Qur'an should be protected from such companions. (6) The singer sometimes sings a verse which does not fit the state of the hearer, so he rejects it and asks another. If the sense of a verse of the Qur'an does not fit the hearer, he must either pervert its sense or reject it – both are sins. (7) The Qur'an is the uncreated word of God. It is a truth which humanity cannot comprehend. But pleasing melodies and poetry stand in relationship to natural dispositions. They are nearer to the hearts of men, because created is joined to created.

His liberal attitude to the dervish dance ('allowable, unless ecstasy is shown off') and religiously motivated music ('desirable') has influenced the theory and practice of mosque and monastery music, especially in Turkey. The chapter on music in the *Miftāḥ al-sa'āda* by the Turk Ṭāshkuprī-zādah (Ṭāshköprüzāde) (*d* 1561), for example, is wholly indebted to al-Ghazālī.

ECKHARD NEUBAUER

Ghazālī, Majd al-Dīn Aḥmad al- (*b* Tus, Persia; *d* Qazvin, 1126). Muslim religious scholar and preacher of Persian descent, brother of ABŪ ḤĀMID MUḤAMMAD AL-GHAZĀLĪ. In 1095 he succeeded his brother as a teacher at the Niẓāmiyya University in Baghdad. His writings, composed in Arabic, include a condensed version, now lost, of his brother's *Iḥyā' 'ulūm al-dīn* ('Revival of the religious sciences'), and a longer essay on the question of listening to music (*samā'*), entitled *Bawāriq al-ilmā' fī l-radd 'alā man yuḥarrim al-samā'* ('Flashes of enlightenment in refutation of those who declare listening to music to be forbidden'). He believed that performing and listening to music were not forbidden by Islamic principles, and dealt with the subject independently of his brother, his essay being less comprehensive and more directly concerned with the musical customs of the dervish orders of Sufism.

It begins with a justification of his outlook, then presents arguments against the opponents of music and for the value of music as an aid in attaining spiritual experience. It ends with a description of a *dhikr* ceremony (*see* ISLAMIC RELIGIOUS MUSIC, §II, 3).

ECKHARD NEUBAUER

Ghazarian, Yury Shaheni (*b* Tbilisi, 4 Dec 1933). Armenian composer. He studied at the Yerevan Conservatory with Yeghiazarian (1959–64) before joining the Armenian Composers' Union, of which he was later secretary (1971–4). After being a member of, and heading several artistic organizations he was awarded a Doctor of Arts degree by UNESCO in 1993, the year in which he took up temporary residence in California. His musical interests developed under the sway of the Russian tradition, as represented by Shostakovich and Prokofiev. From the latter came Ghazarian's interest in grotesque, poster-like characterization, which he transformed into a kind of montage technique (as in the ballet *Adam and Eve* and the symphonic poem *Encounters*). His chamber works demonstrate his preference for classical forms, harmonic logic and a kind of functional instrumentation. His fascination with American jazz, and especially the lyrics of blues singing, and compound chordal rhythmic structures is evident in the ballets *The Pink Town* and *Picasso's World*. His creative style finds a generalized reflection in the opera *Ernest Hemingway*; based on the Cuban period of the writer's life, the work is constructed on a fusion of the principles of drama, cinematography, vocal cantilena and declamation. The climax occurs in the choreographic picture 'The Old Man and the Sea' which is based on Cuban rhythms.

WORKS
(*selective list*)

Stage: Adam i Eva (ballet, G. Khokhlov, after drawings by J. Eiffel), 1968; Rozoviy gorod [The Pink Town] (TV jazz ballet, Ghazarian), 1972, TV broadcast, Moscow, 1972; Kak kot remeslu uchil [How the Tomcat Learnt a Trade] (children's musical, G. Chiginov and A. Grigoryan), 1981, Yerevan, K. Stanislavsky Theatre of Drama, 1981; Ėrnest Kheminguėy (op, 2, Chiginov, after E. Hemingway), 1984, Havana, Grand Teatro de La Habana, 17 Oct 1987; Mir Pikasso [The World of Picasso] (ballet, Ghazarian), 1995

SVETLANA SARKISYAN

Ghedini, Giorgio Federico (*b* Cuneo, 11 July 1892; *d* Nervi, nr Genoa, 25 March 1965). Italian composer and teacher.

1. LIFE. He had piano and organ lessons as a child and in 1905 moved to Turin, where he spent three years as a student of the cello and harmony and counterpoint at the Liceo Musicale. He studied composition privately with Giovanni Cravero, and briefly with Marco Enrico Bossi at the Liceo Musicale, Bologna, where he received his diploma in 1911. After a period (1909–20) in which he tried to launch himself as a conductor (acting, among other things, as assistant conductor at the Teatro Regio, Turin), he turned to teaching, first (from 1918) at the Scuola Municipale di Canto Corale, Turin. In the immediate postwar years he was in close touch with such leaders of Turin's musical life as Alfano, Andrea Della Corte, Romualdo Giani and G.M. Gatti. These men, especially Giani, exerted strong but not always wholly beneficial influences: it is possible that some of their ideas may have inhibited Ghedini's early development. In the early 1920s he returned to the Turin Liceo Musicale (later Conservatory) as a teacher, first of the piano, then of harmony and eventually of composition. He subsequently taught composition at the conservatories of Parma (1938–41) and Milan (1941–51, director 1951–62). He was also active at various times as an adviser to Italian radio and to the Teatro alla Scala, and as an organizer of the Settimane Musicali Senesi and the Italian branch of the ISCM.

2. WORKS. As a composer Ghedini was slow in making his mark outside a small circle of friends and colleagues, and began to attract wider notice only in the late 1920s. Nevertheless, there is no shortage of lively inventiveness in some of his early works, for example, the *Doppio quintetto* of 1921. The stylistic elements may be old-fashioned by Ghedini's later standards, never advancing beyond Pizzetti or mild Ravel; but it is already apparent that timbre was to play a paramount role in Ghedini's best music, causing Italian critics to speak of his 'demone sonore', 'libido timbrico' and so on. Moreover, the *Doppio quintetto*'s slow sections already – though still in relatively 'safe', conservative terms – foreshadow that mood of rapt, coldly mystical contemplation which is a recurrent feature of Ghedini's music of the 1940s. By the 1930s his horizons were widening, both through an increasing involvement with early Italian music and a growing awareness of his more radical contemporaries. This expansion, however, inevitably undermined stylistic unity, and even the orchestral Partita, once regarded as his first real affirmation, seems transitional: the explosively dynamic first movement, which anticipates the harsh world of *Architetture*, sets the wrong premise for the other four, which are harmonically more conservative, though the wistfully evocative 'Giga' is a remarkable movement in itself.

The Partita is neo-classical only in a broad sense, and owes less than might be expected to Casella's fashion-setting Partita of the previous year. Nevertheless, Ghedini before long also showed signs of a more thorough involvement with Baroque styles. Such pieces as the Concerto grosso and the *Concerto a cinque* border on the pastiche. The composer's individual voice is only

intermittently audible, though the works were, no doubt, necessary steps towards his far more original adaptations of Baroque idioms in the 1940s. Meanwhile, the more fiercely 'radical' elements in his later music, adumbrated in the first movement of the Partita, were preparing to assert themselves more fully: if in the *Marinaresca e baccanale* the effect is still rather uncontrolled, by the end of the 1930s it was becoming clear that Ghedini was belatedly taking his place in the front rank of modern Italian composers.

The *Lectio libri sapientiae* is arguably the first perfect example, in its small way, of Ghedini's mature style; but the work which, more than any other, marked his full emergence as a 'modern' composer was *Architetture*, a terse, boldly sculptured series of 'edifici sonori' (as the composer called them), in which Stravinsky's influence is unmistakable, though the interval patterns have a very distinctive flavour. Moreover, the quietest of the seven sections (no.5) is entirely original: the mysteriously chiming chords on the piano and the strangely poetic interplay of solo and tutti string sounds already belong to the world of the *Concerto dell'albatro*, though without the later piece's sustained lyricism.

An important by-product of the experience of *Architetture* was Ghedini's arrival at maturity as an opera composer. Only four years earlier *Maria d'Alessandria*, like much of his other early vocal music, had still been too traditional – especially (above all in the effective choral and ensemble scenes) Pizzettian – to seem like a wholly individual statement. And *Re Hassan*, though it marked an enormous step forward in sheer harmonic boldness, had a slightly awkward air taken as a whole, mainly due to the static quality of Ghedini's new musical language, which he had not yet fully mastered. After *Architetture*, however, *Le baccanti* came as a fiercely compelling utterance. The distinctive interval structure of the work strikes a fine balance between tonal and quasi-serial forces; the orchestration is highly original, often stark and lapidary in effect, but with quieter interludes that give scope for a unique, cold, hypnotic lyricism. Although controversial when it was new, this is by far Ghedini's finest theatre work, even if its oratorio-like stylization perhaps confirms that he was more naturally at ease in more abstract music.

Other key works of the early 1940s include the *Concerto spirituale*, in which the composer's fondness for radiant textures of female voices (evident, many years earlier, in the ingenuously archaic, *lauda*-like *Litanie della Vergine*) reasserts itself in more subtle terms. Archaisms, both neo-Baroque and neo-Gregorian, are remoulded in a highly personal idiom in which diatonicism is continually modified by false relations and other harmonic ambiguities. The result, especially in the quieter sections, has a haunting, airy lightness and fragrance which does not, however, preclude passages of almost operatic eloquence and drama. Here again Stravinsky is an important influence, not least in the crisp, bright, multi-coloured instrumentation. A comparably individual transformation of archaic idioms can be seen in the *Sette ricercari* for piano trio, whose slow sections at times break right away from the neo-Baroque framework, to explore unusual relationships between the piano and strings which again foreshadow the Antarctic chill of the *Concerto dell'albatro*.

This work (commonly regarded in Italy as Ghedini's masterpiece and one of the high peaks of modern Italian music in general) thus came as a culmination and fulfilment. Even the idea of evoking a desolate seascape, by musical means which are totally independent of Debussy, had been anticipated in the *Marinaresca* and in some of the more original pages of *Maria d'Alessandria*. Once again, as in so many pieces from the Partita onwards, the broad outline is neo-Baroque, and there are ricercare-like textures at several points. But these are externals. The concerto's poetic power arises more from its many striking manifestations of Ghedini's 'demone sonore': the unusually intimate, unpredictable interactions between solo and tutti strings which have lost all connection with the concerto grosso principle; the icy, crystalline sounds high on the piano; the unobtrusive yet telling delayed entry of the wind instruments. When, nearly three quarters of the way through, the speaking voice enters, reading the passage from *Moby Dick* about Ishmael's mystical awe on first seeing an albatross in the Antarctic, the words seem merely to give a 'local habitation and a name' to what was already evident in the music.

Having at last, in his early 50s, reached the height of his power, Ghedini was quick to follow up the *Concerto dell'albatro* with other works of comparable individuality; though even in this 'visionary period' his self-criticism could still be deficient. The Piano Concerto, for instance, after a tense, aggressively chromatic first movement (one of his closest approaches to dodecaphony), seems to lose its stylistic grip and tails off, in the finale, in facile scale passages. Even so, the better compositions of the late 1940s are more than sufficient to confirm his stature as a major composer. They include the mysterious, bleakly atmospheric *Musica notturna*, with its uncanny use of the mandolin 'a guisa di cembalo' in its closing section, and, still more important, those two supreme manifestations of the more explicitly 'archaic' side of his genius, the *Canzoni* for orchestra and the *Concerto funebre per Duccio Galimberti*. In both pieces pre-Classical idioms, though far more pervasive than in *Architetture* or even the *Concerto dell'albatro*, are powerfully remoulded, although the *Canzoni* contain sounds that recall his imaginative Frescobaldi arrangements of 1931. The last and longest of the *Canzoni*'s fast sections develops neo-madrigalian syncopations with a dancing vivacity that parallels some of Tippett's earlier music; while the *Concerto funebre* transforms late Baroque rhythms and textures in an impassioned, highly unorthodox requiem for one of the heroes of the Resistance.

During the 1950s and 60s Ghedini showed little inclination to break new ground. He tended, rather, to retreat from his 'advanced' position of the 1940s and sometimes, as in the *Credo di Perugia*, made tired compromises with 19th-century idioms. Even his more individual music of these years sometimes has a self-imitative air, and the fast movements too often reiterate short motifs, not (as in *Architetture*) as a necessary factor in the music's cumulative power, but simply as a mask for a shortage of ideas. Such reiterations could still, however, yield surprisingly positive results when backed by sufficiently trenchant harmony and orchestration, as is the case in long stretches of the rather neo-Beethovenian *Ouverture pour un concert*. And Ghedini's 'demone sonore' is still often in evidence: parts of the *Musica da*

concerto and the Second Quartet are virtually meaningless when played on the piano, but acquire a full measure of the Ghedinian magic when performed by strings. The anguished neo-Baroque intensity of the *Concerto funebre* reappears forcefully in at least the opening section of the *Lectio Jeremiae prophetae*; and Ghedini's posthumously reconstructed last work, *Symphonia*, though described by the composer (provocatively and exaggeratedly) as being built entirely of common chords, rounds off his career on a strangely questioning note.

WORKS

(*selective list*)

DRAMATIC

Gringoire (op, G.M. Gatti, after T.F. de Banville), unperf.

L'intrusa (op, R. Giani), 1921, unpubd, unperf.

JOHN C.G. WATERHOUSE

Gheerkin. Composer, possibly identifiable with DERRICK GERARDE.

Gheerkin [Gheerken, Gheraert] **de Hondt** (*fl* 1539–47). South Netherlandish composer. The only biographical information about him comes from the account books of the Confraternity of Our Lady in 's-Hertogenbosch. He emigrated from Bruges in 1539, having been engaged by the brotherhood in September, and began his official duties as choirmaster on 31 December. He held the post until 2 October 1547, when he was dismissed on charges arising from the improper maintenance of choirboys under the care of him and his wife. Leaving 's-Hertogenbosch, he travelled north into the Friesland sector of Holland.

The attribution of works to Gheerkin is complicated by the assignment in contemporary sources of all but one to composers identified simply as 'Gheerkin'. The ascription of the *Missa 'Benedictus Dominus Deus Israel'* in the Cambrai partbooks to both 'Gheerkin' (in two books) and 'Gheerkin de Hondt' (in the other two) indicates that here, at least, they are identifiable. A payment that he received in 's-Hertogenbosch 'for writing some motets in honour of the brotherhood' makes it clear that he is the composer of certain motets ascribed to 'Gheerkin', and he probably wrote the two masses ascribed to 'Gheerkin' (in *NL-SH* 74). In other instances, however, more documentary evidence is needed.

Eitner regarded Gheerkin as a gifted, resourceful composer of appealing works, and Vander Linden (in *MGG1*) thought that the chansons revealed a composer of assurance and skill in the invention and development of ideas.

WORKS

attributed 'Gheerkin' or 'Gheerken' unless otherwise stated

Edition: *Trésor musical*, ed. R. van Maldeghem (Brussels, 1865–93) [M]

MASSES

Missa 'Ave mater Christi', lost; formerly *B-Br*, attrib. Gheerkin de Hondt in *FétisB*
Missa 'Benedictus Dominus Deus Israel', 4vv, *F-CA* 125–8 (attrib. Gheerkin de Hondt); Kyrie ed. in Coussemaker
Missa 'Ceciliam cantate pii', 5vv, *NL-SH* 74
Missa 'In te Domine speravi', 5vv, *SH* 74
Missa 'Panis quem ego dabo', 4vv, *F-CA* 125–8; ed. in EMN, ix (1975)
Missa 'Vidi Jerusalem', 4vv, *CA* 125–8

MOTETS

Benedicite Dominus, 4vv, *CA* 125–8; Inclina Domine aurem tuam, 4vv, *CA* 125–8; Jubilate Deo omnis terra, 4vv, *CA* 125–8; Vox dicentis clama, 4vv, *CA* 125–8

SECULAR

all for 4 voices

A vous me rens, *F-CA* 125–8, 1535[8] (attrib. Willaert), M xv (as Si je l'amais); Contre raison pour t'aymer, *CA* 125–8, M xv (as Le mois de mai); D'un profond cueur j'ay crie, *CA* 125–8; Helas malheur prens tu contentement, *CA* 125–8, M xv (as Ton amitié); Het was my wel te vooren gezeyt, 1551[18] (attrib. Geerhart), *CA* 125–8, M xv, xxv, ed. in Coussemaker, ed. in UVNM, xxix (1908)
Je me repens de vous avoir ayme, *CA* 125–8; Langueur d'amour m'est sur venue, *CA* 125–8, M xv (as Nature a pris sur nous); Mon petit cueur n'est point à moy, *CA* 125–8, M xv (as Mon pauvre coeur); Oncques ne sceux avoir, 1553[24]

Gheine, van den. *See* VANDEN GHEYN family.

Gheluwe, Leo van. *See* VAN GHELUWE, LEO.

Ghent (Flem. Gent; Fr. Gand). Belgian city. Originally a minor agricultural settlement at the conflux of the Scheldt and Leie rivers, the town rose to prominence with the foundation, in the early 7th century, of two major Benedictine abbeys: St Peter (Pieterskerk) and St Baaf. With the formation of the county of Flanders, in the 9th century, Ghent also became the primary residence of the Flemish counts, with a castle (the later Gravensteen), household church (St Pharaïldis, or St Veerle, later raised to collegiate status) and necropolis (the abbey of St Peter). Ghent's earliest parish church was St John (Janskerk, first mentioned in 964). By about 1100 the town's expansion had necessitated the subdivision and formation of further parishes: St James (Jacobskerk), St Nicholas (Niklaaskerk) and St Michael (Michielskerk). Two centuries later, after a period of sustained economic growth, large-scale building projects for all of these churches were well under way. Although religious establishments were to proliferate during the later Middle Ages, the two abbeys, collegiate church and four parish churches mentioned here remained the dominant musical centres of Ghent during the period of its greatest economic and political power, the 14th to 16th centuries.

Daily observance of the Benedictine liturgy in the abbeys of St Peter and St Baaf must have constituted the earliest regular musical practice in Ghent. At the beginning of the 13th century a chapter of canons (endowed by the counts of Flanders) was established in St Pharaïldis. The canons may have followed the use of Paris, since the counts were vassals of the French king. In the richer parishes of Ghent, collective efforts were made to establish trusts with which to sustain bodies of priests to sing the daily liturgy in the nave (the so-called *cotidianen*). Annual *cotidiane* accounts for St James, listing individual priests and their salaries, stretch back as far as 1379. Although similar accounts for other parishes do not survive until the next century, it may be assumed that most of them had established *cotidianen* by the 14th century as well.

As a major town in a northern-French county, Ghent has always been bilingual, and thus it need occasion no surprise to find a Mahieu de Gant among the trouvères of

the 13th century. The earliest city accounts, dating from the middle of the 14th century, refer repeatedly to minstrels; their repertory may have included songs in both French and Flemish. Evidence of early polyphonic practice is provided by two sets of fragments from the last decades of the 14th century (Rijksarchief 133 and 3360). They contain Glorias in motet style as well as French courtly songs by Machaut, Pierre de Molins and anonymous composers. If the fragments originate from Ghent, as seems likely, they were probably written and used by musicians at the court of Flanders – perhaps alternatively in the Gravensteen and St Faraïlde. A choral foundation at this church, involving choirboys and *parvi cotidiani*, had been established by the merchant and courtier Simone de Mirabello about 1331.

Early polyphonic practice in the parish churches is difficult to document, since *cotidiane* accounts record mainly the attendance of priest-singers, but hardly ever specify their musical skills. However, St James is known to have possessed a *liber motetorum* by 1387. (Up to the middle of the 15th century the term *motetum* could cover individual mass movements as well as secular motets; it is likely that this motet book contained only the former, including such Glorias as survive in the Rijksarchief 133.) Moreover, in the course of the 15th century one finds increasing numbers of *cotidianisten* in this and other parishes who can be identified as singers of polyphony elsewhere. It is safe to assume that in most churches, the choral forces necessary for the regular performance of polyphony were fully in place by at least the first decades of the 15th century. This in turn allowed these resources to be employed for other purposes: liturgical celebrations in side chapels (endowed by private individuals and confraternities), *Salve* or *Lof* services in honour of the Virgin and other saints, and civic processions.

At St John, a private endowment from 1446 required the *cotidianisten* of the church to sing a 'mottet' annually in the chapel of St Michael on the eve of the saint's feast, 'as one is already accustomed to do every year for St Agatha'. A private foundation from 1460 called for an office to be celebrated daily after mass 'by seven priests, singing descant'. The single surviving 15th-century *cotidiane* account from St John, for the year 1484–5, identifies two singers as 'tenorists', and rewards one of these for the copying of two 'messen in discant'. One of the major musical benefactors in the church was the Guild of Our Lady, which had already contracted the *cotidianisten* and the choirboys of St Pharaïldis for weekly Marian Vespers and masses by 1447–8, and established a daily polyphonic *Salve* in 1503.

Similar private initiatives are documented in other churches. At St Nicholas, the confraternity of St Anne founded a weekly mass in polyphony in 1445; the guild of the city carillonneurs founded three annual polyphonic masses in 1479. A weekly polyphonic mass for the Holy Ghost was endowed at St James in 1470. These examples suggest that Ghent had become a thriving centre for the cultivation of vocal polyphony by the middle of the 15th century. The relatively permanent nature of these foundations, and the continuous addition of new endowments and augmentations, secured the continuation of these musical practices into the next century and beyond, until the French invasion of 1794 at the latest. Major Renaissance composers known to have been active at Ghent or who are associated with the town include Jacob Obrecht, Alexander Agricola, Pierre de la Rue, Cornelius Canis, Jheronimus Vinders and Jacques Buus.

In the later Middle Ages Ghent was also a major centre of instrumental music. The professionalization of instrumental trades can be witnessed in the establishment of guilds of trumpeters (by 1451), carillonneurs (1473) and players of soft instruments (by 1478). The services of the trumpeters were frequently called on in liturgical celebrations, processions, announcements and all manner of civic festivities. The carillonneurs rang the church bells in the event of danger, and were almost always involved in the more richly endowed liturgical services. The players of soft instruments seem to have operated mainly in domestic environments, especially at weddings.

After the 16th century, as Ghent rapidly lost its international prominence as a musical centre, instrumental music played an increasingly dominant role in its musical life. A collegium musicum was founded in 1649. Its members organized private concerts in the homes of the wealthy bourgeoisie, with programmes that were heavily orientated towards Italian musical taste. Since the late Middle Ages there has also been a strong tradition of instrument making at Ghent. Well-known families of organ builders and bellfounders during the Baroque period, such as the Hemony and Van Peteghem families, continued their trades over many generations, receiving commissions from all over the southern Netherlands. Similar dynasties can be identified among 18th-century instrumental performers such as the Boutmy and Loeillet families.

The first opera at Ghent was staged in 1683. 15 years later the town opened a new opera house with a performance of Lully's *Thésée*. By 1706 Ghent possessed a permanent opera company, the Académie Royale de Musique. However, a public concert life in the modern sense did not exist until very late in the 18th century, and the real breakthrough came only in the first half of the 19th. The Grand Théâtre (from 1921 the Koninklijke Opera), finished in 1840, featured operas by such local composers as Antoine Bovery, Karel Miry and Martin-Joseph Mengal. Until the 1940s most opera was given there in French; a Flemish theatre was opened in 1871. In 1981 the opera company joined with that of Antwerp to form Opera voor Vlaanderen, now the named Vlaamse Operastichting.

Mengal was the first director of the Koninklijk Conservatorium Gent, founded in 1812. In the realms of concert life and education Ghent continued its musical life with vigour through the 20th century. Among noteworthy developments were the foundation in 1964 of the Instituut voor Psychoacoustica en Electronische Muziek (IPEM) at the University of Ghent, where Lucien Goethals achieved prominence as a composer of electro-acoustic music. The department of musicology (until 1986 under the direction of Jan L. Broeckx) has earned a distinguished reputation in musical aesthetics and sociology.

ROB C. WEGMAN

Ghent, Emmanuel (Robert) (*b* Montreal, 15 May 1925). American composer. He studied medicine and music (the piano and the bassoon) at McGill University (BS 1946, MD 1950). In 1951 he emigrated to the USA and studied privately with Shapey. While influenced by Varèse and Shapey, his music concentrates on the harmonic and melodic exploration of fixed intervallic groupings. He was a pioneer in the use of polytempo coordination, synchronization of electronic sounds with live instruments and in the application of algorhythmic procedures to the composition of computer music. Certain works also explore complexities of rhythmic coordination, utilizing techniques and electronic devices of his own invention, including equipment for transmitting synchronization signals to performers. He has documented these developments in articles in *Perspectives of New Music*, *Electronic Music Review* and other publications. Ghent has received MacDowell fellowships (1964, 1965), a Guggenheim Fellowship (1967) and NEA grants (1974 and 1975; collaborative grants in 1976 and 1981). From 1969 to 1978 he worked extensively at Bell Telephone Laboratories, using the GROOVE program for his computer-generated works. His collaborative grants have been devoted to developing systems of computer-controlled lighting as well as working with visual artists to produce computer music for computer-graphics film. Since the late 1970s he has devoted himself primarily to psychoanalytic practice, writing and teaching. (*EwenD*)

BRIAN FENNELLY

Gheorghiu, Angela (*b* Adjud, 7 Sept 1965). Romanian soprano. She studied with Arta Florescu at the Enescu Academy in Bucharest and made her professional début at 18 as Solveig in *Peer Gynt* and her opera début at the Cluj Opera as Mimì in 1990, the year she won the Belvedere International Competition in Vienna. She first appeared at Covent Garden as Zerlina in 1992 and the same year sang an acclaimed Mimì there. Further Covent Garden appearances have been as Nina in Massenet's *Chérubin*, Liù, Micaëla and Adina. However, her most admired appearance was as a vocally and dramatically near-ideal Violetta in Richard Eyre's staging of *La traviata* (1994), conducted by Solti and preserved on CD and video, in which her deeply eloquent singing is supported by her dark looks and a naturally affecting interpretation (for a later revival see illustration). Gheorghiu first sang at the Vienna Staatsoper in 1992 as Adina, returning as Mimì and Nannetta, and made her Metropolitan début, as Mimì, in 1993. Her voice is one of the most natural and individual of her generation, capable both of notable flexibility and of expressing intense feeling. Among recordings that catch the essence of her art are Magda in *La rondine*, Juliette in Gounod's opera and Charlotte in *Werther*, in all of which she is partnered by her husband Roberto Alagna. On video, from the Lyons Opéra, a delightfully insouciant Adina to Alagna's Nemorino reveals her gifts in comedy. She is also an accomplished

Angela Gheorghiu as Violetta with Roberto Alagna as Alfredo in Verdi's 'La traviata', Covent Garden, London, 1996

recitalist, as revealed in a CD recital embracing songs in many idioms and languages.

ALAN BLYTH

Gheraert de Hondt. *See* GHEERKIN DE HONDT.

Gherardello da Firenze [Magister Ser Ghirardellus de Florentia; Niccolò di Francesco] (*b c*1320–25; *d* Florence, 1362 or 1363). Italian composer. He is first mentioned in 1343 as a 'cherico' (clerk) at what was then the Cathedral of Florence, S Reparata. He was ordained priest two years later and was chaplain at this church at least from 1345 to 1351. He must have changed his name to Ser Gherardello in about 1351: this was presumably connected with his entry into the order of Vallombrosa. Later he accepted a priorship in the church of S Remigio in Florence. He is recorded several times in the period 1360–62 as a visitor to the monastery of Santa Trìnita, which also belonged to the Vallombrosa order. His deathdate is derived from the lack of any information after 1362, and also from the sonnet sent by Simone Peruzzi to Franco Sacchetti mourning the death of Gherardello.

Gherardello was known during his lifetime above all for his liturgical compositions, but of these only two mass movements have survived. His secular works are found exclusively in Tuscan manuscripts; the section of the Squarcialupi Manuscript (*I-Fl* 87) devoted to his music has at its head a portrait which may be of the composer (*see* CACCIA, illustration). Other works by him are known only from literary references. His style is closely related to that of Giovanni da Cascia's more mature work. The division of the madrigal lines into melismatic and syllabic sections is more marked in Gherardello's work than in Giovanni's. The frequent changes of mensuration in the stanza part, the texting of both voices in the madrigals (which are always for two voices), and the treatment of the lines of verse as self-contained units, usually by means of cadences in the music, are characteristic features of Gherardello's work and follow the older Trecento style. Monophonic transitional passages between the lines occur rarely. Canonic sections – probably adopted from the style of the caccia – are to be found at the beginning of *Intrando ad abitar* and in *La bella e la vezzosa*. The surviving ballatas are monophonic throughout. In contrast to the madrigals, they contain few extended melismas. It is interesting that, even though they are monophonic (and in contrast to the ballatas of *I-Rvat* 215), the 'under-3rd' cadence appears at the end of the *piedi* – though never at the end of the *ripresa*. The two surviving mass movements are modelled on the madrigals in their style. Their construction is clearly different from that of the Credo of Bartholus de Florentia, who was also in the employment of Florence Cathedral.

Gherardello's brother Jacopo and his son Giovanni were both composers, for whose known works (all on texts by Sacchetti) no music survives; the former (recorded as a guest at Santa Trìnita in 1360) wrote a madrigal *Vana speranza* and two ballatas, *Di tempo in tempo* and *Se ferma stesse*, the latter two ballatas, *Chi più ci crede* and *Se la mia vita*.

KURT VON FISCHER/GIANLUCA D'AGOSTINO

Gherardeschi, Filippo Maria (*b* Pistoia, 1738; *d* Pisa, 1808). Italian composer. He began his musical education in his home town, where his father, Giuseppe, was organist at the churches of SS Trinità and S Maria dell'Umiltà, and his uncle, Atto, was cantor in the chapel of Pistoia Cathedral. He continued his studies in Bologna with Martini from 1756 to about 1761, when he was admitted to the Accademia Filarmonica (test piece in *I-Baf*). The rest of his life was spent in Tuscany, but he corresponded with Martini until the latter's death in 1784 (39 letters in *I-Bc*). In 1761 he went to Livorno, where he gave private lessons and played the organ in various churches in the town. Despite Padre Martini's assistance, he was unsuccessful in his application for the post of *maestro di cappella* (which had become vacant with C.A. Campioni's move to Florence), the position going to Orazio Mei, then organist at Pisa Cathedral. He was made *maestro di cappella* in Volterra in 1763 and, four months later, organist at Pisa Cathedral. There he soon attained notable fame, being invited to play the harpsichord at court, for the patrician families of Pisa, and at the town theatre of

the Accademia dei Costanti. In 1770 he was appointed *maestro di cappella* at Pistoia Cathedral, but only played there on major feast days. In 1771 he resigned from the cathedral, and the post was taken up by his brother Domenico (1733–1800), who was already organist there. In 1783 Pietro Leopoldo, Grand Duke of Tuscany, appointed Gherardeschi *maestro di musica* to his children and director of concerts (when the court was resident in Pisa), and in 1785 appointed him organist and *maestro di cappella* at the Chiesa Conventuale dei Cavalieri di S Stefano at Pisa, a post he retained until his death.

The greater part of Gherardeschi's work is church music, primarily for chorus, soloists and orchestra. As a student of Martini, Gherardeschi became familiar with Italian Renaissance church music; in a letter to Martini from Volterra he wrote that he was continuing to study Palestrina's music. Yet his own church music was not in the *stile antico*, but stemmed from the Bolognese tradition of his teacher and his primarily homophonic, *galant* style. Notable among his sacred works are the 26 masses, almost all of which are for soloists, chorus and orchestra; the *Gran messa solenne da requiem* (*I-Nc* Mus.relig.705) was sung at Pisa in 1803 in memory of the deceased Ludovico I, King of Etruria. Gherardeschi's hymns and psalms also occupy an important place in his output; a good example of this is a *Confitebor*, dated Pisa, 1773 (*I-PS* B 111.3), for four solo voices, chorus and strings, which alternates arias and choral movements (sometimes polyphonic, sometimes homorhythmic) and shows Gherardeschi to have been a skilful and appealing composer. According to his obituary in the *Magasin encyclopédique*, he was also an admirer of J.S. Bach and the masters of the German school. Of Gherardeschi's six operas (all performed exclusively in Tuscany, except for *L'astuzia felice*, which was performed in Venice in 1767), only librettos and scattered arias are extant. He seems to have written no operas after 1769, although there are in Genoa, Parma and Pistoia individual arias referring to performances of earlier operas after that date. His keyboard music had some popularity during his lifetime. His *Tre sonate per cembalo o fortepiano*, published in Florence, probably in 1785, and dedicated to the Archduchess Marcia Theresa of Austria, are attractive, with a certain melodic suavity and with expression marks and nuances indicative of piano writing.

HOWARD BROFSKY/STEFANO BARANDONI

Gherardeschi, Giuseppe (*b* Pistoia, 3 Nov 1759; *d* Pistoia, 6 Aug 1815). Italian organist and composer. He began his musical education with his father Domenico (1733–1800), *maestro di cappella* of Pistoia Cathedral, and his uncle Filippo Maria. He then completed his studies with Nicola Sala at the Conservatorio di S Maria della Pietà dei Turchini in Naples. He returned to Pistoia where he became organist at S Maria dell'Umiltà. In 1785 he married Alessandra Leporatti who gave him seven children before her death in 1794. In 1795 he married Francesca Maestripieri, who gave him a daughter. In 1800, on his father's death, he was appointed *maestro di cappella* of Pistoia Cathedral. All his organ pieces, written especially for the cathedral organ, contain very specific registration instructions. He was succeeded at the cathedral first by his son Luigi (1791–1871) and then by his grandson Gherardo (1835–1905). They were also composers and much of their sacred and instrumental music survives (mostly in *I-PS*).

WORKS

UMBERTO PINESCHI

Gherardi, Biagio (*b* Castelleone, nr Crema; *fl* 1635–50). Italian composer. He was *maestro di cappella* at Cingoli, near Ancona, in 1635 and at Verona Cathedral in 1650; later he is known to have held a similar post at Ancona Cathedral. His two publications of church music – *Il primo libro de motetti concertati*, for two to five voices (Venice, 1635) and *Compiete concerte*, for three to six

voices (Venice, 1650) – are both in the progressive concertato style of the day for a few voices and organ, and some pieces in the second, which consists of music for Compline, include parts for two violins and violone. Though not very competently written, these pieces display certain mid-17th-century traits in church music: an increased proportion of a work is in triple time (perhaps more than is in 4/4 time), with greater rhythmic variety and a more flowing manner than previously; string parts are idiomatically written, and typically instrumental figurations begin to be absorbed into the vocal lines in 4/4 sections; a greater emphasis on vocal display is paralleled by a decrease in syllabic word-setting; and musical devices (e.g. chaconne techniques) overrule textual considerations. (J. Roche: *North Italian Church Music in the Age of Monteverdi*, Oxford, 1984)

JEROME ROCHE

Gherardi, Giovanni. *See* GIOVANNI DA PRATO.

Gherardi, Giovanni Battista Pinello di. *See* PINELLO DI GHIRARDI, GIOVANNI BATTISTA.

Gherardini, Arcangelo (*b* Siena; *fl* 1585–7). Italian composer. According to the title-page of his *Primo libro de madrigali a cinque voci* (Ferrara, 1585[24]), he was a member of the Servite order. That he may have been living in Ferrara at that time is suggested not only by the fact that the book was printed there, but also that it is dedicated to the composer Alfonso Fontanelli, who arrived in Ferrara in the retinue of Cesare d'Este at about the same time. In addition to 15 pieces by Gherardini himself, this book also includes a spiritual madrigal by Paola Massarenghi of Parma. Gherardini's only other known publication is the *Motecta cum octo vocibus* (Milan, 1587).

Ghero, Jhan. *See* GERO, JHAN.

Ghersem [Gersem], **Géry (de)** (*b* Tournai, *c*1573–5; *d* Tournai, 25 May 1630). Franco-Flemish composer and singer. For five years he was a choirboy at Tournai Cathedral. George de la Hèle, *maître de musique* in Tournai, may have taught him briefly, but de la Héle became director of music at Philip II's court in Madrid in 1582, when Ghersem was at the most eight, and he was dying when Ghersem himself arrived in Madrid on 28 June 1586. Ghersem was one of 14 boys 'between seven and twelve years, no more' recruited in Flanders for the Capilla Flamenca. He was a *cantorcillo* until his promotion in 1593 to the position of *cantor*. He spent these formative years under the direction of Philippe Rogier, who succeeded La Hèle in 1588. Rogier died in 1596 and in his will requested that Ghersem undertake the publication of five of his masses. Six masses appeared (Madrid, 1598), financed by Philip II (*d* 1598) and Philip III; the sixth is Ghersem's own *Missa 'Ave virgo sanctissima'*. Also in 1598 Ghersem was passed over for the position of director of music in favour of his younger compatriot Mateo Romero, but he became assistant director.

Perhaps because of this disappointment Ghersem returned to his native country in 1604; the will he wrote before leaving Spain, in which his collection of music is described in detail, has been preserved. He became director of the domestic chapel of Archduke Albert and Archduchess Isabella in Brussels and in 1607 became chaplain of the oratory; he held these two positions until shortly before his death. His colleagues at the court in Brussels included Peter Philips, Peeter Cornet and, for a short time, John Bull. He also figures as *cantor* in the accounts of the Capilla Flamenca in Valladolid from 1609 to 1630; presumably the payments to him are for past services and do not imply another journey to Spain. He was also a priest and as such received the honour and revenue of several canonries: the chapel of St Jean-Baptiste at Ste Waudru, Mons (1606); Ste Gudule, Brussels (1608), exchanged in 1614 for a canonry at Tournai; and St Jacques at Coudenberg, Brussels (1622), replacing the canonry at Mons.

Ghersem was highly esteemed by Philip III and Archduchess Isabella, as well as by João IV of Portugal, whose library contained many of his works; and Cerone (*El melopeo y maestro*, 1609) and the historian Catullius mentioned his compositions in admiring terms. It is unfortunate, therefore, that the only work to survive complete is the seven-part *Missa 'Ave virgo sanctissima'* (ed. in CMM, lxix, 1974). The motet by Francisco Guerrero on which it is based has a canon at the unison between the upper two voices; taking this as his cue, Ghersem uses canons in every movement of his mass, with the exception of the 'Crucifixus'. Of his motet *Benedicam Dominum* (*E-VAcp*) slightly over half remains, with only the second tenor complete. The second bass part of an eight-part *Missa sine nomine* (Antwerp, 1642) also survives. All his villancicos, which were greatly appreciated, seem to be lost. Lost works by him mentioned in the catalogue of João IV's library include some 170 villancicos (written for Christmas and royal feast days, several of them with added instrumental parts), at least seven masses, about 20 motets, some psalms, *Magnificat* settings, Lamentations and other sacred works, some 15 chansons and a few Spanish songs.

MARY ARMSTRONG FERRARD/LAVERN J. WAGNER

Gheyn, van den. *See* VANDEN GHEYN family.

Ghezzi, Ippolito (*b* Siena, ?1650; *d* 1709 or later). Italian composer and theorist. The title-pages of his publications identify him as a Sienese, an Augustinian monk and a Bachelor of Sacred Theology. In 1699–1700 he was *maestro di cappella* of Montepulciano Cathedral, and in 1707–9 he was in Siena. His sacred Latin dialogues, or motets, in his publications of 1699 and 1708 are mostly settings of non-dramatic texts. The four Italian works comprising his *Oratorii sacri*, however, are dramatic dialogues on the Old Testament stories of Abel, Adam, Abraham and David. They are late examples of the type of brief sacred dialogue found in many earlier publications, such as G.F. Anerio's *Teatro armonico spirituale* (Rome, 1619) and Cazzati's *Diporti spirituali* (Bologna, 1668). The use of the term 'oratorio' for quite

brief works is exceptional, for it was normally used at this period for works lasting about two hours or more. The treatise *Il setticlave canoro*, in 15 chapters, is devoted primarily to the system of 'mutations' used in *solfeggio* during Ghezzi's time; it also deals with transposition.

HOWARD E. SMITHER/R

Ghezzo, Dinu D. (*b* Constanţa, 2 July 1941). Romanian composer, active in the USA. He studied conducting (1959–64) and composition with Stroe, Olah and Marbe (1961–6) at the Bucharest Conservatory then taught at the Arts Lyceum in Constanţa (1964–9) and lectured at the Bucharest Conservatory (1969–70) before moving to the USA, where in 1971 he studied composition at UCLA with Roy Harris, Paul Chihara, Murray Bradshaw and Nicolas Slonimsky (PhD 1973). Ghezzo became professor at New York University in 1977 and has held professorships at Queens College, CUNY (1974–6), Lehman College (1984–90) and SUNY at Stony Brook (1991–2). He has promoted contemporary music as a conductor and pianist of international renown; in 1980 he became director of the International New Music Consortium. Drawn to new compositional techniques, Ghezzo has allied himself with multimedia music. His scores are an amalgamation of elements ranging from tonality, modality, jazz and folk music to electronic sounds, natural harmonics, repetitive cycles and improvisation. These diverse elements are combined to produce works of sincerity and powerful expression.

OCTAVIAN COSMA

Ghiaurov, Nicolai (*b* Velingrad, 13 Sept 1929). Bulgarian bass. He was a pupil of Brambarov at the Bulgarian State Conservatory and then continued his studies in Leningrad and Moscow. He made his début at Sofia in 1955 as Don Basilio in *Il barbiere*, winning the Concours International de Chant de Paris the same year, and in 1958 made the first of many appearances in Italy at the Teatro Comunale, Bologna, in *Faust*; from 1959 he also sang, to great acclaim, at La Scala, where his roles included Boris and Philip II. He made his début at Covent Garden in 1962 (as Padre Guardiano) and at the Metropolitan in 1965 (as Méphistophélès), as well as touring Germany with the Sofia Opera. He first appeared at the Vienna Staatsoper in 1957, as Ramfis, singing regularly there from 1962; his roles included Ivan Khovansky (1989). At the Opéra he sang Massenet's Don Quichotte (1974), and he appeared at the Salzburg Festival, notably as Boris in 1965 and Philip II in 1975. These were among his most notable roles; he also sang Boris at the Metropolitan in 1990. He possessed a voice of unusually rich and varied colour allied to an excellent vocal technique and remarkable musicality. A vigorous and painstaking actor, as an interpreter he tended to express the strong and violent emotions rather than the finer and more intimate shades of meaning. He has left notable souvenirs of his appreciable art on disc, among them his Philip II under Solti, Boris under Karajan and his Don Quichotte. He is a sonorous bass soloist in Giulini's recording of the Verdi Requiem and the video of the same work conducted by Karajan.

RODOLFO CELLETTI/ALAN BLYTH

Ghidjak [ghichak, gidzhak, gijak, g'ijjak]. Spike fiddle of northern Afghanistan and the Turkmen, Uzbek, Uighur, Tajik and Karakalpak peoples in Central Asia. The instrument is mentioned in 10th-century manuscripts which indicate that almond shells were used to construct the bridge (*harrak*). The *ghidjak* depicted in 15th-century Persian miniature paintings is similar in construction to the 20th-century *ghidjak*.

Among the more westerly Central Asian peoples the *ghidjak* (or *ghichak*, *gidzha*, *gijak*) resembles the Persian KAMĀNCHEH; it has a short, fretless neck, a spherical resonator with a skin soundtable and three or four strings. During the 19th century the Uzbeks made *ghidjak*s with two, three, four or seven strings, but by the end of the 20th century only the four-string *ghidjak* was in use in Uzbekistan. It is played as a solo instrument and is also used to accompany singers. The Karakalpaks know it as the *ghirzhak*, and related instruments include the Azerbaijani *kemancha* and the Andijan *kaman*.

In northern Afghanistan the instrument has the following form. The brightly painted round neck of the *ghidjak* projects through the resonator and a large iron nail 8–10 cm long is hammered into the bottom of the neck to serve

as the spike. The top of the neck is grooved to form a pegbox with two lateral tuning-pegs, one each side. The neck is turned on a lathe and the resonator, usually fitted by the player, often consists of a large square tin, for instance a one-gallon oil can. The instrument has two metal strings supported by a nut at the head and by a bridge placed on the resonator. The bow is of horsehair tied to a curved stick; tension is applied by the fingers of the right hand. The strings may be bowed together or singly by rotating the instrument slightly. A modified type of *ghidjak* has recently come into use; it has a resonator carved from a square block of walnut or mulberry wood, with a skin belly and eight sympathetic strings with tuning-pegs along the side of the neck.

The origins of the *ghidjak* are not known, but the instrument is mentioned in 10th-century manuscripts which indicate that almond shells were used to construct the bridge (*harrak*). The *ghidjak* depicted in 15th-century Persian miniature paintings is similar in construction to the 20th-century *ghidjak* but has a longer spike.

Ghibel [Ghibelli, Ghibellini], **Eliseo** (*b* Osimo, nr Ancona, *c*1520; *d* after 1581). Italian composer. The dedications of his 1546 and 1548 motet books were signed from Naples, and the text of one of the motets suggests that he may have been *maestro di cappella* of the church of the Croce di Lucca in that city. He dated the dedication of his four-part madrigals from Naples, 9 March 1554. In 1558 he was named *maestro* of the newly established *cappella* of Messina Cathedral. He remained there until 1561, but felt himself the victim of ill-feeling, as he reported in the preface to his *Introits* of 1565. In 1581 he was *maestro di cappella* of Ss Sacramento in Ancona, where he signed the dedication of his first book of five-voice madrigals.

Ghibel's music is well-crafted, with clear harmonic movement and abundant word-painting. His first publication was probably his *Madrigali a note negre* for three voices, which survives only in reprints of 1551 and later but was listed by Doni in 1550. One piece, *Madonna io son un medico perfetto*, was attributed to Festa in a 1543 edition of the latter's three-part madrigals. At least two pieces in Ghibel's volume show evidence of musical borrowing. *Phillida mia* was also set twice by Gero; the three settings, while they do not share any actual musical figures, nonetheless show a clear resemblance in their melodic outline (Haar, 1966). Ghibel's settings of three sections of Petrarch's *Chiare fresch'e dolci acque* are based on the famous setting of this canzone by Arcadelt. The four-part madrigals of 1554 are also mostly *note nere* pieces. Some of the texts contain topical references: one refers to a specific ecclesiastical controversy and several name individual women.

The motet book of 1546 includes rare examples of *note nere* motets. Most are cantus-firmus motets, with the chant also supplying material for points of imitation. In the first seven motets the chant notation includes neume-like ligatures in white notation which the unnamed printer (possibly Ottaviano di Amadio Scotto) apparently could neither understand nor produce correctly with the type available to him. Ghibel complained in the dedication of the trouble he had getting the book published; his 1548 book of motets includes corrected versions of some works in the 1546 volume. The motets are notable for their syncopation and cross-rhythms.

THOMAS W. BRIDGES

Ghiglia, Oscar (*b* Livorno, 13 Aug 1938). Italian guitarist. He studied at the Accademia di S Cecilia in Rome, with Segovia at the Accademia Chigiana in Siena (1958–63) and at Santiago de Compostela. In 1963 he won the International Guitar Competition of the ORTF, Paris, gaining a scholarship for a year at the Schola Cantorum there and studying musicology under Jacques Chailley. Segovia chose him as his assistant at his 1964 summer school at Berkeley, California. He made his débuts in New York and London in 1966 and in Paris in 1968. In 1969 he founded the guitar department of the Aspen Music Festival, Colorado; he remained its chairman until 1986. In 1976 he began teaching at the Accademia Chigiana, and in 1983 became professor at the Musikakademie in Basle. Ghiglia has performed as soloist with many major orchestras, and with various chamber music groups including the Juilliard and Cleveland quartets. His other collaborations include recitals and recordings with Victoria de Los Angeles, Eliot Fisk, Jan DeGaetani and Jean-Pierre Rampal. A refined and thoughtful player with a formidable technique, he is also acknowledged as one of the most distinguished teachers of his generation, and gives masterclasses throughout the world.

Ghignone, Giovanni Pietro. *See* GUIGNON, JEAN-PIERRE.

Ghinste, Peter van der (*b* Courtrai, 1789; *d* Courtrai, 21 Oct 1861). Flemish composer. He was *maître de chapelle* at Courtrai Cathedral. In 1810 his opera, *Het pruisisch soldatenkwartier*, one of the first with a Flemish libretto, was produced in his native town. Among his compositions are also two masses, a requiem, an *Ave Maria* with orchestra, a *Regina coeli* for three voices and organ, 12 easy piano pieces, and other works.

Ghircoiaşiu, Romeo (Mircea) (*b* Cluj, 22 Nov 1919; *d* Cluj, 21 March 1995). Romanian musicologist. In Cluj he studied sociology, aesthetics and philosophy at the university (1939–48), taking doctorates in politics (1943) and law (1948); at the Conservatory he studied the piano, musicology and composition, taking the doctorate in musicology in 1970 with a study of Romanian music history. He also took a pianist's diploma (1949) and a diploma in music education (1953). After working as a lecturer in sociology and legal philosophy at Cluj University, he was lecturer (1949–52), director of studies (1952–7), senior lecturer (1957–69), professor of musicology (1969–79), rector (1970–76) and director of postgraduate work in music history and ethnomusicology at the Cluj Conservatory. His other appointments included head of research at the Romanian Academy (1956–9, 1968–72) and vice-president of the Romanian Composers' and Musicologists' Union (1968–89). His main research interests were Romanian music history, ethnomusicology, aesthetics and the sociology of music; his publications include articles on Enescu, Brăiloiu and Cantemir.

Ghironda (It.). *See* HURDY-GURDY.

Ghiseghem, Hayne van. *See* HAYNE VAN GHIZEGHEM.

Ghiselin [Verbonnet], **Johannes** (*fl* 1491–1507). South Netherlandish composer. He is called 'da Piccardia' in a 1493 Florentine chapel register and 'fiamengo' in a similar register from Ferrara of 1502. The register of the SS Annunziata, Florence, contains his own signature, 'Johannes Ghiselin alias Verbonnet', thus confirming the identity of Ghiselin and Verbonnet, suggested by an ascription in *I-Fc* Basevi 2439. Since Ghiselin composed the *devise* of Charles the Bold, *Je lay empris*, Hortschansky surmised that he had ties with the ducal chapel in Burgundy in the 1470s. In a petition to Duke Ercole I of Ferrara in 1491 he asked for a prebend in Rubiera for the benefit of his young son, Hercules, but the success of the petition is unknown. In the same year Isabella d'Este sent him to France to enlist two young singers for the chapel. He left Ferrara in 1492 at the latest. From October 1492 to March 1493 he was a singer at the baptistery of S Giovanni in Florence. In 1494 he composed *Le cueur la syuit* on the occasion of Margaret of Austria's farewell to Paris after her engagement to Charles VII was dissolved (see Winn). In Crétin's *Déploration* on the death of Ockeghem (1497) Ghiselin is listed second among the composers mentioned, between Agricola and Prioris, from which it is possible to infer that he was Ockeghem's pupil. In 1501 the Ferrarese ambassador to the French court in Blois sent compositions by Ghiselin to the Estensi and in an accompanying letter referred to him as a singer to the King of France. That year Ghiselin himself forwarded compositions by Josquin to Ferrara, and he maintained his connection with the Ferrarese court for the next few years. In 1503 the elderly Ercole I succeeded in obtaining Josquin as *maestro di cappella*, and Ghiselin was ordered

to accompany Josquin from Paris to Ferrara. On 12 April 1503 the Mantuan ambassador to the French court at Lyons reported that Ghiselin and Josquin, arriving from Paris in a splendid carriage, were received by him and spent the night at his house. In the same year Petrucci published a volume of masses by Ghiselin, the second volume devoted to a single composer since the 1502 volume of Josquin's masses. *Misse Ioannis Ghiselin* contains the masses '*La belle se siet*', *De les armes*, '*Narayge*', '*Gratieuse*' and '*Je nay dueul*'. In 1504 Obrecht arrived in Ferrara (probably accompanied on his journey by Ghiselin), to take up the post of court composer to the Estensi. However, the splendour of the chapel, with Josquin, Ghiselin and Obrecht, lasted only a short time. Ercole I died in 1505, and in the same year there was an outbreak of the plague. Josquin and Ghiselin apparently fled the city in time, both returning to the Netherlands, but Obrecht remained and became a victim of the plague. The last surviving reference to Ghiselin is in the accounts of the Onze Lieve Vrouwe Gilde in Bergen op Zoom for 1507. The size of Ghiselin's stipend suggests that he had been there for at least a year, but the accounts for the next few years are missing, and when they resume in 1511 his name no longer appears. Considering the small number of his compositions dated after 1505, it is likely that he died young. Ornithoparchus described him in 1517 as one of the most famous composers of his time, and Heyden, Glarean and Wilfflingseder drew many examples from his works.

Coclico ranked Ghiselin among the 'mathematici', a category inferior to the 'musici poetici'. Particularly in the works of his middle years, he was given to displays of technical skill, as for example in the hexachord mass *De les armes*, or in the *Missa 'Gratieuse'* in which he deliberately employed all the mensuration signs available at that time. This tendency towards rational construction should not be understood as mere intellectualism, however, such as is found in Claudius Sebastiani's *Bellum musicale* of 1563; rather it was a means of achieving formal structures of a precision not to be attained in later masses of the century. The problem of form was most important in the large-scale masses of the second half of the 15th century, and, like Josquin and Obrecht, Ghiselin worked on its solution.

WORKS

Edition: *Johannes Ghiselin-Verbonnet: Opera omnia*, ed. C. Gottwald, CMM, xxiii/1–4 (1961–8) [G i–iv]

MASSES

Misse, 4vv (Venice, 1503) [1503]

Missa De les armes, 4vv, 1503, G ii (hexachord mass)
Missa 'Ghy syt die wertste boven al', 4vv, G iii (on his own song)
Missa 'Gratieuse', 4vv, 1503, G iii (on Busnoys' chanson)
Missa 'Je nay dueul', 4vv, 1503, G iii (on Agricola's chanson)
Missa 'Joye me fuyt', 4vv, G iv (only San and Ag; on Busnoys' chanson)
Missa 'La belle se siet', 4vv, 1503, G ii (on Du Fay's chanson)
Missa 'Le renvoy', Leipzig, Thomaskirche 51 (only T and B) (on Compère's chanson)
Missa 'Narayge', 4vv, 1503, G ii (on Morton's chanson)

MOTETS
all edited in G i

Ad te suspiramus, 2vv; Anima mea liquefacta est, 3vv; Anima mea liquefacta est, 4vv; Ave domina, sancta Maria, 4vv; Favus distillans, 3vv (no text); Inviolata, integra et casta, 4vv (uses T of Binchois' Comme femme)
Maria virgo semper laetare, 4vv; Miserere, Domine/In patientia, 3vv; O florens rosa, 3vv (no text); O gloriosa domina, 4vv; Regina caeli laetare, 4vv (uses T of Binchois' Comme femme); Salve regina, 4vv; Tota scriptura, 3vv (contrafactum of Pleni sunt caeli from Missa 'Narayge')
Da pacem, 3vv, attrib. Ghiselin in *I-Fc* Basevi 2439, is probably not by him on stylistic grounds.

SECULAR VOCAL
all edited in G iv

A vous madame, 3vv (no text); De tous biens playne, 3vv (no text); Fors seulement, 3vv (no text); Fors seulement, 4vv (no text); J'ayme bien mon amy, 3vv; Je lay empris, 3vv (no text; contrafactum of Ky of Missa De les armes or vice versa); Je loe amours, 3vv (no text); Je suis treffort, 3vv (no text); Las mi lares vous donc, 3vv (no text); Le cueur la syuit, 3vv; Rendez le moy mon cueur, 3vv; Si jay requis, 3vv (no text); Vostre a jamays, 3vv (no text)
Een frouwelic wesen, 3vv (no text); Ghy syt die wertste boven al, 4vv; Helas hic moet my liden, 3vv (no text); Wet ghy wat mynder jonghen herten dert, 3vv (no text)
De che te pasci amore, 3vv (no text); Dulces exuviae, 4vv

INSTRUMENTAL

Carmen in sol, a 3, G iv; L'Alfonsina, a 3, G iv; La Spagna, a 4, G iv

CLYTUS GOTTWALD

Ghiselin Danckerts. *See* DANCKERTS, GHISELIN.

Ghisi, Federico (*b* Shanghai, 25 Feb 1901; *d* Luserna San Giovanni, 18 July 1975). Italian musicologist and composer. His father was a diplomat and he spent his early years in China. In 1908 he moved to Milan and studied harmony and counterpoint at the conservatory with Carlo Gatti, and the piano privately; he also took a degree in chemistry at the University of Pavia (1923). After a period abroad he returned to Turin, where he worked as a chemist and studied with Ghedini to take the conservatory's diploma in composition. In 1932 he moved to Florence, where his interest in Renaissance music was stimulated by discussions with Einstein; he began to study music history with Torrefranca (*libera docenza* 1936) and became the first lecturer of the new music history course at the university (1937–40). After the war he taught at the Università per Stranieri, Perugia (1945–74), and (again as the first lecturer in music history) at the University of Pisa (1963), retiring in 1970. As a lecturer at the Institut des Hautes Etudes, Brussels (1948), he initiated a series of conferences, and he also lectured at Harvard, Yale and the University of California, Berkeley. He was a council member of the IMS (1947–52), the Herausgaber Kollegium (1956) and the Società Italiana di Musicologia (1965–7), and in 1967 became an honorary member of the Royal Musical Association, London.

Ghisi's fundamental study of the *canti carnascialeschi* (1937) was the first in a series of pioneer works on the

music of Renaissance Florence covering both secular polyphony of the Trecento and monody of the early Seicento. An important discovery in the latter area was of two excerpts of Peri's *Dafne* (*Alle fonti della monodia*, 1940). His wide and thorough knowledge of textual and musical sources led to other important contributions, such as his identification of fragments of the Lucca manuscript at Perugia (1942–6), which helped to determine Ciconia's presence in Italy; he established that the unique Italian tendency towards monody was already present in 14th- and 15th-century music, and documented and demonstrated the passage from an Ars Nova style to a more homophonic treatment in the second half of the Quattrocento. His research interests included the *lauda*, Renaissance instruments and the work of Carissimi, whose historic position was first clarified by Ghisi through his archival investigations and musical analyses. He also studied the folk music of the bilingual Valdesi people of the Piedmont Alps, heard during summer vacations. Ghisi's own compositions (operas, ballets, and chamber, choral and symphonic works) often grew out of his musicological studies and have an affinity with Falla, Orff and Prokofiev.

CAROLYN GIANTURCO

Ghislanzoni, Antonio (*b* Lecco, 25 Nov 1824; *d* Caprino Bergamasco, 16 July 1893). Italian writer and librettist. After Boito, he was the most important Italian librettist between 1860 and 1890. He is usually credited with 85

librettos, but this seems to be a considerable overestimate, the correct total being about half that number. He was also a prolific journalist, responsible, on his own count, for more than 2000 articles. Originally intended for the priesthood, he was removed from the seminary at the age of 15 and studied medicine at Pavia instead. In 1846, finding that he had a fine baritone voice, he abandoned his studies and determined on a singing career, which he followed for about eight years. This experience of the theatre served as the raw material for his novel *Gli artisti da teatro*, published serially in the *Cosmorama pittorico* in 1856, then issued as a book. He was fervently patriotic, and in 1848 he founded two republican journals in Milan. He was arrested by the French in Rome and after a brief period of detention in Corsica he returned to the stage, incidentally singing Carlo in Verdi's *Ernani* in Paris in 1851. Three years later he arrived, ill, in Milan, and established himself in literary circles, later editing the *Gazzetta musicale di Milano* and the *Rivista minima*, and contributing to literary and artistic journals. He later made his home in Lecco, for whose theatre he wrote five librettos, but in 1890 retired to Caprino Bergamasco.

Although he began his career as a librettist in 1857, Ghislanzoni is best known for his later work for Verdi. In 1869, the composer, whom he had met 20 years earlier, asked him to help with the revision of *La forza del destino*. The collaboration was successful, so that Ghislanzoni was the obvious choice for *Aida* when a poet was needed to turn a prose text into verse. In the event, Verdi always treated the writer with respect, and also sought his help with the revision of *Don Carlos* in 1872. Ghislanzoni provided a number of first-class librettos for other composers, such *as I promessi sposi* (1869) for Petrella, *Fosca* (1873) and *Salvator Rosa* (1874) for Gomes and *Francesca da Rimini* (1878) for Cagnoni, but his best was probably *I lituani* (1874) for Ponchielli, a noble if rather monochrome work. His sense of dramatic structure was conventional yet secure, and although his work was strongly rooted in traditional forms, he used these with imagination and versatility. His verse was always clear and correct, and he had a gift for the neat and unhackneyed turn of phrase; his librettos are mercifully free from 'librettists' doggerel'. He was in sum a reliable and accomplished literary craftsman. It is easy to see why Verdi found him a congenial collaborator but also clear why it was Boito and not Ghislanzoni who stimulated the composer's last two masterpieces.

JOHN BLACK

Ghitalla, Armando (*b* Alfa, IL, 1 June 1925). American trumpeter. He studied with William Vacchiano at the Juilliard School (1946–9). From 1949 to 1951 he played in the Houston SO, and from 1951 to 1979 with the Boston SO, as first trumpeter from 1965. He gave a memorable Town Hall concert in New York in 1958 – the first full trumpet recital, including the first modern performance of Hummel's concerto – and one in Carnegie Hall in 1960. He has influenced a generation of American trumpet players, in part because of his recordings as a soloist. Vacchiano has influenced him most as an orchestral player, but his highly lyrical solo style is probably due to his solo cornet playing in his youth. He has experimented extensively in mouthpiece and instrument construction with the makers Tottle (Boston) and Schilke (Chicago). He was professor of the trumpet at the University of Michigan from 1979 to 1993, and in 1994 was appointed to Rice University, Texas.

EDWARD H. TARR

Ghivizzani [Guivizzani], **Alessandro** (*b* Lucca, *c*1572; *d* ?Parma, 1634–6). Italian composer. In his youth he worked in Florence. In 1604 he became a member of the Compagnia dell'Arcangelo Raffaello and was organist at S Pancrazio. In 1609 he married Giulio Caccini's younger daughter Settimia and joined the payroll of musicians at the Florentine court. Banished from Tuscany in 1611, he returned to Lucca but left for the Mantuan court in 1613. In 1617 he collaborated with Monteverdi, Salamone Rossi and Mutio Effrem by providing a madrigal for the sacred play *La Maddalena* by G.B. Andreini, staged at Mantua in honour of the marriage of Ferdinando Gonzaga and Caterina de' Medici. The following year he was represented by three motets in an anthology of Mantuan church music. On 19 October 1620 he was appointed *maestro di cappella* to the seignory of Lucca. He was granted leave of absence in 1622 to serve Cardinal Odoardo Farnese at Parma, where he probably remained until his death.

His surviving compositions represent various musical styles. The piece in *Musiche ... per la Maddalena* (Venice, 1617^3), for three voices and continuo, has a homophonic texture embellished only at a few cadences. Of the three motets (RISM 1618^4), that for solo voice emphasizes recitation on a single pitch over a slow-moving bass and includes some expressive ornamentation; the other two, for two and three voices respectively, generally follow the harmonic and imitative principles of the *prima pratica*, though there are occasional virtuoso passages; the continuo is rarely independent of the bass voice. There are four secular solo songs by Ghivizzani (in *I-Bc* Q49), one of which ends with a section on a chaconne bass. This song is one of five attributed to Ghivizzani in the Národní Muzeum, Hudební Oddelení, Prague (II La 2, formerly in the Lobkowitz library at Roudnice), but because of conflicting attributions between the two manuscripts the total number of his surviving songs cannot be determined.

WILLIAM V. PORTER

Ghizeghem, Hayne van. *See* HAYNE VAN GHIZEGHEM.

Ghizzolo. *See* PASINO, STEFANO.

Ghizzolo, Giovanni (*b* Brescia; *d* Novara, ?1625). Italian composer. He became a Franciscan friar and lived in Novara in 1609 but had moved to Milan by 1610. From 1613 to 1615 he was *maestro di cappella* to Prince Siro of Correggio. He was working at Ravenna Cathedral in 1618. He was appointed *maestro di cappella* of S Antonio, Padua, on 6 October 1621 but arrived only in August 1622 and stayed 12 months before returning to Novara.

Ghizzolo wrote a good deal of church music and also a fair amount of secular music. This includes ensemble madrigals and canzonets but consists mainly of monodies: madrigals in a declamatory manner (one or two marked 'in stile recitativo'), more tuneful arias and strophic variations; there are also a few duets and dialogues (some with parts for chorus). His first book of *Madrigali et arie* (1609) contains an intriguing setting of the *Giuoco della cieca* from Guarini's *Il pastor fido*, but on the whole his songs are less successful and less in tune with the new currents of the day than those of composers who were primarily monodists.

As a church composer Ghizzolo also stands on the boundary between conservative and progressive. Only in his motets (published under the title 'concerti') did he adopt modern concertato textures for two or three voices; the psalm and mass music is all for four or five voices or double choir. The concerti of 1611 are described as being 'all'uso moderno' but are in an imitative polyphonic style without florid writing. In his collection of 1613 Ghizzolo uses old-fashioned *falsobordone* laid out in a manner similar to Anglican double chant, the two choirs alternating from verse to verse with different halves of the chant. An interesting example of adaptability occurs in the collection of 1619, which can be sung in five parts by using one choir only or in nine by adding a second choir. Ghizzolo explained that this choir could, if desired, be an instrumental group, that the quintus part could be sung by a tenor if there was no second soprano and that nobody should be surprised to hear consecutive 5ths or octaves between this voice and the organ part. This is typical of the free-and-easy approach in some liturgical music of the time.

JEROME ROCHE/R

Ghoneim, Mauna (*b* Cairo, 21 Aug 1955). Egyptian composer. From the age of eight she studied the piano at the Cairo Conservatory. Later she joined the composition class founded by Abdel-Rahim, studying composition and the traditional Arab modal system. She graduated in composition (1977) and piano (1978), both with distinction. From 1981 she took postgraduate studies in composition from the Vienna Hochschule für Musik with Thomas Christian David and Francis Burt, graduating with distinction in 1987 and obtaining Magister Artium in 1988. She returned to Egypt in 1989 and to a teaching post at the Cairo Conservatory. Many of her compositions have been performed outside Egypt: in Vienna, Rome, Berlin, Bonn and Prague. In 1991 she was awarded the prize for musical creativity by the Academy of Arts, Cairo. A well-known composer of documentary film music, she won a prize (1991) for her music for the documentary film *An Evening's Fishing* (1991).

Her compositions include many piano works and many using the flute, besides vocal and orchestral works. Her style is distinguished by tender melodic lines using the tetrachords and pentachords of Arab music in a very personal way, accompanied by contemporary Western harmonies. She uses irregular metres in accordance with the Arab rhythmic modes, for example in *El Mashrabia*

for strings (1987), the Elegy for orchestra (1990) and the Suite for flute and harp (1993).

AWATEF ABDEL KERIM

Ghosh, Nikhil Jyoti (*b* Barisal; *d* Bombay, 3 March 1995). Indian *tablā* player. Born into a family of musicians, he was trained initially in *sitār* playing and vocal music before choosing the *tablā* as his main instrument. Following his elder brother, the flautist Pannalal Ghosh, first to Calcutta and later to Bombay, he learnt the *tablā* from Pandit Jnan Prakash Ghosh of the Farrukhabad and Punjab *gharānā*s. He later became a disciple of Ustad Amir Hussain Khan and Ustad Ahmedjan Thirakwa, both of whom were disciples of Ustad Munir Khan, preceptor of the Laliyana *gharānā*. Having mastered the traditional repertory of the styles of Delhi, Ajrada, Farrukhabad, Lucknow and Punjab, Ghosh was acclaimed both for his solo recitals of traditional *tablā* compositions and for his refined accompaniment. His solo recordings were released by HMV India (1974) and UNESCO (1978).

He developed graded systems of music training for use in mass education and the training of professional performers which were implemented at the Sangit Mahabharati in Bombay. He also established a system of notation. In 1961 he began to compile material for an encyclopedia of music, dance and drama in India, the completion of which he did not live to see. Most prominent among his *tablā* disciples are his son Nayan Ghosh and Aneesh Pradhan. He also trained his son Dhruba Ghosh in *sāraṅgī* playing and his daughter Tulika Ghosh-Pathak in vocal music.

GERT-MATTHIAS WEGNER

Pandit Nikhil Ghosh

Ghosh, Pannalal (*b* Barisal District, East Bengal, 1911; *d* 20 April 1960). Indian *bānsurī* player (*see* VAṂŚA) and composer. His father Akshaya Kumar played the *sitār* and his younger brother Nikhil Ghosh was a distinguished *tablā* player and musicologist. He was largely self-taught as a flautist, picking up technique by observation and imitation of traditional players, although he studied music with Khurshid Ahmad Khan and Girija Shankar Chakravorty. He is known principally as a disciple of the multi-instrumentalist Ustad Allauddin Khan, with whom he studied from 1947.

He worked in the film industry for many years in both Calcutta and Bombay as a musician and composer (music director), and in 1938 toured Europe for six months with the Saraikala Nrityamandali dance troupe. In 1947 he was appointed music director at All India Radio, where he set up the National Orchestra. As a soloist he is regarded as a pioneer who reintroduced the flute to the concert stage in North Indian (Hindustani) music, and he was responsible for developing several elements of modern *bānsurī* technique. He is also credited with the introduction of the 'tenor' flute (approximately 80 cm long, with very wide hole-spacing), when previously much smaller instruments had been prevalent, and he used flutes of different sizes during a single performance. These innovations have since been taken up and developed further by other musicians, notably Pandit Hari Prasad Chaurasia.

MARTIN CLAYTON

Ghro, Johann. *See* GROH, JOHANN.

Giaccio, Orazio [Horatio] (*b* Aversa, nr Naples, *c*1590; *d* ?Naples, in or after 1660). Italian composer and singer. He sang bass at SS Annunziata, Naples, intermittently between 1614 and 1632. In 1620 he entered the Celestine convent of S Pietro a Majella, Naples, and in 1660 he was a hebdomadary at Naples Cathedral. Between 1613 and 1618 he published three books of secular three-part canzonettas with guitar accompaniment; many of the texts in the two surviving volumes are by members of the Oziosi, the leading literary academy in Naples. Giaccio's op.6, for one to three voices (1645), is a sacred counterpart to these books. Its contents are like the secular canzonettas in that their usual triple metre is varied by syncopations and hemiola, but they are more concertante: there are

contrasts of dynamics and between solo and ripieno, and there are little continuo interludes.

WORKS

Giaches da [Giacchetto de] **Mantua.** *See* JACQUET OF MANTUA.

Giacobbe, Juan Francisco (*b* Buenos Aires, 7 March 1907; *d* Buenos Aires, 31 Jan 1990). Argentine composer and teacher. He attended the National Conservatory in Buenos Aires, where he studied harmony and instrumentation with Ugarte, graduating in 1929. He continued his education in Paris, Milan, Rome and at the abbey of the Madonna del Monte, Cesena, with Dom Bonifacio for Gregorian chant. In 1934 he returned to Buenos Aires and created the Argentine Society of Polyphonic Music. He held numerous teaching positions, including professorships in fugue, composition, Gregorian chant, history, counterpoint and ethnomusicology at the National and Municipal conservatories in Buenos Aires. His interests in ethnomusicology and philosophy are reflected in his essays. As a composer he was noted for his stage works and sacred choral music.

JOHN M. SCHECHTER

Giacobbi, Girolamo (*b* Bologna, bap. 10 Aug 1567; *d* Bologna, 23 Dec 1628). Italian composer. He was closely associated with the basilica of S Petronio, Bologna, where he began his career as a choirboy in 1581, becoming a paid singer in 1584. He was an assistant (*promagister*) to the *maestro di cappella* from 1595 and was himself *maestro* from 18 August 1604 to 1628, when he resigned because of a serious illness. From February to April 1618 he was also *maestro di cappella* of the new Oratorio dei Filippini, Bologna, and from 1625 to 1628 he directed the choir at S Giovanni in Monte. A close friend of Banchieri, he was an active member of the Bolognese Accademia dei Floridi, which Banchieri had founded in 1614. In 1625 it took the new name of Accademia dei Filomusi and met in Giacobbi's house until it was disbanded in 1630; on 13 June 1620 it was visited by Monteverdi. Reference to Giacobbi's death is made in a letter from Banchieri to Monteverdi.

Giacobbi was one of the first composers outside Florence to write in the new monodic style. In 1605 he composed four *intermedi* for the pastoral play *Il Filarmindo* by Count Ridolfo Campeggi. The *intermedi* were published in 1608 as *L'Aurora ingannata* in the several editions of the libretto, but the music was published under the title of *Dramatodia*. The recitatives are in an intense, pathetic style reminiscent of Jacopo Peri's *Euridice*, and they alternate with short ensembles and strophic, homophonic choruses. In 1613 Giacobbi wrote the music for new *intermedi*, called *Proserpina rapita*, for the same play. In his sacred music he displayed both conservative and progressive features. The motets of 1601 are fluently composed in the late Renaissance idiom of Palestrina, with a sensitive awareness of tonal balance and contrast in those for two choirs. The concerted vesper psalms of 1609 are influenced by the more recent innovations of the Venetians. Written in long continuous sections, with organ continuo, they are expressive and dramatic in character, with frequent changes of scoring and tone colour. In a preface Giacobbi gave instructions and suggestions regarding the disposition of the choirs, soloists and instrumentalists.

PETER SMITH/MARC VANSCHEEUWIJCK

Giacobetti, Pietro Amico (*b* Ripatransone, nr Ascoli Piceno; *fl* 1579–1616). Italian composer. According to Gaspari he was a cleric at Ripatransone from 1579 until his death. Two of his works are known: *Motectorum quatuor*

quinque et sex vocibus, liber primus (Venice, 1589), and the five-voice *Lamentationes cum omnibus responsoriis in triduo hebdomadae sanctae* (Venice, 1601). As might be expected, the movements of the latter are composed in a stark, largely homophonic manner and the book ends with two settings of the Passion, one 'In Domenica Palmarum' and the other (whose texture expands to six voices at its conclusion) 'In die Parasceves'. These too are written in a style of the utmost simplicity, thus respecting the tradition of Passion settings while at the same time being accessible to choirs of modest ability.

IAIN FENLON

Giacomelli [Jacomelli], **Geminiano** (*b* Piacenza, *c*1692; *d* Loreto, 25 Jan 1740). Italian composer. In his early years in Parma he studied singing, counterpoint and keyboard with G.M. Capelli, *maestro di cappella* of the cathedral. The story of his being sent to study with Alessandro Scarlatti in 1724, and afterwards being in the service of Charles VI in Vienna was doubted by Eitner, and there is little evidence to support either contention: Scarlatti died in October 1725, and the opera *L'Arrenione*, supposed to have been composed for the Viennese court, is not by Giacomelli.

From 1719 to 1727 and from 1732 to 1737 Giacomelli was *maestro di cappella* of the court of Parma and the church of the Madonna della Steccata, serving jointly with his aged teacher Capelli; in the intervening years (1727–32) he held the same position at S Giovanni in Piacenza. In 1737 he directed performances of his opera *Cesare in Egitto* in Graz before succeeding Tommaso Redi as *maestro di cappella* of the Santa Casa, Loreto, on 24 November 1738. The announcement of his death, discovered by Tebaldini, states that he died at about 48 while still serving at Loreto.

Giacomelli wrote 19 operas for various Italian cities; his most successful was *Cesare in Egitto* (1735). The set of intermezzos, *Golpone e Birina*, performed in Rome for Carnival 1739 with his *Achille in Aulide*, were written by Fini and Zanetti for Venice in 1732, not by Giacomelli. He also composed two oratorios and many sacred compositions of which only a few survive. Giacomelli seems to have been highly esteemed by his contemporaries; Benedetto Marcello published Giacomelli's letter of recommendation in the preface to volume seven of his *Estro poetico-armonico* (Venice, 1724–6/*R*).

GORDANA LAZAREVICH

Giacometti, Bortolomeo (Antonio) (*b* Verona, 30 Dec 1741; *d* Verona, 4 Jan 1809). Italian composer and singer. He entered the choir school at Verona Cathedral in March 1755 where, in addition to the academic curriculum, he studied plainsong and counterpoint under the *maestro di cappella* Daniel dal Barba. After his ordination he joined the chapter choir as *cappellano* and from 1775 was a bass in the cathedral choir. In addition to clerical duties at a local church, he probably served as apprentice to Dal Barba. In December 1779 Giacometti assumed full teaching responsibilities at the choir school and was accorded rights of succession to the cathedral position on Dal Barba's death. From 1789 he was the leading composer at the cathedral, where he continued in service until the end of his life.

Of special interest among Giacometti's compositions are an expressive *Benedictus Dominus Deus Israel* and the virtuoso *lectiones* for Holy Week in which simple recitative sections alternate with florid solo passages. A small instrumental complement of two violas and violone is often used in his choral music; full orchestral ensembles were used only in pontifical celebrations. A facile declamatory style with little melodic inventiveness prevails in many works, especially his responsories, but occasionally contrasts of key and metre create striking effects. Giacometti's compositions retained popularity into the 19th century; in Spagnolo's opinion he 'was justly considered the most skilful composer of his time'.

MICHAEL DUBIAGA JR

Giacometti, Giovanni Battista. *See* JACOMELLI, GIOVANNI BATTISTA.

Giacomini, Bernardo (*b* Florence, 2 May 1532; *d* after 1562). Italian composer. He is called 'gentilhuomo fiorentino' on the title-page of his only known collection, *Il primo libro di madrigali a cinque voci* (Venice, 1563). He may have been one of the several Florentine amateurs of a certain social status who tried their hand at composition during the period. He was a member of the Knights of St Stephen. A reference to 'il nostro Cav Giacomini' in an unpublished work by Giovanni de' Bardi may indicate that he was also a member of Bardi's circle. The madrigal book is dedicated to Paolo Giordano Orsini, Duke of Bracciano, who in 1558 married Isabella, daughter of Duke Cosimo I de' Medici of Florence. The madrigal *Nobil coppia gradita*, which opens the volume, celebrates the union of these two noble families and was perhaps written for performance at the wedding festivities. The remaining works include settings of no fewer than nine sonnets by Petrarch, each divided into the customary two sections. These pieces, composed in a style typical of the time, are characterized by mild chromaticism and a high regard for correct text setting. His five-voice setting of Petrarch's sonnet *Zefiro torna* appears in Gardano's 1592 edition of *Spoglia amorosa*. Two other works, the five-voice *Ma folle io spargo* and the six-voice *La bella mano*, were intabulated by Vincenzo Galilei, who published them in the 1584 edition of his *Fronimo*. Another madrigal, *Claro dolce ben mio*, appears in a manuscript addition to the 1568 edition of this work.

FRANK A. D'ACCONE

Giacomini, Giuseppe (*b* Veggiano, nr Padua, 7 Sept 1940). Italian tenor. He studied at Padua and Milan, making his début in 1967 at Vercelli as Pinkerton. Having sung in Vienna and Berlin (1972), at La Scala (1974) and the Paris Opéra (1975), he made his Metropolitan début in 1976 as Don Alvaro, returning as Don Carlos, Macduff, Pinkerton, Canio and Manrico. He made an impressive Covent Garden début in 1980 as Dick Johnson, returning in other lyric and spinto roles: Turiddu (which he has recorded), Manrico, Cavaradossi, Radames, Pollione and Calaf. Giacomini's other parts range from Edgardo and Don José through Puccini's Des Grieux and Luigi (*Il tabarro*), both of which he has recorded, to Lohengrin (in Italian) and Verdi's Otello, which he first sang in 1986 at San Diego and has repeated in Vienna, Naples and Monte Carlo. His powerful, firmly focussed voice is well suited to the heavier Italian repertory, while his dramatic involvement has greatly increased over the years.

Giacosa, Giuseppe (*b* Colleretto Parella, Ivrea, 21 Oct 1847; *d* Colleretto Parella, 2 Sept 1906). Italian playwright and librettist. After graduating in law at Turin University he joined his father's legal practice until the success of his one-act verse comedy *Una partita a scacchi* (1873) induced him to take up a literary career. He became a member of Boito's circle, specializing at first in stylized period drama. Then followed a number of prose plays in the tradition of the French Théâtre Libre, of which *Tristi amori* (1887) and *Come le foglie* (1900) still hold the stage as worthy examples of intimate bourgeois tragedy. *La comtesse de Chaillant* (1891) was written in French for Sarah Bernhardt. From 1888 to 1894 Giacosa held the chair of literature and dramatic art at the Milan Conservatory. At the time of his death he was editor of the literary periodical *La lettura*. His output also includes a number of prose sketches associated with his native region and entitled *Novelle e paesi valdostani* (1886) and an account of a visit to America in 1891.

Regarded at the turn of the century as Italy's leading playwright, Giacosa is remembered chiefly for his association with Puccini in double harness with the librettist Luigi Illica. The partnership was organized by the publisher Giulio Ricordi in 1893. After Puccini had turned down Giacosa's offer of a Russian subject, Ricordi set the two librettists to work on the text of *La bohème* (1896); it would seem to have been Giacosa's idea to base the character of the heroine on a blend of Murger's Mimì and Francine, so ensuring a total contrast between the two female leads such as eluded Leoncavallo in his treatment of the same subject. The collaboration continued with *Tosca* (1900) and *Madama Butterfly* (1904) with equally successful results. In each case Illica's task was to plan the scenario and draft the dialogue which Giacosa would then put into polished verse. Although he found the work uncongenial and frequently protested against Puccini's ideas he always ended by giving way to them; and his calm, benign presence at their conferences (he was known affectionately as 'the Buddha') did much to smooth their difficulties. In addition to his work for Puccini Giacosa adapted *Una partita a scacchi* for a one-act opera by the Piedmontese composer Pietro Abbà-Cornaglia (1892) and sketched out the text for an oratorio, *Cain*, for Lorenzo Perosi. The plan to write a libretto for Mascagni with Illica never came to fruition.

JULIAN BUDDEN

Giai [Giaii, Giaij, Giay], **Francesco Saverio** (*b* Turin, 27 Sept 1729; *d* Grugliasco, nr Turin, 12 Aug 1801). Italian composer, son of GIOVANNI ANTONIO GIAY. He studied initially in Turin, probably at the Collegium Puerorum Innocentium at the cathedral, under the direction of F.M. Montalto. Between 1759 and 1762 he continued his studies, spending a year each in Bologna, with Padre Martini, Naples, with Giuseppe de Majo, and Rome, where his compositions were favourably received in the Papal chapel. On his father's death he was made director of the Turin royal chapel, as officially documented in a letter of 9 February 1764. Until 1798 his principal assistant in this post was the celebrated violinist Gaetano Pugnani, and together with him he took part in the musical life of the court, directing, among other things, the music played at the wedding of Clotilde de France with Carlo Emanuele IV in 1775. Like his father, Francesco seems to have been concerned primarily with the sacred music of the court, although he composed a violin concerto. Mozart, during his visit to Turin in 1771, listed Giai as one of the musicians he wished to meet, along with Quirino Gasparini, *maestro di cappella* of the cathedral and the violinist and composer Ignazio Celoniati.

WORKS

in I-Td, unless otherwise stated

Violin Concerto, B♭, *D-Dl*
11 masses, 3 Requiem, 3 Ky–Gl, 1 Ky, 2 Gl

GORDANA LAZAREVICH/MARIE-THÉRÈSE BOUQUET-BOYER

Giai [Giaj], **Giovanni Antonio.** *See* GIAY, GIOVANNI ANTONIO.

Giaiotti, Bonaldo (*b* Ziracco, nr Udine, 25 Dec 1932). Italian bass. He studied with Alfredo Starno in Milan where he made his début at the Teatro Nuovo in 1957. Within the next three years he established himself as one of the leading Italian basses of his time, and was engaged in 1960 by the Metropolitan, New York, remaining a valued member of the company for the next 25 years. The priestly roles in *La forza del destino* and *Aida* were his speciality, though the part he sang most frequently in the house was that of Timur in *Turandot*. At La Scala he was introduced as Rodolfo in *La sonnambula* (1986), and at the Verona Festival of 1992 he appeared as King Philip in *Don Carlos*. He also made a concert tour of South America in 1970. His sonorous, evenly produced voice served him well over a long career, and can be heard in many recordings. Among these is *Luisa Miller* (1975, with Maag), where Count Walter's aria in Act 1 is a fine example of his art.

J.B. STEANE

Giamberti, Giuseppe [Gioseppe] (*b* Rome, *c*1600; *d* Rome, 1662–4). Italian composer. He was a pupil of G.B. Nanino and Paolo Agostini, as he announced on the title-page of his op.1. His studies with them probably took place in 1615–16 when he was a boy soprano at S Lorenzo in Damaso, where Nanino and Agostini were successive *maestri di cappella*. From 1624 at the earliest to at least 1628 Giamberti was *maestro di cappella* of Orvieto Cathedral. From at least 1630 until 1645 he was *maestro di cappella* of S Maria Maggiore, Rome, and in 1662 he held a similar position at the church of the Madonna dei Monti, Rome. To a great extent he was a typical composer of the Roman school and produced mainly sacred music. His most important publication is his *Antiphonae et motecta* (1650), a comprehensive collection of over 200 pieces. Like most of his music it is in the concertato style. Unlike many Roman composers he also wrote lighter music: his final publication, of 1657, was popular enough to go into three further editions, and the eight short strophic solo songs are the most attractive music in his op.1.

Gianella, Louis [Ludovico, Luigi] (*b* ?1778; *d* Paris, 1817). Italian flautist and composer. He was engaged in 1790 as an instrumentalist in the orchestra of La Scala in Milan, and in the same year two ballets by him were performed there. He went to Paris in about 1800 and earned his living by playing in various theatre orchestras, possibly including that of the Opéra-Comique. He achieved some fame as a composer with his collaboration on *L'officier cosaque* (1803). Like many of his colleagues, he was attracted to the revival of freemasonry after the Revolution. In 1805 he was admitted to the Anacreon Lodge, whose membership consisted almost entirely of theatre musicians and theatrical staff. The most notable of his fellow masons were the flautist Jean-Louis Tulou, the singer Jean-Pierre Garat, the violinist Antoine Kreutzer (brother of Rodolphe Kreutzer) and the composer Pierre Gaveaux, author of a version of *Fidelio* which preceded Beethoven's.

ROGER COTTE

Gianelli, Francesco (*fl* 1592). Italian composer. Although his only known work, *Il primo libro de madrigali a tre voci* (Venice, 1592, inc.; Eitner incorrectly read the date as 1582), is dated from Ferrara on 15 January 1592 and dedicated to Cardinal Alessandro d'Este, his name does not appear in the surviving salary rolls of the Este *cappella*. (A copy of the *Primo libro* survives among the holdings of the Ferrarese court chapel.) Many of the pieces, described in the dedication as 'questi miei primi terzetti', suggest a rather uncomfortable alliance between the canzonetta and the rhetoric of the serious madrigal. (*EitnerQ; NewcombMF*)

IAIN FENLON

Gianelli, Pietro (*b* Friuli, ?1770; *d* Venice, early 1830). Italian music lexicographer, theorist, teacher and composer. He studied music in Padua with Jacopo Agnola and then went to Venice, where he taught theory and composition. There, in 1801, he published his *Dizionario della musica sacra e profana*, the first music dictionary in Italian, which he described as modelled on the French works by Brossard and Rousseau, and *Grammatica ragionata della musica*, an introduction to the elements of music and musical instruments, which included an annotated bibliography of writers on the theory and practice of music from 1500 to the end of the 18th century. Second editions of both works, the *Dizionario* revised and much enlarged, appeared in 1820. A reprint of this edition of the *Dizionario* appeared in 1830 (called the third edition on its title-page). Although much of the material in both editions of the *Dizionario* is superficial and incorrect, a few of the entries are useful, providing information not easily found elsewhere. In 1822, the year in which he became dean of Torcello Cathedral, Gianelli also announced the publication of a series, *Biografia degli uomini illustri nella musica*, but only the first volume was published (Venice, 1822). An antiphon for three voices (*Alma Redemptoris*) by Gianelli is in the Venice Conservatory library.

MILTON SUTTER/CARLIDA STEFFAN

Gianneo, Luis (*b* Buenos Aires, 9 Jan 1897; *d* Buenos Aires, 15 Aug 1968). Argentine composer, conductor and pianist. He received his earliest musical training from his father, later studying with Ernesto Drangosch (piano), Luis Romaniello (piano), Constantino Gaito (harmony) and Eduardo Fornarini (composition). From 1923 to 1942 he lived in Tucumán, where he co-directed the Instituto Musical and conducted the Asociación Sinfónica. Beginning in 1943, he settled permanently in Buenos Aires, teaching at the Conservatorio Provincial de Música (1949–65), the Universidad Nacional de la Plata (1956–66) and the Universidad Católica Argentina (1964–8). He served as Interventor (1955–8) and Director (1958–60) of the Conservatorio Nacional de Música. In addition, Gianneo founded and directed two youth orchestras, which maintained outstanding standards of musical performance. He was a member of the Academia Nacional de Bellas Artes, vice-president of the Sociedad Argentina de Educación, and the recipient of a grant from the Comisión Nacional de Cultura.

Gianneo is acknowledged as a leading Latin American composer and one of the first in Argentina to integrate folk idioms with contemporary musical techniques. He composed 80 works covering all genres (except opera), and he is especially known for his orchestral and chamber music. Gianneo's early compositions (1923–32) reveal a fascination with the indigenous culture and landscape of northwestern Argentina. Later, he embraced a neo-classical aesthetic (1933–60), and in his final works (1960–68) adapted a dissonant harmonic language and the free use of serialism. His popular symphonic poem, *El tarco en flor* (1930), pays tribute to the exquisite blooming trees of Tucumán. His *Concierto Aymará* (1942), based on pentatonic themes, won second prize in an international competition sponsored by the Edwin A. Fleischer Collection. Gianneo's music has been recorded on historical and contemporary labels (including Preludio, Pampa, Qualiton, Angel, Odeón, Dorian and RCA Camden), and numerous taped copies of his works survive in national and municipal radio archives of Buenos Aires.

WORKS

(*selective list*)

Ballet: Blanca Nieves (1, Gianneo and J. Ghidoni de Gianneo, after J. and W. Grimm), 1939, Buenos Aires, Colón, 16 Aug 1963

DEBORAH SCHWARTZ-KATES

Giannettini [Gianettini, Zanettini, Zannettini], **Antonio** (*b* Fano, 1648; *d* Munich, bur. 14 July 1721). Italian composer, organist and singer. According to testimony given in 1678, Giannettini came to Venice around 1662; during the 1660s he lived for a time with the composer Sebastian Enno, who was probably one of his first teachers in that city. By 14 January 1674, and possibly by 1672, he was singing bass in the choir of S Marco, Venice. When on 5 December 1676 he was appointed organist at the church of SS Giovanni e Paolo, he was described as a pupil of Carlo Grossi; the evidence for his having studied also with Legrenzi is unclear. He served at SS Giovanni e Paolo at the usual salary of 40 ducats a year until April 1679, and on 25 January 1677 he also became one of two organists in the galleries at S Marco (not second organist as has sometimes been stated). As a singer his annual salary reached 100 ducats on 17 January 1680, with a further 12 for his work as organist. He may have visited Vienna during this period. During the early 1680s Giannettini composed a number of motets for Ippolito Bentivoglio, Marquis of Ferrara. In 1685 and 1686 he composed three of the serenatas mounted in Venice by Ernst August, Duke of Brunswick and Lüneberg (in 1686 Giannettini was listed as the *maestro di cappella* for the Duke's Venetian residence).

Giannettini left S Marco on 1 May 1686 to take the post of *maestro di cappella* to the Duke of Modena, which he retained, with interruptions, almost until the end of his life. The duke had to order a large boat to transport Giannettini and his family's personal effects from Venice. At Modena he was responsible for the selection and payment of musicians, as his correspondence (in *I-MOs* and *Bc*) shows, and for organizing the performance of his own and others' works. He maintained his connections with Venice and during his visits, often at Carnival, he recruited musicians for the duke. At Venice in 1694, to general applause, he directed music for the convent of S Daniele. In Modena he was called on to produce oratorios and small occasional works more often than operas and he may have composed new music for the 1690 performance in Modena of Legrenzi's *Eteocle e Polinice*. His salary was considerable: 396 lire a month, with an annual lodging allowance of 115 scudi. When, during the War of the Spanish Succession, the French occupied Modena in 1702, Duke Rinaldo fled to Bologna, and Giannettini accompanied him. He soon moved on to Venice with his family, however, and again took up the composition of opera. During this period he is supposed to have returned to Modena twice as opera director. After the war, in February 1707, he resumed his earlier activities at Modena. His salary was lower, perhaps because of the court's straitened circumstances, and in September 1720 it was further reduced to 200 lire a month. This may have prompted his decision to accompany his daughter Maria Caterina, who from June 1721 was employed as a singer at the Bavarian court at Munich.

Giannettini was among the most talented Italian composers of his generation; his works were fairly popular, and two of his operas circulated in Germany. *Medea in Atene*, his first and most widely performed opera, shows an unusually large range of gesture and a lively rhythmic style. The vocal writing is smooth but demanding, and the work includes a particularly effective aria on a chromatic ostinato; there is considerable use of the *stile concitato*. Giannettini's cantatas show similar contrapuntal facility and melodic character. His only published work is a set of vesper psalms with instruments, whose choral parts are simple and harmonically complete and meant to be suitable for beginners.

WORKS

ORATORIOS

Amore alle catene, oratorio di S Antonio [Miracolo terzo di S Antonio], Modena, S Carlo, 1687, *I-MOe*

Jefte (G.B. Neri), Modena, Confraternita della SS Annunziata, 1687, music lost

L'uomo in bivio, Modena, S Carlo, 1687, *MOe*

La creatione de' magistrati [Sesto oratorio intorno la vita di Mosè] (3, G.B. Giardini), Modena, S Carlo, 1688, *MOe*

La conversione della beata Margherita di Cortona (Giardini), Modena, S Carlo, 1689, music lost

Il martirio di S Giustina (F. Sacrati), Modena, S Carlo, 1689, music lost

La vittima d'amore, ossia La morte di Cristo (F. Torti), Modena, Confraternita della SS Annunziata, 1690, *A-Wn*

Dio sul Sinai (Giardini), Modena, Confraternita della SS Annunziata, 1691, music lost

Le finezze della divina grazia nella conversione di S Agostino (Torti), Modena, 1697, music lost

SECULAR DRAMATIC

Medea in Atene (A. Aureli), Venice, S Moisè, 14 Dec 1675, *I-Vnm*; arias for 1688 perf. as Teseo in Atene, *MOe*

L'Aurora in Atene (G. Frisari), Venice, SS Giovanni e Paolo, 10 Feb 1678, *Vqs* (arias)

Echo ravvivata (festa musicale), 3 acts, composed Venice, 1681, *A-Wn*; probably identical to 'operetta in musica' of the same title perf. as intermedi, Innsbruck, 21 May 1681 (see *SennMT*)

Irene e Costantino (A. Rossini), Venice, S Salvatore, 1681, *I-Vnm*, *Vqs* (arias)

Temistocle in bando (A. Morselli), Venice, S Cassiano, 4 Dec 1682, *Vqs* (arias)

L'Ermione riacquistata (F. Pazzaglia), Venice, palace of Prince Alessandro Farnese, 29 March 1683, as described in *Vnm*, music lost

Il giuditio di Paride (trattenimento da camera), 1 act, Venice, June 1685, *A-Wn*, aria ed. in Dubowy

La Fedeltà consolata dalla Speranza (N. Beregan, serenata), Venice, August 1685, *I-MOe*, *MOe* (arias), *D-MÜs* (aria); 1 arioso, 2 arias, sinfonia ed. in Dubowy

Amor sincero (N. Beregan, serenata), Venice, July 1686, *I-MOe* (arias); *GB-Lbl* (arias)

L'ingresso alla gioventù di Claudio Nerone (G.B. Neri), Modena, Fontanelli, 4 Nov 1692, *I-MOe*, *Rvat* (arias)

Introduzione alla festa d'armi e balli (E. Pinamonte Bonacossi), Modena, 15 Jan 1699, music lost, text *MOs*

Tito Manlio (M. Noris), Reggio nell'Emilia, Commedie, spr. 1701

Virginio consolo (Noris), Venice, S Angelo, 1704, music lost

Artaserse (A. Zeno and P. Pariati), Venice, S Angelo, 1705, music lost

I presagi di Melissa (F. Torti), introduzione ad una festa di ballo, Modena, spr. 1709, music lost, text *MOs*

Publio Scipione, ossia Il riparatore delle glorie romane (accademico tributo), Modena, July 1710, music lost

L'unione delle tre dee Pallade, Giunone e Venere (serenata, G.M. Tommasi), Modena, 1716, music lost

La gara di Minerva e Marte (?cant), Modena, 1716, music lost

Il Panaro in giubilo (serenata, Tommasi), Modena, 1717, music lost

La corte in gala (cant, Tommasi), Modena, 25 April 1717, music lost

OTHER VOCAL

Salmi . . . ne' vespri dell'anno, 4vv, 5 insts (Venice, 1717)

Kyrie, 5vv, 7 insts, mentioned in *GerberNL*

?8 Magnificat settings, 2–6vv, str, *D-Bsb*, *DS* (according to *EitnerQ*)

11 motets, 1–5vv, str, *Bsb*
La passione, mentioned in *MGG1*
Cantata morale, *Bsb*

25 cantatas, *I-MOe*
2 cantatas, duet, *GB-Lbl*
Cantatas, canzone, aria, *D-Bsb, Kl, Mbs* (according to *EitnerQ*)
Cantata, *I-Fn* (according to Luin, but not in library catalogue)

DOUBTFUL WORKS

La schiava fortunata, Hamburg, 1693, mentioned by Mattheson as having music by Giannettini and poetry by Cesti

THOMAS WALKER/BETH L. GLIXON

Giannetto. *See* PALESTRINA, GIOVANNI PIERLUIGI DA.

Giannini, Dusolina (*b* Philadelphia, 19 Dec 1902; *d* Zürich, 29 June 1986). American soprano. She studied first with her father, the Italian tenor Ferruccio Giannini, then with Marcella Sembrich, and made her operatic début at Hamburg as Aida in 1925. Subsequent engagements took her to Berlin, Vienna and Covent Garden, as well as to Salzburg (1934–6), where she sang Donna Anna under Walter and Alice Ford under Toscanini. In 1938 she created the part of Hester Prynne in *The Scarlet Letter*, an opera by her brother, Vittorio Giannini. Her career at the Metropolitan began with Aida in 1936 and lasted until 1941, during which period she also played Donna Anna, Santuzza and Tosca. After appearing in Chicago (1938–42) and San Francisco (1939–43) she took part in the first season of New York City Opera (1943), as Tosca at the opening, and then Carmen and Santuzza. She retired some 20 years later and devoted herself to teaching. Giannini's voice was a true dramatic soprano, backed by strong temperament and impeccable musicianship, as revealed by her recordings, notably her Aida. She was also a noted concert singer.

MAX DE SCHAUENSEE/R

Giannini, Vittorio (*b* Philadelphia, 19 Oct 1903; *d* New York, 28 Nov 1966). American composer and teacher. Born to a highly musical family, he began learning the violin at an early age and soon won a scholarship to attend the Milan Conservatory (1913–17). He entered the Juilliard School in 1925, studying violin with Hans Letz and composition with Rubin Goldmark. In 1932 he won the first of three consecutive Prix de Rome. Major European premières during the 1930s (*Lucedia*, *The Scarlet Letter*, *Requiem*) were critical and popular triumphs. Returning to the USA, he joined the teaching staff at the Juilliard School (1939), the Manhattan School (1941) and later the Curtis Institute of Music (1956). In 1965 he became the first director of the North Carolina School of the Arts, where he served until his death.

Giannini quickly absorbed the techniques, as well as the ethos, of late Romanticism, and his early works reveal thorough mastery of a relaxed, italianate vocal style, enriched by Wagnerian chromaticism. In the late 1940s he began to shed excessive sentimentality, moving towards a lighter, neo-classical style. From this period came *The Taming of the Shrew*, his most popular opera. During his last years he turned to a darker, more intense Romanticism, marked by greater dissonance and tonal freedom. Although mid-century arbiters of taste rejected Giannini's conservative style, his best works – *The Medead*, *Antigone*, Psalm cxxx and several of the operas – are fine examples of the modern Romantic tradition. A number of his songs hold an enduring place on recital programmes.

WORKS

Ops: Lucedia 3 (K. Flaster), 1934; Not all Prima Donnas are Ladies; Flora (radio op, 3), 1936; The Scarlet Letter (2, Flaster, after N. Hawthorne), 1938; Beauty and the Beast (radio op, 1, R. Simon), 1938; Blennerhasset (radio op, 1, P. Roll and N. Corwen), 1939; The Taming of the Shrew (3, Giannini and D. Fee, after W. Shakespeare), 1950; Christus (tetralogy, Flaster), 1956, ?unperf.; The Harvest (3, Flaster), 1961; Rehearsal Call (3, F. Swann and Simon), 1961; Servant of 2 Masters (2, B. Stambler, after C. WALTER G. SIMMONS

Gianotti [Giannotti], **Giacomo** (*b* ?Ravenna; *fl* 1584). Italian composer. His only surviving publication is the *Canzoni ... raccolte per Francesco Rambaldi ... libro primo* (Venice, 1584), for four voices.

Gianotti, Pietro [Giannotti, Pierre] (*b* Lucca, early 18th century; *d* Paris, 19 June 1765). Italian composer, teacher and double bass player. His first set of violin sonatas appeared in Paris in 1728. In March 1739 he was engaged as a double bass player at the Paris Opéra, a position he held until his retirement in 1758; his name also appears in a 1751 list of the members of the Concert Spirituel orchestra. His numerous compositions suggest that he may also have played the violin. One of his two-violin sonatas was performed at the Concert Spirituel in 1749, the only time he was so honoured. Yet he must have enjoyed some success, for his sonatas opp.2 and 5 remained in the catalogues of the music publisher Bailleux for eight years after his death. He also edited the collections of 12 *Sinfonie* opp.1 and 2 (Paris, n.d.) by Alberto Gallo, and of *Sinfonie ... dei più celebri autori d'Italia* (Paris, *c*1745).

His compositions, lacking in originality, are overshadowed by his importance as a teacher and as writer of *Le guide du compositeur* (Paris, 1759, 2/1775). This serious, two-volume manual applies Rameau's principles to the practical tasks of composition and accompaniment. In the preface, Gianotti claimed that he had studied with Rameau; his own most famous student was P.-A. Monsigny. Gianotti also published a *Méthode abrégée d'accompagnement à la harpe et au clavecin* but no copy is extant.

WORKS
all published in Paris

MICHELLE FILLION

Giansetti, Giovanni Battista (*b* ?Rome; *fl* 1670–98). Italian composer. At least between 1670 and 1675 he was *maestro di cappella* of S Giovanni in Laterano, Rome, and in 1682 he held a similar position at another prominent Roman church, the Gesù. In his publication of 1670 he explained that he had earlier served the Duke of Sermoneta and claimed to have been the only pupil of Bonifatio Gratiani. H.-J. Marx ('Die Musik am Hofe Pietro Kardinal Ottobonis unter A. Corelli', *AnMc*, no.5, 1968, p.118) lists Giansetti as a 'violinespieler' at the Ottoboni palace during the period 1694–8. He founded an academy, one of whose members was Carlo Mannelli. He published two books of motets, the first, op.1 (Rome, 1670), for two to six voices and continuo, the second, op.2 (Rome, 1671), for one voice and continuo. He is also represented by single sacred pieces in two anthologies (RISM 1675[2] and 1683[1]), and there are manuscripts of three arias by him (*A-Wn* and *D-Kl*) and of a cantata (*I-MOe*).

Gian Toscan (*fl* ?*c*1400). Italian composer, probably Florentine. One ballata by him survives, *Se' tu di male in peggio* (with the name 'Caterina' concealed in the text as a so-called *Senhal*), for two voices. It is archaic in style and altogether clumsily written. The piece stands at the end of the first of two later fascicles in *F-Pn* it.568 (f.60*v*; ed. in CMM, viii/5, 1964, p.42, and in PMFC, x, 1977, p.88). Both names are perhaps in an abbreviated form; he may be identifiable with GIOVANNI MAZZUOLI.

KURT VON FISCHER

Gianturco [née Dooley], **Carolyn M**(**argaret**) (*b* Jersey City, NJ, 15 July 1934). American musicologist, active in Italy. She studied music at Marywood College (BA 1955), and after working as an accompanist for singers in New York (1955–9) and as associate music director of the Turnau Opera Company, Woodstock (1961), she took the MA in music at Rutgers University (1964) while working there as a teaching assistant and lecturer. She took the doctorate in 1970 at Oxford with a dissertation on the operas of Alessandro Stradella. She was subsequently appointed external lecturer (1971–3), lecturer (1973–82) and associate professor (from 1982) at the University of Pisa. She has also been invited to lecture at Oxford University, Harvard University, Queen's University (Belfast), and Koç University (Istanbul). In 1987 she founded the Associazione Toscana per la Ricerca delle Fonti Musicali, of which she is president, and the series Studi Musicali Toscani, of which she is editor-in-chief. She has served on the council of the International Musicological Society (1977–), and has been vice-president (1994–7) and president (1997–) of the Società Italiana di Musicologia. Her main areas of study are Stradella, the music of Tuscany, and Baroque vocal genres, particularly the cantata. In 2000 Gianturco was appointed president of the project (supported by the Italian Minstry of Culture) to publish Stradella's Opera Omnia. She also received the Marywood Professional Achievement Award.

PIERLUIGI PETROBELLI/TERESA M. GIALDRONI

Giaranzana. *See* CHIARENTANA.

Giardini [Degiardino], **Felice (de)** (*b* Turin, 12 April 1716; *d* Moscow, 28 May/8 June 1796). Italian violinist and composer of French descent. He showed an early talent for the violin, but his father sent him to Milan as a cathedral chorister, and to study singing, composition and harpsichord with Paladini. He returned to Turin to study violin with G.B. (not Lorenzo) Somis, and while still a youth joined an opera orchestra in Rome. Soon after, he moved to the Teatro S Carlo in Naples, and quickly advanced from the back desks to the position of deputy leader. It was here, probably on 30 May 1747 at the revival of *Eumene* or 4 November 1748 at the revival of *Ezio*, that Jommelli cured him of his excessive love of impromptu decoration in performance, as he later reported to Burney:

> One night, during the opera, Jomelli, who had composed it, came into the orchestra, and seating himself close by me, I determined to give the Maestro di Capella a touch of my taste and execution; and in the symphony of the next song, which was in a pathetic style, I gave loose to my fingers and fancy; for which I was rewarded by the composer with a violent slap in the face; which ... was the best lesson I ever received from a great master in my life.

Shortly after this incident Giardini settled to a career of solo violin playing (saying later that he had given up the harpsichord after hearing the playing of Mme de St Maur, a pupil of Rameau), and he left Italy to begin a concert tour of Europe. After great success in Berlin, he came to England by way of France, making his first public appearance at a benefit for the aging Cuzzoni on 27 April 1751. The enthusiastic reception, amplified by the support of such aristocrats as Mrs Fox Lane (Lady Bingley), soon established him with the English public.

During the 1751–2 season Giardini led a major series of subscription concerts at the Great Room, Dean Street, and he promoted further series here in 1753 and 1755. Also in 1752 he performed at a concert in aid of the Lock Hospital, with which he was to be associated until 1780 as concert organizer, composer and governor. About 1753–4 he married the singer Maria Vestris, but the marriage was apparently of brief duration. In 1754 he took over and revitalized the orchestra of the Italian Opera at the King's Theatre, initiating a 'new discipline, and a new style of playing' (Burney). He retained a connection with the Opera for 30 years, sometimes as leader, but also, and less successfully, as impresario for the 1756–7 and 1763–4 seasons.

Despite the appearance of a serious rival in Wilhelm Cramer, who made his London début in 1773, and later competition from Salomon, Giardini maintained his position as a player; Burney called him 'the greatest performer in Europe'. He took part in the Bach-Abel concerts (sometimes playing the viola), and also appeared in the provinces, taking charge of the orchestra for the Three Choirs Festival from 1770 to 1776. He was in great demand as a teacher and held important morning concerts for his violin, singing and harpsichord pupils in his house. By 1767 he had been appointed music master to the Duke of Gloucester and the Duke of Cumberland; and in 1782 he took over the same post in the Prince of Wales's establishment. From 1774 to 1779 he often led the orchestra at the Pantheon Concerts in Oxford Street and in the 1776–7 and 1782–3 seasons was again leader at the King's Theatre. He was a governor of the Foundling Hospital, ran the annual benefit concerts for a time, and even, with Burney, planned the setting up of a music academy there. Despite these activities, he appears to have grown embittered and quarrelsome, 'spoke well of few' (not even of Haydn on his first London visit), and eventually left England for Italy in 1784. There he lived in Naples at the home of Sir William Hamilton, who had been one of his first violin pupils in London.

In 1790 Giardini attempted to return to the English operatic scene, directing the orchestra from the harpsichord at the Haymarket Theatre (the King's Theatre having burnt down the previous year). The attempt proved unsuccessful, owing partly to the poor response to his protégée, the soprano Marianna Laurenti. After a farewell performance at Ranelagh Gardens on 22 May 1792, he seems to have travelled to St Petersburg: certainly

by 1796 he was in Moscow, where he died in great poverty.

Giardini's contributions to pasticcio operas are widely scattered; those pieces that were basically his own work were *Rosmira*, *Enea e Lavinia* and *Il re pastore*. In 1763 he collaborated with Charles Avison on an English oratorio *Ruth*, which was performed at the Lock Hospital Chapel; a final version, set entirely by Giardini and performed at the chapel five years later, became one of his most popular compositions. Among his many published instrumental works, the earlier examples show the most originality. In his *Sei quintetti* op.11 (1767) he joined Tommaso Giordani in exploiting the new medium of the keyboard quintet, and his *Sei sonate di cembalo con violino o flauto traverso* op.3 (1751) are the earliest examples of the accompanied sonata in England. Newman mentioned them as being 'remarkable for supplying a missing link between the solo/bass and the true duo types'. Although tradition has long (and mistakenly) associated Giardini with the melody of the Russian *God Save the Tsar* (by L'vov), he is still represented in English hymnals with his tune 'Moscow'.

WORKS

Collection: *Miscell: Works* (London, 1790) [M]

STAGE

all first performed in London

Rosmira (os, 3, S. Stampiglia), King's, 30 April 1757, lost

Enea e Lavinia (os, 3, G. Sertor), King's, 5 May 1764; excerpts (London, 1764)

Il re pastore (os, 3, P. Metastasio), King's, 7 March 1765, lost

Sappho (lyric drama), *c*1778, lost (if written); incid music to W. Mason, Elfrida, Covent Garden, 23 Feb 1779, lost

Music in: Cleonice, 1763; Siroe, 1763; Didone, 1775; Astarto, 1776

INSTRUMENTAL

published in London unless otherwise stated; some reissued Paris with different opus numbers

Vn, b: 6 sonate, op.1 (1751); 6 sonate, op.4 (Paris 1755–6); 12 sonates, op.6 (?1755–6); 6 soli, op.7 (probably 1759); 12 sonate, [op.10] (1765); 6 Solos, op.16 (1772); 6 Solos, op.19 (1777); 6 Favourite Solos (1790); 1 in M

Duets: 6 for 2 vn, op.2 (1751); 6 for 2 vn, op.13 (1767), 1 ed. in K. Schultz-Hauser (Mainz, 1965); 6 for vn, vc, op.14 (1769); 1 for vn, va, in M

Trios: 6 for gui, vn, b (probably 1760); 6 for vn, va, vc, op.17 (1773); 6 for (gui, vn, pf)/(hp, vn, vc), op.18 (1775); 6 for vn, va, vc, op.20 (1778); 6 for vn, va, vc, op.26 (1784); 6 for 2 vn, b, op.28 (1789–90); 6 for 2 vn, pf/vc, op.30 (1790); 1 for vn, va, vc, in M

Qts: 3 for hpd, vn, va, vc, 3 for hpd, 2 vn, vc, op.21 (1778–9); 6 for 2 vn, va, vc, op.22 (1779–80); 2 for vn, 2 va, vc, 2 for 2 vn, va, vc, 2 for vn, ob, va, vc, op.23 (1782); 3 for vn, ob/fl, va, vc, 3 for 2 vn, va, vc, op.25 (1783); 6 for 2 vn, va, vc, op.29 (1790); 1 in 6 Quartettos by Bach, Abel and Giardini (1776)

Other works: 6 sonate, hpd, vn/fl, op.3 (1751); 4 ovs. and qt for 2 vn, bn, b (1755); 6 quintetti, hpd, 2 vn, vc, b, op.11 (1767); 6 vn concs., op.15 (1771–2); Devonshire Minuet, pf, vn (*c*1781); 2 Sonatas, pf/hpd, vn, op.31 (1790–91); 2 sonatas, hpd/pf, vn, 1 for hpd/pf, vn, va/vc, in M

Pedagogical: Esercizii per il cembalo, Istruzioni per violoncello, Istruzioni ed esercizii per il violino, all *I-Mc*

MSS: 3 qts, 9 trios, 12 duets, *GB-Lbl*; other works in *D-Bsb*, *KA*, *Mbs*, *I-Gl*, *Mc*

VOCAL

Ruth (orat), Lock Hospital Chapel, 15 April 1763 (pt 2 by Giardini, pts 1 and 3 by Avison), 13 Feb 1765 (pts 2 and 3 by Giardini, pt 1 by Avison), 25 May 1768 (all by Giardini), lost; addns to Hasse, I pellegrini, Drury Lane, 25 March 1757, lost

6 arie, 1v, orch, op.4 (1755); La libertà [13 songs], 1v, b (1758); 6 arie, 1v, orch (1762); 6 duetti, 2vv, b (1762); In dimostrazione d'affetto [1 duet, 6 glees] (1765); many single songs, glees, catches, hymns, MS, pubd separately, and in M

CHRISTOPHER HOGWOOD, SIMON McVEIGH

Giay, Francesco Saverio. *See* GIAI, FRANCESCO SAVERIO.

Giay [Giai, Giaj], **Giovanni Antonio** (*b* Turin, 11 June 1690; *d* Turin, 10 Sept 1764). Italian composer. He received his early training under Francesco Fasoli in the Cappella degli Innocenti of Turin Cathedral, to which he was admitted in 1700. He probably then went to Rome to complete his studies. On his return to Turin he wrote *Il trionfo d'Amore ossia La fillide*, in collaboration with A.S. Fiorè. The work was performed at the Teatro Carignano in 1715. His collaboration with Fiorè continued in 1717 with *Sesostri, rè d'Egitto*, and in 1728 with *I veri amici*. His own operas were performed over the next 35 years in Turin, Venice, Milan and Rome. *Fetonte sulle rive del Po* was written for the marriage of Vittorio Amedeo and Maria Antonia Ferdinanda of Spain in Madrid (1750) and *Le tre Dee riunite* was performed in Madrid on the same occasion. In 1727 and 1728, in his capacity as *maestro di capella* of the city of Turin, he composed two serenades, which were sung in Malta 'nella Piazza di Palazzo'. The second of these was probably revived there in 1731. Giay was in Malta in 1728, his departure being officially recorded on 21 July (the record states that at this time he was 22 years old, some 16 years younger than his birth date suggests).

After Fiorè died in 1732, Giay assumed the duties of *maestro di cappella* and was confirmed in the position by Carlo Emanuele III in a patent of 24 October 1738. In this capacity he directed the instrumental and vocal forces of the court and composed a large amount of church music. Giay held this position until his death and was succeeded by his son, Francesco Saverio (1729–1801), the composer of the violin concerto sometimes attributed to his father.

Among known members of the Giay family was Giovanni Antonio's first cousin Michele Antonio Giay, mentioned by Vallas as a professor of music at the Jesuit college in Lyons in 1759.

WORKS

OPERAS

music lost, unless otherwise stated

GORDANA LAZAREVICH/MARIE-THÉRÈSE BOUQUET-BOYER

Giazotto, Remo (*b* Rome, 4 Sept 1910; *d* Pisa, 26 Aug 1998). Italian musicologist and critic. He took a degree in literature and philosophy at the University of Genoa (1931–3) and studied the piano and composition at the Milan Conservatory under Torrefranca, Pizzetti and G.C. Paribeni. He was music critic (from 1932) and editor (1945–9) of the *Rivista musicale italiana* and was appointed co-editor of the *Nuova rivista musicale italiana* in 1967. He taught music history at the University of Florence (1957–69) and in 1962 was nominated to the Accademia Nazionale di S Cecilia. In 1949 he became director of chamber music programmes for RAI and in 1966 its director of international programmes organized through the European Broadcasting Union. He was also president of RAI's auditioning committee and editor of its series of biographies of composers. He wrote studies of the music history of Genoa, and romanticized biographies of various composers (Albinoni, Stradella, Viotti, Vivaldi); he also contributed to Italian and foreign music dictionaries. His elaboration of a fragment supposedly from one of Albinoni's sonatas has become famous as 'Albinoni's *Adagio*'.

CAROLYN GIANTURCO/R

Gibbes, Richard. *See* GIBBS, RICHARD.

Gibbons, (Richard) Carroll ['Gibby'] (*b* Clinton, MA, 4 Jan 1903; *d* London, 10 May 1954). American pianist, bandleader and composer, active in Britain. He played the piano as a child, appearing in public aged ten, and going on to attend the New England Conservatory. In 1924 he came to Britain to study the piano at the RAM, but he soon took up an alternative career in dance music, playing with the Boston Orchestra at the Berkeley Hotel. He led the Sylvians at the Savoy in 1926, taking over leadership of the hotel's popular Orpheans orchestra from Debroy Somers in 1927, but disbanding it the following year. He became a musical director for the Gramophone Company (1928–9), for whom he led the New Mayfair Orchestra, recording prolifically and providing accompaniments for almost all the popular singers and variety turns recorded by the company. In 1929 he worked for the British and Dominion Film Company as a musical director, spending most of 1930–1 in the USA in a similar capacity for MGM.

In 1931 he returned to London and co-led the New Savoy Orpheans with Howard Jacobs, in due course becoming sole leader. At the same time he made frequent broadcasts (often with his Boy Friends, using his own composition *On the Air* as his theme), cut numerous records, and wrote music for films and stage. His stage career began in the late 1920s, supplying music for songs in musical plays and revues, and during this period and

again in the 1940s, he composed a number of full length musical stage works.

In 1939 he formed a touring band with 16 members; their most popular feature was Gibbons's piano playing. In 1940 he returned to the Savoy, where he subsequently became director of entertainment (1950–4). The frenetic pace of work for much of his career, and his facility as a pianist, which made him both a quick and sensitive accompanist and rapidly able to master new popular songs, meant that although he recorded a great deal, making hit records both in Britain and the US, he produced little that outlasted the fashion of the day, with the exception of his song *Garden in the Rain.*

WORKS
(*selective list*)

STAGE

unless otherwise stated, music by Gibbons and dates those of the first London performance; librettists shown as (lyricist; book author)

Sylvia (comedy with music, 3, J. Dryenforth after St.J. Ervine: *Mary, Mary, Quite Contrary*), Vaudeville, 14 Dec 1927

Open Your Eyes (musical comedy, Dryenforth and C. Knox; F. Jackson), Edinburgh, Empire, 26 Aug 1929 [addl. music by V. Duke]

Gaeities (Furber), 29 March 1945

Big Boy (musical comedy, 2, F. Emney and D. Furber; Emney, Furber and M. Kester), Saville, 12 Sept 1945

Interpolated songs: 2 songs (Dreyenforth) in P. Braham: Up with the Lark, 1927

VOCAL

lyrics by James Dryenforth, unless otherwise stated; all published in London

Many songs, incl. I'm so jealous (1927); Misunderstood (1927); Possibly (1927); Garden in the Rain (1928); I'll be getting along (1929); Peace of Mind (1929); On the Air (J. Campbell and R. Connelly), (1932); On the Other Side of Lovers' Lane (1932); I think of you (D. Furber), (1945); It was swell while it lasted (Furber), (1945)

ALYN SHIPTON

Gibbons, Christopher (*b* Westminster, London, bap. 22 Aug 1615; *d* Westminster, 20 Oct 1676). English composer and organist, second son (the eldest surviving) of ORLANDO GIBBONS. He served Charles I in 'his youth', presumably as a chorister of the Chapel Royal. Wood noted that he 'was bred up from a Child to Music under his uncle Ellis Gibbons', but this cannot be correct, and it has generally been inferred that after his father's death he was taken under the care of his uncle Edward Gibbons, succentor of Exeter Cathedral. In January 1627 he was nominated through the Signet Office for admission as a scholar of the Charterhouse; the Governors approved his election on 21 June, though it is not certain that he was actually admitted. In 1638 he succeeded Thomas Holmes as organist of Winchester Cathedral, but in 1642 he saw the 'faire organs in the Minster broken down' by parliamentarian soldiers. He married Mary Kercher, daughter of a Winchester prebendary, on 23 September 1646, and settled in London, where in 1651 he was listed in Playford's *A Musicall Banquet* (RISM 1651[6]) among teachers 'for the Organ or Virginall'. According to Aubrey he was also organist to Sir John Danvers, whose house in Chelsea contained 'an excellent organ of stoppes of cedar'. Lodewijck Huygens heard him play there on 10 March 1652, and also in a consort at Davis Mell's house a fortnight later. In July 1654 Evelyn, visiting Magdalen College, Oxford, where the Robert Dallam organ in the chapel still stood, heard 'Mr Gibbon that famous Musitian, giving us a tast of his skill & Talent on that Instrument'. It appears that his wife Mary was dead by 1655, and that on 22 April of that year he married a widow, Elizabeth Filbridge (née Ball); five children were baptised at St Clement Danes between February 1656 and June 1660. In 1656 he was one of six players in the 'Instrumental Musick' for Davenant's *The Siege of Rhodes* given at Rutland House. Locke's score for the 1659 production of Shirley's *Cupid and Death* includes vocal and instrumental music by Gibbons; it is uncertain whether this had formed part of the 'musical compositions' of the 1653 production given before the Portuguese ambassador.

At the Restoration Gibbons received appointments as musician to Charles II and as organist of the Chapel Royal and Westminster Abbey; he resigned his place at Winchester. As a musician-in-ordinary he served in a dual capacity, as virginalist 'in the Presence' (instructions were given in 1660 for 'an organ to be made for him'), and as a member of the King's Private Musick, at yearly salaries of £46 and £40 respectively. He occupied this place, and that of Chapel Royal organist, until his death. In 1660 he became organist, and in 1664 Master of the Choristers, of Westminster Abbey, posts he held until 1666. It was apparently from him that Froberger, who was in London in 1662 at the time of Charles II's marriage, obtained employment as an organ-blower so that he might hear the music at the English court; Mattheson recorded that during a banquet Froberger overblew and received a drubbing from the organist, who apologized after hearing him perform on the harpsichord. Between 1662 and 1665 he was involved in a scandal over plans for a new organ at Worcester Cathedral, and was accused of corruptly seeking to procure the contract for William Hathaway. In 1663 he was nominated by the king for the degree of DMus at Oxford University, and this was conferred in July 1664; his exercises for the Act (performed, Wood related, 'with very great honour to himself and his faculty') survive, and a portrait of him in doctoral robes was presented to the Music School (see illustration). Wood described him as 'a person most excellent in his faculty, but a grand debauchee': this seems to be borne out by his autograph comment on an organ verse, 'drunke from the Cather[i]ne Wheele' (*GB-Och* 1142A). Pepys wrote of his taking part in music at the Earl of Sandwich's residence on several occasions, and on 3 August 1668 was promised 'some things for two flagelettes' from him. In 1665 the Gibbons family was living in Great Almonry, and in 1671 in New Street, Westminster. Gibbons was buried on 24 October 1676 in Westminster Abbey cloisters.

As a keyboard player, Gibbons was an outstanding figure in Restoration music. As a composer, his style, though vigorous, is cruder and less eloquent than Locke's; North, who called him 'a great master in the ecclesiasticall stile, and also in consort musick', characterized his work as 'bold, solid, and strong, but desultory and not without a little of the barbaresque'. The verse anthems belong to

Christopher Gibbons: portrait by an unknown artist, c1664 (Faculty of Music, Oxford)

a transitional type, with organ accompaniment but without 'symphonies', and usually employ two solo trebles; considerable demands are sometimes made of these boy soloists. *How long wilt thou forget me* seems to have been the most widely performed of his anthems. Here, and also in his fantasia-suites for violins and bass viol, Gibbons's practice was to write out imitative passages for solo organ in full, but usually his organ parts are shown as a thoroughbass line. The fantasia-suites are among the last examples of a genre established by Coprario, while two four-part fantasias (probably written in the 1660s for the Oxford Music School) are good examples of that 'chief and most excellent' genre from a time when it was falling out of fashion. Though only a few keyboard pieces survive, the double voluntaries in particular are a valuable record of the 'skill & Talent' that Evelyn admired, and anticipate the style of Gibbons's pupil Blow.

CHRISTOPHER D.S. FIELD

Gibbons, Edward. English choirmaster and composer, brother of ORLANDO GIBBONS.

Gibbons, Ellis. English composer, brother of ORLANDO GIBBONS.

Gibbons, Orlando (*b* Oxford, bap. 25 Dec 1583; *d* Canterbury, 5 June 1625). English composer and keyboard player. He was a leading composer of vocal, keyboard and ensemble music in early 17th-century England. Orlando was the youngest son of William Gibbons (*d* 1595), a town wait in Cambridge from 1567. William took a similar post in Oxford in 1580 and then moved back to Cambridge around 1588. Orlando's eldest brother, Edward (*b* Cambridge, 1568; *d* Exeter, ?*c*1650), was master of the choristers at King's College, Cambridge (1592–8), and later lay vicar and (by dispensation) succentor of Exeter Cathedral, being appointed 'teacher of the choristers' in 1608, a post he held until the Interregnum (1649).

1. LIFE. From February 1596 until May 1599 (regularly to Michaelmas 1598) Orlando Gibbons is listed as a chorister at King's College, Cambridge, where his brother Edward was master of the choristers. He entered the university in 1598, and was a sizar of King's College. Payments 'pro musica ... ' in the college accounts, 1595–1602, made to 'Gibbons' may be for the town waits. Gibbons witnessed his mother's will in Cambridge in March 1603. From 1603 until his death he was a musician in the Chapel Royal. His name first appears in the Chapel Royal Cheque Book in a list of 41 signatories to an agreement, dated 19 May 1603, on conditions of service under James I. According to a summary of appointments compiled about 1627, he was formally sworn in as Gentleman of the Chapel Royal on 21 March 1605, succeeding Arthur Cock (*d* Jan 1605) who, as organist of Exeter Cathedral (1598–1602), knew Gibbons's brother Edward. Between 1603 and 1605 he may have served as Gentleman Extraordinary (i.e. unsalaried substitute). His particular skill was as a keyboard player, but not until 1615 is there a record in the Cheque Book naming him (with Edmund Hooper) as one of the two organists of the Chapel Royal: at that time the organists agreed to a schedule of duties drawn up and confirmed by the Dean of the Chapel (James Montague, then Bishop of Bath and Wells). According to the Cheque Book, Gibbons was senior organist of the Chapel Royal in 1625, with Thomas Tomkins as junior organist.

In 1606 Gibbons married Elizabeth, daughter of John Patten, Yeoman of the Vestry of the Chapel Royal; they lived in the Woolstaple (now Bridge Street) in the parish of St Margaret's, Westminster, where many court musicians and servants resided. Their seven children were baptized at St Margaret's. In the dedication to Sir Christopher Hatton II, of *The First Set of Madrigals and Mottets* (1612), Gibbons claimed to have composed the works in Hatton's house. This may have been his house near St Bartholomew-the-Great in Faringdon, since Hatton did not move to a house in Westminster (very close to Gibbons's) until 1612. Hatton was a minor figure of the gentry; his wife was sister to Sir Henry Fanshawe, patron of music and an officer in the household of Henry, Prince of Wales.

Gibbons's endeavours and compositions suggest that he hoped for significant preferment at court. In 1611 he petitioned the Queen as 'an humble suitor' for her help to gain a lease worth 40 marks (£26 14s 2d), a matter referred to Lord Salisbury. He was by far the junior of the three contributors to *Parthenia* (RISM 1613[14]), the keyboard collection published to celebrate the marriage of the king's daughter, Princess Elizabeth, to Frederick, Elector Palatine, in 1613; the prominence of the notes E and F in *The Queen's command* may be a musical reference to the names of the bride and groom. The pavan and galliard 'Lord Salisbury', the wedding anthem *Blessed are all they* (1613) for the Earl of Somerset, and anthems associated (in *GB-Och* Mus 21) with senior clergy who held royal chaplaincies (Godfrey Goodman, William Laud, and Anthony Maxey) imply that he was well connected in court circles. In 1615 he was rewarded by two grants totalling £150 from King James I 'for and in consideration of the good and faithful service heretofore done unto ourself by Orlando Gibbons our organist, and divers other good causes and considerations us thereunto moving'. He composed an anthem, *Great King of Gods*, and a court song, *Do not repine, fair sun*, for the king's visit to Scotland in 1617, attended by the Chapel Royal.

The court musical establishment was affected by the death of Henry, Prince of Wales in 1612, and the departure to Heidelberg of Princess Elizabeth after her marriage in 1613. Gibbons may have been among the Heidelberg entourage, as an attendant of the Earl of Arundel (Coprario and the harpist, Daniel Callinder, attended the Duke of Lennox). From 1613 Gibbons was the most talented keyboard player and keyboard composer available to the court. His two eminent predecessors, Byrd and Bull, had marked him out as such by his inclusion in *Parthenia*; Byrd was long retired to Essex, and Bull, who had worked in the households of both Prince Henry and Princess Elizabeth, had fled abroad. The king's eldest surviving son, Charles, became Prince of Wales at the age of 16 in 1616, and Gibbons is listed in the first payments of 1617 as one of 17 musicians who formed the nucleus of the prince's musical establishment. A number of these had previously served in the slightly smaller musical establishment of Prince Henry. Charles's regular musicians also included Alfonso Ferrabosco (ii), Thomas Ford, Robert Johnson, Thomas Lupo and Angelo Notari: all were composers as well as performers, and all received an annual salary of £40. Other musicians associated with the household include John Coprario, whose work in Charles's musical establishment seems to have been particularly important: Holman (1993) argued convincingly that what was to become the Caroline court orchestra was formed in the prince's household at this time, and that Coprario and Gibbons collaborated in composing for the ensemble.

Gibbons added a third post associated with the court in September 1619. The accounts of the king's Treasurer of the Chamber record that he was to attend in the royal privy chamber as virginalist at £46 per annum from

Michaelmas 1619. The dedication of the first printing of Gibbons's *Fantasies of Three Parts* to Edmund Wray, groom of the privy chamber, may be significant: Wray was a protégé of George Villiers, favourite of Prince Charles and a rising court star, but was disgraced and sent from court in 1622. In 1623 Gibbons and Thomas Day, a fellow member of both the Chapel Royal and the prince's household, succeeded John Parsons at Westminster Abbey. The duties of organist and master of the choristers combined by Parsons were shared by Gibbons and Day. At this time almost half of the singing men at Westminster Abbey were also Gentlemen of the Chapel Royal, and the closeness of the abbey to the court may be observed in its use for an official visit by the French ambassador and his retinue in 1624:

> At their entrance, the organ was touched by the best finger of that age, Mr. Orlando Gibbons . . . and while a verse was played, The Lord Keeper presented the ambassadors and the rest of the noblest quality of their nation with [the] liturgy as it spoke to them in their own language. The Lords ambassadors and their great train took up all the stalls, where they continued half an hour while the choirmen, vested in their rich copes, with their choristers, sang three several anthems, with most exquisite voices before them.

Gibbons took the degree of MusB at Cambridge in 1606. There is now doubt as to whether he received the degree of DMus at Oxford in May 1622, when William Heyther and Nathaniel Giles received doctorates (Harley). Both Anthony Wood and William Gostling assert that Gibbons's *O clap your hands* was used as Heyther's doctoral exercise. At the funeral of James I in March 1625 Gibbons was listed among the Chapel Royal as senior organist in the Cheque Book and as privy organist in the Lord Chamberlain's accounts (representing a conflation of two posts); he was also listed as organist of Westminster Abbey in the Lord Chamberlain's accounts. In May 1625 preparations were made to receive the new queen, Henrietta Maria, whom Charles I had married by proxy in Paris at the beginning of the month. On 31 May the court set out for Canterbury, with the Chapel Royal in attendance. Gibbons was taken ill suddenly, and the royal physicians were summoned: there was fear that he had the plague. The doctors described precisely his coma and final seizure, attributed at the post mortem to a brain haemorrhage. The attention attracted by his death, in particular its formal observation, investigation and reporting, perhaps suggests how close he may have been to the new king. Gibbons died on Whitsunday, 5 June, at Canterbury. A plaque was subsequently placed in Canterbury Cathedral, with a fine bust of the composer, but with hasty wording, which omitted his age. He died intestate: after some 13 months letters of administration were granted on 13 July 1626 to his widow by the dean and chapter of Westminster, but she was already dead (bur. 2 July 1626). A letter from the royal signet office (20 January 1627) directed that their eldest son, Christopher, be granted a scholarship at Charterhouse, confirmd by the govenors in June. A remark by Antony Wood suggests that he may have moved to Exeter to be brought up by his uncle, Edward.

2. WORKS. All four appointments that Gibbons held at his death were associated with his skills as a keyboard player. As a composer his reputation has traditionally rested on his church music, which circulated widely: there are over 30 surviving 17th-century sources of the Short Service. By their inclusion in printed collections (Barnard,

Orlando Gibbons: copy from a lost contemporary portrait (Faculty of Music, Oxford)

1641; Boyce, 1760–73) some anthems have remained in the repertory of English cathedral choirs since the Restoration. Late 19th- and early 20th-century publications have also emphasized his church music: Ouseley's anthology (1873), *Tudor Church Music*, iv (1925), selections in the *Tudor Church Music Octavo Series*, and the use of 11 of his 'hymn' tunes in *The English Hymnal* (1906). His instrumental music has fared less well: although some items were edited and printed, including Rimbault's pioneering edition of the *Fantasies in Three Parts* (1843), the collected keyboard music appeared only in 1962, and the ensemble music in 1982.

Gibbons has been presented as a master of serious polyphonic music; his full anthems have attracted particular praise. However, the seriousness and contrapuntal dexterity of these works and the *Madrigals and Mottets* are complemented by vitality in his verse anthems and wit in his consort music. The sacred music in the full style includes music for four voices in the largely syllabic, 'short' style (the anthem *Almighty and everlasting God* and the First or Short Service), as well as more extended, polyphonic, psalms and anthems for five and six voices (*Hosanna to the son of David* and *O Lord, in thy wrath*). Gibbons's attention to word-setting is apparent even in the simpler works, as in the declamation of 'stretch forth thy right hand' in *Almighty and everlasting God*. His instinctive contrapuntal facility is evident in all the movements of the through-composed Short Service, but especially in the canon of the Gloria patri in the Nunc dimittis. The setting for eight voices of *O clap your hands* has motivic clarity, polyphonic richness, textural interchange, and rhythmic energy more typical of an Italian canzona or polychoral motet. The Second Service is an outstanding example of an early 17th-century 'verse' service with accompaniment, and his verse anthems are among the finest of the genre. They range from simple

alternation of solo voice and five-part chorus, as in *Behold, thou hast made my days*, *This is the record of John* and the strophic *The secret sins*, to the more complex scoring patterns of the majority, including *See, the Word is incarnate*. Gibbons shows little interest in overt word-painting, but the expressive declamation (the opening phrases of *See, the Word is incarnate*), the rhythmic treatment of the choral writing ('let us welcome such a guest' from the same work, and the second half of *Glorious and powerful God*), and the short passages of vocal bravura in both of these works, are hallmarks of a vitality and modernity sometimes suppressed in ponderous 20th-century performances by cathedral-style choirs. Some of the anthems are occasional works, and others are found only in sources of non-liturgical provenance; some have only keyboard accompaniment, others only ensemble parts, and others exist with both. They should not be categorized too rigidly: a work performed with wind instruments in the Chapel Royal may have been performed with organ in a provincial cathedral, or with viols in a domestic setting.

No substantial sacred work by Gibbons was published in his lifetime. However, he contributed to two published collections. William Leighton's *Teares or Lamentacions of a Sorrowfull Soule* (RISM 1614[7]) includes two fine small-scale pieces for four voices. Fifteen 'songs' (melody and bass) appeared in George Wither's *Hymnes and Songs of the Church* (London, 1623), a publication bound in with all editions of the metrical psalms; two of the melodies were used more than once, and three were either adapted by or attributed to Gibbons.

Most of Gibbons's secular vocal music is found in the *Madrigals and Mottets* (1612), completed before he was 30. Kerman (1961) remarked his affinity with Byrd and the traditions of English partsong and consort song, evident respectively in *The silver swanne* and *Nay let me weepe*, a work perhaps written to mark the death of Prince Henry. The seriousness of the whole collection may have been affected by the prince's death as much as the pervasive spirit of Jacobean melancholy typified by Walter Raleigh's *What is our life*. Even the pastoral settings are fluent essays in imitative polyphony: like Byrd, Gibbons set secular texts with less emphasis on mood and expression of textual detail than in his sacred music. He did not favour strophic settings: Joshua Sylvester's four-stanza *I weigh not fortune's frown* is set in four independent sections. Two secular vocal works are found outside the 1612 publication. *Do not repine, fair sun*, written for the king's visit to Scotland in 1617, is in the consort-song tradition, though on a larger scale. *The Cryes of London* is a witty combination of vendors' common street cries sung by solo voices with the high polyphonic tradition of the instrumental In Nomine played by viols.

The assumption that Gibbons wrote ensemble music exclusively for viols is now untenable. The fantasias for 'great dooble basse' (MB, xlviii, nos.16–25) and certain of the three-part printed fantasias (MB, xlviii, nos.11–15) are particularly suited to violins; others suggest performance by wind instruments (e.g. MB, xlviii, nos.37–8). There remains a substantial body of music for two to six instruments which is apt for viol consort, including the unusual two-part fantasias, the varied group of In Nomines, the rich-textured six-part fantasias, and the finely wrought variations on *Go from my window* with its duel of divisions between the bass viols. Gibbons often writes more for the moment than the cumulative whole, with emphasis on clear articulation of imitative motives, shaping of phrases, control of texture, and rhythmic and periodic use of harmony. The fantasias for 'great dooble basse' are deliberately sectional, include changes of metre, have style and tempo indications, and quote from popular melodies and idioms; they were perhaps written specifically for the burgeoning string band entertaining Charles I during his years as Prince of Wales. John Woodington was instructed to copy some of them posthumously in 1634, an indication of their continuing popularity at court (*GB-Och* Mus 712–15). John Lilly and Stephen Bing also copied other ensemble works into Christopher Hatton III's 'great set' of partbooks (*Och*) in the 1630s. The printed fantasias (*c*1620) were reissued in Amsterdam in 1648; Henry Purcell used a manuscript which contained some of his ensemble music (*Lkc* 3); other works appear in sources used by viol consorts in Oxford in the later 17th century, including those owned by Narcissus Marsh, later archbishop of Dublin (*IRL-Dm*).

Gibbons's corpus of keyboard music is not so extensive as that of Byrd and Bull, but it ranks with them in quality. The keyboard fantasias range from ten to over 100 breves. They are more flexible in their treatment of polyphonic voices and more diverse in their use of figuration than those for ensemble. Although four parts are introduced at the beginning, the counterpoint is normally for three parts: voice-leading implies contrapuntal richness, but reduced textures allow clarity and rapid passagework. Gibbons used small rhythmic and melodic motives, sometimes in dense counterpoint and framed within larger periods; his particular penchant for end climax may be observed in the fantasia 'for double organ' (MB, xx, no.7) and the one on A (MB, xx, no.12). Of the dances, only Lord Salisbury's pavan and galliard from *Parthenia* are paired. That pair and a single pavan on A (MB, xx, no.17) are untypical: the other pavans and galliards have written-out reprises. All the pavans and galliards are wrought with polyphonic detail and keyboard bravura, and display a mannerism less evident in the almans, corantos and masque dances. The latter provide the only evidence of Gibbons's possible association with Jacobean masque, probably settings made after the event. Of the grounds and variations *The Italian ground* and *The Queen's command* are relatively short, and make use of written-out reprises; *The woods so wild* and *The hunt's up* (or *Peascod time*) are more extended sets of variations in the tradition of Byrd (who set both), Bull and Farnaby. Gibbons is less interested in the obsessive application of figurative and rhythmic patterns (an English characteristic dating back to Preston and Blitheman in the mid-16th century), but there is ample evidence of virtuoso keyboard writing, tempered by contrapuntal ingenuity and innate musical judgement.

Gibbons's career was almost entirely Jacobean and he worked with a progressive group of musicians who held particular favour with Charles I before and after he came to the throne. Overemphasis of the serious and polyphonic qualities of his music can obscure the modern features in Gibbons's music: the wit and vitality, the responsive, declamatory treatment of text, even in a contrapuntal idiom, and the use of rhythmic figures and periodic harmony. The absence of chromatic harmony and decoration is notable, even in the melancholy texts of the

Madrigals and Mottets; chromatic alteration is part of the harmonic plan, as in the desending, modulating sequence in the final strain of Lord Salisbury's pavan. This is no constraint on expressiveness, whether in the polyphonic intensity of *O Lord, in thy wrath*, the dramatic declamation of *Glorious and powerful God*, or the exuberance of *O clap your hands*.

Gibbons's brother Edward is known by a polyphonic verse anthem (in *GB-Lbl*), an incomplete vocal piece (in *Och*), and the Kyrie and Creed to William Mundy's Short Service. Another brother, Ellis (*b* Cambridge, 1573; *d* ?London, May 1603), contributed one madrigal, or perhaps two, to *The Triumphes of Oriana* (RISM 1601[16]).

JOHN HARPER (text, bibliography),
PETER LE HURAY/JOHN HARPER (work-list)

Gibbs, Alan (Trevor) (*b* Chipping Norton, Oxon., 21 April 1932). English composer. He studied music at Durham University (1950–53) and privately with Edwin Rose and Mátyás Seiber (composition) and John Webster and Conrad Eden (organ). From 1957 to 1986 he taught at Archbishop Tenison's School in London. Though he has written a good deal of chamber and educational music for various instruments, he is known mainly for his organ and church music. Most of the choral pieces are in a freely tonal and rhythmically inventive style; the instrumental music is noteworthy for its subtle, resourceful and often witty manipulation of motifs and rows. Gibbs edited *Holst's Music: a Guide* (London, 1995), which was left unpublished by its author A.E.F. Dickinson; he has written several articles on Holst.

WORKS

(selective list)

Dramatic: Verity Street (op, 2, Gibbs), 1981; incid music for radio

MALCOLM BOYD

Gibbs, Cecil Armstrong (*b* Great Baddow, Essex, 10 Aug 1889; *d* Chelmsford, 12 May 1960). English composer. He read history and music at Trinity College, Cambridge (BA 1911, MusB 1913) where he received help and tuition from Edward Dent and Charles Wood. He then taught at Copthorne School, East Grinstead, and, having been refused by the army on medical grounds, worked at the Wick School, Hove, from 1915. Gibbs commissioned Walter de la Mare to write a play, *Crossings*, for the school in 1919. This production (stage-managed by Dent) brought Gibbs into personal contact with de la Mare, who was to become his lifelong friend and inspiration; Adrian Boult conducted Gibbs's music for the play and was so impressed that he offered Gibbs the financial backing to enable him to take up composition professionally. Gibbs moved to Danbury, Essex, where he lived for the rest of his life except for a five-year 'exile' in Windermere during World War II. He studied for a year at the RCM with Vaughan Williams for composition, Charles Wood (theory) and Boult (score-reading, conducting). Gibbs subsequently served on the staff of the RCM (1921–39). His active and enthusiastically pursued career as a festival adjudicator spanned the years 1923–52, and he held office as vice-president of the British Federation of Music Festivals 1937–52. He was awarded the Cambridge MusD in 1931.

Gibbs published a wealth of music for choirs and amateur orchestras. His dream of making a living as a theatre composer faded after *Midsummer Madness* closed in 1924, and he was unlucky that his ambitious choral symphony *Odysseus* missed its first performance because of the outbreak of war. Nevertheless, Gibbs achieved great commercial success with his slow waltz, *Dusk*. His substantial output of songs, many of them of high quality, ensure his continuing recognition as a fine exponent of the genre. In the 1990s, recordings of some of his solo songs and his First and Third symphonies kindled a renewed interest in his work as a whole.

STEPHEN BANFIELD/RO HANCOCK-CHILD

Gibbs, Joseph (*b* Colchester, 12 Dec 1698; *d* Ipswich, 12 Dec 1788). English organist and composer. He was the son of John Gibbs, a Colchester wait, and was presumably trained by his father, though he may also have studied in London. *GB-Ckc* 121, a volume of keyboard music and violin sonatas apparently in his hand, contains music by Handel, Babell, Pepusch, Corelli and a copy of Thomas Roseingrave's *Eight Suits of Lessons* (London, 1728). Gibbs seems to have lived in Colchester until he became organist of Dedham in about 1744, and regularly promoted concerts in the area. He was appointed organist of St Mary-le-Tower in Ipswich in 1748, and the next year the churchwardens there ensured he moved from Dedham by offering to raise his salary to £12 a year 'if he comes to reside in the town'; however, he continued to play a prominent role in the musical life of the whole region.

He was a friend of Thomas Gainsborough, who painted his portrait (see illustration), and they were both members of the Ipswich Musical Society; a lost Gainsborough sketch of one of its meetings apparently featured him in the audience, asleep. He was married and had at least six children. According to his obituary in *The Gentleman's Magazine*, he was 'eminently distinguished, both as a composer and performer', and 'the mildness, simplicity and integrity of his manners rendered him universally beloved and respected'. He was given a civic funeral at St Mary-le-Tower on 18 December 1788. His effects, including music, instruments and two Gainsborough paintings, were sold at Ipswich on 21 March and 27 June 1789.

Gibbs is best known for his *Eight Solos for a Violin with a Thorough Bass for the Harpsicord or Bass Violin* (op.1; London, 1746/*R*), published for the author with a subscription list that includes William Boyce and Maurice Greene as well as many local musical figures. They are inventive, accomplished and often technically demanding works in an idiom heavily influenced by Geminiani and M.C. Festing. By contrast, his *Six Quartettos for Two Violins, a Tenor and Violoncello or Harpsichord* (op.2; London, 1777) are often clumsy and apparently incompetent, though it is hard to say whether the solecisms are

Joseph Gibbs: portrait by Thomas Gainsborough, c1755 (National Portrait Gallery, London, on deposit Beningbrough Hall)

the result of old age, careless proofreading or a botched attempt to modernize some existing trio sonatas. He also wrote five organ voluntaries (*GB-Lbl* Add.63797), which are surprisingly varied in style and range from an archaic 'Double Voluntary' with Purcellian trumpet imitations to elegant works in the two-movement idiom popularized by John Stanley.

PETER HOLMAN

Gibbs [Gibbes], **Richard** (*b* ?late 16th century; *d* ?mid-17th century). English organist and composer. He was appointed organist of Norwich Cathedral in 1622 and from Michaelmas 1629 Master of the Choristers, posts which he held nominally until 1649 although choral services were discontinued in 1643. He is described as 'Organist of Christ Church, Norwich [Norwich Cathedral]', in Clifford's *Divine Services*, beside the words of his anthem *See, sinful soul*, a substantial work, lacking at least one high voice part, which resembles the larger-scale verse anthems of John Bull and Dering. A further anthem, *If the Lord himself* (in Clifford's *Divine Services*), and a service in C major (*GB-DRc* MSC 18), sometimes attributed to Gibbs, are by John Gibbs, Master of the Choristers of Westminster Abbey in the early 17th century.

Thomas Gibbs, possibly a relative of Richard Gibbs, was organist at Norwich Cathedral from 1664 until he succumbed to the plague in 1666. He may also have been the Gibbs who was organist at Canterbury Cathedral between 1661 and 1663. Thomas Gibbs contributed a number of two-part dances to Playford's *Courtly Masquing Ayres* (1662).

WORKS

Have mercy upon me, O God, 4vv, 1635, *GB-Lbl*, *Cu*; version for 2vv in 1663[6]

See, sinful soul, for Good Friday, verse, *DRc*, *Lbl*, *Y*, all inc.

Lord, in thy wrath, text only in J. Clifford, *Divine Services and Anthems* (London, 2/1664)

PETER ASTON, TOM ROAST

Gibelius [Gibel], **Otto** (*b* Burg auf Fehmarn, 1612; *d* Minden, 20 Oct 1682). German composer, theorist and teacher. In 1629 he fled from a plague in Burg (of which his father died) and moved to Brunswick to live with relatives. In 1631 he began to study both theoretical and practical music with Heinrich Grimm (who had himself studied with Michael Praetorius). After three years' study he became Kantor at Stadthagen. He remained there until 1642, when he was appointed a teacher at the Gymnasium, and also assistant Kantor, at nearby Minden. Six years later he was made Kantor, a position he held for the rest of his life.

Although he lived in relative obscurity, Gibelius was well known throughout Germany as a teacher, composer and particularly as a theorist. His treatises were referred to frequently by other writers on music theory well into the 18th century. As late as 1740 Mattheson could say of him: 'I believe that thousands have gone to universities and spent many years there without becoming the equal of this man who had never attended one'. His significance for music historians is as an observer and teacher of German music theory. His five brief books are primarily instruction manuals for teaching singing in church schools. He was an erudite scholar who had read widely in most of the major treatises of antiquity as well as in those of the 16th and 17th centuries. He singled out Grimm, Lippius and Baryphonus as the most important writers to influence his own publications. In his *Bericht von den vocibus musicalibus* (1659) he proposed a 14-note octave, for which he constructed a keyboard including both D♯ and E♭ and G♯ and A♭. Of his compositions only two brief funeral cantatas are extant.

GEORGE J. BUELOW

Gibelli, Lorenzo [Gibellone] (*b* Bologna, 24 Nov 1718; *d* Bologna, 5 Nov 1812). Italian singing teacher and composer. Endowed with a voice encompassing the bass, baritone and alto ranges, he studied singing and counterpoint with Martini. In 1744 he was appointed *maestro di cappella* in the church of S Salvatore in Bologna and in 1749 became a member of the Accademia Filarmonica, of which he was elected *principe* five times from 1753 to 1810. He was also *maestro di cappella* in other churches of Bologna, such as the Oratorio di S Filippo Neri (1762), and at the Arciconfraternita di S Maria della Morte (1773), and *maestro al cembalo* of the Teatro Comunale.

Gibelli was one of the most celebrated singing teachers of his day. Among his most successful pupils were the castratos Crescentini and Francesco Roncaglia and the tenor Matteo Babbini. In 1804 he was appointed professor of singing at the new Liceo Filarmonico, where he gave some lessons to the young Rossini. Pancaldi listed 467 religious compositions found in the possession of Gibelli's wife, Gertrude Gibelli Fornasari; a much smaller number survive. All modelled on the style of Martini, they demonstrate a solid knowledge of academic counterpoint combined with a melodic flexibility that caused Gibelli to be called 'Gibellone dalle belle fughe'; some of the themes, according to Pancaldi, were based on popular tunes.

WORKS

GIORGIO PESTELLI

Gibert, Paul-César (*b* Versailles, 1717; *d* Paris, 1787). French singing teacher and composer. While very young he was sent to Naples by his father, an officer of the *maison du roi*. He probably took music lessons there with several conservatory masters, and he eventually recruited Italian singers, the popular Antoine Albanese among them, for the Chapelle Royale in Paris. On his return to France about 1750, Gibert apparently lived as a teacher of singing and composition, and also became known as a composer of *opéras comiques*. Of these, *La fortune au*

village (1760), *Soliman second, ou Les trois sultanes* (1761) and *Apelle et Campaspe* (1763) are the most notable. *La fortune au village*, performed when the Comédiens Italiens returned to their (remodelled) theatre at the Hôtel de Bourgogne after a summer's absence, was Gibert's first real *comédie mêlée d'ariettes*, in which vaudeville timbres had been completely eliminated. It was received favourably by the *Mercure de France* as the work of a 'young musician [he was already 43] of considerable promise and taste'. *Soliman second* was at once a chef d'oeuvre of C.-S. Favart, a highpoint in the theatrical career of Mme Favart, and an important and influential work in the development of the 18th-century 'Turkish' opera, of which Mozart's *Die Entführung aus dem Serail* is the crowning representative. The lack of success of the historical *comédie héroïque, Apelle et Campaspe* was probably occasioned principally by the volatile personality of its librettist, A.A.H. Poinsinet. Gibert's music, though Grimm found it 'detestable', is of quite high quality.

After composing three motets, *Diligam te*, *Confitebor tibi Domine* and *Laetatus sum* (1766–8), all successfully performed at the Concert Spirituel, Gibert returned to stage works with a serious opera, *Deucalion et Pyrrha* (1772); after its performance he reportedly received a gold medal valued at 300 livres. His commitment to teaching was particularly strong during the last two decades of his life; his *Solfèges, ou Leçons de musique*, usually dated 1783, had already appeared in print in late 1769. It was followed by two lesser-known printed collections: *Mélange musical: premier recueil* (Paris, 1775), and *IIme recueil d'airs nouveaux* (Paris, ?1783). The first of these is by far the more substantial, containing everything from occasionally awkward Italianate *ariettes*, often borrowed from his own *opéras comiques*, to highly developed dramatic scenes in the manner of Rameau or Gluck. Many pieces are parodied after solfège exercises from the 1769 publication. Despite a pervasive Italian character, Gibert's frequent use of rondeau and *romance* forms, the parallel minor, and diminished chords clearly allies him first to Rameau, and then more particularly to Grétry. The strong influence of Gluck in the dramatic scenes is not surprising, yet it reveals one of Gibert's major weaknesses as a composer, his tendency towards imitation rather than originality.

WORKS

unless otherwise stated, all stage works first performed in Paris at the Hôtel de Bourgogne by the Comédiens Italiens

Soliman second, ou Les trois sultanes (cmda, 3, C.-S. Favart, after J.F. Marmontel), 9 April 1761 (Paris, n.d.)
La fausse Turque (oc, 1, P.-N. Brunet), Paris, Foire St Laurent, 3 July 1761
Apelle et Campaspe (oc, 2, A.A.H. Poinsinet), Paris, OC (Bourgogne), 21 April 1763 (Paris, n.d.)
Deucalion et Pyrrha (?opéra-ballet, 4, C.H. Watelet), Paris, Vauxhall de la Foire St Germain, 29 April 1772, lost
Parodies: La Sybille [A. Dauvergne: Les fêtes d'Euterpe] (Harny de Guerville), 21 Oct 1758 (Paris, n.d.); Le carnaval d'été, ou Le bal aux boulevards [J.J. Mondonville: Le carnaval du Parnasse] (1, A.J. Labbet de Morambert and A.J. Sticotti), 11 Aug 1759; La fortune au village [P. de La Garde: Aeglé] (1, M.-J.-B. Favart, C.-S. Favart and M. Bertrand), 8 Oct 1760 (Paris, 1761)

OTHER WORKS

Solfèges, ou Leçons de musique (Paris, 1769)
Mélange musical: premier recueil (Paris, 1775)
IIme recueil d'airs nouveaux (Paris, ?1783)
Traduction de Catulle, vv, orch/kbd/hp (Paris, 1775) (cited in *MGG1*)
3 motets, perf. Paris, Concert Spirituel, 1766, 1768

KENT M. SMITH

Gibson. American firm of fretted string instrument makers. It was founded by Orville H. Gibson (*b* Chateaugay, NY, 1856; *d* Ogdensburg, NY, 21 Aug 1918) in Kalamazoo, Michigan. He began making instruments in the 1880s, and the Gibson name was established as a marque in 1894; mandolins dominated Gibson's output until the mid-1920s. In the 1880s he began to apply violin construction techniques to the production of flat-back mandolins, and Gibson's scroll-body F-model and pear-shaped A-model mandolins dominated their market until the 1920s. Before the turn of the century Gibson was making arch-top guitars with oval soundholes, based on the construction techniques he had been using for mandolins.

In 1902 a group of businessmen joined Gibson to form the Gibson Mandolin-Guitar Manufacturing Co., Ltd, later renamed the Gibson Mandolin-Guitar Mfg. Co. (1904), then the Gibson Mandolin-Guitar Co. (1906). O.H. Gibson left in 1903; he received a regular royalty from the company until 1908 and then a monthly income until his death. In 1917 the company moved to new premises on Parsons Street, Kalamazoo, which it occupied until 1984.

In the 1920s banjos became Gibson's most important product; they were later superseded by guitars. In 1923 Gibson introduced the L-5, the first f-hole guitar, designed by Lloyd Loar, which was one of the earliest models to have a neck strengthened with a truss rod – another Gibson innovation. The years following World War I also saw the unveiling of a harp-guitar (based on an invention by O.H. Gibson patented in 1908), several types of banjos including those in the Mastertone series (1918–25; for illustration *see* BANJO, fig.1*a*), and the F-5 (an f-hole mandolin, 1922). In an attempt to compete with Martin Dreadnought guitars, Gibson entered the market for flat-top instruments in 1934 with the Jumbo model; the Super Jumbo (subsequently J-200) model appeared four years later. At the same time Gibson introduced its first electric guitars, the Electric Hawaiian steel guitar (1935) and the Spanish hollow-bodied ES-150 (1936).

The company became Gibson, Inc., in 1924 and in 1944 was taken over by the Chicago Musical Instrument Co., which in 1969 was bought by Norlin Industries. In 1952 Gibson introduced the solid-body Les Paul electric guitar (for illustration *see* ELECTRIC GUITAR, fig.1), and the factory changed progressively to electric guitar production. Throughout the following decades Gibson introduced several more solid-bodied electric guitars, including the Flying V (1958), Explorer (1958), and Firebird (1963) models, all of which had unorthodox body shapes, as well as the semi-hollow ES-335 (1958).

In 1957 Gibson acquired the Epiphone marque and in the 1970s moved production of Epiphone guitars to Japan. A plant was opened in Elgin, Illinois, in 1973 to produce pickups and strings (the firm had sold its own brand of strings from 1907), and in June 1975 a large factory for the production of guitars was opened in Nashville, principally because the overcrowded Kalamazoo site was unable to meet the demand for electric guitars. In the early 1980s it reduced its staff and in 1984 all manufacturing was moved to Nashville. In 1986 the firm was sold to Henry Juskiewicz, David Berryman and Gary Zebrowski.

Gibson's instruments have traditionally been among the most elegant and costly in their class, and the best examples are highly sought after by musicians and collectors; the firm set standards for appearance and sonic quality that influenced many instrument makers throughout the world.

TONY BACON/R

Gibson, Sir **Alexander (Drummond)** (*b* Motherwell, 11 Feb 1926; *d* London, 14 Jan 1995). Scottish conductor. He studied piano at the Royal Scottish Academy of Music, and read music at Glasgow University. On his return from military service in 1948 he won a scholarship to the RCM, London, later studying with Markevich at Salzburg and van Kempen at Siena. In 1951 he joined the Sadler's Wells Opera as a répétiteur, and made his professional début there the following year conducting *The Bartered Bride*. Gibson next spent two years (1952–4) as associate conductor of the BBC Scottish SO, gaining experience of the concert repertory before returning to Sadler's Wells as a staff conductor. In 1957 he became the company's youngest musical director, and made his Covent Garden début that year. At Sadler's Wells he conducted 26 operas, including the première of John Gardner's *The Moon and Sixpence* (1957). He also began to appear more widely as a symphonic conductor with British and foreign orchestras, but forsook his London appointment in 1959 to become the Scottish National Orchestra's first native principal conductor and artistic director, a post he held until 1984.

Gibson remained based in Scotland, where he made the (Royal) Scottish National Orchestra a vital influence on the national as well as the regional scene. Contemporary music featured prominently in his programmes, and he introduced numerous new works including several by Henze, and Stockhausen's *Gruppen* at Glasgow in 1961, six years in advance of London. In 1962 he helped to form Scottish Opera, of which he also became artistic director, conducting the first complete performance of Berlioz's *Les Troyens* (1969), the first German-language *Ring* cycle in Scotland (1971) and premières of operas by Orr and Hamilton.

Gibson made his American début in 1970 with the Detroit SO, and toured in North and South America as well as in most European countries. In 1981 he became principal guest conductor of the Houston SO. A firm orchestral disciplinarian, he developed a persuasive skill over a broad stylistic range, often achieving distinction in performance, perhaps most memorably in his colourful, grandly conceived 1971 *Ring* cycle. Among his recordings are Mozart's complete works for violin and orchestra (with Szeryng and the NPO), a cycle of Sibelius symphonies and tone poems (with the Scottish National Orchestra) and scenes from *Les Troyens* (with Janet Baker and the LSO). He was made a CBE in 1967, knighted in 1977, and became president of the Royal Scottish Academy of Music in 1991.

NOËL GOODWIN

Gibson, Jon (Charles) (*b* Los Angeles, CA, 11 March 1940). American composer, woodwind instrumentalist and graphic artist. He studied at Sacramento State University and with Henry Onderdonk and Wayne Peterson at San Francisco State University (BA 1964). In San Francisco and, after 1966, in New York he performed in early works of Reich (including the 1967 *Reed Phase* that Reich wrote for him, and the première of *Drumming* in 1971); Riley (the première of *In C*, 1964); and La Monte Young (as a member of the drone ensemble The Theatre of Eternal Music in 1970). He was a founding member of the Philip Glass Ensemble, in which he has performed since 1968, the year Glass dedicated the soprano saxophone solo *Gradus* (originally entitled for Jon Gibson) to him. He has frequently performed in a duo with Glass and has collaborated with such composers as Christian Wolff, Behrman, Budd, Curran and Rzewski. The dancer-choreographers for whom he has written and performed include Nancy Topf (*The Great Outdoors*, 1976), Margaret Jenkins (*Equal Time*, 1976), Merce Cunningham (*Fractions*, 1977, and other projects), Lucinda Childs (*Relative Calm*, 1981), Elaine Summers (*Solitary Geometry*, 1983), Simone Forti (*Framing Music*, 1992) and Elisabetta Vittoni (*La Spezia*, 1993). An accomplished graphic artist, Gibson also provided the visual elements (slide projections and video) for several of these performances. His visual work is most often a structural representation of some aspect of a musical composition (e.g. in the second book of *Melody III*, 1975). He collaborated with French artists Tania Mouraud and Kuntzel on the gallery installation *Trans* (1977), with video artist Peter d'Agostino on *Teletapes* (1981), *Double You (and XYZ)* (1985) and *Transmissions* (1987–8), and with JoAnne Akalaitis on the music-theatre piece *Voyage of the Beagle* (1983–7). In 1985 he produced the computer animation *Interval 30.9A*.

Gibson began his own early experimental work as an improviser and composer, performing in the New Music Ensemble with the composers Larry Austin, Richard Swift and Stanley Lunetta. His compositions reveal the underlying minimalist, postmodernist vocabulary which he helped pioneer. Other major influences are jazz, which he studied from his teenage years onwards, notably with

saxophonist John Handy in the early 60s; and South Indian vocal music which he studied at the Ali Akbar School. The Indian musicians Pandit Pran Nath, Bismillah Khan and Mahalingam have been especially important. Gibson's style ranges widely from the multi-track density of *Visitations* – an 'environmental soundscape' incorporating layers of ocean, bird, percussion and wooden flute sounds – which anticipates and has rarely been equalled by practitioners of ambient and New Age music, to the austere sustained-tone harmonics of *Cycles*; and from the medieval-tinged additive process of *Song I* and *II* to the pristine lyricism of jazz-flavoured ballads such as 'Mont Blanc', from *Voyage of the Beagle*.

WORKS

Stage: Voyage of the Beagle (music theatre, J.A. Akalaitis), 1983–7; Extensions (dance score, choreog. L. Childs), s sax, tape, 1980; Q-Music (dance score, choreog. Childs), small ens, 1980; Relative Calm (dance score, choreog. Childs), small ens, tape, 1981

Vocal: Running Commentary (A–Z), 1 or more vv, 1980–87; Running Commentary (Arbitrary Excerpts), 1v, small ens, 1992; Talk is Cheap, 1v, small ens, 1996; Big Fish Little Pond, 4vv, 1997

Inst: Single Stroke Bell, perc, opt. insts, 1968; 30's, any insts, 1970; Fluid Drive, ens, 1972 [version of Visitations, tape, 1972]; Fl Duet, 1972; Multiples, any melody insts, 1972; Song I, small ens, 1972, II, small ens, 1973–4, IV, small ens, 1978–9; Untitled, 1–3 melody insts, 1974–5; Melody IV, parts 1 and 2, 9 insts, 1975; 32/11, 1 inst, opt. kbd, 1975; Return, small ens, 1979; Variations, small ens, 1980; Waltz, open insts, 1982; No Tango, small ens, 1983; Full Circle, kbd/small ens, 1987, rev. 1989; Essence, small ens, 1988; It Doesn't Matter, small ens, 1988; Turn of Events, 2 pf, 1990; Southern Climes, small ens, 1993; Chorales from Relative Calm, small ens, 1993; Waltz for Orch, 1995; Lines, small ens, 1996; Unfinished Business I, small ens, 1997; Changes, 4 melody insts

Solo inst (for 1 melody inst unless otherwise stated): Melody I, prep pf, 1973, Melody II, 1973; Cycles, org, 1973; Song III, s sax, 1976; Equal Distribution I, 1977; Recycle I, II, 1977; Call, 1978; Equal Distribution III, 1978; One, Two, Three, 1978–9; Criss Cross, 1979; Ballade, 1986–8; Companion Piece, 1989; La Spezia, pf, 1991; Surface Tension, 1993; Fanfare I, 1993; Chrome, 1995; A Rose It Isn't, 1997

Tape: Who are You, 1966; Vocal/Tape Delay, 1968; Visitations: an Environmental Soundscape, tape collage, 1968–72, arr. live ens as Fluid Drive, 1972; Radioland, 1972; Melody III, tape, slides, 1975; Jungle Collage, tape, insts, 1983 [incl. in Voyage of the Beagle]

Other: RSFVHF (Rhythm Study for Voice Hands Feet), pfmr, 1974, arr. video tape, 1974; One Way, video tape, 1976; Interval, video tape, 1985 [incl. 30's with graphic score]

EDWARD STRICKLAND

Gidayu. *See* TAKEMOTO GIDAYŪ.

Gideon, Miriam (*b* Greeley, CO, 23 Oct 1906; *d* New York, 18 June 1996). American composer. Early in life, she studied the piano with Hans Barth, Felix Fox and her uncle Henry Gideon, an organist and choral director. She later received degrees from Boston University (BA 1926), Columbia University (MA 1946) and the Jewish Theological Seminary (DSM 1970) and studied composition privately with Saminsky (1931–4) and Sessions (1935–43). She taught at Brooklyn College (1944–54) and City College, CUNY (1947–55, 1971–6), the Jewish Theological Seminary (1955–91) and the Manhattan School of Music (1967–91). Her honours included awards and commissions from the Ernest Bloch Society, the Ford and Rockefeller foundations and the Elizabeth Sprague Coolidge Foundation, among others. In 1975 she was elected to the American Academy and Institute of Arts and Letters.

Gideon did not rely on a preconceived compositional system but let each work suggest its own style and form; her musical language can be described as freely atonal. Its prevailing lyricism at times is contrasted by a pointed and dramatic intensity: textures are 'characterized by lightness, the sudden exposure of individual notes, constantly shifting octave relationships [and] a technique that imposes economy and the exclusion of irrelevancies' (Perle). Fascinated by the idea of setting a poem in more than one language, she often used both the original language and a translation within a single composition. In *Steeds of Darkness* (1986), for example, a setting of an Italian poem by Felix Pick is followed by its English 'recreation', based on a poem by Eugene Mahon. In Gideon's own words, the setting of Mahon's poem 'extracts at white heat the fantasy of the original poem'. Together, the settings exhibit a striking musical reflection on death's 'relentless and despairing chase'.

WORKS

OPERA

Fortunato (3 scenes, Gideon, after S. and J. Quintero), S, Mez, T, Bar, orch/pf, 1958

VOCAL

Choral: Slow, Slow Fresh Fount (B. Jonson), SATB/TTBB, 1941; Sweet Western Wind (R. Herrick), SATB, 1943; How Goodly are thy Tents (Ps lxxxiv), SSA/SATB, org, pf, 1947; Adon olom [Master of the World] (Heb. liturgy), S, A, T, SATB, ob, tpt, str orch, 1954; The Habitable Earth (Bible: *Proverbs*), S, A, T, B, SATB, ob, pf/org, 1965; Spiritual Madrigals (F. Ewen, S. von Trimperg, H. Heine), TTB, bn, va, vc, 1965; Sacred Service for Sabbath Morning (Heb. liturgy), cantor, S, A, T, B, SATB, fl, ob, bn, tpt, org, va, vc, 1970; Shirat Miriam l'shabbat (Heb. liturgy), cantor, SATB, org, 1974; Where Wild Carnations Blow – a Song to David, solo vv, SATB, inst ens, 1983

Song cycles: Sonnets from Shakespeare, 1v, pf/(tpt, str qt/str orch), 1949; 4 Epitaphs (R. Burns), 1v, pf, 1952; Songs of Voyage (J.P. Peabody, F. Wilkinson), 1v, pf, 1961; The Condemned Playground (Horace, J. Milton, G. Spokes, S. Akiya, C.P. Baudelaire, E. St Vincent Millay), S, T, fl, bn, str qt, 1963; Rhymes from the Hill (C. Morgenstern), med v, cl, mar, vc, 1966; Songs of Youth and Madness (F. Hölderlin, trans. M. Hamburger), high v, orch, 1977; Ayelet hashakhar [Morning Star] (C.N. Bialik, M. Stekelis, L. Goldberg), med v, pf, 1980; Wing'd Hour (C. and D.G. Rossetti, W. de la Mare), med v, pf/(fl, ob, vib, vn, vc), 1983; Creature to

Creature (N. Cardozo), med high v, fl, hp, 1985; Poet to Poet: an Ode to Ben Jonson (R. Herrick, Byron, A.C. Swinburne), high v, pf, 1987; The Shooting Starres Attend Thee (R. Herrick, T. Carew, S. Menashe), high v, fl, vn, vc, 1987; 8 other song cycles, 1952–81
Songs: The Hound of Heaven (F. Thompson), med v, ob, vn, va, vc, 1945; Little Ivory Figures (A. Lowell), low/med v, gui, 1950; The Adorable Mouse (Gideon, after J. de La Fontaine), low v, fl, cl, bn, hpd, timp, 1960 [arr. nar, pf/(fl, cl, 2hns, pf, timp, str)]; Steeds of Darkness (F. Pick, E. Mahon), high v, fl, ob, vc, pf, perc, 1986; Böhmischer Krystall (A. Giraud, trans. O.E. Hartleben), high v, fl, ob, cl, bn, vc, pf, 1988; Songs from the Greek for Pipes and Strings (ancient Gk. poets), Mez, ob, cl, bn, pf, 1989; 24 songs, lv, pf, 1929–66

INSTRUMENTAL

Orch: Epigrams, suite, chbr orch, 1941, unpubd; Lyric Piece, str, 1941; Symphonica brevis, 1953
Chbr: Lyric Piece, str qt, 1941 [arr. str orch]; Str Qt, 1946; Divertimento, ww qt, 1948; Fantasy on a Javanese Motive, vc, pf, 1948; Sonata, va, pf, 1948; Air, vn, pf, 1950; Biblical Masks (vn, pf)/org, 1960; Sonata, vc, pf, 1961; Suite, cl/vn, pf, 1972; Fantasy on Irish Folk Motives, ob, bn, va, perc, 1975; Trio, cl, vc, pf, 1978; Eclogue, fl, pf, 1988; Rondo appassionato, vc, pf, perc, 1990

LINDA ARDITO

Gidino da Sommacampagna (*fl* Verona, 14th century). Italian poet and theorist. He lived at the court of the Scaligers at Verona under Mastino II, Bartolomeo and Antonio, and dedicated to Antonio his *Lo tractato et la arte de li rithimi volgari*, written between 1381 and 1384 (edited by G.B.C. Giuliari as *Trattato dei ritmi volgari*, Bologna, 1870/*R*). This is a treatise on metrics, with examples, in which Gidino described the main poetic forms of the 14th century: sonnets, ballatas or canzoni, *rotondelli, marighali, serventesi* and *moti confetti*. The text is derived from the treatise by Antonio da Tempo, but the examples are Gidino's own. Music is mentioned in connection with the ballata and the polyphonic madrigal.

F. ALBERTO GALLO

Gieburowski, Wacław (*b* Bydgoszcz, 6 Feb 1878; *d* Warsaw, 27 Sept 1943). Polish musicologist, conductor and composer. Ordained priest in 1902, he studied music at Regensburg with Haberl and Haller and musicology with Kinkeldey in Breslau (Wrocław) and with Wolf and Kretzschmar in Berlin. He took the doctorate at Breslau in 1913 with a dissertation on a 15th-century treatise. From 1925 to 1939 he was an assistant professor at the University of Poznań. He also taught at the Poznań Conservatory and at the theological seminary. From 1916 he was conductor of the Poznań Cathedral Choir and succeeded in making it one of the finest choirs in Poland between the wars. His main interest was church music, both early and contemporary. He was responsible for several editions and composed a number of church works himself.

ZYGMUNT M. SZWEYKOWSKI

Giegling, Franz (*b* Buchs, nr Aarau, 27 Feb 1921). Swiss musicologist. He studied the piano with Walter Frey and theory with Paul Müller at the Zürich Conservatory, where he gained a theory teaching diploma in 1950. He studied musicology with Kurth at Berne University and with Cherbuliez at Zürich University, where he obtained the doctorate in 1950 with a dissertation on the importance of Torelli in the history of the solo concerto. He was music critic of the *Neue Zürcher Zeitung* (1947–53) and made extensive studies in Italy of the Baroque concerto. In 1960 he qualified at Basle as a sound engineer, and worked in this capacity at Radio Zürich until 1967, when he became editor for music broadcasts including speech at Radio Basle; he was also the artistic planning manager of the Basle RSO, 1972–7. He became a member of the editorial board of the Gluck collected edition in 1992.

Giegling had worked principally on the music of the Italian Baroque and Mozart. In 1954 he became a contributor to the new Mozart collected edition; he was co-editor of the revised sixth edition of the Köchel catalogue, and in 1969 he joined the Zentralinstitut für Mozartforschung, Salzburg. He edited a number of volumes for the Mozart collected edition and many 18th-century north Italian instrumental works.

JÜRG STENZL

Gielen, Michael (Andreas) (*b* Dresden, 20 July 1927). Austrian conductor and composer. A son of the producer Josef Gielen and nephew of Steuermann, he studied the piano and composition with Erwin Leuchter in Buenos Aires (1942–9) and with Polnauer in Vienna (1950–53). He began his career in Buenos Aires as a pianist (during 1949 he performed Schoenberg's complete piano works) and as a répétiteur at the Teatro Colón (until 1950). From 1951 to 1960 he was répétiteur and conductor at the Vienna Staatsoper, and during this period he conducted radio and concert performances of contemporary music, including works of his own. He was principal conductor at the Royal Opera of Stockholm from 1960 until 1965, when he left for Cologne; there he was responsible for the première of Zimmermann's *Die Soldaten* (1965). In 1969 he was appointed principal conductor of the Belgian National Orchestra, in 1973 principal conductor of the Netherlands Opera, and in 1977 director of opera at Frankfurt, a post he held until 1987. From 1978 to 1981 Gielen was chief guest conductor of the BBC SO, and from 1980 to 1986 music director of the Cincinnati SO. In 1986 he became chief conductor of the SWF SO, Baden-Baden, and the following year was appointed professor of conducting at the Salzburg Mozarteum. During the 1990s he developed a close relationship with both the Berlin SO and the Berlin Staatsoper, and in 1995 made his Salzburg Festival début with *Lulu*.

Gielen's performances are marked by a sharp, analytic intellect, coupled with an ability to present music with force and vitality. His facility in mastering complex avant-garde scores has earned him a high reputation in this field; he has been involved in many first performances (including those of Ligeti's Requiem, Stockhausen's *Carré*, Zimmermann's *Requiem für einen jungen Dichter* and Henze's *Dramatische Szenen aus 'Orpheus'*) and has recorded works by Kagel, Ligeti, Nono, Zimmermann and many others. Of earlier 20th-century music, he has been most associated with Mahler, Schoenberg, Berg and Webern, making the first commercial stereo recording of *Moses und Aron* in 1974. He has also given distinctive performances of works from the Romantic and Classical periods and has recorded a Beethoven symphony cycle with the SWF SO; his operatic repertory includes Mozart and Wagner, as well as *Falstaff*, to which he brings a Toscaninian dry brilliance and clarity.

In Gielen's earlier compositions, the influence of the Second Viennese School is strong. For example, the *Vier Gedichte von Stefan George* have quite patent serial structures, in which the range of harmony is firmly restricted, somewhat in the manner of Webern, while the orchestration owes much to Schoenberg's op.22; the use of George texts, too, is obviously significant. In later works Gielen has absorbed the techniques and aesthetics of more recent music.

WOLFRAM SCHWINGER/MARTIN ELSTE

Giero, Jhan. *See* GERO, JHAN.

Gieseking, Walter (*b* Lyons, 5 Nov 1895; *d* London, 26 Oct 1956). German pianist. The son of a distinguished German doctor and entomologist, he spent much of his childhood in southern France and Italy. He began to play the piano at the age of four but received no consistent tuition until the age of 16 when he worked with Karl Leimer at the Hanover Conservatory (1911–13). At the age of 20 he played a virtually complete cycle of Beethoven's sonatas in Hanover. His Berlin début in 1920 was so successful that he stayed on in the city to give seven further concerts in which his refined artistry in Debussy and Ravel was already evident. An intensive international career followed. Gieseking gave his first London recital in 1923, and the same year he gave with Fritz Busch the first performance of Pfitzner's Piano Concerto. His American début (in Hindemith's concerto) followed in 1926, and his Paris début in 1928. But his career was blighted when he was blacklisted as a Nazi sympathizer, a taint which provoked continuing hostility in the USA and led him to confine his career for some time to Europe, South America and Japan. After being cleared of cultural collaboration with the Nazis, he returned triumphantly to the USA in 1955 (when he gave an all-Debussy programme in Carnegie Hall) and in 1957. He later gave a series of masterclasses at the Musikhochschule in Saarbrücken where he focussed on the problems of transcending difficulties that are essentially mental rather than physical.

Blessed with a rare photographic and aural memory, Gieseking would often memorize entire scores away from the keyboard before playing them in concert. His repertory was immense (he gave a New York recital in 1930 entirely

devoted to contemporary music), and he recorded all Mozart's solo piano music (1953), a complete Ravel cycle (1956) and virtually all the solo works of Debussy (1951–4). His Mozart has been criticized for its over-exquisite miniaturist approach; but his Debussy, in which his aural sensitivity and pedal technique contributed to the subtlest gradations of tone and colour, has not been excelled. A project to record the complete Beethoven sonatas and much Schubert was left incomplete because of his sudden death. Tchaikovsky and Rachmaninoff also featured in his repertory, and his performance of the latter's second and third concertos revealed an impetuous virtuosity far removed from the luminous delicacy of his Debussy. Gieseking's Debussy recordings, reissued on CD, remain his most enduring legacy.

BRYCE MORRISON

Gievenci, Adam de. *See* ADAM DE GIVENCHI.

Gifford, Helen (Margaret) (*b* Melbourne, 5 Sept 1935). Australian composer. She studied at the University of Melbourne with Le Gallienne, who influenced her decision to become a full-time composer when she graduated (MusB) in 1958. In that year her second work, *Fantasy* for flute and piano, had its first performance and broadcast, in the Netherlands. In 1964 her *Phantasma* for string orchestra was chosen by the Australian jury for submission to the ISCM Festival, Copenhagen. She won the Dorian Le Gallienne Award for composition in 1965, and in 1974 she held a senior composer's fellowship from the Australian Council for the Arts and was composer-in-residence to the Australian Opera. She was attached to the Melbourne Theatre Company as composer of incidental music from 1970 to 1982 and in 1980 was appointed to the Australia Council's Artists in the Schools programme. She has been involved with several arts organizations and was chairman of the Composers' Guild of Australia, 1976–8. In 1996 she was awarded an Order of Australia medal for her services to music. She also received a degree (DLitt) from Monash University.

A sensitive and individual composer, Gifford was at first influenced by the music of the French Impressionists. Travel in Europe in 1962 brought her into direct contact with contemporary idioms, and she has remained indebted to Lutosławski and the Polish school in general. Her travels in India in 1967 and a visit to Indonesia in 1971 brought the increasing influence of Asian music into her work. Several of her scores for the Melbourne Theatre Company have been produced as the result of experimental workshops. Her music, though apparently using serially derived atonalism, is best described as being free of tonal orientation, with its delicate textures relying at times on tensions created through percussive and vocal counter-effects. The intricacy of her finely wrought scores reveal an assured but nonconformist style.

THÉRÈSE RADIC

Giga (It.). *See* GIGUE (i).

Gigault, Nicolas (*b* ?Paris, *c*1627; *d* Paris, 20 Aug 1707). French organist and composer. According to documentation by Hardouin his parents were without expectation of heirs as late as May 1626, so the earlier date of birth deduced by Pirro cannot be correct. That the family lived in poverty is indicated by a document of 1648 in which, following the death of their father, Gigault and his brothers renounced their rights of succession to avoid his debts. But the contract relating to the first of his two marriages, in 1662, shows him already prosperous and the owner of an extensive collection of instruments, including an organ, several harpsichords, spinets and clavichords and a number of string instruments (there is evidence that he was also a string player who was sometimes engaged for important Parisian orchestral performances). He held four positions as an organist in Paris – at St Honoré (1646–52), St Nicolas-des-Champs (1652 until his death), St Martin-des-Champs (from 1673) and the Hôpital du Saint Esprit (from 1685) – and his repute is shown by a 1695 tax roll of keyboard players in which his name is inscribed among those of the first rank, along with such men as D'Anglebert and Couperin. He was twice involved in lawsuits, the first time in a vain attempt to recover damages from one Janson, the printer of his 1683 *Livre de musique*, the second in 1693 in connection with the long legal process between the *ménétriers* and the keyboard players of Paris. A document pertaining to the latter suit lists him as a teacher of Lully; in 1706 he was one of a jury that awarded Rameau the post of organist of the church of Ste Madeleine-en-la-Cité. Of his five children three were connected with music, although not as composers.

Lacking a modern edition, Gigault's 1683 volume has been little studied. It contains 20 popular noëls with variations, the earliest example of this genre, besides a few versets based on Christmas plainsongs. Most of the noëls follow a somewhat mechanical scheme, progressing from two to three to four voices, the latter treated 'à 2 choeurs'. The better-known second volume of 1685 contains 183 versets, mostly very brief, in a rather loose arrangement. It begins with three groups of versets for the Ordinary of the Mass followed by a series of pieces arranged according to the church modes; interspersed with these are several settings of plainsong hymns and a series of *Te Deum* versets. More than his contemporaries Gigault remained faithful to the liturgy and to the spirit of Titelouze (whose name he invoked in the preface) through frequent settings of plainsong either as a cantus firmus in bass or tenor or in fugal elaboration, and also through the use of optional cadence points by which the versets may be abbreviated to the needs of the service. A majority of the free pieces are termed 'fugues'; nevertheless in these as well as in the preludes, *récits* and dialogues one sees the secular spirit from dances and *airs* that permeates the later years of the French Baroque organ school, a quality further emphasized by Gigault's continuous use of the 'pointed' style in which virtually all series of quavers are notated in dotted rhythms. Although the preludes contain occasional striking harmonic progressions, Gigault's music is frequently monotonous: in particular he lacks harmonic direction and fails to develop his fugue subjects adequately.

WORKS

Edition: *Nicolas Gigault: Livre de musique pour l'orgue*, ed. A. Guilmant and A. Pirro, Archives des maîtres de l'orgue, iv (Paris, 1902/*R*1972) [contains the music of the 1685 collection, and an allemande from the 1683 publication]

ALMONTE HOWELL/FRANÇOIS SABATIER

Gigler, Andre [Andreas] (*b* Anger, Styria; *d* Graz, Jan 1570). Austrian hymnographer. In 1553 Gigler was a Catholic priest in Graz – at that time a predominantly Protestant city. His *Gesang Postill, das ist: Evangelia auff alle und jede fürnemste Feste durchs gantze Jar in Gesang verfast, vor und nach der Predig zu singen Sampt einem Christlichen Gebet* (Graz, 1574) was the first musical work to be published in Styria, and it represents an outstanding technical achievement on the part of the printer, Andreas Franck. In content the *Gesang Postill* closely followed the Protestant *Sonntagsevangelia* of Nicolaus Herman (Wittenberg, 1561). All of the Gospel readings are presented in identical rhymed, seven-line verses. Like Herman, Gigler supplied only a handful of melodies for use throughout the book; at the back there are some 20 four-part tenor melodies without text and with figured accompaniments. The first ten are well-known Wittenberg melodies; the rest, according to Gigler's introduction, are his own compositions, though they are very close to their Wittenberg models. The four-part arrangements are the work of Johannes de Cleve who was then Kapellmeister at the court in Graz. Gigler's *Gesang Postill* is a thoroughly characteristic example of its kind, stemming from a border area in which religious allegiances had not yet been stabilized.

WALTER BLANKENBURG

Gigli. *See* LILIUS family.

Gigli, Beniamino (*b* Recanati, 20 March 1890; *d* Rome, 30 Nov 1957). Italian tenor. In Rome, after lessons from Agnese Bonucci, he won a scholarship to the Liceo Musicale; his teachers were Cotogni and Rosati. In 1914 he won an international competition at Parma, and on 14 October that year made a successful début in *La Gioconda* at Rovigo. In 1915 his Faust in Boito's *Mefistofele* was highly appreciated at Bologna under Serafin and at Naples under Mascagni. Spain was the scene of his first successes abroad, in 1917. The climax of his early career was his appearance in the memorial performance of *Mefistofele* at La Scala on 19 November 1918. On 26 November 1920 he made a brilliant début (again in *Mefistofele*) at the Metropolitan Opera, where he remained as principal tenor for 12 consecutive seasons, singing no fewer than 28 of his total of 60 roles.

In the lyrical and romantic repertory, Gigli was regarded as the legitimate heir of Caruso (Martinelli excelled in the more dramatic and heroic parts). The operas in which he was most often heard were *La bohème*, *La Gioconda*, *L'Africaine*, *Andrea Chénier* (see illustration) and *Mefistofele*. His Covent Garden début was in *Andrea Chénier* on 27 May 1930, with subsequent appearances in 1931, 1938 and 1946. In 1932 he left the Metropolitan, declining to accept a substantial reduction of the salary paid him before the Depression. Thereafter he pursued his career more actively in Italy, elsewhere in Europe, and in South America, returning to the Metropolitan, for five performances only, in 1939. A favourite of Mussolini, Gigli was at first under a cloud after the dictator's fall, but returned to sing in *Tosca* at the Rome Opera in March 1945, and in November 1946 reappeared at Covent Garden with the S Carlo company in *La bohème*, with his daughter, Rina Gigli, as Mimì. He continued to appear in opera at Naples and at Rome as late as 1953, and in concerts almost until his death.

Beniamino Gigli in the title role of Giordano's 'Andrea Chénier'

Smoothness, sweetness and fluency were the outstanding marks of Gigli's singing. His style was essentially popular, both in its virtues and its limitations: natural, vital and spontaneous on the one hand, but always liable to faults of taste – to a sentimental style of portamento, for instance, or the breaking of the line by sobs, or ostentatious bids for stage applause 'like a picturesque beggar appealing for alms' (Ernest Newman). He missed refinement in Mozart, and was unequal to the technical demands of 'Il mio tesoro'; in Verdi he was more at home, although notably happier when, as in the second scene of *Un ballo in maschera* or the last act of *Rigoletto*, his grandees had adopted popular disguise; best of all in Puccini and the melodramatic lyricism of *Andrea Chénier* and *La Gioconda*. His mellifluous cantilena in such pieces as Nadir's romance in *Les pêcheurs de perles* was consummately beautiful. Gigli was something less than a great artist; but as a singer pure and simple he was among the greatest.

His many recordings offer a complete portrait of his long career; outstandingly successful are the arias from *Mefistofele*, *Martha*, *L'elisir d'amore*, *La Gioconda* and *Faust*, duets with De Luca from *La forza del destino* and *Les pêcheurs de perles*, and the complete recordings of *Andrea Chénier* and *La Bohème*. Gigli was also a seductively charming interpreter of Neapolitan and popular songs, and delighted 1930s cinema audiences with his portrayals of ingenuous and lovestruck tenors.

DESMOND SHAWE-TAYLOR/ALAN BLYTH

Gigli, Giovanni Battista ['Il Tedeschino'] (*b* Finale Emilia; *d* ?Florence, after 1692). Italian composer. No biographical links with Germany have been found to explain his nickname, 'Il Tedeschino', so it may simply have described his personal appearance. He was in the service of Grand Duke Ferdinando III of Tuscany in Florence when he published *Sonata da chiesa e da camera a 3 strumenti, col basso continuo per l'organo* op.1 (Bologna, 1690), which he described as 'an immature part of my early composition'. He may also have worked at Modena for the Este family, since two oratorios (*S Caterina* and *S Genovefa Palatina*), six trio sonatas and one cantata for solo voice with continuo survive in manuscript in the library there (*I-MOe*). Four pieces are also included in a 17th-century manuscript collection of arias and cantatas (in *I-Bc*), and he appears to have written a sacred history, *La libertà prodigiosa* (Florence, 1692).

JOHN HARPER

Giglio, Tommaso (*b* Enna, Sicily; *fl* 1600–03). Italian composer. He was present at Palermo in 1600 as a supporter of Raval in his musical dispute with Falcone; he remained there until at least 1603 when Raval asked him to contribute a composition to the collection *Infidi lumi* (Palermo, 1603), which is now lost. His *Secondo libro de madrigali a sei voci* (Venice, 1601) exemplifies the later phase of the *seconda pratica*. Only the bass part survives but six of the pieces were reprinted (in RISM 1604[12], 1613[10]; ed. in MRS, vi, 1991). His madrigals are florid and inventive, with full sonorities and a charm that hides any dissonances or false relations.

PAOLO EMILIO CARAPEZZA/GIUSEPPE COLLISANI

Gigout, Eugène (*b* Nancy, 23 March 1844; *d* Paris, 9 Dec 1925). French organist and composer. He began his musical apprenticeship at Nancy Cathedral choir school, then in 1857 went to the Ecole Niedermeyer where he was taught by Saint-Saëns and Clément Loret. After marrying Caroline-Mathilde, the director's daughter, he stayed at the Ecole Niedermeyer to teach plainsong, counterpoint, fugue and the organ. He founded a school of organ and improvisation in 1885. In 1863 he was appointed organist of St Augustin (a post that he held until his death), but had to wait five years for Barker to complete his instrument; it was built using an electro-pneumatic system unfamiliar at the time, and had to be reconstructed by Cavaillé-Coll–Mutin in 1899. Gigout succeeded Guilmant as professor of organ and improvisation at the Paris Conservatoire in 1911. Among those he taught at the Ecole Niedermeyer, at his own school

(founded in 1885) and at the Conservatoire, his nephew Léon Boëllmann, Fauré, Messager, Roussel and André Marchal stand out.

According to accounts by his contemporaries, Gigout, like Guilmant, played in a very clean style, which did not prevent him from performing the music of Franck with great intensity. As an improviser he is reported to have been eclectic, but was drawn particularly to classicism.

His organ music testifies to this ambivalence between a refined language derived from Bach, or certain passages in a classical style, and symphonic effects in the grand manner, sometimes making use of plainsong. Based on an aesthetic close to that of Saint-Saëns, his output is dominated by his organ works, completely overshadowing his piano pieces and *mélodies*. The pieces for harmonium or organ without obbligato pedal, simple in execution but useful to the church organist, and often making interesting use of Gregorian style (*100 pièces brèves dans la tonalité du plain-chant*), are quite distinct from the grand compositions with pedal, divided between a series of major collections including the *6 pièces* of 1881, the *10 pièces* of 1890 and the *3 pièces* of 1896. Worthy of note among these are the *Grand choeur dialogué* (1881) which alternates foundation stops and reeds to memorable effect, the Toccata in B minor (1890) which can stand alongside similar compositions by Boëllmann, Widor or Dubois, and the *Scherzo* and *Cantilène*, also in the 1890 collection, which contain more picturesque and decorative material. A different style is represented in the *Introduction et thème fugué* (from the 1881 collection) or the *Pièce jubiliaire en forme de prélude et fugue* (1918), which is entirely classical in inspiration, or the charming *Rhapsodie sur des Noëls* (in the 1890 collection), which places folk music in a symphonic context, following the example pioneered by Alexis Chauvet in 1867–9.

Gigout is also the composer of numerous sacred choral works, *mélodies* and piano music of an unashamedly nationalist character including *En souvenir!* (2 legends) and '*Hymne à la France*'.

WORKS

(*selective list*)

Org: 3 pièces, 1872–6; 6 pièces, 1881; Pièces diverses en deux suites, 1885–6; 100 pièces brèves dans la tonalité du plain-chant, 1888; Suite de 3 morceaux, *c*1889; 10 pièces, 1890; Pièces diverses, 1891; Album grégorien, 1895; 3 pièces, 1896; Prélude et fugue, E, 1897; Rhapsodie sur des airs catalans, 1897; Rhapsodie sur des airs populaires du Canada, 1898; 2 pièces, 1900; Poèmes mystiques, 1903; L'orgue d'église, 1904; 70 pièces dans les tons les plus usités, 1911; 12 pièces, 1913; Pièce jubilaire en forme de prélude et fugue, 1918; 100 pièces nouvelles, 1922; 10 pièces, 1923

Other kbd (solo pf, unless otherwise stated): Etude, impromptu et capriccio, 1880; 6 morceaux, pf 2/4 hands *c*1885; Andante symphonique, pf, hmn, 1887; Marche funèbre, pf, hmn, 1887; Hymne à la France, 4 hands, 1892, also arr. wind orch; Au guery!, 1894; Sonate, F, 1904; Suite enfantine, 1904; 3 improvisations caractéristiques, 1913; En souvenir!, 2 legends, 1914–15, no.2 for pf 4 hands; Aux Escaldes, 1925

Vocal: Chants du graduel et du vespéral romains, 4vv, *c*1880; Ave verum, SATB, org, *c*1884; 3 mélodies (A. de Givrins, V. Hugo), Mez, pf, *c*1884; Tantum ergo, 4vv, org, *c*1884; Cantique à la Vierge Marie (l'Abbé de Beauchamp), 1v, chorus ad lib, org, 1886; Ave verum, S/T, org, 1888; Antienne pontificale, 4vv, org, *c*1892; Le prêtre (Henry B.), 1v, hp, org, 1893; 2 motets, female vv, org, 1900; Tota pulchra, 1v, org, 1900; Alleluia de Pâques, 4vv, org, 1901; 2 cantiques, 1v, 3vv, org/pf, 1902; Le Noël de Joséphine (R. Fraudet), 1v, pf, 1908; Barcarolle sablaise, 1921; Le vallon (A. de Lamartine)

Other works: Méditation, vn, orch, 1890; transcrs. of works by Bach, Boëllmann, Niedermeyer, Sacchini and Saint-Saëns

Principal publishers: Durand, Hamelle, Heugel, Leduc

FRANÇOIS SABATIER

Gigue (i) (Fr.: 'jig'; It. *giga, gighe*). One of the most popular of Baroque instrumental dances and a standard movement, along with the allemande, courante and sarabande, of the suite. It apparently originated in the British Isles, where popular dances and tunes called 'jig' have been known since the 15th century. Although 17th-century gigues were notated in simple duple metre, most are in some kind of compound metre (i.e. with a triple subdivision of the duple beats), and most are in binary form. During the 17th century, distinct French and Italian styles emerged. The French gigue was written in a moderate or fast tempo (6/4, 3/8 or 6/8) with irregular phrases and an imitative, contrapuntal texture in which the opening motif of the second strain was often an inversion of the first strain's opening. The Italian *giga* sounded much faster than the French gigue but had a slower harmonic rhythm; it was usually in 12/8 time and marked 'presto', with balanced four-bar phrases and a homophonic texture. From about 1690 gigues and gigas appeared that were highly complex virtuoso solo pieces which used a wide variety of compositional techniques, usually with joyful affect.

1. ETYMOLOGY AND ORIGIN. The various words for the dance form known as the jig or gigue have rather confused histories that in turn have led to confusion about the origins of the musical form. In French, Italian and German, the word seems to be derived from a medieval word for fiddle (as in Dante, *Paradiso*, xiv.110: 'E come giga ed arpa in tempratesa, Di molte corde, fan dolce tintinno'), a word also used to refer to the musician who played such a fiddle (*see* GIGUE (ii)). The usage survives in modern German as *Geige* (violin), a survival that has contributed most to past uncertainty about the gigue's origin. It is now believed that if the English word came from the Continent, it came not from gigue or fiddle but rather from the verb 'giguer', to frolic, leap or gambol. Although no choreographies have survived for the 16th-century jig, contemporary literary references suggest that jigs were fast pantomimic dances for one or more soloists with lively rhythms created by virtuoso footwork, and that they were somewhat bawdy (Shakespeare, *Much Ado about Nothing*, Act 2 scene i: 'Wooing is hot and hasty like a Scottish jigge'). Dean-Smith pointed out that the word 'jig' may have derived from slang in a manner similar to the more recent evolution of the word 'jazz', becoming a generic term encompassing many forms of non-aristocratic music and dance. As with the first American meaning of the slang 'jass', most 16th-century connotations of the English word 'jig' were vulgar.

2. JIGS IN 17TH-CENTURY ENGLAND. Sung and danced jigs were a prominent feature of the stage entertainment called JIGG, an improvised, farcical, burlesque comedy for two to five actors, developed in Elizabethan England and enthusiastically adopted in Scandinavia and northern

Germany. Cotgrave's definition of 'jig' as 'strambot' (*Dictionarie of the French and English Tongues*, 1611), a form of Italian frottola poetry adapted by the French for satiric and insulting verse, probably refers to the prevalence of such verse in theatrical jigg performances. Little is known about either the music or the dances used in jiggs; verses were sung to popular tunes, some of which remained well known in instrumental versions (e.g. *Walsingham*, *Goe from my window*, *Watkins Ale*, *Spanish Pavan*). It is possible that the style of the original dance accompaniments is reflected to some extent in these pieces, and in the jigs that appeared in English art music at the turn of the 17th century.

Jigs began to appear in English collections of instrumental music early in the 17th century, as independent pieces in binary form, as themes for variation sets, and occasionally as movements of longer works. Collections such as Antony Holborne's *The Cittharn Schoole* (1597), Thomas Robinson's *Schoole of Musicke* (1603), Thomas Ford's *Musicke of Sundrie Kindes* (1607) and the Fitzwilliam Virginal Book contain pieces explicitly entitled 'jig' or 'gigg', as well as versions of some of the tunes thought to be associated with theatrical jiggs. The actual jigs are all written in four-bar phrases with a homophonic texture, some of them in simple duple metre (i.e. ¢ or Ↄ) and some in compound duple (i.e. 6/4, 6/2 etc). Apparently no particular rhythmic or metrical pattern was yet implied by the English term 'jig', but rather a style that can no longer be understood fully. Interestingly enough, all the tunes from theatrical jiggs contained in the Fitzwilliam Virginal Book are in the compound duple metre that was to be characteristic of both gigue and *giga* by the end of the 16th century.

The jig seems to have retained its association with light and potentially vulgar things throughout the century, for as late as 1676 Thomas Mace wrote 'Toys or Jiggs, are Light-Squibbish Things, only fit for Fantastical and Easie-Light-Headed People' (*Musick's Monument*, ii). Nonetheless, jigs continued to appear in consort and ensemble music, and as incidental music for plays. Matthew Locke's jigs, typical of those appearing at the middle of the century, tend to have homophonic textures with occasional points of imitation at the opening, and to have clear four- or eight-bar phrases. Only one of his jigs was written in compound duple metre, the rest appearing either in ¢ or Ↄ (ex.1); several use the so-called SCOTCH SNAP as the main rhythmic idea and all are in binary form. Purcell's jigs, most of them written as act tunes to such plays as *The Married Beau* (1694) and *The Gordian Knot Untied* (1691), are all written in 6/8, and most have imitative textures, one (the jig in *The Gordian Knot*) including a double fugue as the second strain, perhaps reflecting trends on the Continent.

3. FRENCH GIGUE. The French lutenist Jacques Gautier, who for 30 years worked as court lutenist in London, is credited with having introduced some form of the jig into his native country when he returned there in the early days of the Commonwealth. Soon pieces called 'gigue' began to appear in French lute and harpsichord collections. Like their English counterparts, these gigues could apparently be written in either simple or compound metre, but other elements of the original style, particularly the clarity of phrase and texture, began to change under the influence of the distinctive *style brisé* of 17th-century France. Phrase lengths became ambiguous and irregular,

Ex.1

(a) M. Locke: Jigg from Suite no.2 in B♭ major

(b) M. Locke: Jigg from Suite no.4 in E minor

and strong emphasis on motivic play lent the gigue a growing rhythmic and textural complexity. The newly stylized French gigue was first included regularly in suites by Nicolas-Antoine Lebègue, although it appeared in its traditional place as the last movement in the suites of relatively few composers. Ex.2 shows the typically complex opening of a gigue by D'Anglebert.

It seems that for the French, as perhaps for the English, the gigue implied a certain style as well as a specific dance, for, beginning in the works of Ennemond and Denis Gaultier, several pieces appeared entitled 'allemande giguée' or 'allemande en gigue'. Explanation of this curious labelling comes from Perrine's indication in his *Pièces de luth en musique* (Paris, *c*1680) that two allemandes were to be played 'en gigue'. Following each is a transcription of the allemande 'en gigue' (in fact, the pieces are re-labelled 'gigue') in which the even quavers of the original have been altered to dotted quaver and semiquaver figures.

17 dances called 'gigue' appear in the stage works of Lully, including the ballets *Les gardes*, *Les saisons*, *Amadis*, *Persée* and *Roland*. Like Purcell, Lully preferred the compound duple kind of gigue; most make extensive

Ex.2 D'Anglebert: Gigue from *Pièces de clavecin*, 1689

use of imitative counterpoint, cross-rhythms and long irregular phrases, as well as a quaver–crotchet upbeat borrowed from another popular dance, the CANARY. At least 16 choreographies for the gigue survive from the early 18th century, by both French and British choreographers (see lists in Little and Marsh, 1992). Steps to one of the simplest are shown in ex.3, set to a gigue from Lully's *Roland*, with the 'canary' upbeat and contrapuntal style favoured by the French.

R = step on right foot
^ = *élevé*, or rise on to ball of foot

The earliest appearance of the term 'gigue' in Germany was as the title of a variation in Wolfgang Ebner's *Aria 36 modis variata* for lute (1648), but the real popularity of the form seems to date from its introduction by Froberger as the standard second movement of his keyboard suites, beginning in 1657. Froberger visited Paris in 1652, where he was influenced by such composers as Denis Gaultier and Chambonnières, and his gigues show fugato, *style brisé* and delicate nuances characteristic of French lutenists. Esaias Reusner's *Delitiae testudinis* (1667) for lute seems to have been the first publication consistently to include the gigue as the last movement of the suite, following the allemande, courante and sarabande, a position that was to become commonplace. After Froberger, south German composers such as Pachelbel tended to compose rather simple gigues, relinquishing the fugato techniques brought from France, while composers in central and northern Germany like J.C.F. Fischer, J.A. Reincken, Buxtehude, Kuhnau, Mattheson and Georg Böhm preferred imitative gigues modelled on those of Lully and French harpsichordists, often unifying them by using an inversion of the opening motif as the main idea of the second strain. German ensemble suites by such composers as Dietrich Becker, J.C. Pezel, J.H. Schmelzer, Alessandro Poglietti, Biber and Georg Muffat also incorporated the fugato French gigue as the usual last movement.

4. ITALIAN 'GIGA'. The Italian *giga* is a related instrumental air apparently derived from the English jig. It is not certain how the form was introduced in Italy, but its first known use was in G.B. Vitali's op.4 (*Balletti, correnti, gighe, allemande, e sarabande*, Bologna, 1668). No choreographies are available, so the dance cannot be compared with its English and French counterparts. Unlike the French gigue with its many unbalanced phrases, the beats in the *giga* are arranged in balanced groups of four and eight (ex.4). Harmonic and melodic sequences appear frequently, and the texture tends to be less

Ex.4 A. Corelli: Giga from op.5 no.9 (1700)

etc

complicated and more homophonic than in the French form. *Gighe* are particularly associated with violin music, with its characteristic chordal figurations and large melodic leaps, and many *gighe* occur as last movements in Italian solo and trio sonatas by composers such as Corelli, Domenico Zipoli, G.M. Bononcini, Antonio Veracini, Geminiani, Tartini, F.M. Veracini, G.B. Sammartini and pseudo-Pergolesi. The *giga* was adopted by some French composers, notably J.M. Leclair and Mondonville, and by such Germans as Reincken, Telemann, Handel and J.S. Bach.

5. GIGUES AFTER *c*1690. French composers of the first half of the 18th century continued to use the gigue, particularly in keyboard and small ensemble suites. Many works by Marin Marais, J.F. Rebel, François Couperin, Charles Dieupart, Jacques Hotteterre, Michel de La Barre and Rameau, for example, include gigues written in the tradition of D'Anglebert and Lebègue; some, however, also show influences from the Italian *giga* style, the new contredanse, or the emerging Rococo style. In fact it is virtually impossible to classify the gigue as a particular type after 1700 because it absorbed so many variants. The title 'gigue' may mean a French gigue, an Italian *giga*, or some combination of the two. Some of the longest, most complex and contrapuntal gigues may be seen in the works of J.S. Bach, appearing under such diverse titles as 'gigue', 'giga', 'jig' and 'gique' (see Little and Jenne, 1991). A few are clearly in the French style, such as those of the French Suite in C minor BWV813 and the B minor Partita for keyboard BWV831 (ex.5*a*). Those in the Italian style fall into two metric categories: one has ternary groupings on the lowest level of rhythm as in ex.4, such as those of the English Suites nos.1, 3, 4 and 6, the G major French Suite and the keyboard partitas nos.1, 3 (ex.5*b*), 4 and 6. A second type has a duple level of rhythm below the ternary groupings, often with harmonic changes within the ternary figure and few internal cadences (ex.5*c*), as in the English Suites nos.1 and 5 and the French Suites nos.1, 3, 4 and 6. Indeed, many Baroque gigues present formidable problems to the modern interpreter, and scholars are still debating the question of whether the many gigues notated with duple subdivisions of the beat (i.e. in C, ¢, 2/4) should be played in the uneven rhythms of a triple subdivision (4/4 with triplets, or the equivalent of 12/8). Another problem occurs when a dotted quaver and semiquaver figure is set simultaneously against a triplet: should one of the two figures be resolved to fit the other, and if so, which should take precedence, or should the counter-rhythm stand as notated? (These and related problems are debated by Collins and Jenne.) One of the most difficult gigues of all is that of J.S. Bach's E minor keyboard partita, written in the mensuration Φ (2/1 in most modern editions) with four minim beats to the bar. Handel's 'gigues' offer fewer problems, since most of them are clearly of the Italian type.

Ex.5

(a) J. S. Bach: Gigue, from Partita for keyboard in B minor

(b) J. S. Bach: Gigue, from Partita for keyboard in A minor

(c) J. S. Bach: Gigue, from Partita for keyboard in G major

The influence of gigue and *giga* continued into the late 18th century; 'gigue' was described by many theorists as a piece in 6/8 metre, with a cheerful affection and a lively tempo (Mattheson, *Kern melodischer Wissenschaft*, 1737, p.115; Kirnberger, *Kunst*, 1776–9, ii, 129; Türk, *Clavierschule*, 1789, p.401). As such one may consider as in gigue style the first movements of Mozart's Quartet in B♭ major K458 and the Quintet in E♭ major K614; the Oboe Quartet K370, last movement, Haydn's Symphony no.100 ('Military'), last movement, and pieces in Beethoven's piano sonatas such as the presto finale of op.2 no.1. The balanced, graceful phrases of these movements imply more influence from the *giga* than the gigue.

Pieces entitled 'jig' or 'gigue' appeared only occasionally in the 19th and 20th centuries, for example in Schumann, op.32; Debussy, *Images* for orchestra (1912); Reger, op.36 for keyboard, op.42 for violin solo and op.131*c* for cello solo; Schoenberg, suites op.25 and 29; Stravinsky, *Duo concertant* (1932) and Septet (1952–3); Henry Cowell, *Jig in four* (1936); Jean Françaix, *Sonatine* (1952); and Philipp Jarnach, *Quintett* op.10.

MEREDITH ELLIS LITTLE

Gigue (ii) (Fr. *gigue*, *gigle*; It. and Sp. *giga*). A term widely used in medieval Europe to denote a bowed instrument. It is generally believed to have been the *rebec* because the name *gigue* gradually went out of fashion as that of the *rebec* gained ground in the 14th century and *gigue* was not normally synonymous with *vièle* or *fidel* according to both fictional literature and historical accounts, which often mention these instruments together. Johannes de Garlandia, in his early 13th-century *Dictionarius*, lists the *giga* and *viella* as being played in rich Parisian households. It is also known that three German *gigatores* performed at the Feast of Westminster in 1306, together with fiddlers, crowders and many other minstrels (Bullock-Davies, 106–8), and in 1375 the 'violam et gigam' were played by two German musicians in the presence of the Duke of Savoy (Bachmann, 150). There are many poetic descriptions in different languages of the *gigue* and *vièle* being played together in celebrations, particularly to accompany singing and dancing. However, the early 14th-century German poem *Der Busant*, in its vivid description of a 'fedele' having silk strings and decorations of gold, precious stones and ivory, finally declares 'Thus the *gige* was made', showing that, after all, the two words could sometimes mean the same instrument (Page, 241).

MARY REMNANT

Gil, Gilberto [Moreira, Gilberto Passos Gil] (*b* Salvador, Bahia, 29 June 1942). Brazilian composer, singer and instrumentalist. He first studied the accordion, then in 1960 organized the popular music ensemble Os Desafinados. In 1963, while at the Federal University of Bahia studying business administration, he composed his first piece, the bossa nova samba *Felicidade vem depois*. In 1964 he moved to São Paulo, participating in shows and composing film music, and had his first songs recorded, among which *Procissão* and *Roda* revealed his affinity with folk music. The pop singer Elis Regina promoted several of his pieces on television.

In late 1966 he went to Rio de Janeiro, where he performed alongside Vinicius de Morais and Maria Betânia, and in 1967 abandoned business administration for music. His first LP, *Louvação* (1967), revealed a socio-political agenda centred on the plight of the poor, and was based on expressive cultural elements of the backlands

of the state of Bahia. His song *Domingo no Parque* (1967) showed his interest in the Beatles and pop art, with an instrumental arrangement by the experimental composer Rogério Duprat and the backing of the pop group Os Mutantes. In 1968, together with Caetano Veloso, Gil was a main protagonist in the birth of 'Tropicalismo' (presaged by *Domingo no Parque*), with the release of the album *Tropicália ou Panis et Circencis*, which included *Batmacumba* (with Veloso), *Miserere nobis* and *Geléia Gera'*. Considered a subversive figure by the military régime of the period, he was briefly imprisoned and soon afterwards left for England, where he remained until 1972. During this time he assimilated Anglo-American acoustic rock which, a few years later, became an important aspect of his phase of internationalization. Besides his popular album *Expresso 2222* (1972), the 1970s and early 80s marked a newly found empathy with the *sertão* (hinterland), as seen in the album *Refazenda*, and with black artistic and social consciousness, as on the album *Refavela*, which drew upon his own African-Brazilian heritage. Since the early 1980s he has become a major icon of Brazilian popular music and culture, touring extensively in Europe, the USA and Brazil.

In the 1980s and 90s Gil showed some concession to fashionable dance genres and aesthetic trends, but also produced some fine and innovative works. His great talent as a composer-poet, seen in such albums as *Tropicália 2* (with Veloso; 1993), *Gilberto Gil Unplugged* (1994) and *Quanta* (1997), together with his unique qualities as a vocalist and instrumentalist, make him one of the most original figures of his time in Brazilian popular music.

GERARD BÉHAGUE

Gilardi, Gilardo (*b* San Fernando, 25 May 1889; *d* Buenos Aires, 16 Jan 1963). Argentine composer and teacher. He studied with his father and then with Pablo Berutti. An excellent teacher, he was professor of harmony, counterpoint, composition and fugue at the Buenos Aires National Conservatory and at the University of La Plata, whose fine arts school he directed. He was also a founder of the Grupo Renovación, a member of the Cinematography Academy and an adviser to the National Cultural Commission and to the National SO. Although in his early works he used the pentatonic scale within a nationalistic style, Gilardi's mature works show a more universal language, particularly such religious works as the *Misa de Requiem* and *Misa de Gloria* and the *Stabat mater* (1952). His first opera, *Ilse, o Amore di un giorno* (1919) is clearly influenced by Puccini, and his second, *La leyenda del urutaú*, is set at the time of the conquistadors and relates an indigenous legend about a bird with a nocturnal song. In this work Gilardi uses pentatonic scales and other indigenous themes and dances. The operas were first performed at the Teatro Colón in 1923 and 1929 respectively. He also composed a humorous symphonic piece for children, *El gaucho con botas nuevas* (1936), first performed in the USA with José Iturbi conducting.

WORKS
(*selective list*)

Stage: Ilse, o Amore di un giorno (op, 2), 1919, Buenos Aires, Colón, 13 July 1923; La leyenda del urutaú (op, prol, 3, J. Oliva Nogueira), 1929, Buenos Aires, Colón, 25 Oct 1934; incid music
Choral: Misa de Requiem, S, A, T, chorus, org, orch, 1914–18; Misa de Gloria, soloists, female chorus, org, orch, 1936; TeD, female chorus, orch, 1938; El libertador (cant.), spkr, chorus, orch, 1948; Stabat mater, S, A, chorus, org, orch, 1952
Orch: Serie argentina, 1929; Piruca y yo, 1938; Obertura tritemática, 1952; Sinfonía cíclica, 1961
Pieces for children's chorus, songs, chbr music, pf suites and preludes, film scores

SUSANA SALGADO

Gilardoni, Domenico (*b* Naples, 1798; *d* Naples, 1831). Italian librettist. Little is known about his background. Dogged by bad luck and ill-health, he died young, having written 20 librettos in five years; the whole of his short career was based in Naples. His first published libretto was for Bellini (*Bianca e Gernando*, 1826), but much of his early work was for the Teatro Nuovo and typically contained long stretches of prose and *buffo* roles in dialect; collaboration with Donizetti, from *L'esule di Roma* onwards, took him to the royal theatres, the S Carlo and the Fondo. When working with Donizetti he achieved a high level not matched when writing for others, probably due to the influence of the composer, who himself finished *Fausta* after the librettist's death. Although never officially described as a poet of the royal theatres, Gilardoni was widely credited with raising standards there. His most accomplished libretto was *Il paria*, set by Donizetti in 1829; his most frequently performed was certainly *Il ventaglio* (Raimondi, 1831), which demonstrates all too clearly the slack versification that often marred his work.

JOHN BLACK

Gilbert, Anthony (*b* London, 26 July 1934). English composer. After training as a translator he studied composition privately with Mátyás Seiber (1957–9) and at Morley College, London (1959–63) with Alexander Goehr and Anthony Milner. He worked as a music editor with Schott (1965–70) before beginning a teaching career at Goldsmiths College, London (1968–73; acting director of music 1971–3). He was appointed to the Royal Northern College of Music in 1973, where he was head of composition until 1999. Simon Holt and Priti Paintal have been numbered among his students.

Tough yet often humorous, Gilbert's music reflects the uncompromising spirit of its creator. His dogged individualism is clear not only from his determination, relatively late in life, to become a composer, but also from his subsequent pursuit of artistic goals that answered personal

challenges rather than topical concerns of the avant-garde. Although he has written in most of the major genres, his output resists conventional classifications of either sensibility or technique. The common factor in his works is his fertile imagination, which is charged both by his musical ideas and his thoughts on the nature of performance.

In his *Missa brevis* (1964–5) and *Nine or Ten Osannas* (1967) Gilbert developed fresh meanings for serial and combinatorial raw materials by employing them with the formal concision of a miniaturist. In *The Incredible Flute Music* (1968) he used simultaneously fast and slow music to create a musical paradox. A new approach to familiar concepts is also characteristic of the Piano Sonata no.2 for four hands (1966). These scores, as well as the chamber-orchestral *Sinfonia* (1965), *Regions* for two orchestras (1966) and the Symphony (1973, rev. 1985), demonstrate his keen sense of instrumental scope and timbre. *Ghost and Dream Dancing* for orchestra (1974, rev. 1981), *Inscapes* for speaker, soprano and small ensemble (1975, rev. 1981), and *Long White Moonlight* for soprano and electric double bass (1980), mark a further stage in his exploration of unusual sonorities. The radio opera *The Chakravaka-Bird* (1977) and *Towards Asâvari* for piano and chamber ensemble (1978) attest to his interest in non-Western cultures.

Gilbert's works of the 1980s and 90s continue to stress both humour and seriousness. A relaxed voice is heard in the musical 'bestiaries' for chamber ensembles (the *Quartet of Beasts*, 1984; *Beastly Jingles*, 1984; and *Six of the Bestiary*, 1985) and in a number of pieces for sopranino recorder, such as *Midwales Lightwhistle Automatic* (1996). In contrast, the orchestral song cycle *Certain Lights Reflecting* (1989), to poems by the Tasmanian poet Sarah Day, and the Violin Concerto 'On Beholding a Rainbow' (1997) continue the style of composition that first brought Gilbert to prominence in the 1960s.

NICHOLAS WILLIAMS

Gilbert, Geoffrey (Winzer) (*b* Liverpool, 28 May 1914; *d* De Land, FL, 18 May 1989). English flautist. He gained a scholarship to the RMCM at the age of 14 and joined the Hallé Orchestra and the Royal Liverpool PO two years later. He was principal flute in the LPO under Beecham from 1933 to 1948, and later played in the BBC SO and RPO. In 1948 he founded the Wigmore Chamber Ensemble and directed it for over 20 years. He also gave the British premières of concertos by Ibert, Nielsen and Jolivet. In the 1930s Gilbert was greatly influenced by Marcel Moyse and studied for a while with René le Roy, adopting a silver flute and modifying his technique to play in the flexible and expressive French style, in contrast to the straighter, more reedy style favoured by English players on the wooden flute. Gilbert taught the French style to generations of English players at Trinity College of Music, London, and the GSM, and was director of wind studies at the RMCM from 1957 to 1969 before moving to Stetson University, Florida, for ten years. He also travelled widely to give masterclasses. His life and influence are documented by Angeleita S. Floyd in *The Gilbert Legacy* (Iowa, 1990).

EDWARD BLAKEMAN

Gilbert, Henry F(ranklin Belknap) (*b* Somerville, MA, 26 Sept 1868; *d* Cambridge, MA, 19 May 1928). American composer. The son of a church organist and a soprano, he learnt to play the violin and piano, and studied theory and composition with George E. Whiting, George Howard and Edward MacDowell (1886–92), but never attained a thorough musical education. After working as a freelance violinist, he held various posts for a printer, real-estate agency and music publishers, but poor health forced him into an early retirement. Among his other activities, he assisted Arthur Farwell with the Wa-Wan Press, devoted to the publication of American music, wrote articles for music journals and lectured on music. Advocating the use of musical humour and popular idioms in composition, he emphasized the need for independence from musical authorities and European-based ideals of beauty. The Wa-Wan Press published several of his piano pieces and songs, among them the popular *Pirate Song*.

In 1893 Gilbert visited the World's Columbian Exposition in Chicago, where he was introduced to ragtime and other world musics. Convinced of the importance of nationalistic forms of expression, he came to admire the styles of Dvořák, Grieg and several French and Russian composers, and collected and studied Amerindian, black American and Celtic traditional musics. His own compositions feature both lyrical and roughhewn melodies, are always tonal and usually diatonic, and are regularly shaped by popular and folk antecedents. Uncomplicated triadic harmonies, sharply outlined rhythms, duple metres, abrupt modulatory schemes and clearly sectionalized structures are characteristics of many of his works, particularly those influenced by black American music.

Comedy Overture on Negro Themes and *The Dance in Place Congo* became quite popular and received many American performances, winning him praise as a composer and a number of commissions; some works were also performed in France and Russia where, championed by Glazunov, Gilbert attracted an enthusiastic following.

Gilbert's later music (from 1915) is less known. Beginning with the one-act opera *Fantasy in Delft* (1920), he put aside the influence of the black American tradition; his phrasing grew more flexible, rhythms became less regular and harmonies more subtle. Works such as the vivid suite from the *Pilgrim Tercentenary Pageant* (1921), the Whitmanesque Symphonic Piece (1925) with its loud rhythmic outbursts and Stephen Foster-like balladry and the poignant *Nocturne after Whitman* (1926), inspired by the Whitman lines beginning 'I am he that walks with the tender and growing night', capture the spirit of a wider America.

On the whole, Gilbert demonstrated a rugged independence of thought in his works. Though his music often sounded coarse to his critics, he considered his lucid, unaffectedly direct style admirable, attesting to a genuine honesty of expression. One of the first composers to be influenced by Amerindian and black American music, he felt a powerful desire to endow the majority of his works with an American character, whether particularized, wide-ranging or idealized. Beginning with *The Fantasy in Delft*, a fully developed personal style emerged that was not indebted to any particular nationalistic source. While his compositional techniques were European in derivation, the vitality of his music was uniquely American. To say something meaningful to ordinary Americans and to say it eloquently and without pretence, these were his guiding principles.

WORKS

(selective list)

N.E. TAWA (text), KATHERINE LONGYEAR (work-list, bibliography)

Gilbert, Jean [Winterfeld, Max] (*b* Hamburg, 11 Feb 1879; *d* Buenos Aires, 20 Dec 1942). German composer and conductor. As a child he took piano lessons and later studied music in Kiel, Sondershausen and Berlin. He began his professional career in 1897 as a theatre conductor in Bremerhaven, moved to Hamburg in 1898 and, after military service, to Berlin in 1902. He adopted his *nom de plume* for his first operetta, *Das Jungfernstift* (1901). He conducted with a touring circus and at provincial theatres, and achieved wide and lasting success with his operetta *Die keusche Susanne* (1910). He then returned to Berlin as conductor and composer to the Thalia-Theater and produced a rapid succession of operettas – he was to compose more than 50 in all – in the lively, commercial style of the Berlin school, among

them *Polnische Wirtschaft* (1910), *Autoliebchen* (1912), *Die elfte Muse* (1912), *Puppchen* (1912) and *Die Tangoprinzessin* (1913); most of these achieved international currency. His postwar successes included *Die Frau im Hermelin* (1919, Berlin), and *Katja die Tänzerin* (1923, Vienna), but his later operettas, film scores and theatrical management ventures were less successful. In 1933 he emigrated to Buenos Aires, where he became conductor for a radio station. His son Robert Gilbert (1899–1978) wrote the words for many German films and operettas, including Benatzky's *Im weissen Rössl*, for which he also composed one song; in addition he adapted numerous American musicals for the German stage.

WORKS

Operettas, most first performed in Berlin; for more detailed list see GroveO

Das Jungfernstift, 8 Feb 1901; Der Prinzregent, 12 Sept 1903; Jou-Jou, 23 Oct 1903; Onkel Casimir, 1 Nov 1908; Polnische Wirtschaft, 26 Dec 1909; Die keusche Susanne, 26 Feb 1910; Die lieben Ottos, 30 April 1910; Die moderne Eva, 11 Nov 1911; Autoliebchen, 16 March 1912; So bummeln wir, 21 Nov 1912; Puppchen, 19 Dec 1912; Die elfte Muse, 23 Nov 1912 (rev. as Die Kinokönigin; Die Reise um die Erde in vierzig Tagen, 13 Sept 1913; Die Tangoprinzessin, 4 Oct 1913; Fräulein Trallala, 15 Nov 1913; Die Sünden des Lulatsch, 15 March 1914; Wenn der Frühling kommt, 28 March 1914

Kam'rad Männe, 3 Oct 1914; Woran wir denken, 25 Dec 1914; Jung muss man sein, 27 Aug 1915; Drei Paar Schuhe, 10 Sept 1915; Das Fräulein von Amt, 2 Sept 1915; Der tapfere Ulan, 20 Nov 1915; Arizonda, 1 Feb 1916

Blondinchen, 4 March 1916; Die Fahrt ins Glück, 2 Sept 1916; Das Vagabundenmädel, 2 Dec 1916; Die Dose Sr. Majestät, 7 March 1917; Der verliebte Herzog [Prinz], 1 Sept 1917; Der ersten Liebe goldene Zeit, 8 March 1918; Eheurlaub, 1 Aug 1918; Zur wilden Hummel, 10 March 1919; Die Schönste von allen, 22 March 1919; Die Frau im Hermelin, 23 Aug 1919; Der Geiger von Lugano, 26 Sept 1920; Onkel Muz, 2 April 1921; Die Braut des Lukullus, 26 Aug 1921; Prinzessin Olala, 17 Sept 1921; Dorine und der Zufall, 15 Sept 1922; Katja die Tänzerin, 5 Jan 1922; Die kleine Sünderin, 1 Oct 1922; Das Weib in Purpur, 21 Dec 1923

Die Geliebte seiner Hoheit, 24 Sept 1924; Der Gauklerkönig, 1924; Zwei um Eine, 1924; Uschi, 24 Jan 1925; Annemarie, 4 July 1925; Spiel um die Liebe, 18 Dec 1925; Der Lebenskünstler, 25 Dec 1925; In der Johannisnacht, 1 July 1926; Lene, Lotte, Liese, Josefinens Tochter, 14 Jan 1926; Eine Nacht in Kairo, 22 Dec 1928; The Red Robe, 25 Dec 1928; Hotel Stadt Lemberg, 1 July 1929; Die Männer der Manon, 1929; Das Mädel am Steuer, 17 Sept 1930; Lovely Lady, 25 Feb 1932; Die Dame mit dem Regenbogen, 25 Aug 1933

ANDREW LAMB

Gilbert, Kenneth (Albert) (*b* Montreal, 16 Dec 1931). Canadian harpsichordist and organist. After receiving his diploma from the Montreal Conservatory in 1953, he continued his musical education in Paris, studying the organ with Gaston Litaize, composition with Nadia Boulanger and the harpsichord with Ruggero Gerlin. From 1955 to 1967 he was a church organist and choirmaster in Montreal, as well as a concert organist and harpsichordist in Canada and the USA. During this time he was a leading figure in the organ reform movement in Canada, which brought about the installation of many new tracker-action instruments. After his London début in 1968 he performed extensively in Europe but continued to appear frequently in North America. He has occupied a number of teaching posts in Canadian and European universities and conservatories, and in 1989 Gilbert was appointed professor of harpsichord at the Salzburg Mozarteum.

Gilbert's repertory includes a wide range of Baroque works for harpsichord and organ, but he is especially acclaimed for his stylistically elegant interpretations of French music of the 17th and 18th centuries. He has made numerous recordings, including all of François Couperin's *Pièces de clavecin*, which he has also edited. His other editions include the complete sonatas of Domenico Scarlatti, the harpsichord works of Rameau and D'Anglebert, the toccatas of Frescobaldi and Michelangelo Rossi, and his own keyboard transcriptions of the lute music of Kapsberger. Gilbert's collection of instruments includes harpsichords by Taskin, Goermans and Delin.

HOWARD SCHOTT

Gilbert, Olive (*b* Carmarthen, *c*1880; *d* Hove, 19 Feb 1981). English contralto. She trained with the Carl Rosa Opera Company, and sang at Covent Garden and the Lyceum and Strand theatres. She was appropriately cast as a singing teacher with an operatic background in two of Ivor Novello's Drury Lane musicals: as Madame Simonetti in *Careless Rapture* (1936), and as Cäcilie Kurt in *The Dancing Years* (1939). She became a stalwart of Novello's unofficial repertory company with whom she spent the best part of her career. With Muriel Barron she introduced one of Novello's most popular songs, the duet 'We'll gather lilacs' in *Perchance to Dream* (1945), a show which displayed both her powerful contralto voice and a gift for comic acting. Her relationship with Novello also extended beyond the stage, as his unofficial housekeeper in London. She later appeared as Sister Margaretta in a long run of *The Sound of Music* (1961–7) and then in the London production of *Man of La Mancha* (1968).

PAUL WEBB

Gilbert Islands [now Republic of Kiribati]. *See* MICRONESIA, §III.

Gilberto, João (do Prado Pereira de Oliveira) (*b* Juazeiro, Bahia, 10 June 1931). Brazilian popular singer, composer and guitarist. He moved to Rio de Janeiro at the age of 18, singing mostly Romantic *samba-canções* in various groups and frequenting the nightclub Plaza in Copacobana and the Murray Recordshop in downtown Rio de Janeiro. His first solo recording came in 1952, but it was the July 1958 record containing Jobim's *Chega de Saudade* and his own *Bim-bom* that called attention to his new singing style, unassuming but secure and very intimate. In April 1958 he had accompanied on the guitar the pop singer Elisete Cardoso singing *Chega de Saudade*, and revealed for the first time his distinctive guitar beat that came to be known as the *violão gago* (stammering guitar), a trademark of the bossa nova made up of previously unknown syncopated patterns on the samba beat. In November of the same year he recorded Jobim's *Desafinado* and his own *Oba-lá-lá*; with direct reference to the new trend in the lyrics of the song, *Desafinado* became a sort of hymn of bossa nova. In March 1959 the LP *Chega de Saudade* was released, featuring Gilberto as a solo singer with arrangements by Jobim, and became the model of bossa nova aesthetics, with Gilberto as its most sought-after representative. In his next album, *O amor, o sorriso e a flor* (1960), he recorded another famous song by Jobim, *Samba de uma nota só*, which won him great popularity.

In 1962 Gilberto took part in the Bossa Nova Carnegie Hall concert and decided to settle in New York. He then collaborated with Stan Getz, and the resulting album *Getz/Gilberto*, although not released until 1963, received six Grammy awards and sold almost a million copies. Between short trips to Brazil he appeared in various shows in America, and in the late 1960s and early 70s lived in Mexico, where his *João Gilberto en México* album was released in 1971. Returning to the USA, the rest of his career saw a number of new recordings of classic Brazilian, American and even Italian and French songs in his inimitable Brazilian accent and bossa nova style: understated, restrained and relaxed, these recordings are all the more appealing and emotional for their simplicity.

GERARD BÉHAGUE

Gilboa, Jacob (*b* Košice, 2 May 1920). Israeli composer of Czech birth. At first educated in Vienna, he emigrated to Israel in 1938 studying architecture at the Haifa Technological Institute and music at the Jerusalem Music Academy and Teachers Seminary, from which he graduated in 1947. His composition teachers were Tal and Ben-Haim. Before 1957 Gilboa's music was tonal, showing the Middle Eastern influence typical of the Israeli 'Mediterranean' style. After attending the Cologne new music courses given by Stockhausen and Pousseur in 1963, his work changed radically to include clusters, quarter-tones, electronics and unconventional instrumental combinations, generally deployed in miniature forms. Among many awards he won the Israel Composers and Authors Association Prize on four occasions and the Prime Minister's Award in 1983; he has also represented Israel at the ISCM festival four times (1969, 1973, 1978, 1989). In 1973 he contributed an untitled article, and one on the 1973 ISCM Festival in Reykjavik, to the periodical *Musical Prose* (no.1, p.7; no.3–4, p.1); in 1983 he wrote on 'Fashions and Styles' in the yearbook *New Music in Israel* (1981–3, pp.24–6).

URY EPPSTEIN

Gilchrist, Anne Geddes (*b* Manchester, 8 Dec 1863; *d* Lancaster, 24 July 1954). English musical antiquary and authority on folk music, psalmody and hymnody. Trained at the Royal Academy of Music, she began research in folklore in 1895, when she noted similarities between newly discovered folksongs and the modal tunes of 16th- and 17th-century hymns. Between 1895 and 1910 she collected folklore in south-eastern and northern England; her main interest, however, was historical research and fellow scholars benefited particularly from her expertise in sourcing tunes. She joined the Folk-Song Society in 1905 as part of a new wave of collector-musicians associated with its revitalization and contributed numerous articles and notes to the *Journal of the Folk-Song Society* and its successor the *Journal of the English Folk Dance and Song Society*; from 1906 until her death she also served as a member of the editorial board, where she worked closely with Frank Kidson and Lucy Broadwood. A liberal Presbyterian, her attention to nonconformist religious music was unusual among contemporary folklorists and was reflected in articles for *The Choir* written between 1920 and 1937. Admitted as a Fellow of the Society of Antiquaries in 1935, she was appointed as OBE in 1945 for services to folksong. Her book and manuscript collection is held in the Vaughan Williams Memorial Library, London.

GEORGINA BOYES

Gilchrist, William Wallace (*b* Jersey City, NJ, 8 Jan 1846; *d* Easton, PA, 20 Dec 1916). American composer and conductor. The family moved to Philadelphia in 1855. Starting in 1865, he studied singing, the organ and composition with Hugh A. Clarke for three years. After a brief period in Cincinnati he returned to Philadelphia in 1874, and became organist and choirmaster at St Clement's Episcopal Church. Around 1877 he became organist at Christ Church, then moved to the Church of the New Jerusalem (Swedenborgian), where he served for many years as organist and choirmaster. Among the composition prizes he won were the Abt Male Singing Society Prize in 1878, the Cincinnati Festival Association Prize in 1882 for his setting of Psalm xlvi (judged by Saint-Saëns, Carl Reinecke and Theodore Thomas), and

three prizes awarded by the Mendelssohn Club of New York in the 1880s. Colleagues honoured him with six testimonial concerts between 1882 and 1916.

Gilchrist founded the Philadelphia Mendelssohn Club, which he conducted from 1874 to 1914; he taught privately and at the Philadelphia Musical Academy from around 1881, and conducted the Symphony Society of Philadelphia from 1892 to 1899. In 1891 he founded the Manuscript Music Society, dedicated to the promotion and performance of music by local composers. The University of Pennsylvania awarded him an honorary doctorate in 1896, the year he became one of the founder members of the American Guild of Organists.

Gilchrist was a serious, romantic composer whose works are thoughtfully constructed. Important American firms published most of the choral music and songs. The Philadelphia Orchestra performed his Symphony in C during its first season in 1901. He edited the Presbyterian Church's official hymnal (1895) and *The Hymnal for Use in Congregational Churches* (1902), and co-edited 17 widely used music readers.

MARTHA FURMAN SCHLEIFER

Gilels, Emil (Grigor′yevich) (*b* Odessa, 19 Oct 1916; *d* Moscow, 14 Oct 1985). Russian pianist. He began his piano studies with Yakov Tkach and Bertha Ringold at the Odessa Institute of Music and Drama and gave his first recital at the age of 12. In 1931 he won the National Competition of the Ukraine and the following year played for Artur Rubinstein, who expressed astonishment at his virtuoso prowess. Between 1935 and 1937 he studied with Heinrich Neuhaus in Moscow and in 1936 he was awarded second prize in the International Competition in Vienna. His first prize in the 1938 Concours Eugène Ysaÿe in Brussels brought him to international prominence and launched a career which was soon thwarted by the start of World War II. Gilels returned to Russia, working as Neuhaus's assistant at the Moscow Conservatory, where he taught intermittently throughout his life. After the war he played throughout the Soviet bloc countries and also gave two-piano recitals with Jacov Flier and concerts with his violinist sister Elizabeth. In 1945 he formed a trio with Leonid Kogan (his brother-in-law) and Rostropovich and in 1947 he appeared as a soloist outside the USSR for the first time, later touring Italy, Scandinavia, Switzerland, France and Belgium. His long delayed American début took place in 1955 when he appeared with the Philadelphia Orchestra under Ormandy in Tchaikovsky's First Concerto. He repeated this concerto with Bernstein in New York and gave a unanimously praised solo recital at Carnegie Hall. His British début in 1959 met with similar acclaim. By 1968 he was touring for as many as nine or ten months every year. In 1981 he suffered a heart attack after giving a recital at the Concertgebouw in Amsterdam, and from then on his health declined.

Emil Gilels

Gilels's recordings, many pirated, chart a development from early impulsiveness and heaven-storming bravura to readings no less exciting but imbued with the greatest subtlety, delicacy and inner concentration. His youthful manner is exemplified by discs of Liszt's Fantasia on Themes from *Le nozze di Figaro* and Ravel's Toccata, his later performances by a selection from Grieg's *Lyric Pieces* in which, to quote his own words, he 'discovered a whole new world of intimate feeling'. He recorded his commanding, intensely poetic readings of the Beethoven

and Brahms concertos several times, and had virtually completed a set of Beethoven's sonatas at the time of his death. His magisterial technique and rich, sumptuous sonorities are supremely in evidence in his 1955 recording of Rachmaninoff's Third Concerto, while his highly strung reading of Skryabin's Fourth Sonata recorded at a Moscow recital displays the sort of wildness he allowed himself when playing before Russian audiences. Gilels was awarded the Stalin Prize in 1946 and declared a People's Artist in 1954. He received the Order of Lenin in 1961 and again in 1966, the Order of Commandeur Mérite Culturel et Artistique de Paris in 1967 and Belgium's Order of Leopold in 1968.

BRYCE MORRISON

Giles, Alice (Rosemary) (*b* Adelaide, 9 May 1961). Australian harpist. Having studied with the Salzedo method exponents June Loney (Sydney) and Alice Chalifoux (Cleveland, Ohio), she came to prominence as winner of the 1982 Israel Harp Contest. In 1994 she recorded a CD devoted to the solo harp music of Carlos Salzedo, and the same year was co-founder of *Eolus*, the international society dedicated to promoting his work and ethos. With an interest in experimental techniques and a repertory centring on later 20th-century works, she has recorded the Ginastera and Jolivet concertos, is a notable interpreter of Berio's *Sequenza II* and has commissioned several new works for the Camac 'Blue' electric harp she acquired in 1999. She taught at the Frankfurt Hochschule from 1990 to 1998, and in 1999 was appointed to teach at the School of Music in Canberra.

ANN GRIFFITHS

Giles [Gyles], **Nathaniel** (*b* in or nr Worcester, *c*1558; *d* Windsor, 24 Jan 1634). English composer, organist and choirmaster. He was the son of William Gyles (*d* 1568), a parishioner of St Clement's, Worcester, and a member of a well-known Worcester family. Thomas Giles, vicar-choral at St Paul's Cathedral, London, was apparently not related. Nathaniel was probably a pupil of John Colden (*d* 1581), Master of the Choristers at Worcester Cathedral from 1569 to 1581; he was a witness to Colden's will, and a beneficiary. Giles succeeded Colden at the cathedral until Michaelmas 1585, when he became Master of the Children, lay clerk, and one of the organists at St George's Chapel, Windsor. On 14 June 1587, Giles married Anne Stainer at St Helen's, Worcester. One of their sons (also called Nathaniel *b* 1591) received the DD and became a canon of both Windsor and Worcester.

Giles received the BMus from Oxford on 26 June 1585, at which time he described himself as having been a student of music for 12 years (i.e. since 1573, when he was 15 years old). It is possible that he had been a clerk at Magdalen College in 1577. He supplicated for the DMus in 1607; for some reason he did not compose the required 'choral Hymn of 8 Parts', but the doctorate was finally granted in 1622.

He was appointed Gentleman and Master of the Children of the Chapel Royal on 9 June 1597; he kept both this and the Windsor appointments until his death. From 1600 to 1602 he was involved in the production of choirboy plays, and collaborated with Henry Evans at the Blackfriars Theatre, beginning in the autumn of 1600. Giles and Evans ran into trouble for using the authority of Queen Elizabeth to conscript boys more with a view to their acting in the plays than for their singing in the Chapel Royal choir. Because of a complaint their collaboration ended in 1602, although the choirboys continued to be used in plays into the reign of James I. According to Wood, Giles was 'noted as well for his religious life and conversation (a rarity in musicians) as for excellence in his faculty'. He was buried in the chapel at Windsor.

Giles's anthems, only a few of which were printed, reflect the contemporary diversity of approaches to the genre: the two works in Leighton's *Teares or Lamentations* (1614[7]) are in simple four-part homophony; others, such as the five-part *O give thanks to the Lord*, are densely contrapuntal. Most are verse anthems, calling for an alternation of soloists and chorus with organ accompaniment. In his service music, Giles was partial to canon technique; one entire service is canonic.

WORKS

MSS source information for all sacred works in Daniel and Le Huray

Edition: *Nathaniel Giles: Anthems*, ed. J.B. Clark, EECM, xxiii (1979) [A]

J. BUNKER CLARK

Gilfert, Charles H., jr (*b* ? Hesse-Cassel, Germany, 1787; *d* New York, 30 July 1829). American theatre manager and composer. He probably arrived in New York in 1802. He is listed as a music teacher in the New York Directory for 1805, presented a concert and ball in Charleston, South Carolina, in 1807, and opened the Commonwealth Theater in New York in 1813. After that date his activities are clearly documented. In 1815 he moved to Charleston where he served as musical director of the theatre managed by his father-in-law Joseph George Holman. After Holman's death in 1817, Gilfert assumed management of the

Charleston theatre and the following year established a theatre circuit that included Savannah and Augusta. In 1817 he had created a circuit in Virginia which included theatres in Norfolk and Richmond. These two circuits continued until 1825 when, owing to financial problems, Gilfert moved to Albany, New York. Two years later he returned to New York City where he opened the San Souci Theater. He remained there until his death.

Five songs, three to poems by Thomas Moore, were composed before 1813, but most of his 32 extant songs date from 1813–25, his years of intense theatre activity. Seven were from ballad operas: *The Spanish Patriots* (1814), *Freedom Ho* (1815), *The Champions of Freedom* (1816) and *Virgin of the Sun* (1823). Gilfert's 27 extant piano pieces include eleven waltzes, three marches, eight sets of variations and five other pieces.

JAMES R. HINES

Gilfry, Rodney (*b* Covina, CA, 11 March 1959). American baritone. He made his European début in 1986 at Hamburg as Mozart's Figaro. After singing Demetrius (*A Midsummer Night's Dream*) at Los Angeles in 1988, he returned in roles that included the four villains (*Les contes d'Hoffmann*), Mozart's and Rossini's Figaro, Orestes (*Elektra*), Ford, Papageno, Guglielmo, Don Giovanni (of which he has made a vivid recording under Gardiner) and Malatesta. In 1988 he also sang Petya in Liebermann's *La forêt* at Schwetzingen and, in 1989, Lescaut (*Manon*) and Otho (*L'incoronazione di Poppea*) at Geneva. From 1990 he has appeared regularly at Zürich, where he has undertaken such roles as Mercutio (*Roméo et Juliette*), Ernesto (*Il pirata*), Massenet's Herod, and Ford. Gilfry's other parts have included the title role in the US première of Wolfgang Rihm's *Oedipus* at Santa Fe (1991), Olivier (*Capriccio*) at Chicago (1994) and Valentin (*Faust*) in San Francisco (1995). He made his Metropolitan début as Demetrius in 1996. His strong lyric baritone and fine stage presence make him an ideal Billy Budd, a role he sang at Geneva (1994) and for his débuts at Covent Garden (1995) and the Opéra Bastille (1996).

ELIZABETH FORBES

Gil García, Bonifacio (*b* Santo Domingo de la Calzada, Logroño, 14 May 1898; *d* Madrid, 22 Dec 1964). Spanish folklorist and composer. He received his early musical education in Burgos, where, influenced by the musicologist Nemesio Otaño, he became deeply interested in traditional folk music. He qualified as a military bandmaster in 1923 and served as bandmaster for the Spanish army until 1960. In 1926 he founded the Conservatory of Music at Badajoz, where he was the director and an instructor for 20 years. As an active collaborator with the Centro de Estudios Extremeños (1926–46) and the Spanish Institute of Musicology (from 1944) he participated in many field trips throughout the provinces of Extremadura (1924–31), La Rioja (1944–5), Granada (1946, 1960), Ciudad Real (1947), Toledo (1949), Cádiz (1957), Badajoz (1958) and Ávila (1959). He was a fellow of the Fundación Juan March, a corresponding member of the Hispanic Society of America and a member of the IFMC, and chaired many conferences throughout Spain as well as in Paris, Oporto and Lisbon. As a composer he is best remembered for his symphonic poem *En una aldea extremeña* (1944) and the oratorio *El Santo* (1964). Gil García's works are fundamental to the study of Spanish folk music; they provide both penetrating insights, and innumerable transcriptions of texts and melodies with contextual analyses. His two most important studies are the *Cancionero popular de Extremadura* (1931, for which he acquired the First National Prize in Music in 1932) and the *Cancionero taurino* (1964–5); he also produced numerous essays and anthologies of popular songs, and edited recordings.

ISRAEL J. KATZ

Giliardi, Arnolfo [Ser Arnolfo da Francia; Arnolfo d'Arnolfo] (*fl* 1473–92). Franco-Flemish composer. From 1473 to 1492 he lived and worked sporadically in Florence, employed as a singer at the cathedral, the baptistry and the SS Annunziata. He also taught music to the novices at the SS Annunziata's convent, where he resided for a number of years. He was a friend of Lorenzo de' Medici, for whom he recruited singers, and he knew the English theorist John Hothby, who mentioned him (Arnulphus Gilardus) in the *Dialogus in arte musicae*. In 1479 he was commissioned by the cathedral to write music for Holy Week (now lost) that was performed there well into the 16th century; a ceremonial motet in honour of Siena, *Sena vetus*, was composed for an unnamed patron in the mid-1480s. Only one work, *Le souvenir*, is set to a French text; it quotes the opening of Morton's chanson of the same name, though it continues differently. *Piangeran gli occhi mey* and *O invida fortuna* may be contrafacta of French chansons. The sacred works are set in alternatim style and paraphrase chant melodies while making abundant use of fauxbourdon. The surname 'Giliardi' comes only from the ascription of *Piangeran gli occhi*, which is hard to read with confidence. There is a distinct possibility that he is to be identified with the theorist ARNULF OF ST GHISLAIN and/or the writer and musician ARNOUL GREBAN.

FRANK A. D'ACCONE

Gille, Jacob Edvard (*b* Stockholm, 10 Aug 1814; *d* Stockholm, 8 Nov 1880). Swedish composer. As a musician, Gille seems to have been largely self-taught, and his principal occupation was as a notary in the government service. Despite his lack of formal training, he managed to acquire an impressive degree of technical skill, and his musical activities were varied and numerous. From 1842 to 1844 he taught the piano at the Stockholm Sångförening, and from 1850 to 1876 he was organist and choir director at the Catholic church in Stockholm, for which he wrote nine masses and many other works. He was also a conductor at two private Stockholm theatres, the Humlegårdsteater and the Mindre Teater, and he was elected to the Royal Academy of Music, Stockholm, in 1865.

Gille's output was large, comprising most musical genres. His choral works, in particular the masses, may be said to represent the tenets of a moderate Cecilianist position, although the contrapuntal writing is seldom carried through with any consistency and frequently lapses into pure homophony; at times, influences from composers like Spohr and Mendelssohn are clearly evident. A markedly linear texture predominates in his three organ sonatas (one of which consists of a fugue and two double fugues 'à 3 soggetti') which, however, remain little more than contrapuntal exercises. His orchestral and chamber music has in common with that of his Swedish contemporaries a strong debt to Viennese Classical models, both in formal structure and harmonic-melodic details. His composition textbook, 'based on Albrechtsberger, Fux, Koch, Beethoven, Schilling and others', provides a clue to his stylistic ideals. Although hardly original or imaginative, in his preference for large forms and his technical knowledge, Gille far surpasses the average Swedish amateur composer of his time.

Gillebert, Gloria Caroline. *See* TREBELLI, ZÉLIA.

Gillebert [Guillebert] **de Berneville** (*fl c*1250–80). French trouvère. The approximate period of Gillebert's activity can be deduced from references in his poems to prominent nobles and figures within the Arras poetic circle (Berneville is situated 7 km south-west of Arras). Among his four jeux-partis, Henri III, Duke of Brabant, and Thomas Herier appear as partners, while Charles d'Anjou, Raoul de Soissons, the Châtelain de Beaumetz, Hue d'Arras and a countess, possibly Béatrice de Brabant (sister of Henri III and widow of Guillaume de Dampierre) appear as judges. Dedicatees of chansons by Gillebert include

Charles d'Anjou, Huitace de Fontaines, Béatrice d'Audenarde and Colart le Boutellier. Apparently his poetry was much appreciated: *Je n'ëusse ja chanté* was designated a *chanson couronnée* by the Arras *puy*, seven works (including one uncertain and one doubtful) served as models for ten later poems, and Gillebert was probably the intended subject of a flattering reference in Roussiaus le Taillier's *Arras est escole de tous biens entendre* (R.630). Nevertheless, few of his poems survive in a large number of sources.

Neither original nor profound, Gillebert's talent lay in facility, grace and mastery of form. Playful and parodistic elements appear to advantage in, for example, *L'autrier d'Ais a la Chapele* and *Thumas Herier, j'ai partie*. He had a definite preference for short lines and heterometric constructions. Only five of his works use decasyllables (and only three of those consistently) while no more than seven are isometric. The number of lines per strophe is usually greater than the average in works by other poets; only four of his works have eight lines or fewer per strophe. Most frequently, three different line lengths are used per strophe, but *J'ai fait maint*, *J'ai souvent d'Amours*, *Je feisse chançons* and *Hé, Amours* each have four different line lengths, and *D'amours me vient* has six. Refrains are used prominently in half of the poems.

Most of the melodies are simple and forthright but not imaginative. Nearly a third unfold within the interval of a 6th, from the sub-final to the 5th degree, with occasional upward embellishment by one step. In a few other melodies this basic ambitus is exceeded only in one phrase. On the other hand there are four melodies, *Amours, vostre seignourie*, *Aucune gent*, *Onques mais si esbahis* and *Ja mès chançon*, that display the range of a 10th or 11th (*Ja mès chançon* departs sufficiently from the norm of Gillebert's modal practice to raise doubts concerning the accuracy of the single ascription). With the exception of *De moi douloureus*, which is of disputed authorship, all melodies are in bar form. Normally the first and third phrases end with *ouvert* cadences, while the second and fourth close on the final. In seven works the second phrase is basically a variant of the first. Some of the melodies clearly lack invention: the caudas often contain varying amounts of literal or varied repetition, a tendency that is most prominent in *Au besoing voit*.

Partly because of the limited range of the melodies, partly because of their repetition structure, there is normally a strong insistence on the final as a main tonal centre. Nevertheless there are occasional significant differences in modal structure between different readings of the same work. Although clear evidence of mensural notation is rare (as in the Chansonnier Cangé's reading of *Au besoing voit*), the disposition of ligatures in more than a third of the melodies is sufficiently regular and other melodies are frequently syllabic enough for an assumption of modal rhythm to appear acceptable. Normally it is the 2nd mode that is implied, although *Onques d'Amours*, which is decasyllabic, seems to call for the 3rd mode. But there are some phrase constructions that proceed from simple beginnings to more elaborate cadences and the stylistic appropriateness of modal rhythm for these is more doubtful.

THEODORE KARP

Gilles, Jean (*b* Tarascon, nr Avignon, 8 Jan 1668; *d* Toulouse, 5 Feb 1705). French composer. The son of an illiterate labourer, Gilles enrolled on 6 May 1679 in the choir school of the Cathedral of St Sauveur at Aix-en-Provence. His teacher was Guillaume Poitevin, who also taught a number of Provence's other most reputable composers, including Campra and Blanchard. In 1687 Gilles left the boys' choir but continued in the service of the cathedral. On 5 November 1688, at Poitevin's request, he shared the positions of *sous-maître* and organist with another student, Jacques Cabassol. Poitevin retired on 4 May 1693 and Gilles succeeded him as *maître de musique*. But despite an increase in his salary and several remunerative privileges his action in April 1695 in leaving without notice to become *maître de musique* of Agde Cathedral indicates that he was dissatisfied with his lot at Aix.

He soon attracted the attention of the Bishop of Rieux, who wanted him to succeed Campra as *maître de musique* of the Cathedral of St Etienne at Toulouse, although the position had recently been given to Michel Farinel. Farinel, for unknown reasons, left Toulouse in November 1697, and on 18 December 1697 Gilles, who was in Toulouse at the time, was appointed to direct the choir school.

In 1701 the Duke of Burgundy and the duc de Berry, grandsons of Louis XIV, visited Toulouse with great ceremony. Four of Gilles's motets, including *Diligam te, Domine*, were performed with applause during the celebrations. With the attention this event brought him, Gilles's reputation grew, and in July 1701 he was offered the directorship of the choir school at Notre Dame des Doms, Avignon. Evidently he agreed to accept, and Rameau was appointed to deputize until he arrived, but although Gilles may have spent a short time at Avignon he never left his post at Toulouse. He renewed his contract there for four years on 3 December 1701 and the chapter records show that he was still there when he died (there is no evidence to support suggestions that he died in Avignon).

In the 18th century Gilles's *Messe des morts* became one of the most famous works in all France. According to M.A. Laugier's *Sentiment d'un harmoniphile* (Amsterdam, 1756), 'Today there is seldom a funeral service with music (meloyl) without a performance of Gilles's mass'. It was performed at services for Rameau in 1764 and for Louis XV ten years later. It was praised by many critics, including Mattheson, who called it 'one of the most beautiful of musical works'.

With the motets of Lalande, Gilles's Requiem and the motets *Diligam te* and *Beatus quem elegisti* remained popular at the Concert Spirituel during the first three-quarters of the 18th century. *Diligam te* remained in the repertory of the royal chapel at Versailles until the fall of the monarchy in 1792.

Gilles's motets are constructed on the same principles as Lalande's, that is in the form of the Versailles *grand motet*. Like Lalande's, his orchestra is relatively independent of the chorus. His harmony is less dissonant than Lalande's; he made less use of 7ths. His fast movements often suggest dance rhythms, with frequent use of hemiola in those in triple time. His motets show his early maturity, and his earliest surviving works demonstrate exceptional expression and pathos, particularly the Lamentations (probably dating from 1692), which constitute one of the few choral settings for Holy Week by a French composer.

The choral writing in Gilles's later works shows a convincing balance between polyphony and homophonic declamation. His well crafted and expressive fugal choruses usually contribute substantially to the overall structure of his works. In the *Messe des morts*, for example, after a pattern alternating polyphony with homophonic, dance-like textures, the fugal 'Requiem aeternam' crowns a polyphonic development that has been unfolding throughout the work. In the *Te Deum* of 1697 two choral fugues ('Te per orbem' and 'Aeterna fac') frame an arresting trio, 'Tu devicto mortis' for three *basses-tailles*, which forms the centre of a completely symmetrical 11-movement structure. A similar design is found in the seven-movement *Cantate Jordanis incolae*.

The works identified as *petis motets* in two anthologies are known, or presumed, to be from larger works by Gilles; *Afferte Domine* and *Cantemus Domine* in the *Recueil de mottets* (*F-Pc* Rés.1899), however, are from *grands motets* by Lalande. Gilles undoubtedly composed *petis motets*, but none has survived in its original form.

WORKS

Messe en D, 5vv, bc, *F-Pc*

Messe des morts, B♭, 5vv, str, bc (Paris, 1764), with carillon added at the end of the mass by Mr Corrette; ed. L. Boulay and J. Prim (Paris, 1958); ed. in RRMBE, xlv (1984)

Grands motets, soloists, chorus (4 or 5vv), bc, most with str, some with wind (fls/obs/hns): Beatus quem elegisti: Benedictus Dominus Deus meus; Cantate Jordanis incolae; Diligam te, Domine, ed. in Hajdu, 1973; Dixit Dominus; Dixit Dominus ('très court'); Domine Deus meus; Laetatus sum; Laudate nomen Domine; Paratum cor meum; Te Deum, 1697, ed. JOHN HAJDU HEYER

Gilles le Vinier. *See* LE VINIER, GILLES.

Gillespie, Dizzy [John Birks] (*b* Cheraw, SC, 21 Oct 1917; *d* Englewood, NJ, 6 Jan 1993). American jazz trumpeter, composer and bandleader. He was one of the principal developers of bop in the early 1940s, and his styles of improvising and trumpet playing were imitated widely.

1. Life. 2. Musical style.

1. LIFE. Gillespie taught himself to play the trombone and the trumpet and later took up the cornet. His musical ability enabled him to attend Laurinburg Institute, North Carolina, in 1933, for the school needed a trumpet player for its band. During his years there he practised the trumpet and piano intensively, still largely without formal guidance. In 1935 he moved to Philadelphia and soon joined a band led by Frankie Fairfax, which also included the trumpeter Charlie Shavers. Shavers knew many of the trumpet solos of Roy Eldridge, and Gillespie learnt them by copying Shavers. While he was in Fairfax's band his clownish behaviour led to the nickname Dizzy.

Moving to New York in 1937, Gillespie earned a job with Teddy Hill's big band, largely because he sounded much like Eldridge, who had been Hill's trumpet soloist; the band toured France and Great Britain for two months. On his return to New York Gillespie worked with Al Cooper's Savoy Sultans and the Afro-Cuban band of Alberto Socarras as well as with Hill. In 1939 he joined Cab Calloway's big band, where, largely because of his friendship with Mario Bauzá, who was also in the band, he began to develop an interest in the fusion of jazz and Afro-Cuban music. During the same period he was beginning to diverge from Eldridge's playing style both formally, in his solos with the band – such as *Pickin' the Cabbage* (1940, Voc./OK) – and in an informal context, with the group's double bass player Milt Hinton.

While on tour in 1940 Gillespie met Charlie Parker in Kansas City. Soon he began participating in after-hours jam sessions in New York with Parker, Thelonious Monk, Kenny Clarke and others. This group of young, experimenting players gradually developed the new, more complex style of jazz that was to be called bop. Recordings, such as *Kerouac* (1941, on the album *The Harlem Jazz Scene*, Eso.), made at Minton's Playhouse, exemplify this emergent style.

A dispute with Calloway led to Gillespie's dismissal in 1941. He then worked briefly with many leaders, including Lucky Millinder and Earl Hines (whose band also included Parker). With Millinder he recorded a near-bop solo within a swing-band context on *Little John Special* (1942, Bruns.). After his solo the band plays a riff which he developed into the composition *Salt Peanuts*. During the winter of 1943–4 Gillespie led a small group with the double bass player Oscar Pettiford. In 1944 Billy Eckstine, the singer with Hines's band, formed a bop band and engaged Gillespie to play and to be musical director. At about the same time Gillespie made some of the first small-group bop recordings, including *Salt Peanuts* (1945, Guild) and *Hot House* (1945, Guild), under his own name with Parker.

In 1945 Gillespie organized his own short-lived big band and in March formed a bop quintet with Parker. He later expanded the group to a sextet, but his desire to lead a big band inspired him to try once more in 1946. The following year the band made pioneering attempts to fuse Afro-Cuban rhythms with jazz (*see* AFRO-CUBAN JAZZ). Gillespie added percussionist Chano Pozo to the band which recorded *Cubana Be/Cubana Bop* (1947, Vic.; written by George Russell) and *Manteca* (by Gillespie, Pozo and Gil Fuller). In addition to Pozo the band included, in 1946, John Lewis, Milt Jackson and Kenny Clarke, who, with Percy Heath, went on to form the Modern Jazz Quartet. After disbanding in 1950 Gillespie organized a sextet.

Gillespie toured as a featured soloist with Stan Kenton from late 1953 to early 1954 and then resumed his role as leader. In 1954 he began using a trumpet built for him with the bell pointing upwards at a 45° angle. The design became his visual trademark (see illustration).

In 1956, after several years leading small groups, Gillespie formed another big band specifically to tour the Middle East and South America on cultural missions for the US State Department. Two years later he returned to leading small groups, with which he continued to perform and record extensively into the late 1980s. In addition he appeared occasionally in all-star groups such as the Giants of Jazz (1971–2), a sextet with Kai Winding, Sonny Stitt, Thelonious Monk, Al McKibbon and Art Blakey, and was a regular performer on Caribbean cruise ships that featured jazz artists. In 1988 he formed the Latin-jazz orientated United Nation Superband. He became an elder statesman of jazz, and his outgoing personality and impish sense of humour endeared him to the general public through appearances on television.

2. MUSICAL STYLE. Gillespie's first recorded solos sound much like those of Roy Eldridge. But during the years 1939 to 1944 he established his own style: he began using a lighter vibrato; his phrasing contained both swing

Dizzy Gillespie demonstrating his unorthodox technique

quavers (ex.1*a*) and even quavers (ex.1*b*) instead of being dominated by the former; his melodies became more

Ex.1

chromatic (sometimes self-consciously so), especially in his extensive use of the lowered second degree of the scale (used more sparingly by his swing-era elders Eldridge and Coleman Hawkins); and early versions of some of his characteristic melodic formulas (such as the phrase in triplets in ex.2 began to appear. By the mid-1940s his mature style was fully formed.

Ex.2 From C. Parker: *Blue 'n Boogie* (1951, Okiedoke); transcr. T. Owens

♩ = *c*220

* = lift
† = fall off

Gillespie's was a dramatic style, filled with startling contrasts. Simple, almost folklike phrases could suddenly give way to long, complex phrases filled with fast notes (ex.3). Similarly, soft, mid-register phrases could suddenly

Ex.3 From *Hot House* (1945, Guild); transcr. T. Owens

♩ = *c*170

give way to high notes played fortissimo. And the drama was visual as well as aural, for he allowed his cheeks to fill with air when he played; over the years his cheek muscles stretched, and the increase in the size of his face when he played was striking. His tone was less full and rich than that of some of his predecessors and many of his followers, and sometimes he seemed little concerned about accurate intonation. But his fertile melodic and rhythmic imagination, his technical facility and his tireless dedication to bop earned him a place among the great figures of jazz history.

Gillespie wrote and collaborated with others on a variety of well-known pieces: the chromatic *Woody 'n' You*, filled with half diminished seventh chords, one of his favourite harmonic sonorities; the simple, humorous and riff-like *Salt Peanuts* (based on *I got rhythm* and written in collaboration with Kenny Clarke); the frantically fast *Bebop*; the Latin-tinged *A Night in Tunisia* and *Manteca*; the melodically complex *Groovin' High* (based on *Whispering*) and *Anthropology* (based on *I got rhythm* and written in collaboration with Charlie Parker); the harmonically ingenious *Con Alma*; and the basic blues theme *Birks Works*.

WORKS
(selective list)

Bebop (1945, Manor); Groovin' High (1945, Guild); Hot House (1945, Guild); Salt Peanuts (1945, Guild), collab. K. Clarke; A Night in Tunisia (1946, Vic.); Anthropology (1946, Vic.), collab. C. Parker; Manteca (1947, Vic.), collab. G. Fuller and C. Pozo; Woody 'n' You (1947, Vic.); Birks Works (1951, Dee Gee); Con Alma (from Duets with Sonny Rollins and Sonny Stitt; 1957, Verve)

THOMAS OWENS

Gillet, Georges(-Vital-Victor) (*b* Louvier, 17 May 1854; *d* Paris, 9 Feb 1920). French oboist and teacher. He studied at the Paris Conservatoire with Charles Colin, receiving his *premier prix* in 1869. His orchestral positions included the Théâtre Italien (1872–4), the Concerts Colonne (1872–6), the Société des Concerts du Conservatoire (1876–99) and the Opéra-Comique (1878–95). From 1879 he also played for 15 years with the Société de Musique de Chambre pour Instruments à Vent, with which he took part in many premières, including Gounod's *Petite symphonie* and the Lefebvre Suites. In 1881 he became the youngest-ever professor at the Paris Conservatoire, a position which allowed him to exercise considerable influence on the development and technique of his instrument until his retirement in 1919. He was responsible for the establishment of the Triébert model A6 as the *Système du Conservatoire*, and his *Etudes pour*

l'enseignement supérieur du hautbois have become a staple part of the oboist's practice routine. In 1904 he was made a member of the Légion d'Honneur. The most famous for his students were Louis Bas, Louis Bleuzet, Georges Longy, Marcel Tabuteau, Alfred Bartel, Pierre Mathieu, and his nephew Fernand Gillet (1882–1980), who was principal oboe in the Boston SO from 1925 to 1946 and taught at the New England Conservatory in Boston, and in Montreal.

GEOFFREY BURGESS

Gillett & Johnston. English firm of bell founders. It pioneered the extension of the range of the carillon with both higher- and lower-pitched bells. Between World Wars I and II its exports of carillons, with those of JOHN TAYLOR & CO., made the carillon widely known outside Europe for the first time.

The firm was founded by a clockmaker, William Gillett, who had a shop first in the village of Hadlow, Kent, then in Clerkenwell, London, in the early 19th century. In 1844 it moved to Croydon, Surrey, where it began manufacturing tower clocks under the name Gillett & Bland. In 1877 Gillett formed a partnership with Arthur Johnston (*d* 1916). Under the name of Gillet & Johnston the firm cast chimes and swinging peals. In the late 1890s the firm, following principles developed by Canon A.B. Simpson through his research on bell partials, devised a method of casting bells better in tune with themselves and with others in a set (*see* BELL (i), §2). Cyril Frederick Johnston (1884–1950) succeeded his father in 1916 and continued his work on bell tuning. In 1918 he began to make small carillons; these instruments provided the basis for the development of the first four and a half octave carillon (53 bells), for Park Avenue Baptist Church, New York (1925). Johnston's casting of bells (the largest, an *e*, weighed 9.98 tonnes) and the mechanism he devised to play them earned him a reputation as an excellent designer and engineer. The lower bells, however, developed an unwanted partial, a 'wild' fourth, which was never completely eradicated. Other important 'grand' carillons built by the firm include those for the University of Chicago (72 bells; 1932), the Parliament Buildings, Ottawa (53 bells; 1927), and the Catholic University of Leuven (48 bells; 1928). The firm's interest in carillons waned after the death of C.F. Johnston.

PERCIVAL PRICE/KAREL KELDERMANS

Gillier, Jean-Claude (*b* Paris, 1667; *d* Paris, 30 May 1737). French composer. He entered the choir school at Notre Dame in 1674 under the instruction of Jean Mignon. He was in Amsterdam sometime around 1690, but had returned to Paris by 1692. In 1693 he was appointed *basse de violon* player in the orchestra of the Comédie-Française, a post he held for 30 years. By 1694 he was working for the playwright Regnard and until 1717, when he stopped writing for the Comédie-Française, he collaborated with several authors, notably F.-C. Dancourt with whom he worked on many productions, both for the Comédie-Française and for aristocratic entertainments. Apparently the plays of Regnard and Dancourt, with Gillier's music, together with Molière's dramas, provided the aging Louis XIV with what little entertainment he permitted himself. From 1713 onwards, Gillier was involved in the productions of the Théâtres de la Foire, working extensively with Lesage and other popular playwrights, including Fuzelier, D'Orneval and Favart; he was concerned in some musical capacity with over 70 plays up to 1735. He may have made several visits to England: his *Collection of New Songs ... Sett to Musick by Mr. Gillier* was published in London about 1698, he provided two songs for William Burnaby's *The Ladies' Visiting-day*, given in 1701, took part in a concert in York Buildings in 1703, and wrote the music for Farquhar's *The [Beaux] Stratagem* in 1707; a later visit, between 1716 and 1727, is supported by the publication of a *Recueil d'airs ... serieux et à boire ... composé en Angleterre ... en MDCCXXIII*, and by a record of payment from Lincoln's Inn Fields to 'Mr Gillier of the Musick for a Hand Organ used in Proserpine' during the 1726–7 season (probably *The Rape of Proserpine* by Lewis Theobald). Despite Gillier's large output, and his long period in the public eye, his career is little documented and his death went largely unremarked. But his collaborators Lesage and D'Orneval paid enthusiastic tributes to his fame, talents and devotion in the 1722 edition of *Le Théâtre de la Foire*, which included as an appendix the music to the plays published.

The tone of Gillier's work at both theatres seems to have been one of cautious innovation. His first commission with Regnard, *La sérénade*, involved simply the overhauling of once-used *airs*; but there was a public demand for music with plays, and instrumental sections were increasingly used. The addition of prologues to old plays gave opportunity for newly composed music, as did the divertissements often added after the final acts. The format of the plays written for the fairs was less amenable to new music. The vaudeville, with new words set to a well-known tune, was the staple fare, and it was the musician's job to find a tune appropriate to the new words, possibly to orchestrate it, and to direct its performance. Much of the entertainment lay in the skill with which familiar tunes were adapted to new situations: a *double entendre* could be implied by the choice of a tune whose original first line (or *timbre*) would conflict with the new words. Dialogue songs were effective in this respect. In *La princesse de Carizme* (Lesage, 1718) Harlequin and the Prince converse, with alternating lines of the same tune, outside an asylum, while three inmates interrupt, each with his own *timbre*; the effect is of a jigsaw of familiar tunes, which are made incongruous by juxtaposition.

One of Gillier's main contributions was the introduction of an increasing proportion of new music. As in the plays for the Comédie-Française, there was opportunity for original composition in the divertissements, and in the

vaudeville finale. His tunes are folklike and easily singable. His orchestration is mainly restricted to strings, though music for special occasions or depicting an exotic situation may demand larger or more varied forces. When *Les musettes de Suresnes* (possibly a revised version of the Dancourt play *Les vendanges de Suresnes*, given at the Comédie-Française in 1695) was given at Lyons in 1710 between 15 and 25 separate parts were required, while the parody of *Télémaque* given in 1715 required eight violins, one contrabass, flute, oboe, bassoon, two horns and harpsichord. This was the most ambitious orchestration yet attempted at the Théâtre de la Foire; Gillier's normal restraint may be attributed more to the restrictions imposed by the Opéra on other theatres than to any lack of imagination.

Gillier had an elder brother Pierre (*b* Paris, 1665), sometimes known as 'Gillier l'aîné' while Jean-Claude was called 'le jeune'; a pupil of Michel Lambert, Pierre held a musical appointment in the royal household and by 1691 was established as a singing teacher. He published a collection *Livre d'airs de symphonies meslez de quelques fragmens d'opéra* (1697), and songs in Ballard collections between 1699 and 1713. A son of Jean-Claude, known as 'Gillier le fils', was a bass player in the Comédie-Française orchestra and collaborated with playwrights and the Opéra-Comique in the 1720s and 30s; he may have contributed music to the plays *Le bouquet de roy* and *Les deux suivantes* (both given at the Foire St Laurent, 1730) and *L'Europe et la Paix*, and he wrote songs which were published in the *Mercure de France*. A Gillier known as 'the younger' was active in London about the middle of the century; this may be 'le fils', but proof of any relationship to the other Gilliers is lacking. He was an instrumental composer, publishing eight trio sonatas and a concerto (London, 1755) and, as his opp.2 and 3, two sets of harpsichord lessons.

WORKS

performed in Paris and all printed works published there; all works for the Théâtres de la Foire published in A.-R. Lesage and D'Orneval: Le Théâtre de la Foire (Paris, 1721–37) unless otherwise stated. Vocal parts of music to plays by Dancourt published in Le Théâtre de M. Dancourt (Paris, 1760).

MARY HUNTER

Gillis, Don (*b* Cameron, MO, 17 June 1912; *d* Columbia, SC, 10 Jan 1978). American composer. He was trained in music at Texas Christian University (BA and BM) and later studied at North Texas State University (MM 1943). After a year as production director for NBC radio in Chicago, he was transferred in 1944 to New York, where he was a producer and also composed, conducted and wrote radio scripts (for, among other programmes, the NBC SO broadcasts under Toscanini). From 1958 to 1961 Gillis was vice-president of the National Music Camp at Interlochen, Michigan. After serving as chairman of the music department at Southern Methodist University (1967–8) and chairman of fine arts and director of media instruction at Dallas Baptist College (1968–72), he was appointed composer-in-residence and director of the institute for media arts at the University of South Carolina (1973–8).

Although he composed widely, if conservatively, in traditional genres, Gillis often based his music on

American subject matter and popular and traditional musical source materials. But he was best known as a delver into wit and whimsy: as early as 1937, in *The Woolyworm* and *Thoughts Provoked on Becoming a Prospective Papa*, both for orchestra, he revealed a jocular bent, which was turned almost full circle in the highly successful 'symphony for fun', Symphony no.5½ (1947), one of the few American works ever performed by Toscanini; it was also choreographed for the Festival Ballet, London, under the direction of Dorati. A number of his works for band have become staples in the repertory. He is the author of *The Unfinished Symphony Conductor* (1967) and *The Art of Media Instruction* (1973).

WORKS

Ops: The Park Avenue Kids (1), 1957; Pep Rally (2, Gillis), 1957; The Libretto (1), 1958; The Legend of Star Valley Junction, 1961–2; The Gift of the Magi (1, after O. Henry), 1966; World Premiere, 1966–7; The Nazarene (liturgical drama, 1), 1967–8; Behold the Man, 1973;

Other orch: The Panhandle, suite, 1937; The Woolyworm, 1937; Thoughts Provoked on Becoming a Prospective Papa, suite, 1937; 10 syms., 1936–67; Intermission – 10 Minutes, 1940; Prairie Poem, tone poem, 1943; The Alamo, tone poem, 1944; A Short Ov. to an Unwritten Opera, 1944; To an Unknown Soldier, tone poem, 1945; Rhapsody, hp, orch, 1946; Tulsa: a Sym. Portrait in Oil, 1950; Dude Ranch, suite, 1967; 2 pf concs.

Band: Band Concert Suite, 1958; The Land of Wheat, 1959; Saga of a Pioneer, 1961

Str qts, 1936–47

Other chbr and solo inst: 3 suites, ww qnt, 1938, 1939, 1939; Sonatina, 4 tpt, 1943

H. WILEY HITCHCOCK/MICHAEL MECKNA

Gilly, Dinh (*b* Algiers, 19 July 1877; *d* London, 19 May 1940). French baritone. After studies in Toulouse and Rome he won a *premier prix* at the Paris Conservatoire in 1902 and made his début on 14 December of that year as Silvio in *Pagliacci* at the Opéra, where he remained until 1908. He sang in Latin America, Spain, Germany and Monte Carlo. From 1909 to 1914 he was a member of the Metropolitan Opera, with which he sang Sonora in the world première of *La fanciulla del West*, Rigoletto, Count di Luna, Amonasro, Lescaut (*Manon*), Albert (*Werther*) and other leading roles. In 1911 he made his Covent Garden début as Amonasro and also sang Jack Rance (in the first London *Fanciulla*), Sharpless, Rigoletto and Athanaël in *Thaïs*. He appeared in several later seasons and was last heard in 1924 as Germont. He was admired as a highly musical and expressive singer, an excellent linguist and a fine actor. He taught in London, where his pupils included John Brownlee. Between 1908 and 1928 he made approximately 40 recordings displaying a rounded tone, a sophisticated style and a dramatic presence.

HAROLD BARNES/R

Gilman, Benjamin Ives (*b* New York, 19 Feb 1852; *d* Boston, 18 March 1933). American psychologist and ethnomusicologist. He studied at Williams College (AB 1872) and did postgraduate work as a Fellow in Logic at Johns Hopkins University (1881–2); he then attended the University of Berlin (1882), was a graduate student in psychology at Harvard (1883–5) and in 1886 studied at the University of Paris. He lectured at Princeton, Columbia and Harvard on the psychology of music (1890–92) and was assistant professor of psychology at Clark University (1892–3). He then became secretary of the Boston Museum of Fine Arts until his retirement in 1925.

Much of Gilman's musical research was given impetus by Mary Hemenway, who commissioned an expedition to study the Pueblo Indians; in 1890 she entrusted the study of the songs to Gilman, who was the first to scientifically analyse Amerindian melodies through recordings. He held that the Amerindians had their own set of conscious norms for intervallic relationships and, in his article on Zuñi melodies (1891), showed minute discrepancies in the deviations from the Western tempered scale. Stumpf pointed out technical flaws in the equipment that affected the recordings' reliability, while John Comfort Fillmore argued that the deviations from the Western scale were accidental and insignificant. Gilman's publication nevertheless served as a model for many later treatises based on recorded material.

In 1891 the Hemenway Expedition moved on to Hopi villages. The Hopi transcriptions, which include a chapter with a detailed description of his methodology, appeared both in standard music notation and in a more precise graphic notation. His tabular analysis of melodic intervals in the songs used the 'cents' measurement employed by A.J. Ellis and the German comparative musicologists. In 1893 Hemenway commissioned Gilman to record exotic music at the World's Columbian Exposition in Chicago. He had already recorded Chinese music for his 1892 article and returned with 101 cylinders of the performances at the Javanese, Samoan, Serbian and Kwakiutl Indian exhibits, which he never published; these appear to be the earliest extant recordings of indigenous music from Java, Samoa and Serbia. He also devoted six cylinders to the tunings of the individual gamelan instruments. The cylinder recordings he prepared for the 1893 exhibition were rediscovered in 1976 and now provide fundamental evidence of change in the structure and form of these musics during the 20th century.

SUE CAROLE DeVALE

Gilman, Lawrence (*b* Flushing, NY, 5 July 1878; *d* Franconia, NH, 8 Sept 1939). American music critic. He was self-taught in music, and by 1907 was proficient enough to prepare thematic guides to Richard Strauss's *Salome* and Debussy's *Pelléas et Mélisande*. After serving as music critic (1901), assistant editor (1903) and managing editor (1911) of *Harper's Weekly* he joined the staff of *Harper's Magazine* (1913) and then became music, drama and literary critic for the *North American Review*. In 1923 he was appointed music critic for the *New York Tribune* (later *Herald-Tribune*), a post he held until his death. From 1919 to 1939 he was programme annotator for the New York National SO (after 1928 the Philharmonic SO) and from 1921 to 1939 for the Philadelphia Orchestra; he was also radio commentator for the broadcasts conducted by Toscanini (1933–5).

Gilman's criticism was rooted in the tradition that holds that music is ideally a vehicle for the expression of philosophical ideas: he was a champion of Wagner, the impressionists (especially Debussy and Loeffler) and MacDowell. Although he published no essays on the course of music after 1914 he remained a sympathetic and intelligent critic of later musical developments. Devotees of opera considered him to be particularly gifted in describing the individual styles of singers.

WAYNE D. SHIRLEY

Gilmore, Patrick S(arsfield) (*b* Ireland, 25 Dec 1829; *d* St Louis, 24 Sept 1892). Irish-American bandmaster, impresario and composer. His birthplace cannot be confirmed (Ballygar, Co. Galway or Mullingar, Co. Westmeath), but his early years were spent in Ballygar. He began his musical career as a cornet player in the Athlone Amateur Band (Co. Westmeath) before emigrating to the USA in October 1849. He settled in Boston, where he secured a position with the music dealer and publisher John P. Ordway. He was also agent for and played the tambourine and cornet with the minstrel group, Ordway's Aeolian Vocalists. His first position as a bandleader was with the Charlestown Band, from which he went on to lead other Massachusetts Bands – the Suffolk Band (1852), the Boston Brigade Band (1853), and (in 1855) the Salem Brass Band. The Salem band acquired an enviable reputation under his direction, performing on many important occasions including the inaugural parade for President James Buchanan in Washington in 1857. Gilmore resigned the Salem post in 1858 to establish his own ensemble, known as Gilmore's Band. Its first appearance, at the Boston Music Hall on 9 April 1859, was followed by a series of concerts that were very favourably received. During the Civil War the band became attached to the 24th Massachusetts Infantry Regiment as part of the Union Army.

In 1864 Gilmore organized the first of the gigantic concerts that established his national reputation. For the inauguration of Michael Hahn as Governor of Louisiana he assembled a band of 500 members, a chorus of 6000, 50 cannons, and 40 soldiers to strike anvils, and even arranged for the simultaneous ringing of all the church bells in the city. These forces were doubled and tripled for the National Peace Jubilee and Musical Festival (1869) and the World Peace Jubilee and International Music Festival (1872), both held in Boston. The first of these attracted enormous crowds to the specially constructed 50,000-seat auditorium, where an orchestra of 1000 (led by Ole Bull), a chorus of 10,000 and six bands (including a bass drum measuring 8-feet in diameter with a shell of 25-feet in circumference) performed. Euphrosyne Parepa-Rosa sang the Bach–Gounod *Ave Maria* accompanied by 200 violinists. For the 1872 festival Gilmore obtained the services of Johann Strauss and his orchestra from Austria, the Band of the Grenadier Guards from England, the French Garde Républicaine band, the Prussian band of the Kaiser Franz Grenadiers, the US Marine Band and a host of instrumental and vocal performers totalling over 20,000 people.

Gilmore left Boston in 1873 to associate himself with the 22nd Regiment of New York. For his new band he recruited the very finest instrumentalists, and it became the foremost professional band in the USA for the next 19 years. In 1875 he leased P.T. Barnum's Hippodrome, which he converted into a picturesque indoor park, renaming it Gilmore's Garden; the band presented a highly successful series of 150 concerts there. Tours to the West Coast and Europe followed in 1876 and 1878, with Emma Thursby and Lillian Nordica as vocal soloists. Gilmore's band opened the first season at Manhattan Beach in summer 1879 and returned annually thereafter. Its winter season usually included promenade concerts at the 22nd Regiment Armory and other venues in New York. During the 1880s the Gilmore Band made extensive autumn and spring tours of the USA, performing one or two concerts each day. The summer season at Manhattan Beach was always extremely successful, as was an annual residency at the St Louis Exposition. Gilmore died while fulfilling that engagement in 1892 and was buried in New York with all the pomp accorded to a dignitary and leader of the highest order.

Gilmore composed a number of Civil War songs, including *Freedom on the Old Plantation*, *The Spirit of*

the North and *God save the Union* (1861); his most popular song was *When Johnny comes marching home* (1863), which first appeared as part of *The Soldier's Return March* and was later published separately under the pen name Louis Lambert. He also composed numerous marches (including *The Twenty-Second Regiment March*) and other short instrumental pieces, some of which were published under the imprint of Gilmore & Russell. In addition he was engaged in the manufacture of brass instruments as a partner in the firm of Gilmore, Graves & Co. (later Gilmore & Co., and Wright, Gilmore & Co.). Gilmore's reputation, however, rested on his activities as a bandmaster and impresario.

FRANK J. CIPOLLA

Gilse, Jan (Pieter Hendrik) van (*b* Rotterdam, 11 May 1881; *d* Oegstgeest, 8 Sept 1944). Dutch composer. He studied composition and conducting with Franz Wüllner at Cologne University (1897–1902). In 1902 he was awarded a prize for his First Symphony by the Beethoven Haus in Bonn. After studying with Humperdinck at the Akademische Meisterschule in Berlin, he worked as a conductor at the Bremen Opera, then at the Noord-Nederlandsche Opera in Amsterdam. In 1909 his Third Symphony was awarded the Michael Beer prize, which enabled him to work and study in Italy for two years. Afterwards he settled in Munich. During World War I van Gilse and his family returned to the Netherlands, and in 1917 he was appointed conductor of the Utrecht SO, with whom he gave many performances of works by contemporary French and Dutch composers. A conflict with the young Dutch composer Willem Pijper led to his resignation in 1922. After a short stay in Switzerland van Gilse settled in Berlin, where he started work on his autobiography (MS, *NL-DHgm*). He returned to the Netherlands, where he was appointed principal of the Utrecht Conservatory. In 1937 he resigned his position in order to devote himself to composition. In 1940 he completed his opera *Thijl*, based on the story of Tijl Uilenspiegel. After the Germans invaded the Netherlands in May 1940, van Gilse publicly opposed the banning of Jews from concert halls. After organizing a petition in protest against the Nazification of Dutch artistic life, he was accused of high treason and went into hiding. During this period his two sons, also active in the resistance movement, were killed by the Nazis. Van Gilse could not cope with his grief and died after a short illness.

In addition to his work as a composer, van Gilse played a role in founding institutions designed to promote the interests of Dutch composers: the Genootschap van Nederlandsche Componisten (1911), the Bureau voor Muziek Auteursrecht (BUMA, the composers' performing rights society, 1913). In 1935 van Gilse founded the Stichtung Nederlandsche Muziekbelangen to promote the performance of Dutch music. The foundation's archive containing microfilms of Dutch music manuscripts became, after van Gilse's death, the basis of the publishing house Donemus (founded in 1947).

Van Gilse took a relatively long time to develop a personal style as a composer. His German training, and the music of Mahler especially, left its mark on his early works up to 1916. Those written during and shortly after his years in Utrecht (1917–22) testify to his intensive study of the works of French composers such as Debussy, Ravel and Roussel, particularly in their use of short motifs, augmented chords, parallel harmonies and their striving after colourful, transparent orchestration. From these German and French influences, a synthesis gradually developed, culminating in the cantata *Der Kreis des Lebens* (1928–9), the opera *Thijl* (1938–40) and the unfinished declamation *Rotterdam* (1942). In these three works van Gilse achieved an individual style, which rejects the anti-Romanticism of the French-style works. In *Rotterdam* and *Thijl* he makes use of elements from folk music.

WORKS
(*selective list*)

Ops: Frau Helga von Stavern (Musikdrama, J. van Gilse), 1911–13; Thijl (dramatic legend, 3, H. Lindt, after C. de Coster), 1938–40

HANS VAN DIJK

Gilson, Paul (*b* Brussels, 15 June 1865; *d* Brussels, 3 April 1942). Belgian composer and teacher. He was given his first lessons in music theory by the organist of Ruisbroek, a village near Brussels, where he spent his youth, and he studied elementary harmony with C. Duyck, the director of the Anderlecht school of music. However Gilson was in the main self-taught; precociously talented, he started to compose at the age of 16. His aesthetic outlook was determined by two revelatory experiences before he was 21. In 1883 he was present at the Théâtre Royal de la Monnaie for a performance of *Der Ring des Nibelungen* by Angelo Neumann's company, and three years later the 'Concerts Populaires' in Brussels revealed to him the music of The Five. He learnt his craft more through the

study of scores than in Gevaert's composition course, which he followed at the Brussels Conservatory (1887–9). In 1889 he was awarded the Prix de Rome for his cantata *Sinaï*, a public performance of which aroused unwonted enthusiasm. The prizewinner's traditional journey took him to Bayreuth (1892), Paris (1893–4) and Italy (1895). The first performance of his *La mer*, on 20 March 1892 in Brussels, was a great success, and Gilson was acclaimed as the most representative Belgian composer of his time. This opinion was confirmed by the success the work had abroad, except in Paris. Appointed professor of harmony at the Conservatories of Brussels (1899) and Antwerp (1904), he gave up these two positions when he became inspector of music education (1909–30).

Gilson composed his most important works between 1890 and 1905. *La mer*, a set of 'symphonic sketches' intended to illustrate a mediocre poem by Eddy Levis, is his greatest work. This Impressionist piece, based on a single theme, comprises four movements in sonata form. Gilson obeyed the traditional rules of harmony but his orchestration was quite original. Like Strauss he manipulated orchestral masses with shrewdness, exploited differences of timbre to good effect and created an impression of grandeur by means of rich polyphonic writing. The qualities to be found in *La mer* reappeared in later compositions, although without providing any full confirmation of Gilson's putative talents. The oratorio *Francesca da Rimini*, based on Dante, is a work of exemplary clarity in its construction, although its language is markedly conventional. This work has the effect of a huge fresco which astonishes but leaves one unmoved. Gilson's only major work with no literary basis was the *Variations symphoniques*, originally composed for brass ensemble; this brilliant work gives proof of unusual inventive verve. Seeking a success in the theatre, Gilson composed *Prinses Zonneschijn* in the Wagnerian tradition. The score develops from two contrasting leitmotifs, one of them ascending, symbolizing youth and light, the other descending, evoking death and hate.

Whatever the qualities of these scores, none of them achieved the success of *La mer*. Disillusioned and embittered, Gilson was further exasperated by the way in which music was evolving. As a self-taught man who knew his craft in depth, he could not countenance the deliberate rejection of the rules which he had taken so much trouble to assimilate and on which he had founded his aesthetic ideas. Although a Romantic in imagination, he was fundamentally a Classical composer: he used only traditional forms and his harmonic language became more and more reliant on familiar chords. Since he was a poor melodist, he followed the example of the Russian school in making use of folk music and investigating the picturesque. Although his rhythmic writing was sometimes well conceived, Gilson was above all a master of orchestration.

After 1905 he somewhat neglected composition. He gave up writing more extended works, composed a lot for wind band or brass band, took up chamber music and also wrote a great deal for the voice. In addition he rewrote several of his scores. His most remarkable work of this period was the *Suite nocturne* for piano. This work, whose source was Bertrand's *Gaspard de la nuit*, is notably adventurous in certain passages of successive dissonant chords. Gilson also devoted increasingly more time to teaching. Although he was not a conservatory teacher for long, he played a central role in that he gave lessons throughout his life and wrote important theoretical works. His monumental *Traité d'harmonie* demonstrates his encyclopedic musical learning: to his theoretical exposition he appended numerous examples by major composers from J.S. Bach to Debussy, Ravel, Stravinsky and Schoenberg. He did his utmost to understand the developments of his contemporaries and to recognize that no rule is to be regarded as absolute. Despite his tolerance, Gilson held conventional rhetoric and traditional syntax in respect.

This is even more noticeable in his work on orchestration, *Le tutti orchestral*, in which the greater part of the examples are selected from the works of Beethoven, Wagner and Richard Strauss. Gilson thought it possible to enhance the effect of any music through orchestration – he even arranged some of Debussy's preludes. He considered that the orchestra of the Romantics was best suited to this, as he thought that the most mediocre music might be saved by means of grandiloquent artifices. Among his many pupils, those who remained faithful to his ideas grouped together in 1925 to form the 'Synthétistes'. Their aims were defined somewhat vaguely: 'To mould into well-defined, well-balanced forms everything that contemporary music has to offer: to synthesize'. The Synthétistes were not united by a common aesthetic and the formation of the group was due in large part to a need for publicity, since it was not easy for young composers to get their works published and played. Among the most important composers of the group were Bernier, Brenta, Poot and de Bourguignon who joined the group later.

In 1925 the same Gilson pupils also founded the *Revue musicale belge*, which continued in existence until 1939. Poot was its editor-in-chief and Gilson its artistic director. Gilson was involved in music criticism throughout his life and worked for numerous newspapers and journals. He also wrote a number of booklets for Belgian radio and left a short autobiography of a fairly anecdotal nature. In his writings one finds again that spirit of tolerance which marks his theoretical works, and his analysis of *The Rite of Spring* in the *Revue musicale belge* is a perfect illustration of this. According to Gilson, 'everything in this music is adventurous', but he emphasized the influence of Rimsky-Korsakov. He admitted that 'there is more than one concept of aesthetics' and 'that everyone is more or less bound by certain traditions, those which are rooted in the impressions one has received in one's youth', so that 'today's youth ... is in a better position than the men of yesterday and the day before to appreciate without bias Stravinskian tendencies'. Undoubtedly Gilson felt himself to be in the latter group. Gilson's importance lies above all in his activities as a teacher. A whole generation of Belgian composers profited from his vast musical learning, although it went back only as far as J.S. Bach. Despite his evident good intentions, he retained in his teaching the prejudices that resulted from his view of fidelity to tradition.

WORKS

(selective list)

DRAMATIC

Le démon (drame lyrique, 2, L. de Casembroot, after M.Y. Lermontov), 1890, Mons, Bourse, 9 April 1893

La captive (ballet), 1896–1900

Prinses Zonneschijn (légende féerique, 4, P. de Mont, after C. Perrault), Antwerp, Vlaamse, 10 Oct 1903; as La princesse Rayon de Soleil, Brussels, Monnaie, 9 Sept 1905
Gens de mer (Zeevolk) (drame lyrique, 2, G. Garnir, after V. Hugo), Antwerp, Vlaamse, 15 Oct 1904; in French, Brussels, Monnaie, 16 Dec 1929
Rooverslíefde (I briganti) (drame musical, 1, J.F. Elslanders), Antwerp, Vlaamse, 30 Jan 1910
Les deux bossus (ballet), 1910–21
Thamara (op, 3, L. du Catillon), inc.
Incid music for theatre and cinema

ORCHESTRAL

HENRI VANHULST

Gimel. *See* GYMEL.

Giménez [Jiménez] (y Bellido), Jerónimo (*b* Seville, 10 Oct 1854; *d* Madrid, 19 Feb 1923). Spanish composer and conductor. He studied music first with his father and then the violin with Salvador Viniegra. At the age of 12 he joined the orchestra of the Teatro Principal in Seville as a first violinist and at 17 became director of the Opera. Receiving a scholarship from the Diputación of Cádiz, he went to the Paris Conservatoire, where he studied with Alard, Savart and Thomas, winning first prizes in harmony and counterpoint in 1877. After travelling in Italy, he became director of the Teatro Apolo in Madrid in 1885, then of the Teatro de la Zarzuela, where he gave the first performance in Spain of Bizet's *Carmen.* He was also director of the Unión Artístico-Musical and the Madrid Concert Society, where he introduced works from the Classical German repertory and modern French and Russian compositions. He wrote orchestral and instrumental music, but his chief interest was the zarzuela, especially the *género chico* (one-act zarzuela). His music was inspired by Spanish folksong and folkdance, and his orchestration achieved skilled colouristic and dramatic effects. Orchestral selections from his chief works, *De vuelta del vivero, La tempranica* and *La boda de Luis Alonso*, remain popular favourites. He was elected to the Real Academia de Bellas Artes on 23 March 1914, but never took up this position.

WORKS

ZARZUELAS

first performed in Madrid unless otherwise stated

† – *vocal score published Madrid shortly after first performance*

†Las niñas desenvueltas (1, E. Arango), 1878, collab. R. Chapí; El esclavo, 1887; Escuela modelo, 1888; La tiple, 1889; †Tannhauser el estanquero (1, E. Gonzalvo), Apolo, 26 April 1890; †La república de Chamba (1, S. Delgado), 1890; †Tannhauser cesante (1, Gonzalvo), 1890; †Trafalgar (2, J. de Burgos), Barcelona, 1890; ¡Pero cómo está Madrid!, 1891; La cencerrada (1, G. Perrín and M. Palacios), 1892; †El hijo de su excelencia (1, L. Larra and M. Gullón), 1892; †La madre del cordero, 1892; El ventorrillo del Chato, 1892; †Candidita (1, Burgos), 1893; †La mujer del molinero (1, P. Iraizoz), 1893; †Los voluntarios, 1893

GUY BOURLIGUEUX

Giménez, Raúl (Alberto) (*b* Santa Fé, Argentina, 14 Sept 1950). Argentine tenor. He studied in Buenos Aires, making his début there in 1981 as Ernesto (*Don Pasquale*). In 1984 he sang Filandro (Cimarosa's *Le astuzie femminili*) at Wexford, returning as Lurcanio (*Ariodante*). He made his US début at Dallas (1989) and his Covent Garden début (1990) as Ernesto, returning as Almaviva and Don Ramiro (*La Cenerentola*). His repertory also includes Ferrando, Fenton, Elvino (*La sonnambula*), Tonio (*La fille du régiment*) and Lynceus (Salieri's *Les Danaïdes*), which he sang at Ravenna (1990) and has recorded; but his high-lying, keenly focussed voice and virtuoso coloratura technique are heard to best advantage in Rossini, in whose operas he is a specialist: as Gernando/ Carlo (*Armida*), Giocondo (*La pietra del paragone*), Florville (*Signor Bruschino*), Roderick Dhu and James V (*La donna del lago*), Count Alberto (*L'occasione fa il ladro*), Lindoro (*L'italiana in Algeri*) and Argirio (*Tancredi*), which he sang at La Scala (1993). Giménez's Rossini recordings include Don Ramiro, Narciso (*Il turco in Italia*) and Almaviva, the role of his Metropolitan début in 1996.

ELIZABETH FORBES

Gimpel, Bronislav (*b* Lemberg, 29 Jan 1911; *d* Los Angeles, 1 May 1979). American violinist. He studied first with his father, Adolf Gimpel, then with Moritz Wolfstahl in Lwów, Robert Pollack at the Vienna Conservatory (1922–6) and finally with Flesch (1928–9). In 1926 he was invited to play Paganini's famous Guarneri and this was followed by command performances before the King of Italy and Pope Pius XI. He was a prizewinner in the 1935 Wieniawski Competition. He led orchestras in Königsberg (1929–31), Göteborg (1931–6) and Los Angeles (1937–42); he also founded and conducted the Hollywood Youth Orchestra. After serving in the US Army (1942–5), he resumed his career in the USA and Europe. He was leader of the American Artist Quartet, and a member of the New Friends of Music Piano Quartet and the Mannes Piano Trio (1950–56). He toured Europe as a soloist from 1947 to the mid-1960s, held a masterclass in Karlsruhe (1959–61) and was leader of the Warsaw Quintet (1962–7). From 1967 to 1973 he was professor at the University of Connecticut and leader of the New England String Quartet. His many recordings cover most of the solo and chamber music repertories. Particularly impressive is his album of Bach's solo works.

Gimpel played with flair and effortless technique. His fiery temperament matured and mellowed in later years. His vibrato was intense and his interpretations authoritative. For a time he performed large-scale concertos such as Beethoven's or Mendelssohn's without a conductor.

BORIS SCHWARZ/MARGARET CAMPBELL

Gimpel, Jakob (*b* Lemberg [now L'viv], 16 April 1906; *d* Los Angeles, 12 March 1989). American pianist and teacher of Polish birth. Having graduated from the Lwów (formerly Lemberg) Conservatory at the age of 15, he went to Vienna and became a pupil of Steuermann, also taking private lessons in composition from Berg. He made his Vienna début in 1923. Before World War II Gimpel toured with the violinists Erica Morini and Nathan Milstein, and also with his younger brother, Bronislav. He emigrated to the United States in 1939, settling in Los Angeles. One of the first pianists to record for the newly founded company Vox, he also made widely admired discs for Columbia. In 1954 he resumed playing in Europe. Gimpel gave concerts with the Palestine SO (later the Israel PO) from its inception and maintained a busy career until the time of his death. He taught at the California State University at Northridge from 1971 to 1986. Especially effective in large-scale works, Gimpel never quite achieved the reputation he deserved. A dynamic and authoritative player in Beethoven's 'Emperor' Concerto and Brahms's D minor Concerto, he was equally at home in less familiar works by such composers as Reger and Szymanowski. He had a thoroughly schooled and well-controlled virtuoso technique which, allied to an ability to phrase with sophistication, ensured that his performances were invariably distinguished.

JAMES METHUEN-CAMPBELL

Ginastera, Alberto (Evaristo) (*b* Buenos Aires, 11 April 1916; *d* Geneva, 25 June 1983). Argentine composer. His original creative achievement established Ginastera in a position at the forefront of the leading 20th-century composers of the Americas.

1. Life. 2. Style and works.

1. Life. Born to Argentine parents of Catalan and Italian descent, Ginastera showed an early inclination towards music, receiving his first formal training at the age of seven. Five years later he enrolled in the Williams Conservatory, graduating in 1935 with a gold medal in composition. The following year he entered the National Conservatory of Music, studying harmony with Athos Palma, counterpoint with José Gil and composition with José André. An auspicious opportunity came in 1937 when Juan José Castro conducted the first performance of an orchestral suite from his ballet *Panambí* at the Teatro Colón. This performance, which took place while Ginastera was still a student, revealed a work of rhythmic verve and orchestral brilliance, establishing his reputation as an Argentine composer of significance. A year later he completed his professional training at the National Conservatory, receiving the Professor's Diploma for his *Psalm cl*, submitted as a graduation piece.

One year after the successful première of his complete ballet *Panambí* in 1940, Lincoln Kirstein, director of the American Ballet Caravan, commissioned a second choreographic work, *Estancia* (1941). Even though Kirstein's troupe disbanded in 1942, postponing the staged production of the ballet for the next ten years, Ginastera extracted an orchestral suite from its score which was received warmly on its 1943 performance. The fresh spontaneity of shorter pieces of the early 1940s, such as *Malambo* (1940), *Cinco canciones populares argentinas* (1943) and *Obertura para el 'Fausto' criollo* (1943), contributed to his growing stature as one of the most technically adept and musically eloquent composers associated with the nationalist movement.

His teaching career began in 1941 when he joined the faculties of the National Conservatory and the San Martín National Military Academy. On 11 December of that year he married Mercedes de Toro, with whom he had two children. His circumstances in Argentina remained stable until 1945, when the Peronist regime forced his resignation from the National Military Academy for signing a petition in support of civil liberties. He took advantage of a Guggenheim grant (received in 1942 but postponed during the war) to travel to the USA with his family, where he remained from December 1945 until March 1947. There he visited Juilliard, Harvard, Yale, Columbia and Eastman music schools and heard performances of his works by the NBC Orchestra, Pan American Union and League of Composers. He benefited from the guidance of Copland, whom he had previously met in 1941, participating in his Tanglewood composition course, absorbing his stylistic influence and forging a close personal friendship.

In 1948 he played a fundamental role in founding the Argentine section of the ISCM, and he organized and became director of the conservatory of music and theatre arts at the National University of La Plata. His String Quartet no.1 of that year figures as one of his most powerful musical statements, fusing abstract folk music segments with traditional constructive principles and contemporary techniques. In 1951 the ISCM selected this work for performance at its 25th festival in Frankfurt. This marked Ginastera's first trip to Europe, where he also participated in meetings of the International Music Council of UNESCO. Following this exposure he travelled frequently abroad, receiving performances on ISCM programmes in Oslo in 1953 (Piano Sonata no.1), Stockholm in 1956 (*Pampeana no.3*), Rome in 1959 (String Quartet no.2) and Madrid in 1965 (*Cantata Bomarzo*).

In Argentina he faced further difficulties with the Perón government. In 1952 he was forced to resign his directorship at La Plata and did not regain his post until 1956, the year following Perón's defeat. Despite the professional difficulties of those years, his creative output flourished, and he produced three superbly crafted works, the Piano Sonata no.1 (1952), *Variaciones concertantes* (1953) and *Pampeana no.3* (1954), that earned him great recognition. While outside commissions alleviated some of the financial strain, he still needed to compose film music to support himself. It should be noted, however, that this cinematic output (1942–58) both preceded and postdated the Perón years (1946–55), and there is considerable evidence to suggest that, under Copland's influence, he regarded film composition as a vital communicative media.

In 1958 he earned a full professorship at La Plata, but resigned later that year when asked to organize and direct the faculty of musical arts and sciences at the Catholic University of Argentina. There he served as dean (1958–63), developing a progressive music programme that offered advanced degrees in composition, musicology, sacred music and education. In 1958 he composed the String Quartet no.2 in which he combined a masterful synthesis of previous styles and techniques with early incursions into serialism. At its première by the Juilliard String Quartet it was hailed as the culmination of the First Inter-American Music Festival. From this point forward his international reputation was assured. Brilliant first performances of his Piano Concerto no.1 and *Cantata para América mágica* at the Second Inter-American Music Festival consolidated his artistic stature. He now composed almost exclusively by commission.

When the Latin American Centre for Advanced Musical Studies at the Instituto Torcuato di Tella was founded in 1962, Ginastera was asked to assume its leadership. The following year he resigned all other university posts to devote his full attention to this endeavour and to composing. Under his direction (1963–71), the di Tella music centre promoted avant-garde techniques, offering young Latin American composers two-year fellowships to study with a distinguished faculty that included Copland, Messiaen, Xenakis, Nono and Dallapiccola. His own music of the period also assumed experimental directions. His grand opera *Don Rodrigo* (1963–4) incorporated serialism, structural symmetry, microtones and extended vocal techniques. The New York City Opera selected this work to inaugurate its new performance venue at the New York State Theatre at Lincoln Center; its spectacular performance there on 22 February 1966 engendered an overwhelming critical response and established Ginastera's reputation as a major opera composer. The success of *Don Rodrigo* sparked a new commission for *Bomarzo* (1966–7) from the Opera Society of Washington. Its first performance met with ebullient praise; however its explicit eroticism provoked heated

controversy. The municipality of Buenos Aires cancelled a production of the opera that was scheduled to take place later that year, and Ginastera responded by refusing to allow performances of his works until the ban was rescinded.

A troubled period in his life ensued, with a difficult marital situation leading to a separation from his wife in 1969. Distraught and unable to work, he was overwhelmed by unfinished commissions, particularly for his third opera, *Beatrix Cenci*, whose first performance was scheduled to take place at the Kennedy Center to inaugurate its new opera house. A deep and enduring bond with the Argentine cellist Aurora Nátola rekindled his creativity in time to complete the work, which was well received despite its difficult genesis. In September 1971 he married Aurora, settling permanently with her in Switzerland and devoting his time entirely to composition.

During his last 12 years he composed prodigiously, creating some of his most innovative works, including the monumental *Turbae ad passionem gregorianam* (1974), along with a significant body of cello music. He died with many commissions unfulfilled, though he did complete seven of the eight symphonic frescoes of his final *Popol vuh* (1975–83), bequeathing the work in a performable state. He was a member of the National Academy of Fine Arts of Argentina (1957), the Brazilian Academy of Music (1958), the American Academy of Arts and Sciences (1965) and the American Academy of Arts and Letters (1968). He received honorary doctorates from Yale (1968) and Temple University (1975). He was awarded the grand prize of the Argentine National Endowment for the Arts in 1971 and the UNESCO International Music Council music prize in 1981.

2. Style and works. Traditional studies have divided Ginastera's output into three stylistic periods: firstly 'objective nationalism' (1934–47), in which he referred directly to Argentine folk materials with traditional tonal means, secondly 'subjective nationalism' (1947–57), in which he integrated sublimated symbols in forging an original Argentine style, and thirdly 'neo-Expressionism' (1958–83), in which he combined magic surrealism with dodecaphony and avant-garde procedures. Even though Ginastera formulated this periodization himself, he did so in the late 1960s, thus excluding a large body of later works from consideration. If we accept his schemata without revision, his third period would encompass almost 30 works composed over a period of 26 years. Moreover, careful examination of the repertory reveals that his late style is far from monolithic. Beginning with *Puneña no.2* (1976), Ginastera applied complex post-serial techniques to recreate the spirit of the Americas as exemplified in its collective indigenous heritage. It is therefore reasonable to add a fourth period, 'final synthesis' (1976–83) to account for this unique blending of tradition and innovation.

Although Ginastera's officially numbered catalogue begins with his ballet *Panambí*, he started composing in the early 1930s. His unrelenting sense of self-criticism, however, caused him to withhold or destroy many works. According to a recent inventory of the Paul Sacher Archives, where his original manuscripts are housed, 25 early surviving pieces remain unnumbered (Kuss and Handschin, 25–7). Of these, the *Impresiones de la Puna* for flute and string quartet (1934), has recently been reinstated and stands as a charming example of his youthful style. Despite its unabashed affiliation with Impressionism, it prefigures definitive features of his subsequent works including the identification of nationalism with a determined geographical region (in this case, the *puna*, or plateau of the Andes), the iconic representation of localized instrumental prototypes (most notably the indigenous *kena*, referentially invoked by the flute), and the unification of musical works through recurrent motivic cells (here, the three-note Andean formula that serves as an opening motto).

The point of departure for understanding Ginastera's early style is the system of musical codes that Argentine composers formulated during the late 19th century to convey their national identity. Some of the most characteristic formulas associated with this system include melodies based on vernacular scales, rhythms rooted in stylizations of Argentine dances, textures imitative of idiomatic guitar writing, voicings in 3rds modelled on Iberian folk polyphony, and harmonies derived from bimodal relationships. Before Ginastera, many nationalist composers concentrated on cultivating intimate miniatures based on Argentine folk genres, and he continued in this tradition with his earliest repertory, which is dominated by solo piano pieces and songs. His *Cinco canciones populares argentinas* stylized the *chacarera*, *triste*, *zamba*, *arrorró* and *gato* genres. He openly modelled this song cycle on the post-Romantic vocal works of Carlos López Buchardo (1881–1948), to whom he dedicated the collection and whose *Cinco canciones argentinas al estilo popular* (1935) are suggested by its title. Yet even within these early works Ginastera exceeded traditional expectations in passages employing bold polytonal juxtapositions, non-functional parallel progressions and dissonant pandiatonic harmonies.

From his earliest works he showed a remarkable ability to forge new symbols expressive of Argentine musical identity. In doing so he drew his inspiration from the *gauchesco* tradition that upheld the gaucho (horseman) as an idealized national emblem. He created a powerful image of this figure with a chord derived from the open tuning of the gaucho's guitar strings. The resulting sonority, *E–A–d–g–b–e′*, evokes a sound image of the instrument, while embodying a second folk identity as a reordered form of the Argentine minor pentatonic scale, E–G–A–B–D.

A second potent symbol that Ginastera constructed was the *malambo*, a competitive choreographic genre in which a gaucho affirmed his strength and virility by challenging his opponent with increasingly vigorous dance steps. Few memorable representations of the *malambo* existed in the art music literature prior to Ginastera's works, and the original Argentine folk models were distinguished more for their choreographic display than for their musical interest. What mattered most to him, however, was the abstract idea of the dance, and his original characterizations of it will remain among his enduring contributions. In representing the *malambo*, he associated its characteristic foot-tapping motion (known as *zapateo*) with six rapid quavers per measure, evoking an image of the gaucho's moving feet. Upon this pattern he superimposed codified dance rhythms of genres such as the *gato* and *zamba*, accelerating and intensifying this rhythmic complex with percussive Bartókian ostinatos.

Two of his early orchestral works, *Estancia* and *Obertura para el 'Fausto' criollo*, relate to Argentine

nationalism through their reference to *gauchesco* literary sources. The *Estancia* ballet incorporates sung and spoken passages from the Argentine epic poem *Martín Fierro* (1872). It evokes profoundly nationalist sentiments by combining these eloquent verses with ballet scenes that portray the changing times of day on an Argentine ranch. Abundant stylizations of gaucho music (including the guitar chord and *malambo*) enhance Ginastera's nationalist representation, whose effect is produced less by the integration of such elements than by their evocative power and cumulative effect. The *Obertura para el 'Fausto' criollo* is a humorous work based on the poem *Fausto* (1866), which tells of a gaucho's misadventures when he visits Buenos Aires and stumbles upon a performance of Gounod's *Faust* at the Teatro Colón. To portray this comic situation, Ginastera's music interweaves memorable passages from Gounod's opera with Argentine folk features; as in the original *gauchesco* poetry, his juxtaposition of urban and rural contradictions is witty, sophisticated and ingeniously arranged.

During his second stylistic period, Ginastera elaborated abstract musical forms with complete technical mastery. In his String Quartet no.1 and Piano Sonata no.1 he evolved specific musical prototypes for each movement, the possibilities of which he explored throughout his career. A work generally opened with a bithematic sonata movement whose initial motivic cells generated melodic, harmonic and formal processes. He cast his second movements into mysterious scherzos that echoed sublimated *malambo* rhythms using evanescent pianissimo effects. He balanced the chromatic intensity of his expressive third movements with diatonic *malambo* finales which achieved an unprecedented vigour through their increasing use of irregular beat patterns and changing metres.

Ginastera counterbalanced his concern for strict construction by enhancing the improvisatory freedom of his music. His *Pampeana no.1* (1947) and *Pampeana no.2* (1950) both bear the subtitle 'rhapsody' and feature extended solo cadenzas. All three *Pampeanas* and the *Variaciones concertantes* share an expressive melodic prototype that embellishes a central reiterated pitch and uses irregular declamatory rhythms (ex.1, cello). This musical idea exemplifies the very essence of his 'subjective nationalism'. Although the theme itself is wholly original, it embodies Ginastera's assimilation of improvised vernacular idioms, and, as such, represents his own rhapsodic utterance rooted in Argentine tradition. During this period he distilled Argentine folk music references down to their bare symbolic essence; at the same time, he accorded such symbolic structures an extended formal function. He endows the arpeggiated opening chord (ex.1, harp) with multiple structural roles. Delineating the guitar's open strings, it generates the harmonic milieu of the work, establishes E as the pitch centre and summarizes the other main key areas of the work as B, D, A and G, thus projecting its linear properties onto the long range tonal structure.

Adagio molto espressivo ♩ = 56

CELLO

HARP

The composers of the Second Viennese School provided important models for Ginastera's adaptation of dodecaphony during his third stylistic period. His *Cantata para América mágica* (1960), for soprano and 53 percussion instruments, reveals the influence of Webern. Its fourth movement is palindromic, repeating its materials in retrograde after arriving at a central 12-note cluster. It uses a symmetrical series reminiscent of Webern, with its second hexachord a transposed retrograde of the first. Tritones and minor 2nds dominate the row, with the latter most often transcribed as major 7ths or minor 9ths, resulting in a pointillist sonic effect. Ginastera's free use of the series, his preference for multiple 12-note rows and his predilection for opera, however, reveal his affinity with Berg. Schoenberg also influenced Ginastera's stylistic development, in his use of *Klangfarbenmelodie* in *Milena* (1971) and String Quartet no.3 (1973), and in his addition of a soprano to the latter ensemble, specifically recalling Schoenberg's String Quartet no.2. In general, Expressionism dominated his aesthetic outlook of the period, while he enhanced its intensity with microtones, clusters, indeterminacy, polymetre and unusual sound effects.

His three operas portray a grim, pathological world, inhabited by violent, grotesque and tormented characters, and exemplified by the portrayal of incest, torture, execution and patricide in *Beatrix Cenci*. Ginastera's talent for matching his theatrical situation with a corresponding sonic equivalent, usually orchestral, produces an intensely dramatic effect. All three operas employ atonality, serialism, microtones, spatial effects and extended vocal techniques; they differ, however, in their progressive development of his musico-dramatic conception. The first opera, *Don Rodrigo*, has an architectonic design that has been widely discussed (Ginastera, 1964; Suárez Urtubey, 1965; Orrego-Salas, 1967; Kuss, 1980). It uses three balanced acts, organized symmetrically into exposition, crisis and dénouement; each act is further subdivided into three scenes retaining the same dramatic progression. In *Bomarzo* Ginastera refers to tripartite internal divisions, but creates an overriding sense of expansion through his use of 'clusters' (massive sound columns), 'clouds' (suspended sound mobiles) and 'constellations' (erupting sound cascades). In *Beatrix Cenci* he significantly departs from symmetrical structures and enhances musico-dramatic unity through an enrichment of aleatory, colouristic and cinematic effects. After the success of his *Turbae ad passionem gregorianam*, a theatrical concert version of the Passion story, Ginastera conceived of a fourth opera, *Barabbas*, based on a biblical theme and relying on continuous music within each act. This project was left incomplete.

Ginastera's fascination with the dramatic also inspired the large body of concertos he composed during the

period, including one for harp (1956–65), one for violin (1963), two for piano (1961, 1972) and two for cello (1968, rev. 1977; 1980–81). He highlighted the talents of the orchestral principals in the second movement of his Violin Concerto, entitled *Adagio per 22 solisti*, which he conceived 'as an homage to the soloists of the New York Philharmonic'. Throughout his concertos he brought virtuosity to the foreground by creating innovative first-movement structures which begin with bravura cadenzas and conclude with brilliant studies or variations, each of which features a formidable technical challenge. He applied avant-garde techniques to the traditional conception of the concerto, collaborating closely with the performers upon whom the success of his works depended.

Following his second marriage he created fresh, lyrical pieces in honour of Aurora as his new companion, collaborator and interpreter. He relaxed the austerity of previous dramatic works in favour of a new intimacy, in which he set exquisite love poetry, including that of García Lorca (String Quartet no.3, 1973) and Neruda (*Serenata*, 1973). Programmatic references involve plays on the word 'aurora' in *Variazioni e Toccata sopra 'Aurora lucis rutilat'* (1980) and other works. He entwined such amorous symbolism deeply into his cello compositions. The slow movement of his Sonata (1979) alludes to love motifs drawn from his operas and contains an expressive melodic setting of the word 'amor' from his String Quartet no.3 (ex.2). In his Cello Concerto no.2,

Ex.2 Sonata for Cello and Piano op.49, 2nd movt, bar 13

created for Aurora on their tenth wedding anniversary, he adds romantic epigraphs to a reworking of his earlier Sonata, interweaving veiled references to the cello theme from the third movement of Brahms's Piano Concerto no.2 into the newly composed first movement.

Ginastera's final compositions form a consummate synthesis of his creative trajectory. With the exception of his Guitar Sonata (1976, rev. 1981), which musically refers to the gaucho, he departed from specifically Argentine folk models and aligned himself with a pan-continental Americanism. As he explained in an interview (Tan, 1984, p.7):

> I am evolving . . . This change is taking the form of a . . . reversion . . . to the primitive America of the Mayas, the Aztecs, and the Incas. This influence in my music I feel as not folkloric, but . . . as a kind of metaphysical inspiration . . . what I have done is a reconstitution of the transcendental aspect of the ancient pre-Columbian world.

He verged on an aesthetic breakthrough in works such as his Piano Sonata no.2 (1981), which prefigures a new fusion of indigenous and post-serial styles with its cellular ostinatos, percussive rhythms, chromatic clusters and irregular metres. His visionary *Popol vuh*, based on the Mayan creation story, embarked on a new integration of 'primitive' melody and kaleidoscopic sound colour. This final synthesis closed the circle he began with his earliest numbered work, *Panambí*, which likewise conjoined indigenous elements with what were then radical references to Stravinsky and serial technique. As a composer who delighted in symmetry, he personally came to embody his own aesthetic by returning at the end of his life to the wellsprings of his earliest inspiration.

WORKS

DRAMATIC

op.	
1	Panambí (ballet, 1, F. Errico, after Guaraní legend), 1934–7; Buenos Aires, Colón, 12 July 1940
8	Estancia (ballet, 1), 1941; Buenos Aires, Colón, 19 Aug 1952
31	Don Rodrigo (op, 3, A. Casona), 1963–4; Buenos Aires, Colón, 24 July 1964
34	Bomarzo (op, 2, M. Mujica Láinez), 1966–7; Washington DC, 19 May 1967
38	Beatrix Cenci (op, 2, W. Shand and A. Girri), 1971; Washington DC, 10 Sept 1971
—	Barabbas (op, after M. de Ghelderode), 1977, inc.

ORCHESTRAL

op.	
1a	Panambí, suite, 1935–7; Teatro Colón Orch, cond. J.J. Castro, Buenos Aires, 27 Nov 1937 [from ballet Panambí, op.1]
—	Concierto argentino no.1, pf, chbr orch, 1936, withdrawn
8a	Estancia, suite, 1941; Teatro Colón Orch, cond. F. Calusio, Buenos Aires, 12 May 1943 [from ballet Estancia, op.8]
—	Symphony no.1 ('Porteña'), 1942, withdrawn
9	Obertura para el 'Fausto' criollo, 1943; Chile SO, cond. J.J. Castro, Santiago, Chile, 12 May 1944
—	Symphony no.2 ('Elegíaca'), 1944, withdrawn
17	Ollantay, 3 sym. movts, 1947; Teatro Colón Orch, cond. E. Kleiber, Buenos Aires, 29 Oct 1949
23	Variaciones concertantes, chbr orch, 1953, Asociación Amigos de la Música Orch, cond. I. Markevitch, Buenos Aires, 2 June 1953
24	Pampeana no.3, sym. pastoral, 1954; Louisville SO, cond. R. Whitney, Louisville, 20 Oct 1954
25	Harp Concerto, 1956–65; N. Zabaleta, Philadelphia Orch, cond. E. Ormandy, Philadelphia, 18 Feb 1965
28	Piano Concerto no.1, 1961; J.C. Martins, National SO, cond. H. Mitchell, Washington DC, 22 April 1961
30	Violin Concerto, 1963; R. Ricci, New York PO, cond. L. Bernstein, New York, 3 Oct 1963
31a	Sinfonía 'Don Rodrigo': see CHORAL AND SOLO VOCAL
33	Concerto per corde, str orch, 1965; Philadelphia Orch, cond. Ormandy, Caracas, 14 May 1966
34a	Music from Bomarzo, suite: see CHORAL AND SOLO VOCAL
35	Estudios sinfónicos, 1967; Vancouver SO, cond. M. Davies, Vancouver, 31 March 1968
36	Cello Concerto no.1, 1968, P. Olefsky, Dartmouth SO, cond. M. di Bonaventura, Hanover, NH, 7 July 1968; rev. 1977, A. Nátola-Ginastera, National SO, cond. M. Rostropovich, Washington DC, 31 Jan 1978
39	Piano Concerto no.2, 1972; H. Somer, Indianapolis SO, cond. K. Schermerhorn, Indianapolis, 22 March 1973
44	Popol vuh, 1975–83; St Louis SO, cond. L. Slatkin, St Louis, 7 April 1989, inc. [7 of 8 movts completed]
46	Glosses sobre temes de Pau Casals, str orch, str qnt, 1976; Interamerican Youth Str Orch, cond. A. Schneider, San Juan, Puerto Rico, 14 June 1976
48	Glosses sobre temes de Pau Casals, orch; 1976–7; National SO, cond. Rostropovich, Washington DC, 24 Jan 1978 [version of op.46]
50	Cello Concerto no.2, 1980–81; Nátola-Ginastera, Buenos Aires PO, cond. S. Wislocki, Buenos Aires, 6 July 1981
51	Iubilum, sym. celebration, 1979–80; Teatro Colón Orch, cond. B. D'Astoli, Buenos Aires, 12 April 1980

DEBORAH SCHWARTZ-KATES

Gindron, François (*b c*1491; *d* ?Lausanne, after 1560). Swiss composer and clergyman. He spent his life at Lausanne. He is first mentioned in 1518 as the priest in charge of the cathedral choir (he was a minor cleric and not a canon as some writers have stated). In 1531 he was appointed a church councillor, and he participated in the dispute of October 1536 between Roman Catholic and Reformed theologians at the cathedral. On 16 February 1537 he renounced the Catholic faith in favour of Calvinism. From then on he was comfortably off and took part in civic affairs. In 1552 he was given permission by the Berne authorities, then in control of the region of Vaud, to have a collection of psalms printed. According to the preface to his *Proverbes de Salomon, ensemble l'Ecclésiaste, mis en cantiques et rime françoise selon la vérité hébraïque, par A.D. du Plessis* (Lausanne, 1556; music lost) he was pensioned off by Berne in 1556. A total of five pieces by him appear in publications prepared in Geneva by Simon Du Bosc and Guillaume Guéroult (RISM 1555[14] and 1555[15]).

PAUL-ANDRÉ GAILLARD

Giner y Vidal, Salvador (*b* Valencia, 19 Jan 1832; *d* Valencia, 3 Nov 1911). Spanish composer. Born into a family of musicians, he had his first lessons from his father, studying later under the organist of Valencia Cathedral, Pascual Pérez y Gascón. From 1875 to 1879 he worked in Madrid, afterwards returning to Valencia where he was an active promoter of music. He played an important part in the foundation of the city's conservatory and was appointed director in 1894 in succession to José María Úbeda. He formed the municipal band and the choral society El Micalet, which in 1928 became the Giner Institute of Music. Giner was responsible for the introduction to Valencia of concert music as it is now understood, and he also tried to create nationalist music by composing operas based on Valencian folk music. Although they were failures he did succeed in writing characteristically Valencian music, notably the symphonic poems *Una nit d'albaes* and *Es chopà … hasta la Moma*, and *L'entrà de la murta*, written for the municipal band in 1903. But it is liturgical music which has pride of place in his output. He composed a requiem in 1878 for the funeral of Queen Mercedes. An even finer requiem setting was written in 1880 after the death of Cristobal Pascual y Genís; this is a work of remarkable vividness and strength.

WORKS
(*selective list*)

STAGE

¿Con quién caso a mi mujer? (zar, 3, Chocomeli), Valencia, Principal, 2 May 1883; El rayo de sol (zar, 3, Nogués), Madrid, Jovellanos, 10 Nov 1875; Sagunto (comic op, 3, Cebrián), Valencia, Principal, 20 Dec 1890; Los mendigos (zar, 3, Guillén), Valencia, Principal, 1896; El soñador (comic op, 3, Danvila), Valencia, Principal, 10 April 1901; El fantasma (comic op, 3, Giner), Valencia, Principal, 13 April 1901; Morel (comic op, 3, Chocomeli), Valencia, Principal, 18 April 1901

CHORAL

Sacred: 18 masses, solo vv, unacc. or with chorus, org, orch; 11 requiem masses, chorus unacc. or with orch; responsories for the dead; motets, hymns, settings of pss, Miserere and Lamentations

Secular: 43 works, incl. La feria de Valencia, 1871; La festa del poble; La trilla, 1896; La tempestad, 1897; Al surcar el lago, 1875; Ecos del Turia

ORCHESTRAL

Sym., on themes from Mercadante's Le 7 parole di nostro signore, 1858; Sym. 'Las fases del campo', 1864; Elegia a Rossini, 1878; 8 sym. poems, incl. Es chopà … hasta la Moma, 1886; Una nit d'albàes, 1881; El festín de Baltasar, 1893

Gingold, Josef (*b* Brest Litovsk [now Brest], 28 Oct 1909; *d* Bloomington, IN, 11 Jan 1995). American violinist and teacher of Belarusian birth. He moved to New York in 1920 and studied with Vladimir Graffman (1922–7). After his New York début in 1926, he went to Ysaÿe in Brussels (1927–30) and gave many concerts in northern Europe. After his return he became a first violinist in Toscanini's NBC SO (1937–43), leader of the Detroit Orchestra (1943–6) and of the Cleveland Orchestra (with whom he often appeared as a soloist) under Szell (1947–60). He belonged to the Primrose String Quartet (1939–42) and the NBC String Quartet (1941–3).

Gingold taught at Western Reserve University (1950–60) and the Meadowmount School of Music (1955–81). In 1960 he was appointed professor of the violin at Indiana University, establishing a reputation as an outstanding teacher (Laredo, Miriam Fried, Yaron, Silverstein, Hoelscher and Joshua Bell were among his pupils). He gave annual masterclasses at the Paris Conservatoire (1970–81), and was a guest teacher at the Toho Music School, Tokyo. He held the Mischa Elman Chair at the Manhattan School of Music (1980–81). He represented the USA on juries of such international contests as the Queen Elisabeth in Brussels and the Wieniawski in Poland, and helped to found the International Violin Competition of Indianapolis, serving as honorary chairman and president from its foundation in 1982 until 1994. He published useful teaching material and made numerous recordings. Gingold was a distinguished performer with a style of particular sweetness and elegance, and an imposing technical mastery. He played the Martinelli Stradivari made in 1683.

BORIS SCHWARZ/MARGARET CAMPBELL

Ginguené [Guinguené], **Pierre-Louis** (*b* Rennes, 26 April 1748; *d* Paris, 16 Nov 1816). French man of letters, musicologist, theorist and composer. The son of Pierre-François Ginguené, a procurator in the Presidial court of Rennes, and of Anne(-Marie) Gagon, he received a good education in his native city, which included the study of English and Italian language and literature, and lessons in music from Signoretti. He went to Paris in 1772 and became a tutor, and six years later obtained a post in the finance ministry. He was a member of the masonic lodge of the Neuf Soeurs between 1782 and 1784, and in 1786 he married Marie-Anne Poulet, a friend of the future Marquise de Condorcet. He established links with the leading figures of the Revolution, wrote for the *Gazette nationale* and the *Feuille villageoise* (which he also edited), and in 1794 he and five associates founded the *Décade philosophique*. He was imprisoned in St Lazare during the Reign of Terror, but was set free on the fall of Robespierre. He led a very active life as deputy commissioner and then director general of the Instruction Publique, and as a member of the Institut, ambassador to Turin and a member of the Tribunate, from which he was dismissed in 1802 because of his opposition to Bonaparte; he also taught Italian literature at the Athénée. On his death he left a library of some 5000 books, including around 130 works on music, almost exclusively concerned with musical theory and history.

As an enthusiastic lover of Italy and a friend and fervent champion of Piccinni, Ginguené took part in the disputes against the Gluckists. He wrote music criticism for the *Journal de Paris* and the *Mercure de France*, and in 1783 published an interesting article (*Mélophile, à l'homme de*

lettres), in which he expressed his admiration for Piccinni's *Atys*. He also published a *Notice sur la vie et les ouvrages de Nicolas Piccinni* which is a valuable source of information. In 1791 he and Framery co-edited the first volume of the music dictionary of the *Encyclopédie méthodique*, and in 1813 he embarked on the editing of the second volume of this work, which was published in 1818, after his death. He put his name to a number of articles on the history of music, for instance under the headwords 'Angleterre', 'Espagne', 'France', 'Italie' and 'Russie', and on such subjects as 'Cantate', 'Castrato', 'Choeur', 'Concerto', 'Dialogue', 'Expression' and 'Génie'. He also published articles on music in the *Décade philosophique*. He contributed to the study of music (writing, in particular, on Guido d'Arezzo in the 11th century, on the Provençal troubadours and on the birth of music drama) in his *Histoire littéraire d'Italie*, and he published biographical articles on French poets, Provençal troubadours and others (Bernart de Ventadorn, Jaufre Rudel, Guillaume Adhémar, Hoger de Laon, Peire Vidal, Raimbaut d'Aurenga) in the *Histoire littéraire de la France*.

He was passionately devoted to music. In his youth at Rennes he composed *airs* with accompaniment, and in 1784 he published 12 *petits airs* drawn from the novel *Galatée*. For the theatre, he wrote incidental music for *Les confidences à la mode*, *Le bon convive* and *La fille ignorante*. He wrote the libretto for *Pomponin, ou Le tuteur mistifié* (1777, a parody of Piccinni's *Lo sposo burlato*), revised the libretto for Piccinni's *Iphigénie en Tauride* and wrote the words for his *Hymene e l'Hymen* (1799). His other works include a *Traité d'accompagnement pour le clavecin* (*F-Pn*).

As an advocate of liberty who engaged in political activities, Ginguené was not so much a creator as an ideologist and one who opened up paths for others. A poet, a gifted journalist and a highly regarded literary and music critic, he was not only an erudite scholar with a modern mind, a European in advance of his time, and an amateur composer, but also a perceptive musicologist in whom the culmination of the thinking of the philosophers and writers of the Enlightenment may be traced. He set his ideas in the perspective of their historical development, and foreshadowed new trends in art.

MICHELLE GARNIER-BUTEL

Gintzler, Simon (*fl* 1547). German lutenist. He was court musician to Cristoforo Madruzzo (1512–78), Cardinal and Prince-Bishop of Trent and administrator of the diocese of Brixen. Gintzler's dedication to Madruzzo of his *Intabolatura de lauto* (Venice, 1547[22], 2/1589) suggests that he may have been in the cardinal's service for some time. Gintzler was one of the few German lutenists to use Italian tablature. He put great emphasis on legato playing and carefully indicated that a note should be held by placing a small 'x' after its figure. In common with most Italian lutenists, he indicated use of the right-hand forefinger by a dot beneath the figure. He composed six ricercares and intabulated 19 motets, six madrigals and six chansons, by Arcadelt, Jachet of Mantua, Jacquet de Berchem, Josquin, Lupus, Mouton, Senfl, Verdelot, Willaert, Sandrin and Villiers (the six ricercares and one motet ed. in DTÖ, xxxvii, Jg.xviii/2, 1911/*R*). The ricercares, called *Priambeln* by Gerle (1552) and *Fantasiae* by Phalèse (1552), are primarily in imitative counterpoint, with interspersed passage-work and sections of homophony. The vocal transcriptions are full-voiced and moderately embellished. He was clearly concerned to use all the techniques at his disposal in order to create expressive works.

HANS RADKE

Ginzburg, Grigory (Romanovich) (*b* Nizhniy Novgorod, 17/29 May 1904; *d* Moscow, 5 Dec 1961). Russian pianist and teacher. He had known the pianist and pedagogue Goldenweiser for some years before becoming his pupil at the Moscow Conservatory, and it was in the latter's home that he heard such pianists as Rachmaninoff, Skryabin and Medtner. Ginzburg graduated from the conservatory in 1924, and was an instructor there from

1929, being promoted to professor in 1935. His first success as a pianist came at the inaugural Chopin Competition in Warsaw in 1927, in which he was awarded fourth prize. In 1946 he was made Honoured Art Worker of the RSFSR.

Unlike many musicians of his generation, Ginzburg used his consummate mastery of the instrument solely as the tool with which to express the subtleties of the music he was playing. He eschewed special effects and outbursts of temperament in favour of presenting the music with the utmost lucidity and tonal beauty. He had a naturally communicative tone that was ideally suited to the bel canto works of Chopin and Liszt. Fortunately, he warmed to the recording process and his many discs, particularly those of Liszt, convey his immaculate artistry in all its glory. He made a few virtuoso transcriptions for piano that also demonstrate his taste and sense of style. His discs with Goldenweiser of Rachmaninoff's two suites for two pianos, opp.5 and 17, are memorably idiomatic and stand as significant documents.

JAMES METHUEN-CAMPBELL

Ginzburg, Lev Solomonovich (*b* Mogilev-na-Dnepre, Belorussia, 15/28 Jan 1907; *d* Moscow, 22 Nov 1981). Soviet cellist and musicologist. In 1931 he graduated from the Moscow Conservatory, where he studied the cello with Semyon Kozolupov, music history with Valentin Ferman and Konstantin Kuznetsov, and chamber music with Aleksandr Gedike. He completed his postgraduate studies in 1937, and in the following year took the *Kandidat* degree with a dissertation on Boccherini; he was awarded the doctorate in 1947 for his work on the early history of the cello. At the Moscow Conservatory Ginzburg taught the cello (1936–68) and the history and theory of performance; he was appointed senior lecturer in 1940 and professor in 1950. Ginzburg wrote books on several string players, including Casals, Rostropovich, Maréchal, Ysaÿe and Tartini, and produced a four-volume history of cello playing. He taught in the West and did much for international cultural relations.

IGOR BÉLZA/LYUDMILA KORABEL'NIKOVA

Ginzburg, Semyon L'vovich (*b* Kiev, 23 May 1901; *d* Leningrad, 4 April 1978). Russian musicologist and historian. After taking private lessons with the conductor M.I. Chernyakhousky, he studied cello at the Baku Music School with V.S. Dobrokhotov and played in an orchestra (1916–18). From 1918 he studied musicology at the Institute for the History of the Arts in Petrograd with Asaf'yev, S.K. Bulich and Karatïgin and the cello and the viola da gamba with Yu.G. Van-Oren (1919–22); he also attended Glazunov's ensemble class at the conservatory and completed a degree in history and philology at Petrograd University (1918–23).

From 1919 Ginzburg taught at music schools and colleges (including the Institute of Dramatic Arts, 1924–6), and he was appointed research fellow at the Institute for the History of the Arts in 1922, a post he retained until 1930. In 1925 he joined the faculty at the Leningrad Conservatory, where he was appointed senior lecturer in 1928 and professor in 1935 and served as department chair, 1940–62. During this time he was also a lecturer at Leningrad University (1927–30), curator of the museum of the Leningrad PO (1929–32), head of the department of musical culture and technology at the Érmitazh, artistic director of the historical concerts at the Érmitazh Theatre (1932–5) and research fellow at the Institute for Theatre and Music (1938–40; 1946–8). He retired in 1978.

During the 1920s and early 30s Ginzburg was an active member of the Leningrad Association of Contemporary Music and played a significant role in the concert life of Leningrad as a cellist, playing in chamber concerts with I.A. Braudo and N.I. Golubovskaya. From 1927 he co-edited with Asaf'yev the six collections issued by *Novaya muzïka*. A prolific author (his complete list of writings contains 336 items), he contributed to various newspapers and journals and edited many scholarly collections, books and translations. He is known particularly for his book on the music history of the peoples of the USSR (1940–52), researched during the 1930s.

YELENA ORLOVA/LARISA KAZANSKAYA

Giocoso (It.: 'jocular'; adjective from *gioco*, a game). A designation of mood often found qualifying some tempo mark as in *allegro giocoso*. But it also appears alone as a tempo designation in its own right.

Gioia [Gioja], **Gaetano** (*b* Naples, *c*1760; *d* Naples, 30 March 1826). Italian dancer and choreographer. By 1775 he was a principal dancer at the Teatro Regio, Turin. He appeared there regularly up to 1778 and in 1784–9, but also danced in Florence (1776, 1779–80), Lucca (1779), Rome (1781, 1787) and Naples (1783, 1785). He made his choreographic début at Turin in 1789, then worked in Venice and at La Scala, Milan. He was subsequently principal choreographer and dancer at the major theatres of Naples (1793, 1795–6), Milan (1793–4), Florence (1798–9), Turin (1799) and Genoa (1800). A period in Vienna from 1800 exposed him to important new stimuli, notably the instrumental music of resident composers, the new lighting techniques and stage effects of the *Zauberopern* and acquaintance with the younger choreographer Salvatore Viganò. Gioia returned to Italy in 1802; his prodigious output amounted to some 95 different ballets in more than 220 productions.

Gioia's works show the cross-fertilization between opera and pantomime ballet. Several of his early ballets follow a common 18th-century practice of borrowing plots from successful Italian and French operas. At least two, *Nina, o La pazza per amore* (1794) and *Gli Orazi e i Curiazi* (1798), also used music drawn exclusively from their operatic models (Dalayrac and Cimarosa), arranged for orchestra. The scores of most of his ballets, however, were compilations, often containing music from the newest operas. Among the composers of original scores for Gioia was Pietro Romani. Gioia's ballets were important models for Italian operas of his and the following generation. His themes were among the first to inspire librettos of vocal works. One of the earliest was Generali's *Cesare in Egitto* (1816, Turin), based on Gioia's most famous choreography (1807, Naples). At least three of Donizetti's operas, *Gabriella di Vergy* (1826), *Otto mesi in due ore* (1827) and *Elisabetta al castello di Kenilworth* (1829), owe their plots to similarly titled ballets by Gioia.

The realistic acting technique of dancers in Gioia's ballets influenced the expressive art of such outstanding young singers as Pasta and Malibran; and his use of large numbers of dancers and spectacular scenic effects gave audiences a taste for visual extravagance matched only when grand opera conquered Italian stages in the 1850s.

KATHLEEN KUZMICK HANSELL

Giordani, Carmine (*b* Cerreto, *c*1685; *d* Naples, 1758). Italian composer. He was enrolled in the Conservatorio della Pietà dei Turchini in Naples on 9 May 1701, as a pupil of Gennaro Ursino and Nicola Fago. In 1712 he became deputy organist of the royal chapel, a post he held for the rest of his life, and in the same year wrote part of the music for *La vittoria dell'amor coniugale*, which was performed at the Teatro S Bartolomeo. There is no evidence to connect Carmine with Tommaso Giordani.

CHRISTOPHER HOGWOOD

Giordani [Giordano], **Giuseppe (Tommaso Giovanni)** [Giordaniello] (*b* Naples, 19 Dec 1751; *d* Fermo, 4 Jan 1798). Italian composer. The son of Domenico Giordani (*d* Naples, 31 March 1770) and Anna Maria Tosato, he was a pupil at the Conservatorio di S Maria di Loreto, Naples, where his teachers were Gennaro Manna, Sacchini, P.A. Gallo and Fenaroli, and where his fellow students included Cimarosa and Zingarelli. In 1774 he was appointed supernumerary *maestro di cappella* of the Tesoro di S Gennaro, Naples, taking over from Manna and becoming a leading figure in the city. As well as composing sacred music during this period, he was probably involved in teaching, as is attested by a manuscript counterpoint manual, attributed to him, set out in the customary form of a dialogue between pupil and teacher.

On 25 May 1779 Giordani married the singer Emanuela Cosmi (*b* Naples, March 1754), by proxy, in the collegiate church of Foggia; known as 'La Positanella', she was active in companies touring the south of Italy. Fétis's claim that Giordani's operatic début was in Pisa in 1769 or 1771, with *L'astuto in imbroglio*, remains undocumented. In the autumn of 1779 he inaugurated the Teatro della Palla a Corda, Florence, with *L'Epponina*. During the 15 years between this work and his *Betulia liberata* (1796) he composed almost 40 works, including *opere serie*, *opere buffe* and oratorios, totalling about 80 performances. In 1780 he was admitted to the Accademia Filarmonica of Modena, and subsequently that of Parma. Apart from some brief visits to Naples and Rome, he then concentrated his activity on the principal cities of northern Italy, making Bologna his centre. In the spring of 1788 he inaugurated the Teatro Comunale in Faenza with *Cajo Ostilio*.

Giordani's *La distruzione di Gerusalemme*, produced in Lent 1787 (repeated in Lent 1790), apparently the first *dramma sacro* to be staged in a theatre, was an enormous success, and was hailed by the *Gazzetta di Napoli* (13 March 1787) as 'vigorous and apposite music'. Goethe, who was present at the performance, recorded his impressions in his *Italienische Reise* (part ii, Naples, 9 March 1787), describing it as a type of spectacle almost indistinguishable from secular opera and almost equally as florid.

On 14 February 1789, after the successful production of *La disfatta di Dario* at La Scala, Milan, Giordani was elected *maestro di cappella* of Fermo Cathedral; he also took up the post of organist on 4 August. On 4 November 1791 he assumed the same responsibilities at the oratory church of Santo Spirito. A revival of his *La morte di Abele* (trial run 26 September 1790) and *La distruzione di Gerusalemme* (after 20 August 1791) inaugurated the local Teatro dell'Aquila. For his opera *Ines de Castro* (1793, Venice) Giordani adopted the conventions of late 18th-century *opera seria*, with more complex and more cohesive dramatic unities and the introduction of passages for the chorus. He then worked in the Marches, devoting himself principally to composing oratorios and sacred music. His inspired and intense *Le tre ore di agonia di N.S.G.C.* (1793, Fermo) was widely performed.

Giordani enjoyed a high reputation in his day. His works were heard in the leading Italian theatres and abroad, in Lisbon, Madrid and Dresden. His music is characterized by a sound compositional technique, inventiveness and formal precision; in his *opere serie* graceful cantabile passages alternate with fluent bel canto virtuosity. The authorship of the popular song, *Caro mio ben*, attributed to both Tommaso and Giuseppe Giordani, remains unresolved.

UGO GIRONACCI

Giordani, Tommaso (*b* Naples, *c*1730–3; *d* Dublin, Feb 1806). Italian composer, active in the British Isles. All the members of his family were singers, apart from himself and his brother Francesco, a dancer. About 1745, under the management of their father, Giuseppe (unrelated to the composer Giuseppe Giordani known as Giordaniello), the Giordani family formed a small opera troupe and, with a few other singers, travelled across Europe. After performing at Ancona and Pesaro (1745), Senigallia and Graz (1747), Frankfurt and Salzburg (1750), Amsterdam (1752) and Paris (1753), they were invited by John Rich to perform four burlettas in the 1753–4 season at Covent Garden. On 17 December 1753, at the première of the first of these, *Gli amanti gelosi* (with words by Tommaso's father and music attributed to Cocchi), the singing of Tommaso's sister, Nicolina, caused a sensation; she was nicknamed 'La Spiletta' after her role. The family performed again in London in 1755 and 1756. Tommaso's name is not mentioned, although he composed the music to the burletta *La comediante fatta cantatrice*, given in January 1756. He may have arranged music and played the harpsichord in the theatre band while the rest of the family was on stage.

The family was in Dublin late in 1764, having been invited to perform at the Smock Alley Theatre, and remained in Dublin for three years, during which time Tommaso's career as an opera composer was launched. His first major composing venture in Dublin, however, proved a miscalculation; failing to understand the satirical nature of the work, Giordani mistakenly 'improved' the simple airs of *The Beggar's Opera* by 'italianizing' them. But his next three comic operas, *Don Fulminone*, *The Enchanter* and *The Maid of the Mill*, all produced between January and March 1765, were better received. The following season Giordani remained at Smock Alley, although the rest of the family transferred to the Theatre Royal, Crow Street. For Smock Alley he composed two operas: *Love in Disguise*, which was written by a Trinity College student, Henry Lucas (the performance was attended by a crowd of Trinity students); and *L'eroe cinese*, apparently the first *opera seria* to be staged in Ireland. Giordani then moved to Crow Street, where his *Phyllis at Court* was performed in 1767. Charges of plagiarism, however, drove him back to London.

By early 1770 Giordani was very active with the Italian Opera at the King's Theatre. Over the next 13 years he composed the entire music to three operas, collaborated in a pastoral, *L'omaggio* (1781), and arranged, adapted and added new overtures or airs to a number of Italian pasticcios. He also directed many operas at the King's

Theatre and contributed incidental music to plays, including the songs to Sheridan's *The Critic* at Drury Lane (25 October 1779). Giordani's activities were not confined to the theatre. He composed many songs for Vauxhall Pleasure Gardens, several sets of canzonets, and a large number of instrumental works which show a partiality for combinations involving keyboard. His quintets (op.1) for keyboard and strings are among the earliest in this genre. The number of pieces that Giordani wrote for younger, less experienced players is also noteworthy

In summer 1783 Giordani returned to Dublin, where he joined the male alto Michael Leoni in a series of concerts at the Rotunda. With Leoni he then rented a theatre in Capel Street, calling it the English Opera House, and put on a season of 'English' operas, with librettos mostly by minor Irish writers and the music by himself. He composed the music for seven staged musical works and adapted music for another half-dozen pieces for an outwardly successful season, which opened, on 18 December, with *Gibraltar* and *The Haunted Castle*. Yet the smallish size of the theatre meant that Leoni and Giordani failed to meet their expenses, and the venture ended in bankruptcy in July 1784.

The following season Giordani worked at Smock Alley under Richard Daly; he moved to Crow Street in 1787 when Smock Alley closed, and became musical director there the following year. (In 1784 he had married one of the daughters of Tate Wilkinson, the manager of the theatre.) Giordani had several successes at both theatres, but seems to have given up composing after writing his comic opera *The Cottage Festival* (1796). The exact date of his death is unknown, but the minutes of the Irish Music Fund (of which he had been president since 1794) record, on 24 February 1806, the payment of five guineas for his funeral. Giordani's gifts as a prolific and versatile composer were sufficient for him to be respected in London and to dominate the Dublin musical scene for many years. He wrote in the prevailing italianate style, with expressive and inventive melodies, his best written with specific singers in mind. He was also a sensitive orchestrator. Generally, though, he was a somewhat indifferent composer, and was frequently accused of plagiarism. The authorship of the popular song *Caro mio ben*, attributed to both Tommaso and the unrelated composer Giuseppe Giordani, remains unresolved: Tommaso's father, Giuseppe, has also recently been posited as the author.

IRENA CHOLIJ

Giordano, Umberto (Menotti Maria) (*b* Foggia, 28 Aug 1867; *d* Milan, 12 Nov 1948). Italian composer. The son of a chemist who intended him for the career of a fencing master, he devoted himself to music against his parents' will. In 1882 he was admitted to the Naples Conservatory, where his teachers included Paolo Serrao and Giuseppe Martucci.

While still a student he entered a one-act opera, *Marina*, for the Sonzogno competition of 1889. Although short-listed among the 73 submissions it was awarded only sixth place (the winner being Mascagni with *Cavalleria rusticana*). Nonetheless Sonzogno thought sufficiently well of it to commission from Giordano a full-length opera, *Mala vita* (1892, Rome), based on a novella of low-life in Naples by Salvatore Di Giacomo (see illustration). With its wealth of local colour and strong story line it proved highly successful in Austria and Germany, where it began a temporary vogue for operas in a Neapolitan setting. In Italy it was found too shocking, and five years later Giordano revised it as *Il voto*, without beneficial results. However, following Ricordi's example with Puccini, Sonzogno provided Giordano with a monthly stipend against the composition of his next opera. This was *Regina Diaz* (1894, Naples), intended for the celebrations of Mercadante's centenary. The subject (essentially that of Donizetti's *Maria di Rohan*) failed to inspire the composer; and the opera was withdrawn after the second performance. As a result, Edoardo Sonzogno decided to withhold Giordano's retainer, but he was persuaded otherwise by Alberto Franchetti, who ceded the libretto of *Andrea Chénier* to his younger colleague.

That same year Giordano settled in Milan, where he married Olga Spatz-Wurms, whose family owned the hotel in which Verdi regularly stayed during his last years – a circumstance which enabled the younger composer to make his acquaintance and receive from him valuable advice. The success of *Andrea Chénier* (1896, Milan) established Giordano in the front rank of the *giovane scuola*. He then returned to a long-cherished project of an opera based on Sardou's *Fedora*, which was launched at Sonzogno's Teatro Lirico in 1898, with Caruso as the tenor lead. This too was destined to remain in the repertory. A third triumph, though more temporary, followed with *Siberia* (1903, Milan), after which Giordano's fortunes declined. *Marcella* (1907, Milan), a story of love and renunciation across the class barrier, failed, as did *Mese Mariano* (1910, Palermo), in which Giordano returned to Di Giacomo with a plot which anticipates to

Scene from Act 1 of Giordano's 'Mala vita', Teatro Argentina, Rome, 1892: engraving from 'Il teatro illustrato' (May 1892)

a surprising extent that of Puccini's *Suor Angelica*. Following an old suggestion of Verdi's that he write an opera showing Napoleon *en pantoufles* he turned to Sardou's comedy *Madame Sans-Gêne* (1915, New York). Owing to the outbreak of war the première was given in his absence with a cast that included Geraldine Farrar, Giovanni Zenatello and Pasquale Amato; the conductor was Toscanini. But this too made little impression. Together with Franchetti he wrote an operetta, *Giove a Pompei* (1921, Rome), his own contribution having been mostly composed 20 years earlier.

Then came an unexpected success, *La cena delle beffe* (1924, Milan), written to a libretto by Sem Benelli, adapted (with the help of Giovacchino Forzano) from his own gruesome play set in Florence during the reign of Lorenzo the Magnificent. Held by some to be Giordano's dramatic masterpiece, the opera is still occasionally revived. His last work for the stage was the one-act *Il re* (1929, Milan), a lighthearted moralistic fantasy by Forzano composed as a vehicle for the coloratura soprano Toti Dal Monte. Under Toscanini it enjoyed a certain vogue during the 1930s with Maria Caniglia and Lina Pagliughi as well as Dal Monte. A ballet, *L'astro magico*, remained unperformed, while an opera to a libretto by Forzano on the subject of Rasputin never materialized. The compositions of Giordano's last years consisted mostly of songs and a few occasional pieces, among them incidental music for a play, *Cesare*, by Forzano and even a fanfare (1943) for the Italian radio news programme.

Although he showed no great individuality as a melodist, Giordano handled the late Romantic, emotionally vehement idiom of the *giovane scuola* with ease and fluency, being particularly skilful in weaving into his scores elements of local and historical colour – Neapolitan dance rhythms (*Mala vita* and *Mese Mariano*), French Revolutionary songs (*Andrea Chénier* and *Madame Sans-Gêne*), Russian folk music (*Fedora* and *Siberia*), 18th-century pastiche (*Chénier*), pseudo-Chopin piano music, Swiss *ranz des vaches* (*Fedora*) and Tuscan street song (*La cena delle beffe*). Musically his operas are loosely organized, with sparing use of recurring themes. His grandest work (his own favourite) is *Siberia*, which achieved the rare distinction of a performance at the Paris Opéra in 1911, having won the approval of Fauré and Bruneau. In his later operas the somewhat crude scoring gives way to a more refined technique, which yields telling results in *La cena delle beffe*, even if the subject could be thought to require a more astringent musical vocabulary. His stage sense is always sure, and his vocal writing unfailingly effective. *Andrea Chénier* owes its place in the repertory to the opportunities it offers to a star tenor, while *Fedora* endures as a grateful vehicle for the 'mature' prima donna. Several of his songs were recorded by leading artists of the day, such as Claudia Muzio and Beniamino Gigli. A certain curiosity value attaches to his teaching editions of well-known orchestral scores, including all of Beethoven's symphonies, which use only treble and bass clefs throughout, with each instrument notated at sounding pitch.

WORKS

STAGE

Marina, (op, 1, E. Golisciani), *c*1889, unperf.

Mala vita (op, 3, N. Daspuro, after S. Di Giacomo), Rome, Argentina, 21 Feb 1892; rev. as Il voto, Milan, Lirico, 10 Nov 1897

JULIAN BUDDEN

Giorgetti, Ferdinando (*b* Florence, 25 June 1796; *d* Florence, 22 March 1867). Italian composer and violinist. He began violin lessons with G.F. Giuliani at the age of five. In 1811 he became a chamber musician to Elisa Buonaparte, accompanying her retinue to Spain and France, where he is said by Fétis to have modelled his style of playing on that of Rode. He returned to Florence in 1814 and, because of a paralysing illness, gave up his concert career and turned to composition, studying harmony with Disma Ugolini. His music was admired in Germany, where it was published by Breitkopf & Härtel and reviewed in the *Allgemeine musikaliche Zeitung*. Modelling his instrumental style on Haydn, Mozart and Beethoven (which earned him the nickname 'Tedescone'), he was one of the initiators of the movement, centred in Florence, to make the German Classics more widely appreciated in Italy. However, he also published a *Lettera* (Florence, 1828) defending his friend Rossini against the attacks of Eleuterio Pantologo. He was appointed to teach the violin and viola at the Florence Istituto Musicale in 1839; and in 1840, with Luigi Picchianti, he founded the first Italian music magazine, the *Rivista musicale fiorentina*. In 1850 he and his pupil Giovacchino Giovacchini started a series of instrumental concerts, attended by the publisher G.G. Guidi and the critics Basevi and Picchi, later leaders of the Florentine musical revival.

Giorgetti composed a considerable amount of chamber music, as well as sacred works and an oratorio. He also published a *Metodo per esercitarsi a ben suonare l'alto viola* (Milan, ?1856). The most genuine and personal qualities of his style are to be found in the unhackneyed and charming popular touches that give it fluidity and spontaneity, especially in the three quartets and two sextets.

SERGIO MARTINOTTI

Giorgi, Geltrude. *See* RIGHETTI, GELTRUDE.

Giorgi, Giovanni (*b* 1st half of 18th century; *d* June 1762). Italian composer and priest. He is said to have come from Venice. In September 1719 he succeeded G.O. Pitoni as *maestro di cappella* of S Giovanni Laterano, Rome. He had a high reputation for his superior musical abilities. In January 1725 he went as *mestre de capela* to the court at Lisbon.

Giorgi's early work was done chiefly in Rome. He completed a stylistic transition from the high Baroque to the pre-Classical in his works up to about 1758, which were long assumed lost. Giorgi drew together the various stylistic tendencies of the Roman School, to the point of using short instrumental overtures, whereby precedence is given to individual expression rather than liturgical function. The 16-part *Missa 'Servite Domino'*, on the other hand, still bears the marks of Benevoli's style.

Giorgi-Belloc, Teresa. *See* BELLOC-GIORGI, TERESA.

Giornovichi, Giovanni [Jarnović, Jarnovicki, Jarnowick; Ivan] **Mane** (*b* Palermo, 26 Oct 1747; *d* St Petersburg, 23 Nov 1804). Italian violinist and composer, possibly of Croatian descent. The bewildering variety of spellings encountered for his name has sometimes led music historians to suggest possible confusion with violinists such as Janitsch and Janiewicz. No such confusion exists, however, in 18th-century records nor in attributions to his works. An early but unsupported tradition holds that he was a pupil of Lolli. The first certain fact of his career is his arrival in Paris in 1770. His public début three years later (25 March 1773) at the Concert Spirituel was so successful that he quickly became the city's favourite violinist, and the publication of his concertos began shortly thereafter. This success was soon followed by stories about his scandalous and quarrelsome behaviour. He gave frequent public performances until 1777, when he probably became leader of the orchestra for Prince Rohan-Guémémee. In 1779 he suddenly left Paris, reportedly under questionable circumstances.

After appearing in Frankfurt he went to Berlin where he was appointed leader of the orchestra to the Crown Prince of Prussia late in 1779. Less than three years later he left because of quarrels with the cellist Duport. He played in Warsaw in September 1782 and early the next year went to St Petersburg where he entered the service of Catherine II. His departure from St Petersburg after some four years seems to have been amicable. In 1786 he went to Vienna and made an excellent impression on such discerning artists as Dittersdorf, Leopold Mozart and Gyrowetz. He was in Moscow in April 1789. Early in 1791 he began to play regularly in London. He was repeatedly successful at Salomon's Hanover Square series and took part in Haydn's first benefit concert (16 May). He also played in Ireland and Edinburgh, and most of the 1792 season he spent in Bath. In 1793 Viotti displaced him as the featured violinist at Hanover Square, but Giornovichi continued to play in the rival Professional Concert. Once again his personality created difficulties. Parke reported that he behaved arrogantly to royalty at the Duke of York's house, and Gerber that he nearly provoked a duel with J.B. Cramer.

Towards the end of 1796 Giornovichi left London. For the next six years he reportedly lived in Hamburg, where he was more active as a billiard player than as a violinist. His musical powers evidently did not decline, however, for in March 1802 he gave a successful concert in Berlin. The following autumn he played in St Petersburg, where he was once again given a place in the court orchestra, probably as leader. He held the position until he died of a stroke, which was apparently suffered during a game of billiards. He was honoured with an elaborate funeral.

Giornovichi was the most popular of the violinists who preceded Viotti in Paris in the 1770s, and he continued to be widely admired for 30 years. Dittersdorf described his performance:

> He draws a beautiful tone from his instrument, and he has pure intonation. He plays an allegro with precision and sings excellently in an adagio. Most beautiful of all, he plays easily, without affectation. In a word, he plays for art, and for the heart.

A report from London in the *Berliner Musikzeitung* (1793) praised his charming style, adding that it was 'bound to please both connoisseurs and amateurs, but the latter perhaps more'. Although Michael Kelly specifically mentioned his powerful tone, the obituary in the *Berliner Musikzeitung* (1804) indicated that his tone, while pleasing, was not strong; this criticism was repeated in a number of early dictionaries. He was apparently active as a teacher: Franz Clement was his pupil in Vienna, and he played a concerto for two violins with a pupil named Taylor in London. But his erratic career, and perhaps his difficult personality, prevented his influence from being strong. He was not regarded as a significant teacher by his contemporaries.

Giornovichi's most important compositions are his violin concertos, which evidently reflect his performing style. Simple in texture and harmony, clear in structure, and charming but limited in expression, they epitomize the later stages of the *galant* style. None is in a minor key. They contain none of the drama, none of the breadth of passage-work, and little of the symphonic character that Viotti brought to the violin concerto. Giornovichi's later concertos, although probably written in the 1780s or early 90s, show only slight advance over the early examples. Within the limitations of his style, however, he had skill, taste and a degree of imagination. He did much to stabilize certain typical aspects of the French violin concerto in the 1770s: he was a pioneer in the use of the *romance*, which quickly became the most characteristic type of slow movement, and he was influential in establishing the rondo as a finale. His first movements reflect the conventions of Classical sonata form more firmly and consistently than those of his contemporaries in the 1770s, excepting only Mozart. There are occasional striking and even forward-looking freedoms in form, such as a solo opening of the first movement (nos.3, 16) and the joining of the second and third movements (nos.7, 13). His concertos did not demand extraordinary technique for their time; despite brilliance, they emphasized elegance, sentiment and order.

Giornovichi's concertos achieved considerable popularity, some appearing in as many as six editions. They continued to be issued even after Viotti had replaced him in the 1780s as the most popular violin composer. By the time of his death, however, Giornovichi's works were distinctly old-fashioned. Later Romantics, from E.T.A. Hoffmann onwards, centred their interest on his eccentric personality, which has served several times as the basis for fiction.

CHAPPELL WHITE

Giorza, Paolo (*b* Milan, 11 Nov 1832; *d* Seattle, 4 May 1914). Italian composer and conductor. He studied music with his father, Luigi Giorza, a baritone and organist at Desio, and counterpoint with La Croix. He wrote a large amount of light music, which was highly popular at the time, and between 1853 and 1866 was in fashion as a composer of ballets, most of which were produced at La Scala. He worked in Vienna in 1856, and in 1863 had great success in London, composing the ballet *La farfalletta* and other dance music there as part of Queen Victoria's Jubilee celebrations. In Paris the next year he was less well received. An attempt at opera at La Scala in 1860, *Corrado console di Milano*, was unsuccessful. In 1866 he composed an *Inno di guerra* for Garibaldi to words by Plantulli, the general's secretary, and Garibaldi was pleased with the result. That year marked the end of Giorza's important creative period. In 1867, because of financial troubles, he went to America, where he toured in Mexico and visited the USA as an opera conductor. He later visited Australia, where he became music director at the International Exhibition in Sydney in 1879. He spent his last years, poverty stricken, in the USA.

Giorza was considered a reformer of the ballet because of his attempts to make his music, often pantomimic and sometimes melodramatic in character, fit the given subject by creating a sense of atmosphere, and he was one of the first composers to be listed with the dancers and choreographers in reports of the ballet. Perhaps his best work was in straightforward popular songs.

WORKS

STAGE

More than 70 ballets, most perf. Milan, many pubd, arr. pf (Milan)
Ops: Corrado console di Milano (os, 3, L. Gualtieri), Milan, Scala, 10 March 1860; Alba Barozzi (A. Ghislanzoni) (Milan, 1884)

Giovannelli [Giovanelli], **Ruggiero** (*b* Velletri, nr Rome, *c*1560; *d* Rome, 7 Jan 1625). Italian composer. He may have been a pupil of Palestrina, although this was not claimed until 1685. His career in Rome is documented from 1583 until his death. From 8 August 1583 until February or March 1591 he was *maestro di cappella* of S Luigi dei Francesi. He and Marenzio composed *intermedi* for Cristoforo Castelletti's comedy *Le stravaganze d'Amore*, performed at the palace of Giacomo Boncompagni, Duke of Sora, in March 1585. For an unknown period beginning in 1587 he directed the music at the Collegio Inglese on a part-time basis. From 1591 (probably 1 April) until 12 March 1594 he served as *maestro di cappella* at the Collegio Germanico. He was a member of the Virtuosa Compagnia dei Musici di Roma which was officially founded in 1585. He was in charge of music for the Oratorio di SS Trinità dei Pellegrini in 1589, and at some point was also *maestro di cappella* of the private chapel of Duke Giovanni Angelo Altaemps. On 12 March 1594 he succeeded Palestrina as *maestro di cappella* of the Cappella Giulia at S Pietro. He took holy orders on 24 November 1595. On 7 April 1599 he became a singer of the Cappella Sistina, and resigned his former position at the Cappella Giulia three days later. From 1598 to 1605 he was frequently absent from the chapel to serve his patron Cardinal Pietro Aldobrandini, whom he accompanied to Ferrara between 1598 and 1599. In 1600 he directed the music at the Aldobrandini church, S Nicola in Carcere. He served as *puntatore* (secretary) of the Cappella Sistina in 1607, as *camerlengo* (treasurer) from 1610 to 1613, and as *maestro di cappella* in 1614. Although he was not re-elected to this position in 1615, he completed the term of his successor, Paolo Facconio, who died in office that year. He retired on 7 April 1624. His works achieved great popularity and were frequently reprinted, both in Italy and abroad.

Giovannelli's madrigals are generally less serious and more influenced by the style of the canzonetta than those of Marenzio. The poets he set most frequently are Tasso, Guarini and Sannazaro. The first two books of five-voice madrigals are characterized by lighthearted texts, clear textures, high tessituras, short and distinctive imitative motifs, strong accents and frequent sectional repetitions. Small-scale symmetries, created by melodic or contrapuntal inversion or by the use of contrasting groups of voices, are quite common. Textural clarity is often enhanced by the combination of two sharply contrasting imitative motifs, one slow and the other fast, or by the use of one slow-moving voice as a foil to the faster movement of the others, a device which is almost a mannerism of these early pieces. Tonal structures are always clear, and are often the basis for the organization of whole pieces. The later five-voice madrigals are influenced by the Ferrarese madrigal of the 1590s. They are shorter, less symmetrical, and less dependent on the formulae of the canzonetta style. The two books of four-voice madrigals contain pieces of a different type. Except for the quasi-dramatic *Caccia de lup'* at the end of the second book, the texts are all from Sannazaro's *Arcadia*, mostly the *sdruccioli* (lines ending with two unaccented syllables). The music is more homorhythmic and declamatory than most madrigals, and there is little text-painting. Phrase ends are emphasized by the distinctive dotted rhythm that concludes each *sdrucciolo* line. Giovannelli also wrote villanellas, canzonettas (both secular and spiritual) and *laude* in the popular styles of his time.

Among his sacred works, the most conservative are the five-voice motets; they are in the style of Palestrina, although they make less use of chant as a source of melodic material than do Palestrina's and their harmonic idiom is more modern. Greater stress is placed on regular accents, and they occasionally use rhythmic patterns not found in Palestrina's works, including *fusae* with independent syllables. They are mostly in minor modes. The eight- and 12-voice motets and masses, which constitute over half of Giovannelli's sacred music, are more modern in style. The motets usually begin with an imitative exposition of a relatively slow motif and proceed to a homophonic texture with fast, declamatory rhythms and frequent alternations of the choirs. They are predominantly in major modes and often use musical figures to interpret individual words of the text. Giovannelli also wrote a small number of pieces in the *stile moderno*, including five motets for two or three voices with basso continuo and several polychoral works with concertante solo voices. The two- and three-voice pieces use some modern ornamentation, but are conservative in other respects. Giovannelli contributed to the reform of the Gradual undertaken at the request of Pope Paul V, but his role in this has often been exaggerated.

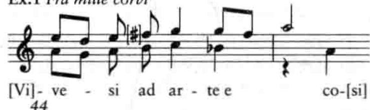
Giovanni da Cascia [Jovannes de Cascia, Johannes de Florentia, Maestro Giovanni da Firenze] (*fl* northern Italy, 1340–50). Italian composer. No definitive documentary evidence relating to Giovanni's life has yet come to light. It would seem from the surname 'de Florentia' or 'de Cascia' that he came from the village of Cascia on the Via Cassia near Florence (not to be confused, as it sometimes has been, with the Umbrian Cascia). There is no support for the view that Giovanni was active at Florence Cathedral. This theory can be traced back to the corrupt edition by Galletti of Villani's Florentine chronicle (see Li Gotti, 1947). No documents are extant which prove Giovanni's stay in Florence, but the 'Ser Giovanni degli Organi' who is mentioned about 1360 at the church of Santa Trìnita (Florence) might conceivably be Giovanni da Cascia. A cutler named Giovanni da Firenze is mentioned in the lists of the Laudesi brotherhood of S Reparata (the former Florentine Cathedral) intermittently between 1345 and 1362. It would appear, from the portrait in the Squarcialupi Manuscript, that Giovanni was not a priest.



On the other hand, Villani stated that, as a composer, Giovanni competed with Jacopo da Bologna at the court of Mastino II della Scala (*d* 1351) in Verona. Comparison of certain texts by Giovanni and by Jacopo (and also Piero) reinforces this. The songs for 'Anna', who was praised by all three of the above composers, and for a 'Spina' (? from the Malaspina family, linked to Mastino della Scala), known also to Jacopo, must have been composed in Verona. Alternatively, the caccia *Con brachi assai*, set to music by both Giovanni and Piero, would seem, judging by the reference to the river Adda, to have originated within the sphere of influence of the Visconti, with whom Jacopo was already acquainted. Giovanni's *Donna già fu*' (composed in reply to Jacopo's *Posando sopr'un' acqua*) and *Fra mille corvi* are madrigals from the period of Giovanni's competition with Jacopo; *Fra mille corvi* used the same bird metaphor ('crow') as Jacopo's *Vestise la cornachia*. All in all, it would appear that Giovanni was an elder contemporary of Jacopo.

Giovanni's surviving works – 16 madrigals and three cacce – are contained within a total of nine manuscripts. He was the first Florentine composer before Landini whose works also appear in north Italian sources. However, most of the works are in two Tuscan manuscripts (*I-Fn* 26: 18 works, and *Fl* 87: 12 works that begin the chronological sequence of the manuscript). Among the north Italian sources the oldest (*I-Rvat* 215, presumably from the Padua-Verona area) contains two works with anonymous ascriptions, but known to be by Giovanni, and another (*F-Pn* n.a.fr.6771, written *c*1400) contains three works. Prudenzani's *Liber Saporecti* shows that works by him were still being performed up to 1420; two madrigals were named in this connection – *Agnel son bianco* and *Nel meço a sei paon*. *Appress'un fiume chiaro*, quoted by Anonymus 5 (*CoussemakerS*, iii, 392), was sung with a sacred text as a *lauda*. The 'soni multi et ballate' (see Li Gotti, 1947, p.198, note 7), presumably monophonic, mentioned by Villani, do not survive. The autobiographical features of some texts (e.g. *Fra mille corvi* and *O tu, cara sciença*) suggest that Giovanni also wrote some of his own texts.

Giovanni played a decisive part in the consolidation of the style of the Italian madrigal. Among the essential characteristics of this style are the melismas on the first and penultimate syllables of a line (sometimes involving hockets), a rapid syllabic declamatory style in the central part of the line, a schematic marking off of the individual

lines by cadences and the texting of both voices. Several of his pieces have features in common with the anonymous madrigals of the manuscript *I-Rvat* 215, of which at least some are earlier: the older type of tenor that lacks independence, running intermittently in parallel 5ths or octaves with the upper voice; the free treatment of the number of syllables in a line (i.e. taking into account the necessary contractions, as in *Nascoso el viso*: five or six syllables); and, with the exception of canonic sections, the almost invariably simultaneous declamation of syllables in the two voices and the absence of part-crossing (ex.1).

Ex.1 *Fra mille corvi*

The markedly different versions in which certain madrigals survive (see *Appress'un fiume*, *Nascoso el viso*, *O tu, cara sciença*, *Più non mi curo*, *Sedendo a ll'ombra*) are particularly striking and suggest that in the early Trecento madrigal up to Giovanni's time strong improvisatory forces were prevalent. Linked with this, perhaps, is the singular lack of tonal unity; only in exceptional cases are the opening and final notes identical, and in *Nascoso el viso* there is a different final note at the end of each line of the verse. (Differences in readings may also be attributable to uncertainties as to how to interpret the Italian notation, and to a general change in notational habits in later manuscripts.) On the other hand, among progressive elements there are isolated examples of imitation between superius and tenor, especially in melismatic passages. However, it is remarkable that even where free rhythmic imitation occurs in syllabic passages the syllables are not necessarily shifted out of alignment to follow the imitation (ex.2).

Ex.2 *La bella stella*

Exceptionally, in a few madrigals (e.g. *Appress'un fiume chiaro*, *In sul la ripa*, *Togliendo l'una l'altra*) there are textless linking phrases between the lines of verse – a feature otherwise characteristic of Jacopo da Bologna's work. It is not impossible that Jacopo, presumably the younger of the two, influenced Giovanni in this. In the three cacce, Giovanni may perhaps have taken Piero's works as models, yet even here he consolidated the style and form of this typically Italian genre. Villani's description of Giovanni's music as 'mire dulcedinis et artificiosissime melodie' reinforces the view that his works achieved their popularity primarily through their elegant melodic writing.

For a madrigal by Giovanni da Cascia *see* SOURCES, MS, fig.35.

MADRIGALS

Agnel son bianco, 2vv, P 7, M 22, W 3 (text by ?Sacchetti; see Debenedetti, no.25 and Corsi)
Appress'un fiume chiaro, 2vv, P 8, M 24, 26, W 13 (Senhal: 'Anna'; lauda contrafactum: 'Appresso al volto chiaro')
Deh, come dolcemente, 2vv, P 11, M 32
Donna già fu', 2vv, P 12, M 34, W 10
Fra mille corvi, 2vv, P 14, M 36, W 14 (text inc.; see Jacopo's 'Vestisse la cornachia')
In su la ripa, 2vv, P 16, M 38 (inc. text mentions 'Spina' and alludes to the river Adige)
La bella stella (?L. Anguissola), 2vv, P 18, M 40, W 4 (dated *c*1354 in Gallo, 1987; 1363 in Paganuzzi)
Nascoso el viso, 2vv, P 20, M 42, W 8
Nel meço a sei paon, 2vv, P 24, M 48, 50, W 9 (Debenedetti, no.48; attrib. Jacopo da Bologna in *I-Fl* S Lorenzo 2211)
O perlaro gentil, 2vv, P 26, M 52, 54, W 11 (Senhal: 'Anna')
O tu, cara sciença, 2vv, P 28, M 56, 59, W 12
Per ridda andando ratto, 2vv, P 32, M 66 (canonic ritornello)
Più non mi curo, 2vv, P 35, M 68, 70, W 5
Quando la stella, 2vv, P 38, M 72 (2 ritornelli, one after each stanza)
Sedendo all'ombra, 2vv, P 39, M 74, 76, W 6
Togliendo l'una a l'altra, 2vv, P 42, M 78, W 7

CACCE

Con brachi assai, 3vv, P 44, M 28
Nel bosco sença foglie, 3vv, P 46, M 44 (metrically a madrigal)
Per larghi prati, 3vv, P 49, M 62 (text inc.; see Corsi, 24)

DOUBTFUL WORKS

De soto 'l verde, 2vv (CMM, viii/2, 1960, pp.15–18; for more doubtful works see N. Pirrotta, ed.: *Il codice Rossi 215*, Lucca, 1992, pp.51–2)

KURT VON FISCHER/GIANLUCA D'AGOSTINO

Giovanni da Foligno. *See* JOHANNES FULGINATIS.

Giovanni da Prato [Giovanni Gherardi] (*b* Prato, *c*1367; *d* Florence, *c*1445). Italian man of letters. He studied under the scientist Biagio Pelacani at Padua University from 1384 to 1388. He wrote several poems in the style of Dante and Boccaccio, but his most important work is an unfinished narrative poem (*I-Fr* 1280, autograph; ed. F. Garilli, Palermo, 1976) which was given the title *Il paradiso degli Alberti* by the first modern editor (A. Wesselofsky, Bologna, 1867/*R*), after the name of the Florentine villa of Antonio degli Alberti in which the story was set. This work, possibly written in about 1425, describes the meetings in 1389 of a group of learned men (Pelacani, Coluccio Salutati, Luigi Marsili, Francesco Landini and others), who discussed various topics and related stories. These meetings included musical entertainment, mainly provided by Landini, who is here celebrated not only as the greatest musician of the time, but also as a renowned intellectual. The third book includes a transcription of the text of Landini's ballata *Or su, gentili spirti* as well as a description of its musical performance. The narrative also refers to the singing of madrigals by Bartolino da Padova, and to the singing of sicilianas.

Giovanni [Joan, Giovan] **Maria da Crema** (*b* ?Crema; *fl* 1540–50). Italian lutenist and composer. He is frequently confused with Giovanni Maria Alemanni (Hebreo), Giovan Padovano del Cornetto and other 16th-century musicians. The proximity of his presumed birthplace to Cremona suggests that he may be the Giovan Maria da Cremona who was one of a sextet of Italian viol players heard at the court of Henry VIII in 1540.

His *Intabolatura de lauto ... libro primo* (Venice, 1546/*R*, ed. G. Gullino and R. Smith Brindle, Florence, 1955/*R*; 2nd edition as *Libro terzo*, Venice, 1546) contains 15 ricercares and seven dances (including five passamezzo-saltarello pairs), as well as 25 intabulations of vocal compositions: French chansons by Claudin de Sermisy, Janequin, Willaert and others, Italian madrigals by Verdelot and Arcadelt, and motets by Gombert, Mouton and their contemporaries (two motets are incorrectly ascribed to Josquin). The ricercares are notable for their advanced use of imitation, full three- and four-voice textures, and for the relative absence of lutenistic figuration and ornamentation. Since several of these pieces are ascribed elsewhere to Julio Segni and Francesco da Milano, they may have originally been written for keyboard or instrumental ensemble and arranged by Giovanni Maria for the lute (as Thibault suggested). The *Intabolatura de lautto libro settimo* (Venice, 1548[13]) contains 13 'new' ricercares by Francesco da Milano and 12 that were 'intabulated and adapted for the lute' by Giovanni Maria from ensemble music by Segni. A number of Giovanni Maria's compositions were reprinted in later lute anthologies by Gerle, Phalèse, Matelart and Guillaume Morlaye. Some of his music has been edited in MRM, i (1964) and in R. Darsie: *Giovanni Maria da Crema/Giulio Segni da Modena: The Ricercars for Solo Lute* (Davis, 1996).

ARTHUR J. NESS

Giovanni Mazzuoli. *See* MAZZUOLI, GIOVANNI.

Giovannini [de Giovannini; first name unknown] (*fl* mid-18th century; *d* ?1782). Italian composer and violinist. According to Gerber, who supplied his date of death, he lived in Berlin in 1740. He wrote eight violin sonatas, the incipits of which are in Breitkopf's catalogue of 1762, and, at the editor's request, contributed seven songs to J.F. Gräfe's *Sammlung verschiedener und auserlesener Oden* (1737–43). It is not known whether or not he was related to the Giovannini mentioned by Marpurg as a cellist and composer in Rome (*Historisch-kritische Beyträge*, i, 1754, p.226).

For two reasons this obscure composer has become an object of more than ordinary historical interest. Firstly, it has been stated (see *GerberNL*) that Giovannini had also appeared in London as the Count of SAINT GERMAIN (perhaps having concealed his identity until he was able to receive the inheritance of his supposed mother, Marie-Anne de Neubourg, who died in 1740). The identity of the two is unlikely, however: during Saint Germain's conspicuous career (which took him to Berlin for some time) the identity with Giovannini, if true, would probably have been discovered, particularly considering the keen contemporary interest in Saint Germain's origin, and the existence of a portrait of Giovannini (engraved by

Thönert; see *GerberL*). No later biographies of Saint Germain have established a connection with Giovannini, nor do any of Giovannini's known works bear a stylistic resemblance to Saint Germain's.

Secondly, in the larger of the two music books (1725) of Anna Magdalena Bach there is a song described as 'Aria di Giovannini'. Spitta held that this music could not be by Bach, an opinion supported by Friedlaender because it would have been Bach's only vocal piece to use the violin clef. (Heuss, however, felt the work to be by Bach because of its excellence.) In view of Giovannini's unimportance his authorship of the work is unlikely; if accepted as his, however, the piece must have been inserted into the book at a later date, presumably by C.P.E. Bach.

J.H. CALMEYER

Giovannini, Simone (*b* Tuscany, *c*1550; *d* Pistoia, 15 Feb 1621). Italian composer and organist. He was a priest and the brother of Baccio de' Giovannini, a highly respected secretary to the grand dukes of Tuscany and almoner to Maria de' Medici after she moved to France as Henri IV's queen. Simone Giovannini was a Florentine citizen when in March 1578 he was appointed to succeed Vincenzo Ruffo as *maestro di cappella* of Pistoia Cathedral; he was a favourite of the Grand Duchess of Tuscany, Johanna of Austria, who recommended him for this post, and he was also recommended by the Archbishop of Florence, Alessandro de' Medici, later Pope Leo XI. In 1589 he also became organist of the Servite church, Santo Spirito. He held both posts until his death. As a cleric of the post-Tridentine church he was an honorary canon, rector of his own parish, S Liberata, and a founder of the Confraternita di S Sebastiano. As a composer he is known by five *Magnificat* settings for three to six voices (one based on a madrigal by Alessandro Striggio (i), *Ancor ch'io possa dire*), four five-part hymns and three four-part antiphons (all in *I-PS* 216, two of the antiphons also in 215); they were all written for Pistoia Cathedral. They display technical mastery and a notable sensitivity of line. Since they show the unmistakable influence of the Tuscan school, it can be surmised that Giovannini received his musical training in Florence.

Gippius, Yevgeny Vladimirovich (*b* Tsarskoye Selo [now Pushkin], 24 June/7 July 1903; *d* 5 June 1985). Russian ethnomusicologist. After studying at the Petrograd Institute of the History of the Arts (until 1924) and with Asaf'yev, he took the graduate degree at the institute (1935). He taught at the Leningrad Conservatory for about ten years from 1929 and as professor at the Moscow Conservatory (1944–9), and was also affiliated to the Soviet Academy's Institute of Ethnography (1946–52) and the Institute of the History of the Arts (1959–63). He was awarded the doctorate of arts in 1958 for his critical edition of the Balakirev folksong collections. From 1973 to 1984 he worked as a scientific consultant with the folklore commission of the Russian Federation Union of Composers. His early fieldwork included notating songs of German colonists in the Leningrad region (1925), recording songs with his wife Zinaida Ewald during five expeditions to the Russian North (1926–30) and studying solo and part-singing styles in the Archangel district.

The 1600 recordings Gippius and Ewald made in the Russian North formed the basis of the Phonogram Archive (founded 1927, affiliated with the Soviet Academy in 1931), which he directed until 1944. During the same period he participated in expeditions to Armenia, Georgia and Uzbekistan and collected in the Belorussian Poles'ye region and the Ryazan region of central Russia. He directed expeditions among the Mari, Mordvinian, Udmurt and Komi peoples (1936–8) and did important stationary recording from students of the Leningrad Institute of Peoples of the North, who provided examples of their indigenous music. During the 1930s he brought together pre- and post-revolutionary recordings of 63 Soviet nationalities; in 1939 this archive moved to the academy's Institute of Russian Literature (Pushkin House) in Leningrad.

Gippius's articles and studies are among the most sophisticated and scientific analyses of traditional music of the USSR. The volume of songs of the Pinega region documents north Russian part-singing, and is probably the finest modern scholarly publication of Russian folk music; his essays in the Balakirev edition are thorough historical and functional investigations of individual Russian folksongs. He also studied music of the non-Slavonic peoples of the USSR and revolutionary songs; in later years he worked on classifying and cataloguing methodologies and on developing unified terminologies and transcription methods. His papers and manuscripts are housed in the Central Museum of Musical Culture in Moscow.

BARBARA KRADER

Gipps, Ruth (Dorothy Louisa) [Wid(dy) Gipps] (*b* Bexhill-on-Sea, 20 Feb 1921; *d* Eastbourne, 23 Feb 1999). English pianist, composer and conductor. Her music education began at the age of three at the Bexhill School of Music, where her mother was principal. She gave her first performance aged four, and her first composition was published by Forsyth Brothers when she was eight. She gained her performer's ARCM at 15 and in the same year entered the RCM, London. Here she studied composition with Gordon Jacob, R.O. Morris and Vaughan Williams, the oboe with Leon Goossens, and the piano with Arthur Alexander and Kendall Taylor. On leaving college she studied the piano with Matthay. While at the RCM she won a number of prizes for composition, including the Cobbett Prize and the grade five composition prize for her First Symphony (1942). Her tone poem *Knight in Armour* was conducted by Sir Henry Wood on the last night (22 August) of the 1942 Promenade concerts. In 1948 she obtained a DMus at the University of Durham.

While trying to establish herself as a concert pianist Gipps took a position playing oboe and english horn with the City of Birmingham Orchestra (1944–5), whose conductor, George Weldon, encouraged her to undertake conducting work. From this time on her career took a change of direction. She became chorus master of the City of Birmingham Choir and later conductor of the Birmingham Co-Operative Amateur Orchestra. At this time there were very few female conductors, and gaining support often proved very difficult. Undeterred, Gipps decided to set up her own orchestras. In 1955 she founded the London Repertoire Orchestra, which she ran until 1986. In 1961 she formed the professional Chanticleer Orchestra; among the orchestras she conducted were the LSO and the Boyd Neel and Pro Arte Orchestras. Between 1960 and 1991 Gipps worked as a music professor at Trinity College of Music (1960–66), the RCM (1967–77)

and Kingston Polytechnic (1977–9). In 1967 she became chairwoman of the Composers' Guild of Great Britain, in which role she was instrumental in establishing the British Music Information Centre. She was awarded an OBE in 1981.

Gipps's long and varied career reflected her energy and multi-faceted musical ability, yet it was as a composer that she made her most sustained contribution, particularly in the genres of orchestral and chamber music. Her music parallels other British composers who were influenced by the folksong revival and the new Franco-Russian movement. Her style is easily accessible and rich in character, marked by highly melodic tonal and modal themes, chromatically complex harmonic language and vibrant orchestration.

WORKS
(*selective list*)

Orch: Knight in Armour, op.8, 1940; Ob Conc., d, op.20, 1941; Sym. no.1, op.22, 1942; Vn Conc., B♭, op.24, 1943; Suite: the Chinese Cabinet, op.29, 1945; Sym. no.2, op.30, 1945; Pf Conc., op.34, 1948; Conc., op.49, vn, va, small orch, 1957; Sym. no.3, op.56, 1960; Hn Conc., op.58, 1968; Sym. no.4, op.61, 1972; Sym. no.5, op.64, 1982; Ambarvalia, small orch, op.70, 1988; Hn Conc, op.58, 1997

JILL HALSTEAD (with LEWIS FOREMAN, J.N.F. LAURIE-BECKETT)

Giraldoni, Eugenio (*b* Marseilles, 20 May 1871; *d* Helsinki, 23/24 June 1924). Italian baritone, son of the baritone LEONE GIRALDONI and the soprano and violinist Carolina Ferni (1839–1926). Eugenio was taught by his mother, and he made his début in 1891 as Escamillo at Barcelona. He became well known throughout Italy and in South America and in 1900 was given the role of Scarpia in the world première of *Tosca* at the Costanzi in Rome. He repeated the part later that year at La Scala and in other houses including Covent Garden (1906), but was generally considered to exaggerate the sadism and underplay the refinement of the part. In his single season at the Metropolitan, in 1904, he was also found somewhat coarse in his performances. He nevertheless continued to be in great demand in Europe and South America. He was a widely admired Boris, a part he first sang at Buenos Aires in 1909. He was also Italy's first Yevgeny Onegin in 1900 and Golaud in the Rome première of *Pelléas et Mélisande*. Other roles outside the standard Italian repertory were Hans Sachs, Telramund, Ochs and Rubinstein's Demon. He was considered the best singer of Gérard in *Andrea Chénier* and in 1906 took part in the première of Franchetti's *La figlia di Iorio*. He retired from the stage in 1921 and thereafter taught in Helsinki. His recordings, magnificent in quality of voice, often show him as a colourful stylist too; strangely, they do not include any excerpts from *Tosca*.

J.B. STEANE

Giraldoni, Leone (*b* Paris, 1824; *d* Moscow, 19 Sept/1 Oct 1897). Italian baritone, father of EUGENIO GIRALDONI. He studied in Florence, making his début in 1847 at Lodi. After singing in Florence and, from 1855, at La Scala, he created the title role of *Simon Boccanegra* at La Fenice in 1857 and Renato in *Un ballo in maschera* at the Teatro Apollo, Rome, in 1859. He also sang other Verdi roles, notably Count di Luna (*Il trovatore*). In 1877 he sang Rossini's Figaro at La Scala and in 1878 at Cagli he took part in the first performance of Mercuri's *Il violino del diavolo*, written for his wife, Carolina Ferni, a virtuoso violinist as well as a singer. He created the title role of Donizetti's posthumously produced *Il duca d'Alba* at the Teatro Apollo, Rome (1882), and after his retirement in 1885 taught singing in Moscow. A sensitive artist, he had a rich, high-lying voice.

ELIZABETH FORBES

Giraldus Cambrensis [Gerald de Barri, Gerald of Wales] (*b* Manorbier, *c*1146; *d* ?Lincoln, *c*1223). Welsh-Norman ecclesiastic and author. Educated in arts and canon law at Paris, he was archdeacon of Brecon from about 1175 to 1203; from 1184 to 1194 he was also in royal service. After visits to Ireland in 1183 and 1185–6 he wrote a *Topographia Hibernica* (*c*1187) and *Expugnatio Hibernica* (*c*1188). Likewise, after his travels around Wales in 1188 he wrote *Itinerarium Kambriae* (1191) and *Descriptio Kambriae* (1194). His later works include the largely autobiographical *De rebus a se gestis* (*c*1204). His writing is characterized by fascination with detail, vigorous expression of personal opinion and a fondness for controversy and debate.

Both the *Topographia* and the *Descriptio* contain passages referring to music which have been variously translated and interpreted by scholars musicologically untrained or nationalistically motivated, but which have latterly been subjected to more critical examination. The extent of Giraldus's musical training is unknown, so the accuracy of his use of musical terms is not certain, but the passages are nonetheless a unique source of information about the music that they describe. He stated (*Topographia*, III, ix) that Irish instrumentalists were more skilled than any other people; their music was characterized by rapidity of the fingers, ornamented measures or melodies ('crispati moduli') and extremely intricate polyphony or counterpoint ('organa multipliciter intricata'). He referred to the intervals of the strings, which, whether they sounded 4ths or 5ths, always began from 'B mollis' and returned to it; the significance of the note name is not known. He stated that Scotland and Wales imitated Ireland in musical style. Ireland used only two instruments, the harp ('cithara') and the timpán or lyre ('tympanum'); Scotland used these as well as the chorus (a type of wind

instrument, or perhaps, the crwth), and Wales the harp, chorus and pipe ('tibia'). He noted that brass strings (rather than leather/gut) were used; this remark may refer to Ireland, or to Wales, or to all three countries.

In keeping with the affinity that he noted between Irish and Welsh music-making, much of the account of Irish string-playing is repeated verbatim in the *Descriptio* (I, xii). Another passage (I, xiii) describes a Welsh practice of part-singing (for an alternative interpretation *see* RONDELLUS):

When they make music together, they sing their songs not in unison [*uniformiter*], as is done elsewhere, but in parts [*multipliciter*], with many modes [*modis*] and phrases [*modulis*], so that in a crowd of singers . . . you would hear as many songs and differentiations of voices [*discrimina vocum varia*] as you could see heads, coming together finally in one consonance and organic melody [*organicam melodiam*] with the enchanting sweetness of B *mollis*.

He compared this practice with a similar one in northern Britain, where the polyphony was confined to two parts; in both districts the skill was acquired not by training but by long usage. He speculated that since the English south of the Humber did not share the habit, the northerners may have learnt it from the Danes and Norwegians. Hibberd interpreted the passage to mean heterophony for a group of singers, whereas Burstyn suggested controlled improvisation on a known, perhaps traditional, pattern of vertical sonorities.

Aside from these clues regarding practical music-making, later recensions of the Topographia included a lengthy exegetical passage on the effects of music and its earlier practitioners and theorists; in it, Giraldus referred to a practice of funeral lamentation characteristic of both Ireland and Spain, which he called *planctus*.

ANDREW HUGHES/ANDREA BUDGEY

Giramo [Girolamo], **Pietro Antonio** (*fl* ?Naples 1619–after 1630). Italian composer. In 1620 he contributed to the *festa a ballo Delizie di Posilipo boscarecce, e maritime*, performed at Naples on 1 March to celebrate Philip III's return to health. The prefaces to his *Arie* of 1630 and to *Il pazzo … et Uno hospedale* were also signed in Naples, though the music of the latter volumes was dedicated to Anna de' Medici. In the preface to his 1630 book Giramo stated that he had written its contents under the patronage of the Duke of Crosia, who also took part in its performance. The later volume of *Arie* (not that of 1630 as Ghisi stated) contains variations on the romanesca, Ruggiero, chaconne and other basses for three and four voices. At the end Giramo referred to rules for the performance of such pieces that had appeared in an earlier book, which must be lost, for they are not in the 1630 book. Nearly all the pieces in this latter book have directions for performance such as 'affettuosa', 'allegra' and 'grave'.

WORKS

Delizie di Posilipo boscarecce, e maritime (festa a ballo), Naples, 1 March 1620; ed. in RRMBE, xxv (1978)
Arie, 2–4vv, bc (Naples, 1630), 1 piece in *GB-Lbl* MS Add. 31, 440

JOHN WHENHAM

Girard. Italian firm of music publishers. In 1809 Giuseppe Girard opened a music copyist's business in Naples at Via Toledo 165, and at the end of 1817 he established the Calcografia e copisteria dei Reali teatri. Guglielmo Cottrau (1797–1847) was director from 1824 to 1846. Giuseppe Girard retired in 1826 to be succeeded by his son Bernardo, who in 1827 entered into partnership with Cottrau. When Bernardo died in 1835 Gugliemo Cottrau became a partner of the Girard heirs and continued to do business under the name Bernardo Girard e C. Cottrau's experience and reputation kept the business flourishing, thanks to the cordial rapport he enjoyed with the leading musicians of the time; his French origins possibly account for the good relations the firm enjoyed with the French publishers Troupenas, Latte and Launer, to whom rights were given for some of Bellini's operas and Donizetti's *Lucia*, *Roberto Devereux* and *Betly*. Under Cottrau the firm published *Passatempi musicali* (1835–47), a collection of 129 Neapolitan songs that he edited; the first edition had been published privately in 1826 and reprinted in 1830. Bernard Latte published the collection in a translation by A. de Lauzières, and in 1833 it was sold to the Paris publisher Pacini. By paying an annual fee to the S Carlo, del Fondo and Nuovo theatres, Girard secured the copyright of the operas and ballets expressly written for and performed in those theatres.

On Cottrau's retirement in 1846 he left the management of the firm to his son TEODORO COTTRAU, who became the sole proprietor in 1855. The firm's 1847 catalogue contains 210 pages of titles. Michele Pasinati supervised the music engraving. From 1853 the firm took the name Stabilimento musicale partenopeo (successore di B. Girard e C.).

The firm's 1847 catalogue lists mainly operas, generally in vocal score, written by the most important Italian composers (Rossini, Pacini, Bellini, Donizetti, Mercadante) and works by minor Neapolitan musicians. The

firm also issued a complete edition of Beethoven's piano sonatas and some of his chamber music, the complete works of Chopin, Mendelssohn's *Lieder ohne Worte* and Thalberg's *Oeuvres choisies*. Other music was published in the series *Euterpe drammatica estera: scelta di pezzi vocali delle migliori opere moderne francesi e tedesche con versione italiana*. A journal, *Gazzetta musicale di Napoli*, was published from 1852 to 1868. About 1870, Teodoro Cottrau's interest in publishing declined; in the closing years of the century it was run by Teodoro's brother Felice Cottrau and Nicola Ercole. It is likely that at the beginning of the new century at least a part of the Cottrau material was acquired by the publisher Santojanni. The last catalogue of the archive was published in 1886.

Bernardo Girard's son Federico (*d* 6 April 1877) ran an independent publishing business in the 1860s and 70s. He published more than 1000 titles, generally romanzas and piano pieces.

STEFANO AJANI/R

Girard, Jan. *See* GERARD, JAN.

Girard, Narcisse (*b* Mantes, 27 Jan 1797; *d* Paris, 17 Jan 1860). French conductor, violinist and composer. He was in Baillot's class at the Paris Conservatoire (winning second prize in 1819 and first prize in 1820), and studied counterpoint with Reicha. He composed several works, including two *opéras-comiques*: *Les deux voleurs* (1841) and *Les dix* (1842). However, it was principally as a violinist and conductor that he made his name. A member of the orchestra of the Opera Buffa and the Théâtre Feydeau, he was one of the group that founded the Société des Concerts du Conservatoire in 1828, together with Habeneck, whom he was to succeed. According to Dandelot (in *La Société des concerts du Conservatoire, 1828–1923*, Paris, 1923), he made his début as a conductor with the orchestra of the Athénée Musical at the Hôtel de Ville. He replaced Grasset as conductor of the orchestra of the Théâtre Italien (1830–32), and was then conductor at the Théâtre-Nautique (1834–5), and succeeded Valentino at the Opéra-Comique (1836–47). Habeneck recommended that Girard succeed him as conductor of the orchestra of the Académie Royale de Musique on 1 October 1846; he remained there until his sudden death in 1860, during a performance of *Les Huguenots*. Girard also continued Habeneck's work with the orchestra of the Société des Concerts du Conservatoire, which he conducted 112 times between 1849 and 1860. In 1843 he was made a Chevalier of the Légion d'Honneur, and on 1 January 1847 he was appointed professor of a new violin class at the Conservatoire, holding that post until his death. He also conducted the orchestras of the Chapelle Impériale (1853), and the Opéra, earning the title of music director of the Académie Impériale de Musique (1855–6).

Despite the forthright opinion of Saint-Saëns, who considered Girard's reputation somewhat exaggerated, and held him responsible for the introduction of many errors of interpretation into works by composers of the past, which had to await Deldevez to recover their original meaning, it may be noted that in continuing the tradition he inherited from Cherubini and Habeneck, Girard gave a modern direction to the repertory of the Société des Concerts du Conservatoire from the early days of his appointment. In particular, he included works by composers of the younger generation such as Berlioz (*La damnation de Faust*, 15 April 1849), Halévy (*Prométhée enchaîné*, 18 March 1849) and Félicien David (a symphony, 1853).

GÉRARD STRELETSKI

Girardeau, Isabella (*fl* 1709–12). Italian soprano. Very little is known of her: Burney thought she was an Italian married to a Frenchman and tentatively identified her with one Isabella Calliari. She was a member of the Queen's Theatre company in London from January 1710 (perhaps October 1709) until spring or summer 1712 and sang in six pasticcios, *Almahide*, *Idaspe fedele*, *Pirro e Demetrio*, *Etearco*, *Antioco* and *Ambleto*, and in Handel's *Rinaldo*, in which she was the original Almirena. This is an exceptionally modest part for an *opera seria* heroine, and neither elaborate nor taxing (the compass is *d′* to *a″*); moreover much of the material was not new. Girardeau was evidently no great virtuoso; but she could not have lacked power, for in *Ambleto* she had 'a noisy song for trumpets and hautbois obligati' (Burney). She is said to have been a bitter rival of Elisabetta Pilotti-Schiavonetti, Handel's first Armida.

WINTON DEAN

Girardi, Alexander (*b* Graz, 5 Dec 1850; *d* Vienna, 20 April 1918). Austrian tenor and comic actor. For over 40 years the much loved, popular favourite of the Vienna theatre, he created roles in more than 50 musical plays and operettas, chiefly at the Theater an der Wien, where he was engaged from 1874 to 1896 and again from 1902 to 1905. He inspired many characters in Johann Strauss operettas, including Blasoni (*Cagliostro in Wien*), Don Sancho (*Das Spitzentuch der Königin*), Marchese Sebastiani (*Der lustige Krieg*), Zsupan (*Der Zigeunerbaron*), Kassim Pasha (*Fürstin Ninetta*) and Müller (*Waldmeister*). For Millöcker he created Andredl (*Das verwunschene Schloss*), Plinchard (*Die Jungfrau von Belleville*), Symon Rymanowicz (*Der Bettelstudent*), Benozzo (*Gasparone*), Piffkow (*Der Feldprediger*) and the title role of *Der arme Jonathan*. Zeller wrote Adam (*Der Vogelhändler*) and Martin (*Der Obersteiger*) for him, while Lehár's *Wiener Frauen*, Eysler's *Bruder Straubinger*, Oscar Straus's *Mein junger Herr*, Kálmán's *Der Zigeunerprimas* and Fall's *Der Nachtschnellzug* contain original Girardi roles. His inimitable humour and expressiveness are preserved in four recordings made in 1903.

ELIZABETH FORBES

Giraud, François-Joseph (*d* ?Paris, after 1788). French cellist and composer. He held the post of *maître de musique* in Laon before going to Paris, where he was employed as a cellist at the Académie Royale de Musique (1752–76). From 1752 to 1767 he was a cellist in the Paris Opéra orchestra and at the Concert Spirituel. His collection of sonatas for cello op.1 probably dates from the early 1750s. Among its unusual features are continuous multiple stops in some slow movements, and somewhat less adventurous fast movements in which the solo line is sometimes in unison with the continuo. Chromatic bass lines and suspensions are both interesting characteristics of his style.

Between 1752 and 1765 at least seven *grands motets* by Giraud (none of which survives) were performed at the Concert Spirituel, *Regina coeli*, in particular, several times. His other successful genre was the *comédie-ballet*, with *L'opéra de société* receiving more than 20 performances at the Opéra. Noiray considers his most important work to be *Deucalion et Pyrrha*, a one-act ballet composed in collaboration with P.-M. Berton. This work contains in miniature many of the traditional elements of French serious opera as exemplified by Rameau; the storm and the combat with a mythical creature are both vividly depicted.

MARY CYR/VALERIE WALDEN

Giraud, Marthe. *See* CARRÉ, MARGUERITE.

Giraud, Suzanne (*b* Metz, 31 July 1958). French composer. She was a student at the Strasbourg Conservatoire before entering the Paris Conservatoire, where her principal composition teachers were Ballif, Constant and Dufourt. She also studied the techniques of electro-acoustic composition and spectral music at IRCAM, the Groupe de Recherches Musicales and with Murail, before she took further studies with Donatoni and Ferneyhough. She was resident at the Villa Medici, Rome, from 1984 to 1986. She has received a number of awards, including the Enesco Prize of the SACEM, and commissions from French Radio and the Ensemble InterContemporain. She taught at the Paris Conservatoire from 1988 until 1993, when she became director of the Conservatoire de Paris 20e Arrondissement.

Most of Giraud's works are written for chamber groups of varying size and configuration; her often unusual choice of instruments, as for example in *Episode en forme d'oubli* and *Le rouge des profondeurs*, enables her to create a noticeable interplay of subtle timbres, a feature reminiscent of, and maybe derived from, the work of Marius Constant. Although she uses strict combinatorial serial techniques, the evocative titles of her compositions suggest that her work is informed by a naturalistic aesthetic, one that is at once dreamlike and exultant.

DANIEL KAWKA

Giraut [Girautz, Guiraut] **de Bornelh** [de Borneill] (*b* Bourney, nr Périgueux, *c*1140; *d c*1200). Troubadour. He was called by his contemporaries the 'maestre del trobadors'. His *vida* (for sources, see Pillet and Carstens, p.203) states that he was born in modest circumstances but managed to acquire a good education, and that he was held in high esteem for the subtlety and perfection of his poems by 'noblemen and by connoisseurs'. His songs show that he travelled widely, visiting virtually every court in southern France and northern Spain. This is confirmed in the *vida*, which reports that in winter he taught in school, and in summer he travelled from court to court accompanied by two singers who performed his songs. From references in two poems (PC 242.33 and 41), it seems likely that he was at some time a participant in the Third Crusade.

77 poems are attributed to Giraut, among them three *tensos* (including *S'ie·us quier conseil*) that are among the oldest examples of this genre. Three of Giraut's poems were cited by Dante in his *De vulgari eloquentia*, indicating the high regard in which he was held even a century after his death. Only four poems have survived with music, of which the *alba*, *Reis glorios*, is probably the best known and justly admired of all troubadour songs in modern times. The distinctive opening and general shape of *Reis glorios* suggest its relation to such 1st-mode plainchant melodies as the hymn *Ave Maris Stella*. Of the remaining poems with music, *S'ie·us quier conseil* is of interest as one of the few surviving examples

of the *tenso* with music: in it, Giraut addressed Alamanda, whom Rieger has identified as the *trobairitz* Alamanda Castelnau (1160–1223). Like *Reis glorios*, the melody for *S'ie·us quier conseil* must have been well known. Bertran de Born apparently used it for one of his poems (PC 80.13), calling it 'el son de N'Alamanda' (the tune of Lady Alamanda). Giraut's popularity is further attested by the fact that two of the surviving melodies later reappear as contrafacta. Musically, his surviving songs depart from the main troubadour tradition of through-composed melodies. Both *Reis glorios* and *S'ie·us quier conseil* are written in clear bar form, and the other two songs also employ melodies with internal repetitions.

ROBERT FALCK/JOHN D. HAINES

Girdlestone, Cuthbert M(orton) (*b* Bovey Tracey, Devon, 17 Sept 1895; *d* St Cloud, 10 Dec 1975). English writer on music. He obtained the licence ès lettres at the Sorbonne in 1915 and studied for a year at the Schola Cantorum; he entered Trinity College, Cambridge, in the same year. After serving with the army in France and Egypt he returned to Cambridge in 1919 and began lecturing there in 1922. Four years later he was appointed professor of French in the Newcastle division of the University of Durham, now the University of Newcastle upon Tyne. After his retirement in 1960 he lived at St Cloud, France.

Girdlestone's teaching consistently extolled classical ideals, especially clarity of expression and control of emotion by form. His first book, *Dreamer and Striver: The Poetry of Frédéric Mistral* (London, 1937), vindicated classical qualities in a 19th-century poet, and his first on music, *Mozart et ses concertos pour piano* (1939), concerned 'absolute' music by a supremely classical genius. The neglect of Rameau's music, even in France, and the scant attention it had received from writers outside France led him to write *Jean-Philippe Rameau: his Life and Work* (1957); he also wrote a study of French tragic opera texts of the period of Rameau. He was a Chevalier de la Légion d'honneur.

ARTHUR HUTCHINGS

Girelli (Aquilar) [Aguilar, Anguilar], **Antonia Maria** (*fl* 1752–73). Italian singer. She apparently began as a dancer in 1752 at the Teatro S Samuele, Venice, but was engaged as a singer in Florence from 1756 to 1757. In 1759 she returned to Venice to sing at the Teatro S Angelo. In 1760–61 she sang in Prague, in Giuseppe Scarlatti's *Adriano in Siria*, and was resident in Prague in 1764–5. The highpoints of her career were her performances in the premières of Gluck's operas *Il trionfo di Clelia* (1763, Bologna), in the title role, particularly impressing Dittersdorf, and *Le feste d'Apollo* (1769, Parma), as well as her contribution (as Silvia) to Mozart's *festa teatrale Ascanio in Alba* (1771, Milan), when Leopold and Wolfgang mentioned her as having had to repeat an aria. But in 1772–3, when she appeared in England (in Vento's pasticcio *Sofonisba* and Sacchini's *Il Cid* and *Tamerlano*), Burney found her intonation 'frequently false', though he commented on her 'spirited and nervous style'. A Barbara Girelli, perhaps her sister, sang in Parma (1758), Reggio nell'Emilia (1760, 1770), Venice (1763–4), Prague (1768–9), Pesaro (1771) and Siena (1771). Her last performance was in Guglielmi's *La sposa fedele*.

GERHARD CROLL, IRENE BRANDENBURG

Girelli, Santino (*b* Brescia; *fl* 1620–27). Italian composer. According to the title-page of his publication of 1626 he had studied under Lelio Bertani. He seems to have remained in Brescia. He is not known to have held a church appointment, though his surviving output is all of church music. The three collections consist entirely of masses and psalms, suggesting that he was not so

interested in the fashionable small concertato motet. However his psalms of 1620 demonstrate the way the double-choir style was developing at this date. Three of them are written for a first choir of soloists accompanied by the organ, whereas the second choir, marked 'cappella', need not have organ support, though there is an independent second organ part in the basso continuo partbook. Girelli occasionally drew soloists from the second choir as well, as in the *Dixit Dominus*: in this work modern concertato sections alternate with impressive antiphonal or imitative effects involving the whole ensemble.

JEROME ROCHE

Giribaldi, Tomás (*b* Montevideo, 18 Oct 1847; *d* Montevideo, 11 April 1930). Uruguayan composer. A member of a noted musical family, he studied with the cathedral organist Carmelo Calvo, the double bass player Rodolfo Battesini and the band director José Strigelli. His *Parisina*, produced at the Teatro Solís by a visiting Italian company, aroused such enthusiasm that he was awarded a government grant to study at Milan Conservatory. In 1879 he settled in Paysandú, where he wrote his second opera, *Manfredi di Svevia*, again given at the Solís by an Italian company (including Romilda Pantaleoni, Verdi's first Desdemona). His other operas, *Inés de Castro* and *Magda*, remain unproduced; all four are preserved in the Museo Histórico Nacional, Montevideo. A plaque honouring him as the first Uruguayan opera composer was installed in the Teatro Solís in 1930, and two years later a street behind the Museo de Bellas Artes was named after him.

ROBERT STEVENSON

Girò [Tessieri], **Anna (Maddalena)** (*b* Mantua, *c*1710; *d* after 1747). Italian mezzo-soprano. She is known above all for her professional association with Vivaldi – a relationship suspected, at the time, of carrying over into their private lives, although modern research suggests the opposite. Her father was a wig-maker of French extraction. About 1722 she went to Venice to study singing, living with an elder half-sister, Paolina, who acted as her chaperone. She made her operatic début in Treviso in autumn 1723; her first appearance on the Venetian stage was in Albinoni's *Laodice* (autumn 1724). In 1725 she briefly became a protégée of Alderano IV Cybo, Duke of Massa and Carrara. Her very successful career lasted until 1748, when, after singing in Piacenza at Carnival, she married a count from that city, Antonio Maria Zanardi Landi, and retired honourably from the stage.

Girò sang in over 50 operatic productions. She started, in her early teens, with minor travesty roles, then graduated to seconda donna and soon also to prima donna roles. Vivaldi, for whom she sang (nearly always as prima donna) in over 30 productions from 1726 to 1739, appears to have been her principal mentor. He once declared, with evident exaggeration, that he could not put on an opera without her, but she was well able to operate independently of him, as she proved during his transalpine tour of 1729–31 and again after his death in 1741.

Contemporary commentators paid tribute to Girò's attractive appearance and distinct acting ability, but found her voice a little weak. The amendments to the libretto of Zeno's *Griselda* that Vivaldi instructed Goldoni to make in 1735 were designed to hide her defects and promote her strengths.

MICHAEL TALBOT

Giró [Jiró], **Manuel** (*b* Lérida [Lleida], Catalonia, 5 Sept 1848; *d* Barcelona, 20 Dec 1916). Spanish composer. He received his first musical training at the cathedral school in Lérida, where he studied organ with Miguel Puntí and harmony with Francisco Oliver. Relinquishing a career as a priest, he went to Barcelona in 1870, and to Paris in 1874 for further study. During his 11 years in Paris, many of his works were performed; a *Salve* and *Lamentaciones de Jeremías* for chorus and orchestra, the symphonic suite *Granada*, and the ballet *Divertissement andalous* (at the Opéra in 1883). In 1884 he returned to Barcelona; his opera *Il rinegato Alonso García* was performed there with great success in 1885. Other successful works were a Requiem, written upon the death of his friend Julián Gayarre, the noted tenor, and the opera *El sombrero de tres picos*, based on a novel by Alarcón and performed in Madrid in 1893. His vast output also includes works for chorus, chamber ensemble and piano.

ANTONIO IGLESIAS

Girolamo, Pietro Antonio. *See* GIRAMO, PIETRO ANTONIO.

Girolamo da Udine. *See* DALLA CASA, GIROLAMO.

Giroust, François (*b* Paris, 10 April 1737; *d* Versailles, 28 April 1799). French composer. He was a member of the choir school of Notre Dame from January 1745 until October 1756, where he studied with Louis Homet and Antoine Goulet. As head boy he had two works performed on 17 June 1756: the motet *Lauda Jerusalem* and a *Magnificat*. He was ordained and took minor orders before leaving to become *maître de musique* at Orléans Cathedral.

Giroust also led the Académie de Musique in Orléans. Some programmes survive from the ambitious weekly concerts he led (1764–5 and 1768–9). These usually

included opera extracts (Rameau, Campra, Mouret and others) and a *grand motet* – often by Giroust himself. At least 22 of his motets date from this period, although most survive only in later revisions. His works were first performed at the Concert Spirituel in Paris in 1762. His *Exaudi Deus*, performed four times in 1764, was praised by Rameau, whom Giroust admired greatly. He subsequently wrote a *Dies irae* for Rameau which was played at a memorial service held in Orléans on 15 January 1765. For a contest sponsored by the Concert Spirituel in 1768, Giroust submitted two settings of *Super flumina Babylonis*. There were three finalists, and when Giroust was revealed as the composer not only of the first prize, but also of a specially demanded second prize, there was a great sensation. The second setting was compared with the work of Pergolesi and it seems d'Alembert and others supported it believing it to be by Philidor.

For the next seven years Giroust was the most frequently performed composer at the Concert Spirituel, aside from the director, Dauvergne. In 1769 he became *maître de musique* at Saints-Innocents in Paris. Two years later he married Marie Françoise d'Avantois de Beaumont, a soprano at the Concert Spirituel and Académie Royale who was related to the Archbishop of Paris. They had nine children; Louis XVI and Marie Antoinette stood, by proxy, as godparents to the first child born in Versailles, Louisa Antoinette.

On 17 February 1775 Giroust replaced Gauzargues as *sous maître de chapelle* at the Chapelle Royale in Versailles. He composed many motets for the chapel, together with the Coronation Mass for Louis XVI and a memorial *Missa pro defunctis* for Louis XV. On 16 June 1780 he purchased the position of *surintendant de musique, en survivance*, from de Bury, assuming the post in 1785. He retained the post of *maître de chapelle*, to the chagrin of Le Sueur and others. Some secular works, including masonic entertainments, date from this period.

Giroust stayed in Versailles after the fall of the monarchy in 1792 and, whether from fear or desperation, threw in his lot with the Revolution. He conducted nearly all the Revolutionary ceremonies in the city, and wrote over 50 songs, hymns and occasional pieces for them. Many were to texts by Félix Nogaret, a fellow freemason and radical colleague of Robespierre. The *Chant des versaillais* was performed for the National Convention and circulated throughout the country, becoming his most famous work and one of the best-known tunes of the Revolution (it survives in more than 50 versions and parodies). He suffered some financial hardship during this time, but in May 1793 was given the modest post of *concièrge* at the Château in Versailles, and in 1795 was awarded a government pension. On 13 February 1796 he became the first non-resident composer elected to the Institut de France, joining Méhul, Gossec and Grétry. He was much appreciated by the Commune of Versailles and received many tributes at his death, although later he was criticized for his political turn-around.

Giroust's main legacy is the *grand motet*, of which he was the last master. He followed in the tradition of Du Mont, Delalande and others, but his music is unmistakably late 18th-century in style: light melodies, regular phrases, simple harmonies and clear forms. Most of the motets have 5 or 6 individual numbers which often divide into slow/fast sections. Rounded binary is the commonest form in both solo and choral numbers; less frequent are operatic scene-complexes (e.g. 'Surge Domine' in *Memento Domine David*). Giroust's melodies are typically graceful and lyrical ('Jucundum sit ei' in *Benedic anima*), but there is greater strength in the choral writing. He dropped the *basse-taille* from the traditional five-part French chorus in about 1780, but did not abandon counterpoint, writing fugues such as 'Sic psalmum dicam' in *Ecce quam bonum* as late as 1790. He often combined several themes ('Quia contrivit' in *Confitemini*), or contrasted polyphony with forceful chordal passages or unisons ('Peccator videbit' in *Beatus vir*). He also delighted in orchestral word-painting. The first prizewinning *Super flumina* opens with fluvial murmurings; other subjects include storms (*Diligam te*), racing chariots (*Exaudiat te*) and earthquakes (*Dominus regnavit*). His surviving oratorios, despite their French titles, are all in Latin. The stirring *Passage de la Mer Rouge* was performed in royal, Revolutionary and Restoration times. The Paris Conservatoire acquired almost all of the surviving scores early in the 19th century from his widow, but many Revolutionary works are missing, and most of the masonic works were signed out of the library in the 19th century and not returned.

Gismondi [Resse; Hempson], **Celeste** (*d* London, 11 March 1735). Italian soprano. Acclaimed for her interpretation of intermezzo soubrette roles in Naples between 1725 and 1732, she succeeded Santa Marchesini as partner to the bass Gioacchino Corrado. During that period she created the female roles in all Hasse's intermezzos and in others by Vinci and Sarro. In 1732 she married an Englishman named Hempson who took her to London, where she sang under various names from November 1732 to 1734 in works by Handel and others. She created the role of Dorinda in Handel's *Orlando* and took part in performances of his *Alessandro*, the pasticcio *Catone*, *Tolomeo* and *Deborah* as well as works by Porpora (*Arianna in Nasso*, *Davide e Bersabea* and *Enea nel Lazio*) and Giovanni Bononcini (*Astarto*).

She had a voice of brilliant quality particularly suited to syllabic declamation but also capable of virtuoso passages; arias written for her often parody the emotional heights of serious roles. Dorinda's music calls for a compass from b♭ to b♭''.

FRANCO PIPERNO

Gismonti, Egberto (*b* Carmo, 5 Dec 1947). Brazilian composer. He began piano studies at the age of six at the Nova Friburgo Conservatory, studying classical music for 15 years. He moved to Rio de Janeiro in 1968, where he successfully participated in the Third Rio International Song Festival. He then went to Paris to study orchestration and analysis with Nadia Boulanger and composition with Jean Barraqué. After his return to Brazil, Gismonti developed a personal style incorporating Arabian and Italian melodies (his family's heritage), classical and contemporary music (especially Villa-Lobos and Stravinsky), traditional national genres (folklore, choro, bossa nova), Brazilian Indian themes and jazz. Influenced by the choro, Gismonti taught himself to play the guitar. He has played, recorded and toured throughout the world with several musicians. Since his first recording in 1969 he has made about 50 albums of his own compositions (most released by ECM Records and EMI-Brazil), in which he plays the piano, guitar, various flutes (including Indian instruments), kalimbas and other instruments, winning several prizes. He has also worked as a producer, arranger or player in several other musicians' recordings. Gismonti's compositions encompass a great diversity of musical elements and forms, both Brazilian and international, and have been written for solo instruments, ensembles, symphony orchestras, dance, theatre, films, exhibitions and poetic anthologies.

IRATI ANTONIO

Gistelinck, Elias (*b* Beveren aan de Leie, 27 May 1935). Belgian composer. He studied at the music academy in Harelbeke (trumpet and piano) and at the Brussels Conservatory and Paris Conservatoire. He studied composition with Victor Lepley. From 1961 he was connected with Belgian Radio and Television, of which he was chief producer of BRT 1 until he left in 1994. The influence of jazz is clearly discernible in his work, not superficially in a melody or a rhythm, but quite fundamentally, inflecting all its principal features. This is evident in the Suite for woodwind quintet (1962), the *Five Portraits* for clarinet solo (1965), dedicated to the American clarinet player Bill Smith, and the cantata for Jeanne Lee and 15 instruments on Dove Hazelton's poems (1968). Three outstanding works are *Ndessée ou Blues* on four poems of Leopold Sédan Senghor (Italia Prize 1969), the ballet *Terpsychore and Euterpe*, presented by Flemish Television for the Italia Prize 1972, and *Three Middelheim Sculptures* for jazz trio and wind band (1972). In the 1970s he explored a more tonal idiom, for example in *Funeral Music for Ptah IV* (1975) and *Elegy for Jan* (1976). In Belgium he has been awarded the Fuga and Koopal Prizes. For his entire output he was awarded the Prix de la Fondation de France.

CORNEEL MERTENS/DIANA VON VOLBORTH-DANYS

Gistou [Gistow], **Nicolas** (*b* ?Brussels; *d* Copenhagen, 19 July 1609). Danish composer and singer of Flemish origin. He was engaged on 1 May 1598 as an alto for the chapel of King Christian IV of Denmark by Gregorius Trehou, who had been sent to the Netherlands to recruit musicians. He contributed a five-part madrigal in two *partes*, *Quel augellin che canta* and *Ma ben arde nel cor*, to RISM 1606[5] (ed. in Dania Sonans, iii, Copenhagen, 1967) and four five-part dances survive in RISM 1609[30] (ed. in UVNM, xxxiv, 1913; ed. J. Bergsagel, *Music in Denmark at the Time of Christian IV*, ii, Copenhagen, 1988).

JOHN BERGSAGEL

Gitarre (Ger.). *See* GUITAR.

Giteck, Janice (*b* New York, 27 June 1946). American composer and pianist. She studied at Mills College, California, with Milhaud and Subotnick (BA 1968, MA 1969), at the Paris Conservatoire with Messiaen (1969–70), and at the Aspen School, Colorado, with Milhaud and Charles Jones. She also studied electronic music with Lowell Cross and Anthony J. Gnazzo, Javanese gamelan with Daniel Schmidt and West African percussion with Obo Addy. She gained a second MA, in psychology, at Antioch University, Ohio (1986), and worked part-time as a music therapist (1986–91). Giteck held teaching positions at California State University, Hayward (1974) and the University of California, Berkeley (1974–6), before joining the faculty of the Cornish College of the Arts, Seattle (1979), as a teacher of both composition and women's studies. She was a founder and co-director of the Port Costa Players, a contemporary-music ensemble based in San Francisco (1972–9), and, in 1978–9, music director of KPFA Pacifica Radio, Berkeley. Her awards include grants from the California Arts Council (1978) and the NEA (1979, 1983), and she has received commissions from the San Francisco SO (*Tree*, 1981) and others, including a joint commission from new-music groups in Portland (Oregon), Syracuse and Atlanta (funded by the Meet the Composer/Reader's Digest Consortium Commissioning Program) for the 'performance piece' *The Screamer* (1993) on the theme of love and rage.

Giteck has long been concerned with music as ritual. From the early 1970s her works reflected her interest in the cultures of the Amerindians. *A'agita*, an opera based on Pima and Papago mythologies, was performed by the Port Costa Players throughout the American West and in Europe. In the 1980s she began to pursue the relationship between music and healing, particularly in connection with AIDS. *Om Shanti* (1986), *Tapasya* (1987), *Home* (1989, revised 1992) and *Leningrad Spring* (1991) are part of a 'music and healing series', issued as recordings on CD as a benefit for the support of AIDS patients. (*CC1*, B. Weir)

INGRAM D. MARSHALL, CATHERINE PARSONS SMITH

Gitlis, Ivry (*b* Haifa, 22 Aug 1922). Israeli violinist. He began violin studies at the age of five with Karmy, and gave his first public concert when he was eight. At the age of ten he played to Huberman who sent him to study at the Ecole Normale de Musique, Paris, where three years later he won a *premier prix*. After graduating he studied with Enescu, Thibaud and Flesch. In the late 1930s he went to London and during the war he worked first in a munitions factory there and then for the army's entertainment service. After the war he made his débuts with the LPO, the BBC SO and other British orchestras. In 1951 he won the Thibaud Prize. The following year he returned to Israel and made his début there with the Israel PO and the radio orchestra. From the mid-1950s he toured widely and recorded the concertos of Tchaikovsky, Berg, Hindemith and Stravinsky, among others. He performed frequently in Paris, where he first appeared in 1951 and where he later settled. A specialist in 20th-century music, he was noted for his brilliant technique and his vital, rhythmic style.

WILLIAM Y. ELIAS

Gittern [gyterne] (Fr. *guisterne*, *guitarre*, *guiterne*, *guiterre*, *quinterne*, *quitaire*, *quitarre*; Ger. *Quinterne*; It. *chitarino*, *chitarra*; Sp. *guitarra*). A short-necked lute of the Middle Ages outwardly similar to the 16th-century MANDORE. Like its relative the lute, it had a rounded back but was much smaller, and it had no clear division between the body and neck. This lute-shaped gittern (or 'guitar' – the two words were then synonymous) was displaced in the 15th and 16th centuries by the Renaissance GUITAR, which combined the small size of the gittern with the body outline of the much larger vihuela. Thus the medieval gittern bore much the same relationship to the lute as the Renaissance guitar did to the vihuela. It has since become customary to call the medieval instrument 'gittern' and the later one 'guitar', a useful but artificial distinction.

Confusion over the identity of the gittern has existed since the 19th century. It has been referred to, inaccurately, as the mandore, mandora or mandola (an instrument with a different tuning which became common only around 1570); and the name 'gittern' has wrongly been given to the CITOLE, because the latter's outline resembled that of the (vihuela-shaped) guitar (see Wright, 1977). Consequently, many modern works refer to representations of gitterns as mandoras, and to those of citoles as gitterns.

1. Nomenclature. 2. Structure. 3. History.

1. NOMENCLATURE. All the above names for the gittern derive ultimately from the Greek 'kithara' via the Arabic 'qīṭārā'. The Arabic form gave 'chitarra' in Italian and 'guitarra' in Spanish. The French forms include 'quitarre' (from Arabic or Italian), 'gitere' (perhaps from Catalan), and 'quitaire', which became 'qui(n)terne' (by confusion with the unrelated Latin word *quinterna*, meaning 'fivefold'). By analogy, the form 'guiterne' was created, and this was the standard word until the 16th century. 'Guitar(r)e' (probably from Spanish) also occurs, but is rare. The English and German names were borrowed from French.

When the lute shape was displaced by that of the vihuela there was no immediate change of name: 'guiterre' became popular in French alongside 'guiterne' in the 16th century; and both were finally displaced by 'guitare' in the 17th century (probably because of Spanish influence), with the English and German names following suit. The Italian and Spanish names have not changed since the Middle Ages.

2. STRUCTURE. The back, neck and pegbox are usually made of one piece of wood, as in the 15th-century gittern (hitherto called a mandora) in the Wartburg Collection at Eisenach (see Hellwig, 1974). More rarely, the back was built up from separate ribs (as on the lute); these types occur from the late 15th century onwards. In all gitterns the body and neck blend in a smooth curve or straight line: unlike the lute, there is no sharp corner. The pegbox makes an angle with the neck of 30°–90° and is usually curved, sometimes into a semicircle (the so-called sickle shape) but often into a short, gently curving arc (fig.1). Some pegboxes, especially in English representations, are straight, like those of lutes (fig.2). However, most types of pegbox terminate in a human or animal head, a feature foreign to the lute.

There are three or four strings (or more commonly pairs of strings), sometimes five in the later 15th century (as in the Eisenach instrument). On some instruments (particularly French and English) the strings pass over a movable bridge and are attached to endpins, one for each course, or to a single pin or button; on others (notably in Spain and Italy) they terminate at a fixed frontal stringholder, as on the lute. Italian and Spanish instruments also show a predilection for multiple soundholes and decorative inlays on the belly and fingerboard. Frets are shown in some good depictions of gitterns (notably Italian paintings: fig.3), but they are absent in many good French and English representations. The use of a quill plectrum seems to have been almost universal.

3. HISTORY. The gittern probably entered Europe from Arab countries in the second half of the 13th century, along with other round-backed instruments such as the

1. Unfretted gittern with four double courses of strings: console figure, north tower of Amiens Cathedral, after 1375

2. Unfretted three-string gittern: detail of roof sculpture, St Peter and St Paul, Northleach, Glos., 15th century

lute and rebec. Sachs stated that the lute is called 'qītāra' in North African countries west of Egypt, and Farmer suggested that the kaitara, used in Muslim Spain from the 10th century, was a type of lute, adding that a diminutive of the same word, 'kuwaitira', is still used for a small lute in the Maghrib. Thus it seems likely that the gittern came from the Arabs of the western Mediterranean (for a summary of the evidence see Burzik, 381–5). Tinctoris (*De inventione*, *c*1487) called the gittern 'the instrument invented by the Catalans'. He may have meant that they modified it in some way to create a 'European' type distinct from the Arab one.

This is one possible explanation of a reference to 'guitarra morisca' and 'guitarra latina' ('Moorish' and 'Latin' guitar) by the Arcipreste de Hita (*Libro de buen amor*, *c*1330), and of references to similarly named instruments in Machaut's writings and in records of the French court of 1355–70. Although the differences between these two types are not known, it can reasonably be assumed that the two gitterns illustrated on f.104*r* of the *Cantigas de Santa María* (fig.4) are of the 'Latin' variety, since the players' dress implies that they are not Arabs. However, it has been suggested that another instrument in the same manuscript, with oval belly, long neck and circular (ff.133*r*, 140*v*) or sickle-shaped pegbox (ff.46*v*, 147*r*), is the *guitarra morisca* (*see* CITOLE, fig.3): none of the players is dressed like an Arab, however, and the instrument differs considerably from the gittern in that it has a long neck clearly demarcated from the body and (on ff.46*v* and 140*v*) a raised fingerboard extending on to the belly. There is no more reason to call this instrument a guitar than to call it a plucked fiddle (*vihuela de peñola*).

The earliest datable references to the gittern occur in French literature from around 1270 onwards, but depictions of the instrument become common only after 1300. Johannes de Grocheo, in his treatise *De musica* (*c*1300), called it 'quitarra sarracenica' ('Saracen guitar'), which suggests it was still a foreign novelty in France. This impression is strengthened by the great variety of its French names, which grew fewer as the instrument became common. In England depictions of it and references to it do not become frequent until well after 1300: one looks in vain for gitterns among the instruments appearing in the finely illustrated manuscripts such as the Queen Mary Psalter that were written in the first two decades of the 14th century.

During the 14th century the gittern gained increasing popularity. Whereas there was only one *gitarer* among the 92 musicians named in the accounts for the Feast of Westminster in 1306, the Duke of Brittany is said (in the *Grandes chroniques de France*) to have had in his company 'seven guiterne players, and he himself, so they say, began to play the eighth guiterne' when he left Brest Castle for England in 1348. By then the gittern seems to have ousted its rival, the citole, and to have become enormously popular not only among minstrels but also among the increasing number of amateur musicians of all classes. Small, portable and doubtless easy to play, it seems to have been frequently used in serenading and in visiting taverns, activities that often went hand-in-hand; it is mentioned in this connection in several French and English poems of the period 1350–1410. Machaut (*Prise d'Alexandrie*, *c*1367) mentioned 'guiternes dont on joue par ces tavernes' ('gitterns which are played in taverns'), and Chaucer, in three of the *Canterbury Tales*, referred to the gittern being played by people who frequent

3. Gittern with four double courses of strings: detail from the 'Investiture of St Martin as a Knight' by Simone Martini, fresco, 1317–19 (chapel of St Martin, lower church, S Francesco, Assisi)

4. *Gittern players: miniature from the 'Cantigas de Santa María', Spanish, c1270–90 (E-E b.I.2, f.104r)*

taverns. The parish clerk Absalom in *The Miller's Tale* is a typical example:

> In twenty manere coude he trippe and daunce
> After the scole of Oxenforde tho,
> And with his legges casten to and fro,
> And pleyen songes on a small rubible;
> Ther-to he song som-tyme a loud quinible;
> And as wel coude he pleye on his giterne.
> In al the toun nas brewhous ne taverne
> That he ne visited with his solas,
> Ther any gaylard tappestere was.

Accompanying himself on the gittern, he sings a serenade to the carpenter's wife:

> He singeth in his vois gentil and smal,
> 'Now, dere lady, if thy wille be,
> I preye yow that ye wol rewe on me',
> Ful wel acordaunt to his giterninge.

This association with taverns and serenading is also reflected in French legal documents of the same period concerning the brawls and murders which sometimes ensued, making it obvious that gitterns were common household objects. They are also found in inventories of noble households, such as one belonging to the French King Charles V dated 1373 which includes four gitterns, one in ivory and another decorated with silver and enamel. Another example of the gittern's popularity can be seen in the carvings in the nave of Winchester Cathedral (built 1346–1404), where no fewer than seven of the 21 instruments depicted are gitterns.

In the 15th century the gittern was gradually eclipsed by the lute, which appears with increasing frequency in iconography. There is often confusion between them, both in iconography (it is not always possible to distinguish lutes from gitterns in the less accurate representations) and in documentary references to lute players as gitterners (for example, the celebrated Pietrobono, whose lute-playing was praised by Tinctoris, was usually known by the epithet *dal chitarin*(*o*)).

By around 1487 Tinctoris could remark: 'The *ghiterra* is used most rarely, because of the thinness of its sound. When I heard it in Catalonia, it was being used much more often by women, to accompany love songs, than by men'. He also gave the only information that survives on the gittern's tuning, namely that it was strung like a (four-course) lute, that is, with the intervals 4th–3rd–4th. By this time the vihuela-shaped guitar had begun to appear. It must be this instrument, rather than the vihuela itself, which Tinctoris described in the following quote, since it is much smaller than the lute:

> that [instrument], for example, invented by the Spanish, which both they and the Italians call the *viola*, but the French the *demi-luth*. This viola differs from the lute in that the lute is much larger and tortoise-shaped, while the viola is flat, and in most cases curved inwards on each side.

It is interesting that Tinctoris did not use the name 'guitar' for this new Spanish instrument, but that soon became the practice as the lute-shaped gittern was abandoned in the 16th century.

The gittern and the guitar must have existed side by side for a considerable time, the older instrument steadily losing ground to the newer one. The instruments described as 'quintern' and illustrated in the treatises of Sebastian Virdung (*Musica getutscht*, 1511) and Martin Agricola (*Ein kurtz deudsche Musica*, 1528; *Musica instrumentalis deudsch*, 1529, enlarged 5/1545) are of the old variety. But already in 1530 there was a 'gyterneur suivant le mode espagnole' ('guitarist in the Spanish fashion') in the retinue of Emperor Charles V. Around 1550 a spate of guitar music was published, almost certainly for the new instrument. However, references to the guitar or gittern as a round-backed instrument or small lute are found in the later 16th century, the 17th and even the 18th, suggesting that the lute-shaped guitar was still occasionally used.

LAURENCE WRIGHT

Giucci, Carlos (*b* Montevideo, 4 Nov 1904; *d* Montevideo, 7 May 1958). Uruguayan composer. His Italian-born father Camilo Giucci had studied with Liszt before settling (*c*1880) in Montevideo, where he founded the Liceo Musical Franz Liszt (1895). Carlos learnt the piano from his mother the Uruguayan pianist Luisa Gallo-Giucci and from the Polish pianist Ignaz Friedmann when he toured Montevideo. He studied harmony, counterpoint and composition with Manuel García de la Lera, Tomás Mujica and Guido Santórsola. In 1937 he began teaching

music at secondary schools. He joined the Uruguayan Folk Society (1945) and the musicology division at the National History Museum (1946). His early works (*c*1920–50) are in the nationalist mould, while his style became more eclectic towards the end of his life.

LEONARDO MANZINO

Giudice, Cesare del. *See* DEL GIUDICE, CESARE.

Giudici & Strada. Italian firm of music publishers. It was founded in Turin in 1859 by Augusto Giudici (*b* Milan, 1820; *d* Luino, 28 Aug 1886) and Achille Strada (*b* Milan, 10 July 1823; *d* Turin, 2 Nov 1880); both had previously been engravers for Ricordi. They acquired their firm from Antonio Racca, for whom they were both working. During the next three decades they increased production, enlarged the printing department and opened a new hall for exhibition and sales; between 1887 and 1894 the firm also developed a lithographic department. Giudici & Strada is specially known for didactic works for the voice and for the piano (various works by Czerny and the Italian edition of Henri Herz's *1000 esercizi applicati all'uso del dactylion*), transcriptions for the piano and various instrumental combinations, and operas by Cagnoni, Petrella and Flotow. It also published works by Usiglio and Lauro Rossi.

In 1893 Arturo Demarchi merged his own firm with Giudici & Strada; in 1894 he became the sole proprietor and later moved the company to Milan. Under his ownership it published music by Vincenzo Ferroni, Francesco Paolo Frontini, Stanislao Gastaldon, and Antonio Scontrino. Subsequently it was sold to Paolo Mariani, who published vocal scores of works by Smareglia (including *Oceàna*, 1903). From 1920 to 1930 the firm was owned by Luigi Stoppa; when it closed in 1930 part of its repertory was taken over by other editors, the rest was lost.

STEFANO AJANI

Giuliani, Francesco ['Il Cerato'] (*b* Arzignano, nr Vicenza; *fl* 1619–29). Italian composer. The title-pages of his two publications describe him merely as 'Il Cerato d'Arzignano Vicentino' ('Il Cerato' may be an academic name). These publications are *Sacri concerti*, for from one to four voices and continuo (Venice, 1619), and *Celeste ghirlanda di 40 concerti*, for solo voice and continuo (Venice, repr. 1629; date of 1st edn unknown). Giuliani was therefore one of the many minor north Italians who in the early 17th century contributed to the repertory of the small-scale *concertato* motet, in particular the solo motet.

JEROME ROCHE

Giuliani, Giovanni Francesco (*b* Livorno, *c*1760; *d* Florence, after 1818). Italian composer and conductor. He studied in Florence with Pietro Nardini (violin) and Bartolomeo Felici (counterpoint), and from 1783 to 1798 led the orchestra at the Teatro degli Intrepidi there. He also lectured in music and declamation at the Accademia di Belle Arti in Florence, where one of his pupils was the composer Ferdinando Giorgetti. He was apparently based in Florence for the rest of his life.

Giuliani is one of the few lesser Italian masters of the late 18th century who was able to make a living as an instrumental composer in his own country and was not forced either to travel elsewhere or to compose church and theatre music, although he did write a two-act intermezzo and three ballets. The principal characteristics of his instrumental music are, on the one hand, a marked influence from Haydn and, on the other – at least as far as his solo concertos are concerned – excessive Classical rigour, on the model of Nardini's works, from which Giuliani was only occasionally able to free himself.

LUDWIG FINSCHER/GIACOMO FORNARI

Giuliani, Mauro (Giuseppe Sergio Pantaleo) (*b* Bisceglie, nr Bari, 27 July 1781; *d* Naples, 8 May 1829). Italian guitar virtuoso and composer. He studied the cello and counterpoint, but the six-string guitar became his principal instrument early in life. As there were many fine guitarists in Italy at the beginning of the 19th century

(Agliati, Carulli, Gragnani, Nava etc.), but little public interest in music other than opera, Giuliani, like many skilled Italian instrumentalists, moved north to make a living. He settled in Vienna in 1806 and quickly became famous as the greatest living guitarist and also as a notable composer, to the chagrin of resident Viennese talents such as Simon Molitor and Alois Wolf. In April 1808 Giuliani gave the première of his guitar concerto with full orchestral accompaniment, op.30, to great public acclaim (*AMZ*, x, 1807–8, col.538). Thereafter he led the classical guitar movement in Vienna, teaching, performing and composing a rich repertory for the guitar (nearly 150 works with opus number, 70 without). His guitar compositions were notated on the treble clef in the new manner which, unlike violin notation, always distinguished the parts of the music – melody, bass, inner voices – through the careful use of note stem directions and rests. Giuliani played the cello in the première of Beethoven's Seventh Symphony (8 December 1813) in the company of Vienna's most famous artists, including Hummel, Mayseder and Spohr, with whom he appeared publicly on many subsequent occasions. He became a 'virtuoso onorario di camera' to Empress Marie-Louise, Napoleon's second wife, in about 1814. He returned to Italy in 1819, heavily in debt, living first in Rome (*c*1820–23) and finally in Naples, where he was patronized by the nobility at the court of the Kingdom of the Two Sicilies until his death. Towards the end of his life he was renowned for performances on the lyre guitar.

Giuliani had two talented children, Michel (*b* Barletta, 17 May 1801; *d* Paris, 8 October 1867), who became a noted 'professeur de chant', succeeding Manuel Garcia at the Paris Conservatoire, and Emilia (*b* Vienna, 1813; *d* ?after 1840), a famous guitar virtuoso who wrote a well-known set of preludes for guitar op.46.

WORKS

Thematic catalogue in Heck (1970), ii; reprints of nearly all the works are in B. Jeffery, ed.: *Mauro Giuliani: the Complete Works in Facsimiles* (London, 1984–7); the most complete list of works is in 'The Compositions of Mauro Giuliani: a Checklist of the Earliest Editions', Heck (1995), 194–229

THOMAS F. HECK

Giuliano Bonaugurio da Tivoli. *See* TIBURTINO, GIULIANO.

Giulini, Carlo Maria (*b* Barletta, 9 May 1914). Italian conductor. He studied the viola under Remy Principe and composition under Alessandro Bustini at the Accademia di S Cecilia, Rome, and then conducting under Bernardino Molinari. After early experience as a viola player in the Augusteo Orchestra, Rome, under conductors who included Furtwängler, Klemperer and Walter, he made his début there in 1944, conducting Brahms with the same orchestra (renamed the orchestra of the Accademia di S Cecilia), and was appointed musical director for Italian Radio. He broadcast several lesser-known operas by Scarlatti, Malipiero and others, and in 1950 made his theatre début at Bergamo in *La traviata*. The same year he formed and conducted the Milan Radio Orchestra; a broadcast the following year of Haydn's then little-known *Il mondo della luna* brought him to the attention of Toscanini and De Sabata, who engaged him at La Scala, where he succeeded the latter as principal conductor in 1953. There he conducted a number of works new to the repertory, including Monteverdi's *L'incoronazione di Poppea* (in Ghedini's edition), Bartók's *Bluebeard's Castle*, and the first stage performance in Italy of Stravinsky's *The Wedding* (with choreography by Tatiana Gsovsky). Giulini was also closely associated at this time with Maria Callas (in *Alceste* and *La traviata*), and with the producers Luchino Visconti and Franco Zeffirelli. He gained further notable successes at the Aix-en-Provence and Holland festivals, as well as the Maggio Musicale Fiorentino.

Giulini first appeared in Britain at the 1955 Edinburgh Festival with the Glyndebourne Opera in *Falstaff*, but it was the Visconti production of *Don Carlos* for the Royal Opera House centenary in 1958 that made his name in Britain as an outstanding conductor of Italian opera. That year he first conducted the Philharmonia Orchestra in London, beginning an association which, during the 1960s, brought memorable performances of such works as Verdi's Requiem. He developed his repertory slowly and carefully, waiting until the 1960s to conduct Bach and the symphonies of Mozart and Beethoven. After the 1967 Covent Garden production of *La traviata* (also with Visconti), Giulini announced his intention to leave opera and concentrate on the concert repertory. He was principal guest conductor of the Chicago SO from 1969 to 1978, principal conductor of the Vienna SO from 1973 to 1976 and chief conductor of the Los Angeles PO from 1978 to 1984. In 1982 he returned to opera, conducting *Falstaff* in Los Angeles, London and Milan, performances which were less vivacious than in 1955, but exceptionally refined and contemplative.

When he first became internationally known in the 1950s, Giulini was sometimes compared to Toscanini for his combination of lyrical warmth and rhythmic dynamism, and for his ability to achieve precision in complex operatic textures (notably in the ensembles of *Falstaff*). But Giulini never had the aggressive drive of Toscanini, and his tempos, which were always expansive, have

Carlo Maria Giulini, 1981

become more so over the years. Opinion has been divided about his slow tempos, but there is widespread acknowledgement of the exceptional mellowness of his interpretations, the richness of his string textures and the seriousness of purpose with which he inspires both instrumentalists and singers. Of his later appearances, which became increasingly rare during the 1990s, his concerts with the European Community Youth Orchestra in 1994 were particularly admired. Giulini's recordings include two much praised performances of Verdi's Requiem (the first made in 1964, the second, with broader tempos, in 1989), *Don Carlos*, *Rigoletto* and *Il trovatore*, Mozart's *Don Giovanni* and *Le nozze di Figaro*, and, with the Los Angeles SO, symphonies by Beethoven, Brahms, Schumann and Tchaikovsky.

ROBERT PHILIP

Giulini, Johann Andreas Joseph (bap. Augsburg, 15 Oct 1723; *d* Augsburg, 21 Aug 1772). German composer. The son of an Augsburg businessman and language teacher, he studied at St Salvator, the Jesuit Gymnasium in Augsburg, and then attended the theological seminary at Pfaffenhausen in Swabia, taking priestly vows in 1749. Even as a student his compositions attracted attention. After joining the choir of Augsburg Cathedral, he became vicar-choral and, in 1755, cathedral Kapellmeister, a post he held for 17 years. He wrote the music for school dramas for St Salvator, some of the texts of which have survived (*D-As*, *DI*), as well as symphonies (Brook), sacred arias and much sacred music (masses, vespers, litanies, psalms, etc.), in which 'the late Baroque contrapuntal style merges with what are sometimes early classical melodic and harmonic aspects to form an organic unity' (Krautwurst, 1984). His *Canticum Zachariae* (in *D-Mbs*), a masterpiece of counterpoint, was performed regularly in Augsburg Cathedral during Holy Week from 1767 to 1797. His manuscript works (mainly in *A-ST*, *CH-E*, *D-As*, *EB*, *Mbs*, *OB*, *WEY*) show that he favoured a strict, academic style of church music. He was a sound theorist and an excellent teacher, especially of singing and composition; his pupils included F.F. Cavallo, later Kapellmeister at Regensburg Cathedral, Johann Michael Demmler, cathedral organist at Augsburg, and Johann Chrysostomus Drexel, later music director and Kapellmeister at Augsburg Cathedral.

Giunta [Giunti; Zonta; Junta; Juncta; de' Giunti Modesti]. Italian family of booksellers and printers. They originated in Florence and were active from the late 15th century until well into the 17th, and had branches in Venice, Rome, Lyons and Spain.

The Venetian branch was founded by Luc'Antonio Giunta (1454–1538), who became a bookseller soon after his arrival in 1477 and in 1489 began to publish, using various printers, notably Johann Emerich of Speyer (*fl*

Two facing pages from Luc'Antonio Giunta's 'Cantorinus' (Venice, 1513), with black notes printed on red staves

1487–1506), who excelled in liturgical books. Giunta began printing on his own in 1499. The firm prospered greatly, notwithstanding various financial and other disasters, including a fire of 1557 which destroyed the company's plant and much of its stock. By then, Luc'Antonio's sons Giovan Maria (*d c*1569) and, principally, Tommaso (1494–1566) were in charge. After Tommaso's death the direction passed to Giovan Maria's son, also called Luc'Antonio (*d* 1602), and thereafter to the latter's sons, Tommaso (*d* 1618) and Giovan Maria (*d c*1632), but after 1618 they left the management of the firm to a distant cousin, Bernardo di Filippo di Benedetto Giunta (*d* 1648). When Bernardo returned to Florence in 1644, Tommaso's heirs continued the firm until 1657, when it passed to Niccolò Pezzana, whose heirs continued to print with the Giunta device until 1801.

Throughout the life of the firm liturgical books made up a large proportion of its production; no competitor produced them in such quantity, or with greater taste and skill. Those intended for choir use were so carefully edited, at first by the Franciscan friar Francesco de Brugis, that their musical texts have scarcely been superseded. Luc'Antonio's editions of the *Graduale romanum* (1499–1501) and *Antiphonarium romanum* (1503–4), printed by Emerich with new music and text types and large woodcut initials, were unrivalled in quality and size. The similarly splendid *Psalterium*(1507) was printed in Giunta's workshop at his own expense. His *Cantorinus* (1513), a compendium of chants 'for beginners', was equally reliable in its readings. These volumes were reprinted by Giunta many times, and sometimes by rival printers, as were the numerous liturgical books intended for the clergy and new types of books for choirs. About half the liturgical books contain at least some music, normally with black notes printed on a red staff in separate impressions. The *Breviarium romanum* of 1571 was the first book to incorporate the liturgical changes ordered by the Council of Trent, and was the liturgical model for post-Tridentine liturgical books. Virtually all are examples of fine printing, usually adorned with handsome woodcuts and decorative initials (see illustration).

The elder Luc'Antonio was the only member of the Venetian branch who was concerned with polyphonic music. In 1520 he cooperated with Andrea Antico in the production of eight books of frottolas, chansons and motets, using Antico's woodcuts for the notes and staves (including RISM *c*1516², *c*1517¹), frottolas by Tromboncino and Cara, and anthologies of chansons and motets. Giunta's collaboration in some of these is signalled only by his printer's mark, a Florentine lily with the initials L.A.Z. (Luc'Antonio Zonta).

The first Giunta to collaborate with Antico was Antonio, who printed for Antico the *Liber quindecim missarum* (Rome, 1516; for illustration *see* ANTICO, ANDREA). Antonio's father, Jacomo di Biagio Giunta (1478–*c*1528), a nephew of Luc'Antonio, financed several volumes in Rome, including two of 1518 made with Antico's woodcuts and cooperation – the second and third books of *Canzoni sonetti strambotti & frottole*, both printed by Giacomo Mazzocchi. In 1522 Giunta financed the printing of the *Missarum decem clarissimis*

musicis compositarum ... liber primus printed by Giovanni Giacomo Pasoti. This was printed in two impressions, like the eight or more books that Giunta sponsored in 1526, most of them reprints of Petrucci volumes: *Canzoni frottole & capitoli ... libro primo de la Croce*, three volumes of masses by Josquin, and the four volumes of *Motetti de la corona*. These all have colophons that identify the printers as Pasoti and Valerio Dorico. The second edition of the *Motetti de la corona, libro tertio*, also printed for Giunta by Pasoti and Dorico, was dated April 1527, shortly before the Sack of Rome. Music printing in Rome resumed in 1530; the last music book to bear Giunta's mark was *Canzoni frottole & capitoli ... libro secondo de la Croce*, printed by Dorico in 1531.

Filippo Giunta (1456–1517) established a bookselling and printing business in Florence which became very successful but never printed books of music. In 1563 Filippo di Bernardo Giunta (1533–1600) was obliged to commission Rampazetto in Venice to print Giovanni Razzi's *Laudi spirituali* because Florence lacked a music press. In 1571 and 1573 petitions by Filippo's brothers Jacopo and Bernardo, for exclusive rights to print music and to sell certain music editions in Tuscany, were denied by the grand duke. In 1602 Filippo's son Modesto (*c*1577–1644) reprinted Galilei's *Dialogo della musica antica e moderna*. In 1605 Filippo's heirs printed a catalogue of works for sale which included a long list of musical editions, none of which were published by them.

Around 1521 Giovanni di Filippo Giunta, thereafter Juan de Junta (*c*1485–1561), established the family in Spain. He printed works with music in Burgos: a *Baptisterium* (1527) and reprints of Martínez de Bizcargui's *Arte de canto llano* (1528 and 1535); and in Salamanca: *Manuale secundum consuetudinem ecclesie Salmanticensis* (1532). His son Felipe printed a *Missale romanum* (Burgos, 1580). Tommaso di Bernardo (*d* 1624) and Giulio, probably his uncle (*fl* 1583–1618), worked in Madrid, using from 1594 the imprint 'Typographia Regia' or 'Imprenta Real'. They published numerous liturgical books, including a sacramentary for use among the Amerindians of the New World (1617) and a few volumes of polyphony, including Philippe Rogier's *Missae sex* (1598), Victoria's *Missae, Magnificat, motecta* (1600) and *Officium defunctorum* (1605), Alonso Lobo's *Liber primus missarum* (1602) and Stefano Limido's *Armonia espiritual* (1624). After Tommaso's death his widow Teresa managed the Typographia Regia, which in 1628 printed López de Velasco's *Libro de missas, motetes, salmos, Magnificats, y otras cosas*.

The Lyons branch of the firm was founded by Jacques (Jacopo di Francesco) Giunta (1487–1564), who was sent there around 1520 for that purpose by his uncle, Luc'Antonio. Jacque Giunta's heirs employed the excellent printer Corneille de Septgranges for several liturgical books, including three with music: *Missale ad usum romanum* (1550), *Missale sacri ordinis S. Ioannis Hierpsolymita*(1553) and *Missale iuxta ritum sancte ecclesie Lugdunensis* (1556).

THOMAS W. BRIDGES

Giuranna, (Elena) Barbara (*b* Palermo, 18 Nov 1898; *d* Rome, 31 July 1998). Italian composer and pianist. She studied the piano with Guido Alberto Fano at the Palermo Conservatory and composition with Camillo De Nardis and Antonio Savasta at the Naples Conservatory, before taking a course in advanced composition with Ghedini at the Milan Conservatory. She taught at the Rome Conservatory from 1937, at first theory of music and *solfeggio*, then, from 1942 to 1970, harmony, counterpoint and fugue. Between 1948 and 1956 she was music consultant to RAI in Rome. In 1982 she was elected a member of the Accademia di S Cecilia.

Her stage works, like the opera *Jamanto*, demonstrate her strong leaning towards traditional *verismo*. In her earlier compositions she favoured a descriptive, programmatic mode of writing in the manner of Respighi; indeed, works such as the symphonic poems *X legio* and *Patria* are clearly conditioned by the political and cultural climate of the 1930s: in them, Zanetti, writing in 1985, identified 'the entire baggage of fascist celebratory rhetoric and ingenuous striving after a pseudo-Roman epic style'.

Toccata and her Concerto for Orchestra bear witness to her interest in the possibilities of neo-classicism, and her later works exhibit a more eclectic modernism. She also worked as an editor of 18th-century music.

WORKS
(*selective list*)

Stage: La trappola d'oro (ballet), 1929; Jamanto (op, 3, Giuranna), Bergamo, Novità, 1941; Mayerling (op, 3, V. Viviani), Naples, S Carlo, 1960; Hosanna (op, 1, C. Pinelli), Palermo, Massimo, 1978

Choral: 3 cori, male chorus, 1940; 3 canti alla Vergine, S, female chorus, small orch, 1949; Missa sinite parvulos, children's chorus, hp, org, 1992; other choral works and songs for v, pf

Orch: Notturno, 1923; Apina rapita dai nani della montagna, suite after A. France, small orch, 1924; Marionette, 1927; X legio (Poema eroico), sym. poem, 1936; Toccata, 1937; Patria, sym. poem, 1938; Conc. for orch, 1942; Episodi, wind, brass, timp, pf, 1942; Conc. for orch no.2, 1965; Musica per Olivia, small orch, 1970

Chbr and solo inst: Adagio e Allegro da concerto, 9 insts, 1935; Sonatina, pf, 1935; Toccata, pf, 1937; Sonatina, hp, 1941; Solo per viola, 1982

Arrs. of 18th-century music incl. Vivaldi, Cimarosa and Paisiello

Principal publisher: Ricordi

ANTONIO TRUDU

Giuranna, Bruno (*b* Rome, 6 April 1933). Italian viola player, son of BARBARA GIURANNA. He studied the violin under Emanuele and Corti and the viola under Principe and Leóne at the Rome Conservatory, where he graduated in both instruments. He made his solo début in 1954 under Karajan in Ghedini's *Musica da concerto*. He established an international reputation as a soloist in the standard viola repertory and as a viola d'amore player, touring widely in Europe, the USA, Africa and the Orient, and gave the first performances of works by Lengley, Ghedini, Testi and Zafred. He was a member of the ensemble I Musici, 1952–9, and in 1960 became a founder-member of the Italian String Trio. He taught at the Milan Conservatory (1961–5), the Detmold Hochschule für Musik (1969–72), and was a professor at the Rome Conservatory (1965–72); from 1966 to 1972 he held masterclasses at the Accademia Musicale Chigiana, Siena. After playing with the Végh Quartet from 1978 to 1980, he became director of the Padua Chamber Orchestra in 1983 and a professor at the Berlin Hochschule the same year. In 1985 he formed a string trio with Mutter and Rostropovich. He plays a viola by Carlo Tononi dated 1690. (D. Blum: 'Alto Artistry', *The Strad*, xcix (1988), 386–9)

PIERO RATTALINO/MARGARET CAMPBELL

Giuseppino. *See* CENCI, GIUSEPPE.

Giustini, Lodovico (Maria) (*b* Pistoia, 12 Dec 1685; *d* Pistoia, 7 Feb 1743). Italian composer, organist and harpsichordist. He was from a family of Pistoiese musicians: his uncle Domenico Giustini composed a mass for 12 voices and chorus in 1615 (in *I-PS*), and a great-uncle, Francesco Giustini, spent 50 years as a singer in the cathedral choir from about 1607. Lodovico's father, Francesco, was organist of the Congregazione dello Spirito Santo. Lodovico himself was elected to membership on 21 July 1695 and succeeded his father as organist on 10 July 1725, remaining in the post until his death. This congregation was affiliated to the Jesuits and Lodovico also acted as organist at their church, S Ignazio (now the Chiesa dello Spirito Santo). His position incorporated the duties of music master of the Jesuit seminary, the Collegio dei Nobili, for which he probably provided compositions; performances of a cantata in 1724 and an oratorio and cantata in 1739 are documented. Two other oratorios are known: *La fuga di S Teresia* (text by Luigi Melani, music lost) was given in the Palazzo Melani in 1726, and a pasticcio for which Giustini wrote the recitative and several arias, *Il martirio di S Jacopo, protettore della città di Pistoia* (libretto by F.M. Aldobrandi, music in *I-PS*), was performed in July 1727 (see Grundy Fanelli, 1998). In 1728 Gaetano Berenstadt and others performed the Lamentations that Giustini composed jointly with G.C.M. Clari (music lost).

In 1730 Giustini's name was put forward by Gian Gastone dei Medici for the post of organist at S Maria dell'Umiltà, but he failed to win on the voting. He was, however, elected as cathedral organist in 1734, working until his death under the *maestro di cappella* Francesco Manfredini, who was related to Lodovico (their mothers were members of the Spampani family). Lodovico also played the harpsichord in many oratorio performances in the city, probably on a regular basis for the Oratorian church of S Prospero.

Giustini's fame rests entirely on his set of 12 *Sonate da cimbalo di piano e forte detto volgarmente di martelletti* op.1 (Florence, 1732, facs. Cambridge, 1933, and Florence, 1982), which are *sonate da chiesa* in four or five sections alternating slow and fast tempos. These are the earliest known pieces written especially for the piano, and as such were to stand alone for 30 years. They exploit the capabilities of the instrument, using gradations of tone from the softest *piano* (in the Alemanda of Sonata no.9) to a strong *forte* (in the Dolce of no.6). Giustini showed pre-Classical trends in his choice of harmony (e.g. the Italian 6th), firm tonality with wide-ranging modulations, and some attractive melodies.

Giustiniana [justiniana, vinitiana, viniziana] (It.). Term used broadly in the 15th century for a kind of song related to the poetry and singing of LEONARDO GIUSTINIANI; it re-emerged in the 1560s for a specifically (and programmatically) Venetian style of three-voice light madrigal.

In the 15th century the word is never associated with any known music. Giustiniani's own performances were

famous but their music was evidently unwritten. Surviving polyphony for poetry ascribed to him (but by no means generally agreed to be his) begins with Ciconia's *Con lagrime bagnandome nel viso* and his innovative *O rosa bella*. Although certain stylistic patterns can be seen here (Fallows, 1992), the earliest clearly characterized genre is in the four *justiniane* printed in Petrucci's *Frottole libro sexto* (RISM 1506[3], nos.2–5, identified in Rubsamen, 1957; ed. Disertori, 1964, pp.248–63): two of these have texts from poems associated with Giustiniani, and one is a florid rearrangement of a song first found in the 1460s. They all have unusually florid discantus lines and a disarmingly dissonant approach to cadences, both features quite apart from what is otherwise in Petrucci's frottola collections or indeed in earlier known polyphony.

The later tradition is first found in Girolamo Scotto's three-voice collections of *canzoni napoletane*, 1565[12] and 1566[7], and most specifically in his *Primo libro delle justiniane a tre voci* (1570[17] and later reprints; ed. M. Materassi, Milan, 1985), as well as in Andrea Gabrieli's *Greghesche et iustiniane a tre voci* (1571). While these are in one sense just a Venetian response to similar Neapolitan genres (see Einstein), they may have roots in the earlier tradition, with its text repetitions, stuttering and coarse counterpoint (see Rubsamen). This genre also carried names like *canzone alla venetiana* and GREGHESCA, continuing to the first decade of the 17th century.

DAVID FALLOWS

Giustiniani [Giustinian], **Leonardo** (*b* Venice, *c*1383; *d* Venice, 10 Nov 1446). Italian poet, humanist and statesman. From one of Venice's leading families, he studied in Padua soon after 1400, married Lucrezia di Bernardino da Mula in 1405, joined the Maggior consiglio of Venice in 1407, and was appointed *procuratore* of S Marco in 1444. As a pupil of Guarino Veronese and Gasparino Barzizza he was in touch with many leading humanists.

His Italian poetry can be divided into four main genres: the devotional *laude* (see Luisi), for which there is some music, albeit without any distinctive style; the *strambotti*, heavily contested in authorship and with no known musical settings; the extended love poems in his *Canzoniere* (ed. in Wiese, *Poesie*, 1883, based on *I-Fn* Pal.213; necessary completions from *F-Pn* it.1032 are in Wiese, 'Zu den Liedern', 1883), apparently the basis for the unwritten singing to the lute for which he was famous in his own day (see Pirrotta, 1972); and the shorter and perhaps earlier poems included in the posthumous *Il fiore delle … canzonette del … Lunardo Iustiniano* (Venice, *c*1472 and 12 later editions; those not also found in the *Canzoniere* are ed. Wiese, 1885). This last volume contains all the poems ascribed to Giustiniani that survive in polyphonic settings before about 1480; but of its 30 poems at least four are definitely spurious, so many writers have doubted the authority of the others (the case for accepting them is outlined in Fallows). All his poetry has a relaxed and informal style that betokens a new direction in Italian literature; much use is made of Venetian dialect, 'translated' into more formal Italian for the manuscripts used in the only available modern edition of his *Canzoniere*.

DAVID FALLOWS

Giustiniani, Vincenzo (*b* Chios, 13 Sept 1564; *d* Rome, 28 Dec 1637). Italian writer on music. His father, the Genoese governor of Chios, brought the family to Rome after the Turks conquered the Aegean island in 1566. There he made a fortune in banking, which gave his son the means to pursue a lifelong passion for art. Giustiniani was one of the most discerning patrons of his time: an early supporter of Caravaggio and Poussin, he also published one of the first illustrated guides to an art collection, the *Galleria Giustiniana* (Rome, 1631). Here he assembled engravings of the statues on display at his villa in Bassano di Sutri (now Bassano Romano), near Viterbo.

Giustiniani's importance for music rests on his *Discorso sopra la musica* of 1628, which describes musical trends in Italy during the previous half century. While it is concerned primarily with Rome, such leading centres as Ferrara and Florence are not forgotten. His narrative places changes in musical style as early as 1575, the result of interactions between performers, composers and patrons. The *Discorso* thus provides an important corrective to modern historiographical obsessions with Florence and the year 1600. It also offers a glimpse of how a sophisticated layman, rather than a trained theorist, perceived the developments unfolding around him. Finally, Giustiniani made music historically contingent, linking its mutability with that of taste and custom. The only source of the work (in *I-La*), part of a larger collection of Giustiniani's writings, was copied in 1640. It remained unpublished until the 19th century (ed. S. Bongi, Lucca, 1878; pr. in A. Solerti: *Le origini del*

melodramma, Turin, 1903/*R*, pp.98–128; ed. and Eng. trans. in MSD, ix, 1962).

Giusto (It.: 'just', 'exact'). A word found in musical contexts most often within the complicated concept TEMPO GIUSTO. But it has other uses: Liszt and several other composers of his time used *giusto* for a return to the normal tempo after a section marked *a piacere*, and Schubert designated the controlled tempo in the finale of his 'Trout' Quintet with the marking *allegro giusto*.

Givenci, Adam de. *See* ADAM DE GIVENCHI.

Giyenko, Boris Fyodorovich (*b* Vladikavkaz, 26 July/8 Aug 1917). Russian composer. He studied with B. Nadezhdin at Tashkent Conservatory where he taught from 1945 (professor from 1981). He has received a number of awards including People's Artist of Uzbekistan (1988). Although Russian by nationality, Giyenko has lived and worked in Uzbekistan and this is reflected in his musical thinking. He has written a manual of orchestration for Uzbek traditional instruments and has composed romances to words by Uzbek poets. His often sumptuous style combines Western formal traditions with typical elements of Uzbek folk music.

RAZIA SULTANOVA

Gizzi, Domenico (*b* Arpino, 12 March 1687; *d* Naples, 14 Oct 1758). Italian male soprano and singing teacher. According to tradition he studied in his home town with M.T. Angelio, then moved to Naples to complete his training at the Conservatorio di S Onofrio. He was a singer in the Treasury of S Gennaro, Naples, from 1700 to 1707 and again from 1717 to 1736. In 1706 he was appointed singer of the Neapolitan royal chapel, a post he held throughout his career. From 1717 he was often absent from the choir for artistic reasons: on 17 November 1718 he requested three months' leave to sing at the Teatro Pace in Rome; on 16 December 1719 he set off for Messina, where he remained until May 1720; on 7 October he left for a stay of four months in Rome; and on 12 September 1724 he asked permission to 'perform in the coming November and Carnival' at the Teatro S Cassiano in Venice. In August 1725 he was singing in Florence, in February 1728 he petitioned for leave to sing in Genoa, and in August 1728 he requested permission to remain in Venice to sing until Carnival 1729. His reputation reached its height during the 1720s when he sang in several of the leading Italian opera houses. Between 1722 and 1724 and again in 1726 he took part in operas at the Teatro Alibert (Teatro delle Dame after 1726), Rome. In 1725 he was one of the singers in the first production of Porpora's *Didone abbandonata* at Reggio nell'Emilia. In 1728 and 1729, his name appeared in the cast of operas by Porpora and Leo at the Teatro S Giovanni Grisostomo, Venice. Throughout this period he was also active as a singing teacher. His most famous pupil was the castrato Gioacchino Conti, who made his début at Rome in 1730 and who took the name of 'Gizziello' in honour of his master.

Gizzi seems to have spent his last years in comparative obscurity. On 20 December 1752 and 26 April 1758 he was a member of the examining commission for new entrants to the Neapolitan royal chapel. The surviving account books of the chapel (now in *I-Na*) show that he was awarded a pay rise on 16 February 1744, and they also state his date of death.

Gjevang, Anne (*b* Oslo, 24 Oct 1948). Norwegian mezzo-soprano. She studied in Oslo, Rome and Vienna, and made her début at Klagenfurt in 1972 as Baba the Turk. She was successively a member of the companies in Ulm (1973–7), Bremerhaven (1977–9) and Karlsruhe (1979–80). Her Bayreuth début in 1983 as Erda led to engagements at Covent Garden and the Metropolitan Opera in the same role. In Zürich (1985–90) her repertory included Carmen, Ulrica, Maddalena (*Rigoletto*) and Isabella (*L'italiana in Algeri*). She created the role of Lady Macbeth in Bibalo's *Macbeth* at Oslo in 1990. A versatile singer-actress, Gjevang is also an impressive concert singer. Her distinctive voice, with its northern contralto colouring, can be heard in recordings ranging from *Messiah* and Mozart's *Mitridate* to Mahler's symphonies nos.3 and 8 and Nielsen's *Saul og David*.

ANDREW CLARK

Gjoka, Martin (*b* Tivari, Montenegro, 20 April 1890; *d* Shkodra, 3 Feb 1940). Albanian composer and choral conductor. Born allegedly to a noble family, he studied music at the ecclesiastical college of Shkodra. Later Palok Kurti and Frano N'doja taught him to play the piano, violin and flute, and initiated him to Bach, Handel, Mozart and Beethoven. Already destined for an ecclesiastical career, he graduated from the Salzburg seminary

in 1912 where he also studied music with Pater Hartmann. Reportedly back in Albania in 1913, he worked as a schoolteacher, also founding (1917) and conducting a chorus and orchestral ensemble. He worked hard to develop the music departments of the Rozafa (founded 1918) and Bogdani (founded 1919) art societies in Shkodra, and as a teacher sought to replace foreign school songs with Albanian ones.

Gjoka was one of the most important musical figures in pre-socialist Albania. His example was influential to the following generation of Shkodran composers (including Jakova, Daija, Harapi and Zadeja) and even after the 1967 ban on religion his name was still mentioned, although his membership of the Franciscan order was scarcely mentioned. Gjoka's surviving works usually adhere to a rather simple compositional technique, usually based on simple, homophonic textures. His melodies, for instance in the instrumental diptych *Dy lule mbi vorr të Skanderbegut* ('Two Flowers on Scanderberg's Grave'), occasionally allude to Shkodran urban song.

GEORGE LEOTSAKOS

Gjoni, Simon (*b* Shkodra, 28 Oct 1927; *d* Tirana, 31 Oct 1991). Albanian conductor and composer. Self-taught in theory and solfège, he joined various Shkodran choruses and wind bands, composing songs of lasting popularity. He then went to Prague, where he studied at the Conservatory (1952–3) and the Academy of Musical Arts (1953–8). On his return to Albania, he was appointed conductor at the Tirana Theatre of Opera and Ballet, where he was responsible for the Albanian premières of a number of operas, including *Il barbiere di Siviglia* (1958) and *Pagliacci* (1962). He subsequently served as conductor of the Tirana RSO (1963–5), director of the Jordan Misja Art Lyceum, Tirana (1965–8), and director of music at Fier (1972–81). As a member (from 1981) of the Union of Albanian Writers and Artists he wrote music criticism for the periodicals *Drita* and *Nëntori*. He taught chamber music at the Tirana Music Academy from 1985 until his death.

Gjoni's orchestral works were among the most successful composed in Albania during the 1960s and 70s. His imaginatively orchestrated *Albanian Symphonic Dances* use folksong material as a pretext for bold dramatic gestures, while his Symphony no.1 is memorable for its thorough assimilation of classical form and its clearcut, memorable themes.

GEORGE LEOTSAKOS

Glachant, Antoine-Charles (*b* Paris, 19 May 1770; *d* Versailles, 9 April 1851). French composer and violinist, son of Jean-Pierre Glachant. He received his early training from his father. In 1790 he became orchestra director of the Théâtre du Délassement-Comiques, an opera house where young artists obtained performing experience. There in the same year his first works, the operas *Pharamond* and *L'homme à la minute*, were performed. Glachant had left the theatre in disappointment by 1791, and joined the military campaign in Belgium in 1792. By 1795, when he married, he had settled in Arras as commander of the third company of the Corps des Mille Canonniers de Paris, and later (1813) became commander in charge of the Arras defence. There in 1806 he helped to found a music conservatory which maintained a close relationship with the Paris Conservatoire, and in 1812 he founded an active amateur music society which later became the Philharmonic Society. He also attempted further theatre pieces – *Le mannequin vivant*, which was well received at its Paris performance in 1796 but was never published, and *Les deux dragons*. In about 1823 he moved to Paris where he led the orchestra at the Théâtre Français and witnessed the success of his duos and quartets at the *soirées* organized by Baillot. He returned in 1830 to Arras where he continued his previous work until his retirement to Versailles in 1846.

Glachant's chamber works are the most important of his creations. It is particularly in his duos and quartets that he seemed at ease and able to express, with individuality, the ideas of a man well trained in French style yet influenced by Italian virtuosity and the harmonic and formal techniques of the Mannheim school. In this respect his style reflects that of his compatriots Gossec, Le Duc, Vachon and Blasius. His duos are all in three movements; two of these works follow the French tradition and the other the Italian. Certain passages are quite difficult to perform and melodies are often long and Romantic in concept. His string quartets attempt to balance attractive themes and dance rhythms with an independent movement of instrumental parts. His harmony frequently ventures beyond the simple and direct modulations used by most French quartet composers of this period.

WORKS

VOCAL

printed works published in Paris

Pharamond (drame mêlé de choeurs et de chants, 5, P.-A.-L.-P. Plancher de Valcour), Paris, Délassement-Comiques, 1790

DEANNE ARKUS KLEIN

Glackemeyer, Frederick [Johann Friedrich Conrad; Frédéric] (*b* Hanover, 10 Aug 1759; *d* Quebec, 12/13 Jan 1836). Canadian musician of German birth. The son of a military band musician, he is reported to have been a violin prodigy. In 1777 he enlisted in one of the Brunswick regiments destined for Canada. Discharged in 1783, he settled in Quebec, where he made a living as instrumentalist, teacher, tuner, repairman, and importer of instruments and sheet music. He was probably the first full-time musician in Canada who left a mark both immediate and lasting. His activities, probably as a director and conductor, enhanced the holding of subscription concerts in Quebec in the 1790s, featuring orchestral and chamber music by J.C. Bach, Haydn, Mozart, Pleyel and others. Many of the printed parts assumed to have been supplied by Glackemeyer are still preserved. Prince Edward (later Duke of Kent), in Quebec 1791–4, is said to have appointed him a regimental bandmaster.

Glackemeyer served as organist of the local basilica (1816–18) and as vice president of the Quebec Harmonic Society (1819–22). Two surviving marches suggest his acquaintance with Mozart's music; there are also arrangements of two *voyageur* songs. A son, the notary Louis Edouard (1793–1881), was an amateur flautist and member of Quebec chamber music ensembles; a daughter married Theodore Molt.

HELMUT KALLMANN

Gladkovsky, Arseny Pavlovich (*b* St Petersburg, 9/21 May 1894; *d* Leningrad, 31 July 1945). Russian composer. In 1917 he graduated from the faculty of mathematics and physics at the Petrograd University, and then graduated in 1924 from Kalafati's composition class at the Leningrad Conservatory. He served for a while as secretary and teacher of music theory for the Petrograd University Music Society (1915–17) before lecturing for Politprosvet ('The Political Enlightenment') in Red Army units (1918–22). He then headed the music department of the First Artistic Studio (1922–32) and the music department of the Leningrad College of Choreography where he taught musical and theoretical disciplines (1928–32). He later taught composition at the music college and special music school attached to the Leningrad Conservatory (1934–41). In collaboration with Ye. Prussak, he wrote one of the first Soviet operas on a revolutionary theme –

Za Krasnïy Petrograd (1919) ('For Red Petrograd (1919)') – which was first staged in 1925 at the Malïy Theatre.

IOSIF GENRIKHOVICH RAYSKIN

Gladney, John (*b* Belfast, 12 Aug 1839; *d* Manchester, 12 Dec 1911). English clarinettist, brass band conductor and teacher. He was the son of a military bandmaster and had a precocious musical talent; by the age of 11 he was appearing as a piccolo soloist with Louis Jullien's orchestra. He also appears to have been a talented pianist, but it was as a clarinettist that he made his mark as a player. After touring with a number of theatre bands he became leader of the Harrogate Spa Band, and in 1861 he joined the Hallé Orchestra in which he remained for most of his playing career. In the 1850s he started to conduct brass bands, and he went on to have influential associations with the most successful Victorian bands, particularly the Meltham Mills Band. At the time of his death Gladney was widely referred to as the father of the brass band movement. With two other successful Victorian band conductors, Edwin Swift and Alexander Owen, he shaped the format and idiom of the British brass band. The standard instrumentation comes from their preferred combination of forces (*see* BAND (i), §IV, 3), and there is little doubt that Gladney, the most urbane and well-educated of the three, was the defining influence.

TREVOR HERBERT

Gladwin, Thomas (*b* c1710; *d* ?London, ?1799). English organist, harpsichordist and composer. According to Burney, he emerged as a performer on the organ and harpsichord in London about 1736. Although a proposed date of 1738 is questionable, Gladwin was evidently an early orgainst at Vauxhall Gardens where he perpetuated the tradition of the Handelian organ concerto. Gladwin's concertos were not published, but a gavotte from a concerto provided the substance for a popular song, *Greenwood-Hall: or Colin's Description (to his Wife) of the Pleasures of Spring Gardens*. From 1760 or earlier Gladwin was organist at Audley Chapel, Grosvenor Square. A set of *Lessons* for the harpsichord or organ, three with violin accompaniment, was issued in the 1750s by J. Johnson, reissued in 1768 by Welcker, and still later printed by Bland. The sonatas with violin accompaniment were probably the earliest in this category by an English composer, and the solo works among the earliest English keyboard sonatas (as opposed to suites). The keyboard style reflects the impact of Scarlatti's sonatas in England and incorporates various orchestral effects translated from the currently fashionable Italian concerto. Gladwin's songs were very popular and were included in numerous 18th-century collections. Burney, in *Rees's Cyclopaedia*, asserted that 'John' Gladwin died at 'a great age' in 1799; the cited connections with Vauxhall and Audley Chapel suggest that this is the same person.

RONALD R. KIDD

Gladys Knight and the Pips. American soul vocal group. Its most consistent line-up was Gladys Knight (*b* Atlanta, GA, 28 May 1944), her brother Merald 'Bubba' Knight (*b* Atlanta, 4 Sept 1942) and her cousins William Guest (*b* Atlanta, 2 June 1941) and Edward Patten (*b* Atlanta, 2 Aug 1939). Gladys was a child prodigy, singing in church and winning a television talent contest at the age of eight. At this time she and other family members became the Pips, a group which was renamed Gladys Knight and the Pips in 1957 to emphasize the leading role of her strong alto. Their first hit recording came in 1961 with a version of the Johnny Otis song *Every Beat of my Heart*. In 1967 they joined the Motown label where Knight's versatile singing was presented in such well-crafted songs as the romantic ballad *Take me in your arms and love me*, the stirring call and response song *I heard it through the grapevine* (1967) by Norman Whitfield and Barret Strong, and Kris Kristofferson's *Help me make it through the night*. Having signed to Buddah Records, the group had even greater commercial success in the mid-1970s; their

version of Jim Weatherly's *Midnight Train to Georgia* was one of their finest recorded performances, where Knight's gospel-tinged singing was matched by the Pips' urgent close harmonies. This signalled a move to recordings of more mainstream pop ballads such as *The Best Thing that Ever Happened to Me* and the film theme *The Way We Were*. In later years Gladys Knight made numerous television and concert appearances and recorded the theme song to the James Bond film *Licence to Kill* (1989).

DAVE LAING

Glaeser, Franz. *See* GLÄSER, FRANZ.

Glagolitic Mass, Glagolitic chant. The term 'Glagolitic' (neo-Lat. *glagoliticus*, from Croatian *glagoljica*: 'the Glagolitic alphabet'; related to Old Church Slavonic *glagolŭ*, 'word') refers to a distinctive alphabet devised for the Slavonic literary language in the 9th century by Constantine (monastic name, Cyril) and Methodius, apostles of the Slavs. By extension it is used to refer to the Catholic (as opposed to Orthodox) Mass translated into Church Slavonic, and to compositions such as the Glagolitic Mass of Leoš Janáček that are settings of such texts, whether written in the original alphabet or transcribed into Latin letters. 'Glagolitic chant' or 'Glagolitic singing' (*glagoljaško pjevanje*) refers in a broader sense to a repertory of paraliturgical as well as liturgical Catholic chant in the Slavonic vernacular transmitted orally, principally in Croatia.

In 862 Prince Rostislav requested the Byzantine Emperor to send a Slav-speaking mission to Great Moravia. Accordingly, Cyril and Methodius in 863 established the Catholic liturgy there, and with it a centre for the Catholic faith within the whole of Slavonic Europe. Since that time, in Catholic Slavonic countries, a continuous tradition of the Catholic Slavonic or Glagolitic liturgy has existed side by side with the Latin liturgy of the Western Church, even though subject to some local interruptions. Early sources include fragments of a 10th–11th-century sacramentary at Kiev (*UA-Kan* DA/P.328) and fragments of an 11th-century missal, besides several complete late-medieval missals; the Mass Ordinary melodies ('Věruju', 'Svet', 'Blagoslovlen', 'Agneče Boži') in a Glagolitic missal of the 14th or 15th century were shown by Vajs (1910, p.436) to be precisely those of the corresponding Latin texts in another missal of the same date and geographical provenance. The privilege of celebrating the Slavonic liturgy has been repeatedly confirmed by the Holy See, for example, at the Council of Trent, up to and including the 20th century. Within this tradition, in turn, some of the areas of south-eastern Europe now falling within Croatia and Slovenia have played a particularly important part, together with the basilica of S Hieronimo in Rome, a centre of the Slavonic liturgy especially since the late 16th century.

Interest in the Glagolitic liturgy received a particular impetus owing to the coincidence of the millennial celebrations for the mission to Moravia of Sts Cyril and Methodius in 1863, those for St Cyril's death in 1869 and so on with the rise of Slavonic nationalism, and the participation in the nationalist movement by Catholic priests such as František Sušil in Moravia. (The 1863 celebration was also marked in Rome, and Liszt composed his 'Slavimo slavno slaveni!' for this occasion, to a Croatian rather than Old Slavonic text.) A concordat between the Vatican and Montenegro in 1886 allowed the re-introduction into Slovenia and Bohemia of the Glagolitic rite (against the protests of some ecclesiastics); the edition of the Glagolitic missal that was subsequently authorized for Bohemia and Croatia was the *Missale romanum slavonico idiomate* (Rome, 1905). Almost immediately, the Glagolitic Mass began to be set also in a modern style: the first such setting by a Czech composer was the *Missa glagolskaja* by Ladislav Kožušníček (1907), and later settings include the *Glagolská mše* of J.B. Foerster (1923) besides that of Janáček (1926).

Croatian Glagolitic chant (Glagolitic singing) is attested in a report sent to Rome between 1740 and 1742 by Matej Karaman, bishop of Osor (*HR-ZAzk* 22321, ms.546): in villages the parish priests and lower clergy employed a style of singing 'without instruments and without learning, composed of a certain natural and affective melody that awakens devotion' (*senza istromenti, e senza studio, composto d'una certa melodia naturale, e patetica, ch'eccita divozione*). Transcriptions of specific melodies from this repertory began to appear during the 19th century, and field recordings have been made since the early 20th (the oldest, *c*1910–30, are preserved in the Phonogrammarchiv of the Austrian Academy of Sciences in Vienna); the Croatian Academy of Sciences is responsible for collecting and publishing the sources. The repertory has a wide geographical provenance in the northern Adriatic islands, especially Krk, in Istria, and in the Croatian coastal mainland of northern and central Dalmatia; various different regional styles can be distinguished (see the studies by Bezić and Doliner).

GEOFFREY CHEW

Glahn, Henrik (*b* Hornstrup, nr Vejle, 29 May 1919). Danish musicologist. He studied the piano and organ at the Royal Danish Conservatory (organ diploma 1941) and musicology with Abrahamsen and Larsen at Copenhagen University (MA 1945), being awarded the university gold medal for an essay on the treatment of rhythm in the hymn tunes of the Reformation period (1947) and the doctorate in 1954 with a dissertation on the melodies of Lutheran hymns in the 16th century. After serving as

organist and choirmaster of Jaegersborg Church (1947–59) he joined the succession of distinguished organists (Gade, Laub, Wöldike, Jeppesen, Sørensen) at Holmens Kirke, Copenhagen (1959–64). He began teaching at Copenhagen University in 1945, later becoming reader (1964) and professor of musicology (1967–89). In 1954 he was appointed to the Music History Museum as assistant to Godtfred Skjerne, whom he succeeded as director, and also as curator of the Carl Claudius Collection of Musical Instruments (1956–80). Under his leadership the museum became a model institution and an important part of Danish musical life; in 1966 it moved into a fine 18th-century mansion, the former parsonage of the Reformed Church near the centre of Copenhagen, gaining much enlarged exhibition, library and concert facilities where the two instrument collections were amalgamated in 1979.

As a leading authority on all aspects of Danish church music and on Lutheran hymnody, Glahn has been a member of the government liturgical commission (1970–73) and was editor of a revised edition of the Danish hymnbook (1992). He was president of the Society for Danish Church Music (1954–71) and the Danish Musicological Society (1969–80), chairman of the Organizing Committee for the 11th IMS Congress (Copenhagen, 1972) and a member and vice-president of the IMS Council (1972–82). In 1968 he became a member of the editorial committee of Monumenta Musicae Byzantine, succeeding Oliver Strunk as director (1971–93). He was elected a member both of the Royal Danish Academy of Sciences in 1972, later becoming vice-president (1977–83), and of the Norwegian Academy of Sciences in 1994. The Festschrift *Festskrift Henrik Glahn*, ed. M. Müller (Copenhagen, 1979), which contains a list of his writings, was published to mark his 60th birthday.

Glam rock. A highly theatrical mode of presentation found in 1970s rock and pop which, in its parade of an inauthenticity that hardly appeared to sell out to commercial interests, prepared the way for the eruption of punk rock by the middle of the decade. Glam, a contraction of the slightly seedy glamour, proclaimed dissatisfaction with the excessive machismo prevalent in growing hard rock. By 1971 the New York Dolls, David Bowie and Marc Bolan's T. Rex had begun experimenting with overt feminine make-up and some cross-dressing on stage. Bowie's transgressions were most calculated, perceiving

most clearly the value of image, both on stage and in print. They shared an emphasis on short, well-constructed, hook-based songs in opposition to the lengthy meanderings of progressive rock, although Bowie's contemporary work in particular, for example *Ziggy Stardust and the Spiders from Mars*, was stylistically little removed from hard rock. Around 1972 Roxy Music combined this demeanour with a progressive style founded on Brian Eno's atmospheric tape treatments and Andy Mackay's raucous saxophone. The irony of the genre's inauthenticity became particularly apparent in the UK glitter rock bands of the early 1970s, particularly Slade, Sweet and Gary Glitter. These shared pared-down guitar textures and teen-orientated promotion, often becoming indistinguishable from mainstream teenage pop by the mid-1970s.

ALLAN F. MOORE

Glandien, Lutz (*b* Oebisfelde, Altmark, 4 June 1954). German composer. In 1977 he became a member of the Dresden multimedia ensemble Schicht, a group active in the politicized singing movement of the DDR. He studied at the Deutsche Hochschule für Musik, Berlin, where his teachers included Wolfram Heicking (1979–83), among others, and at the DDR Akademie der Künste (1985–7), where he was a masterclass student of Georg Katzer. In his instrumental works, such as *Ruhestörung* (1986) and *Und war es noch still* (1989), he has focussed on critical questioning and developed a compelling language of sonic and rhythmic gesture. In 1989 he began to explore electro-acoustic music and in this medium devoted himself increasingly to the genres of applied music. As well as writing pieces for solo instrument and tape (to be performed by friends), he created sound installations, music for video, and radio plays. He began to work with musicians such as Chris Cutler and others from the avant-garde rock scene in 1990. As he included improvisatory techniques from that sphere in his own music, his development of musical gestures accelerated and his works became more playful. Later he became interested in virtual and recycled music, taking pre-recorded sound as a starting point for composition, and since 1997 exploration of tonal phenomena in the voices of humans and primates. (*KdG*, A. Kopp)

GISELA NAUCK

Glanert, Detlev (*b* Hamburg, 6 Sept 1960). German composer. He studied in Hamburg with Diether de la Motte (1980–81) and Günter Friedrichs (1982–4) before moving to Cologne to study with Henze (1984–8). He also attended the Tanglewood Festival (1986) and was a guest at the Villa Massimo, Rome (1992–3). From 1989 to 1992 he co-organized the Cantiere Internazionale d'Arte, Montepulciano. His opera *Der Spiegel des grossen Kaisers* won the Lieberman Opera Prize in 1993.

Glanert cites Mahler and Ravel as his primary influences. His Symphony no.1 (1985) explores a Mahlerian symphonic landscape and quotes briefly from *Das Lied von der Erde*. *Mahler/Skizze* (1989), based on the experience of visiting Mahler's grave, explores, in delicate instrumental sonorities, the borders between disparate Expressionism and structural formalism. Henze's sound world has also made an impact on Glanert's style, as has his predilection for music drama, particularly chamber opera. Glanert frequently brings diverse elements into a dialogue without combining them in a final synthesis. His opera *Leyla und Medjnun* (1987–8), for example, combines Turkish folk melodies and characters with European art music in a deliberately discontinuous montage.

RACHEL BECKLES WILLSON

Glanner, Caspar (*d* Salzburg, before 17 Aug 1577). Austrian composer and organist. According to his own account he served as a singer in several court chapels before entering lifelong employment with Michael of Khuenberg, Archbishop of Salzburg, in 1556. There he was employed as server and cathedral organist, and was in addition charged with the duty of instructing one boy each year in the playing of the organ.

Apparently he had already begun work on his song collection, *Neue teutscher geistlicher und weltlicher Liedlein*, planned in four volumes, but only the first two volumes appeared in print (posthumously, in 1578 and

1580 respectively). Of the other two, which remained in manuscript and have since been lost, only one work is extant; the song *All Ding auff Erd zergencklich sind* (in RISM 1558[20]). The remaining 49 lieder from the first two parts amply demonstrate Glanner's mastery of the transitional style between the older Gesellschaftslied (songs in the Minnesinger tradition for the educated classes) and the Italianate song of the second half of the 16th century. They are largely treble-dominated songs with quasi-polyphonic lower voices. Glanner used half-choir techniques and four of his pieces are in the homophonic style of the villanella. His occasional use of polyphonic devices, such as the canonic doubling of the tenor cantus firmus in the treble of his five-part *Erbarm dich mein, O Herre Gott* from the 1578 publication, seems anachronistic in comparison with his other works.

Ruprecht Glanner (i), the brother of Caspar, was an organ builder who repaired the organs at Mariahof in Styria in 1518 and Salzburg Cathedral in 1529 and 1530. His son Ruprecht (ii), Caspar's nephew, lived with Caspar in Salzburg in about 1564. He was also an organ builder, and collaborated with Kaspar Bockh on restoring the Salzburg Franciscan church organ.

OTHMAR WESSELY

Glantz, (Yehuda) Leib (*b* Kiev, 1 June 1898; *d* Tel-Aviv, 27 Jan 1964). Israeli cantor and composer of Ukrainian birth. Born into a family of cantors (both of his grandfathers were cantors, as was his father), he made his cantorial début in Kiev at the age of eight. At the age of 14 he became the choir director at his father's synagogue, where he helped to introduce the 19th-century polyphonic repertory. He studied the piano and theory at the Totovsky Conservatory and later counterpoint and composition with Glière. In 1920 he moved to Chişinău, now in Moldova, where he served as cantor and continued his studies with Abraham Berkowitsch (known as Kalechnik), an authority on cantorial recitatives. After emigrating to the USA in 1926 he served as cantor for congregations in New York and Los Angeles. His extensive recordings with Asch and RCA Victor made him famous in Ashkenazi Jewish communities. In 1954 he emigrated to Israel and settled in Tel-Aviv, where he continued to work as a cantor. He founded a cantorial school, the Tel-Aviv Institute for Religious Jewish Music, in 1961; a year after his death the institution was transformed into a foundation for the publication of his music, which remained active until 1971.

One of the greatest virtuoso cantors of the 20th century, Glantz possessed an unusual lyric tenor voice of great agility and amazing coloratura, a wide range and a rich palette. He used his vocal ability to generate virtuoso improvisations based on Eastern European Ashkenazi modes, traditional prayer chants and melodies of the Hasidim. He was particularly famous for his dramatic interpretation of prayer texts. The majority of Glantz's numerous compositions, all of which are based on his improvisations, remain in manuscript. His published works for cantor also incorporate elements of European music, especially the harmonic language of early 20th-century Russia.

An ardent Zionist, Glantz believed that the foundation of the state of Israel in 1948 was the sprouting of Jewish and worldly redemption, an event that called for the renovation of synagogue music. He advocated a new style of cantorial recitative that de-emphasized a mournful traditional Eastern European sound and encouraged joy and thanksgiving. He believed that cantors should sing more in modes close to major than in modes close to minor. While he realized this himself in his later cantorial recitatives, most cantors did not follow his lead.

WORKS
(*selective list*)

Beshuv Adonai (Ps cxxvi), 1v, pf (1943–4); Ich bin a Yisroel (E. Auerbach), 1v, pf (1943–4); Matai? [When?], Palestinian song, 1v, pf (1943–4); Deror yiqra [Nigun from Talne], 1v, pf (1951); Rinat Ha-qodesh, prayer modes (1965) [cantorial recits for the Sabbath and festival prayers]; Friday Evening Service, cantor, SATB, org (1967); Hallel and 3 Festivals, cantor, SATB, org (1968); High Holidays, cantor, SATB, org (1970); Sabbath Morning Service, cantor, SATB, org (1971)

ELIYAHU SCHLEIFER

Glanville-Hicks, Peggy (*b* Melbourne, 29 Dec 1912; *d* Sydney, 25 June 1990). Australian composer. She was a major figure in American musical life as a New York City critic, composer, and concert organizer from the late 1940s into the 1960s. From about 1960 she spent increasing amounts of time outside the USA, especially in Greece. In 1967 she underwent surgery in New York to remove a brain tumour; she recovered but virtually ceased composing. In 1975 she moved from Greece to Australia, where her music attracted renewed attention from performers and audiences. In 1987 the University of Sydney awarded her the honorary DMus.

She received her first training from 1927 at the Melbourne Conservatorium, where she studied with the conductor and opera composer Fritz Hart. In 1931 she won a scholarship to the RCM, where she studied with Vaughan Williams (composition), Arthur Benjamin (piano), and Constant Lambert and Malcolm Sargent (conducting). The award of an Octavia Travelling Scholarship (1936–8) enabled her to further her studies with Wellesz in Vienna and with Nadia Boulanger in Paris.

In 1938 Glanville-Hicks married the English pianist and composer Stanley Bate and on occasion wrote as Peggy Bate until their divorce in 1949. In 1940 to 1941 she accompanied Bate on his concert tours to Melbourne and Sydney, then Boston and New York, where they decided to settle. In 1951 she married Rafael da Costa, an Austrian-Israeli critic, whom she divorced in 1953. She lived in the USA from 1941 to the early 1960s, taking American citizenship in 1948.

In 1947 she became a *New York Herald Tribune* critic; Virgil Thomson was her senior colleague. During the next eight concert seasons, October through April, the paper

published over 500 of her reviews, mostly of new music. She also published reviews and essays in *Musical America*, *Music & Letters*, *Musical Quarterly*, the *New York Times* and other journals. She updated the American material in *Grove's Dictionary* (5th edition, 1954) and herself contributed 98 entries on current American composers and eight articles on Danish composers.

She was active in support of other musicians, first through the League of Composers and then with the American Composers Alliance. She organized concerts and commercial recordings of new music, usually including a work of her own. She assisted Menuhin in presenting concerts of Indian music (1955). As a director of the New York Composers' Forum, she organized concerts of new American music with discussion by the composers.

As a critic and writer she was as concerned with identifying a composer's source of inspiration as with explaining compositional technique, including atonalism, serialism, neo-classicism, *musique concrète*, and the mid-century avant garde. She described the qualities of American inspiration in the music of Ives, Virgil Thomson, Copland, Douglas Moore, the young Bernstein and others. Yet her outlook was thoroughly international. She was most interested in the music of the 'exotics' or 'musical explorers' such as John Cage, Lou Harrison, Paul Bowles, Colin McPhee, Alan Hovhaness and Edgard Varèse. Like them, she found in various non-Western musical cultures more authentic, even mystical sources of inspiration.

After the concert season, from May to September, she had more time to write music and to gather inspiration. She travelled to other parts of the USA and to England, Germany, Italy, Greece, Jamaica, Morocco, India, Australia and elsewhere. Her work was supported by several major awards, including a grant from the American Academy of Arts and Letters (1953–4), two Guggenheim Fellowships (1956–8), a Fulbright Fellowship (1960) and a Rockefeller Grant (1961–3) for travel and research in the Middle East and East Asia.

As a composer she had an affinity, probably reinforced by her training with Hart and Vaughan Williams, for tonal music, consonant and often non-diatonic harmonies, and modal melodies such as are heard in traditional or folk musics. Her melodic writing is distinctive, as are her clear textures and rhythmic patterns, often reinforced by a variety of percussion instruments. She was inspired by the melodies and rhythms of several traditions: Spain (in the Sonata for Harp), India (*The Transposed Heads*), North Africa (*Letters from Morocco*), sub-Saharan Africa (Sonata for Piano and Percussion), South America (Prelude and Presto for Ancient American Instruments), the Italian peninsula (*Concertino antico*, *Etruscan Concerto*), and, in her mind the most authentic of all, ancient Greece (*Nausicaa*, *Sappho*).

The plots of her operas and ballets involve subjects close to her heart. *The Transposed Heads* explores the dilemma of a woman whose marriage to a high-born man enhances her social position, but who then falls in love with his best friend, a less ascetic type, and is unable to live without both of them. The plot of *Nausicaa* (produced at the 1961 Athens Festival) explores female authorship, specifically the female tradition in ancient Greek mythology. Indeed, Glanville-Hicks saw herself as the only woman who had ever written music of any merit, that is, as part of a male tradition.

She was a successful innovative artist in an essentially commercial system. She cultivated men and women with influence and money to sponsor her productions. She found leading performers, conductors and choreographers whose styles and interests suited her own. Her skills as a publicist, as well as the quality of her work, helped attract audiences. Although she once said that 'in America they handed me fame and fortune on a platter', in reality she worked very hard for her musical and spiritual values.

DEBORAH HAYES

Glarean, Heinrich [Glareanus, Henricus; Loriti] (*b* Mollis, canton of Glarus, June 1488; *d* Freiburg, 28 March 1563). Swiss music theorist, geographer and humanist. His father was a prosperous landowner and a member of the town council for 40 years. As a child Glarean first studied music and other subjects in Berne under Michael Rubellus. In 1501 Rubellus moved to Rottweil in the Black Forest and Glarean followed him, continuing his studies there for almost five years. More than 30 years later Glarean

praised his teacher in his musical treatise *Dodecachordon*. On 5 June 1506 Glarean enrolled in the University of Cologne, where he first studied philosophy and theology, later mathematics and music. His music teacher was Johannes Cochlaeus, afterwards renowned as a theologian and opponent of Luther. Glarean admired him greatly and included several of Cochlaeus's musical examples in the *Dodecachordon*. After completing his university studies in 1510, Glarean received a licence to teach.

In 1512 Glarean composed a poem in praise of Maximilian I, which he sang before the emperor and an assembly of German princes in Cologne. So great was the emperor's enthusiasm that he crowned Glarean with a laurel wreath and placed a ring on his finger. In 1514 Glarean went to Basle, where he met Erasmus, who later became the dominant influence in his life (see illustration). He venerated the older man as a teacher and valued friend, writing with warm affection in the *Dodecachordon* about the literary labours they had shared. He enthusiastically embraced the Erasmian concept of a world of antiquity illuminated by Christian faith. Erasmus in turn called Glarean the champion of Swiss humanism and wrote several letters of recommendation on his behalf.

In Basle Glarean directed a boarding school, which included music in its curriculum as well as Latin literature and Greek grammar. He spent 1516 in Pavia and Milan

Heinrich Glarean: sketch by Hans Holbein (ii) in the margin of a copy of Erasmus's 'Praise of Folly', 1515 (Kupferstichkabinett, Basle)

and in the following year went to Paris. Here he became friendly with many humanists, including Heinrich Faber and Guillaume Budé, and conversed through an interpreter with the celebrated composer Mouton. Returning to Basle in 1522 Glarean resumed his teaching and gave lectures at the university; in the same year he was married. Basle was fast becoming an important centre of the Reformation movement. Glarean's opposition to it crystallized during this period in spite of his former admiration for Luther and his erstwhile friendship with Zwingli and Oecolampadius. When certain reformers advocated the substitution of vernacular song for plainsong Glarean wrote a vigorous defence of Gregorian chant in the tenor partbook of his own collection of motets (*D-Mu* 324).

In 1529 Glarean moved to Freiburg im Breisgau. There he became professor of poetry at the university and later professor of theology. He also conducted an educational institute similar to the one in Basle. Most of his important writings on music and mathematics, as well as his editions of works of classical Roman authors, were published after 1530. Between 1530 and 1536 he visited the nearby Benedictine monastery at St Georgen, where he studied the works of numerous Greek and Roman writers. From this came the impetus to make an edition of Boethius's *De musica* and to develop his own system of 12 modes. In 1558 he was made an adviser in the reorganization of the school curriculum in Solothurn, Freiburg and Lucerne, and also took part in the plans for a Swiss Catholic Hochschule. He gave strong support to current musical endeavours and was influential in the appointment of teachers of singing. Among his more renowned pupils were the Swiss historian Aegidius Tschudi and the composer Homer Herpol, whose collection of gospel motets entitled *Novum et insigne opus musicum* is based on Glarean's system of 12 modes. Glarean knew many musicians of his day including Sixt Dietrich, Jean Mouton, Ludwig Senfl and Johannes Wannenmacher. In his old age he was troubled with blindness.

Glarean's first musical treatise, *Isagoge in musicen* (Basle, 1516), is a characteristic cantus-planus manual containing chapters on the elements of music, solmization and the eight modes. Gaffurius and Erasmus are among the authorities cited. Although mensural music is not treated, Pierre de La Rue and Obrecht are called important composers. Glarean's fame as a musical theorist rests above all on his *Dodecachordon*, published in Basle in 1547 by Heinrich Petri. In the letter of dedication to Cardinal Otto Truchsess, Glarean stated that he had been working on his modal system for no less than 20 years. This vast tome is divided into three books: book 1, based mainly on Boethius and Gaffurius, treats the elements of music, consonance and dissonance, and solmization; book 2 concerns the theory of 12 modes applied to plainsong and other monophony; book 3 discusses mensural music and the theory of 12 modes applied to polyphonic music.

Since the title-page of the *Dodecachordon* advertises the modal names of his new system, it is clear that Glarean considered it the outstanding contribution of his treatise. To the medieval eight modes he added four more, an Ionian and Hypoionian with finals on C, and an Aeolian and Hypoaeolian with finals on A. He attempted to show that his system was based on the old Greek modes and believed that it was a renewal of modal usage in antiquity. But its value lay in his recognition of Ionian (or major) and Aeolian (or natural minor). He asserted that the

Ionian was the mode most frequently used in his time. In applying his system to polyphony Glarean analysed the mode of individual voices. If one voice is in an authentic mode the adjacent voice range (above or below it) usually will be in the plagal of the same mode; sometimes, however, his analyses are polymodal (e.g. a tenor in the Phrygian mode and a bass in the Aeolian; *see* MODE, §III, 4).

The impact of the *Dodecachordon* on Renaissance musical thought was considerable. Although Glarean's system was by no means universally adopted, it was acknowledged either openly or tacitly by many writers. In 1558, 11 years after the publication of the *Dodecachordon*, Zarlino's *Istitutioni harmoniche* reproduced Glarean's modal system but without naming Glarean as its author. The Stralsund cantor Eucharius Hoffmann wrote both musical compositions and a theory book (1582) based on Glarean's teaching. Other writers who acknowledged his modal contribution include Cerone, Morley and Zacconi. From a musical point of view the most fruitful results of Glarean's modal principles are found in the many instrumental compositions of late Renaissance composers who applied his ideas. Such men as Merulo, Padovano, and Andrea and Giovanni Gabrieli wrote toccatas and ricercares in all 12 modes, or 'tones' as they were almost invariably called. For modern scholars the value of the *Dodecachordon* consists in the extraordinary diversity of its contents. Ambros, for example, called Glarean the founder of musical biography and praised the breadth of his text. Others have stressed the work's significance as a musical anthology, since it contains over 120 compositions (29 by Josquin des Prez, the remainder by Obrecht, Ockeghem, Isaac and others). Some modern writers have praised the work's contribution as a monument of musical humanism, or cited its exhaustive treatment of the polyphonic method of composition of the Franco-Netherlandish school, or pointed out its subtle defence of Catholic orthodoxy.

In 1557 Glarean published, with his stepson J.L. Wonnegger as general editor, a 151-page abridgment of his *magnum opus* entitled *Musicae epitome*. This modest treatise contains nine polyphonic pieces, seven of which come from the larger work. A German version, *Uss Glareani Musick ein Usszug*, which includes a motet by Homer Herpol, was published in the same year. Early in his career Glarean wrote a poem, *Panegyricon*, which praised the 13 members of the Swiss confederation. In 1558 the poem was set to music by Manfred Barbarini Lupus. Three portraits of Glarean are known. One, a woodcut reproduced in the *Geschichte der Familie Ammann* (Zürich, 1904), shows him at the age of about 35; another, the bust on his tomb in the Cathedral of Freiburg, portrays him in old age; the third, in Basle, is a full-length sketch (see illustration) by Hans Holbein (ii) in a copy of Erasmus's *The Praise of Folly* formerly owned by Oswald Myconius.

CLEMENT A. MILLER

Glasenapp, Carl Friedrich (*b* Riga, 3 Oct 1847; *d* Riga, 14 April 1915). German writer on music. He was educated in Riga and in Dorpat, where he studied linguistics, classical philology and the history of art. He taught in Pernau (now Pärnu) from 1873 to 1875, when he returned to Riga, where he remained as a teacher of language and literature until 1912. At the age of 16 he had heard Wagner's works in Riga, and while still a student began assembling material for a biography; the first volume was ready by 1876, and Glasenapp was able to take it to show Wagner at the first Bayreuth Festival. He became a trusted member of the Wagner circle, and was given access by Cosima to much information and material. A dedicated and painstaking enthusiast, he made use of a vast amount of documentary evidence and brought it into systematic order; but his loyalty to the ideal of Wagner as presented to him by Cosima and the inner Wahnfried circle led him to accept an 'authorized' view of Wagner and in that interest to suppress and even alter evidence when it was deemed 'unnecessary' to the official portrait of Wagner. This unreliability was quickly observed, and Glasenapp was vigorously defended by another partisan, Houston Stewart Chamberlain, in his own book on Wagner (1896). Nevertheless, there is much invaluable material in the book; and not all of this survives in the English version by W. Ashton Ellis, who himself altered and suppressed some of Glasenapp's material. 'No student in this field can feel anything but gratitude to Glasenapp for his tireless industry', wrote Ernest Newman in the preface to his own *Life of Richard Wagner* (1900–08). The lexicon and encyclopedia remain valuable resources, although his writings about Siegfried Wagner are marred by his polemical position. His papers are held at the Richard-Wagner-Nationalarchiv in Bayreuth.

JOHN WARRACK/JAMES DEAVILLE

Gläser [Glaeser], **Franz (Joseph)** (*b* Obergeorgenthal [now Horn i Jířetín], 19 April 1798; *d* Copenhagen, 29 Aug 1861). Bohemian composer and conductor. He was a chorister at Dresden before studying at the Prague Conservatory from 1815. In 1817 he went to Vienna, where for the next 13 years he provided the three popular theatres with a series of mainly unsuccessful scores for farces, parodies and pantomimes: in 1817–18 he wrote ten works for the Theater in der Leopoldstadt, starting with *Bärenburgs Sturz* (22 August 1817), from 1819 until 1827 he provided the Theater in der Josefstadt with some 60 works (including an arrangement of Weber's *Oberon*, 20 March 1827), and from 1827 until 1830 the Theater an der Wien with a further 20. On 3 October 1822 it was Gläser's responsibility as Kapellmeister at the Theater in der Josefstadt to supervise the performance of Beethoven's music to Meisl's *Die Weihe des Hauses*. Probably his most successful score was that to Rosenau's *Sküs, Mond und Pagat* (29 January 1820), performed 73 times in this theatre alone.

In 1830 Gläser went to Berlin, where his best-known works were written and performed: *Aurora*, *Die Brautschau auf Kronstein*, *Andrea* and *Des Adlers Horst* (libretto by Holtei). The last, after its première at the Königstädtisches Theater on 29 December 1832, was performed widely and often for half a century; the richness, variety and expressive power of this score show how quickly Gläser matured once he had left behind him the less exacting demands of Vienna's suburban theatres; Wagner conducted *Des Adlers Horst* at Magdeburg and it is one of several now forgotten opera scores that left some mark on his later masterpieces. In 1842 Gläser moved to Copenhagen; he was appointed court conductor three years later and remained there for the rest of his life. Apart from occasional pieces (funeral cantatas, and an overture for the 50th anniversary of the foundation of the Prague Conservatory) he wrote only three major scores during the Copenhagen years: the operas *Bryllupet vet Como-søen* ('The Wedding by Lake Como'), 29 January 1849; *Nøkken* ('The Water-Sprite'), 12 February 1853; and *Den forgyldte svane* ('The Golden Swan'), 17 March 1854. The first two of these Danish operas had librettos by Hans Christian Andersen. Large collections of his works are held by the Kongelige Bibliothek, Copenhagen, the Deutsche Staatsbibliothek, Berlin, and the Gesellschaft der Musikfreunde, Vienna.

Gläser's father, Peter, went to Vienna and ran a music copyist's business of which Beethoven disapproved less than most with which he had dealings; and his son Joseph (August Eduard Friedrich) (*b* Vienna, 25 Nov 1835; *d* Hillerød, Denmark, 29 Sept 1891) was organist at Hillerød from 1866, and the composer of songs, choral and keyboard works.

PETER BRANSCOMBE

Glaser, Werner Wolf (*b* Cologne, 14 April 1913). Swedish composer of German descent. His mother Julie, née Wolff, was a concert pianist and a pupil of Clara Schumann. Glaser attended the Hochschule für Musik in Cologne from the age of 12, studying the piano with Dahm, conducting with Ehrenberg, and composition with Jarnach (1929–30). He later studied composition with Hindemith in Berlin. From 1931 to 1932 he was Kapellmeister of the opera in Chemnitz, but, dismissed from this post because of his Jewish ancestry, he became a choirmaster in Cologne. In 1933 he fled from the Nazis to Paris, but soon moved to Denmark, where in 1939, with Irène Skovgaard, he founded a school of music in Lyngby. In 1943 he was forced to flee again, and went to Sweden where he became music critic for the newspaper *Västmanlands Lans Tidning* in 1944. In 1945, with Gunnar Axén, he founded the music college in Västerås and was director of studies there between 1954 and 1975. He has been on the management committee of the music therapists of Sweden and the Swedish Composers' Union. In 1993 the King of Sweden awarded him the medal of the Swedish Royal Academy of Music for his services to Swedish music.

Glaser is a prolific composer, with an output exceeding 540 works. His style is neo-classical and makes use of polytonal and polyrhythmic techniques. The early works of the 1930s are largely reminiscent of Hindemith, although he later developed his own distinctive idiom characterized by an absence of repetition, a predominant use of the intervals of the 2nd and 7th and the employment of unexpected pauses. He has also written volumes of poetry.

OTFRIED RICHTER

Glasgow. City in Scotland. Located on the river Clyde, it has been a university city since 1451 and the largest city in Scotland since about 1800. It is the home of the Royal Scottish Academy of Music and Drama (RSAMD), the Royal Scottish National Orchestra, the BBC Scottish SO, Scottish Opera and Scottish Ballet. It is also the base

of BBC radio and television in Scotland as well as the independent Scottish Television.

A set of services for the feast day of Glasgow's patron saint, St Kentigern (or Mungo; bur. early 7th century), in the 13th-century Sprouston Breviary (*GB-En*) has many antiphons of great beauty, in monodic chant on 11th- and 12th-century texts. St Mungo's own church bell was worn out by the 17th century, but a similar 9th-century quadrangular Celtic bell survives in nearby Dumbarton. The 12th-century Parisian material in the St Andrews Music Book was probably known in Glasgow, as Robert Bernham (*c*1200–1253), later bishop of St Andrews, was a precentor at Glasgow Cathedral in the 1230s; in that post he would have been in charge of the vicars choral and the music library. The dedicatory stone of a 15th-century building declares it to have been built 'for the priests who serve the flourishing choir of Glasgow'.

The earliest reference to organs in Glasgow dates from 1520, when the Maister of the Sang Schule, John Paniter, was required to deputize for his organist. The third prebendary at St Mary and St Anne in 1539 taught the organ to the boys of the song school as well as Gregorian chant, discant and part-singing. The Reformation silenced all Glasgow's organs until the 18th century and had a devastating effect on music in general; but in 1638 the city council allowed the composer Duncan Burnett to begin teaching again 'seeing that the musik school is altogether dekayit within this burgh to the great discredit of this citie'. Burnett's pupils would have known the keyboard music of William Kinloch and other late 16th-century composers, collected in the Duncan Burnett Book (*En*). The late 17th century and the early 18th were largely barren of musical activity. In 1756, hoping to improve psalm singing in the churches the city magistrates funded free music lessons for parishioners of good character. No organs were used until 1785, when the Episcopal chapel acquired a Snetzler organ from Edinburgh and employed a music teacher. Presbyterians described the church as 'the Whistlin' Kirk', and it is unlikely that many of them attended the concerts given there; but in 1798 the newly formed Sacred Music Institution gave a vocal concert in the cathedral with organ accompaniment – possibly the first use of an organ in a Scottish Presbyterian church since the 1630s. Apart from occasional appearances by the violinist William McGibbon, the 18th century saw little instrumental music or concert promotion. The burning of the New Concert Hall in 1764 'by a riotous company of enthusiasts' need not, however, be taken as an attack on music, the term 'concert hall' being applied to what were really theatres to circumvent a nationwide ban on theatrical entertainment. Concerts were given in weekly alternation with dancing and card parties in 1777, some of the musicians coming from Edinburgh.

With the industrialization of the late 18th century and the 19th, Glasgow expanded rapidly and musical provision consequently improved. James Aird (*c*1750–1795) began publishing music in 1782, and the Gentlemen's Subscription Concerts started in 1799; by 1821 they were making their programmes more accessible to the general public. Vocal music burgeoned with choirs and concerts organized by the precentors of the numerous churches, and glee clubs such as the Glasgow Larks (1805) run by William Euing (1788–1874). The Amateur Musical Society was founded in 1831, the Philharmonic Society in 1832 and the Choral Society in 1833. The Caledonian Theatre, opened in 1823, mounted occasional opera performances; in 1848 Jenny Lind sang there in *La sonnambula* and *La fille du régiment*. The short-lived City Theatre, opened and then destroyed by fire in 1845, gave *The Bohemian Girl* and *Der Freischütz*.

A new City Hall was opened in 1841, and in 1843 the Glasgow Musical Association was formed; on 2 April 1844 it gave the first Glasgow performance of Handel's *Messiah*. It became the Glasgow Choral Union in 1855 and held oratorio festivals in 1860 and 1873. In 1874 it formed the Glasgow Choral Union Orchestra, which gave an annual eight-week season. In 1877 the opening of St Andrew's Hall, its acoustics among the finest in the world, doubled the audience capacity. In 1877 and 1878 the orchestra gave a series of weekly concerts under Hans von Bülow. August Manns conducted it from 1879 and introduced works by British composers, including the Scots MacCunn and MacKenzie: he conducted Berlioz's *Grande messe des morts* in 1885. A rival group, Scottish Orchestra, was formed in 1891, giving 26-week seasons; the two merged in 1898 as the Scottish Orchestra. Among musicians to perform in the City Hall were Joachim, Paderewski, Sarasate, Busoni and two Glasgow-born pianists, Eugen d'Albert and Frederic Lamond. In 1902 the Glasgow Corporation promoted popular concerts there at nominal charges and children's concerts were initiated. The Glasgow Orpheus Choir (1901–1951), conducted by Hugh Robertson, achieved international renown. It was succeeded by the Phoenix Choir, but the number of choral societies in Glasgow had dropped dramatically by the late 20th century. The Scottish Orchestra became the Scottish National Orchestra in 1950, with a full-time rather than seasonal schedule. In 1992 it became the Royal Scottish National Orchestra. Its 20th-century conductors included Barbirolli, Susskind, Rankl, Swarowsky and, from 1959, Alexander Gibson (the first Scot to hold the post). Gibson inaugurated the Musica Viva concert series, which ran from 1959 to 1961 and gave premières of works by Scottish composers, notably Thea Musgrave, Iain Hamilton and Thomas Wilson (ii), as well as the British premières of Schoenberg's Violin Concerto and Stockhausen's *Gruppen*. St Andrew's Hall was destroyed by fire in 1962. In 1990 the Royal Concert Hall was opened, its auditorium seating nearly 2500.

The BBC Scottish Orchestra, founded in 1935, was the first full-time professional orchestra in Scotland. Its long association with the conductor and composer Ian Whyte established its credentials in the performance of contemporary music, and it expanded, notably under Norman Del Mar (from 1960), becoming the BBC Scottish SO 1967. It tours at home and abroad and has a wider repertory than the Royal Scottish National Orchestra. It has commissioned many works and given many premières, not least from composers active in Glasgow: Wilson (*b* 1927), Edward McGuire (*b* 1948), John Geddes (*b* 1941), William Sweeney (*b* 1950), Martin Dalby (*b* 1942) and James Macmillan (*b* 1959).

From the 1870s Glasgow was an important stop for professional touring opera companies. Italian troupes appeared in 1872 and 1875 and the Carl Rosa company made the first of many visits in 1877, later performing operas by MacKenzie and MacCunn. The Moody-Manners company was active in the city from 1900, and

its collection of scores is held in the Mitchell Library. A flourishing music hall brought forward such figures as Will Fyffe (1885–1947) and Harry Lauder (1870–1950). The Royal Colosseum was built in 1867 with 4000 seats, and in 1869 became the Theatre Royal. It burnt down in 1879 and was rebuilt with 3000 seats. Other theatres used for opera included the Lyceum Theatre (opened in about 1897; burnt down 1937), the King's Theatre (from 1904) and the Coliseum (from 1905), which gave the *Ring* in the 1920s but then became a cinema. The Glasgow Grand Opera Society was founded in 1905; in 1934 it gave the British première of Mozart's *Idomeneo*, and the following year that of Berlioz's *Les Troyens*. In 1951 it revived MacCunn's 1894 opera *Jeanie Deans*. Scottish Opera was established in 1962 by Alexander Gibson, Richard Telfer and Ainslie Millar, later joined by Sidney Newman and Robin Orr. The ballet company that took part in Scottish Opera's 1969 production of *Les Troyens* had moved from Bristol to Glasgow in 1968, taking the name of Scottish Theatre Ballet; in 1974 it became Scottish Ballet. In the same year, Scottish Opera bought the Theatre Royal which became its permanent base. Its wide and adventurous repertory has included a number of works by Scottish composers, among them Hamilton, Orr, Wilson and Musgrave. The company tours regularly in Scotland, the north of England and abroad.

The music publishing companies of Bayley & Ferguson (founded 1884) and Mozart Allen (founded 1868), both now defunct, led the field in the first half of the 20th century. Music criticism was published on a large scale from the late 19th century to the early 20th century, with generous and thoughtful coverage by such writers as James Webster, including extensive notices of music festivals in other British cities. The Glasgow branch (opened 1857) of Paterson & Sons was dominant among a number of musical instrument manufacturers.

The university instituted a chair of music in 1929. Outstanding among musicologists there was Henry George Farmer. A bequest from John McEwen (*d* 1948) sustained a series of commissions and concerts devoted to Scottish chamber music. The Athenaeum, founded in 1847 as a literary and scientific club, established the Athenaeum School of Music in 1890, and provided a building for it that included a concert hall. The school became the Scottish National Academy of Music in the 1920s and the Royal Scottish Academy of Music in 1944; a drama school was added six years later. The need for a true national conservatory in Scotland was not fully met until after World War II, when Henry Havergal (1902–89; principal 1953–69) was the first principal of the academy not to occupy the university's chair of music simultaneously. The RSAMD offers degree courses in a full range of subjects including Scottish traditional music. Its opera department, one of its strongest elements, was established in 1968. In 1987 the academy moved to new premises including the Athenaeum Theatre (cap. 344). There are fine music collections in the Mitchell Library (opened 1877), Glasgow University Library and the RSAMD. The Glasgow Art Gallery and Museum has a small but significant collection of musical instruments, as does Dean Castle in nearby Kilmarnock. Glasgow is also the home of the Scottish Music Information Centre (which succeeded the Scottish Music archive in 1985), with unique holding of Scottish music of all types, including a sound archive; and the Piping Centre (1996), which has a small library and museum.

The triennial Musica Nova festival (established 1971) has brought leading composers and their works to Scotland. The biennial Glasgow International Early Music Festival was established in 1990. Among pop groups that have emerged from Glasgow are Simple Minds (established 1976–7), Blue Nile (1979–80), Wet Wet Wet (1984–5) and Deacon Blue (1985).

JOHN PURSER

Glasgow, Robert (Ellison) (*b* Shawnee, OK, 30 May 1925). American organist. Early musical studies in the double bass as well as the organ led to membership in all-state orchestras and to a church job at the age of 15. During three years of army service he held a position as organist at the First Presbyterian Church of El Paso, Texas. Following his discharge in 1946 he entered Oklahoma City University, where he studied the piano for one year with Nancy Ragsdale. This was followed by concentrated studies at the Eastman School of Music, where he worked with Harold Gleason and Catharine Crozier, earning the MMus and performer's certificate in the organ in 1951. During the next 11 years he taught the organ and various music courses at MacMurray College in Jacksonville, Illinois. This college later awarded him the DMus *honoris causa* in recognition of his accomplishments in the concert and academic worlds. Since 1962 he has been on the faculty of the school of music, University of Michigan. In 1979 he was promoted to professor of organ, and in 1981 he received the Harold Haugh award for excellence in teaching. Many of his students have been winners in national and international competitions. He has given many concerts in the USA, and performed and given lectures and masterclasses at the International Congress of Organists in Cambridge. His playing, especially of 19th- and 20th-century music, has been highly praised. As a recording artist he has devoted his energies to the organ music of César Franck.

CHARLES KRIGBAUM

Glass, Louis (Christian August) (*b* Frederiksberg, 23 March, 1864; *d* Gentofte, 22 Jan 1936). Danish composer, pianist, conductor and teacher. He received early musical tuition from his father, the piano teacher and composer Christian Henrik Glass (1821–93), but it was probably his brief period of instruction from Gade that was particularly influential. Following cello studies with Albert Rüdinger and piano studies with Franz Neruda, Glass made his début in 1882 in the Tivoli Concert Hall as a

cellist and pianist. In 1884 he moved to Brussels, where he studied at the conservatory with Juliusz Zarembski and Józef Wieniawski (piano), Joseph Servais (cello) and Hubert Ferdinand Kufferath (counterpoint); he left the conservatory in 1885, but continued to study with Wieniawski. He returned to Copenhagen and worked as a musician and teacher, but in 1889 travelled with funds granted from Det Anckerske Legat to Germany (where he met Reinecke in Leipzig), Austria, Estonia and Russia (where he visited Anton Rubinstein in St Petersburg).

Returning to Copenhagen, Glass became a member of the board of the progressive chamber music society Symphonia, and in 1894 took over his father's piano conservatory, which he ran until its closure in 1932. Glass was interested in music education, and in 1898 co-founded the Musikpaedagogisk Forening (now the Dansk Musikpaedagogisk Forening), whose chairman he was from 1903 to 1921 and 1927 to 1929. In 1901 Glass was the co-founder of the Dansk Koncert-Forening, and from 1915 to 1918 he was the society's conductor.

Glass composed in most genres apart from opera. The early influence of Schumann, Gade and Grieg was soon supplemented by that of Franck, whose music Glass had probably heard in Brussels and whom he greatly admired. In the six symphonies, Glass's most important works, the impact of Bruckner is also clearly apparent. The first two symphonies are broadly written and for large orchestra, while the idyllic Third Symphony, *Skovsymfoni* [Wood Symphony], has in its concentrated intimacy a certain chamber music quality. Contrasting with this is the monumental hour-long Fourth Symphony. The Fifth Symphony, *Sinfonia svastika*, is a highly dynamic and tightly arranged work; the title refers to the old Indian symbol of the wheel of life, the swastika, and the work is one of several which bear witness to the composer's intense occupation with theosophy. The Sixth Symphony, *Skjoldungeæt* [Birth of the Scyldings], is a peculiarly sombre work with a pronounced retrospective character. In his later works Glass shows a growing interest in the element of sound, as in the suite *Episoder fra H.C. Andersens Eventyr 'Elverhøj'*, and also in simple and intimate forms of expression, as in the Trio for violin, viola and guitar.

CLAUS RØLLUM-LARSEN

Glass, Paul (Eugène) (*b* Los Angeles, 19 Nov 1934). American composer, active also in England, France and Switzerland. While studying at the University of Southern California (BMus 1956), he took private lessons with Blacher, Dahl and Friedhofer. He later studied with Petrassi in Rome and Sessions in Princeton, New Jersey. In 1962, after a period of study with Lutosławski in Warsaw, he returned to the USA to devote himself to composing for the cinema and concert hall. After spending time in England during the shooting of Otto Preminger's film *Bunny Lake is Missing* (1965), for which he wrote the score, he moved to France, where he spent four years studying the works of Webern. In 1973 he relocated from the USA to Switzerland where he has taught at the Lugano Conservatory (from 1981) and where he became a naturalized citizen. Although each of his works is the subject of a new compositional experiment, he is always concerned with communicating with the public, a preoccupation acquired from his work for the cinema. Each of his works distills a deep, patient act of reflection on a musical process; his Sinfonia no.3 demonstrates as well the possibility of a bringing together of dodecaphony with diatonicism. His film scores are discussed in Irwin Bazelon's *Knowing the Score* (New York, 1975).

JEAN-PIERRE AMANN

Glass, Philip (*b* Baltimore, 31 Jan 1937). American composer and performer. Along with Reich, Riley and Young, he was a principal figure in the establishment of minimalism in the 1960s. He has since become one of the most commercially successful, and critically reviled, composers of his generation.

1. Childhood and early training. 2. Emergence of minimalism. 3. The Philip Glass Ensemble. 4. Dramatic works. 5. Further collaborations.

1. CHILDHOOD AND EARLY TRAINING. He began to study the violin at the age of six, then at eight the flute with Britton Johnson at the Peabody Conservatory. At 12 he started composing, while taking harmony lessons with Louis Cheslock and working in his father's record shops after school. He left school at 15 for the University of Chicago (BA in Liberal Arts 1956) under their early entrance programme. In Chicago he was a piano pupil of Marcus Rasking, who introduced him to the 12-note technique, which he then adopted but abandoned by graduation. In 1956–7 he took extension courses at the Juilliard School, and then returned to Baltimore for six months to earn enough money as a crane operator at Bethlehem Steel to finance formal Juilliard studies. He enrolled in late 1957 (diploma in composition 1959; MA in composition 1961), studying with Bergsma (1957–9) and Persichetti (1959–61) and followed them in composing in the tonal vein of the American Symphonist school. He studied analysis in Milhaud's summer class at Aspen in 1960, and privately with fellow student Albert Fine, who had studied with Boulanger. Of some 70 compositions in widely varied genres at Juilliard, almost all were performed by fellow students and a few published by Elkan-Vogel (later subsumed by Presser), of which Persichetti was the editor. Foreshadowing his mature work Glass also wrote music for the dance department and took a course in film scoring.

2. EMERGENCE OF MINIMALISM. In Pittsburgh from 1961 to 1963 on a Ford Foundation grant, Glass continued to write for a variety of ensembles – this time selected from the city's schools – with many compositions published by Elkan-Vogel. Then on a Fulbright scholarship he went to Paris to study for two years with Boulanger (he had already spent the summer of 1954 studying French there) in what he describes as a re-education in the elements of music, during which time he composed little. Unimpressed by the avant-garde establishment represented by Boulez, Glass encountered a more important influence in the additive processes and cyclic structures of Indian music when he was hired by the film director Conrad Rooks to transcribe for Western musicians Ravi Shankar's score for the phantasmagoric *Chappaqua*. Although Glass also provided some conventionally 'modern' music for sections of the film, his minimalist style was now beginning to emerge, most particularly in the spare lines of the theatre pieces he wrote in 1965 for what would become the Mabou Mines troupe (all works before this have since been disavowed). The score for Beckett's *Play* used the overlapping of two soprano saxophones, each assigned a single interval multiply repeated in different rhythms, while *Music for Ensemble and Two Actresses* – foreshadowing the voice-overs of the libretto of *Einstein on the Beach* – included a soufflé recipe declaimed over a wind sextet. The 1966 String Quartet is a more significant representative of Glass's transitional style, with its repetition of cells and strict formal subdivision into component modules recurring in different voices. It does not, however, reveal any particular Indian influence and lacks the bare-boned tonality of his subsequent works (chromaticism and dissonance abound and, though the work is not serial, all 12 tones are introduced at the start). Furthermore, the underlying structural principle is that of symmetry rather than additive cycles; despite its uninflected metre, the work does not exhibit the rock-like pulsation of his later New York works.

After leaving Paris, Glass travelled in North Africa and the Indian subcontinent. He returned to New York early in 1967 and on 18 March he visited the Park Place Gallery for a concert of Reich's music performed by the composer and Arthur Murphy, both Juilliard acquaintances, along with Jon Gibson, Tenney and Corner. Reich and Glass began analysing one another's works, while performing in each other's ensembles (Reich in that of Glass until May 1970, Glass less frequently in Reich's until 1971).

Glass's works in 1967 progress from *Strung Out*, *Music in the Shape of a Square* and *In Again Out Again* to the fully-fledged additive process of *One Plus One* (originally *1+1*), written when he began lessons with Alla Rakha, Shankar's long-time tabla accompanist, who was living in New York. It is here rather than in Paris that the Indian influence comes to the fore. Interestingly, *One Plus One* (possibly because of its unusual scoring of hands rapping on a table-top with a microphone attachment) was the only one of these pieces not played in the first public performances of Glass's new music in 1968 – at Queens College (13 April), at the New School (9 May, *Strung Out* only), and at the Filmmakers' Cinemathèque (19 May), which Glass considers to be his début. There Dorothy Pixley-Rothschild, Glass and Gibson were the respective soloists in *Strung Out*, *How Now* and *Gradus* (originally entitled *Λ for Jon Gibson*, indicating the direction of the soprano saxophone's melodic line). Glass formed a flute duo with Gibson in *Music in the Shape of a Square*, and a keyboard duo with Reich in *In Again Out Again*.

3. THE PHILIP GLASS ENSEMBLE. Throughout the late 1960s and early 1970s Glass developed a wholly distinctive ensemble style of highly amplified, diatonic, additive and subtractive cycles in mechanical rhythms and intially in simple unison – a music more evocative of rock than any classical Western style, much less the serialism and late modernism of the period. In the process the Philip Glass Ensemble was established: Gibson was joined in the wind section by Dickie Landry, Richard Peck, Jack Kripl and Richard Prado; later keyboard players included Steve Chambers and Michael Riesman, who was also to conduct many of Glass's works. The amplified keyboard and woodwind instruments that formed the core of the ensemble were occasionally supplemented for specific pieces by voices (e.g. sopranos Iris Hiskey and Dora Ohrenstein), and the occasional string player (e.g. cellist Beverly Lauridsen and violinist Barbara Benary). Kurt Munkacsi, the sound engineer who had worked in

recording sessions with John Lennon, joined the ensemble in 1970 and helped in Glass's first recordings on the Chatham Square label which began the following year.

Glass reached full maturity as a composer at this time, and his period of minimalism proper includes works entitled with similarly minimal directness: *Two Pages* (originally *Two Pages for Steve Reich*), *Music in Contrary Motion*, *Music in Fifths*, *Music in Similar Motion*, *Music in Eight Parts*, *Music for Voices*, *Music with Changing Parts* and *Music in Twelve Parts*. Other works from these years have subsequently been considered experimental ephemera and withdrawn, e.g. *600 Lines*, comprising a score projected for the players on film slides, and *Long Beach Island, Word Location*, 32 speakers with tape-loops of the word 'is' in an outdoor installation by the sculptor Richard Serra.

Apart from four more works for Mabou Mines, until the late 1970s Glass wrote exclusively for his own ensemble – for the simple reason that no other group would (or perhaps could) play his work. Initially, then, it was crucial for him to maintain the ensemble as his only public voice; later, when others took an interest, he resisted releasing performance rights to ensure that the ensemble would remain employed on international tours. Performances at this time were held in New York 'lofts' (Glass's in Greenwich Village, sculptor Donald Judd's in SoHo), private art galleries (those of Leo Castelli and Paula Cooper) and museums (the Guggenheim and the Whitney). At the Whitney both Glass and Reich appeared as part of a 1969 multimedia exhibition called 'Anti-Illusion: Materials/Procedures'. The post-minimalist process art of melting blocks of ice (Rafael Ferrer) and films of dripping water (Michael Snow) was complemented by the 'process music' of Glass's additive cycles and Reich's self-propelled phasing and feedback pieces. Significantly, Glass's compositions, adumbrating his later multimedia work, were played during short films of hands by Serra, for whom he worked as a studio assistant when not surviving as a plumber or taxi-driver, or touring with his ensemble in the USA, Canada and Europe. The places in which they performed remained unconventional, including concerts at the nightclub and restaurant Max's Kansas City and in public parks in each of the five boroughs of New York. The first traditional concert hall to include Glass's music was New York's Town Hall, which Glass himself hired in 1974 to put on the complete *Music in Twelve Parts*, composed in sections over more than three years. The 'twelve parts' of the

1. 'Phil' (Philip Glass): portrait by Chuck Close, ink and graphite on graph paper, 1973 (Whitney Museum of American Art, New York)

title had originally referred simply to the vertical texture, but Glass decided to extend the work from one to twelve sections (and over four hours). The work marks the culmination of Glass's minimalism, which, taken as a whole, may be seen to have moved progressively in the direction of greater vertical complexity – from unison through parallel intervals and multiple parts to the functional harmony in the conclusion of *Music in Twelve Parts*. In its embrace of functional harmony, it marks a transition into what Rockwell has termed the 'maximalism' of his work from *Einstein on the Beach* onwards. Even more than other minimalist composers, Glass collaborated extensively with downtown visual and theatrical artists during this period of artistic cross-pollination.

4. DRAMATIC WORKS. *Einstein on the Beach*, which brought Glass immediate fame after its American première at the Metropolitan Opera on 21 November 1976, was a collaboration with Robert Wilson, whose mixed-media work has been variously termed a 'theatre of visions' or 'theatre of images', combining media in a non-sequential manner more reminiscent of dream than the conventional linear narrative of opera. In place of plot there is a series of dramatized icons drawn from Einstein's life (such as his violin) and work (such as the trains of the theory of relativity) and their implications (such as a trial, a spaceship). The libretto consists of solfège and numbers, originally used to train the singers in pitch and rhythm and left unrevised, and the sometimes evocative and often incoherent notebook jottings by Christopher Knowles, a special-education student of Wilson, with monologues by cast members Lucinda Childs and Samuel M. Johnson. The opera combined some of Glass's most propulsive music with choreography by Andrew de Groat (Childs choreographed her own solos) and bizarre costume, lighting and stage design in a five-hour performance which the audience was invited to exit and re-enter at will.

Einstein in good part determined the direction of Glass's subsequent career: he has primarily become a composer of music for the theatre, film and dance rather than for the concert hall. Interestingly, Glass has commented that he 'was able to condense the music' (Glass, 1987, p.56) for the first recording of *Einstein* (Tomato, TOM-4-2901, 1979), cutting the first Trial scene from 40 to 20 minutes. That he was able to do this (the number of clearly specified cellular repetitions in earlier works notwithstanding) may suggest the somewhat arbitrary nature of a musical exfoliation dictated more by process than by theme. It may also suggest that although Glass's style of 'repetitive music' is essentially formalist, it may be inherently ancillary (multimedia aside, early minimalism – not only that of Glass – was often put to use as a 'trance' accompaniment to meditation or the taking of drugs). Glass himself has played down his success by attributing it to good work habits and to his being the 'theatre composer' among his contemporaries.

His next two large-scale dramatic works, *Satyagraha* (1980) and *Akhnaten* (1984), form along with *Einstein* an unpremeditated trilogy of 'character operas', a category Glass has used, though he has also frequently expressed his preference for the less limiting term of 'music theatre'. *Satyagraha* is a somewhat awkward hybrid, both in terms of its orchestration – an orchestral translation of the Philip Glass Ensemble – and in its conception of Gandhi, a mixture of hagiography, fairy tale and comic book; the intermittent sublimity of the work is dwarfed by its absurdity. *Akhnaten* is more successful: a study of the Egyptian pharoah who introduced monotheism, it is much the most affecting of the three, and also the most traditional in form and style. Glass considers it his 'tragic' opera, after the 'apocalyptic' *Einstein* and 'lyrical' *Satyagraha*; it also marks his approach to more conventional instrumental forces and linear narrative as opposed to tableaux.

5. FURTHER COLLABORATIONS. Following *Akhnaten*, Glass again collaborated with Wilson, on the Cologne and Rome section of *the CIVIL warS*; he also worked with other artists on several smaller-scale operatic productions, such as *The Juniper Tree*, *The Fall of the House of Usher* and *1000 Airplanes on the Roof* (notable for Richard Foreman's set design). The motoric pulse of much of Glass's music has also attracted numerous choreographers, including Jerome Robbins and Twyla Tharp. Glass's music accompanies Child's choreography and films by Sol LeWitt in *Dance*, and Matthew Maguire's adaptation of Poe and Molissa Fenley's dance in *A Descent into the Maelstrom*. His ability to adapt his distinctive style to a remarkable range of material has led to his scoring numerous films over the past two decades, from the wordless, visionary cinema of Godfrey Reggio, Paul Schrader's experimental *Mishima* and Errol Morris's intense documentary *The Thin Blue Line* to Hollywood war films (*Hamburger Hill*) and horror films (*Candyman* and its sequel). His often luminous, if self-derivative, score for *Kundun* received an Oscar nomination, while *The Truman Show* won him a Golden Globe. He inventively scored the 1931 *Dracula* for the Kronos Quartet on its 1999 reissue.

Now a public figure, Glass was invited to compose the torch-lighting ceremony music for the 1984 Los Angeles Olympics, while in 1992, to mark the 500th anniversary of Columbus's landing in the Americas, the Metropolitan Opera commissioned him to write *The Voyage*. This three-act opera on the exploratory impulse (Columbus is the focus of only the second act) has proved to be one of his most controversial works, praised for its daring and criticized for its vulgarity. Shortly after *The Voyage*, he began what has become his finest achievement since the character operas, in the form of another trilogy, based on Cocteau's films *Orphée*, *La belle et la bête* and *Les enfants terribles*. As with *Einstein* in the genre of opera, here the notion of film music is reconceived, and new multimedia forms invented in the process: in *La belle et la bête* the Cocteau script is treated as a cinematic opera libretto to be performed by singers and the Philip Glass Ensemble during the projection of the film, with the original soundtrack removed. The trilogy has attracted international acclaim, including comparison to the purity of Puccini in the Italian journal *Corriere della sera* – praise unlikely to have been foreseen earlier in Glass's career.

Glass has undertaken many other varied collaborations: with pop singers Paul Simon, David Byrne, Suzanne Vega and Laurie Anderson in the song-cycle *Songs from Liquid Days*; with Allen Ginsberg in *Hydrogen Jukebox*; with Ravi Shankar in *Passages*; with Doris Lessing on two science-fiction operas, *The Making of the Representative for Planet 8* and *The Marriages between Zones Three, Four and Five*; and with Foday Musa Suso in the music for JoAnne Akalaitis's revival of Genet's *The Screens*. He

2. *Philip Glass, New York, 1985*

has had as much influence on subsequent rock and film scores as on classical music; in an interesting example of reciprocation, in 1992 Glass produced a symphonic version of the art-rock album *Low* on which David Bowie and Brian Eno, 15 years previously, had acknowledged Glass as the primary influence. In addition to continuing frequent tours with his group, he has worked as a duo with Jon Gibson and given solo concerts of his own piano miniatures. This now quite extensive body of piano works displays what has increasingly played a part in Glass's aesthetic: lyricism achieved with minimal resources. Though his early period of formalist minimalism (from the mid-1960s to early 1974) remained almost without 'affect', his subsequent output has grown in expressive content: from the simple repetition of a Phrygian mode in the final aria from *Satyagraha* and a single chanted word in the title music of the film *Koyaanisqatsi*, to a true Romantic expansiveness, both instrumentally (e.g. *Itaipu*, 1989, and *The Canyon*) and vocally (e.g. sections of *the CIVIL warS* and the Cocteau trilogy).

WORKS

DRAMATIC AND MULTIMEDIA

Music for Ensemble and Two Actresses, wind sextet, 2 spkrs, 1965; Paris

Einstein on the Beach (op, 4, C. Knowles, S.M. Johnson, L. Childs), 1975–6, collab. R. Wilson; Avignon Festival, 25 July 1976

Dance (multimedia perf., choreog. Childs), 1979; Amsterdam, 19 Oct 1979

Mad Rush (dance piece, choreog. Childs), 1979 [from org work Fourth Series, part 4, 1979]

A Madrigal Opera, 1980; Amsterdam, Carré, 25 June 1980 [orig. title Attaca (1980), then The Panther (1981)]

Satyagraha (op, 3, C. DeJong, after the *Bhagavad Gita*), 1980; Rotterdam, Netherlands Opera, 5 Sept 1980

The Photographer (music theatre, 3, Glass and R. Malasch), 1982; Amsterdam, Netherlands Opera, 30 May 1982

Akhnaten (op, 3, Glass and others), 1983; Stuttgart, Staatsoper, 24 March 1984

Glass Pieces (ballet, choreog. J. Robbins), 1983 [from Glassworks and op Akhnaten]; New York, Lincoln Center

the CIVIL warS 'a tree is best measured when it is down' (music theatre, M. di Nascemi and Wilson), 1984, collab. Wilson; Rome, 22 March 1984; concert perf., Los Angeles, Nov 1984

The Juniper Tree (chbr op, prol., 2, A. Yorinks, after J.L. and W.C. Grimm), 1984, collab. R. Moran; Cambridge, MA, American Repertory, 11 Dec 1985

A Descent into the Maelstrom (dance theatre piece, M. Maguire, after E.A. Poe, choreog. M. Fenley), 1985; Adelaide

In the Upper Room (dance piece, choreog. T. Tharp), 1986

The Making of the Representative for Planet 8 (op, 3, D. Lessing), 1986; Houston, Grand Opera, 8 July 1988

Phaedra (ballet), 1986; Dallas [from film score Mishima, 1984]

Pink Noise (installation), 1987, collab. R. Serra; Columbus, OH, Wexner Center

The Fall of the House of Usher (chbr op, 1, Yorinks, after Poe), 1988; Cambridge, MA, American Repertory, 18 May 1988

1000 Airplanes on the Roof (music theatre, Glass, D. Hwang and J. Serlin), 1988; Vienna, International Airport Hangar no.3, 15 July 1988

Hydrogen Jukebox (music theatre, 2, A. Ginsberg), 1990; concert perf., Philadelphia, 29 April 1990; staged Charleston, SC, 26 May 1990

The White Raven (op, 5, L. Costa Gomaz), 1991; Lisbon, 26 Sept 1998

The Voyage (op, 3, Hwang), 1992; New York, Met, 12 Oct 1992

Orphée (chbr op, 2, J. Cocteau), 1993 [setting of screenplay from film Orphée, dir. Cocteau]; Cambridge, MA, American Repertory, 14 May 1993

La belle et la bête (op, Cocteau), 1994 [setting of screenplay from film La belle et la bête, dir. Cocteau]; Seville, Maestranza, 4 June 1994

T.S.E. (installation with perf.), 1994; Philadelphia, Annenberg Center

Witches of Venice (ballet), 1995

Les enfants terribles (dance op, Cocteau), 1996 [setting of screenplay from film Les enfants terribles, dir. Cocteau]; Zug, Theatre Casino, 18 May 1996

The Marriages between Zones Three, Four and Five (op, 2, Lessing), 1997; Heidelberg, Stadt, 10 May 1997

Monsters of Grace (music theatre), 1998, collab. Wilson; Los Angeles, UCLA Center for the Performing Arts, 15 April 1998

INCIDENTAL MUSIC

Play (S. Beckett), 1965; Red Horse Animation (Breuer), 1968; Music for Voices, 1970; The Lost Ones (Beckett), 1975; The Saint and the Football Player (Thibeau and Breuer), 1975; Dressed Like an Egg (after Colette), 1977; Company (Beckett), 1983, arr. as Str Qt no.2, 1983, orchd 1983; Pages from Cold Harbor (Worsley and Raymond), 1983; Endgame (Beckett), 1984; The Screens (J. Genet), 1990, collab. F.M. Suso; Cymbeline (W. Shakespeare), 1991; Mysteries and What's So Funny (Gordon), 1991; Henry IV, Parts I and II (Shakespeare), 1992; In the Summer House (Bowles), 1993; Woyzeck (G. Büchner), 1993

FILM SCORES

North Star, 1977 [for film *Mark Di Suvero, Sculptor*]; Geometry of a Circle, 1979; Koyaanisqatsi (dir. G. Reggio), 1982; Mishima (dir. P. Schrader), 1984; Hamburger Hill (dir. J. Irvin), 1987; Powaqqatsi (dir. Reggio), 1987; The Thin Blue Line (dir. E. Morris), 1988; Mindwalk, 1990; A Brief History of Time (dir. Morris), 1991; Merci la Vie (dir. B. Blier), 1991; Anima mundi (dir. Reggio), 1992; Candyman (dir. B. Rose), 1992; Compassion in Exile, 1992; Candyman II (dir. B. Condon), 1995; Jenipopo, 1995; The Secret Agent (dir. C. Hampton), 1995; Bent (dir. S. Mathias), 1996; Kundun (dir. M. Scorsese), 1997; The Truman Show (dir. P. Weir), 1998; Dracula (dir. T. Browning), 1999

VOCAL

Choral: Haze Gold, Spring Grass, Winter Gold (C. Sandburg), chorus, *c*1964; Dreamy Kangaroo (G. Norman), *c*1965; Wind Song (Sandburg), SATB, 1968; Knee Play no.3, SATB, 1976 [from op Einstein on the Beach]; Another Look at Harmony, pt 4, SATB, org, 1977; Fourth Series, pt 1, SATB, org, 1977; the CIVIL warS (Rome Section), S, A, T, Bar, B, SATB, orch, 1984 [from music theatre piece, 1984]; Music from the CIVIL warS (Cologne section), opt. SATB, orch, 1984 [from music theatre piece, 1984]; The Olympian 'The Lighting of the Torch', chorus, orch, 1984, arr. pf, 1984; 3 Songs (O. Paz, R. Levesque, L. Cohen), SATB, 1986; Itaipu, SATB, orch, 1988

Other vocal: Habeve Song, S, cl, bn, 1982; Vessels, S, S, Mez, T, Bar, B, kbd, 1983 [from film score Koyaanisqatsi, 1982]; Hymn to the Sun, Ct, orch, 1984 [from op Akhnaten, 1983]; Songs from Liquid Days, 1v, insts, 1986, arr. 1v, pf: Changing Opinion (P. Simon), Forgetting (L. Anderson), Freezing (S. Vega), Lightning (D. Byrne), Liquid Days, pt one (Byrne), Open the Kingdom (Liquid Days, pt two) (Byrne); Songs of Milarepa, Bar, chbr orch, 1997

INSTRUMENTAL

Orch: Piece for Chbr Orch, 1965; Arioso no.2, str orch, 1967; Music in Similar Motion, chbr orch, 1981 [from works for ens, 1969]; Company, str orch, 1983 [from Str Qt no.2, 1983]; Glass Pieces, 1983 [from ballet Glass Pieces, 1983]; Dance from Akhnaten, 1984 [from op Akhnaten, 1984]; Music from the CIVIL warS (Cologne section), opt. SATB, orch, 1984 [from music theatre piece, 1984]; The Light, tone poem, 1987; Vn Conc., 1987; The Canyon, 1988; Itaipu, 1989; Passages, chbr orch, 1990, collab. Ravi Shankar; Conc. grosso, chbr orch, 1992; Low Symphony, 1992 [based on D. Bowie, B. Eno: *Low*]; Sym. no.2, 1994; Sym. no.3, 1994; Conc. for Sax Qt and Orch, 1995; Heroes Sym., 1996 [based on Bowie, Eno: *Heroes*]

EDWARD STRICKLAND

Glasschord [glass chord, glassichord]. The name said to have been given by Benjamin Franklin to the *fortepiano à cordes de verre*, a crystallophone invented by one Beyer of Paris *c*1785. The instrument consisted of a series of glass bars with a three-octave compass, variously given as *c* to *c'''*, *f* to *f'''* and *g* to *g'''*, laid horizontally on a thick cloth strip and struck from above by small wooden cloth-covered hammers controlled by a keyboard. There were no dampers. Similar instruments were produced by other makers well into the following century, including Chappell's PIANINO. The musical uses of the glasschord, difficult to specify precisely, probably involved giving the pitch to choirs and perhaps assisting amateurs in tuning

pianos in an age when they were less stable and professional tuners less available. The term is occasionally applied to the armonica (*see* MUSICAL GLASSES), invented by Benjamin Franklin in 1761.

HOWARD SCHOTT

Glasser, Stanley (*b* Johannesburg, 28 Feb 1926). South African composer. After taking a degree in economics in South Africa he went to England in 1950 to study music, first with Frankel and then Seiber. In 1952 Glasser won a Royal Philharmonic Society prize, and from 1955 to 1958 read music at Cambridge. After three years as a lecturer at Cape Town University he returned to England in 1963; from 1969 to 1991 he was head of music at Goldsmiths College, University of London, and was appointed to the first chair in Music in 1989. In 1997 he was awarded an honorary DMus from Richmond College, the American International University of London.

Glasser's output covers many different styles and genres, popular and serious. His lighter music includes jingles for South African radio, a full-length musical, *Mr Paljas* (1962), several numbers from the first African musical *King Kong* (1959), for which he was also musical director, and the first full-length South African ballet, *The Square* (1961). He was also the country's first composer of electronic music in his incidental music to Eugene O'Neill's *Emperor Jones*. His earliest extant pieces are neo-classical essays, which display a characteristic fusion of traditional and modern procedures, often with a tonally orientated use of serial technique. Several of his later works incorporate both the techniques of Western popular music and of African folk music, the latter reflecting Glasser's activity as an ethnomusicologist who has worked with the Pedi and Xhosa people of the northern Transvaal and Transkei. In *The Chameleon and the Lizard* (1970), based on a South African legend about the origin of death, the style is mostly direct and uncomplicated, and a strong element of music theatre is involved. *Zonkizizwe* ('All the People'), an ebullient cantata sung in English, Zulu and Afrikaans, is reminiscent of Walton and Bernstein in its rhythmic verve and melodic appeal. Glasser is the author of *The A–Z of Classical Music* (London, 1994).

WORKS
(*selective list*)

Dramatic: Emperor Jones (E. O'Neill), tape, 1959; The Square (ballet, 2), orch, jazz ens, 1961; Mr Paljas (musical), 1962; The Gift (comic chbr op, 1, R. Duncan), 1976; Ezra (biblical drama, E. Ingles), 1996; incid music

ARNOLD WHITTALL/MALCOLM MILLER

Glass harmonica. *See* MUSICAL GLASSES.

Glaucus [Glaukos] **of Rhegium** (*fl* Rhegium [now Reggio Calabria], *c*400 BCE). Greek writer from the south-west coast of Italy. He was the author of a treatise (now lost) *On the Ancient Poets and Musicians*, a major source for portions of the Pseudo-Plutarch *On Music*. The musical writings of the philosopher known as Heraclides Ponticus may have been an intermediary source. Pseudo-Plutarch mentioned the author, title and contents of this treatise in *On Music* (1132e, 1133f, 1134d–f); at least a portion of the material on Terpander's supposed debt to Homer and Orpheus (1132f) and concerning Clonas and Archilochus (1133a) may also derive from Glaucus.

Glaucus's work apparently showed a practical concern with compositions and composer-poets; the latter he attempted to arrange in a sequence based on the line of succession from master to pupil. His familiarity with technical details recalls the expertise of DAMON, his contemporary, and foreshadows that of ARISTOXENUS. Conjectures that he, like Aristoxenus, came from a family of musicians and was himself a professional have no support except his stress on the prior development of aulos playing and singing to aulos accompaniment. To be sure, this emphasis is strikingly evident. It provides a welcome counterbalance to the usual concentration on the kithara; moreover, it came at a time when the aulos had few champions but many attackers, among them ARISTOPHANES. The influence Glaucus exercised was probably more extensive than the available evidence would suggest.

WARREN ANDERSON/THOMAS J. MATHIESEN

Glaus, Daniel (*b* Berne, 16 July 1957). Swiss composer and organist. He trained as a primary school teacher and then studied music at Berne Conservatory with Theo Hirsbrunner (theory diploma, 1980) and Heinrich Gurtner (diploma as organ soloist, 1983), and he also studied conducting with Paul Theissen. From 1981 he studied composition with Klaus Huber at Freiburg and continued his organ studies in Paris with Gaston Litaize and Daniel Roth. Glaus is a church musician in the widest sense of the word: he is organist at the municipal church of Biel, where he is also concerned with organ building, he teaches at the conservatories of Biel (organ) and Zürich (music theory and contemporary music), and he also writes compositions which attract much attention both within and beyond the field of church music. His works, which lay great emphasis on the human voice, are mainly on

religious subjects, even when purely instrumental, and show both a particular liking for mystical traditions (such as those of Swedenborg and Eckhart) and an obvious sense of political commitment. While in his earlier compositions Glaus tended to set different stylistic layers against each other, since the mid-1980s his works have shown progressive thinning of the tonal material, with the aim of making it possible to experience time and space in new ways. He has several times worked in collaboration with the Biel pastor and writer Andreas Urweider.

PATRICK MÜLLER

Glazunov, Aleksandr Konstantinovich (*b* St Petersburg, 29 July/10 Aug 1865; *d* Paris, 21 March 1936). Russian composer. His father was a book publisher, his mother a pianist. Gifted with an exceptional ear and musical memory, he began to study the piano at the age of nine and to compose at the age of 11; his first teacher was Ėlenkovsky. In 1879 he met Balakirev, who recommended Rimsky-Korsakov as a private composition teacher. These studies lasted less than two years as the pupil progressed 'not from day to day but from hour to hour', in Rimsky-Korsakov's words. A lifelong friendship developed between teacher and student, despite the difference in age. When he was 16 Glazunov completed his First Symphony, which was given a successful première on 29 March 1882 under Balakirev's direction. In November of the same year Glazunov's First String Quartet was performed. His precocious talent aroused the interest of the art patron Mitrofan Belyayev, who devoted his immense fortune to furthering the career of Glazunov and the younger generation of Russian composers. In 1885 Belyayev organized the Russian Symphony Concerts in St Petersburg and a music publishing house in Leipzig. The 'Belyayev Circle', as it became known, assembled every Friday in the palatial home of the patron, and Glazunov, despite his youth, became a prominent member, with Rimsky-Korsakov, Lyadov, Vītols, Blumenfeld, V.V. Ėval'd and others. In a way, the Belyayev Circle continued from where The Five had left off, but with an important difference: by the 1880s, the battle for a national Russian school had been won; the Belyayev Circle consolidated the gains and effected a rapprochement with the West. As Rimsky-Korsakov said: 'The Balakirev circle represented a period of battle and pressure on behalf of the development of Russian music'.

In 1884 Belyayev took Glazunov on a trip to western Europe; they met Liszt in Weimar, where Glazunov's First Symphony was performed. After Borodin's sudden death in 1887, Glazunov (together with Rimsky-Korsakov) became deeply involved in completing and revising the unfinished works left by him. Glazunov's exceptional memory enabled him to write down the overture to *Prince Igor* as he had heard it played by the composer on the piano; he also completed Act 3 after extant sketches and orchestrated the incomplete Third Symphony. In 1888 Glazunov made his début in orchestral conducting, an art which he loved but never fully mastered. The following year he conducted his Second Symphony in Paris at the World Exhibition. Although he enjoyed international acclaim, he experienced a creative crisis in 1890–91, yet soon emerged to a new maturity; during the 1890s he completed three symphonies, two string quartets, and the successful ballet *Raymonda* (1896–7). In 1899 he was appointed professor at the St Petersburg Conservatory, with which he remained connected for some 30 years. During the revolutionary year 1905 he resigned on 4 April in protest at the dismissal of Rimsky-Korsakov, who was in sympathy with the striking students. On 14 December Glazunov agreed to return after most of the demands of the liberal-minded professors had been met. Two days later he was elected director of the conservatory, a post he kept until 1930, although he had left for western Europe in 1928. During his long tenure he worked ceaselessly to improve the curriculum, raise the standards of staff and students, and defend the dignity and autonomy of the conservatory. Among his innovations were an opera studio and a students' philharmonic orchestra. He showed paternal concern for the welfare of needy students (for example, Shostakovich). At the end of each academic year he personally examined hundreds of students and wrote brief comments on each. After the October Revolution of 1917 he established a sound working relationship with the new regime, especially with Lunacharsky, the minister of education; because of Glazunov's immense prestige, the conservatory received special status among institutions of higher learning. Yet there were attacks on him from within the conservatory: the teaching staff demanded more progressive methods, the students greater rights. He viewed with a sense of pain the tide of innovation and its destructive tendencies, and was deeply affected by the unjust way in which the classical heritage was being treated. Tired of the controversy, he welcomed the opportunity to go abroad in 1928; some bitterness is evident in his letters to Steinberg, who directed the conservatory in his absence.

At the time Glazunov was elected director of the conservatory (1905), he was at the height of his creative powers. His best works date from that period, among them the Violin Concerto and Eighth Symphony. This was also the time of the greatest international acclaim: he went abroad in 1907, conducted the last of the Russian Historical Concerts in Paris on 17 May and received the

Aleksandr Konstantinovich Glazunov

honorary DMus from the universities of Oxford and Cambridge. While in London he spent a considerable time at the Royal Academy of Music and the Royal College of Music, studying their curricula. In the meantime, there were cycles of all-Glazunov concerts given in St Petersburg and Moscow in celebration of his 25th anniversary as a composer. But the time and energy he spent on revitalizing the St Petersburg Conservatory took their toll: there was a decided decline of creative productivity in the succeeding years. He left his Ninth Symphony unfinished (the first movement was written in piano score in 1910), and only his First Piano Concerto (1910–11, although conceived earlier) reflects his former mastery, while the Second Concerto (1917) shows an autumnal decline. He composed his Sixth String Quartet (1921) specially for a young and highly talented group which called itself the 'Glazunov Quartet'; this ensemble toured Europe in the 1920s with immense success.

Like all Russians, Glazunov suffered much deprivation during World War I and the ensuing civil war years. Despite all hardships he remained active: he conducted concerts in factories, clubs and Red Army posts, participated in organizational work (with the All-Russian Union of Professional Musicians and the Leningrad PO) and was named People's Artist of the Republic in 1922 (in honour of his 40th anniversary as a composer). He played a prominent role in the Russian observation of Beethoven's centenary in 1927 as both speaker and conductor. On 15 June 1928 he left for Vienna to represent the USSR at the Schubert centenary celebrations; he extended his leave of absence several times to remain abroad, although he kept in close touch with events in Leningrad, showing much concern for the conservatory. On 19 December 1928 he conducted an evening of his works in Paris; during the years 1929–31 he conducted in Portugal, Spain, France, England, Czechoslovakia, Poland, the Netherlands and the USA. In 1932 his health deteriorated and he settled in Paris with his wife Ol'ga Gavrilova and adopted daughter Yelena Gavrilova, a pianist. (Under the name of Yelena Glazunov, she appeared frequently as soloist in his piano concertos with him conducting.) Although he now composed little, some of his last works show professional polish, as, for example, the Saxophone Concerto op.109 (1934). His last thoughts turned to his former teacher and friend Rimsky-Korsakov, who had died in 1908: he wrote some recollections about him and accepted membership in a Soviet-sponsored committee to commemorate the 25th anniversary of Rimsky-Korsakov's death. On 14 October 1972 Glazunov's remains were transferred to Leningrad and reinterred in an honoured grave. A research institute devoted to him was established in Munich and a Glazunov archive is maintained in Paris.

Within Russian music, Glazunov has a significant place because he succeeded in reconciling Russianism and Europeanism. He was the direct heir of Balakirev's nationalism but tended more towards Borodin's epic grandeur. At the same time he absorbed Rimsky-Korsakov's orchestral virtuosity, the lyricism of Tchaikovsky and the contrapuntal skill of Taneyev. There was a streak of academicism in Glazunov which at times overpowered his inspiration, an eclecticism which lacks the ultimate stamp of originality. The younger composers (Prokofiev, Shostakovich) abandoned him as old-fashioned. But he

remains a composer of imposing stature and a stabilizing influence in a time of transition and turmoil.

BORIS SCHWARZ

Gleason, Frederick G(rant) (*b* Middletown, CT, 17/18 Dec 1848; *d* Chicago, 6 Dec 1903). American composer. He studied with Dudley Buck in Hartford, before working further in Leipzig (1869–70), Berlin and London. He returned to Connecticut in 1875 where he began teaching, composing and performing. From 1877 he lived in Chicago, becoming a prominent musician there, first as a teacher at the Hershey School of Music, then in 1891 as head of the theory department at the American Conservatory, and from 1900 as its director. He was music critic for the *Chicago Tribune*, 1884–9, and editor of the *Music Review*, 1891–4. He belonged to both the New York Manuscript Society and the Chicago Manuscript Society (as its first president).

Gleason composed in nearly all genres, and wrote two operas to his own librettos. He finished the three-act *Otho Visconti* in 1880, but it was not performed in its entirety until 1907 at the College Theater, Chicago. His second opera, *Montezuma* (1885), never had a complete performance; his *Auditorium Festival Ode* was first given at the dedication of the Chicago Auditorium in December 1889. Gleason also wrote two symphonic poems, cantatas, choral music, a piano concerto and organ works. The conductor Theodore Thomas championed Gleason's music, which is characterized by its use of leitmotifs, full orchestrations and luxurious harmonies.

N. LEE ORR

Gleason, Harold (*b* Jefferson, OH, 26 April 1892; *d* La Jolla, CA, 28 June 1980). American organist and musicologist. He studied civil engineering at the California Institute of Technology (1910–12) and also studied music privately while working as a church organist. In 1917 he moved to Boston, where he studied with Lynnwood Farnam and directed the Boston Music School Settlement. In 1918 he was organist and choirmaster of the Fifth Avenue Presbyterian Church of New York. He then moved to Rochester, where he became personal organist and director of music in the house of George Eastman (the founder of Kodak), established and directed the Hochstein School (1919–29), and played at various churches. During this period he studied the organ with Joseph Bonnet in Paris (1920, 1922–3). In 1921 Gleason became head of the organ department at the Eastman School of Music of the University of Rochester and served until 1953. He was also professor of musicology and music literature and director of graduate studies. A renowned teacher, he gradually moved into research and writing, and in 1937 published his widely used *Method of Organ Playing* (1937, 8/1996). Later publications included *Examples of Music before 1400* (1942), *Music in America* (with W.T. Marrocco, New York, 1964) and the study guides *Music Literature Outlines* (1949–55). He was married to the concert organist Catharine Crozier.

Glebov, Igor'. *See* ASAF'YEV, BORIS VLADIMIROVICH.

Glebov, Yevgeny Aleksandrovich (*b* Roslavl', Smolensk district, Russia, 10 Sept 1929; *d* 12 Jan 2000). Belarusian composer. He graduated from the Conservatory of Belarus (1956) having studied with Anatoly Bogatïryov. He taught musical and theoretical disciplines at the Minsk Music School (1953–63), and from 1971 he taught composition at the Conservatory of Belarus (later the Belarusian Academy of Music), and was appointed professor in 1983. A laureate of the State Prize of the Belarusian SSR (1970), he was awarded the honorary title of People's Artist of the USSR in 1984.

Although Glebov is noted for his use of a wide range of genres, his most significant achievements are concentrated in symphonic music and ballet (in these spheres he occupies a leading position among Belarusian composers). His creative development is palpably influenced by Shostakovich and, to a lesser degree, by early Stravinsky. His symphonies and ballets possess a dramatic and confrontational character and demonstrate a mastery of continuous development, thematic transformation, polyphony and brilliant orchestral colouring. The opera *Master i Margarita* ('The Master and Margarita') and his ballets draw their subjects from classic works of Belarusian and world literature.

ELENA SOLOMAKHA

Glee. A type of unaccompanied partsong, typically for male voices though often including female voices, which flourished in England from about 1750 until World War I. The word is derived from the Old English *gleo*, meaning 'mirth' or 'entertainment'. The term 'glee' first appeared in songbooks of the later 17th century, applied to short songs harmonized for vocal ensemble and often intended to be accompanied by instruments. It was not until the mid-18th century that the glee proper developed as a sizable, through-composed partsong, designed to be sung without instrumental support, with some sections of its words set contrapuntally.

The main inspiration behind the 18th-century glee was the English madrigal of 1590–1630, which was being rediscovered and performed at the time by bodies such as the Academy of Ancient Music (founded in 1710) and the Madrigal Society (founded in 1741). To a generation whose experience of partsong was largely limited to obscene catches, the flowing lines, sensuous textures and poetic seriousness of the Elizabethan and Jacobean madrigal came as a revelation and a challenge.

The Noblemen and Gentlemen's Catch Club in London gave glees enormous encouragement from 1763 onwards by offering munificent prizes for new partsongs (in four categories: serious glee, light glee, catch and canon). Samuel Webbe (i), who emerged during the 1770s as England's most profound and versatile glee composer, won 17 Catch Club prizes for his work; J.W. Callcott's career as a composer was launched when he won three of the Club's prizes simultaneously in 1785. Another prizewinner was the Earl of Mornington, whose *Here in cool grott* was judged the best light glee in 1779. Many prizewinning glees became popular favourites for several generations.

The glee borrowed many characteristics from the earlier madrigal: a tendency to divide the text into small sections and to give each one a different emotional colouring, irrespective of the poem's metrical structure; the inclusion of short homophonic passages where one or more voices temporarily drop out of the ensemble to give a semichorus effect; imitative counterpoint and close canon; and unexpected changes of metre from duple to triple time or vice versa. On the other hand, it also had contemporary characteristics: detailed dynamics, including *sf* and *fp* markings; multi-sectional forms derived from Baroque and *galant* instrumental music; chromatic harmony; and subject matter that reached beyond romantic love, hunting, fairies and the progress of the seasons to such topics as income tax (Webbe's *My pocket's low and taxes high*, *c*1800), the adventures of a merchant ship in a storm (his *When winds breathe soft*, *c*1775), and the religion of a London businessman (Callcott's *O snatch me swift*, 1790).

The most popular vocal groupings for glees in the late 18th century were ATB, TTB and ATTB, with the alto parts sung by male falsettists; increasingly, however, composers wrote for SATB and SSATB groupings, requiring women to sing the soprano parts and reflecting a general social acceptance of women into choral clubs and singing groups. Between 1795 and 1815 there was a temporary fashion for glees with instrumental accompaniment; but this passed, and glees went forward into the 19th century confirmed as an unaccompanied form.

The later history of the glee is well documented but incompletely researched. The genre spread to lower social groups during the 19th century, helped by the formation of large choral societies, the proliferation of trained choirs in parish churches and the efforts of educationists to make the lower classes fluent in staff and Tonic Sol-fa notation. By 1870 the publication of glees was a highly lucrative business, in which Novello & Co. of London tried, but failed, to corner the market. Leading composers of glees in the 19th century (also well known for their church music) were William Beale, William Horsley, R.L. Pearsall, J.L. Hatton, Joseph Barnby and John Stainer; many more were written by composers whose names are now forgotten. In about 1885 Baptie drew up a list of nearly 23,000 partsongs published in Britain since 1750 (in *GB-Lbl* M.R.Ref.3.a; see Johnson, 1979), and reckoned that as many again had been composed but had not reached print.

After 1880 composers tended to avoid the word 'glee' and to use the term PARTSONG instead. The real end of the tradition came, however, with World War I. In about 1920 a new type of English partsong emerged, selfconsciously based on medieval and Renaissance models and modal harmony, and the glee went permanently out of fashion.

A reassessment of the glee is long overdue. Its 160-year history includes a great deal of inept, hastily written and commercial work, but the genre deserves to be judged on its finest achievements, which give a touching picture of the inward, private side of the English psyche at a time when England's main energies were turned outwards towards Empire.

DAVID JOHNSON

Gleichschwebende Temperatur (Ger.). *See* EQUAL TEMPERAMENT.

Gleim, Johann Wilhelm Ludwig (*b* Ermsleben, nr Halberstadt, 2 April 1719; *d* Halberstadt, 18 Feb 1803). German poet. After studying law at Halle, he became a tutor at Potsdam and then entered the service of the Prince of Brandenburg. In 1747 he became secretary to the cathedral chapter at Halberstadt, and spent the rest of his life there, held in deep affection by all who knew him, and corresponding with many of his most distinguished contemporaries.

From the publication of his first verse collection, *Versuch in scherzhaften Liedern* (Berlin, 1744–58), Gleim was the acknowledged leader of the group of anacreontic poets; among those he influenced were his friends Uz, Götz, Klopstock and Wieland. He sang the praises of wine, comradeship, women and song, yet a moral tone is always present; the lightness and ease of his verse held an obvious attraction for composers. He served in the Second Silesian War, and his patriotic *Kriegs- und Siegeslieder* and *Preussische Kriegslieder* (1758) were extremely popular; Telemann and Schubart set some of them to music, and Mozart's *Ein deutsches Kriegslied: 'Ich möchte wohl der Kaiser sein'* (K539) is of that type, though later. The anacreontic poems were still more appreciated by composers – C.P.E. Bach, Beethoven, Haydn, Reichardt, Schubert and Spohr all set some. Gleim is also important as the translator and adapter of medieval German love-songs, and as the author of odes and many occasional pieces.

PETER BRANSCOMBE

Glein, Erasmus de (*d* ?Dresden, 1599). Instrumentalist and composer, active in Germany. He played the trumpet and possibly other instruments. He was appointed a member of the orchestra at the Saxon court chapel in Dresden in about 1568, and subsequently became its 'instrument keeper'. His salary in 1576 was 120 guilders. According to Eitner, in 1589 he received an 'ex gratia' payment of 500 guilders. Glein joined three other Dresden musicians – Scandello, Le Maistre and Wessalius – in producing *Epithalamia, in honorem … Nicolai Leopardi* (Nuremberg, 1568[21]). His contribution, the third of the four pieces, is an imitative six-part motet in two sections, *Nicoleo Kuneganda* and *Ipse Deus sancto vestras*. Two further six-part motets survive in *D-Dl*: Nu kom der heiden Heilandt and *Resurrexi et adhuc tecum sum*. The anonymous eight-part setting of *Domine probasti me*, which belongs to the introit *Resurrexi* and immediately follows it in the manuscript, may also be Glein's work.

RICHARD MARLOW

Gleisman, Carl Erik (*b* Stockholm, 1767; *d* Stockholm, 9 Dec 1804). Swedish amateur organist and composer. He was employed as a secretary at the state fire insurance office, but also held the post of organist at the Mariakyrka from 1792. He was a regular guest at the Palmstedt literary circle and was notable for his *Sällskapsvisor* (parlour songs), 11 of which were published in Åhlström's periodical collections *Musikaliskt tidsfördrif* (1795–8) and *Skaldestycken satte i musik* (1795–8). Gleisman wrote two arias for *Eremiten* (1798), an opera on a libretto after Kotzebue, to which Abbé G.J. Vogler, Johan Wikmanson and others contributed, and he may have contributed to other collaborative stage productions. He also composed three polonaises and a waltz for the piano, which were published in *Musikaliskt tidsfördrif* (1792–1802). His style is characterized by harmonic and melodic simplicity.

C.-G. STELLAN MÖRNER/BERTIL H. VAN BOER

Gleissner, Franz (*b* Neustadt, 1759; *d* Munich, 18 Sept 1818). German composer and lithographer. After early training in the seminary at Amberg, he moved to Munich, where he continued studies in music and philosophy and became a court musician. There he met ALOIS SENEFELDER, the inventor of lithography, initially when he was commissioned to compose some songs in connection with Senefelder's theatrical activities. In 1796 Gleissner was approached by Senefelder to make commercial use of his method of relief printing from stone for the publication of music. Gleissner was the first to see the possibilities of this and had his *12 neue Lieder* produced by it the same year. This was the beginning of a partnership that lasted over 20 years. Between 1796 and 1798 Senefelder and Gleissner printed music from etched stones, but in 1798 or early in 1799 Senefelder developed a chemical method of printing from stone, for which he and Gleissner were granted a 15-year privilege on 3 September 1799 by Maximilian Joseph of Bavaria. This was the planographic process now called lithography. An announcement of the privilege in a Munich newspaper on 26 September 1799 was seen by Johann Anton André (*see* ANDRÉ family, (2)), and within a month André entered into an agreement with Senefelder and Gleissner to set up a lithographic workshop in Offenbach. Lithographical music began to come off André's presses early in 1800. As the first lithographer with a knowledge of music, Gleissner probably instructed André's music engravers in the new process. Senefelder soon fell out with André over the latter's business plans, and in August 1801 he left for Vienna, where he set up the Chemische Druckerey, eventually securing a privilege to print by lithography in Lower Austria on 18 January 1803. Gleissner apparently ran the Chemische Druckerey on a day-to-day basis. The press was not successful, either technically or commercially, and produced some music printing of very poor quality. Its output included compositions by Gleissner, stocks of which remained unsold when Senefelder disposed of the press to Sigmund Anton Steiner, probably in 1805 (*see* HASLINGER). Gleissner and Senefelder returned to Munich in October 1806 to establish a new press for G.J. Vogler and Johann Christoph Freiherr von Aretin. Vogler soon withdrew from the arrangement, but for some years Gleissner and Senefelder ran the press, producing a variety of work. In October 1809 Senefelder and Gleissner were offered posts at the lithographic press of the Bavarian cadastral office, with permission to continue running their own press.

Gleissner was a composer of some merit, and wrote instrumental and vocal works, many of which are among the earliest examples of lithography. However, what

remains significant today is his role in promoting the use of lithography for music printing.

VINCENT DUCKLES/MICHAEL TWYMAN

Glen. Scottish family of makers of bagpipes and other musical instruments and publishers of bagpipe music.

Thomas Macbean Glen (*b* Inverkeithing, Fife, 4 May 1804; *d* Edinburgh, 12 July 1873) established an instrument making firm at 250 Cowgate, Edinburgh, in 1827. Probably the firm at first undertook various kinds of business; it is not listed in the Edinburgh Directory specifically as a 'pipe and flute maker's' until 1833. Sets of Glen's bagpipes along with other intruments have survived and, according to Baptie, he invented the wooden ophicleide (serpentcleide). He retired in 1867 and the business was continued as J. & R. Glen by his sons, John Glen (*b* Edinburgh, 13 June 1833; *d* Edinburgh, 29 Nov 1904) and Robert Glen (*b* Edinburgh, 13 Jan 1835; *d* Edinburgh, 21 Oct 1911). Both sons were distinguished musical scholars. John Glen formed a collection of old Scottish printed music books which was acquired at his death by Lady Dorothea Ruggles-Brise, and passed in 1927 to the National Library of Scotland. Robert Glen made an important collection of historic musical instruments which was drawn upon for several major exhibitions; most of the collection is now held by museums in Edinburgh and Glasgow.

In 1911 the firm of J. & R. Glen moved to premises at 497 Lawnmarket, Edinburgh, and was thereafter managed by Thomas Glen (*b* Edinburgh, 5 Aug 1867; *d* Edinburgh, 21 Aug 1951), son of John Glen, then by Andrew M. Ross (1891–1979) and his son Andrew J. Ross (*b* Edinburgh, 1930; *d* Edinburgh, 1980), relatives by marriage of the Glens. The firm passed out of the family's hands in 1978, the premises and name being used for a further four years by an unrelated proprietor. Archival documents from the firm survive in the National Library of Scotland and the Edinburgh University Collection of Historic Musical Instruments.

A separate firm was established in 1833 by Alexander Glen (i) (*b* Inverkeithing, 19 Aug 1801; *d* Edinburgh, 14 March 1873), brother of T.M. Glen; by 1844 Alexander was known for his skill in bagpipe making. This firm occupied various premises in Edinburgh. His son David Glen (i) (*b* Edinburgh, 3 April 1853; *d* Edinburgh, 25 June 1916) joined the firm in about 1869, and continued it in his own name from 1873 (at its final address, 8 Greenside Place). In 1911 Alexander Glen (ii) (*b* Edinburgh, 31 Dec 1877; *d* Edinburgh, 4 Feb 1951) and David Glen (ii) (*b* Edinburgh, 1 Dec 1883; *d* Brora, 5 April 1958), sons of David Glen (i), became partners in the firm, which continued as David Glen & Sons until 1949, when it was acquired by J. & R. Glen.

Several members of the family published tutors for the bagpipe and collections of bagpipe tunes.

DAVID JOHNSON/ARNOLD MYERS

Glennie, Evelyn (*b* Aberdeen, 19 July 1965). Scottish percussionist. Profoundly deaf since early childhood, she studied timpani and percussion from the age of 12, and in 1982 entered the RAM. After winning the Shell/LSO Award in 1984 she embarked on a glittering international career. Her versatility and virtuosity have gained her an unusually diverse audience, and many composers have written works for her, including James MacMillan (whose concerto *Veni, veni Emmanuel* she first performed at the 1992 Proms), Dominic Muldowney, John McLeod, Richard Rodney Bennett and Thea Musgrave. She has also made numerous recordings, several of which have won awards. Glennie tours regularly throughout the world, and gives an annual series of concerts and masterclasses in North America. Fascinated by non-Western musical cultures, she has given recitals and workshops in Japan and India, and in 1994 performed with a leading gamelan orchestra in Indonesia. Her solo concerts are distinguished not only by her dazzling playing skills but also by her imaginative programming. Glennie has written music for television, films and documentaries, and founded the Evelyn Glennie Percussion Composition Award in 1991 to encourage the creation of new works for percussion. She has received honorary doctorates from several academic institutions and was created an OBE in 1993. Her autobiography, *Good Vibrations*, was published in London in 1990.

JAMES HOLLAND

Evelyn Glennie

Gletle, Johann Melchior (*b* Bremgarten, nr Zürich, July 1626; *d* Augsburg, ?2 Sept 1683). Swiss composer and organist. He was organist of Augsburg Cathedral from 1651 and Kapellmeister from April 1654; he held both positions until his death. After 1670 his poor health greatly restricted his activities.

There are 219 extant compositions by Gletle. All the sacred music is in the Italian-influenced concertato style common to Austria, southern Germany and Switzerland in the 17th century. According to Schanzlin, the motets contain elements found both in sacred concertos such as those of Schütz and in the church cantatas of the end of the century. There is no clear separation between aria and recitative, nor do the instrumental parts show much independence. The text-setting is conscientious in all respects, but especially with regard to expressive devices such as embellishment and chromaticism. Gletle also shows a penchant for unusual modulations. In both the secular and sacred works the melodies are songlike, revealing both Italian and folk influences.

WORKS

all published in Augsburg

Edition: *J.M. Gletle: Ausgewählte Kirchenmusik*, ed. H.P. Schanzlin and M. Zulauf, SMd, ii (1959) [SZ]

CECIL ADKINS

Glick, Srul Irving (*b* Toronto, 8 Sept 1934). Canadian composer. He studied music at the University of Toronto and in Paris. The cantorial music performed by his father David, who emigrated to Canada from Russia in 1924, was also a strong influence. From 1962 to 1986 Glick worked in Toronto as a music producer for the CBC. In 1969 he became the choir director (and in 1978 also the composer-in-residence) at Beth Tikvah Synagogue (Toronto). He has written nearly 200 pieces of liturgical music and has received three awards for his contributions to Jewish music. In his earliest concert works, such as *Suite Hébraïque* no.1 (1961) and *. . . i never saw another butterfly . . .* (1968) (a song cycle to poems by children from the Terezín concentration camp), Glick achieves great expressive power and emotional depth through economical means: the use of a major scale with a raised fifth degree, for instance, or the spare but well-calculated use of dissonant tone clusters. More recently Glick has written in an openly tonal Romantic idiom, earning much recognition for his large-scale choral works and chamber music. (*EMC2*)

WORKS

(selective list)

INSTRUMENTAL

Orch: Sinfonia Concertante, str, 1961; Suite Hébraïque no.1, 1961; Gathering In, str, 1970; Ps for Orch, 1971; Symphonic Elegy, str, 1974; Vn Conc. 1976; Sonata 'Devequt', 1982; Divertimento, str, 1987; The Reawakening, 1991; Pf Conc., pf, str, 1992

Chbr and solo inst: Suite Hébraïque no.1, arr. cl/s sax, pf, 1963; Suite Hébraïque no.2, cl, vn, va, vc, pf, 1969; Prayer and Dance, vc, pf, 1975; Suite Hébraïque no.3, str qt, 1975; Suite Hébraïque no.4, a sax/cl/va, pf, 1979; Suite Hébraïque no.5, fl, cl, vn, vc, 1980; Sonata, fl, pf, 1983; Str Qt no.1, 1984; Suite Hébraïque no.6, vn, pf, 1984; Sonata, ob/s sax, pf, 1987; Trio, fl, va, hp, 1988; Sonata, vc, pf, 1989; Sonata, a sax, pf, 1990; Trio, vn, vc, pf, 1990; Friendship Qnt, pf, str qt, 1994; Str Qt no.2, 1994; The Klezmer's Wedding, cl, vn, pf, 1996; Pf Sonata, 1996

VOCAL

ROBIN ELLIOTT

Glière [Glier], **Reyngol'd Moritsevich** [Glière, Reinhold] (*b* Kiev, 30 Dec 1874/11 Jan 1875; *d* Moscow, 23 June 1956). Russian composer. He studied at the Moscow Conservatory until 1900 with Hřímalý for the violin and with Taneyev, Arensky, Konyus and Ippolitov-Ivanov for theory and composition. From 1920 to 1941 he was a professor of composition at the conservatory, where his pupils included Davidenko, Novikov, Rakov and other well-known Soviet composers. He also taught for a while in Kiev; there, his pupils included Lyatoshyns'ky. He served as chairman of the organizing committee of the USSR Composers' Union (1938–48). He held a doctorate in art criticism, several State Prizes (1942, 1946, 1948, 1950) and the title People's Artist of the USSR (1938), the RSFSR, the Uzbek SSR and the Azerbaijani SSR.

Glière was a direct heir to the Russian Romantic tradition, working predominantly on a grand scale in the large forms (opera, ballet, symphony, symphonic poem etc.). The most important element in his style is expressive melody. His ballet music is marked by particular sensitivity and beauty, colourfulness and pictorialism; the most popular of his works in this genre are *Krasnïy tsvetok* ('The Red Flower') and *Mednïy vsadnik* ('The Bronze Horseman'). In his symphonic works he drew above all on the Russian epic tradition, that of Borodin and Glazunov. This is especially clear in his Third Symphony 'Il'ya Muromets', named after a Russian folk hero, but all his symphonies, concertos and symphonic poems show a monumentality of image and a brilliant aural imagination.

His lively interest in the music of Slavonic peoples, notably the Ukrainians, and in Eastern music led him to write stage works based on the folk culture of the Transcaucasus and Central Asia (in this he was a pioneer). Examples include the operas *Shakh-Senem*, *Gyul'sara* and *Leyli i Mejnun*, which are at once organic offshoots of the Russian tradition and genuinely national pieces that stimulated the development of professional music in the eastern republics. Besides his creative work, Glière also appeared frequently as a conductor and pianist. Many of his compositions have entered the standard repertory, and he is considered the founder of Soviet ballet.

WORKS
(*selective list*)

OPERAS

Zemlya i nebo [Earth and Sky] (op-orat, after Byron), 1900
Shakh-Senem (3, after Azerbaijani legend), 1923; Baku, 4 May 1934
Gyul'sara (music drama), 1936, Tashkent, 24 April 1937; rev. as op, Tashkent, 25 Dec 1949, collab. T. Sadïkov
Leyli i Mejnun, 1940
Rashel' [Rachel] (after G. de Maupassant: *Mademoiselle Fifi*), 1942

BALLETS

Khrizis (ballet-pantomime), 1912
Ovechiy istochnik [Sheep's Spring], 1922; rev. as Komediantï [The Comedians], 1930
Kleopatra (Egipetskiye nochi), 1925
Krasnïy mak [The Red Poppy], 1926–7, Moscow, 1927; rev. as Krasnïy tsvetok [The Red Flower], 1949
Mednïy vsadnik [The Bronze Horseman] (after A.S. Pushkin), 1948–9; Leningrad and Moscow, 1949
Taras Bul'ba (after N.V. Gogol), 1951–2
Dog' Kastilii [with music from Sheep's Spring], 1955

ORCHESTRAL

Syms.: no.1, E♭, op.8, 1899–1900; no.2, c, op.25, 1907–8; no.3 'Il'ya Muromets', op.42, 1909–11
Concs.: Hp Conc., op.74, 1938; Coloratura S Conc., 1943; Vc Conc., 1946; Hn Conc., 1950; Vn Conc., 1956, completed and orchd by Lyatoshynsk'y
Sym. poems: Les Syrènes, op.33, 1908; The Zaporozhy Cossacks, op.64, 1921; Zapovit [Testament], op.73, after Shevchenko, 1938
Ovs.: Ferganskiy prazdnik [Ferghana Fête], op.75, 1940; Druzhba narodov [The Friendship of Peoples], op.79, 1941; Ov. on Slav Themes, 1941; For the Happiness of the Fatherland, 1942; Twenty-five Years of the Red Army, 1943; War Ov., *c*1943; Victory, 1945
Military band: Fantasy for the Festival of the Comintern, 1924; Red Army March, 1924; Heroic March for the Buryat-Mongolian ASSR, op.71, 1936; Solemn Ov. for the 20th Anniversary of the October Revolution, op.72, 1937

OTHER WORKS

Vocal: Imitation of Ezekiel, nar, orch, 1919; 2 Poems, op.60, S, orch, 1924; Zazdravnaya [A Toast], 1v, orch, *c*1939; many songs with pf
Chbr: Str Sextet, op.1, 1900; Str Qt no.1, op.2, 1900; Str Octet, op.5, 1900; Str Sextet, op.7, 1902; Str Qt no.2, op.20, 1905; Str Qt no.3, op.67, 1928; Str Qt no.4, op.83 (1946)
Other inst: Romance, op.3, vn, pf, 1902; Ballad, op.4, vc, pf, 1902; 2 Pieces, op.32, db, pf, 1908; Pieces, op.35, various insts with pf, 1908; 8 Pieces, op.39, vn, vc, 1909; 12 Easy Pieces, op.45, vn, pf, 1909; 12 Pieces, op.51, vc, pf, 1910; 10 Duos, op.53, 2 vc, 1911; 7 Instructive Pieces, op.54, vn, pf, 1911; many pf pieces and other works

GALINA GRIGOR'YEVA

Gligo, Nikša (*b* Split, 6 April 1946). Croatian musicologist. He graduated in English and comparative literature from Zagreb University (1969) and in musicology from Ljubljana University (1973). He later studied with Koraljka

Kos at Zagreb University (MA 1981) and with Andrej Rijavec at Ljubljana University, gaining the PhD in 1984 with a dissertation on problems of new music. He was awarded scholarships to study at the universities of Cologne, Berlin (with Carl Dahlhaus and Rudolf Stephan) and Freiburg (with H.H. Eggebrecht). He was artistic director of the Music Salon of Zagreb University (1969–86) and programme director of the Music Biennial Zagreb (1973–91). He has taught at the Zagreb Academy of Music since 1986 and the Faculty of Organization and Informatics in Varaždin since 1996. He was on the executive committee of the European Conference of the Promoters of New Music (1989–94) and is vice-president of the section for semiotics at the Croatian Society for Social Sciences and Humanities (from 1995).

Gligo is concerned with the aesthetics, semiotics and terminology of 20th-century music and the use of computers in musicology. His project on the standardization of 20th-century Croatian music terminology resulted in his book *Pojmovni vodič kroz glazbu 20. stoljeća*, which is relevant to both musicology and linguistics, and for which he received the Croatian National Award in the Humanities.
